

The Stock Exchange of Hong Kong Limited and the Securities and Futures Commission take no responsibility for the contents of this Application Proof, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this Application Proof.

Application Proof of

PrimeGenX Therapeutics Co., Ltd. 北京普祺醫藥科技股份有限公司

(a joint stock company incorporated in the People's Republic of China with limited liability)

WARNING

The publication of this Application Proof is required by The Stock Exchange of Hong Kong Limited (the “**Stock Exchange**”) and the Securities and Futures Commission (the “**Commission**”) solely for the purpose of providing information to the public in Hong Kong.

This Application Proof is in draft form. The information contained in it is incomplete and is subject to change which can be material. By viewing this document, you acknowledge, accept and agree with PrimeGenX Therapeutics Co., Ltd. (北京普祺醫藥科技股份有限公司) (the “**Company**”), its joint sponsors, overall coordinators, advisers or member of the underwriting syndicate that:

- (i) this document is only for the purpose of providing information about the Company to the public in Hong Kong and not for any other purposes. No investment decision should be based on the information contained in this document;
- (ii) the publication of this document or supplemental, revised or replacement pages on the Stock Exchange’s website does not give rise to any obligation of the Company, its joint sponsors, overall coordinators, advisers or members of the underwriting syndicate to proceed with an offering in Hong Kong or any other jurisdiction. There is no assurance that the Company will proceed with any offering;
- (iii) the contents of this document or supplemental, revised or replacement pages may or may not be replicated in full or in part in the actual final listing document;
- (iv) the Application Proof is not the final listing document and may be updated or revised by the Company from time to time in accordance with the Rules Governing the Listing of Securities on the Stock Exchange;
- (v) this document does not constitute a prospectus, offering circular, notice, circular, brochure or advertisement offering to sell any securities to the public in any jurisdiction, nor is it an invitation to the public to make offers to subscribe for or purchase any securities, nor is it calculated to invite offers by the public to subscribe for or purchase any securities;
- (vi) this document must not be regarded as an inducement to subscribe for or purchase any securities, and no such inducement is intended;
- (vii) neither the Company nor any of its affiliates, advisers or underwriters is offering, or is soliciting offers to buy, any securities in any jurisdiction through the publication of this document;
- (viii) no application for the securities mentioned in this document should be made by any person nor would such application be accepted;
- (ix) the Company has not and will not register the securities referred to in this document under the United States Securities Act of 1933, as amended, or any state securities laws of the United States;
- (x) as there may be legal restrictions on the publication of this document or dissemination of any information contained in this document, you agree to inform yourself about and observe any such restrictions applicable to you; and
- (xi) the application to which this document relates has not been approved for listing and the Stock Exchange and the Commission may accept, return or reject the application for the subject public offering and/or listing.

If an offer or an invitation is made to the public in Hong Kong in due course, prospective investors are reminded to make their investment decisions solely based on the Company’s prospectus registered with the Registrar of Companies in Hong Kong, copies of which will be published to the public during the offer period.

SUMMARY

This summary aims to give you an overview of the information contained in this document. As this is a summary, it does not contain all the information that may be important to you. You should read the whole document before you decide to [REDACTED] in the [REDACTED]. There are risks associated with any [REDACTED]. Some of the particular risks in [REDACTED] in the [REDACTED] are set out in the section headed “Risk Factors” in this document. You should read that section carefully before you decide to [REDACTED] in the [REDACTED]. In particular, we are a biotechnology company seeking a [REDACTED] on the Main Board of the Stock Exchange under Chapter 18A of the Listing Rules on the basis that we are unable to meet the requirements under Rule 8.05 (1), (2) or (3) of the Listing Rules.

There are unique challenges, risks and uncertainties associated with [REDACTED] in companies such as ours. In addition, our Core Product is the product for the purpose of satisfying the eligibility requirements under Chapter 18A of the Listing Rules and Chapter 2.3 of the Guide, and we may continue to incur substantial costs and expenses in relation to R&D activities for our Core Product, and our Core Product may not be successfully developed or marketed. Your [REDACTED] decision should be made in light of these considerations.

OVERVIEW

Founded in 2016, we are a biotech company focused on the field of immune-inflammation, committed to becoming a leader in locally delivered targeted therapies. With innovative and original design and precise local delivery as our core capabilities, we specialize in chronic inflammatory disease treatment, aiming to provide innovative solutions that achieve efficacy, safety and long-term patient satisfaction.

Adhering to a patient-centric R&D philosophy, we pursue advanced efficacy, improved patient experience, and long-term tolerability of our drug products, aiming to ease treatment burden for patients and improve their quality of life. Based on our in-depth understanding of the immune-inflammatory signaling pathways, we have identified that the core pathological processes underlying diverse chronic diseases are strongly correlated with the synergistic effects of extracellular immune signal transduction, transcriptional regulation (as typified by the Janus kinase-signal transducer and activator of transcription (“**JAK-STAT**”) pathway), and immune cell activation regulatory pathways. Based on this insight, we have built an innovative product pipeline with originally designed molecules targeting multiple indications with considerable unmet medical needs and first-in-class potentials.

Leveraging our in-depth understanding of these signaling pathways and our comprehensive innovative drug development system, we have developed our late-stage Core Product, PG-011 (Pumecitinib), in two dosage forms, namely Pumecitinib gel for atopic

SUMMARY

dermatitis and Pumecitinib nasal spray for allergic rhinitis. We also have a diverse portfolio of product candidates, including PG-033 tablets for pruritus, PG-018 tablets for autoimmune kidney diseases, and PG-040 ophthalmic solution for glaucoma.

- **Pumecitinib gel:** the first JAK inhibitor gel in the world for the treatment of atopic dermatitis, for which we have completed Phase III clinical trial for the indication of atopic dermatitis in adults and adolescents aged 12 to 17, pending the submission of NDA. We are currently expanding the indications of Pumecitinib gel to treat atopic dermatitis in children aged two to 11.
- **Pumecitinib nasal spray:** the first JAK inhibitor nasal spray in the world for the treatment of seasonal allergic rhinitis (“**SAR**”), currently under Phase III clinical trial for the indication of SAR in adults. We are also expanding the indications of Pumecitinib nasal spray for treatment of SAR in adolescents aged 12 to 17 and for treatment of perennial allergic rhinitis (“**PAR**”) in adults.
- **PG-033 tablet:** a transient receptor potential vanilloid 3 (“**TRPV3**”) inhibitor with first-in-class potential, inhibiting calcium ion release channels and blocking pruritus signaling pathways, currently under Phase I studies. In addition to treating pruritus associated with neurodermatitis, we have also extended the indication of PG-033 to relieve intractable pruritus and hyperkeratosis associated with Olmsted syndrome, which is a genetic disease triggered by hyperactivation of the TRPV3 gene. The disease has no approved therapies and represents an urgent unmet medical need.
- **PG-018 tablet:** a JAK1-ROCK dual-target inhibitor with first-in-class potential to treat autoimmune kidney diseases, targeting both JAK1 and endothelin receptor-related Rho-associated coiled-coil containing protein kinase (“**ROCK**”), currently under Phase I clinical studies. PG-018 is designed to inhibit the abnormally activated immune functions by acting on JAK1 and reduce blood pressure by acting on ROCK. Targeting on the two pathological mechanisms simultaneously, PG-018 is expected to achieve synergistic clinical benefits for treating autoimmune kidney diseases such as membranous nephropathy and IgA nephropathy.
- **PG-040 ophthalmic solution:** a ROCK-JAK dual-target ophthalmic solution with first-in-class potential as a novel treatment of glaucoma. It is designed to reduce intraocular pressure (“**IOP**”) by ROCK inhibition and, at the same time, to achieve an anti-inflammation effect by JAK inhibition. It is expected to deliver synergistic clinical benefits achieve superior optic nerve protection compared with conventional glaucoma therapies that focus primarily on IOP lowering.

THERE IS NO ASSURANCE THAT WE WILL ULTIMATELY BE ABLE TO DEVELOP AND MARKET OUR CORE PRODUCT OR ANY OF OUR PIPELINE PRODUCTS SUCCESSFULLY.

SUMMARY

Our Product Pipeline

As of the Latest Practicable Date, our product pipeline comprised five innovative drug candidates covering 10 indications, as well as five generic drug candidates targeting multiple chronic inflammatory diseases, all of which are self-developed.

The following chart illustrates our innovative drug pipeline and summarizes the development status of our clinical-stage drug candidates and selected pre-clinical-stage drug candidates as of the Latest Practicable Date:

Abbreviations: JAK: Janus kinase; ROCK: Rho-associated coiled-coil containing protein kinase; TRPV3: transient receptor potential vanilloid 3; MRGPRX2: Mas-related G-protein coupled receptor member X2; AD: atopic dermatitis; SAR: seasonal allergic rhinitis; PAR: perennial allergic rhinitis; PN: prurigo nodosa; NSV: non-segmental vitiligo

★ = Core Product

- (1) We completed a Phase I clinical trial of Pumecitinib gel for atopic dermatitis in 2021, which laid the foundation for the clinical development of Pumecitinib for the treatment of prurigo nodosa. Based on the result of such Phase I clinical trial, we have received the IND approval for Phase II clinical trial for Pumecitinib gel for the indication of prurigo nodosa, with no additional Phase I clinical trial required.
- (2) We completed a Phase I clinical trial of Pumecitinib gel (II) for atopic dermatitis in January 2025, which laid the foundation for the clinical development of Pumecitinib for the treatment of NSV. Based on the result of such Phase I clinical trial, we have received the IND approval for Phase II clinical trial for Pumecitinib gel (II) for the indication of non-segmental vitiligo, with no additional Phase I clinical trial required.

SUMMARY

Our Core Product: PG-011 (Pumecinitib) — a JAK1/JAK2 Inhibitor designed for topical use

PG-011 (Pumecinitib) is a small molecule inhibitor targeting JAK1/JAK2, specifically designed to be suitable for topical use. As a key pathway of the “immune-inflammation” network, the JAK-STAT pathway can simultaneously transmit multiple cytokines relating to immune, inflammation and pruritus, making it an ideal target for us to develop locally-delivered targeted therapies (such as Pumecinitib) for atopic dermatitis and allergic rhinitis. To reduce systemic safety risks, our strategy is to develop topical JAK inhibitors with minimal absorption to blood. As of the Latest Practicable Date, we had completed a Phase III clinical trial of Pumecinitib gel for the treatment of atopic dermatitis in adults and adolescents aged 12 to 17; we were also conducting a Phase III clinical trial of Pumecinitib nasal spray for seasonal allergic rhinitis as of the same date. We are also actively exploring indication expansions for Pumecinitib, including perennial allergic rhinitis, prurigo nodularis and non-segmental vitiligo.

Pumecinitib gel: The first JAK inhibitor gel for the treatment of atopic dermatitis

Atopic dermatitis is a chronic inflammatory skin disease characterized by recurrence and the need for long-term management. Currently, there are more than 72 million patients in China, of which over 90% are mild-to-moderate cases, with a relatively high proportion being pediatric patients. Currently, a significant majority of doctors believe that existing atopic dermatitis treatment plans do not render satisfactory effects while resulting in adverse reactions. This presents significant unmet medical needs for innovative treatment methods.

Innovative Breakthrough: Pumecinitib gel can achieve a broad-spectrum anti-inflammation effect, and is designed to ensure good long-term tolerance and safety and patient compliance in clinical application. It can address the unmet medical needs for the treatment of atopic dermatitis arising from insufficient efficacy and undesirable adverse reactions of traditional topical drugs, significant systemic side effects of oral JAK inhibitors associated with high blood drug concentration, and greasiness of currently approved ointments.

- Pumecinitib can efficiently inhibit multiple inflammatory cytokines such as IL-4, IFN- γ , IL-6, IL-12, IL-1 β , and TGF- β 1, covering a wider range of inflammatory factors compared to similar drugs. By inhibiting on more inflammation-related factors, it can effectively block inflammatory signal transduction from the origin.
- Through molecular modification and formulation optimization tailored for local treatment, Pumecinitib gel is designed to retain in the skin and achieve potent local efficacy, while significantly reducing potential safety issues resulted from high blood drug concentration compared to similar drugs.

In clinical studies, Pumecinitib gel demonstrated low systemic exposure, with blood drug concentrations ranging from 0.097 ng/mL to 0.16 ng/mL after 52 weeks of treatment with 3% gel. By comparison, other approved topical JAK inhibitors have reported, at their respective treatment formulation concentrations, higher systemic exposure of 17.1 – 17.7 ng/mL (for ruxolitinib) and 4.3 – 11.4 ng/mL (for delgocitinib).

SUMMARY

- Pumecitinib gel is grease-free and easy to apply, and spreads evenly on the skin, thus rendering a mild and soothing touch. It overcomes the issue of greasiness associated with some of the traditional topical preparations. These attributes lead to great patient compliance.

Clinical Positioning and Prospects: As the first topical JAK inhibitor gel for treatment of atopic dermatitis, Pumecitinib gel demonstrates excellent efficacy in adolescent and adult atopic dermatitis patients. Compared with similar products under development in China, Pumecitinib gel shows competitive efficacy in all key efficacy endpoints. Compared with approved similar drugs, Pumecitinib gel strikes a better balance between efficacy and safety, achieving desired efficacy level with lower systemic exposure. This makes Pumecitinib gel a suitable option for long-term maintenance treatment for chronic diseases like atopic dermatitis.

Given its advantages of the lower systemic absorption than similar products and skin-friendliness, its clinical application could be expanded to pediatric populations that require higher safety standards due to their thinner, more sensitive and delicate skin. We are currently planning to commence the Phase I clinical trial for Pumecitinib gel for the indications of atopic dermatitis in children aged two to 11 years.

Pumecitinib nasal spray: The first JAK inhibitor nasal spray in the world for the treatment of seasonal allergic rhinitis

Symptoms of seasonal allergic rhinitis mainly include nasal congestion, runny nose, sneezing, nasal itching, and hyposmia, which significantly affect patients' quality of life. According to Frost & Sullivan, there are currently more than 246 million patients with allergic rhinitis in China, with large and rapidly growing market size expected to exceed RMB22.1 billion by 2033. According to Frost & Sullivan, approximately 60% of patients in China experience disease recurrence after treatment with conventional therapies. As such, there is an urgent and huge clinical demand for an innovative drug that can break away from the traditional hormone mechanism and has both potent efficacy and good safety.

Innovative Breakthrough: Pumecitinib nasal spray is the first JAK inhibitor nasal spray globally for the treatment of seasonal allergic rhinitis. With the local delivery of JAK inhibitor enabled by nasal spray device, it offers a new paradigm for treatment of allergic rhinitis. It delivers a strong relief of symptoms while avoiding the side effects associated with systemic medications and/or localized application of hormones. Additionally, it is also capable of simultaneously controlling nasal and ocular allergic symptoms:

- Through the dosage form of nasal spray, Pumecitinib is directly delivered to the inflammatory target area of the nasal mucosa. This ensures efficient drug absorption in the nasal mucosa and provides quick and strong relief of core symptoms of allergic rhinitis, such as sneezing, nasal congestion, runny nose, and nasal itching.

SUMMARY

- In addition to the relief of nasal symptoms, Pumecitinib nasal spray also relieves ocular allergic symptoms associated with allergic rhinitis, simultaneously solving the common clinical problem of combined ocular and nasal allergies. It is one of the few drugs that have shown comprehensive improvement in both nasal and ocular symptoms in clinical studies.
- Pumecitinib nasal spray offers a non-hormonal innovative therapy and avoids the side effects that are commonly associated with intranasal corticosteroids, such as nose bleeding, nasal dryness, nasal mucosa thinning and headaches. As an innovative drug developed for SAR treatment, Pumecitinib nasal spray provides SAR patients with a new treatment choice. The locally applied dosage form also helps avoid the risk of systemic side effects associated with oral antihistamines and oral JAK inhibitors.

Clinical Positioning and Prospects: As the first JAK inhibitor nasal spray globally for the treatment of seasonal allergic rhinitis, Pumecitinib nasal spray pioneers a new non-hormonal treatment that simultaneously relieves both nasal and ocular symptoms. Clinical study data show that it has the potential to provide a strong and effective treatment of allergic rhinitis, and is expected to bring a better treatment plan for the majority of rhinitis patients, including adults and adolescents.

Our Other Clinical-stage Pipeline Products

PG-033 tablets: Oral small molecule TRPV3 inhibitor for treatment of pruritus with first-in-class potential

Pruritus is a common clinical symptom that is difficult to treat. Antihistamine, as a traditional therapy for pruritus, often demonstrates lack of desirable relief of symptoms; other traditional therapies include glucocorticoids and immunomodulators, which often cause adverse reactions and are not suitable for long-term use. Olmsted syndrome is a rare genetic disease, which is triggered by hyperactivation the TRPV3 gene resulting from pathogenic gain-of-function mutations. It is associated with severe pruritus and skin hyperkeratosis. Currently, there is no approved therapy for Olmsted syndrome, which presents a significant unmet medical need.

Innovative Breakthrough: As a clinical-stage oral small molecule TRPV3 inhibitor with first-in-class potential, PG-033 is designed to block the pruritus signaling pathway. This presents the potential of a new treatment plan for pruritus. In addition, as a specific TRPV3 inhibitor, PG-033 targets precisely on the cause of Olmsted syndrome, which is over-activation of TRPV3. As such, PG-033 can be an effective treatment for Olmsted syndrome.

- By specifically targeting TRPV3, PG-033 can block pruritus signal mediated by multiple pro-inflammatory cytokines, and has demonstrated marked pruritus relief in pre-clinical studies, with the potential to benefit patients in clinical settings.

SUMMARY

- Olmsted syndrome is a genetic disorder primarily caused by TRPV3 gene mutations, characterized by intractable pruritus and hyperkeratosis. PG-033 is developed as a potentially first-in-class targeted therapy, which acts directly on the pathogenic TRPV3 mutations.

Clinical Positioning and Prospects: Currently, we are advancing the Phase I clinical study of PG-033, bringing a breakthrough treatment for pruritus patients who are not satisfied with existing therapies. It also brings hope of relief for patients with the rare disease of Olmsted syndrome. We plan to further expand the indications for PG-033 to other types of pruritus and/or hyperkeratosis disorders, and to explore overseas license-out opportunities.

PG-018 tablets: Dual-target inhibitor of JAK1 and endothelin receptor-related ROCK for treatment of autoimmune kidney diseases with first-in-class potential

PG-018 is an innovative small molecule drug that selectively inhibits both JAK1 and endothelin receptor-related ROCK. Since there are currently no approved drugs for membranous nephropathy globally, we believe PG-018 could provide an innovative treatment for the disease. Based on the acting mechanism of PG-018, it can also be applied to the treatment of other forms of immunological kidney diseases, such as IgA nephropathy.

Innovative Breakthrough: PG-018 tablets build a new paradigm for the treatment of autoimmune kidney diseases by acting on two pathological pathways. Given its innovative acting mechanism and high drug concentration in kidney tissue as demonstrated in pre-clinical studies, PG-018 is expected to achieve synergistic effects treating autoimmune kidney disease and offer a solution to the challenges of no approved therapy (for membranous nephropathy, for example) or insufficient efficacy with single agent therapies.

- PG-018 can inhibit abnormally activated immune function by acting on JAK1, and reduce blood pressure by acting on endothelin receptor-related ROCK. As such, it is expected to offer a more effective treatment for autoimmune kidney diseases such as membranous nephropathy through strong synergistic effects.
- In pre-clinical studies, PG-018 has demonstrated the characteristic of kidney tissue-preferential distribution. This allows efficient accumulation of PG-018 molecules at renal lesion sites, enabling it to act more effectively on the target organ.

Clinical Positioning and Prospects: Currently, PG-018 is under Phase I clinical study, and is expected to start Phase II clinical trial in 2027. It is expected to offer an efficient new treatment option for autoimmune kidney disease patients to simultaneously inhibit abnormally activated immune function and lower blood pressure without combined medications.

SUMMARY

Our Pre-clinical Pipeline Candidates

PG-040 ophthalmic solution: a ROCK-JAK dual-target inhibitor for treatment of glaucoma with first-in-class potential

Glaucoma is an ocular degenerative disease characterized by elevated intraocular pressure (“**IOP**”) leading to decreased visual acuity and visual field defects. If not treated in time, it may lead to vision loss and eventual blindness. It is one of the top three eye diseases causing blindness.

Recent research has found that immune-inflammation is one of the core driving mechanisms of optic nerve damage. As such, we developed PG-040, a ROCK-JAK dual-target inhibitor for treatment of glaucoma with first-in-class potential. It is designed to simultaneously target IOP reduction and inflammation inhibition, representing a promising candidate for next-generation glaucoma treatment.

Innovative Breakthrough: PG-040 integrates the effects of ROCK inhibitors and JAK inhibitors to simultaneously deliver the effects of IOP reduction and anti-inflammation, thus achieving synergistic effect to better protect the optic nerve. It has the potential of overcoming the limitations of existing glaucoma treatment, which focuses on IOP control while still facing challenges of progressive optic nerve damage, visual field defect and/or blindness.

- Through ROCK pathway inhibition, PG-040 can reduce aqueous humor outflow resistance by relaxing trabecular meshwork cells and lowering episcleral venous pressure. This helps enhance aqueous humor drainage and reduce IOP, which is traditionally recognized as the core risk factor for glaucoma-related blindness.
- Through JAK pathway inhibition, PG-040 can suppress glaucoma-associated inflammation. Specifically, it inhibits immune responses triggered by retinal ganglion cell (“**RGC**”) dysfunction and sustained excessive glial activation, thereby protecting RGCs and delaying progressive neurodegeneration associated with glaucoma. This aligns with the latest recognition that inflammatory optic nerve damage, in addition to IOP elevation, is a key factor contributing to glaucoma-related blindness.

Clinical Positioning and Prospects: As of the Latest Practicable Date, PG-040 was in pre-clinical stage. We plan to submit an IND application to the NMPA for PG-040 for the treatment of glaucoma in the second quarter of 2026. PG-040 is expected to provide a more comprehensive and effective treatment option for glaucoma patients, achieving the comprehensive effect for the treatment of glaucoma of IOP control, anti-inflammation, and optic nerve protection.

SUMMARY

Our Other Pre-clinical Pipeline Candidates

In addition to the clinical-stage pipeline products above, we are extending our pre-clinical pipeline to other chronic diseases such as urticaria, chronic kidney diseases, acute and chronic pain, metabolic and degenerative diseases, cardiovascular and cerebrovascular diseases, and wound healing disorders. Targeting the physiological barrier characteristics and specific pathways of different tissues, we customize AI-driven molecular designs and formulation differentiated, targeted treatment strategies. We believe this diversified, wide-covering portfolio of pipeline candidates will further strengthen our core competitiveness and bring us resilience against market fluctuations and strengthen our competitiveness.

Our Generic Drug Pipeline Products

While actively promoting the development of innovative drugs, we also engage in generic drug research and development, building a more robust product matrix with a strategic focus on dermatological diseases through the combination of innovative and generic drugs. The indications of our generic drug candidates effectively supplement our innovative drug product portfolio. We expect that the commercialization of such generic drug products will enable us to realize near-term monetary values for us, as well as build up and strengthen our commercialization capabilities.

Our R&D Platforms

We have established and utilized a proven, integrated drug discovery and development system spanning target discovery, molecular discovery and evaluation, translational science and clinical development. Our technological capabilities include discovery of original molecular structures and new molecular entities, investigation of drug process and quality standards, as well as exploration of clinical development in all relevant stages. These research and development capabilities organically constitute our drug development framework, which enables us to efficiently advance pipeline programs through different developmental stages.

Our R&D platforms consist of the following:

- *Novel Drug Design and Discovery Platform:* We use AI-enabled tools to conduct in-depth exploration of pathogenesis and target proteins, forming a differentiated drug design and discovery platform. The core of this platform is a proprietary multi-dimensional evaluation and design framework that supports strategic assessments across three dimensions: the disease dimension, the cellular dimension, and the drug property dimension.
- *Immunology, Inflammation and Dermatology Translational Medicine Platform:* Our translational medicine platform serves as the strategic bridge between source innovation and clinical validation. The platform systematically analyzes clinical phenotypes and immunobiological mechanisms to construct a comprehensive translational research framework.

SUMMARY

- *Complex Topical Drug Formulation Innovation Platform:* Our formulation innovation platform possesses formulation development and quality evaluation capabilities for complex dosage forms. It has completed formulation development for dozens of innovative compounds and generic drugs, which have progressed to different clinical stages.

