(4) Violation of Laws and Regulations

1) Administrative punishments imposed on the Company by financial regulators and other governmental departments during the reporting period:

During the reporting period, administrative punishments were imposed on the divisions of the Company at all levels, with an amount of penalty totaling RMB2.66 million. Such punishments included, among others, warning and penalty. No administrative punishment was imposed on the Head Office and the provincial branches of the Company.

2) Administrative punishments imposed on the Directors, Supervisors and senior management of the Head Office of the Company by financial regulators and other governmental departments during the reporting period:

No relevant circumstance occurred during the reporting period.

3) Violation of laws by the Directors, Supervisors, management officers at the departmental level of the Head Office or above and senior management officers of the provincial branches of the Company during the reporting period that resulted in them being transferred to judicial authorities:

No relevant circumstance occurred during the reporting period.

4) Regulatory measures adopted by the NFRA (the Former CBIRC) against the Company during the reporting period:

During the reporting period, no regulatory measure was adopted by the NFRA and its local offices against the Head Office of the Company and there were 80 regulatory measures against its branches at the provincial level and below.

3. KEY INDICATORS

(1) Solvency Ratio Indicators

Unit: RMB million

Items	Figures of the Current Quarter	Figures of the Preceding Quarter	Predicted figures of the Following Quarter under the Basic Scenario
Admitted assets	7,168,216	6,919,984	7,203,200
Admitted liabilities	6,064,871	5,894,552	6,093,824
Actual capital	1,103,345	1,025,432	1,109,376
Core Tier 1 capital	768,043	693,851	789,376
Core Tier 2 capital	56,722	55,521	53,832
Supplementary Tier 1 capital	275,662	273,407	263,398
Supplementary Tier 2 capital	2,918	2,653	2,770
Minimum capital for capitalizable risk	609,159	545,388	612,761
Minimum capital for control risk	-9,320	-8,344	-9,376
Additional minimum capital	–	–	–
Minimum capital	599,839	537,044	603,385
Core solvency surplus	224,926	212,328	239,823
Comprehensive solvency surplus	503,506	488,388	505,991
Core solvency ratio	137.50%	139.54%	139.75%
Comprehensive solvency ratio	183.94%	190.94%	183.86%

(2) Regulatory and Monitoring Indicators of Liquidity Risk

Unit: RMB million

Name of Indicators	Figures of the Current Quarter	Figures of the Preceding Quarter
Liquidity coverage ratio		
Overall liquidity coverage ratio of the Company under the basic scenario[1] (LCR1)		
within 3 months	142%	144%
within 12 months	109%	110%
Overall liquidity coverage ratio of the Company under the required testing stressed scenario[2] (LCR2)		
within 3 months	619%	623%
within 12 months	192%	183%
Liquidity coverage ratio without considering asset realization under the required testing stressed scenario[3] (LCR3)		
within 3 months	59%	81%
within 12 months	63%	64%
Overall liquidity coverage ratio of the Company under the self-testing stressed scenario[2] (LCR2)		
within 3 months	2316%	2394%
within 12 months	709%	649%
Liquidity coverage ratio without considering asset realization under the self-testing stressed scenario[3] (LCR3)		
within 3 months	271%	370%
within 12 months	276%	265%
Backtracking adverse deviation rate of net cash flow from operating activities[4]	107%	38%
Cumulative net cash flow of the current year	9,983	35,458
Net cash flow of the preceding fiscal year	-58,009	-58,009
Net cash flow of the fiscal year prior to the preceding fiscal year	16,319	16,319
Net cash flow from operating activities[5]	430,178	300,414
Net cash flow from operating activities of participating account[6]	54,920	28,739
Net cash flow from operating activities of universal account[7]	114,405	85,472
Proportion of cash and liquidity management tools[8]	1.38%	1.74%
Quarterly average of financing leverage ratio[9]	2.60%	2.29%
Proportion of domestic fixed-income assets under (including) class AA[10]	0.14%	0.13%
Proportion of listed stock investment with a shareholding of over 5%[11]	0.41%	0.43%
Proportion of receivables[12]	0.64%	1.02%
Proportion of holding related-party assets[13]	0.83%	0.73%

Notes:

