Innovativity To Productivity

PRODUCTIVE TECHNOLOGIES COMPANY LIMITED

普達特科技有限公司*

(Incorporated in Bermuda and continued in the Cayman Islands with limited liability)

(Stock Code: 650)

UPDATE ON DEVELOPMENT OF EQUIPMENT FOR SEMICONDUCTOR AND SOLAR POWER

This announcement is made by Productive Technologies Company Limited (the "**Company**") on a voluntary basis to keep the shareholders and potential investors of the Company informed of the latest business development of the Company.

Reference is made to the announcement of the Company dated 13 May 2025 in relation to the development of the equipment for semiconductors and solar power (the "**Announcement**"). Unless the context requires otherwise, the capitalized terms contained herein will have the same meanings as those defined in the Announcement.

RECEIPT OF EQUIPMENT EVALUATION AGREEMENT

The Company has received an equipment evaluation agreement for a set of semiconductor high-temperature sulfuric acid cleaning equipment ("**High-Temperature SPM**") equipment (the "**Equipment**") from a customer (the "**Customer**"). The Equipment is currently in the assembly and testing phase, and has already passed multiple process performance and marathon testing by the Customer, with certain performance indicators achieving internationally leading standards. This marks a significant step forward in domestic substitution of High-Temperature SPM in segments conventionally dominated by foreign suppliers. Revenue from the evaluation agreement has not yet been recognized. To the best of the Directors' knowledge, information and belief, having made all reasonable inquiries, the Customer and its ultimate beneficial owners are third parties independent of the Company and its connected persons as of the date of this announcement.

The Equipment adopts a High-Temperature SPM cleaning process and supports multiple critical 12-inch wafer applications, including PR-strip, Post-CMP, and NiPt remove. Such process is widely recognized as highly challenging, with the corresponding market currently dominated by overseas equipment suppliers. The Equipment developed by the Company features domestically leading and internationally first-class high-temperature control capabilities, supporting SPM processes up to 190°C. Marathon testing has verified that the

high-temperature sulfuric acid temperature control range of the end-process chamber is within ±2°C, outperforming the ±5°C range of major overseas suppliers. The Equipment achieved test results aligned with those of international baseline products under highly challenging conditions through a NiPt remove process demonstration. In terms of design, the Equipment integrated the chemical liquid supply system and the process chamber, ensuring greater process compatibility and flexible application configurations. This enables the Company to offer customers a more competitive and cost-effective solution.

Going forward, the Company will be committed to completing the delivery and validation of the Equipment, and expanding customer adoption of the Equipment in high-end application scenarios. The Company will continue to leverage its technical strengths in semiconductor wet process technology to address industry pain points, enhance customer efficiency, and further promote the localization of high-end semiconductor equipment.

GENERAL

The transaction contemplated under the evaluation agreement does not constitute a notifiable transaction of the Company under Chapter 14 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited. The Company will make further announcement(s) as and when appropriate if required.

The Shareholders and potential investors are advised to exercise caution when dealing in the securities of the Company.

By Order of the Board
Productive Technologies Company Limited
Liu Erzhuang
Chairman and Chief Executive Officer

Hong Kong, 23 July 2025

As at the date hereof, the Board comprises eight Directors, of whom three are executive Directors, namely Dr. Liu Erzhuang (Chairman), Mr. Tan Jue and Mr. Liu Zhihai; two are non-executive Directors, namely Mr. Cao Xiaohui and Mr. Lin Yukai; and three are independent non-executive Directors, namely Ms. Ge Aiji, Mr. Chau Shing Yim David, and Mr. Wang Guoping.