Our R&D Team

Our R&D team has strong expertise, deep understanding and extensive experience in innovative drug development, spanning from biochemistry, molecular biology, structural biology, immunology, clinical medicine, pharmacology to pharmaceutical engineering. As of September 30, 2025, more than 50% of our R&D team members had obtained advanced degrees, including nine members with doctorate degrees and 42 members with master’s degrees.

We have established an end-to-end R&D framework to ensure the quality of our research and development outcome. Our R&D team is led by a team of distinguished scientists with extensive drug development experience, who lead our early research, clinical development, CMC, formulation development, pharmacology and toxicology studies, clinical registration, and project management. All our core R&D personnel have extensive experience in the pharmaceutical industry of over 15 years, with expertise covering the fields of chemistry, biology, pharmacology and medicine.

For details of our R&D capabilities, platforms and team members, please refer to the paragraph headed “Business — Research and Development.”

OUR STRENGTHS

We believe the following strengths have contributed to our success and differentiated us from our competitors:

- Forward-looking layout of multiple proprietary pipeline products;
- Significant commercialization potential of our Core Product;
- Integrated full-chain innovative drug R&D system with comprehensive technical capabilities covering the entire drug development lifecycle;
- Proprietary core technology platforms for sustained R&D momentum; and
- Experienced leadership and high-caliber team.

SUMMARY

OUR STRATEGIES

We intend to capitalize on our competitive strengths by pursuing the following strategies:

- Advance the development progress of our Core Product and pipeline candidates;
- Prepare commercialization layout for our Core Product and future pipeline;
- Enrich our immune-inflammatory pipeline utilizing technology platforms; and
- Recruit, cultivate and retain talents to enrich team capabilities.

COLLABORATION WITH THIRD PARTIES

We collaborate with CROs to conduct and support our pre-clinical and clinical trials in line with industry practice. We select our CROs by weighing various factors. Upon business engagement, we assess CROs based on their business focus, capabilities and overall market recognition. Secondly, we also value the R&D capabilities of the CROs and the management skills of their leaders based on their experience and previous track record. Overall, we aim to select CROs that have optimal compatibility with our pre-clinical and clinical development programs. When collaborating with CROs on a given project, our internal project team manage such project on an end-to-end basis and closely monitors the progress, engages in regular communication with the CRO teams to understand project milestones, identify potential risks, and ensure the project deliverables. Simultaneously, the project/trial leader maintains close contact with the financial departments of both our Company and the CRO organization, implementing stringent financial controls at different stages of the project to ensure the timely and quality completion of the project and accurate recording of relevant expenses.

We currently collaborate with CDMOs (including CMOs) to manufacture our drug candidates to supply for pre-clinical studies and clinical trials. We have established a comprehensive marketing authorization holder (MAH) management system and have entered into quality agreements with our contract manufacturing partners. Such agreements specify, among other things, that the contract manufacturers shall possess the relevant qualifications under the GMP, and comply with the standard operating procedures formulated by us and all applicable laws and regulations when manufacturing our drug candidates. Our contract manufacturers are also required to conduct quality testing before delivering any drug candidate to us, and to ensure the drug candidate delivered meets the quality standards as mutually agreed in our agreements with them.

We have formulated an adaptive commercialization strategy to accelerate the market penetration of our Core Product in the foreseeable future in China upon receiving relevant marketing approval. We plan to initially collaborate with industry-recognized contract sales organizations (CSOs) with experience in selling drugs, capitalizing on their extensive sales networks and distribution channels to facilitate rapid market entry and increase market coverage for our Core Product. In the long run, as we identify favorable market opportunities,

SUMMARY

we plan to assemble a dedicated in-house sales and marketing force with extensive experience in our focused therapeutic areas. As of the Latest Practicable Date, we have entered into an exclusive cooperation agreement with Jumpcan Pharmaceutical Group Limited regarding the marketing and distribution of Pumecitinib nasal spray.

For further details, please refer to the paragraphs headed “Business — Research and Development — Clinical Development — Relationship with CROs,” “Business — Manufacturing & Controls — Collaboration with CDMO Partners” and “Business — Commercialization.”

INTELLECTUAL PROPERTY

We have a global portfolio of patents to protect our drug candidates and technologies. As of the Latest Practicable Date, we held nine patents issued in China, 18 patents issued overseas, and 59 pending patent applications. As of the Latest Practicable Date, we had not received any material concerns or inquiries from relevant competent authorities that make us believe that any of the pending patent applications will be rejected. For further details on our intellectual property rights, please refer to the paragraph headed “Business — Intellectual Property.”

OUR SUPPLIERS

During the Track Record Period, our major suppliers primarily consisted of CROs and CDMOs and we did not experience any material disputes with our suppliers. In addition, we believe that adequate alternative sources for such supplies exist, and we have developed alternative sourcing strategies for these supplies. We will establish necessary relationships with alternative sources based on supply continuity risk assessment.

In 2024 and the nine months ended September 30, 2025, our purchases from our five largest suppliers in each period in aggregate amounted to RMB32.1 million and RMB21.9 million, representing 30.6% and 34.3% of our total corresponding purchases in such period, respectively, and our purchases from the largest supplier accounted for 11.0% and 9.9% of our total corresponding purchases, respectively. Please refer to the paragraph headed “Business — Our Suppliers.”

SUMMARY OF HISTORICAL FINANCIAL INFORMATION

This summary historical data of financial information set forth below have been derived from, and should be read in conjunction with our Historical Financial Information, including the accompanying notes, set forth in Appendix I to this document, as well as the information set forth in the section headed “Financial Information.” Our historical financial information was prepared in accordance with IFRS Accounting Standards.

SUMMARY

Summary Data of Statements of Profit or Loss and Other Comprehensive Income

The following table sets forth our statements of profit or loss and other comprehensive income for the year/periods indicated.

	Year ended December 31,	Nine months ended September 30,	
	2024	2024	2025
	<i>(RMB in thousands)</i>		
	<i>(unaudited)</i>		
Other net income	11,220	819	1,158
(Impairment losses)/reversal of impairment losses on financial assets	(172)	(93)	590
General and administrative expenses . . .	(40,753)	(28,211)	(27,937)
Research and development expenses . . .	(146,207)	(103,232)	(97,074)
Loss from operations	(175,912)	(130,717)	(123,263)
Finance costs	(2,584)	(1,908)	(1,713)
Loss before taxation	(178,496)	(132,625)	(124,976)
Income tax	—	—	—
Loss for the year/period	(178,496)	(132,625)	(124,976)

For the year ended December 31, 2024 and for the nine months ended September 30, 2025, we incurred net losses of RMB178.5 million and RMB125.0 million, respectively, primarily due to our substantial research and development expenses and general and administrative expenses.

During the Track Record Period, our research and development expenses consisted of (i) outsourced pre-clinical and clinical study expenses; and (ii) staff costs and share-based payments. Our research and development expenses were RMB146.2 million for the year ended December 31, 2024, and RMB103.2 million and RMB97.1 million for the nine months ended September 30, 2024 and 2025, respectively. For the year ended December 31, 2024 and for the nine months ended September 30, 2024 and 2025, the research and development expenses for the Core Product were RMB88.7 million, RMB59.4 million and RMB62.2 million, respectively, representing 60.7%, 57.6% and 64.1% of our total research and development expenses for the same period, respectively. Our research and development expenses decreased by 5.9% from RMB103.2 million in the nine months ended September 30, 2024 to RMB97.1 million in the same period of 2025, primarily attributable to the decrease in research and development expenses relating to the clinical trials for Pumecitinib gel in line with the conclusion of the observation period for its Phase III clinical trial (for the indication of atopic dermatitis) in 2025.

SUMMARY

During the Track Record Period, our general and administrative expenses primarily consisted of staff costs, share-based payments to our management personnel, and professional service fees relating to our proposed listing on the Beijing Stock Exchange. Our general and administrative expenses remained relatively stable at RMB28.2 million in the nine months ended September 30, 2024 and RMB27.9 million in the same period of 2025, primarily resulting from increases in professional service fees in connection with our proposed listing on the Beijing Stock Exchange and in depreciation and amortization arising from our newly leased property in connection with our proposed development of manufacturing facility, which are largely offset by decreases in share-based payments and office, travel and hiring expenses. The decrease in share-based payments was primarily due to certain senior management personnel transitioning to R&D responsibilities in 2025. The decrease in office, travel and hiring expenses resulted primarily from our decreased hiring activities, reflecting the improved stability of our employees.

For details of our financial position, please refer to the paragraph headed “Financial Information — Description of Key Components of Our Statements of Profit or Loss and Other Comprehensive Income” in this document.

SUMMARY

Summary of Statements of Financial Position

The following table sets forth our statements of financial position as of the dates indicated.

	As of December 31, 2024	As of September 30, 2025
	<i>(RMB in thousands)</i>	
	<i>(unaudited)</i>	
Non-current assets		
Property and equipment	4,652	4,209
Right-of-use assets	1,574	16,436
Intangible assets	1,823	743
Other non-current assets	11,274	14,014
	<u>19,323</u>	<u>35,402</u>
Current assets		
Prepayments and other receivables	8,498	6,643
Financial assets measured at fair value through profit or loss	50,186	–
Cash and cash equivalents	189,653	154,776
	<u>248,337</u>	<u>161,419</u>
Current liabilities		
Trade and other payables	27,841	48,671
Amount due to a related party	2,364	1,151
Bank loans	82,000	40,990
Lease liabilities	1,097	4,145
	<u>113,302</u>	<u>94,957</u>
Net current assets	135,035	66,462
Total assets less current liabilities	<u>154,358</u>	<u>101,864</u>
Non-current liabilities		
Bank loans	–	39,000
Lease liabilities	426	13,086
Deferred income	–	5,000
	<u>426</u>	<u>57,086</u>

CAPITAL AND RESERVES		
Share capital	96,085	96,085
Reserves	57,847	(51,307)
TOTAL EQUITY	<u>153,932</u>	<u>44,778</u>

SUMMARY

Our net current assets decreased from RMB135.0 million as of December 31, 2024 to RMB66.5 million as of September 30, 2025, primarily attributable to decreases in our financial assets at fair value through profit or loss and our cash and cash equivalents, reflecting the cash consumed in our operations and R&D activities during the nine months ended September 30, 2025.

For details of our financial position, please refer to the paragraph headed “Financial Information — Discussion of Selected Items from Our Statements of Financial Position” in this document.

Summary of Statements of Cash Flows

The following table sets forth a summary of our statements of cash flows for the year/periods indicated.

	Year ended December 31,	Nine months ended September 30,	
	2024	2024	2025
	(RMB in thousands)		
	(unaudited)		
Net cash used in operating activities . . .	(159,518)	(131,842)	(79,041)
Net cash (used in)/generated from			
investing activities	(40,154)	(28,301)	49,146
Net cash generated from/(used in)			
financing activities	<u>259,621</u>	<u>127,956</u>	<u>(4,982)</u>
Net increase/(decrease) in cash and cash			
equivalents	59,949	(32,187)	(34,877)
Cash and cash equivalents at beginning			
of the year/period	<u>129,704</u>	<u>129,704</u>	<u>189,653</u>
Cash and cash equivalents at end of			
 the year/period	<u>189,653</u>	<u>97,517</u>	<u>154,776</u>

We recorded net operating cash outflows during the Track Record Period. Our net cash used in operating activities was RMB159.5 million, RMB131.8 million and RMB79.0 million for the year ended December 31, 2024 and for the nine months ended September 30, 2024 and 2025, respectively. As a clinical-stage biotechnology company, we plan to improve our net operating cash outflow position through the following ways: (i) accelerating the clinical development of our drug candidates and advancing them towards commercialization in the next few years, particularly our Core Product, PG-011 (Pumecitinib); (ii) adopting comprehensive measures to effectively optimize our cost structure and control our operating expenses; (iii) closely monitoring our payables settlement, thereby enhancing working capital management and improving our cash flow position, and (iv) successfully launching the [REDACTED] to obtain the [REDACTED].

SUMMARY

The Directors are of the opinion that, taking into account the financial resources available to us, including (i) our existing cash and cash equivalents, (ii) available bank facilities, and (iii) the estimated [REDACTED] from the [REDACTED], we have sufficient working capital to cover 125% of our cash expenditure for at least the next 12 months following the date of this document.

Our cash burn rate refers to the average monthly (i) net cash used in operating activities, (ii) capital expenditures for purchases of property and equipment and intangible assets; and (iii) principal and interest payments on lease liabilities. As of September 30, 2025, we had cash and cash equivalents of RMB154.8 million. Assuming an [REDACTED] of HK\$[REDACTED] per [REDACTED] (being the low end of the indicative [REDACTED] range) and no exercise of the [REDACTED], we estimate that we will receive [REDACTED] of approximately HK\$[REDACTED] from the [REDACTED]. Assuming an average cash burn rate going forward of 1.3 times the level for the nine months ended September 30, 2025, we estimate that our cash and cash equivalents as of September 30, 2025 will be able to maintain our financial viability for [REDACTED] months without taking into account the [REDACTED] from the [REDACTED], or, if taking into account such [REDACTED], [REDACTED] months. Our Directors and management team will continue to monitor our working capital, cash flows, and our business development progress.

For details of our cash flows and working capital, please refer to the paragraph headed “Financial Information — Liquidity and Capital Resources” in this document.

Cash Operating Costs

The following table sets forth key information relating to our cash operating costs for the periods indicated:

	For the Year Ended December 31,	For the Nine Months Ended September 30,	
	2024	2024	2025
<i>(RMB in thousands)</i>			
Costs relating to the R&D of our Core Product			
Outsourced pre-clinical and clinical study expenses	56,538	45,015	28,761
Staff costs	21,390	15,924	16,807
Costs of materials and consumables . . .	3,390	3,013	852
Others	4,728	3,652	2,404
Subtotal	86,047	67,603	48,824
Costs relating to the R&D of our other product candidates			
Outsourced pre-clinical and clinical study expenses	28,116	21,560	16,874
Staff costs	19,818	16,474	11,828
Costs of materials and consumables . . .	3,287	2,196	1,321
Others	2,414	1,971	2,854

SUMMARY

	For the Year Ended December 31,	For the Nine Months Ended September 30,	
	2024	2024	2025
	<i>(RMB in thousands)</i>		
Subtotal	53,634	42,203	32,876
Staff costs	17,314	13,348	12,749
Professional service fees ⁽¹⁾	5,290	4,038	3,080
Office, travel and hiring expenses	2,713	2,250	1,275
Others	4,447	2,637	3,443
Total	169,445	132,079	102,247

Note:

- (1) Primarily represents fees paid for professional services relating to our proposed listing on the Beijing Stock Exchange.

KEY FINANCIAL RATIO

The following table sets forth our current ratio as of the dates indicated:

	As of December 31, 2024	As of September 30, 2025
Current ratio ⁽¹⁾	2.19	1.70

Note:

- (1) Calculated by dividing our total current assets by our total current liabilities as of the end of the relevant period.

RISK FACTORS

Our business and the [REDACTED] involve certain risks including those set out in the section headed “Risk Factors” in this document. As different [REDACTED] may have different interpretations and criteria when determining the significance of a risk, you should read the “Risk Factors” section in its entirety before you decide to [REDACTED] in our [REDACTED]. Some of the major risks that we face include:

- The regulatory approval process of the NMPA and other comparable regulatory authorities for our product candidates is lengthy and the result is unpredictable. We may not achieve favorable results for our drug candidates in clinical trials, and

SUMMARY

cannot give any assurance that any of our drug candidates currently in development will receive regulatory approval. Any failure to timely obtain these regulatory approvals could adversely affect our business prospects and profitability;

- The development process of innovative pharmaceutical products is typically lengthy, costly, and with uncertain outcome, and we may be unable to achieve the clinical development results of our drug candidates as we expect, or at all;
- We have no track record in launching and marketing drug candidates. If we are unable to further develop our marketing and sales capabilities or enter into agreements with third parties to market and sell our drug candidates, we may not be able to generate revenue from our drug candidates;
- If our competitors develop therapies that are similar, more advanced, or more effective than ours, or launch innovative products and therapies ahead of us, our financial condition and results of operations and our ability to successfully commercialize our drug candidates could be materially and adversely affected; and
- If we cannot maintain or develop clinical collaborations and relationships with our principal investigators, key opinion leaders, physicians and experts, our results of operations and prospects could be adversely affected.

[REDACTED]

To support the development and operation of our business and other general working capital of our Company, we have received multiple rounds of [REDACTED] since our establishment. Please refer to the paragraph headed “History, Development and Corporate Structure — [REDACTED]” for details of our [REDACTED] and the identity and background of our [REDACTED].

CONTINUING CONNECTED TRANSACTION

We have entered into certain transaction which would constitute non-exempt continuing connected transaction under Chapter 14A of the Listing Rules after the [REDACTED]. Further particulars about such transaction together with the application for a waiver from strict compliance with the relevant requirements under Chapter 14A of the Listing Rules are set out in “Continuing Connected Transaction” in this document.

OUR CONTROLLING SHAREHOLDERS

As at the Latest Practicable Date, Mr. Li was entitled to exercise the voting rights attached to approximately 43.22% of the total issued share capital of our Company, among which, (i) Mr. Li (in his personal capacity) was interested in approximately 29.16% of our total issued share capital, and (ii) controlled approximately 14.06% of the voting rights of our Company through Chifeng Qingxi and Chifeng Mingquan, which held approximately 10.41% and 3.65% of our Shares, respectively.

SUMMARY

Immediately following the completion of the [REDACTED] (assuming that the [REDACTED] is not exercised), Mr. Li, directly and indirectly through Chifeng Qingxi and Chifeng Mingquan, will be entitled to exercise the voting rights attached to Shares representing approximately [REDACTED]% of the issued share capital of our Company. Accordingly, Mr. Li, Chifeng Qingxi and Chifeng Mingquan are our Controlling Shareholders upon [REDACTED].

[REDACTED] STATISTICS

The statistics in the following table are based on the assumptions that [REDACTED] H Shares will be [REDACTED] pursuant to the [REDACTED], and the [REDACTED] is not exercised:

	Base on the [REDACTED] of HK\$[REDACTED]	Based on the [REDACTED] of HK\$[REDACTED]
[REDACTED] of our Shares ⁽¹⁾	HK\$[REDACTED]	HK\$[REDACTED]
[REDACTED] of our H Shares ⁽²⁾	HK\$[REDACTED]	HK\$[REDACTED]
Unaudited [REDACTED] adjusted net tangible assets per Share ⁽³⁾	HK\$[REDACTED]	HK\$[REDACTED]

Notes:

- (1) The calculation of [REDACTED] is based on [REDACTED] Shares expected to be in issue immediately upon completion of the [REDACTED].
- (2) The calculation of market size of our H Shares is based on the [REDACTED] H Shares expected to be in issue immediately upon the completion of the [REDACTED], comprising [REDACTED] H Shares to be [REDACTED] under the [REDACTED] and [REDACTED] H Shares to be converted from Domestic Shares.
- (3) The unaudited [REDACTED] adjusted net tangible assets per Share is arrived at after making the adjustments referred to in “Appendix II — Unaudited [REDACTED] Financial Information” and on the basis that [REDACTED] Shares were in issue (as adjusted by the Share subdivision on a one for two basis in January 2026) immediately following the completion of the [REDACTED], without taking into account of any H Share which may be [REDACTED] and [REDACTED] upon the exercise of the [REDACTED].

SUMMARY

[REDACTED] EXPENSES

[REDACTED] expenses represent professional fees, [REDACTED] commission and other fees incurred in connection with the [REDACTED]. We estimate that our [REDACTED] expenses will be approximately HK\$[REDACTED] (assuming the [REDACTED] is not exercised and based on the [REDACTED] of HK\$[REDACTED]), which account for approximately [REDACTED]% of the gross [REDACTED] from the [REDACTED]. We estimate the [REDACTED] expenses to consist of approximately HK\$[REDACTED] in [REDACTED] fees and HK\$[REDACTED] in non-[REDACTED] fees (which consist of fees and expenses of legal advisors and our Reporting Accountants of approximately HK\$[REDACTED] and other fees and expenses of approximately HK\$[REDACTED]). Among the total [REDACTED] expenses, approximately HK\$[REDACTED] will be directly attributable to the [REDACTED] of our H Shares, which will be deducted from equity upon the completion of the [REDACTED], and the remaining approximately HK\$[REDACTED] will be expensed in our statements of profit or loss and other comprehensive income.

DIVIDENDS

We did not declare or pay any dividend during the Track Record Period. We currently do not have a pre-determined dividend payout ratio. We currently do not anticipate paying any cash dividends in the foreseeable future. [REDACTED] should not purchase our H Shares with the expectation of receiving cash dividends. Any future determination to pay dividends will be made at the discretion of our Directors and may be based on a number of factors, including our future operations and earnings, capital requirements and surplus, general financial condition, contractual restrictions and other factors that our Directors may deem relevant. Regulations in the PRC currently permit payment of dividends of a PRC company only out of accumulated distributable after-tax profits less any recovery of accumulated losses and appropriations to statutory and other reserves that we are required to make, as determined in accordance with its articles of association and the accounting standards and regulations in China. Taking into account the aforesaid, we may not have sufficient or any distributable profits to make dividend distributions to our Shareholders in a given year, in view of our accumulated losses, or even if we become profitable, as we will only be able to declare or pay dividends out of our distributable profits until (i) the accumulated losses are covered by our after-tax profits, and (ii) sufficient statutory and other reserves are drawn in accordance with the relevant laws, regulations and our constitutional documents. In light of our accumulated losses as disclosed in this document, it is unlikely that we will be eligible to pay dividends out of our profits in the near future.

[REDACTED]

We estimate that we will receive [REDACTED] from the [REDACTED] of approximately HK\$[REDACTED], after deducting [REDACTED], fees and other estimated expenses in connection with the [REDACTED] paid and payable by us in connection with the [REDACTED] and assuming that the [REDACTED] is not exercised and an [REDACTED] of HK\$[REDACTED] per H Share (being the mid-point of the indicative [REDACTED] range).

SUMMARY

We currently intend to apply these [REDACTED] for the following purposes, subject to changes in light of our evolving business needs and changing market conditions:

- Approximately [REDACTED]%, or HK\$[REDACTED], will be allocated to the development of our Core Product, PG-011 (Pumecitinib):
- Approximately [REDACTED]%, or HK\$[REDACTED], will be allocated to the development of our other product candidates:
- Approximately [REDACTED]%, or HK\$[REDACTED], will be used to further strengthen our innovation and commercialization capabilities with respect to complex drug formulation, including to support the construction of our proprietary manufacturing facility for Pumecitinib gel and nasal spray; and
- Approximately [REDACTED]%, or HK\$[REDACTED], will be used for our daily operations and general corporate purposes, including working capital requirements, staff salaries, administrative expenses, marketing and business development activities and other routine operational costs.

RECENT DEVELOPMENTS AND NO MATERIAL ADVERSE CHANGE

We continued investing in the research and development of our drug candidates after September 30, 2025. To support our funding needs for operations and research and development, we continued to utilize available sources of funds, including bank loans. As of the Latest Practicable Date, the outstanding balance of our bank loans increased to RMB130.0 million.

We expect that we will continue to record net losses for the year ended December 31, 2025 and the year ending December 31, 2026, primarily because (i) we expect to incur significant research and development expenses as we continue to advance and expand our pipeline and enhance our technology platforms; and (ii) we expect to incur [REDACTED] expenses in connection with our proposed [REDACTED].

After performing sufficient due diligence work that our Directors consider appropriate and after due and careful consideration, our Directors confirm that, up to the date of this document and except as disclosed in this document, there has been no material adverse change in our financial or trading position or prospects since September 30, 2025 (being the end date of the period reported on in the Historical Financial Information set out in Appendix I to this document) and there has been no event since September 30, 2025 that would materially affect the Historical Financial Information as set out in Appendix I to this document.

DEFINITIONS

In this document, unless the context otherwise requires, the following terms shall have the meanings set out below.