1. Overall liquidity coverage ratio of the Company under the basic scenario = (Cash inflows of the Company under the basic scenario + Book value of cash and cash equivalents at the valuation date) ÷ Cash outflows of the Company under the basic scenario × 100%

2. Overall liquidity coverage ratio of the Company under the stressed scenario = (Cash inflows of the Company under the stressed scenario + Book value of cash and cash equivalents at the valuation date + the amount of realizable liquid asset reserves) ÷ Cash outflows of the Company under the stressed scenario × 100%

3. Liquidity coverage ratio without considering asset realization under the stressed scenario = (Cash inflows of the Company under the stressed scenario + Book value of cash and cash equivalents at the valuation date) ÷ Cash outflows of the Company under the stressed scenario × 100%

4. Backtracking adverse deviation rate of net cash flow from operating activities = (Actual value of net cash flow from operating activities – Predicted value of net cash flow from operating activities) ÷ Absolute value of the predicted value of net cash flow from operating activities

5. Net cash flow from operating activities = Cumulative cash inflows from operating activities of the current year – Cumulative cash outflows from operating activities of the current year

6. Net cash flow from operating activities of participating account = Cumulative cash inflows from operating activities of participating account of the current year – Cumulative cash outflows from operating activities of participating account of the current year

7. Net cash flow from operating activities of universal account = Cumulative cash inflows from operating activities of universal account of the current year – Cumulative cash outflows from operating activities of universal account of the current year

8. Proportion of cash and liquidity management tools = Book value of cash and liquidity management tools at the end of the period ÷ Ending balance of total assets after deducting the balance of bonds sold under agreements to repurchase and assets held in separate accounts × 100%

9. Quarterly average of financing leverage ratio = Arithmetic average of total balance of inter-bank lending and bonds sold under agreements to repurchase at the end of each month within a quarter ÷ Ending balance of total assets × 100%

10. Proportion of domestic fixed-income assets under (including) class AA = Book value of domestic fixed-income assets under (including) class AA at the end of the period ÷ Ending balance of total assets after deducting the balance of bonds sold under agreements to repurchase and assets held in separate accounts × 100%

11. Proportion of listed stock investment with a shareholding of over 5% = Total book value of listed stock investment with a shareholding of over 5% ÷ Ending balance of total assets × 100%

12. Proportion of receivables = (Book value of premiums receivable at the end of the period + Book value of reinsurance accounts receivable at the end of the period) ÷ Ending balance of total assets × 100%

13. Proportion of holding related-party assets = Total investment assets of counterparties (who are related parties) held ÷ Ending balance of total assets × 100%

(3) Key Operating Indicators

Unit: RMB million

Name of Indicators	Figures of the Current Quarter	Cumulative Figures of the Current Year
Gross written premiums	144,557	669,645
Net profit	125,187	165,517
Total assets	7,204,123	7,204,123
Total equity	618,990	618,990
Insurance contract liabilities	6,322,362	6,322,362
Basic earnings per share (RMB)	4.49	5.94
Total equity yield	22.02%	29.39%
Total assets yield	1.75%	2.40%
Net Investment yield	1.67%	3.79%
Comprehensive investment yield	3.10%	5.27%

Note:

The gross written premiums stated in the above table are data under "Accounting Standards for Business Enterprises ("**ASBE**") No. 25 – Direct Insurance Contracts", "ASBE No. 26 – Reinsurance Contracts" (Caikuai [2006] No. 3) and "Regulations regarding the Accounting Treatment of Insurance Contracts" (Caikuai [2009] No. 15). The net investment yield, comprehensive investment yield, average net investment yield for the recent three years and average comprehensive investment yield for the recent three years are data under "ASBE No. 22 – Recognition and Measurement of Financial Instruments" (Caikuai [2006] No. 3) and other standards on financial instruments and calculated in accordance with the formulas specified in the "Solvency Regulatory Rules for Insurance Companies No. 18: Solvency Report".

