VOLUNTARY ANNOUNCEMENT
LATEST BUSINESS DEVELOPMENT
ACCELERATING DEVELOPMENT OF
BUSINESS LAYOUT IN THE RWA SECTOR

This announcement is made by GoFintech Quantum Innovation Limited (the "**Company**", together with its subsidiaries, collectively the "**Group**") on a voluntary basis.

The board (the "**Board**") of directors (the "**Directors**") of the Company is pleased to announce that the Company has recently, through its indirectly wholly-owned subsidiary, completed a US$489,000 capital contribution to Rtree Tech Service Co., Limited ("**Rtree**") in respect of subscription for shares of Rtree (the "**Subscription**"). The Subscription represents a strategic investment by the Group, and upon completion, the Company will hold 18% of Rtree's entire issued share capital.

Based on information provided by Rtree, it is a high-tech growth company established in the British Virgin Islands. Building on its existing decentralised token platform, it has expanded into real-world asset ("**RWA**") tokenisation business, enabling the tokenized issuance and circulation of real world assets and providing new liquidity channels for underlying assets. The platform integrates multiple security mechanisms, including IoT data collection, zero-knowledge proof technology, third-party custodial wallets and legally binding e-signature agreements, to ensure that the value of RWA Token is consistently anchored to the underlying asset value. Furthermore, the platform enables the circulation of such tokens on the Ethereum mainnet (being the primary, live blockchain network as the official version of the Ethereum blockchain, where the majority of user activity and value exist within the Ethereum ecosystem). By leveraging blockchain infrastructure and smart contracts, it builds a transparent system for issuance, trading, dividend distribution and interest payment settlement, achieving seamless integration between on-chain and off-chain ecosystems. Rtree officially launched on the Ethereum mainnet in the first half of 2025, initially offering two types of RWA products: art-collateralised lending services and on-chain fixed-income bonds. Currently, Rtree plans to gradually expand its coverage to diverse asset classes such as gold, stocks, ETFs, futures and options, aiming to build a comprehensive RWA issuance platform.

The Board believes that the groundbreaking advancements in financial technology, particularly the RWA and stablecoins, are transitioning towards the implementation phase of large-scale commercial applications, demonstrating their immense potential to reshape asset valuation. The Group will leverage Rtree's RWA platform to advance the tokenization of the Group's assets, including but not limited to high-value art assets, trade receivables, letters of credit, bills and other supply chain operation assets, thereby enabling the on-chain representation and circulation of such asset values. At the same time, the Group will strategically explore asset digitization within the RWA sector, the core growth area of global fintech. By setting footprint in a digital issuance and circulation platform for high-end assets such as artworks and commodities, the Group aims to capture early-mover opportunities in on-chain asset securitization and build the Group's comprehensive RWA investment ecosystem. Moreover, this integration will further complete the Group's end-to-end digital asset value chain spanning stablecoin issuance, trading, asset management and RWA applications, form a strategically synergistic business matrix with the Group's quantum technology transformation, and strengthen the execution efficacy of the Group's dual-track strategy of "Quantum + Digital Assets". Furthermore, building on its established customer channels and financial market networks, the Group will bridge traditional and crypto-native investment communities, expanding its client base while diversifying revenue sources. This initiative will strengthen the Group's core competitiveness and drive performance growth on a multi-dimensional basis, thus being in the best interests of the Company and its shareholders as a whole.

To the best of the Directors' knowledge, information and belief having made all reasonable enquiries, Rtree and its ultimate beneficial owners are independent third parties not connected with the Group or any of its connected persons (as defined under the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (the "**Listing Rules**")) as at the date of the Subscription and the date of this announcement. Since the applicable percentage ratios in respect of the Subscription are all less than 5%, the Subscription does not constitute a notifiable transaction of the Company under Chapter 14 of the Listing Rules.

Shareholders and potential investors of the Company should note that this announcement is made on a voluntary disclosure basis for the purpose of keeping the public informed of the latest business developments of the Company. The Company will make further announcement (where applicable) in compliance with the Listing Rules.

Shareholders and potential investors of the Company are advised to exercise caution when dealing in the shares of the Company.

By order of the Board
GoFintech Quantum Innovation Limited
CHAN Kin Sang
Chairman and Independent Non-executive Director

Hong Kong, 28 July 2025

As at the date of this announcement, the Board consists of one executive Director, namely Ms. SUN Qing; three non-executive Directors, namely Dr. NIE Riming, Mr. LI Chunguang and Mr. HUA Yang; and three independent non-executive Directors, namely Mr. CHAN Kin Sang (Chairman), Mr. CHIU Kung Chik and Ms. LUI Mei Ka.