“affiliate”	any other person, directly or indirectly, controlling or controlled by or under direct or indirect common control with such specified person
“AFRC”	Accounting and Financial Reporting Council (會計和財務匯報局)
“Articles” or “Articles of Association”	the Articles of Association of our Company, as amended, which shall become effective on the [REDACTED], a summary of which is set out in Appendix V
“associate(s)”	has the meaning ascribed thereto under the Hong Kong Listing Rules
“Audit Committee”	the audit committee of the Board
“Board” or “Board of Directors”	the board of directors of our Company
“business day”	any day (other than a Saturday, Sunday or public holiday) on which banks in Hong Kong are generally open for business
“CAGR”	compound annual growth rate

[REDACTED]

“CG Code”	the Corporate Governance Code as set out in Appendix C1 to the Hong Kong Listing Rules

DEFINITIONS

“Chifeng Mingquan”	Chifeng Mingquan Enterprise Management Center (Limited Partnership)* (赤峰名泉企業管理中心(有限合夥)), a limited partnership established in the PRC on March 17, 2022, one of our employee incentive platforms and one of the Controlling shareholders of the Company
“Chifeng Qingxi”	Chifeng Qingxi Enterprise Management Center (Limited Partnership)* (赤峰清溪企業管理中心(有限合夥)), a limited partnership established in the PRC on March 12, 2020, one of our employee incentive platforms and one of the Controlling shareholders of the Company
“Chifeng Saliont”	Chifeng Saliont Pharmaceutical Co., Ltd.* (赤峰賽林泰藥業有限公司), formerly known as Chifeng Rongjitang Pharmaceutical Co., Ltd. (赤峰榮濟堂藥業有限公司), a limited liability company established in the PRC on June 11, 2004, and is owned by Mr. Li and his brother as to 97.41% and 2.59%, respectively as at the Latest Practicable Date
“China” or “PRC”	the People’s Republic of China
“CNIPA”	China National Intellectual Property Administration (國家知識產權局)
“Companies Ordinance”	the Companies Ordinance (Chapter 622 of the Laws of Hong Kong), as amended or supplemented or otherwise modified from time to time
“Companies (Winding Up and Miscellaneous Provisions) Ordinance”	the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Chapter 32 of the Laws of Hong Kong), as amended or supplemented or otherwise modified from time to time
“Company”, “our Company”, “we”, “our” or “us”	PrimeGenX Therapeutics Co., Ltd. (北京普祺醫藥科技股份有限公司), a limited liability company established in the PRC on September 26, 2016 and subsequently converted into a joint stock company with limited liability on April 25, 2022
“Controlling Shareholder(s)”	refers to Mr. Li, Chifeng Mingquan and Chifeng Qingxi, the controlling shareholders of our Company. See “Relationship with our Controlling Shareholders”

DEFINITIONS

“Converted H Shares”	H Shares which will be converted from Domestic Shares immediately upon [REDACTED]
“Core Product”	has the meaning ascribed thereto in Chapter 18A of the Listing Rules; for the purpose of this document, our Core Product refers to PG-011 (Pumecitinib)
“CSDC”	China Securities Depository and Clearing Corporation Limited (中國證券登記結算有限責任公司)
“CSRC”	the China Securities Regulatory Commission (中國證券監督管理委員會)
“Director(s)”	the director(s) of our Company
“Domestic Share(s)”	ordinary share in our capital, with a nominal value of RMB0.5 each, which are subscribed for and paid up in Renminbi
“Dr. Du”	Dr. Daniel Yunlong Du, an executive Director, deputy general manager and chief medical officer of our Company
“Dr. Han”	Dr. Han Yongxin (韓永信), the non-executive Director of our Company
“EIT”	enterprise income tax
“EIT Law”	the PRC Enterprise Income Tax Law (《中華人民共和國企業所得稅法》)
“ESG”	environmental, social and governance
“Extreme Conditions”	extreme conditions caused by a super typhoon or other natural disaster of a substantial scale seriously affects the working public’s ability to resume work or brings safety concern for a prolonged period as announced by the government of Hong Kong
“FIC”	first-in-class

DEFINITIONS

[REDACTED]

“Frost & Sullivan”	Frost & Sullivan (Beijing) Inc., Shanghai Branch Co., the independent industry consultant commissioned by our Company to prepare the Frost & Sullivan Report
“Frost & Sullivan Report”	the independent research report commissioned by our Company and prepared by Frost & Sullivan
“General Rules of HKSCC”	the General Rules of HKSCC as may be amended or modified from time to time and where the context so permits, shall include the HKSCC Operational Procedures
“GFA”	gross floor area

[REDACTED]

“Guide” or “Guide for New Listing Applicants”	the Guide for New Listing Applicants as published by the Stock Exchange, as amended from time to time
“H Share(s)”	overseas [REDACTED] foreign Share(s) in the share capital of our Company with a nominal value of RMB0.5 each, which is/are to be [REDACTED] in HK dollars and for which an application has been made for the [REDACTED] of [REDACTED] and permission to [REDACTED] in on the Hong Kong Stock Exchange

[REDACTED]

DEFINITIONS

“HK\$”, “Hong Kong dollars”, “HK dollars” or “cents”	Hong Kong dollars and cents respectively, the lawful currency of Hong Kong

[REDACTED]

“Hong Kong” or “HK”	the Hong Kong Special Administrative Region of the People’s Republic of China

“Hong Kong Listing Rules” or “Listing Rules”	the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited, as amended or supplemented from time to time

[REDACTED]

DEFINITIONS

[REDACTED]

“Hong Kong Stock Exchange” or “Stock Exchange”	The Stock Exchange of Hong Kong Limited, a wholly-owned subsidiary of Hong Kong Exchanges and Clearing Limited

[REDACTED]

“Independent Third Party(ies)”	person(s) or company(ies) and their respective ultimate beneficial owner(s), who/which, to the best of our Directors’ knowledge, information and belief, having made all reasonable enquiries, is/are not our connected persons or associates of our connected persons as defined under the Hong Kong Listing Rules

[REDACTED]

DEFINITIONS

[REDACTED]

“Joint Sponsors” the joint sponsors of the [REDACTED] as named in “Directors and Parties Involved in the [REDACTED]” in this document

“Latest Practicable Date” January 16, 2026, being the latest practicable date prior to the printing of this document for the purpose of ascertaining certain information contained in this document

[REDACTED]

“Listing Committee” the Listing Committee of the Hong Kong Stock Exchange

[REDACTED]

DEFINITIONS

“Main Board”	the stock market (excluding the option market) operated by the Hong Kong Stock Exchange which is independent from and operated in parallel with GEM of the Hong Kong Stock Exchange
“mainland China”	the People’s Republic of China excluding Hong Kong, the Macau Special Administrative Region and Taiwan region
“Mr. Li”	Mr. Li Yuliang (李雨亮), one of the controlling shareholders of the Company, chairman of the Board, an executive Director and general manager of the Company and the spouse of Ms. Wang
“Mr. Wu”	Mr. Wu Xing (毋興), an executive Director, Chief Financial Officer, Board Secretary, and one of the joint company secretaries of the Company
“Ms. Wang”	Ms. Wang Hongmei (王紅媚), formerly known as Wang Hongmei (王紅梅), an executive Director of the Company and the spouse of Mr. Li
“NEEQ”	the National Equities Exchange and Quotations system (全國中小企業股份轉讓系統), also known as the New Third Board
“NMPA”	the National Medical Products Administration of the PRC (中華人民共和國國家藥品監督管理局) and its predecessor, the China Food and Drug Administration (國家食品藥品監督管理總局)
“Nomination Committee”	the nomination committee of the Board

[REDACTED]

DEFINITIONS

[REDACTED]

“PCT”	Patent Cooperation Treaty, an international treaty administered by the World Intellectual Property Organization that allows inventors and companies to seek patent protection for their inventions simultaneously in multiple countries through a single international patent application, simplifying the process of securing patent rights across different jurisdictions and providing a standardized procedure for the initial phase of patent filing
“PRC Company Law”	Company Law of the People’s Republic of China (中華人民共和國公司法), as amended, supplemented or otherwise modified from time to time
“PRC Government” or “State”	the central government of the PRC, including all political subdivisions (including provincial, municipal and other regional or local government entities) and its organs or, as the context requires, any of them
“PRC Law”	the laws and regulations of the PRC, without reference to the laws and regulations of Hong Kong, the Macau Special Administrative Region and the relevant regulations of Taiwan region
“PRC Legal Advisor”	Fangda Partners, legal advisor to our Company as to PRC Law
“PRC Securities Law”	the Securities Law of the PRC (《中華人民共和國證券法》), as amended, supplemented or otherwise modified from time to time

DEFINITIONS

[REDACTED]

“document”	this document being issued in connection with the [REDACTED]
“R&D”	research and development
“Regulation S”	Regulation S under the U.S. Securities Act
“Remuneration Committee”	the remuneration committee of the Board
“RMB” or “Renminbi”	Renminbi, the lawful currency of the PRC
“SAFE”	State Administration of Foreign Exchange of the PRC (中華人民共和國外匯管理局)
“SAMR”	State Administration for Market Regulation (國家市場監督管理總局)
“SFC”	the Securities and Futures Commission of Hong Kong
“SFO” or “Securities and Future Ordinance”	the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong), as amended or supplemented from time to time
“Shanghai-Hong Kong Stock Connect”	a securities trading and clearing links program developed by the Hong Kong Stock Exchange, Shanghai Stock Exchange, HKSCC and China Securities Depository and Clearing Corporation Limited for mutual market access between Hong Kong and Shanghai

DEFINITIONS

“Share(s)” ordinary share(s) in the capital of our Company with nominal value of RMB0.5 each

“Shareholder(s)” holder(s) of Share(s)

[REDACTED]

“STA” State Taxation Administration (中華人民共和國國家稅務總局)

[REDACTED]

“State Council” the State Council of the PRC (中華人民共和國國務院)

“Takeovers Code” the Code on Takeovers and Mergers issued by the SFC, as amended, supplemented or otherwise modified from time to time

“Track Record Period” the period comprising the one financial year ended December 31, 2024 and nine months ended September 30, 2025

[REDACTED]

“U.S.” or “United States” the United States of America, its territories, its possessions and all areas subject to its jurisdiction

“U.S. Securities Act” the United States Securities Act of 1933, as amended and supplemented or otherwise modified from time to time, and the rules and regulations promulgated thereunder

“US\$”, “USD” or “U.S. dollars” United State dollars, the lawful currency for the time being of the United States

“%” Per cent

DEFINITIONS

In this document, the terms “associate”, “close associate”, “connected person”, “connected transaction”, “core connected person”, “subsidiary” and “substantial shareholder” shall have the meanings given to such terms in the Hong Kong Listing Rules, unless the context otherwise requires.

If there is any inconsistency between the Chinese names of the entities or enterprises established in the PRC mentioned in this document and their English translations, the Chinese names shall prevail. The English translations of the Chinese names of such PRC entities or enterprises are provided for identification purposes only.

GLOSSARY OF TECHNICAL TERMS

This glossary contains definitions of certain technical terms used in this document in connection with us and our business. These may not correspond to standard industry definitions and may not be comparable to similarly terms adopted by other companies.

“AD”	atopic dermatitis, a chronic, relapsing, inflammatory skin disease characterized clinically by pruritus, polymorphic skin lesions with exudative tendencies
“ADME”	absorption, distribution, metabolism and excretion
“AE”	adverse event, any untoward medical occurrences in a patient or clinical investigation subject administered a drug or other pharmaceutical product during clinical trials and which do not necessarily have a causal relationship with the treatment
“AESI”	adverse event of special interest
“ANDA”	abbreviated new drug application
“AR”	allergic rhinitis, a non-infectious chronic inflammatory disease of the nasal mucosa mainly mediated by immunoglobulin E (IgE) when atopic individuals are exposed to allergens
“BID”	<i>bis in die</i> , which means twice a day
“BSA”	body surface area
“CADD”	computer-aided drug design
“CDE”	Center for Drug Evaluation of the NMPA
“CDMO”	contract development and manufacturing organization, a company that serves other companies in the pharmaceutical industry on a contract basis, providing drug development and drug manufacturing services
“cGMP”	current Good Manufacturing Practice

GLOSSARY OF TECHNICAL TERMS

“clinical trial”	an experiment performed on human beings in order to evaluate the comparative efficacy of two or more therapies. An experimental design used for testing the effectiveness of a new medication or a new therapeutic procedure. Individuals are usually assigned randomly to a treatment group (experimental therapy) and a control group (placebo or standard therapy) and the outcomes of the two groups are compared
“CMO”	Contract Manufacturing Organization
“C _{max} ”	the maximum (or peak) serum concentration that a drug achieves in a specified compartment or test area of the body after the drug has been administered and before the administration of a second dose
“CMC”	chemistry, manufacturing, and controls, a term for the chemical composition, formulation, and quality control processes used in the manufacturing of a drug
“CRO”	contract research organization, a company that provides research services to pharmaceutical and biotechnology companies on a contract basis
“CSO”	contract sales organization, a third-party company that provides sales services to pharmaceutical, biotechnology, and medical device companies
“EASI”	eczema area and severity index, a clinical measure used to evaluate the effectiveness of treatments for atopic dermatitis. It is a score calculated based on the severity of lesions in different areas of the skin, the size of the affected areas, and a composite score that incorporates the area of each body part in relation to the total body surface area
“FAS”	full analysis set
“FDA”	the United States Food and Drug Administration, a federal agency of the Department of Health and Human Services
“glaucoma”	a degenerative eye disease characterized by elevated intraocular pressure and damage to the optic nerve

GLOSSARY OF TECHNICAL TERMS

“GMP”	Good Manufacturing Practice, a system for ensuring that products are consistently produced and controlled according to quality standards, which is designed to minimize the risks involved in any pharmaceutical production that cannot be eliminated through testing the final product. It is also the practice required in order to conform to the guidelines recommended by agencies that control the authorization and licensing of the manufacture and sale of pharmaceutical products
“hyperkeratosis”	the thickening of the outer layer of the skin that contains a tough, protective protein called keratin
“IGA”	Investigator’s Global Assessment score, an assessment of skin conditions, particularly atopic dermatitis and psoriasis, based on the physician’s subjective judgment, allowing researchers to quickly evaluate the severity of the disease at a given time point. It is commonly used to assess drug efficacy
“IgE”	immunoglobulin E, a type of antibody which plays a key role in the body’s defense against certain infections and is also involved in allergic reactions. When an allergen enters the body, IgE antibodies bind to it and trigger the release of histamine and other chemicals from mast cells and basophils, leading to symptoms such as itching, swelling, and redness. Elevated levels of IgE are often associated with allergic conditions
“IND”	investigational new drug, an application in the drug review process required by a regulatory authority to decide whether a new drug is permitted to initiate clinical trials
“inhibitor”	a substance that binds to and decreases the activity of a specific enzyme or protein, thereby regulating biological processes and often used therapeutically to block disease-related pathways
“innovative drug”	drugs with original structures or novel mechanisms of action
“IL-4”	interleukin-4, a cytokine that regulates immune cell function

GLOSSARY OF TECHNICAL TERMS

“IL-13”	interleukin-13, an immunoregulatory cytokine secreted predominantly by activated Th2 cells and mast cells
“ <i>in vitro</i> ”	Latin for “within the glass”, studies using components of an organism that has been isolated from their usual biological surroundings
“IOP”	intraocular pressure, the fluid pressure of the eye
“iTNSS”	instantaneous total nasal symptom score
“iTOSS”	instantaneous total ocular symptom score
“IVPT”	<i>in vitro</i> permeation test, the test that estimates the degree a dosage form promotes or inhibits the permeation of its ingredients across physiological barrier
“IVRT”	<i>in vitro</i> release test, an <i>in vitro</i> release testing parameter which determines release of drug from the topical dosage form
“JAK”	Janus kinase, a family of intracellular, non-receptor tyrosine kinases that transduce cytokine-mediated signals via the JAK-STAT pathway
“JAK inhibitor”	small molecules targeting Janus kinase (JAK) enzymes (JAK1/2/3, TYK2) to block cytokine signaling via the JAK-STAT pathway
“JAK-STAT signaling pathway”	a cytokine-stimulated signal transduction pathway that is involved in numerous critical biological processes, including cell proliferation, differentiation, apoptosis and immune regulation. It can regulate the final expression of genes, cell proliferation, differentiation and immune response
“Membranous Nephropathy”	a pathological and morphological diagnostic term characterized by the deposition of immune complexes in the lateral aspect of the glomerular basement membrane and subepithelial region, accompanied by diffuse thickening of the glomerular basement membrane and changes in the permeability of the glomerular filtration membrane

GLOSSARY OF TECHNICAL TERMS

“MRGPRX2”	mas-related G-protein coupled receptor member X2, a promiscuous receptor on mast cells that mediates IgE-independent degranulation in response to many structurally diverse compounds and has been implicated in multiple mast cell-mediated disorders, including chronic urticaria and atopic dermatitis
“NDA”	new drug application
“NRDL”	the National Reimbursement Drug List, a list that names all the drugs covered by the medical insurance program in full or partially in China
“NSV”	non-segmental vitiligo, a depigmented skin disorder showing progressive and depigmented lesions of the skin, mucosa, and hair
“Olmsted syndrome” or “OS”	a rare hereditary keratinization disorder primarily caused by autosomal dominant mutations in the TRPV3 gene, clinically characterized primarily by severe palmoplantar keratoderma and hyperkeratotic plaques around body orifices, including the perioral, periocular and perigenital regions
“PAR”	perennial allergic rhinitis
“Phase I clinical trial”	study in which a drug is introduced into healthy human subjects or patients with the target disease or condition and tested for safety, dosage tolerance, absorption, metabolism, distribution, excretion, and if possible, to gain an early indication of its effectiveness
“Phase II clinical trial”	study in which a drug is administered to a limited patient population to identify possible adverse effects and safety risks, to preliminarily evaluate the efficacy of the product for specific targeted diseases, and to determine dosage tolerance and optimal dosage
“Phase III clinical trial”	study in which a drug is administered to an expanded patient population generally at geographically dispersed clinical trial sites, in well-controlled clinical trials to generate enough data to statistically evaluate the efficacy and safety of the product for approval, to provide adequate information for the labeling of the product

GLOSSARY OF TECHNICAL TERMS

“PK”	pharmacokinetics, the study of the absorption, distribution, metabolism and excretion of drugs in the body, which, together with pharmacodynamics, influences dosing, benefit and adverse effects of the drug
“placebo”	any dummy medical treatment; originally, a medicinal preparation having no specific pharmacological activity against the patient’s illness or complaint given solely for the psychophysiological effects of the treatment; more recently, a dummy treatment administered to the control group in a controlled clinical trial in order that the specific and non-specific effects of the experimental treatment can be distinguished
“PN”	prurigo nodularis, a chronic inflammatory skin disease characterized by severe pruritus, nodules, papules, excoriations and ulceration
“pruritus”	the symptom of itchiness in the skin, which is one of the most common clinical symptoms associated with dermatological conditions such as atopic dermatitis, psoriasis, xerosis, prurigo nodularis, contact dermatitis, urticaria, and eczema
“QD”	<i>quaque die</i> , which means once a day
“ROCK”	Rho-associated coiled-coil containing protein kinase, a crucial enzyme family that acts as a major downstream target of the RhoA protein, regulating the cell’s actin cytoskeleton to control cell shape, movement, division, and survival, playing vital roles in processes like cancer, fibrosis, and neurological pain, and making it a significant therapeutic target
“rTNSS”	reflective total nasal symptom score, a rating of the severity of nasal symptoms over certain period of time
“rTOSS”	reflective total ocular symptom score, a rating of the severity of ocular symptoms over certain period of time

GLOSSARY OF TECHNICAL TERMS

“SAE”	serious adverse event, any medical occurrence in human drug trials that at any dose: results in death; is lifethreatening; requires inpatient hospitalization or causes prolongation of existing hospitalization; results in persistent or significant disability/incapacity; may have caused a congenital anomaly/birth defect, or requires intervention to prevent permanent impairment or damage
“SAR”	seasonal allergic rhinitis
“SERPINE1”	Serpin Family E Member 1
“SMO”	site management organization, an organization that has adequate infrastructure and staff to meet the requirements of the clinical trial protocol and provides clinical trial related services to a CRO, a pharmaceutical company, a biotechnology company, or a clinical site
“TEAE”	treatment-emergent adverse event, any adverse event that occurs or worsens in severity after a patient begins receiving a treatment or intervention in a clinical trial
“Th2 cells”	T helper 2 cells, an important subset of helper T cells, involved in humoral immunity and allergic reactions. It plays a core role in amplifying and maintaining inflammatory responses marked by eosinophil recruitment and mast cell activation
“Tmax”	time to achieve maximum drug concentration, the time it takes for a drug to reach the maximum concentration (Cmax) after administration of a drug that needs to be absorbed
“TRPV3”	transient receptor potential vanilloid 3, a temperature-sensitive transient receptor potential ion channel that functions as a Ca ²⁺ -permeable non-selective cation channel, activated by warm temperatures and various compounds, and is expressed in both neuronal and non-neuronal tissues

FORWARD-LOOKING STATEMENTS

This document contains certain forward-looking statements and information relating to us that are based on the beliefs of our management as well as assumptions made by and information currently available to our management. When used in this document, the words “aim”, “anticipate”, “believe”, “could”, “expect”, “going forward”, “intend”, “may”, “might”, “ought to”, “plan”, “potential”, “predict”, “project”, “seek”, “should”, “will”, “would” and the negative of these words and other similar expressions, as they relate to us or our management, are intended to identify forward-looking statements. Such statements reflect the current views of our management with respect to future events, operations, liquidity and capital resources, some of which may not materialize or may change. These statements are subject to certain risks, uncertainties and assumptions, including the other risk factors as described in this document. You are strongly cautioned that reliance on any forward-looking statements involves known and unknown risks and uncertainties. The risks and uncertainties facing our Company which could affect the accuracy of forward-looking statements include, but are not limited to, the following:

- our operations and business prospects;
- our financial condition and performance;
- our capital expenditure plan;
- future developments, trends and conditions in the industry and markets in which we operate;
- our business strategies and plans to achieve these strategies;
- general economic, political and business conditions in the markets in which we operate;
- changes to the regulatory environment and general outlook in the industry and markets in which we operate;
- the effects of the global financial markets and economic crisis;
- the ability of third parties to perform in accordance with contractual terms and specifications;
- our ability to control or reduce costs;
- our dividend policy;
- capital market developments;
- the actions and developments of our competitors;

FORWARD-LOOKING STATEMENTS

- certain statements in “Business” and “Financial Information” with respect to trends in prices, operations, margins, overall market trends, and risk management; and
- change or volatility in interest rates, foreign exchange rates, equity prices, trading volumes, operations, margins, risk management and overall market trends.

Subject to the requirements of applicable laws, rules and regulations, we do not have any and undertake no obligation to update or otherwise revise the forward-looking statements in this document, whether as a result of new information, future events or otherwise. As a result of these and other risks, uncertainties and assumptions, the forward-looking events and circumstances discussed in this document might not occur in the way we expect or at all. Accordingly, you should not place undue reliance on any forward-looking information.

In this document, statements of or references to our intentions or those of the Directors are made as of the date of this document. Any such information may change in light of future developments.

All forward-looking statements contained in this document are qualified by reference to the cautionary statements set out in this section.

RISK FACTORS

You should carefully consider, in addition to other information contained in this document, the risks and uncertainties below before [REDACTED] in our H Shares. Any of the risks and uncertainties listed below could have a material adverse effect on our business, results of operations, financial condition, or on the [REDACTED] of our H Shares and could cause you to lose all or part of your [REDACTED]. Additional risks and uncertainties not presently known to us or that we currently deem immaterial could also harm our business, results of operations, financial condition, or on the [REDACTED] of our H Shares. Past performance is no guarantee of future results.

Our operations are subject to a number of risks. Many of these risks are beyond our control and can be categorized into: (i) risks relating to our business and industry; (ii) risks relating to our financial position and need for additional capital; (iii) other risks relating to our operations; (iv) risks relating to conducting business in the jurisdiction where we operate; and (v) risks relating to the [REDACTED].

RISKS RELATING TO OUR BUSINESS AND INDUSTRY

Risks Relating to the Development of Our Drug Candidates and Regulatory Approval

The regulatory approval process of the NMPA and other comparable regulatory authorities for our product candidates is lengthy and the result is unpredictable. We may not achieve favorable results for our drug candidates in clinical trials, and cannot give any assurance that any of our drug candidates currently in development will receive regulatory approval. Any failure to timely obtain these regulatory approvals could adversely affect our business prospects and profitability.

We are subject to risks associated with obtaining regulatory approvals. New pharmaceutical products must be approved by the NMPA or other comparable regulatory authorities before they can be marketed and sold. The time required to obtain approvals from the relevant regulatory authorities in different jurisdictions is unpredictable, typically taking years following the commencement of pre-clinical studies and clinical trials, and depends on numerous factors, including the substantial discretion of the regulatory authorities. Significant time, efforts and financial resources are required to bring our product candidates to market in compliance with the regulatory processes, and we cannot assure you that we will be able to meet all regulatory requirements or that our product candidates will be eventually approved for sale. Even if we do obtain regulatory approvals, the process may take longer than expected, or such approvals may be subject to limitations on the indicated uses for which we intend to market the relevant product, therefore restricting its market size and adversely affecting our business, results of operations and growth prospects.