The indicators for net profit, total assets, total equity and insurance contract liabilities are disclosed based on the data from the financial report of the Company for the third quarter of 2025 (which is prepared in accordance with "ASBE No. 22 – Recognition and Measurement of Financial Instruments" (Caikuai [2017] No. 7), "ASBE No. 25 – Insurance Contract" (Caikuai [2020] No. 20) and other ASBE). Basic earnings per share, total equity yield and total assets yield are calculated based on the results of the above indicators and in accordance with the formulas specified in the "Solvency Regulatory Rules for Insurance Companies No. 18: Solvency Report". The formulas are as follows:

Total equity yield = Net profit ÷ [(Total equity at the beginning of the period + Total equity at the end of the period) ÷ 2] × 100%

Total assets yield = Net profit ÷ [(Total assets at the beginning of the period + Total assets at the end of the period) ÷ 2] × 100%

Net investment yield = (Investment income + Fair value changes gains/losses + Foreign exchange gains/losses – Impairment loss of investment assets – Taxes and surcharges of investment – Interest expense) ÷ Average balance of funds application during the reporting period × 100%

Comprehensive investment yield = (Investment income + Fair value changes gains/losses + Foreign exchange gains/losses + Net change in fair value of financial assets available for sale – Impairment loss of investment assets – Taxes and surcharges of investment – Interest expense) ÷ Average balance of funds application during the reporting period × 100%

(4) Net/(Comprehensive) Investment Yield for the Recent Three Years

The average net investment yield and the average comprehensive investment yield of the Company for the recent three years were 3.56% and 3.67%, respectively.

4. RISK MANAGEMENT CAPABILITY

(1) Type of the Company

1) In accordance with the requirements under Article 5 and Article 6 of the "Solvency Regulatory Rules for Insurance Companies No. 12: Solvency Aligned Risk Management Requirements and Assessment" with respect to the criteria for classification of companies, the Company is a Type I insurance company.

2) The Company is a life insurance company established in Beijing, China on June 30, 2003 according to the Company Law and the Insurance Law of the People's Republic of China, and was listed overseas in December 2003 and returned to the domestic A-share market for listing in January 2007.

3) In 2024, the Company had written premiums of RMB825,562 million (unaudited), total assets of RMB6,569,260 million and 36 provincial branches.

(2) Assessment Results of the Recent Solvency Aligned Risk Management Requirements and Assessment

The Former CBIRC conducted an assessment of Solvency Aligned Risk Management Requirements and Assessment (SARMRA) on the Company in 2022. According to the "Letter of Opinions from the Solvency Supervision Department of the CBIRC Regarding the 2022 SARMRA On-site Assessment of China Life Insurance Company Limited" (Yin Bao Jian Chang Fu [2023] No. 14), the Company got a score of 84.83 in the 2022 assessment and the respective scores in nine areas are as follows:17.05 in the foundation and environment of risk management, 8.01 in the objectives and tools of risk management, 8.5 in insurance risk management, 8.33 in market risk management, 8.5 in credit risk management, 8.38 in operational risk management, 8.74 in strategic risk management, 8.6 in reputational risk management, and 8.72 in liquidity risk management.

(3) Measures for the Improvement of Risk Management Adopted During the Reporting Period and Their Progress

Firstly, the Company consistently strengthened the development of its risk management system. It further enhanced its emergency management capabilities, standardized risk management mechanisms, and improved the comprehensive risk management system. The Company refined reputational risk management to enhance the effectiveness of related efforts and, in response to new circumstances, strengthened country risk emergency management to improve its ability to handle extreme risks. Simultaneously, in alignment with actual management practices, the Company consistently conducted systematic and rigid control work on a long-term basis, continuously improving the systematization and intelligence level of risk prevention and control.

Secondly, the Company further enhanced the efficiency in normal risk monitoring and pre-warning, stepped up efforts on risk analysis, monitoring and pre-warning, as well as tracking and assessment in major areas of concern. In the meantime, the Company kept on reinforcing its actions on research, analysis, monitoring and screening with respect to, among others, sales risk, investment risk and money laundering risk, so as to reveal, manage and control relevant risks in a timely manner.

Thirdly, the Company continued to advance the digital transformation of its risk control measures. On one hand, it focused on promoting the application of artificial intelligence and large models in risk prevention and control, constructing more scientific and rigorous monitoring and pre-warning models, and creating a precise, moderate, flexible, and efficient risk pre-warning system to promote differentiated risk management. On the other hand, the advantages of centralized anti-money laundering operations were further deepened, with due diligence evolving from a post-event to a pre-event approach, and the due diligence team transitioning from part-time to full-time roles, significantly boosting operational efficiency.

