#### **BUSINESS REVIEW**

**GP Industries** (69.3% owned by Gold Peak as at 31 March 2009)

The global economic turmoil has led to a decrease in sales for some of GP Industries Group's products. During the year, sales decreased by 13% and profit from operations declined by 43%. In response, GP Industries Group has implemented rigorous cost control.

#### 1. Electronics Division

- *Electronics & components* Sales decreased mainly due to slower demand for professional electronic products. The associates in the components business also reported lower sales and lower profit contribution. Overall, operating profit before interest and taxation ("PBIT") excluding exceptional items from the electronics and components business decreased.
- Acoustics Sales and PBIT excluding exceptional items from the acoustics business decreased. Overall turnover of KEF branded acoustics products decreased with weakened sales to the UK and the US, in spite of a growth in sales to Asia, Germany, Canada and Latin America. Profitability improved due to higher distribution efficiency and stringent cost-saving measures. The 20%-owned Meiloon Industrial Co., Ltd. reported a small loss.
- Cables & wire harness Sales of the 47%-owned cable associate Linkz Industries Limited decreased slightly, but it registered a decline in profit contribution before exceptional items due mainly to higher material and manufacturing costs. Contributions from wire harness associates serving the domestic automobile makers in China improved while contributions from export oriented subsidiaries and associates decreased. As a result, overall PBIT excluding exceptional items from the wire harness and cables business decreased.

#### 2. *GP Batteries* (49.2% owned by *GP Industries as at 31 March* 2009)

- GP Batteries operated in a highly competitive environment with global economic slowdown and volatile currencies and material prices, it nevertheless returned to profit amidst a decline in turnover.
- Sales of Nickel Metal Hydride ("NiMH") rechargeable batteries and micro batteries decreased while sales of 9-volt and Alkaline primary cylindrical batteries increased. The Americas and Europe recorded a dip in turnover while sales in the Mainland China and Hong Kong increased.
- Its subsidiary in Taiwan signed a 5-year agreement with Boston-Power Inc of the US to produce batteries for laptops and electric vehicles ("EV"). This arrangement helps improve the utilization of GP Batteries Group's manufacturing facilities.

- For EV batteries, it worked on several new projects which might become better
  opportunities in the coming year. Preparation for the joint-venture factory in China
  is continuing. Sales of batteries for high-end electric bicycles remained strong for
  the quarter ended 31 March 2009, making GP Batteries Group a significant world
  supplier in this market.
- Excluding the effects of realized gain and loss arising from commodity contracts
  which had all matured during the year, gross profit margin for the financial year
  had improved.

#### **Technology & Strategic Division**

Lighthouse Technologies Limited, which is currently 29.8% owned by Gold Peak and 19.3% owned by GP Industries, performed strongly for the first three quarters ended 30 September 2008, especially for sales to customers in screen rental business. Affected by the global financial turmoil, Lighthouse recorded a slight increase of 7% in sales for the year, with a lower profit contribution due mainly to higher operating expenses.

#### **PROSPECTS**

The management believes the majority of the Group's markets have bottomed out although recovery is expected to be gradual. GP Industries Group has reduced its bank debts significantly in the last financial year and will continue with its stringent measures to enhance its working capital management and balance sheet as well as reduce costs. GP Industries is favorably poised as the market recovers.

The markets for GP Batteries have stabilized and order intake has been steady in recent months. It will continue to align its cost structure through productivity improvement and plant rationalization, enhance its brand management in key markets and capitalize on selected opportunities in electric transportation.

The Group will continue its strategy to improve the performance of its core business and invest in brands, global distribution and product technology. Also, we will continue with our emphasis on further strengthening our balance sheet. With efforts made in rationalizing operations and improving productivity, the Group will be well positioned to rebound speedily when economies begin to recover.

#### FINANCIAL REVIEW

During the year, the Group's net bank borrowings decreased by HK\$555 million to HK\$1,669 million. As at 31 March 2009, the aggregate of the Group's shareholders' funds and minority interests was HK\$1,809 million and the Group's gearing ratio (the ratio of consolidated net bank borrowings to shareholders' funds and minority interests) was 0.92 (31 March 2008: 1.05). The gearing ratios of the Company, GP Industries and GP Batteries were 0.84 (31 March 2008: 0.73), 0.40 (31 March 2008: 0.60) and 0.60 (31 March 2008: 0.75) respectively.

At 31 March 2009, 57% (31 March 2008: 52%) of the Group's bank borrowings was revolving or repayable within one year whereas 43% (31 March 2008: 48%) was mostly repayable between one to five years. Most of these bank borrowings are on floating interest rates. Most of the Group's bank borrowings are in US dollars, Singapore dollars and Hong Kong dollars respectively.

The Group's exposure to foreign currency arises mainly from the net cash flow and the translation of net monetary assets or liabilities of its overseas subsidiaries. The Group and its major associates continued to manage foreign exchange risks prudently. Forward contracts, borrowings in local currencies and local sourcing have been arranged to minimise the impact of currency fluctuation.

#### CORPORATE GOVERNANCE PRACTICES

The Company has complied with the code provisions of the Code on Corporate Governance Practices as set out in Appendix 14 of the Listing Rules throughout the year, except for the following deviations:

Code Provision A.2.1 stipulates that the roles of chairman and chief executive officer should be separate and should not be performed by the same individual. Mr. Victor LO Chung Wing is currently the Chairman and Chief Executive of the Company. The Board considers that the present structure will not impair the balance of power and authority between the Board and the management of the Group as the Group's principal businesses are separately listed and each business is run by a different board of directors.

Code Provision A.4.1 stipulates that non-executive directors should be appointed for a specific term, subject to re-election. Currently, all non-executive directors are not appointed for a specific term and are subject to retirement by rotation and re-election at the annual general meeting of the Company in accordance with the provisions of the articles of association of the Company. Since their appointments will be reviewed when they are due for re-election, the Board considers that sufficient measures have been taken to ensure that the Company's corporate governance practices are no less exacting than those set out in the Code on Corporate Governance Practices.