RISK FACTORS

We may fail to receive regulatory approvals from the NMPA or other comparable regulatory authorities for our product candidates due to a number of reasons, including:

- disagreement in the design or implementation of our clinical trials;
- failure to begin or complete clinical trials due to disagreements with regulatory authorities;
- failure to demonstrate that a product candidate is safe and effective for its proposed indication;
- insufficient or suboptimal data collected from the clinical trials, or failure of our clinical trial results to meet the level of statistical and medical significance required for approvals;
- failure of our clinical trial process to pass the GCP inspections;
- unexpected changes in regulations, testing requirements, or approval policies that render our pre-clinical and clinical data insufficient for approvals;
- failure of our drug candidates to pass GMP inspections during the regulatory review process or across the production cycle of our drugs;
- failure of our clinical sites to pass audits carried out by the NMPA or other comparable regulatory authorities, resulting in a potential invalidation of our research data; and
- clinical sites, investigators or other participants in our clinical trials deviating from a trial protocol, failing to conduct the trial in accordance with regulatory requirements, or dropping out of a trial.

In addition, the NMPA or other comparable regulatory authorities may require more information to support approval, including additional pre-clinical or clinical data, which may result in delay in or denial of regulatory approval. Furthermore, clinical trials conducted in one jurisdiction may not be accepted by regulatory authorities in other jurisdictions, and regulatory approval in one jurisdiction does not mean that regulatory approval will be obtained in any other jurisdiction. Approval procedures vary among jurisdictions and can involve additional product testing and validation and additional administrative review periods. We cannot assure you that we will be able to meet regulatory requirements of different jurisdictions or that our product candidates will be approved for sale in those jurisdictions. Additional time, efforts and expenses may be required to bring our product candidates, upon regulatory approval, to the international markets in compliance with different regulatory processes.

RISK FACTORS

Failure to obtain regulatory approvals in a timely manner, or at all, or failure to obtain regulatory approvals with an intended scope of indications, could have a negative impact on the commercial prospects of our product candidates, and may cause reputational damage to us. Consequently, we would not be able to realize any revenue on such product candidate despite the significant amount of resources we would have spent on its development, and we may need to incur additional expenses, which could materially and adversely affect our business, financial condition, results of operations and prospects.

Furthermore, even if we were to obtain regulatory approval of any clinical stage drug candidates, regulatory authorities may revoke approval, approve our drug candidates for fewer or more limited indications than we request, may grant approval contingent on the performance of post-marketing clinical trials, or may approve a drug candidate with a label narrower than what we desire. The NMPA and other comparable regulatory authorities have discretion in the approval process and may refuse to accept any application or may decide that our data are insufficient for approval and require additional pre-clinical, clinical or other studies. Any of the foregoing scenarios could materially harm the commercial prospects for our drug candidates.

We cannot assure you that any of our drug candidates will successfully progress through the drug development process or become a commercially viable drug and any such failure could have a material adverse effect on our business, prospects, financial condition and results of operations.

The development process of innovative pharmaceutical products is typically lengthy, costly, and with uncertain outcome, and we may be unable to achieve the clinical development results of our drug candidates as we expect, or at all.

Clinical trials are expensive, difficult to design and implement, and can take years to complete, with uncertainty as to the outcomes. We may experience numerous unexpected events during, or as a result of, clinical trials that could delay or prevent our ability to receive regulatory approval or commercialize our drug candidates, including but not limited to:

- regulators may require that we or our investigators suspend or terminate clinical research for various reasons such as non-compliance with regulatory requirements;
- clinical trials of our drug candidates may produce negative or inconclusive results, and we may decide, or regulators may require us, to conduct additional clinical trials or abandon drug development programs;
- our drug candidates may lack meaningful clinical responses, which may expose the participants to unacceptable health and safety risks;
- our drug candidates may cause adverse events, have undesirable side effects or other unexpected characteristics, causing us or our investigators to suspend or terminate the trials;

RISK FACTORS

- the number of patients required for clinical trials of our drug candidates may be larger than we anticipate;
- the patient enrollment may be insufficient or slower than we anticipate or patients may drop out or fail to return for post-treatment follow-up at a higher rate than anticipated;
- our CROs may fail to comply with regulatory requirements or meet their contractual obligations to us in a timely manner, or at all;
- the costs of clinical trials of our drug candidates may be substantially higher than anticipated; and
- the supply or quality of our drug candidates or other materials necessary to conduct clinical trials of our drug candidates may be insufficient or inadequate.

If we are required to conduct additional clinical trials or other testing of our drug candidates beyond those that we currently contemplate, or if we are unable to successfully complete clinical trials of our drug candidates or other testing, or if the results of these trials or tests are not positive or are only modestly positive or if they raise safety concerns, we may be delayed in obtaining regulatory approval for our drug candidates or not obtain regulatory approval at all, or obtain approval for proposed indications that are not as broad as intended. Even if we have completed all clinical trials and testing as required by regulatory authorities, our drugs could still, if any undesirable side effect is identified, be required to be removed from the market after approval, or become subject to additional post-marketing testing requirements and/or restrictions on how they are to be distributed or used. Any of these events could have a material adverse effect on our business performance and prospects.

The pharmaceutical industry in China is highly regulated and such regulations are subject to change, which may affect approval and commercialization of our drug candidates.

We conduct our operations in China. The pharmaceutical industry in China is subject to comprehensive government regulation and supervision, encompassing the approval, registration, manufacturing, packaging, licensing and marketing of new drugs. For details on the current regulatory framework applicable to our current and planned business in China, please see “Regulatory Overview.” In particular, to conduct clinical trials in China, we must apply for and obtain the NMPA’s approval. The Center for Drug Evaluation (“CDE”) under the NMPA reviews clinical trial applications, and may issue negative feedbacks or questions on such applications, which could result in the delay or denial of the NMPA’s approval.

RISK FACTORS

Moreover, the regulatory framework in China regarding the pharmaceutical industry has been under continuous reform. For example, in recent years, PRC regulatory authorities have been introducing new policies and measures with respect to the review, approval and regulation of pharmaceutical products, raising the standards for the review of each stage of the development of new drugs. Furthermore, rules and policies of the NMPA may be subject to amendments in the future, and additional government regulations may be enacted that could prevent, limit or delay regulatory approval of our product candidates. Any such changes or amendments may result in increased compliance costs on our business or cause delays in or prevent the successful development or commercialization of our drug candidates in China and reduce the benefits we believe are available to us from developing and manufacturing drugs in China.

We may encounter various delays in the pre-clinical programs, clinical development and regulatory approval process, which may result in delays in, or suspension of, the commercialization of our drug candidates.

We may experience delays in completing our pre-clinical or clinical trials, and numerous unforeseen events could arise during, or as a result of, future clinical trials, which could delay or prevent us from receiving regulatory approval, including:

- we may encounter difficulties in enrolling sufficient participants for our clinical trials, enrollment may be slower than we anticipate, or participants may drop out of these clinical trials or fail to return for post-treatment follow-up at a higher rate than we anticipate;
- the supply or quality of our drug candidates or other materials necessary to conduct clinical trials of our drug candidates may be insufficient or inadequate;
- our drug candidates may have undesirable side effects or unexpected characteristics, causing us or our investigators, regulators, institutional review boards (“IRBs”) or ethics committees to suspend or terminate the trials, or reports may arise from pre-clinical testing or clinical trials of other drugs or therapies that raise safety or efficacy concerns about our drug candidates;
- our third parties including collaborators may not successfully carry out their contractual duties or meet expected deadlines;
- regulators, IRBs or ethics committees may not authorize us or our investigators to commence or conduct a clinical trial at a prospective trial site;
- we may experience delays in reaching, or may fail to reach, agreement on acceptable terms with prospective trial sites, CROs, principal investigators (“PIs”) or hospitals who conduct clinical trials on our behalf, the terms of which can be subject to extensive negotiation and may vary significantly among different CROs, trial sites, PIs and hospitals;

RISK FACTORS

- clinical trials may produce negative or inconclusive results, and we may decide, or regulators may require us, to conduct additional clinical trials or we may decide to abandon drug development programs;
- third-party contractors used in our clinical trials may fail to comply with regulatory requirements or meet their contractual obligations in a timely manner, or at all, or may deviate from the clinical trial protocol or drop out of the trial, which may require that we add new clinical trial sites or investigators;
- the ability to conduct a companion diagnostic test to identify subjects who are likely to benefit from our drug candidates;
- we may elect to, or regulators, IRBs or ethics committees may require that we suspend or terminate clinical research for various reasons, including non-compliance with regulatory requirements or a finding that participants are being exposed to unacceptable health risks; and
- the cost of clinical trials of our drug candidates may be greater than we anticipate.

Our drug development costs will also increase if we experience delays in testing or regulatory approvals, and we may run out of funding before a trial is complete, which could result in us having to delay or suspend the trial until sufficient funding is procured, or we would have to abandon developing the drug candidate completely. In addition, if we are required to delay clinical trials for an extended period of time, technological advances may develop and new products may be launched, which may in turn render our products non-competitive. We do not know whether any of our clinical trials will begin as planned, will need to be restructured or will be completed on schedule, or at all. Significant pre-clinical study or clinical trial delays also could shorten any periods during which we have the exclusive right to commercialize our drug candidates or allow our competitors to bring products to market before we do and impair our ability to successfully commercialize our drug candidates. If we fail to achieve product development milestones as disclosed in this document, our business prospects might be adversely affected. Any of the above negative developments could have a material adverse effect on our business, financial condition and results of operations.

Results of earlier studies and clinical trials may not be predictive of results of later-stage clinical trials.

The results of pre-clinical studies and early clinical trials may not be predictive of the success of later phase clinical trials, and favorable initial or interim results of a clinical trial do not necessarily predict successful final results. Our drug candidates in later stages of clinical trials may fail to show the desired safety and efficacy traits despite having progressed through pre-clinical studies and initial clinical trials.

RISK FACTORS

In some instances, there can be significant variability in safety and/or efficacy results among different trials of the same drug candidate due to numerous factors, including, but not limited to, changes in trial procedures set forth in protocols, differences in the size and demographics of the patient populations, including genetic differences, patient adherence to the dosing regimen, other trial protocol elements and the rate of dropout among clinical trial participants. As drug candidates are developed through pre-clinical and clinical trials towards approval and commercialization, it is customary that various aspects of the development programs, such as manufacturing and formulation, are altered along the way in an effort to optimize processes and results. Differences in the number of clinical trial sites and countries involved may also lead to variability between earlier and later-phase clinical trials. Such changes carry the inherent risks that they may not necessarily achieve the intended objectives. In addition, our future clinical trial results may differ from earlier trials and may not be favorable. Even if our future clinical trial results show favorable efficacy, not all patients may benefit. Therefore, the results of planned clinical trials or other future clinical trials could be significantly different, which could result in delays in the completion of clinical trials, regulatory approvals and commencement of commercialization of our drug candidates. If so, we would have expended a significant amount of capital to progress the relevant drug candidates to that stage, and would not realize any revenue on such drug candidate if it then ultimately failed to receive regulatory approval due to poor clinical trial results. Such an uncompensated expenditure could materially and adversely affect our business, financial condition, results of operations and prospects.

A number of companies in the pharmaceutical industry have experienced significant delays, setbacks and failures in all stages of development, including late-stage clinical trials, even after achieving promising results in pre-clinical testing or early-stage clinical trials. Accordingly, results from completed pre-clinical studies and early-stage clinical trials of our drug candidates may not be indicative of the results that we may obtain in later stage trials, where such drugs may fail to show the desired safety and efficacy traits despite having progressed through pre-clinical studies and initial clinical trials with favorable outcomes. Such variability in safety and/or efficacy results may be caused by numerous factors, including changes in trial procedures set forth in protocols, differences in the size and type of the patient populations, including genetic differences, patient adherence to the dosing regimen and other trial protocols and the rate of dropout among clinical trial participants. Results may also differ from earlier trials due to the larger number of clinical trial sites and potentially different countries and populations involved in such trials.

Furthermore, even if the data collected from pre-clinical studies and clinical trials involving one of our drug candidates demonstrate a satisfactory safety and efficacy profile, such results may not be sufficient to support a conclusion of receiving regulatory approval from the NMPA or other comparable regulatory authorities required to market and distribute the drug.

RISK FACTORS

If we are required to conduct additional clinical trials or other testing of our drug candidates beyond those that are currently contemplated, if we are unable to successfully complete clinical trials of our drug candidates or other testing, if the results of these trials or tests are not positive or are only modestly positive or if there are safety concerns, we may:

- be delayed in obtaining regulatory approval for our drug candidates, if at all;
- ultimately obtain approval for indications or patient populations that are not as broad as intended or desired;
- be subject to post-marketing testing requirements;
- encounter difficulties in obtaining, or be unable to obtain, reimbursement for use of certain drugs;
- be subject to restrictions on the distribution and/or commercialization of drugs; and/or
- have the drug removed from the market after obtaining regulatory approval.

Any of the above developments could result in a material adverse effect on our business, financial condition and results of operations.

Our drug candidates may cause undesirable adverse events.

Undesirable adverse events caused by our drug candidates could cause us or regulatory authorities to interrupt, delay or halt clinical trials and could result in a more restrictive label or the delay or denial of regulatory approval by the NMPA and other comparable regulatory authorities. Results of our clinical trials could reveal a high and unacceptable severity or prevalence of adverse events. In such an event, our clinical trials could be suspended or terminated and the NMPA and other comparable regulatory authorities could order us to cease further development of, or deny approval of, our drug candidates for any or all targeted indications. Drug-related adverse events could affect patient recruitment or the ability of enrolled subjects to complete the trial, and could result in potential product liability claims. Any of these occurrences may harm our reputation, business, financial condition, results of operations and prospects significantly.

In addition, if one or more of our drug candidates receive regulatory approval, and we or others later identify undesirable side effects caused by such drugs, it could result in a number of potentially significant negative consequences, including but not limited to, the following situations whereby:

- we may be forced to suspend marketing of the drug;
- regulatory authorities may withdraw approvals for the commercial sales of the drug;
- regulatory authorities may require additional warnings on the label;

RISK FACTORS

- we may be required to develop risk evaluation and mitigation measures for the drug or, if risk evaluation and mitigation measures are already in place, to incorporate additional requirements under the risk evaluation and mitigation measures;
- we may be required to conduct post-market studies;
- we could be required to recall our products and be sued and held liable for harm caused to subjects or patients; and
- our reputation may suffer.

If our drug candidates prove to cause severe adverse effects before or after they are approved for sale, NMPA and other comparable regulatory authorities may require that we include black box warnings or contraindications in their package inserts, which could have an adverse impact on the commercialization of the relevant drugs.

Any of these events could prevent us from achieving or maintaining market acceptance of the particular drug candidate, if approved, and could significantly harm our business, financial condition, results of operations and prospects.

We may not be able to fully realize the potential of Pumecitinib and our other drug candidates as we planned.

Our Core Product, PG-011 (Pumecitinib), is currently focused on mild-to-moderate atopic dermatitis and seasonal allergic rhinitis. As of the Latest Practicable Date, we had completed the Phase III clinical trial for Pumecitinib gel for the indication of mild to moderate atopic dermatitis in adults and adolescents aged 12 to 17 years, while Pumecitinib nasal spray was under Phase III clinical trial stage for the indication of seasonal allergic rhinitis in adults. We are also planning to conduct research on the clinical development of indications for Pumecitinib such as prurigo nodularis and non-segmental vitiligo. In addition to our Core Product, we are also developing a number of other drug candidates, including PG-033 (for the indication of pruritus), PG-018 (for the indication of autoimmune kidney diseases), PG-040 (for the indication of glaucoma), and PG-312 (for the indication of urticaria).

We cannot ensure that our drug candidates will obtain approval for marketing as we planned. Even if such drug candidates are approved for marketing in the future, there remains uncertainty regarding their commercialization prospects. Should the pharmaceutical products approved for marketing fail to gain recognition from physicians, patients and relevant parties in the medical field, our product commercialization and business operations will be adversely affected.

We may allocate our limited resources to pursue a particular drug candidate or indication and fail to capitalize on drug candidates or indications that may later prove to be more profitable or for which there is a greater likelihood of success.

As we have limited financial and managerial resources, we focus our product pipeline on research programs and drug candidates that we identify for selected indications. For the year ended December 31, 2024 and for the nine months ended September 30, 2024 and 2025, we

RISK FACTORS

incurred research and development expenses for Pumecitinib (including PG-011-AD, PG-011-AR, PG-011-NSV and PG-011-PN) of RMB88.7 million, RMB59.4 million and RMB62.2 million, respectively, representing 60.7%, 57.6% and 64.1% of our total research and development expenses for the same year/period, respectively. As a result, we may forgo or delay pursuit of opportunities with other drug candidates or for other indications that may later prove to have greater commercial potential or a greater likelihood of success. Our spending on current and future research and development programs and drug candidates for specific indications may not yield any commercially viable products. Accordingly, our resource allocation decisions may cause us to fail to capitalize on viable commercial products or profitable market opportunities. If we cannot accurately evaluate the commercial potential or target market for a particular drug candidate, we may relinquish valuable rights to that drug candidate through collaboration, licensing or other royalty arrangements in cases in which it would have been more advantageous for us to retain sole development and commercialization rights to such drug candidate, or we may allocate internal resources to a drug candidate in a therapeutic area in which it would have been more advantageous to enter into a collaboration arrangement.

If the research and development progress of our other products under development is not smooth, we may face the risk of reliance on limited number of products.

As of the Latest Practicable date, our Core Product, Pumecitinib gel, had completed phase III clinical trials for the indication of mild-to-moderate atopic dermatitis in adults and adolescents aged 12 to 17, and Pumecitinib nasal spray is undergoing Phase III clinical trials for the indication of seasonal allergic rhinitis in adults. Our other drug candidates under development may require extended periods of time before they enter into the NDA stage.

If the development and clinical trials of our other drug candidates do not develop as expected, we will rely on revenues generated from our Pumecitinib products after they are approved for sale. We cannot assure you that we will be able to generate revenue from these limited number of products at a satisfactory level, or at all. As such, our financial condition, results of operations and prospects may be materially and adversely affected.

Risks Relating to the Commercialization of Our Drug Candidates

We have no track record in launching and marketing drug candidates. If we are unable to further develop our marketing and sales capabilities or enter into agreements with third parties to market and sell our drug candidates, we may not be able to generate revenue from our drug candidates.

We have not yet demonstrated the ability to launch and commercialize any of our drug candidates. As a result, our ability to successfully commercialize our drug candidates may involve more inherent risk, take longer and cost more than it would if we were a company with experience launching and marketing drug candidates.

RISK FACTORS

We compete with other pharmaceutical and biotechnology companies to recruit, hire, train, and retain marketing and sales personnel. If we are unable to, or decide not to, further develop internal sales, marketing, and commercial distribution capabilities for any or all of our drug candidates, we will likely pursue collaborative arrangements regarding the sales and marketing of our drug candidates. However, there can be no assurance that we will be able to establish or maintain such collaborative arrangements, or if we are able to do so, that they will provide us with effective salesforces for such drug candidates. Any revenue we receive will depend upon the efforts of such third parties. We would have little or no control over the marketing and sales efforts of such third parties, and our revenue from product sales may be lower than if we had commercialized our drug candidates ourselves. We also face competition in our search for third parties to assist us with the sales and marketing efforts for our drug candidates.

There can be no assurance that we will be able to further develop and successfully maintain in-house sales and commercial distribution capabilities or establish or maintain relationships with third-party collaboration partners to successfully commercialize any product, and as a result, we may not be able to generate product sales revenue, etc., which would materially adversely affect our business, financial condition, results of operations and prospects.

If our competitors develop therapies that are similar, more advanced, or more effective than ours, or launch innovative products and therapies ahead of us, our financial condition and results of operations and our ability to successfully commercialize our drug candidates could be materially and adversely affected.

The pharmaceutical industry is characterized by rapid technological change, and the development and commercialization of innovative drugs is highly competitive. We face competition from other pharmaceutical companies worldwide. There may be other pharmaceutical and biopharmaceutical companies that are pursuing the development of drugs for the treatment of the same indications for which we are developing our drug candidates. Our competitors may have significantly greater financial, development, manufacturing, marketing, sales and supply resources or experience than we do. Our commercial opportunity and success will be reduced or eliminated, if any competing products become available that are more effective or cost-efficient than ours.

In particular, we face intense competition from existing products and product candidates under development for the treatment of atopic dermatitis, allergic rhinitis, and other diseases or symptoms that our drug candidates are intended for. For example, as of the Latest Practicable Date, there were four innovative topical drugs approved in China for the treatment of atopic dermatitis, and there are more than ten companies in China that are developing innovative topical drugs for atopic dermatitis; as of the same date, there were approximately 23 drug candidates under development in China for the indication of allergic rhinitis. As there are a number of other drug candidates currently in clinical trials in China and globally targeting

RISK FACTORS

the same or similar indications as our drug candidates, our development and commercialization of JAK inhibitor drugs may be adversely affected by some or all of such product candidates that receive regulatory approvals prior to or after we do.

If we cannot maintain or develop clinical collaborations and relationships with our principal investigators, key opinion leaders, physicians and experts, our results of operations and prospects could be adversely affected.

Our relationships with PIs, key opinion leaders (“KOLs”), physicians and experts play an important role in our research and development and marketing activities. We have established extensive interaction channels with PIs, KOLs, physicians and experts to gain first-hand knowledge of unmet clinical needs and clinical practice trends, which is critical to our ability to develop new market-responsive drugs. However, we cannot assure you that we will be able to maintain or strengthen our clinical collaborations and relationships with our PIs, KOLs, physicians and experts, or that our efforts to maintain or strengthen such relationships will yield the successful development and marketing of new products. These industry participants may leave their roles, change their business or practice focus, choose to no longer cooperate with us or cooperate with our competitors instead. Even if they continue to cooperate with us, their market insights and perceptions, which we take into account in our research and development process, may be inaccurate and lead us to develop products that do not have significant market potential. Moreover, we cannot assure you that our academic promotion and marketing strategy will continue to serve as an effective marketing strategy. Industry participants may no longer want to collaborate with us or attend our conferences, and our marketing strategy may no longer be able to yield results that are commensurate to our efforts spent. If we are unable to develop new drugs or generate returns from our relationships with industry participants as anticipated, or at all, our business, financial condition and results of operations may be materially and adversely affected.

We operate in a highly competitive environment, and we may not be able to compete effectively against current and future competitors, which could adversely affect our revenue and profitability.

We operate in a highly competitive environment. Failure to compete effectively could result in decrease in sales, lower prices and loss of market share, any of which could have a material adverse effect on our financial condition, results of operations and prospects. Our products are expected to compete primarily in terms of efficacy, safety, price and general market acceptance. Our competitors include large domestic and international pharmaceutical companies, as well as smaller emerging pharmaceutical and biotechnology companies. There are a number of potential competitors that currently market and sell drugs or are pursuing the development of drugs for the treatment of the same indications as our product candidates. In particular, we may face intense competition in the development of innovative drugs. Some of these competitors have better resources and expertise than us. The competitive landscape of our target market is constantly evolving with the introduction of next-generation treatments and advanced technologies, which could provide more effective or convenient treatment options. In light of the intense competition, we may not be able to compete effectively and obtain

RISK FACTORS

substantial market share even if we successfully complete the development and commercialization of our product candidates. We anticipate that we will face increasing competition as new drugs enter the market and advanced technologies become available.

Our commercial opportunity could be significantly reduced or even eliminated if our competitors develop and commercialize drugs that are safer, more effective, more convenient, or less expensive than the drugs we may develop or commercialize. Our competitors also may obtain approval from the NMPA or other comparable regulatory authorities for their drugs more rapidly than we may obtain approval for ours, which could result in our competitors establishing a strong market position before we are able to enter the market. They may render our product candidates obsolete or non-competitive before we can recover expenses of developing and commercializing any of our product candidates.

Our products may also face increased competition from substitute products. To the extent that our competitors’ substitute products are, or are perceived to be, more clinically or cost effective than ours, or otherwise gain wider market acceptance than any of our pharmaceutical products, this could adversely affect our sales volumes and pricing levels for the relevant products. If pharmaceutical products manufactured overseas are perceived more favorably than products manufactured domestically in the PRC, it could erode our market share and have a material adverse impact on our results of operations and prospects.

