INSIDE INFORMATION – SUSPENSION OF PRODUCTION OF SOUTHEAST MINE OF NFC AFRICA MINING PLC

This announcement is made by China Nonferrous Mining Corporation Limited (the "**Company**") pursuant to Rule 13.09(2) of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "**Listing Rules**") and the Inside Information Provisions (as defined by the Listing Rules) under Part XIVA of the Securities and Futures Ordinance.

An object striking incident took place in the shaft of the Southeast Mine of NFC Africa Mining PLC (中色非洲礦業有限公司*) ("**NFCA**"), a subsidiary of the Company, resulting in the death of a Chinese employee of a subcontractor. According to the relevant safety management regulations of the Mines Safety Department of Zambia and the Company and its subsidiaries (the "**Group**"), the production of the Southeast Mine of NFCA has been temporarily suspended since 27 June 2025 and is initially expected to last for approximately 90 days. Subject to the completion of the on-site inspection and assessment by the expert team, NFCA will formulate remedial measures in accordance with local regulations and determine the period of suspension of production.

I. Basic information of the mine

Located at the Copperbelt Province in Zambia, the Southeast Mine is operated by NFCA and its main products are blister copper/anode copper. In 2025, the planned copper content in copper concentrate production of the Southeast Mine is 52,600 tonnes.

II. Impact of production suspension and countermeasures

According to the preliminary estimation of the Company, it is expected that the suspension of production of the Southeast Mine will affect the copper production of the Company's mines by approximately 14,500 tonnes in 2025, which accounts for approximately 9% of the Group's annual planned copper production of the Company's mines.

The Company is actively adopting countermeasures to minimise the impact of the temporary suspension of production on the Company's annual production and operation, including but not limited to:

(i) strengthen safety management, cooperate with the relevant departments to investigate the cause of the incident, organize timely and effective remedial measures, and strive for early resumption of production;

(ii) strengthen the control of production operations, formulate safe construction plans, and effectively implement all safety measures;

(iii) adjust production plans and optimise allocation of resources; and

(iv) adjust expected annual copper production in compliance with the law as appropriate.

The Company will disclose the progress of the resumption of production and related circumstances in due course in accordance with the requirements under the Listing Rules.

Subject to the results of the investigation of the incident, the implementation of countermeasures and other uncertainties, the above impact of the suspension of production is a preliminary estimate, and the actual situation may vary, so investors are advised to pay attention to investment risks.

By Order of the Board
China Nonferrous Mining Corporation Limited
Chaoran ZHU and Man Yi WONG
Joint Company Secretaries

23 July 2025