(4) Self-assessment on Risk Management

The Company continued to proceed with rectification and upgrading measures, sorted out and refined all existing issues on an individual basis, stepped up its efforts to rectify such issues, and continuously enhanced its capability of risk management, after making reference to the assessment opinions of the Former CBIRC's inspection in 2022 and the Company's self-assessment results in 2024, and taking into account the actual situation of its risk management.

5. INTEGRATED RISK RATING (IRR) (CLASSIFICATION REGULATION)

(1) Information of the Company's IRR

To date, according to the C-ROSS Supervision Information System of the NFRA, the results of the IRR of the Company in the first quarter and the second quarter of 2025 were both AAA Category.

(2) Self-assessment on Risks

The Company conducts an assessment on the insurance risk, market risk, credit risk, strategic risk, operational risk, reputational risk, liquidity risk and other risks faced by it on a quarterly basis, and a comprehensive risk management quarterly report will be prepared and submitted to the President's Office of the Company for review.

For strategic risk, the Company focused on conducting proper analysis on macro environment and policies, made accurate risk assessment and identification, and prepared a report of the management team of the Company on business operation and management every quarter and an evaluation report on the implementation of medium- to long-term planning every year through the regular monitoring and evaluation of strategic plan implementation, to strengthen the management of strategic risk. In general, the business structure and quality of the Company continued to stay healthy.

For operational risk, the Company consistently optimized the development of three management tools, namely loss data room for operational risk, self-assessment on operational risk, and key risk indicators, further strengthened the construction of intelligent risk prevention and control, and promoted operational risk management by technological means to build an operational risk management system featuring full chain, which fully improved the efficiency in the management and control of operational risks. The Company also conducted the collection and analysis of operational risk events as well as key risk indicators monitoring on a quarterly basis.

For reputational risk, the Company strictly and closely monitored public opinions through the real-time monitoring of media around the clock for seven days a week, and strengthened its efforts to analyze public opinions by grasping their main characteristics and development trends, in order to seize the initiative to address the public opinions. The public opinions on the Company remained stable in general and there was no major incident of reputational risk for the Company in this quarter.

For liquidity risk, the Company monitored the regulatory indicators and monitoring indicators for liquidity risk on a quarterly basis and carried out stress tests on cash flows in accordance with the requirements under the "Solvency Regulatory Rules for Insurance Companies No. 13: Liquidity Risk". The Company constantly stepped up its effort in liquidity risk management pursuant to the regulatory requirements and its own regulations, and the liquidity risk of the Company remained at a lower level.

6. SIGNIFICANT EVENTS

(1) Branches

Provincial branches newly approved for operation during the reporting period:

No event involving major branches occurred.

(2) Material Reinsurance Contracts

1) Material reinsurance inward contracts entered into during the reporting period:

No event involving material reinsurance inward contracts occurred.

2) Material reinsurance outward contracts entered into during the reporting period:

No event involving material reinsurance outward contracts occurred.

(3) Top Three Products During the Reporting Period in Terms of Surrender Payment and Comprehensive Surrender Rate

1) Top three products during the reporting period in terms of surrender payment

Unit: RMB million

Name of products	Type of products	Sales channel	Current quarter		Cumulative figures for the year	
			Surrender payment	Comprehensive Surrender rate	Surrender payment	Comprehensive Surrender rate
Kang Ning Whole Life Insurance (康寧終身保險)	Traditional	Exclusive individual agent, etc.	864	0.20%	2,598	0.62%
China Life Happy Life Annuity Insurance (Participating Insurance) (國壽美滿一生年金保險(分紅型))	Participating	Exclusive individual agent, etc.	613	0.41%	1,744	1.15%
China Life Fu Lu Shuang Xi Endowment Insurance (Participating Insurance) (國壽福祿雙喜兩全保險(分紅型))	Participating	Exclusive individual agent, etc.	477	0.26%	1,295	0.71%

2) Top three products during the reporting period in terms of comprehensive surrender rate