Successful sales and marketing are crucial for us to enhance our competitiveness, including our ability to increase the market penetration of our existing products, expand our coverage of hospitals and other medical institutions and promote new products. If we are unable to increase or maintain the effectiveness and efficiency of our sales and marketing activities, our sales volume and business prospects could be adversely affected.

In addition, there may also be significant consolidation in the pharmaceutical industry among our competitors, or alliances developed among competitors that may rapidly acquire significant market share. Smaller and other early-stage companies may also prove to be significant competitors, particularly through collaborative or licensing arrangements with large and established companies. If we fail to effectively compete with our competitors or adjust to structural changes in the pharmaceutical industry, our revenue and profitability may be materially and adversely affected.

Negative results from off-label use of our future approved products and counterfeit pharmaceutical products could materially harm our business reputation, product brand image and financial condition and expose us to liability.

If we successfully commercialize any of our candidates, such approved products distributed or sold in the pharmaceutical market may be subject to off-label drug use. Off-label drug use is prescribing a product for an indication, dosage or in a formulation that is not in accordance with regulatory approved usage and labeling. Even though the NMPA and other comparable regulatory authorities actively enforce the laws and regulations prohibiting the promotion of off-label use, there remains the risk that our drug candidate, upon regulatory

RISK FACTORS

approval, may be subject to off-label use and is prescribed in a patient population, dosage or formulation that has not been approved by competent authorities. This occurrence may render our drug candidate less effective or entirely ineffective and/or may cause unexpected adverse drug reactions. Any of these occurrences could create negative publicity and significantly harm our reputation, brand image, business operations, financial condition, results of operations and prospects. These occurrences may also expose us to liability and cause a delay in the progress of our clinical trials and may also ultimately result in delay in or failure to obtain regulatory approval for our drug candidates.

In addition, certain drug products distributed or sold may be manufactured without proper licenses or approvals or be fraudulently mislabeled with respect to their contents or manufacturers. These products are generally referred to as counterfeit pharmaceutical products. As counterfeit pharmaceutical products in many cases resemble the authentic pharmaceutical products yet are generally sold at lower prices, any counterfeiting of our future approved drug could reduce their market demand if not timely prevented by relevant government authorities. In addition, counterfeit pharmaceutical products are unlikely to meet our or our rigorous manufacturing and testing standards, and may even cause health damage to patients. Our reputation, business operations, financial condition, results of operations and document could suffer as a result of counterfeit pharmaceutical products.

If our products are not included in or are removed from national, provincial or other government sponsored medical insurance programs, our business, financial condition, results of operations and prospects could be materially and adversely affected.

The successful commercialization of our drugs after they are approved depends in part on the extent to which reimbursement for these drugs and related treatments will be available from relevant health administrative authorities, private health insurers and other organizations. The regulations that govern reimbursement for new therapeutic drugs vary substantially from country to country. In China, the *National Reimbursement Drug List* (“NRDL”) and *Provincial Reimbursement Drug Lists* (“PRDL”) include drugs under the *National Medical Insurance Catalogue*, which affect the amounts reimbursable to program participants for those drugs. There can be no assurance that Pumecitinib or any of our drug products will be included in the NRDL or the PRDL after approval for commercial sale. Compared to generic and essential drugs, innovative drugs, such as our drug products, may be subject to limitations on their inclusion in the NRDL or the PRDL due to cost constraints. If we were to successfully launch commercial sales of our products but fail in our efforts to have our products included in the NRDL or the PRDL, our revenue from commercial sales would be highly dependent on patient self-payment, which can make our products less competitive.

RISK FACTORS

Government authorities and third-party payers, such as private health insurers and healthcare organizations, decide which medications they will pay for and stipulate reimbursement levels. With the trend of cost containment in the global healthcare industry, government authorities and third-party payers have attempted to control costs by limiting coverage and the amount of reimbursement for particular medications. There are an increasing number of third-party payers requiring companies to provide them with predetermined discounts from list prices and challenging the prices charged for medical products. There can be no assurance as to whether or to what extent reimbursement will be available for Pumecitinib or any drug we commercialize in the future. Reimbursement may impact the demand for, or the price of, any drug for which we obtain regulatory approvals. Obtaining reimbursement for our drugs may be particularly difficult because of the higher prices often associated with drugs administered under the supervision of a doctor. If reimbursement is not available or is available only to limited levels, we may not be able to successfully commercialize Pumecitinib or any drug candidate that we have developed.

There may be significant delays in obtaining reimbursement for approved drug candidates, and coverage may be more limited than the indications and purposes for which the drug candidates are approved by the NMPA or other comparable regulatory authorities. Moreover, eligibility for reimbursement does not imply that any drug will be paid for in all cases or at a rate that covers our costs, including research, development, manufacture, sale and distribution. Interim payments for new drugs, if applicable, may also not be sufficient to cover our costs and may be subject to change. Payment rates may vary according to the use of the drug and the clinical setting in which it is used, may be based on payments allowed for drugs with lower cost that have been covered in reimbursement policies, and may be incorporated into existing payments for other services. Net prices for drugs may be reduced by mandatory discounts or rebates required by governmental healthcare programs or private payers and by any future lift or relaxation of laws and regulations that presently restrict imports of drugs from countries where they may be sold at lower prices than in the jurisdictions in which we operate or have a presence. Our inability to promptly obtain coverage and profitable payment rates from both government-funded and private payers for any future approved drug candidates and any new drugs that we develop could have a material adverse effect on our business, financial condition, results of operations and prospects.

The pricing of our products may be subject to pressure from procurement practice of national or other third-party reimbursement programs, healthcare reform initiatives or unfavorable pricing regulations, which could harm our business.

In China, the pricing of prescription pharmaceutical products is subject to continuing governmental supervision. For example, centralized procurement in China has strong bargaining power over pricing of pharmaceutical products. The price of our products, after they are commercialized, may be affected by the centralized procurement process. Our products may also become subject to reimbursement practices, healthcare reform initiatives, or unfavorable price regulations after they are commercialized. Adverse pricing limitations may hinder our ability to recoup our investment in our product candidates, even if such product candidates obtain marketing approval.

RISK FACTORS

Relevant government authorities in China have implemented policies that aim to further increase the affordability of pharmaceutical products. In the future, the relevant authorities may continue to implement policies which limit the prices that hospitals, clinics, and other medical practitioners can charge for our products, which in turn would limit the prices that we can charge them and adversely affect our profitability. There may also be other reform measures on the tender process for pharmaceutical products or other policies affecting pharmaceutical prices, which may result in downward adjustments to the prices of our commercialized products, and may in turn adversely affect our revenue, and profitability. As China’s healthcare system as a whole has undergone continuous reform in recent years in respect of insurance coverage, access to medical products and services, and the role of the private sector in product development, we cannot predict if or when the relevant authorities will amend the policies regarding prices of pharmaceutical products, or if additional pharmaceutical products may become subject to price limits and/or more stringent insurance reimbursement limits. Any negative developments in respect of the above could have a material adverse effect on our business, financial condition, and results of operations.

The market opportunities for our drug candidates may be smaller than we anticipate, which could render some drug candidates ultimately unprofitable even if commercialized.

We estimate the incidence and prevalence of target patient populations for particular diseases based on various third-party sources, such as scientific literature, surveys of clinics, patient foundations or market research, as well as internally generated analyses, and we use such estimates in making decisions regarding our drug development strategy, including determining which candidates to focus our limited resources on in pre-clinical or clinical trials. These estimates may be inaccurate or based on imprecise data. The total addressable market opportunity will depend on, among other things, acceptance of the drug by the medical community and patient access, drug pricing, reimbursement and the availability of alternative treatments. The number of patients in the addressable markets may turn out to be lower than expected, patients may not be amenable to treatment with our drugs, or new patients may become increasingly difficult to identify or access.

Furthermore, new studies may change the prevailing estimate of incidence or prevalence of diseases, and the number of addressable patients for our drug candidates in any case may turn out to be lower than expected. In such cases, even if we obtain significant market share for our drug candidates, because the potential target populations are small, we may never achieve profitability without obtaining regulatory approval for additional indications. Any of the above unfavorable developments could have a material adverse effect on our business, financial condition and results of operations.

RISK FACTORS

We may not be successful in our efforts to identify, discover or license-in new drug candidates to build or maintain our product pipeline, or license-out our existing drug candidates.

We may fail to identify, discover or license-in new drug candidates for clinical development for a number of reasons. For example, with respect to identifying and discovering new drug candidates for development in-house, our research methodology may be unsuccessful in identifying potential drug candidates or those we identify may be shown to have harmful side effects or other characteristics that make them unmarketable or unlikely to receive regulatory approval. Research programs to pursue the development of our drug candidates for additional indications and to identify new drug candidates and disease targets require substantial technical, financial and human resources whether or not we ultimately are successful. We may consider licensing-in promising drug candidates to add to our pipeline in the future. Regardless of whether we develop new drug candidates in-house or license-in, our R&D efforts may initially show promise in identifying potential indications and/or drug candidates, yet fail to yield results for clinical development for a number of reasons, including:

- potential drug candidates may, after further study, be shown to have harmful adverse effects or other characteristics that indicate they are unlikely to be effective drugs; or
- it may take greater human and financial resources to identify additional therapeutic opportunities for our drug candidates or to develop suitable potential drug candidates through internal research programs than we will possess, thereby limiting our ability to diversify and expand our portfolio.

Accordingly, there can be no assurance that we will ever be able to identify additional therapeutic opportunities for our drug candidates, develop suitable potential drug candidates through internal research programs, or successfully license-in drug candidates at favorable commercial terms or at all, any of which could materially adversely affect our future growth and prospects. Even if we are able to identify, discover or license-in the drug candidates that we target, we cannot assure you that the product will be successfully commercialized. We may focus our efforts and resources on potential drug candidates or other potential programs that ultimately prove to be unsuccessful.

Furthermore, we may license-out our existing drug candidates to other drug developers, or otherwise collaborate with third parties on our existing drug candidates. We cannot assure you that when we license-out drug candidates, we will successfully be able to do so, or that any such partner will be able to successfully promote or commercialize products licensed from us, which in turn could adversely affect the benefits that we may achieve from such arrangement. If we are unable to successfully identify a licensee partner for a particular drug candidate and are not able to further develop such drug candidate in-house, we may not be able to recover our investment in that product.

RISK FACTORS

Even after we successfully license-in or license-out drug candidates, we cannot assure you that our licensors or licensees will not breach the relevant license agreements, whether inadvertently or otherwise. Alternatively, our licensors or licensees might conclude that we have materially breached our license agreements. In either case, the license agreements may be terminated, thereby stopping us from developing and commercializing the drug candidates we licensed-in or generate licensing fees and royalties from the drug candidates we licensed out.

Risks Relating to Our Intellectual Property Rights

We depend on patents, trade secrets and other forms of intellectual property protections, but these protections may not be adequate.

We rely on a combination of patent, trade secret and other intellectual property laws in China to protect our intellectual property. However, intellectual property right protections may not prove meaningful against competitive offerings or otherwise be commercially valuable and, as such, our patents may be challenged in courts and patent offices. Such challenges may result in the relevant patents being narrowed in scope, invalidated, or held unenforceable, in whole or in part, which could limit the ability of us or our licensors to stop others from using or commercializing similar or identical technology and product candidates, or limit the duration for the patent protection of the relevant technology and product candidate.

Obtaining and maintaining patents require the payment of fees such as annual fees and various other governmental fees in several stages over the lifetime of a patent, and compliance with a number of procedural, documentary, and other similar provisions during the patent application process. We may rely on our outside counsel to help us comply with these requirements. There are situations in which non-compliance can result in abandonment, loss of priority, or lapse of the patent or patent application, resulting in partial or complete loss of patent rights.

As a result of actual or threatened patent infringement claims, we could also be prevented from entering into licenses on commercially acceptable terms or at all. In addition to infringement claims against us, we may become a party to other patent litigation and other proceedings, including interference, *inter partes* review, derivation or post-grant proceedings regarding intellectual property rights with respect to our current or future products. An adverse determination in any such proceeding could reduce the scope of, or invalidate, our patent rights. This could have a material adverse effect on our business, financial condition, and results of operations. Moreover, successful patents may not issue in a form that will provide us with any meaningful protection against competitors who may be able to circumvent our patents by developing similar or alternative technologies or product candidates in a non-infringing manner.

RISK FACTORS

In addition, we cannot assure you that we will be successful in obtaining additional intellectual property or enforcing our intellectual property rights against unauthorized users. We also rely on unregistered proprietary rights, including know-how and trade secrets related to development, manufacturing, and distribution of our products and product candidates. Agreements entered into between us and our employees and other third parties prohibiting them from disclosing proprietary information or technology may not provide meaningful protection, and may not effectively prevent leakage or unauthorized disclosure of trade secrets and other proprietary information. Furthermore, third parties who are not party to our confidentiality agreements may obtain access to our trade secrets or know-how, and others may independently develop similar or equivalent trade secrets or know-how. The disclosure or use of our intellectual properties or technologies by others, including our competitors, could reduce or eliminate any competitive advantage we have developed, cause us to lose sales opportunities or otherwise harm our competitive position, which could have a material adverse effect on our business, financial condition, and results of operations.

Obtaining and maintaining our patent protection depends on compliance with various procedural, document submission, fee payment and other requirements imposed by governmental patent agencies, and our patent protection could be reduced or eliminated for non-compliance with these requirements.

Periodic maintenance fees, renewal fees, annual fees and various other governmental fees on patents and patent applications are due to be paid to the CNIPA in several stages over the lifetime of a patent. The CNIPA also requires compliance with a number of procedural, documentary, and other similar provisions during the patent application process. We may rely on our outside counsel to help us comply with these requirements. Although an inadvertent lapse can in many cases be cured by payment of a late fee or by other means in accordance with the applicable rules, there are situations in which non-compliance can result in abandonment, loss of priority or lapse of the patent or patent application, resulting in partial or complete loss of patent rights in the relevant jurisdiction. Non-compliance events that could result in abandonment or lapse of a patent or patent application include failure to respond to official actions within prescribed time limits, non-payment of fees, and failure to properly legalize and submit formal documents. In any such event, our competitors or other third parties might be able to enter the market, which would have a material adverse effect on our competitive position, business, financial condition, results of operations, and prospects.

Third parties could be able to circumvent our patents by developing similar or alternative products and technologies in a non-infringing manner, and our ability to successfully commercialize any product or technology would be materially adversely affected.

Our drug candidates face competition from other medications even if we successfully obtain relevant patent protection. Our competitors or other third parties may be able to circumvent our patents by developing similar or alternative technologies or products in a non-infringing manner. As a result, we may not be able to realize the full potential of the relevant drug candidate in an exclusive manner, which would have a material adverse effect on our future revenue and profit from that drug.

RISK FACTORS

Patent terms may not be adequate to protect our competitive position on our drug candidates in the absence of patent linkage, patent term extensions and other exclusivities. As a result, our patents and patent applications may not provide us with sufficient rights to exclude others from commercializing products similar or identical to ours. Any of the foregoing could have a material adverse effect on our competitive position, business, financial condition, results of operations and prospects.

If our patent terms expire before or soon after our drug candidates are approved, or if competitors successfully challenge our patents, our business may be materially harmed. Lack of protection under the applicable patent linkage and patent term extension laws and regulations could increase the risk of early generic competition.

Although various adjustments and extensions may be available, the life of a patent, and the protection it affords, is limited. For example, the expiration of a patent is generally 20 years for invention in China. The issued patents and pending patent applications, if issued, for our drug candidates are expected to expire on various dates. For the expiration dates of our issued patents for our drug candidates, please see “Business — Intellectual Property.”

Given the amount of time required for the development, testing and regulatory review of new drug candidates, patents protecting such drug candidates might expire before or shortly after such drug candidates are commercialized. Upon the expiration of our issued patents or patents that may issue from our pending patent applications, we will not be able to assert such patent rights against potential competitors and our business and results of operations may be adversely affected. Even if we believe that we are eligible for certain patent term extensions, there can be no assurance that the applicable authorities will agree with our assessment of whether such extensions are available, and such authorities may refuse to grant extensions to our patents, or may grant more limited extensions than we request. Moreover, the applicable time period or the scope of patent protection afforded could be less than we request. If we are unable to obtain a patent term extension or the term of any such extension is less than we request, our competitors may obtain approval of competing products following our patent expiration, and our business could be harmed.

Our patent rights relating to our drug candidates could be found invalid or unenforceable if challenged.

Despite measures we take to obtain and maintain patent and other intellectual property rights with respect to our drug candidates, our intellectual property rights could be challenged or invalidated. For example, if we were to initiate legal proceedings against a third party to enforce a patent covering one of our drug candidates, the defendant could counterclaim that our patent is invalid and/or unenforceable. Grounds for a validity challenge could be an alleged failure to meet any of several statutory requirements, for example, lack of novelty, obviousness or non-enablement. Grounds for an unenforceability assertion could be an allegation that someone connected with prosecution of the patent withheld relevant information from the CNIPA or the applicable foreign counterpart, or made a misleading statement, during prosecution. Even if we conduct our patent prosecution in accordance with the duty of candor and in good faith, there is no assurance that we may always prevail in legal assertions of invalidity and unenforceability.

RISK FACTORS

If a defendant were to prevail on a legal assertion of invalidity and/or unenforceability, we would lose at least part, and perhaps all, of the patent protection on a drug candidate. Even if a defendant does not prevail on a legal assertion of invalidity and/or unenforceability, our patent claims may be construed in a manner that would limit our ability to enforce such claims against the defendant and others. Even if we establish infringement, the court may decide not to grant an injunction against further infringing activities and instead award only monetary damages, which may not be an adequate remedy. In addition, if the breadth or strength of protection provided by our owned patents and patent applications is threatened, it could dissuade companies from collaborating with us to license, develop or commercialize current or future drug candidates. Any loss of patent protection could have a material adverse impact on one or more of our drug candidates and our business.

If we are unable to protect the confidentiality of our trade secrets and confidential information, our business and competitive position could be harmed.

In addition to our issued patents and pending patent applications, we rely on our trade secrets and confidential information, including unpatented know-how, technology and other proprietary information, to maintain our competitive position and to protect our drug candidates. We seek to protect our trade secrets and confidential information, in part, by entering into non-disclosure and confidentiality agreements with parties that have access to trade secrets or confidential information, such as our employees, corporate collaboration partners, outside scientific collaboration partners, sponsored researchers, contract manufacturers, consultants, advisors and other third parties that have access to them.

However, we may not be able to prevent the unauthorized disclosure or use of our trade secrets and confidential information by the parties to these agreements. Monitoring unauthorized uses and disclosures is difficult and we do not know whether the steps we have taken to protect our proprietary technologies will be effective. Any of the parties with whom we enter into confidentiality agreements may breach the terms of any such agreements and may disclose our proprietary information, and we may not be able to obtain adequate remedies for any such breach or violation. As a result, we could lose our trade secrets and third parties could use our trade secrets to compete with our drug candidates and technology. Additionally, we cannot guarantee that we have entered into such agreements with each party that may have or has had access to our trade secrets or proprietary technology and processes. Enforcing a claim that a party illegally disclosed or misappropriated a trade secret can be difficult, expensive and time-consuming, and the outcome is unpredictable. If any of our trade secrets were to be lawfully obtained or independently developed by a competitor or other third party, we would have no right to prevent them from using that technology or information to compete with us and our competitive position would be adversely affected.

RISK FACTORS

We may be subject to claims that our employees, consultants or advisors have wrongfully used or disclosed alleged trade secrets of their former employers, or claims asserting ownership of what we regard as our own intellectual property.

Our employees, consultants and advisors, including our senior management, may currently be, or were previously employed at other pharmaceutical companies or research institutions, including our competitors or potential competitors. Some of these employees, consultants, and advisors, including each member of our senior management, may have executed proprietary rights, non-disclosure and non-competition agreements in connection with such previous employment. We may be subject to claims that we, our employees, consultants and advisors, have used or disclosed intellectual property, including trade secrets or other proprietary information, of any such individual's current or former employer. We are not aware of any threatened or pending claims related to these matters or concerning the agreements with our senior management, but in the future litigation may be necessary to defend against such claims. If we fail in defending any such claims, in addition to paying monetary damages, we may lose valuable intellectual property rights. Even if we are successful in defending against such claims, litigation could result in substantial costs and be a distraction to our employees and management.

We may be unsuccessful in executing the agreements assigning intellectual property to us with our employees, consultants and contractors who in fact develop intellectual property that we regard as our own. Furthermore, even when we obtain agreements assigning intellectual property to us, the assignment of intellectual property rights may not be self-executing, or the assignment agreements may be breached, each of which may result in claims by or against us related to the ownership of such intellectual property to determine the ownership of what we regard as our intellectual property. Furthermore, individuals executing agreements with us may have pre-existing or competing obligations to a third party, such as an academic institution, and thus an agreement with us may be ineffective in perfecting ownership of inventions developed by that individual. If we fail in prosecuting or defending any such claims, in addition to paying monetary damages, we may lose valuable intellectual property rights. Even if we are successful in prosecuting or defending any of the foregoing claims, litigation could result in substantial costs and be a distraction to our management and scientific personnel.

In addition, we may in the future be subject to claims by former employees, consultants or other third parties asserting an ownership right in our owned or licensed patents or patent applications. An adverse determination in any such submission or proceeding may result in loss of exclusivity or freedom to operate or in patent claims being narrowed, invalidated or held unenforceable, in whole or in part, which could limit our ability to stop others from using or commercializing similar drug candidates or technology, without payment to us, or could limit the duration of the patent protection covering our drug candidates and technology. Such challenges may also result in our inability to develop, manufacture or commercialize our drug candidates without infringing third-party patent rights. Any of the foregoing could have a material adverse effect on our competitive position, business, financial condition, results of operations and prospects.

RISK FACTORS

Intellectual property and other laws and regulations are developing, which could diminish the value of our intellectual property and impair the intellectual property protection of our drug candidates.

Our success is heavily dependent on obtaining, maintaining, enforcing and defending intellectual property, particularly patents. Obtaining and enforcing patents in the biopharmaceutical industry involves technological and legal complexity and is costly, time-consuming and inherently uncertain. Developments in either the patent laws or their interpretation in different jurisdictions may increase the uncertainties and costs surrounding the prosecution of our patents, diminish our ability to protect our inventions, and, more generally, affect the value of our intellectual property or narrow the scope of our patent rights. For instance, depending on resolutions and decisions by the National People's Congress and the CNIPA's decisions, the laws and regulations governing patents could develop, which may affect our ability to obtain new patents or to enforce our existing patents and patents that we might obtain in the future. Our existing patent rights and future patent applications may face certain potential influence.

There could be similar changes in the laws of other jurisdictions that may impact the value of our patent rights or our other intellectual property rights. Under the America Invents Act, the AIA, enacted in 2011, the United States moved to first-to-file system in early 2013 from the previous system under which the first to make the claimed invention was entitled to the patent. Assuming the other requirements for patentability are met, the first to file a patent application is entitled to the patent. Publications of discoveries in the scientific literature often lag behind the actual discoveries, and patent applications in the United States and other jurisdictions are typically not published until 18 months after filing, or in some cases not at all. Therefore, we cannot be certain that we were the first to make the inventions claimed in our patents or pending patent applications, or that we were the first to file for patent protection of such inventions. Moreover, the United States has enacted and is currently implementing wide-ranging patent reform legislation. The United States Supreme Court rulings have narrowed the scope of patent protection available in certain circumstances and weakened the rights of patent owners in certain situations recently. In addition to increasing uncertainty with regard to our ability to obtain patents in the future, this combination of events has created uncertainty with respect to the value of patents once obtained, if any.

We may from time to time be involved in legal proceedings and disputes to protect or enforce our intellectual property rights, or defend against infringement and other claims alleged by third parties, which could be expensive, time-consuming and unsuccessful.

