VOLUNTARY ANNOUNCEMENT ESTABLISHING A JOINT LABORATORY WITH UAES FOR GALLIUM NITRIDE TECHNOLOGY

This announcement is made by InnoScience (Suzhou) Technology Holding Co., Ltd. (the "**Company**") on a voluntary basis to inform the shareholders and potential investors of the Company of the latest update on the business development of the Company.

The Company announces that it has established a joint laboratory with United Automotive Electronic Systems Co., Ltd. (the "**UAES**"), a leading global supplier of automotive electronic systems, on July 29, 2025, to collaborate on the development of advanced power electronic systems for new energy vehicles by leveraging the advantages of gallium nitride (GaN) devices, such as high power density, low on-resistance, high conversion efficiency, and more compact product size.

As an integrated Tier 1 automotive supplier, UAES is a joint venture between Robert Bosch and Zhonglian Automobile Electronics Co., Ltd. (a company affiliated with SAIC Motor). Since its establishment in 1995, UAES has captured a significant share in the vehicle engine control unit and powertrain system market in China.

The Company believes that reinforcing cooperation between the two parties through a joint laboratory will enable the Company to fully leverage its strengths in the GaN field. By combining UAES's expertise in systems, we will be able to bring to the market smaller and lighter power supplies and powertrain systems for electric vehicles, thereby shaping the future of power electronic systems of new energy vehicles.

Shareholders and potential investors are advised to exercise caution when dealing in the securities of the Company.

By order of the Board
InnoScience (Suzhou) Technology Holding Co., Ltd.