Unit: RMB million

Name of products	Type of products	Sales channel	Current quarter		Cumulative figures for the year	
			Surrender payment	Comprehensive Surrender rate	Surrender payment	Comprehensive Surrender rate
China Life Kang Hui Group Whole Life Critical Illness Insurance (Type B) (國壽康惠團體終身重大疾病保險(B款))	Traditional	Group Insurance, etc.	0.38	34.95%	0.38	38.66%
China Life Supplemental Cherish Care for Lifetime Long-term Health Insurance (國壽附加珍愛一生長期健康保險)	Traditional	Exclusive individual agent, etc.	0.02	20.30%	0.02	25.34%
China Life Stability for Lifetime Group Pension Annuity Insurance (Universal Insurance) (國壽穩健一生團體養老年金保險(萬能型))	Universal	Group Insurance, etc.	13.99	9.01%	14.90	9.81%

Note: The data regarding the top three products in terms of surrender payment and comprehensive surrender rate are calculated according to the formulas set out in the "Solvency Regulatory Rules for Insurance Companies No. 18: Solvency Report":

1. Comprehensive surrender rate = (Surrender payment + Surrender payment of insured reserves and investment funds + Surrender payment of the separate accounts of investment-linked insurance) ÷ (Opening balance of long-term insurance reserves + Opening balance of insured reserves and investment funds + Opening balance of separate account liabilities + written premiums for the year) × 100%

2. Surrender payment = Surrender payment + Surrender payment of insured reserves and investment funds + Surrender payment of the separate accounts of investment-linked insurance

(4) Major Investments

Major investments made during the reporting period:

Unit: RMB million

No.	Type	Investment target	Time of investment	Investment amount			Book value at the end of the period
				At the beginning of the period	At the end of the period	Change	
1	Subsidiary	Beijing China Life Pension Industry Investment Fund (Limited Partnership)	August 2025	6,119	6,448	329	6,448
2	Subsidiary	China Life Qihang Phase I (Tianjin) Equity Investment Fund Partnership (Limited Partnership)	September 2025	10,167	10,263	96	10,263

It was determined after an assessment that the above major investments had no material impact on the solvency ratios of the Company.

(5) Significant Investment Losses

Significant investment losses incurred during the reporting period:

No event involving significant investment losses occurred.

(6) Major Financing Activities

Major financing activities carried out during the reporting period:

No event involving major financing activities occurred.

(7) Major Connected Transactions

Major connected transactions occurred during the reporting period:

No event involving major connected transactions occurred.

(8) Material Guarantees

1) Executed material guarantee contracts existed during the reporting period:

No event involving material guarantee contracts occurred.

2) Outstanding material guarantee contracts existed as of the date of the solvency report:

No event involving outstanding material guarantee contracts occurred.

(9) Other Significant Events

No other significant event occurred that had a material effect on the solvency of the Company.

7. MANAGEMENT ANALYSIS AND DISCUSSION

(1) Change of Solvency Ratios and the Reasons therefor

As at September 30, 2025, the core solvency ratio and comprehensive solvency ratio of the Company were 137.50% and 183.94%, respectively, representing decreases of 2.04 percentage points and 7.00 percentage points as compared to those as at the end of the previous quarter. The main reason for the change is divided into two aspects:

Firstly, actual capital increased by RMB77,913 million from the end of the previous quarter, as a result of which the comprehensive solvency ratio increased by 14.51 percentage points. In particular, admitted assets rose by RMB248,232 million from the end of the previous quarter, which was primarily due to an increase of RMB288,612 million in investment assets, a decrease of RMB20,925 million in cash and liquidity management tools, and an increase of RMB13,026 million in equities in subsidiaries, joint ventures and associates; and admitted liabilities rose by RMB170,319 million from the end of the previous quarter, which was mainly attributable to an increase of RMB154,997 million in reserve liabilities, an increase of RMB27,807 million in financial liabilities and a decrease of RMB13,699 million in payables and advance receipts.

Secondly, the minimum capital increased by RMB62,795 million from the end of the previous quarter, as a result of which the comprehensive solvency ratio decreased by 21.51 percentage points. In particular, the minimum capital for insurance risk increased by RMB1,883 million, the minimum capital for market risk increased by RMB63,604 million, and the minimum capital for credit risk increased by RMB1,072 million.