Competitors may infringe, misappropriate or otherwise violate our intellectual property rights. To counter infringement, misappropriation, or any other unauthorized use, litigation may be necessary in the future to enforce or defend our intellectual property rights, to protect our trade secrets or to determine the validity and scope of our own intellectual property rights or the proprietary rights of others. This can be expensive and time-consuming. We may not prevail in any lawsuits that we initiate, and the damages or other remedies awarded, if any, may not be commercially meaningful. Any claims that we assert against perceived infringers and

RISK FACTORS

other violators could also provoke these parties to assert counterclaims against us alleging that we have infringed, misappropriated, or otherwise violated their intellectual property rights. Many of our current and potential competitors have the ability to dedicate substantially greater resources to enforce and/or defend their intellectual property rights than we can. Accordingly, despite our efforts, we may not be able to prevent third parties from infringing upon, misappropriating, or otherwise violating our intellectual property rights. An adverse result in any litigation proceeding could put our patent, as well as any patents that may issue in the future from our pending patent applications, at the risk of being invalidated, held unenforceable, or interpreted narrowly. Furthermore, because of the substantial amount of discovery required in connection with intellectual property litigation, there is a risk that some of our trade secret or other confidential information could be compromised by disclosure during this type of litigation. Any failure by us to prevent the misappropriation or disclosure of our proprietary information could materially and adversely affect our business, financial condition, results of operations and prospects. Thus, even if we were to ultimately prevail, or to settle at an early stage, such litigation could burden us with substantial unanticipated costs.

Moreover, we may not be able to detect infringement against our patents or other intellectual property rights. Even if we detect infringement by a third party of any of our patents or other intellectual property rights, we may choose not to pursue litigation against or settlement with such third party. If we later sue such third party for infringement, the third party may have certain legal defenses available to it, which otherwise would not be available except for the delay between when the infringement was first detected and when the suit was brought. Such legal defenses may make it impossible for us to enforce our intellectual property rights against such third party.

If we are sued for infringing, misappropriating or otherwise violating intellectual property rights of third parties or engaging in unfair competition, such litigation could be costly and time-consuming and could prevent or delay us from developing or commercializing our drug candidates.

Our commercial success depends in part on our ability to avoid infringing, misappropriating, or otherwise violating intellectual property rights of third parties. However, our efforts to identify and avoid infringing on third parties' intellectual property rights may not always be successful. Defending ourselves against third parties' intellectual right infringement allegations, meritorious or not, would be expensive and time consuming, and would be a substantial diversion of our resources and our management team's attention. Furthermore, because of the substantial amount of discovery required in connection with intellectual property litigation, some of our confidential information could be compromised by disclosure during this type of litigation.

In the event that third parties assert infringement claims against us, there is no assurance that the outcome would be in our favor, as whether a drug candidate or technology infringes on third parties' intellectual property rights involves an analysis of complex legal and factual issues, the determination of which is often uncertain, and the burden of proof required to successfully challenge a third-party intellectual property right may be high. If we were found

RISK FACTORS

by courts or other competent authorities to have infringed on the patent or other intellectual property rights of third parties, we may be subject to injunctive or other court order or judgement, which could prevent us from developing and commercializing our drug candidates, or at least delay the development or commercialization process. Even if the litigation or other proceedings are resolved in our favor, our involvement in such proceedings may attract publicity, thereby having a substantial adverse effect on our reputation and brand name. If securities analysts or [REDACTED] perceive these results to be negative, it could have a substantial adverse effect on the [REDACTED] of our shares. Such litigation or proceedings could also substantially increase our operating losses and reduce the resources available for development activities or any future sales, marketing or distribution activities.

Even if we believe third-party intellectual property claims are without merit, there is no assurance that a court would find in our favor on questions of infringement, validity, enforceability, or priority. A court of competent jurisdiction could hold that third-party intellectual property claims asserted against us are valid, enforceable, and infringed, which could materially adversely affect our ability to develop and commercialize any of our drug candidates and any other drug candidates covered by the asserted third-party intellectual property claims. The burden of successfully challenging a third-party claim may be high and require us to present clear and convincing evidence as to the invalidity of any such claim, there is no assurance that a court of competent jurisdiction would invalidate any such third-party claim.

If third parties bring successful claims against us for infringement, misappropriation, or other violations of their intellectual property rights, we may be subject to injunctive or other court order or judgement, which could prevent us from developing and commercializing one or more of our drug candidates. Defense of these claims, regardless of their merit, would involve substantial litigation expense and would be a substantial diversion of employee resources from our business. In the event of a successful claim against us of infringement, misappropriation, or other violation of intellectual property, or a settlement by us of any such claims, we may have to pay substantial damages. In the event of an adverse result in any such litigation, or even in the absence of litigation, we may need to obtain licenses from third parties to advance our research or allow commercialization of our drug candidates. Any such license might not be available on reasonable terms or at all. Even if we were able to obtain a license, it could be non-exclusive, thereby giving our competitors and other third parties access to the same technologies licensed to us, and it could require us to make substantial licensing and royalty payments. In the event that we are unable to obtain such a license, we would be unable to further develop and commercialize one or more of our drug candidates, which could harm our business significantly. We may also elect to enter into license agreements in order to settle patent and other intellectual property infringement claims or to resolve disputes prior to litigation, and any such license agreements may require us to pay royalties and other fees that could significantly harm our business.

RISK FACTORS

Our brand name has not been registered as trademark in mainland China and therefore may not be adequately protected. This could adversely affect our ability to build brand recognition in our intended market, and our reputation and business could be adversely affected.

We conduct our business under the brand name of “PrimeGenX” and/or “普祺醫藥.” As of the Latest Practicable Date, neither PrimeGenX nor 普祺醫藥 had been registered as trademark in mainland China. Although we are not prohibited from using unregistered brand names when doing business, they are not protected under applicable trademark law. As a result, we may be unable to prevent others from using the same or similar brand name in their business activities, including on products similar to ours. Furthermore, the Chinese expression of 普祺 has been registered as a trademark by an Independent Third Party in China on product types similar to ours. As such, we could be prevented from using our desired brand name on our own products or in our own business activities, which could materially adversely affect our ability to build brand recognition in our intended market, and, as a result, our business and prospects. As our drug candidates mature and obtain regulatory approval in the future, we expect the importance of our brand name will further increase in order to differentiate us from our competitors. If we are unable to use our desired brand name on our products after they are approved, our business and prospects could be materially adversely affected.

Risks Relating to Our Reliance on Third Parties

We work with various third parties to develop our drug candidates, such as those who help us conduct our pre-clinical studies and clinical trials. If these third parties do not successfully carry out their contractual duties or meet expected timelines, we may not be able to obtain regulatory approval for, or commercialize, our drug candidates, and our business could be materially harmed.

As is common practice in the industry, we have worked with and plan to continue to work with third-party collaborators, such as CROs and CMOs, to generate, monitor, and manage data for our ongoing pre-clinical and clinical programs and to manufacture the drug samples used in pre-clinical studies and clinical trials. As our relationship with CROs and CMOs is contractual in nature, we may have limited control over their activities. Nevertheless, we are responsible for ensuring that each of our studies is conducted in accordance with the applicable protocol, legal and regulatory requirements, and scientific standards, and our collaboration with the CROs and CMOs does not relieve us of our regulatory responsibilities. We, our CROs and CMOs for our pre-clinical and clinical programs, and our clinical investigators are required to comply with GCPs, which are regulations and guidelines enforced by the NMPA and other comparable regulatory authorities for all of our drugs in clinical development. If we or any of our CROs, CMOs or clinical investigators fail to comply with applicable GCPs, the clinical data generated in our clinical trials may be deemed unreliable and the NMPA or comparable regulatory authorities may require us to perform additional clinical trials before approving our marketing applications. In addition, our pivotal clinical trials must be conducted with products produced under GMP regulations. Failure to comply with these regulations by us or our CMOs may require us to repeat clinical trials, which would delay the regulatory approval process.

RISK FACTORS

If our relationships with our third-party collaborators terminate, we may not be able to enter into arrangements with alternative replacements or do so on commercially reasonable terms. In addition, our third-party collaborators are not our employees, and except for remedies available to us under our agreements with such CROs and CMOs, we cannot control whether or not they devote sufficient time and resources to our ongoing clinical and non-clinical programs. If our third-party collaborators do not successfully carry out their contractual duties or obligations or meet expected deadlines, if they need to be replaced or if the quality of our drug samples or the accuracy of the clinical data they or our clinical investigators obtain is compromised due to failure to adhere to our clinical protocols, regulatory requirements, or for other reasons, our clinical trials may be extended, delayed, or terminated and we may not be able to obtain regulatory approval for or successfully commercialize our drug candidates. As a result, our results of operations and the commercial prospects for our drug candidates would be harmed, our costs could increase and our ability to generate revenues could be delayed.

Switching or sourcing new third-party collaborators involves additional cost and delays, which can materially influence our ability to meet our desired clinical development timelines. There can be no assurance that we will not encounter similar challenges or delays in the future or that these delays or challenges will not have a material adverse effect on our business. In light of the foregoing, any failure of our third-party collaborators to carry out their contractual duties or meet expected deadlines could materially adversely affect our business, financial condition, results of operations and prospects.

We may rely on third parties to manufacture our drug candidates. Our business could be harmed if those third parties fail to provide us with sufficient quantities of product or fail to do so at acceptable quality levels or prices.

We currently rely on third parties to manufacture our drug candidates for their development and clinical trials. Reliance on third-party manufacturers would expose us to additional risks, including:

- we may have little control over the manufacturing process and quality control over such third-party manufacturers;
- we may be unable to identify manufacturers on acceptable terms or at all because the number of potential manufacturers is limited and the NMPA or other comparable regulatory authorities must evaluate and/or approve any manufacturers as part of their regulatory oversight of our drug candidates. This evaluation would require new testing and GMP-compliance inspections by the NMPA or other comparable regulatory authorities;
- our third-party manufacturers might be unable to timely manufacture our drug candidates or produce the quantity and quality required to meet our clinical and commercial needs;

RISK FACTORS

- we may not own, or may have to share, the intellectual property rights to any improvements made by our third-party manufacturers in the manufacturing process for our drug candidates;
- manufacturers may not properly obtain, protect, maintain, defend or enforce our intellectual property rights or may use our intellectual property or proprietary information in a way that gives rise to actual or threatened litigation that could jeopardize or invalidate our intellectual property or proprietary information or expose us to potential liability;
- manufacturers may infringe, misappropriate or otherwise violate the patent, trade secret or other intellectual property rights of third parties;
- raw materials and components used in the manufacturing process, particularly those for which we have no other source or supplier, may not be available or may not be suitable or acceptable for use due to material or component defects; and
- our contract manufacturers and critical reagent suppliers may be subject to inclement weather, as well as natural or man-made disasters.

Each of these risks could delay or prevent the completion of our clinical trials or the approval of any of our drug candidates, result in higher costs or materially adversely impact commercialization of our future approved drug candidates. In addition, we may rely on third parties to perform certain specification tests on our drug candidates prior to delivery to patients. If these tests are not appropriately done and test data are not reliable, patients could be put at risk of serious harm and regulatory authorities could place significant restrictions on us until deficiencies are remedied.

We have a limited number of suppliers for major purchases during the Track Record Period and the loss of one or more key suppliers could disrupt our operations.

For the year ended December 31, 2024 and for the nine months ended September 30, 2025, purchases from our five largest suppliers accounted for 30.6% and 34.3% of our total purchases, respectively and purchases from our largest supplier accounted for 11.0% and 9.9% of our total purchases, respectively. See “Business — Our Suppliers” for further details. We believe that we have stable relationships with our existing suppliers. However, the stability of operations and business strategies of our suppliers are beyond our control, and we cannot assure you that we will be able to secure a stable relationship with such suppliers. If any of our major suppliers terminates its business relationship with us, we may encounter difficulty in finding a replacement that can provide alternative products and on terms acceptable to us. If this occurs, our business, financial condition, and results of operations may be adversely affected.

RISK FACTORS

RISKS RELATING TO OUR FINANCIAL POSITION AND NEED FOR ADDITIONAL CAPITAL

We incurred net losses during the Track Record Period and we may continue to incur losses in the near future and may not achieve or maintain profitability. [REDACTED] are at risk of losing substantially all of their [REDACTED] in our H Shares.

[REDACTED] in pharmaceutical drug development is highly risky. It entails substantial upfront capital expenditures and significant risk that a drug candidate will fail to gain regulatory approval or become commercially viable. We continue to incur operating loss related to our ongoing operations. We have incurred losses in each period since our inception. For the year ended December 31, 2024 and for the nine months ended September 30, 2025, we incurred net losses of RMB178.5 million and RMB125.0 million, respectively, primarily due to our substantial research and development expenses and general and administrative expenses. For the year ended December 31, 2024 and the nine months ended September 30, 2025, our research and development expenses amounted to RMB146.2 million and RMB97.1 million, respectively, and our general and administrative expenses amounted to RMB40.8 million and RMB27.9 million, respectively. Potential [REDACTED] may lose substantially all their [REDACTED] in us given the high risks involved in our business.

As of the Latest Practicable Date, none of our drug candidates had been approved for marketing and sale in any jurisdiction. We have not generated any revenue from the sale of pharmaceutical products, and we will continue to incur significant R&D and other expenses related to our on-going operations. We expect to continue to incur losses in the foreseeable future, and we expect these losses to increase as we continue and expand our development of, and seek regulatory approvals for, our drug candidates, and continue to build up our commercialization and sales force in anticipation of the potential approval of our drug candidates for commercialization. Typically, it takes many years to develop a new drug from the time it is discovered to when it is available for treating patients. The size of our future net losses will depend, in part, on the number and scope of our drug development programs and the associated costs of those programs, the cost of commercializing any approved drug candidates, our ability to generate revenue and the timing and amount of milestones and other payments we make or receive with or through arrangements with third parties. If any of our drug candidates fails in clinical trials or does not gain regulatory approval, or if approved, fails to achieve market acceptance and commercialization, we may never become profitable. Even if we achieve profitability in the future, we may not be able to sustain profitability in subsequent periods. Our failure to become and remain profitable may affect [REDACTED] perception of our potential value and could impair our ability to raise capital, maintain our research and development efforts, expand our business or continue our operations. Any decline in our value could also cause you to lose all or part of your [REDACTED].

RISK FACTORS

We had net cash outflow from operating activities throughout the Track Record Period and we will likely need substantial additional funding for our drug development and commercialization efforts, which may not be available on acceptable terms, or at all.

Our operations have consumed substantial amounts of cash since our inception. For the year ended December 31, 2024 and for the nine months ended September 30, 2025, we recorded net cash used in operating activities of RMB159.5 million and RMB79.0 million, respectively. Due to our negative operating cash flow, we have needed external financing throughout our operating history, which we have financed primarily through private placements.

Our expenses may increase significantly in connection with our ongoing activities, particularly as we advance the clinical development of our various clinical stage drug candidates, continue research and development of our pre-clinical stage drug candidates, initiate additional clinical trials of, and seek regulatory approval for, these and other future drug candidates and expand our manufacturing capability. Our future capital requirements will depend on many factors, including:

- the number and development requirements of the drug candidates we pursue;
- the scope, progress, timing, results and costs of researching and developing our drug candidates, and conducting pre-clinical and clinical trials;
- the cost, timing and outcome of regulatory review of our drug candidates;
- the cost and timing of future commercialization activities, including product manufacturing, marketing, sales and distribution, for any of our drug candidates for which we receive regulatory approval;
- any cash received from commercial sales of any drug candidates for which we receive regulatory approval;
- our ability to establish and maintain strategic partnerships, collaboration, licensing or other arrangements and the financial terms of such agreements;
- the cost, timing and outcome of preparing, filing and prosecuting patent applications, maintaining and enforcing our intellectual property rights and defending any intellectual property-related claims;
- the extent to which we acquire or license other drug candidates and technologies; and
- our headcount growth and associated costs.

RISK FACTORS

Moreover, as we obtain regulatory approval for our clinical stage drug candidates, we expect to incur significant commercialization expenses related to product manufacturing, marketing, sales and distribution. In particular, the costs required for the manufacture of any drug candidate that receives regulatory approval may be substantial as we would have to undertake substantial expansion plans for our manufacturing facilities. Our current manufacturing expansion plans will require substantial capital investments, which we intend to finance primarily through additional bank loans and cash generated from operations. However, financing may be unavailable in amounts or on terms acceptable to us. If we are unable to raise capital when needed or on acceptable terms, we could incur losses and be forced to delay, reduce or terminate our research and development programs or any future commercialization efforts, which could have a material adverse effect on our business, financial condition and results of operations. Furthermore, the sale of additional equity or equity-linked securities could result in dilution to the Shares held by our Shareholders. The incurrence of indebtedness would result in increased debt service obligations and could result in operating and financing covenants restricting our operations or our ability to pay dividends, which in turn could have a material adverse effect on our business, financial condition and results of operations.

We have historically received government grants, subsidies and other preferential policies for our R&D and other activities and enjoyed preferential tax treatment during the Track Record Period. Expiration of, or changes to, these incentives or policies or our failure to satisfy any condition for these incentives would have an adverse effect on our results of operations.

In the past, local governments in China granted certain financial incentives from time to time to us as part of their efforts to encourage research and development activities, and we recognized government grants of RMB9.9 million and RMB0.6 million for the year ended December 31, 2024 and for the nine months ended September 30, 2025, respectively. The timing, amount and criteria of government financial incentives are subject to the discretion relevant government authorities and cannot be predicted with certainty. We generally do not have the ability to influence local governments in making these decisions. Local governments may decide to reduce or eliminate incentives in the future. In addition, some of the government financial incentives are granted on a project basis and subject to the satisfaction of certain conditions, including compliance with the applicable financial incentive agreements and completion of the specific projects therein. We cannot guarantee that we will satisfy all relevant conditions, and if we fail to satisfy any such conditions, we may be deprived of the relevant incentives. We cannot assure you of the continued availability of the government incentives currently enjoyed by us. Any reduction or elimination of incentives would have an adverse effect on our results of operations.

RISK FACTORS

Our ability to generate revenue from sales of drug products and become profitable depends significantly on our success in a number of factors that affect the sales volume, pricing levels and profit margins of such drug products, such as competition or change in market environment.

Our ability to generate revenue and achieve profitability depends significantly on our success in many factors, including but not limited to:

- obtaining regulatory approvals and marketing authorizations for drug candidates for which we complete clinical studies;
- launching and commercializing Pumecitinib and other drug candidates for which we obtain regulatory approvals and marketing authorizations;
- completing research regarding, and nonclinical and clinical development of, our drug candidates;
- developing a sustainable and scalable manufacturing process for Pumecitinib and other drug candidates, including establishing and maintaining commercially viable supply relationships with third parties and establishing our own manufacturing facilities;
- addressing any competing technological and market developments;
- identifying, assessing, acquiring and/or developing new drug candidates, intellectual property and technologies;
- collaborating with business development partners and their ability to successfully promote and market our products;
- negotiating favorable terms in any collaboration, licensing, or other arrangements into which we may enter;
- maintaining, protecting, expanding and enforcing our portfolio of intellectual property rights, including patents, trademarks, trade secrets, and know-how; and
- attracting, hiring, and retaining qualified personnel.

We cannot guarantee that we will be able to obtain regulatory approvals for any of our drug candidates in a timely manner, or at all. Substantial investments may be incurred before and after we generate any revenue from product sales. Even though we have received the regulatory approval or if our drug candidates are approved for commercial sale, we expect to continue incurring significant costs associated with the manufacturing and the commercial launch of the drug products. Moreover, our expenses could increase beyond expectations if we are required by the NMPA or other applicable authorities to perform studies in addition to those that we currently anticipate.

RISK FACTORS

Considering the regulatory approval for Pumecitinib and the potential approval to market one or more of our drug candidates in the future, our revenue will depend on factors that affect the sales volume, pricing level or profitability of such approved products. Factors that could adversely affect the sales volumes, pricing levels and profitability of the products we sell include: exclusion from, or reduced coverage under, the national, provincial or other government-sponsored medical insurance programs, the impact of government pricing regulations, sales of substitute products by competitors, interruptions in the supply of raw materials, increases in the cost of raw materials, issues with product quality or side effects, intellectual property infringements, adverse changes in our sales and distribution network, and unfavorable policy, regulatory or enforcement changes. Many of these factors are outside of our control, and any factor adversely affecting the sales volumes, pricing levels and profit margins of our products could adversely affect our operations, revenue and profitability.

OTHER RISKS RELATING TO OUR OPERATIONS

Any failure to obtain, maintain, or renew various licenses and permits or to comply with applicable laws and regulations and industry standards, or any change to the applicable laws, regulations or industry standards could harm our reputation and business, results of operations and prospects.

Pursuant to relevant laws and regulations, we are required to obtain, maintain and renew various approvals, licenses, permits and certificates from relevant authorities to operate our business. Any failure to obtain or renew any approvals, licenses, permits and certificates necessary for our operations may result in enforcement actions including orders issued by the relevant regulatory authorities to take remedial actions, suspend our operations or impose fines and penalties which could materially and adversely affect our business, financial condition and results of operations. Moreover, the criteria used in reviewing applications for, or renewals of permits, licenses and certificates may change in the future, and there can be no assurance that we will be able to meet new criteria that may be imposed. If the interpretation or implementation of existing laws and regulations changes or new regulations come into effect, we may be required to obtain any additional approvals, permits, licenses or certificates and we cannot assure you that we will be able to do so. Our failure to obtain the additional approvals, permits, licenses or certificates may restrict the conduct of our business, increase our costs, and in turn, adversely affect our business, results of operations and prospects.

We are subject to stringent privacy laws, information security policies and contractual obligations related to data privacy and security, and we may be exposed to risks related to our management of the medical data of subjects enrolled in our clinical trials and other personal or sensitive information.

We routinely obtain and manage clinical trial related-data through clinical research organizations, who apply de-identification methods such as coding and replacing full names with initials before transmitting these data to us. As such, we are subject to the relevant national and international data protection and privacy laws, directives, regulations and standards that apply to the collection, use, retention, protection, disclosure, transfer and other

RISK FACTORS

processing of personal data, as well as contractual obligations. These data protection and privacy law regimes continue to evolve and may result in ever-increasing public scrutiny and escalating levels of enforcement and sanctions and increased costs of compliance. Failure to comply with any of these laws and regulations could result in enforcement action against us, including fines, imprisonment of company officers and public censure, claims for damages by customers and other affected individuals, damage to our reputation and loss of goodwill, any of which could have a material adverse effect on our business, financial condition, results of operations or prospects.

Data protection and privacy laws and regulations generally require clinical trial sponsors and operators and their personnel to protect the privacy of their enrolled subjects and prohibit unauthorized disclosure of personal information. If such institutions or personnel divulge the subjects' private or medical records without their consent, they will be held liable for damage caused thereby. The personal information of patients or subjects for our clinical trials is highly sensitive and we are subject to strict requirements under the applicable privacy protection regulations in the relevant jurisdictions. Whilst we have adopted security policies and measures to protect our proprietary data and patients' privacy, privacy leakage incidents might not be avoided due to hacking activities, human error, employee misconduct or negligence or system breakdown.

Furthermore, our clinical trials also frequently involve professionals from third-party institutions working onsite with our staff and enrolled subjects. We cannot ensure that such persons will always comply with our data privacy measures. We also cooperate with third parties including CROs/SMOs, principal investigators, hospitals and other third-party contractors and consultants for our clinical trials and operations. Any leakage or abuse of patient data by our third-party partners may be perceived by the patients as our fault, negligence or a result of our failure.

In addition, any development in such laws and regulations could affect our ability to use medical data and subject us to liability for the use of such data for previously permitted purposes. Complying with all applicable laws, regulations, standards and obligations relating to privacy and data security may cause us to incur substantial operational costs or require us to modify our data processing practices and processes. Non-compliance could result in proceedings against us by data protection authorities, governmental entities or others, including class action privacy litigation in certain jurisdictions, which would subject us to significant fines, penalties, judgments and negative publicity. Any failure or perceived failure by us to prevent information security breaches or to comply with privacy policies or privacy-related legal obligations, or any compromise of information security that results in the unauthorized release or transfer of personally identifiable information or other patient data, could have a material adverse effect on our business, financial condition and results of operations.

RISK FACTORS

Our business depends on our senior management members and other key personnel. If we fail to retain our key senior management members and other key personnel, or to attract, retain and train qualified personnel, our business prospects could be adversely affected

Our success depends heavily upon the continued services of our senior management members, key R&D personnel and key sales and marketing personnel. In particular, the industry experience, management expertise and contributions of our Directors and other members of our senior management are crucial to our success. They play a crucial role in the development and commercialization of our products and realization of the potential benefits of our intellectual property. In addition, the future success in the sale of our products depends on the dedication and skills of our sales and marketing personnel. Accordingly, our ability to attract and retain key personnel is a critical factor in our competitiveness.