In general, the core solvency ratio and comprehensive solvency ratio of the Company are well above the regulatory requirements, and the Company has sufficient solvency.

(2) Change of Regulatory Indicators for Liquidity Risk and the Reasons therefor

At the end of the third quarter of 2025, the regulatory indicators for liquidity risk of the Company were conformed to the regulatory standards. There was no significant change in the liquidity coverage ratio as compared to that of the previous quarter. Backtracking of net cash flow from operating activities has shown positive deviation, and the cumulative net cash flow as at the end of third quarter amounted to RMB9,983 million. Pursuant to the provisions of the "Solvency Regulatory Rules for Insurance Companies No. 13: Liquidity Risk" and the relevant requirements, the Company has established a well-developed liquidity risk management mechanism to monitor various regulatory indicators for liquidity risk on a quarterly basis, with a view to preventing liquidity risk in an effective manner.

(3) Analysis of the Change in the IRR Results

According to the C-ROSS Supervision Information System of the NFRA, the result of the IRR of the Company in the second quarter of 2025 was AAA Category, which maintained at A Category for 29 consecutive quarters and remained stable.

(4) Analysis of the Key Risks Faced by the Company

In light of the financial environment and capital market, and after taking into account the measures adopted and initiatives taken by it in respect of risks, the Company conducted a comprehensive analysis of the key risks affecting solvency, with the specific details as follows:

Currently, the development of the industry is navigating an increasingly complex and challenging external environment. The ongoing tensions in US-China trade relations have exacerbated economic uncertainty, impacting consumer demand for insurance products. Long-term interest rates persist at historically low levels, while the equity markets are subject to volatile upward trends. Regulatory authorities have introduced a series of significant policy measures, including deepening reforms to sales systems and new regulations governing universal insurance. The ongoing reduction in assumed interest rates underscores a stronger commitment to guiding the industry's sustainable long-term development, thereby imposing greater demands on personal insurance companies in areas such as asset-liability management, precision management, and innovation in products and services. In terms of investment returns, achieving a balance and integration between asset safety and returns in a low-interest-rate environment remains a work in progress, necessitating further refinement. The pace of high-quality development also requires acceleration. Moreover, the personal insurance sector is contending with frequent incidents of negative public opinion, which are rapidly and widely disseminated via social media. The complex and severe economic climate has resulted in reduced income for some customers, leading to an increase in full surrender demands, and a significant rise in industry complaints. In this context, as a leading enterprise in the industry, the Company faces heightened challenges in managing reputational risks, which are becoming increasingly unpredictable, contagious, and external in nature.

8. OPINIONS FROM EXTERNAL INSTITUTIONS

(1) Reports Received from External Institutions During the Reporting Period

1) Audit reports received from auditors during the reporting period:

No relevant circumstance occurred during the reporting period.

2) Review reports received during the reporting period:

No relevant circumstance occurred during the reporting period.

3) Credit rating reports received from rating agencies during the reporting period:

To address the requirements of the Company for credit enhancement in underwriting, investment and financing operations, the Company engaged Fitch Ratings (Beijing) Limited ("**Fitch**") to conduct credit ratings on the Company's financial strength. In September 2025, Fitch updated the Company's ratings, maintaining an insurer financial strength rating of A+ with a stable outlook. This rating will be continuously monitored and remain valid until the next update.

The Company engaged China Chengxin International Credit Rating Co., Ltd. ("**China Chengxin**") and China Lianhe Credit Rating Co., Ltd. ("**China Lianhe**") to rate the capital supplementary bonds issued by the Company in 2024. In September 2025, China Chengxin rated the Company's corporate credit rating as AAA with a stable outlook and rated the "2024 Capital Supplementary Bonds (Bond Connect) of China Life Insurance Company Limited" as AAA. China Lianhe also rated the Company's corporate credit rating as AAA with a stable outlook and rated the "2024 Capital Supplementary Bonds (Bond Connect) of China Life Insurance Company Limited" as AAA. These ratings will be continuously monitored and remain valid until the next update.

(2) Change of External Institutions During the Reporting Period

No relevant circumstance occurred during the reporting period.

9. ACTUAL CAPITAL