Although we have employment agreement with each of our senior management members, these agreements do not prevent our executives from terminating their employment with us at any time. We do not maintain any key person insurance. If we lose the services of any key personnel, we may be unable to recruit a suitable or qualified replacement and may incur additional expense to recruit and train new personnel, which could disrupt our business and growth. In addition, if any of our key personnel joins a competitor or forms a competing business, we may lose know-how, trade secrets and customers.

Furthermore, as we expect to continue expanding our operations and product portfolio, recruiting, retaining and training qualified R&D, manufacturing and quality management, and sales and marketing personnel will be critical to our success. We will need to continue attracting and retaining personnel with extensive experience and industrial knowledge. We may also need to hire, train and manage individuals with expertise that is separate, supplemental or different from expertise that we currently have. Competition for these individuals in the pharmaceutical industry is intense and could cause us to offer higher compensation and other benefits in order to attract and retain them, thereby increasing our operating costs and in turn, materially and adversely affecting our financial condition and results of operations. If we are unable to attract, motivate, train and retain these key personnel required to achieve our business objectives, our business prospects could be adversely affected.

We may encounter difficulties in successfully managing our growth and expanding our operations.

Our future financial performance and our ability to commercialize our drug candidates will depend, in part, on our ability to effectively manage our growth. We might not be able to effectively manage the expansion of our operations, which may result in weaknesses in our infrastructure, operational inefficiencies, loss of business opportunities, loss of employees and reduced productivity among remaining employees. Our management may also have to divert a disproportionate amount of its attention away from day-to-day activities in order to devote a substantial amount of time to managing these growth activities.

RISK FACTORS

As our development and commercialization plans and strategies evolve, we must hire additional managerial, operational, manufacturing, financial and other personnel. Our recent growth and any future growth will impose significant additional responsibilities on our management, including but not limited to:

- identifying, recruiting, integrating, maintaining and motivating additional employees;
- continuing to innovate and develop advanced technologies in the highly competitive pharmaceutical industry;
- managing our relationships with third parties, including suppliers and collaboration partners;
- managing our internal development efforts effectively, including the clinical and regulatory authority review process for our drug candidates, while complying with our contractual obligations to contractors and other third parties; and
- improving our operational, financial and management controls, reporting systems and procedures.

If we are not able to effectively manage our growth and further expand our organization by hiring new employees and expanding our groups of consultants and business partners as needed, we may not be able to successfully implement the tasks necessary to further develop and commercialize our drug candidates and, accordingly, may not achieve our research, development and commercialization goals. Our failure to do so could materially and adversely affect our business, financial condition, results of operations and prospects.

We may be subject to product liability lawsuits that could cause us to incur substantial liabilities and adversely affect our business, financial condition, results of operations and reputation.

We face an inherent risk of product and professional liability as a result of the clinical testing and any future commercialization of our product candidates inside and outside China. For example, we may be sued if our product candidates cause or are perceived to cause injury or are found to be otherwise unsuitable during clinical testing, manufacturing, marketing or sale. Any such product liability claims may include allegations of defects in manufacturing, defects in design, a failure to warn of dangers inherent in the drug, negligence, strict liability or a breach of warranties. Claims could also be asserted under applicable consumer protection laws. If we cannot successfully defend ourselves against the claims, we may incur substantial liabilities or be required to limit commercialization of our product candidates. Even successful defense would require significant financial and management resources. Regardless of the merits or eventual outcome, liability claims may result in:

- decreased demand for our product candidates;
- adverse effect on our reputation;

RISK FACTORS

- withdrawal of clinical trial participants and inability to continue clinical trials;
- initiation of investigations by regulatory authorities;
- costs to defend the related litigation;
- a diversion of management’s time and our resources;
- substantial monetary awards to trial participants or patients;
- product recalls, withdrawals or labelling, marketing or promotional restrictions;
- loss of revenue;
- exhaustion of any available insurance and our capital resources;
- the inability to commercialize any approved product candidate; and
- a decline in the [REDACTED] of our H Shares.

To cover such liability claims arising from clinical studies, we purchase clinical trial insurance to cover adverse events in our clinical trials. It is possible that our liabilities could exceed our insurance coverage or that our insurance will not cover all situations in which a claim against us could be made. We may not be able to maintain insurance coverage at a reasonable cost or obtain insurance coverage that will be adequate to satisfy any liability that may arise. If we are unable to defend ourselves against such claims, among other things, we may be subject to civil liability for physical injury, death or other losses caused by our products and to criminal liability and the revocation of our business licenses if our products are found to be defective. In addition, we may be required to recall the relevant products, suspend sales or cease sales. Even if we are able to successfully defend ourselves against any such product liability claims, doing so may require significant financial resources and the time and attention of our management. Should any of these events occur, it could have a material adverse effect on our business, financial condition and results of operations.

We may be unable to detect, deter and prevent all instances of fraud or other misconduct committed by our employees or other third parties. If we or our third-party collaborators fail to comply with applicable anti-bribery laws, our reputation may be adversely affected and we could be subject to penalties and significant expenses.

We are subject to anti-bribery laws in China that generally prohibit companies and their intermediaries from making payments to government officials for the purpose of obtaining or retaining business or securing any other improper advantage. There is no assurance that policies or procedures to ensure the compliance with anti-bribery laws will prevent our agents, employees and intermediaries from engaging in bribery activities. Failure to comply with anti-bribery laws could disrupt our business and lead to severe criminal and civil penalties,

RISK FACTORS

including imprisonment, criminal and civil fines, loss of our export licenses, suspension of our ability to do business with the government, denial of government reimbursement for our products and/or exclusion from participation in government healthcare programs. Other remedial measures could include further changes or enhancements to our procedures, policies, and controls and potential personnel changes and/or disciplinary actions, any of which could have a material adverse effect on our business, financial condition, results of operations and liquidity. We could also be adversely affected by any allegation that we violated such laws.

Moreover, we may be exposed to fraud, bribery or other misconduct committed by our employees or third parties that could subject us to financial losses and sanctions imposed by governmental authorities, which may adversely affect our reputation. During the Track Record Period and up to the Latest Practicable Date, we were not aware of any instances of fraud, bribery, or other misconduct involving employees and other third parties that had any material adverse impact on our business and results of operations. However, we cannot assure you that there will not be any such instances in future. We may be unable to prevent, detect or deter all such instances of misconduct. Any such misconduct committed against our interests, which may include past acts that have gone undetected or future acts, may have a material adverse effect on our business and results of operations.

If we fail to comply with environmental, health and safety laws and regulations, we could become subject to fines or penalties or incur costs that could materially adversely affect the success of our business.

We are subject to numerous environmental, health and safety laws and regulations, including those governing laboratory procedures and the handling, use, storage, treatment and disposal of hazardous materials and wastes. Our operations may involve the use of hazardous and flammable materials, including chemicals and biological materials, and may produce hazardous waste products. We may contract with third parties for the disposal of these materials and wastes. We cannot eliminate the risk of contamination or injury from these materials. In the event of contamination or injury resulting from our use of hazardous materials, we could be held liable for any resulting damages, and any liability could exceed our resources. We also could incur significant costs associated with civil or criminal fines and penalties.

In addition, we may be required to incur substantial costs to comply with current or future environmental, health and safety laws and regulations. These current or future laws and regulations may impair our research, development or production efforts. Failure to comply with these laws and regulations also may result in substantial fines, penalties or other sanctions. Any of the foregoing could materially adversely affect our business, financial condition, results of operations and prospects.

RISK FACTORS

We are subject to comprehensive construction project approval, acceptance and filing requirements, and may be exposed to compliance costs, rectification obligations and/or potential liabilities.

Under PRC laws and regulations, construction projects are subject to a broad range of approvals, filings and acceptance procedures before commencement and before the relevant facilities are put into use. Our current research facility, which is located in one of our leased properties in Beijing, did not fully comply with the applicable approval, filing, planning or acceptance requirements during its renovation in 2019. Such historical non-compliance primarily include lack of certain permits, filings, inspections or acceptance, such as filings with local branch of the National Development and Reform Commission, construction planning permit, construction permit, and completion acceptance. Failure to make such filings, obtain such permits or complete such acceptance procedure may give rise to administrative actions by the relevant local authorities, including warnings, fines, and requirements to undertake remedial measures.

Although we believe that the above historical non-compliance incidents will not have a material adverse impact on our business, financial condition or results of operations, we cannot assure you that the competent authorities will not impose penalties, require remedial measures or impose operational restrictions on us as a result of such non-compliance. There is also no assurance that additional or more stringent approval, acceptance or safety requirements will not be imposed in the future, or that we will be able to fully comply with all such requirements in a timely manner.

In addition, construction projects that we may carry out in the future will also be subject to such regulatory filings, permits and acceptance requirements. Any delay in, failure to obtain or revocation of such filings, approvals, permits or acceptance procedures may result in the suspension or delay of the relevant projects or imposition of penalties by relevant authorities. This could adversely affect the implementation of our development plans, and result in adverse impact on our financial condition and results of operations.

Failure to comply with the labor and social insurance-related laws and regulations may adversely affect our business, financial condition, and results of operations

The PRC government has issued various labor-related regulations to further protect the rights of employees. Companies operating in China are required to complete related registration with the competent authorities and contribute to the government-sponsored employee benefits plans in amounts equal to certain percentages of salaries, including bonuses and allowances, of employees up to a maximum amount specified by the local government from time to time at locations where our employees are based. We provide social security insurance as required by relevant rules and regulations in China, including but not limited to general care and work-related injury insurance, for our employees.

RISK FACTORS

The interpretation and implementation of the Labor Contract Law, Social Insurance Law, and related regulations in China are continually changing. These changes make it difficult to predict compliance outcomes. We cannot guarantee that authorities won’t demand settlement of shortfall amounts within a deadline or impose penalties. Non-compliance could result in fines, charges, or other regulatory actions, adversely impacting our business and financial condition.

If we fail to maintain effective internal controls and risk management, we may not be able to accurately report our financial results or prevent fraud, and our reputation, business, financial condition, results of operations and prospects could be materially and adversely affected.

Our internal controls and risk management will be essential to the integrity of our business and financial results. Our public reporting obligations are expected to place a strain on our management, operational and financial resources and systems in the foreseeable future. In order to address the issues in our internal controls and risk management and to generally enhance our internal controls and compliance environment, we have taken various measures to improve our internal control procedures and risk management framework, including adopting new policies and providing training on our controls, procedures and policies to our employees. If we encounter difficulties in improving our internal controls and risk management, we may incur additional costs and management time in meeting our improvement goals. We cannot assure you that the measures taken to improve our internal controls and risk management will be effective. If we fail to maintain effective internal controls and risk management in the future, our reputation, business, financial condition, results of operations and prospects may be materially and adversely affected.

Our information technology systems, or those used by our CROs, partners or other contractors or consultants, may fail or suffer security breaches.

In the ordinary course of our business, we or our CROs collect and store sensitive data, including, among other things, legally protected patient health information, personally identifiable information about our employees, intellectual property and proprietary business information. Our information technology systems and those of our CROs, partners and other contractors and consultants are vulnerable to damage from computer viruses and unauthorized access. Such information technology systems may fail of their own accord and are subject to disruptions or damages due to various factors such as power outages, human error or abuse, new system installations, security breaches, catastrophic events such as natural disasters and other events beyond our control. Moreover, hacking and data theft techniques are continuously evolving, and our anti-virus systems and security measures may not be able to adjust to these changes in a timely manner. If our information technology systems or the information technology systems of our CROs, partners, or other contractors or consultants are compromised, degraded, damaged, or breached, or otherwise cease to function properly, we may suffer disruptions to our business operations or unintentionally allow misappropriation of proprietary or confidential information, which could materially affect our reputation and result in significant expenses and legal claims. Any of these events could materially and adversely affect our business, results of operations, and reputation.

RISK FACTORS

Our insurance coverage may not completely cover the risks related to our business and operations, which could expose us to significant costs and business interruptions.

Our operations are subject to hazards and risks associated with our research and development, as well as other aspects of our operations, which may cause significant harm to persons or damage to properties. We maintain different types of insurance policies, including social insurance for our employees and personal accident insurance. However, there is no assurance that our insurance policies will be adequate to cover all losses incurred. Losses incurred and associated liabilities may have a material adverse effect on our results of operation if such losses or liabilities are not covered by our insurance policies.

Currently, we maintain insurance coverage against liabilities arising from adverse events in clinical trials. However, our insurance coverage may not reimburse us, or may not be sufficient to reimburse us, for any expenses or losses we may suffer. We may be unable to meet our requirements for our drug candidates and drugs if there were a catastrophic event or failure of our manufacturing facilities or processes. Any of the foregoing would materially adversely affect our business, financial condition, results of operations and prospects.

We may be subject to disasters, health epidemics, acts of war, terrorism, business disruptions and other force majeure events, which may have a material adverse effect on our business, financial condition, results of operations and prospects.

Natural disasters, acts of war, terrorism or other force majeure events beyond our control may adversely affect the economy, infrastructure and livelihood of the people in the jurisdictions where we conduct our business. Our operations, and those of our collaboration partners, suppliers and other third parties, may be under the threat of natural disasters such as floods, earthquakes, sandstorms, snowstorms, fire or drought, the outbreak of a widespread health epidemic, such as swine flu, avian influenza, severe acute respiratory syndrome, or SARS, Ebola, Zika, COVID-19, force majeure events such as power, water or fuel shortages, failures, malfunction and breakdown of information management systems, unexpected maintenance or technical problems, or potential wars or terrorist attacks. The occurrence of a disaster or a prolonged outbreak of an epidemic illness or other adverse public health developments could materially disrupt our business and operations. For example, since the end of December 2019, the outbreaks of a novel strain of coronavirus COVID-19 have materially and adversely affected the global economy. Many countries and regions had been affected by the COVID-19 outbreaks. There is no assurance that such kind of health epidemic or even a more severe pandemic will not occur again in the future.

There also could occur serious natural disasters, which may result in loss of lives, injury, destruction of assets and disruption of our business and operations. Damage or extended periods of interruption to our corporate, development, research or manufacturing facilities due to fire, disaster, epidemics, power loss, communications failure, unauthorized entry or other events could cause us to cease or delay development or commercialization of some or all of our drug candidates. As we rely on third parties on various services and supplies, the occurrence of any of the foregoing events could seriously harm ability to obtain services or supplies if such

RISK FACTORS

third parties are affected by disasters, epidemics, business interruptions and other force majeure events. In addition, our insurance might not cover all losses under such circumstances and our business may be seriously harmed by such delays and interruption. Acts of war or terrorism may also injure our employees, disrupt our business network and destroy our markets. Any of the foregoing events and other events beyond our control could have an adverse effect on the overall business sentiment and environment, cause uncertainties in the regions where we conduct business, cause our business to suffer in ways that we cannot predict and materially and adversely impact our business, financial condition, results of operations and prospects.

We are subject to risks associated with leasing space.

As of the Latest Practicable Date, we leased six real properties for business operation, which are mainly used as our office and research and development facilities. We may not always be able to renew our leases upon their expiration, either on commercially acceptable terms or at all, which could compel us to relocate. Our inability to enter into new leases or renew existing leases on terms acceptable to us could cause material disruption to our business operations, thereby materially and adversely affecting our business, financial condition and results of operations.

In addition, as of the Latest Practicable Date, we had not registered one of our property leases as required by applicable PRC laws. As registration of the lease agreement will require the cooperation of the landlord, there is no assurance that we can complete the registration of such lease agreement in a timely manner or at all. Our PRC Legal Advisor advised us that the failure to register the lease agreement for our leased property in the PRC will not affect the validity of this lease agreement, but if we fail to complete the registration within the prescribed time frame as required by competent municipal land and real estate administration departments in the PRC, a penalty ranging from RMB1,000 to RMB10,000 may be imposed against us for each unregistered lease. If we are demanded to complete any such registration and fail to do so, we may be subject to fines.

Our Controlling Shareholders have significant influence over us and their interests may not always be aligned with the interest of our other Shareholders.

Prior to and immediately following the completion of the [REDACTED], our Controlling Shareholders will remain having substantial control over our Company. Subject to the Articles of Association and the PRC Company Law, the Controlling Shareholders will be able to exercise significant control and exert significant influence over our business or otherwise on matters of significance to us and other Shareholders by voting at the shareholders’ meeting and at Board meetings. The interest of the Controlling Shareholders may differ from the interests of other Shareholders and they are free to exercise their votes according to their interests. To the extent that the interests of the Controlling Shareholders conflict with the interests of other Shareholders, the interests of other Shareholders can be disadvantaged and harmed.

RISK FACTORS

RISKS RELATING TO CONDUCTING BUSINESS IN THE JURISDICTION WHERE WE OPERATE

We are subject to political, economic and social developments as well as the laws, rules, regulations and licensing requirements in China, and any disruptions in these respects may materially affect us.

Our businesses, assets and operations are located in or derived from our activities in the PRC, and as a result, our business, financial condition and results of operations are subject, to a significant degree, to the economic, political, social and regulatory environment in the PRC. We are unable to accurately predict the precise nature of all the risks and uncertainties that we face and many of these risks are beyond our control.

In recent years, the PRC government has implemented measures emphasizing the utilization of market forces in economic reform and the establishment of sound corporate governance practices in business enterprises. These economic reform measures may be adaptively adjusted from industry to industry or across different regions of the country. Changes in China’s business environment and changes in the business environment in jurisdictions we may operate in the future could have a material impact on our business, results of operations and financial condition.

Our performance will continue to be affected by the PRC economy, which in turn is influenced by the global economy. Trade wars among major economies may affect the availability and cost of various imported goods, including potentially equipment and materials which we rely on in our operations. Most notably, the United States government has made significant changes in its trade policy and has taken certain actions that may materially impact international trade, such as announcing import tariffs which have led to other countries, including China and members of the EU, imposing tariffs against the United States in response. These trade wars may escalate going forward and may result in certain types of goods, such as advanced R&D equipment and materials, becoming significantly more expensive for us to procure from overseas suppliers or even becoming illegal to export.

Any of the above factors may materially and adversely affect our business, financial condition and results of operations.

There might be uncertainties in effecting service of legal process and enforcing foreign judgments or bringing actions against us and our management.

Currently, all of our assets are located in the PRC. As a result, it may be difficult for the [REDACTED] to directly effect service of process upon us in the PRC.

On January 18, 2019, the Supreme People’s Court and the government of the Hong Kong Special Administrative Region entered into the *Arrangement on Reciprocal Recognition and Enforcement of Judgments in Civil and Commercial Matters by the Courts of the Mainland and of the Hong Kong Special Administrative Region* (關於內地與香港特別行政區法院相互認可和

RISK FACTORS

執行民商事案件判決的安排) (the “**Arrangement**”), which establishes a mechanism with further clarification on and certainty for reciprocal recognition and enforcement of judgments in a wider range of civil and commercial matters between mainland China and Hong Kong. The Arrangement has come into effect on January 29, 2024. Pursuant to the Arrangement, a judgment rendered by a Hong Kong court can generally be recognized and enforced in the PRC even if the parties in the dispute do not enter into a choice of court agreement in writing. However, we cannot guarantee that all judgments made by Hong Kong courts will be recognized and enforced in the PRC, as whether a specific judgment will be recognized and enforced is still subject to a case-by-case examination by the relevant court in accordance with the New Arrangement.

We may face risks from transferring scientific data.

In March 2018, the General Office of the State Council promulgated the *Measures for the Management of Scientific Data* (科學數據管理辦法) (the “**Scientific Data Measures**”), which provides a broad definition of scientific data and relevant rules for the management of scientific data. According to the Scientific Data Measures, enterprises in China must seek governmental approval before any scientific data involving a state secret may be transferred abroad or to foreign parties. Further, any researcher conducting research funded at least in part by the Chinese government is required to submit relevant scientific data for management by the entity to which such researcher is affiliated before such data may be published in any foreign academic journal. Given the term state secret is not clearly defined, we cannot assure you that we can always obtain relevant approvals for sending scientific data (such as the results of our pre-clinical studies or clinical trials conducted within China) abroad or to any foreign partners in China. If we are unable to obtain necessary approvals in a timely manner, or at all, our research and development of drug candidates may be hindered, which may materially and adversely affect our business, results of operations, financial condition and prospects. If the relevant government authorities consider the transmission of our scientific data to be in violation of the requirements under the Scientific Data Measures, we may be subject to fines and other administrative penalties imposed by those government authorities.

Holders of H Shares and dividends on the H Shares may be subject to PRC income taxes.

Under the current PRC tax laws and regulations, non-PRC resident individuals and non-PRC resident enterprises are subject to different tax obligations with respect to the dividends paid to them by us and the gains realized upon the sale or other disposition of H Shares.

Non-PRC resident individuals are required to pay PRC individual income tax at a 20% rate for the income derived in China under the *PRC Individual Income Tax Law* (the “**IIT Law**”) and its implementation guidelines. Accordingly, we are required to withhold such tax from dividend payments, unless applicable tax treaties between China and the jurisdiction in which the foreign individual resides reduce or provide an exemption for the relevant tax obligations. However, pursuant to the *Circular on Certain Policy Questions Concerning Individual Income Tax* (財政部、國家稅務總局關於個人所得稅若干政策問題的通知) (Cai

RISK FACTORS

Shui Zi [1994] No. 020) issued by the MOF and STA on May 13, 1994, the income gained by individual foreigners from dividends and distributions of enterprises with foreign investment is exempted from individual income tax for the time being. In addition, under the IIT Law and its implementation regulations, non-PRC resident individual holders of H shares are subject to individual income tax at a rate of 20% on gains realized upon the sale or other disposition of H shares. However, pursuant to the Circular of Declaring that Individual Income Tax Continues to be Exempted over Income of Individuals from the Transfer of Shares (關於個人轉讓股票所得繼續暫免徵收個人所得稅的通知) (Cai Shui Zi [1998] No. 61) issued by the MOF and the STA on March 30, 1998, from January 1, 1997, the income of individuals from the transfer of the shares of listed enterprises continues to be exempted from individual income tax.

As of the Latest Practicable Date, no aforesaid provisions have expressly provided that individual income tax shall be levied on non-PRC resident individual holders on the transfer of shares in PRC resident enterprises listed on overseas stock exchanges, and to our knowledge, no such individual income tax was levied by PRC tax authorities in practice. However, there is no assurance that these practices will not evolve, which could result in levying income tax on non-PRC resident individual holders on gains from the sale of H shares.

For non-PRC resident enterprises that do not have establishments or premises in China, and for those that have establishments or premises in China but whose income is not related to such establishments or premises, under the PRC Enterprise Income Tax Law and its implementation regulations, dividends paid by us and gains realized by such foreign enterprises upon the sale or other disposition of H Shares are subject to PRC enterprise income tax at a 10% rate. In accordance with the Circular on Issues Relating to Withholding of Enterprise Income Tax by PRC Resident Enterprises on Dividends Paid to Overseas Non-PRC Resident Enterprise Shareholders of H Shares (關於中國居民企業向境外H股非居民企業股東派發股息代扣代繳企業所得稅有關問題的通知) (Guo Shui Han [2008] No. 897) issued by STA on November 6, 2008, the withholding tax rate for dividends payable to non-PRC resident enterprise holders of H Shares will be 10% and we intend to withhold tax at a rate of 10% from dividends paid to non-PRC resident enterprise holders of our H Shares (including HKSCC Nominees). Non-PRC resident enterprises that are entitled to be taxed at a reduced rate under an applicable income tax treaty or arrangement will be required to apply to the PRC tax authorities for a refund of any amount withheld in excess of the applicable treaty rate, and payment of such refund will be subject to the PRC tax authorities' approval.

Despite the arrangements mentioned above, the interpretation and application of applicable PRC tax laws and regulations by the competent tax authorities shall be in accordance with the then effective laws and regulations, and new taxes may be imposed which may materially and adversely affect the value of our H Shares.

RISK FACTORS

RISKS RELATING TO THE [REDACTED]

No [REDACTED] currently exists for our H Shares, and an active [REDACTED] for our H Shares may not develop, especially taking into account that certain of our existing shareholders may be subject to a lock-up period.

No [REDACTED] currently exists for our Shares. The initial [REDACTED] for our Shares to the [REDACTED] will be the result of negotiations between our Company and the [REDACTED] (on behalf of the [REDACTED]), and the [REDACTED] may differ significantly from the [REDACTED] of the Shares following the [REDACTED]. We have applied to the Stock Exchange for the [REDACTED] of, and permission to [REDACTED] in, the Shares. A [REDACTED] on the Stock Exchange, however, does not guarantee that an active and [REDACTED] for our Shares will develop, or if it does develop, that it will be sustained following the [REDACTED], or that the [REDACTED] of the Shares will not decline following the [REDACTED].

The [REDACTED] of our H Shares may be volatile, which could lead to substantial losses to [REDACTED].

The [REDACTED] of our H Shares may be subject to significant volatility in response to various factors beyond our control, including the general market conditions of the securities in Hong Kong and elsewhere in the world. In particular, the business and performance and the [REDACTED] of the shares of other companies engaging in similar business may affect the [REDACTED] of our H Shares. In addition to market and industry factors, the [REDACTED] of our H Shares may be highly volatile for specific business reasons, such as the results of clinical trials of our drug candidates, the results of our applications for approval of our drug candidates, regulatory developments affecting the pharmaceutical industry, healthcare, health insurance and other related matters, fluctuations in our revenue, earnings, cash flows, investments and expenditures, relationships with our suppliers, movements or activities of key personnel, or actions taken by competitors. Moreover, shares of other companies listed on the Stock Exchange with significant operations and assets in China have experienced price volatility in the past, and it is possible that our H Shares may be subject to changes in [REDACTED] not directly related to our performance.

Future sales or perceived sales of our H Shares in the [REDACTED] by major Shareholders following the [REDACTED] could materially and adversely affect the [REDACTED] of our H Shares.

Prior to the [REDACTED], there has not been a [REDACTED] for our H Shares. Future sales or perceived sales by our existing Shareholders of our H Shares after the [REDACTED] could result in a significant decrease in the prevailing [REDACTED] of our H Shares. Only a limited number of the H Shares currently outstanding will be available for sale or [REDACTED] immediately after the [REDACTED] due to contractual and regulatory restrictions on disposal and new [REDACTED]. Nevertheless, after these restrictions lapse or if they are waived, future sales of significant amounts of our H Shares in the [REDACTED] or the perception that these sales may occur could [REDACTED] of our H Shares and our ability to raise equity capital in the future.

RISK FACTORS

Should the [REDACTED] be higher than the net tangible book value per Share, subject to [REDACTED], you may experience an immediate [REDACTED] in the book value of the [REDACTED] you purchased in the [REDACTED].

As the [REDACTED] of our H Shares is higher than the net tangible assets per Share immediately prior to the [REDACTED], purchasers of our H Shares in the [REDACTED] may experience an immediate [REDACTED]. Our existing Shareholders will experience an increase in the [REDACTED] adjusted net tangible asset value per Share of their Shares. In addition, holders of our H Shares may experience further [REDACTED] of their interest if we [REDACTED] additional H Shares in the future to raise additional capital.

Raising additional capital may cause [REDACTED] to our Shareholders, restrict our operations or require us to relinquish rights to our technologies or drug candidates.

We may finance our future cash needs through public or private offerings, debt financings, collaboration arrangements and licensing arrangements or other funding sources. Our Shareholders may experience [REDACTED] in their holdings if we [REDACTED] more securities in the future. New shares or share-linked securities issued by us may also confer rights and privileges that take priority over those conferred by the H Shares.

In addition, we may seek additional capital due to favorable market conditions or strategic considerations even if we believe that we have sufficient funds for our current or future operating plans. To the extent that we raise additional capital through the sale of equity or convertible debt securities, your ownership interest will be [REDACTED], and the terms may include liquidation or other preferences that adversely affect your rights as a holder of our H Shares. The incurrence of additional indebtedness or the issuance of certain equity securities could result in increased fixed payment obligations and could also result in certain additional restrictive covenants, such as limitations on our ability to incur additional debt or issue additional equity, limitations on our ability to acquire or license intellectual property rights and other operating restrictions that could adversely impact our ability to conduct our business. In addition, issuance of additional equity securities, or the possibility of such issuance, may cause the [REDACTED] of our H Shares to decline.

Because we do not expect to pay dividends in the foreseeable future after the [REDACTED], [REDACTED] in our H Shares will depend on the [REDACTED] of our H Shares.

We currently intend to retain most, if not all, of our available funds and any future earnings after the [REDACTED] to fund the development and commercialization of our pipeline drug candidates. As a result, we do not expect to pay any cash dividends in the foreseeable future. Therefore, you should not rely on an [REDACTED] in our H Shares as a source for any future dividend income.

RISK FACTORS

Our Board has complete discretion as to whether to distribute dividends. Even if our Board decides to declare and pay dividends, the timing, amount and form of future dividends, if any, will depend on our future results of operations and cash flow, our capital requirements and surplus, our financial condition, contractual restrictions and other factors deemed relevant by our Board. Accordingly, the return on your [REDACTED] in our H Shares will likely depend entirely upon [REDACTED] of our H Shares. There is no guarantee that our H Shares will appreciate in value after the [REDACTED] or even maintain the [REDACTED] at which you purchased the H Shares. You may not realize a return on your [REDACTED] in our H Shares and you may even lose your entire [REDACTED] in our H Shares.

Regulations on currency conversion and remittance of Renminbi into and out of the PRC may limit our ability to pay dividends and other obligations and affect the value of your [REDACTED].

Conversion of Renminbi into foreign currencies and the remittance of foreign currency out of the PRC are subject to regulation by relevant PRC authorities. A substantial majority of our future revenue is expected to be denominated in Renminbi and we will need to convert Renminbi into foreign currencies for the payment of dividends, if any, to holders of our Shares. Shortages in the availability of foreign currency may restrict our ability to remit sufficient foreign currency to pay dividends, or otherwise satisfy foreign currency denominated obligations.

Under existing PRC foreign exchange regulations, payments of current account items, including the payment of dividends, interest payments and expenditures from the transaction, can be made in foreign currencies without prior approval from the SAFE by complying with certain procedural requirements. However, approval from appropriate governmental authorities is required where Renminbi is to be converted into foreign currency and remitted out of the PRC to pay capital expenses such as the repayment of bank loans denominated in foreign currencies. Further, the PRC government may also restrict access to foreign currencies for current account transactions. If the foreign exchange control system prevents us from obtaining sufficient foreign currency to satisfy our currency demands, we may not be able to pay certain of our expenses as they come due or to pay dividends in foreign currencies.

Any possible conversion of our Domestic Shares into H Shares in the future could [REDACTED] our H Shares in the market and negatively impact the [REDACTED] of our H Shares.

According to the stipulations by the State Council’s securities regulatory authority and the Articles of Association, our Domestic Shares may be converted into H Shares and such converted H Shares may be [REDACTED] or [REDACTED] on an overseas stock exchange, provided that prior to the conversion and [REDACTED] of such converted shares, the requisite internal approval processes (but without the necessity of Shareholders’ approval by class) have been duly completed and the approval from the relevant PRC regulatory authorities, including the CSRC, have been obtained. In addition, such conversion, [REDACTED] and [REDACTED] must comply with the regulations prescribed by the State Council’s securities

RISK FACTORS

regulatory authorities and the regulations, requirements and procedures prescribed by the relevant overseas stock exchange. We can apply for the [REDACTED] of all or any portion of our Domestic Shares on the Stock Exchange as H Shares in advance of any proposed conversion to ensure that the conversion process can be completed promptly upon notice to the Stock Exchange and delivery of shares for entry on the H Share register. This could increase the supply of H Shares in the market, and future sales, or perceived sales, of the converted H Shares may adversely affect the [REDACTED] price of H Shares.

We cannot make fundamental changes to our business without the consent of the Stock Exchange.

On April 30, 2018, the Stock Exchange adopted rules under Chapter 18A of the Listing Rules. Under these rules, without the prior consent of the Stock Exchange, we will not be able to effect any acquisition, disposal or other transaction or arrangement or a series of acquisitions, disposals or other transactions or arrangements, which would result in a fundamental change in our principal business activities as set forth in this document. As a result, we may be unable to take advantage of certain strategic transactions that we might otherwise choose to pursue in the absence of Chapter 18A. Were any of our competitors that are not listed on the Stock Exchange to take advantage of such opportunities in our place, we may be placed at a competitive disadvantage, which could have a material adverse effect on our business, financial condition and results of operations.

Facts, forecasts and statistics obtained from various government sources in this document relating to the pharmaceutical industry may not be fully reliable.

Facts, forecasts and statistics in this document relating to the pharmaceutical industry in and outside China are obtained from various sources that we believe are reliable, including official government publications as well as a report prepared by Frost & Sullivan that we commissioned. However, we cannot guarantee the quality or reliability of these sources. Neither we, the [REDACTED], the Joint Sponsors, the [REDACTED] nor our or their respective affiliates or advisers have verified the facts, forecasts and statistics nor ascertained the underlying economic assumptions relied upon in those facts, forecasts and statistics obtained from these sources. Due to possibly flawed or ineffective collection methods or discrepancies between published information and factual information and other problems, the statistics in this document relating to the pharmaceutical industry in and outside China may be inaccurate and you should not place undue reliance on it. We make no representation as to the accuracy of such facts, forecasts and statistics obtained from various sources. Moreover, these facts, forecasts and statistics involve risk and uncertainties and are subject to change based on various factors and should not be unduly relied upon.

RISK FACTORS

Forward-looking information in this document is subject to risks and uncertainties.

This document contains certain future plans and forward-looking statements about us that are made based on the information currently available to our management. The forward-looking information contained in this document is subject to certain risk and uncertainties. Whether we implement those plans, or whether we can achieve the objectives described in this document, will depend on various factors including the market conditions, our business prospects, actions by our competitors and the global financial situations.

You should read the entire document carefully, and we strongly caution you not to place any reliance on any information contained in press articles or other media regarding us or the [REDACTED].

Subsequent to the date of this document but prior to the completion of the [REDACTED], there may be press and media coverage regarding us and the [REDACTED], which may contain, among other things, certain financial information, projections, valuations and other forward-looking information about us and the [REDACTED]. We have not authorized the disclosure of any such information in the press or media and do not accept responsibility for the accuracy or completeness of such press articles or other media coverage. You should rely solely upon the information contained in this document, the [REDACTED] and any formal announcements made by us in making your [REDACTED] decision regarding our H Shares. We make no representation as to the appropriateness, accuracy, completeness or reliability of any of the projections, valuations or other forward-looking information about us. To the extent such statements are inconsistent with, or conflict with, the information contained in this document, we disclaim responsibility for them. Accordingly, prospective [REDACTED] are cautioned to make their [REDACTED] decisions on the basis of the information contained in this document only and should not rely on any other information.

WAIVERS FROM STRICT COMPLIANCE WITH THE HONG KONG LISTING RULES AND EXEMPTIONS FROM COMPLIANCE WITH THE COMPANIES (WINDING UP AND MISCELLANEOUS PROVISIONS) ORDINANCE

In preparation for the [REDACTED], we [have sought] the following waivers from strict compliance with the relevant provisions of the Listing Rules and a certificate of exemption from strict compliance with the relevant provisions of the Companies (Winding Up and Miscellaneous Provisions) Ordinance.

MANAGEMENT PRESENCE IN HONG KONG

According to Rules 8.12 and 19A.15 of the Listing Rules, our Company must have sufficient management presence in Hong Kong. This normally means that at least two of our executive Directors must be ordinarily resident in Hong Kong.

Since all our business operations are not principally located, managed or conducted in Hong Kong, and our Directors consider that the relocation of our executive Directors to Hong Kong or the appointment of additional executive Directors who will be ordinarily resident in Hong Kong would not be beneficial to, or appropriate for, our Company and therefore would not be in the best interests of our Company and our Shareholders as a whole, our Company does not, and, for the foreseeable future, will not, have two executive Directors who are ordinarily resident in Hong Kong for the purpose of satisfying the requirements under Rules 8.12 and 19A.15 of the Listing Rules.

Accordingly, we have applied to the Stock Exchange for, and the Stock Exchange [has granted], a waiver from strict compliance with the requirements under Rules 8.12 and 19A.15 of the Listing Rules. We will ensure that there is a regular and effective communication between the Stock Exchange and us by way of the following arrangements:

- (i) **Authorized representatives:** Both of our Company’s authorized representatives, Mr. Wu and Ms. Sham Ying Man (岑影文) (“**Ms. Sham**”), will act as our Company’s principal channels of communication with the Stock Exchange. Accordingly, the authorized representatives of our Company will be able to meet with the relevant members of the Stock Exchange on reasonable notice and will be readily contactable by telephone, facsimile (if any) and/or email.

Each of the authorized representatives of our Company has means of contacting all Directors (including our independent non-executive Directors) promptly at all times as and when the Stock Exchange proposes to contact a Director with respect to any matter;

- (ii) **Directors:** Each Director has provided their mobile phone number, office phone number, fax number, if any, and e-mail address to the authorized representatives of our Company and the Stock Exchange, and in the event that any Director expects to travel or otherwise be out of the office, they will provide the phone number of the place of their accommodation to the authorized representatives.

WAIVERS FROM STRICT COMPLIANCE WITH THE HONG KONG LISTING RULES AND EXEMPTIONS FROM COMPLIANCE WITH THE COMPANIES (WINDING UP AND MISCELLANEOUS PROVISIONS) ORDINANCE

Each of our Directors not ordinarily residing in Hong Kong possesses or can apply for valid travel documents to visit Hong Kong and will be able to meet with the relevant members of the Stock Exchange within a reasonable period of time;

- (iii) **Compliance advisor:** We have appointed Patrons Capital Limited as our Compliance Advisor, in compliance with Rule 3A.19 of the Listing Rules, who will, among other things and in addition to the authorized representatives and our Directors, also act as an additional channel of communication with the Stock Exchange from the [REDACTED] to the date when our Company complies with Rule 13.46 of the Listing Rules in respect of its financial results for the first full financial year immediately following the [REDACTED]. Pursuant to the Note of Rule 3A.23 of the Listing Rules, the Compliance Advisor will have access at all times to our authorized representatives, our Directors and other officers. We shall also ensure that our authorized representatives, Directors and other officers will promptly provide such information and assistance as the Compliance Advisor may need or may reasonably require in connection with the performance of the Compliance Advisor’s duties as set forth in Chapter 3A of the Listing Rules. We shall ensure that there are adequate and efficient means of communication among our Company, our authorized representatives, our Directors, other officers and the Compliance Advisor, and will keep the Compliance Advisor fully informed of all communications and dealings between the Stock Exchange and us.

Any meeting between the Stock Exchange and our Directors will be arranged through the authorized representatives or the Compliance Advisor or directly with our Directors within a reasonable time frame. We will inform the Stock Exchange promptly in respect of any changes in our authorized representatives and/or our Compliance Advisor; and

- (iv) **Legal advisors:** We will also retain legal advisors to advise on on-going compliance requirements as well as other issues arising under the Listing Rules and other applicable laws and regulations of Hong Kong after the [REDACTED].

JOINT COMPANY SECRETARIES

Pursuant to Rules 3.28 and 8.17 of the Listing Rules, the company secretary must be an individual who, by virtue of their academic or professional qualifications or relevant experience, is, in the opinion of the Stock Exchange, capable of discharging the functions of the company secretary. The Stock Exchange considers the following academic or professional qualifications to be acceptable:

- (i) a member of The Hong Kong Chartered Governance Institute;

WAIVERS FROM STRICT COMPLIANCE WITH THE HONG KONG LISTING RULES AND EXEMPTIONS FROM COMPLIANCE WITH THE COMPANIES (WINDING UP AND MISCELLANEOUS PROVISIONS) ORDINANCE

- (ii) a solicitor or barrister (as defined in the Legal Practitioners Ordinance); and
- (iii) a certified public accountant (as defined in the Professional Accountants Ordinance).

Pursuant to Note 2 to Rule 3.28 of the Listing Rules, in assessing “relevant experience,” the Stock Exchange will consider the individual’s:

- (i) length of employment with the issuer and other issuers and the roles he/she played;
- (ii) familiarity with the Listing Rules and other relevant law and regulations including the Securities and Futures Ordinance, the Companies Ordinance, the Companies (Winding Up and Miscellaneous Provisions) Ordinance and the Takeovers Code;
- (iii) relevant training taken and/or to be taken in addition to the minimum requirement of taking not less than 15 hours of relevant professional training in each financial year under Rule 3.29 of the Listing Rules; and
- (iv) professional qualifications in other jurisdictions.

Pursuant to paragraph 13 of Chapter 3.10 of the Guide for New Listing Applicants, the Stock Exchange will consider a waiver application by an issuer in relation to Rules 3.28 and 8.17 of the Listing Rules based on the specific facts and circumstances. Factors that will be considered by the Stock Exchange include:

- (a) whether the issuer has principal business activities primarily outside Hong Kong;
- (b) whether the issuer was able to demonstrate the need to appoint a person who does not have the Acceptable Qualification (as defined under paragraph 11 of Chapter 3.10 of the Guide for New Listing Applicants) nor Relevant Experience (as defined under paragraph 11 of Chapter 3.10 of the Guide for New Listing Applicants) as a company secretary; and
- (c) why the directors consider the individual to be suitable to act as the issuer’s company secretary.

Further, pursuant to paragraph 13 of Chapter 3.10 of the Guide for New Listing Applicants, such waiver, if granted, will be for a fixed period of time (the “Waiver Period”) and on the following conditions:

- (a) the proposed company secretary must be assisted by a person who possesses the qualifications or experience as required under Rule 3.28 of the Listing Rules and is appointed as a joint company secretary throughout the Waiver Period; and

WAIVERS FROM STRICT COMPLIANCE WITH THE HONG KONG LISTING RULES AND EXEMPTIONS FROM COMPLIANCE WITH THE COMPANIES (WINDING UP AND MISCELLANEOUS PROVISIONS) ORDINANCE

- (b) the waiver will be revoked if there are material breaches of the Listing Rules by the issuer.

Our Company considers that while it is important for the company secretary to be familiar with the relevant securities regulation in Hong Kong, they also need to have experience relevant to our Company's operations, nexus to the Board and close working relationship with the management of our Company in order to perform the function of a company secretary and to take the necessary actions in the most effective and efficient manner. It is for the benefit of our Company to appoint a person who has been a member of the senior management for a period of time and is familiar with our Company's business and affairs as company secretary.

We have appointed Mr. Wu and Ms. Sham as our joint company secretaries. Since Mr. Wu does not possess a qualification stipulated in Rule 3.28 of the Listing Rules, he is not able to solely fulfill the requirements as a company secretary of a listed issuer stipulated under Rules 3.28 and 8.17 of the Listing Rules. To support Mr. Wu, we have appointed Ms. Sham, an associate member of both The Hong Kong Chartered Governance Institute (formerly known as the Hong Kong Institute of Chartered Secretaries) and The Chartered Governance Institute in the United Kingdom, who meets the requirements under Rules 3.28 and 8.17 of the Listing Rules, as a joint company secretary to provide assistance to Mr. Wu, for a three-year period from the [REDACTED] so as to enable Mr. Wu to acquire the relevant experience (as required under Rule 3.28(2) of the Listing Rules) to duly discharge his duties.

Accordingly, we have applied to the Stock Exchange for, and the Stock Exchange [has granted], a waiver from strict compliance with the requirements under Rules 3.28 and 8.17 of the Listing Rules in relation to the appointment of Mr. Wu as our joint company secretary. Pursuant to Chapter 3.10 of the Guide for New Listing Applicants, such waiver [has been granted] on the conditions that:

- (i) Ms. Sham is appointed as a joint company secretary to assist Mr. Wu in discharging his functions as a company secretary and in gaining the relevant experience under Rule 3.28 of the Listing Rules;
- (ii) our Company will further ensure that Mr. Wu has access to the relevant training and support to enable him to familiarize himself with the Listing Rules and the duties required of a company secretary of an issuer listed on the Stock Exchange. Our Hong Kong legal advisors have provided training to Mr. Wu on the principal requirements of the Listing Rules and the Hong Kong laws and regulations applicable to our Company after the [REDACTED]. In addition, Mr. Wu will endeavor to familiarize himself with the Listing Rules, including any updates thereto, during the three-year period from the [REDACTED];

WAIVERS FROM STRICT COMPLIANCE WITH THE HONG KONG LISTING RULES AND EXEMPTIONS FROM COMPLIANCE WITH THE COMPANIES (WINDING UP AND MISCELLANEOUS PROVISIONS) ORDINANCE

- (iii) Mr. Wu has confirmed that he will attend no less than 15 hours of training courses on the Listing Rules, corporate governance, information disclosure, investor relations as well as the functions and duties of a company secretary of a Hong Kong listed issuer during each financial year as required under Rule 3.29 of the Listing Rules;
- (iv) prior to the expiration of the initial three-year period, the qualifications and experience of Mr. Wu will be re-evaluated to determine whether the requirements as stipulated in Rules 3.28 and 8.17 of the Listing Rules can be satisfied and whether the need for ongoing assistance will continue. We will liaise with the Stock Exchange to enable it to assess whether Mr. Wu, having benefited from the assistance of Ms. Sham for the preceding three years, will have acquired the skills necessary to carry out the duties of company secretary and the relevant experience within the meaning of Note 2 to Rule 3.28 of the Listing Rules so that a further waiver will not be necessary; and
- (v) this waiver will be revoked immediately if and when Ms. Sham ceases to provide such assistance during the three-year period, and we undertake to re-apply to the Stock Exchange for a waiver in the event that Ms. Sham ceases to meet the requirements under Rule 3.28 of the Listing Rules or otherwise ceases to serve as a joint company secretary of our Company. In addition, this waiver is subject to revocation in the event of any material breaches of the Listing Rules by our Company.

For biographical information of Mr. Wu and Ms. Sham, see the section headed “Directors and Senior Management.”

NON-EXEMPT CONTINUING CONNECTED TRANSACTION

We have entered into, and are expected to continue to engage in a transaction which will constitute non-exempt continuing connected transaction of our Company under the Listing Rules upon the [REDACTED]. Accordingly, we have applied to the Stock Exchange for, and the Stock Exchange has granted, waivers from strict compliance with (i) the announcement, circular and independent Shareholders’ approval requirements under Rule 14A.105 of the Listing Rules; and (ii) the requirement of setting a monetary annual cap set out in Rule 14A.53 of the Listing Rules. For further details, see the section headed “ Continuing Connected Transaction” in this document.

OVERVIEW OF THE INFLAMMATORY IMMUNE DISEASES FIELD

Inflammatory immune diseases are a category of disorders triggered by abnormal immune system function. These diseases not only severely impact patients’ quality of life, but also can be life-threatening in certain severe cases, rendering them a key area of focus in the global pharmaceutical industry. The core pathological mechanism of inflammatory immune diseases involves an excessive reaction or misrecognition by the immune system towards the body’s own tissues or harmless substances. This leads to the release of inflammatory factors and the persistent progression of this abnormal inflammatory response can result in local or systemic tissue damage, ultimately manifesting as a spectrum of clinical symptoms.

Inflammatory immune diseases can be categorized into autoimmune diseases and allergic diseases based on the nature of the immune abnormality and the tissues affected. Autoimmune diseases are characterized by the immune system mistakenly attacking the body’s own tissues, which can affect multiple organ systems including joints, kidneys, skin and the cardiovascular system. Allergic diseases are characterized by an excessive reaction of the immune system to harmless exogenous substances (known as allergens), with affected tissues mostly concentrated in mucosal tissues in contact with the external environment and superficial tissues, such as the respiratory tract, skin and digestive tract.

INDUSTRY OVERVIEW

OVERVIEW OF THE AUTOIMMUNE DISEASE DRUG MARKET

Autoimmune diseases refer to a category of disorders where the body’s immune system mistakenly identifies and attacks its own tissues or cells due to abnormalities from genetic, environmental or other factors, leading to tissue damage, dysfunction or organ failure. They have become the third largest category of chronic diseases, ranking after cardiovascular diseases and cancer. In autoimmune diseases, abnormally activated immune cells continuously produce inflammatory mediators, keeping the affected tissues in a state of chronic inflammation. As such, autoimmune diseases are immune-mediated inflammatory diseases in nature. Inflammatory diseases are also a risk factor that significantly increases vulnerability to chronic illnesses such as cardiovascular diseases and malignant tumors. The size of the global market of autoimmune disease drugs grew from US\$116.9 billion in 2019 to US\$143.1 billion in 2024, representing a CAGR of 4.1%. It is expected that the size of global market of autoimmune disease drugs will reach US\$179.5 billion by 2028 and US\$217.0 billion by 2033, representing a CAGR of 5.8% from 2024 to 2028 and a CAGR of 3.9% from 2028 to 2033.

The Global Market Size of Autoimmune Disease Drugs, 2019-2033E

Source: Frost & Sullivan Analysis

Driven by factors, such as the increasing prevalence of various autoimmune diseases, significant unmet clinical needs and major advancements in research and development, the market of autoimmune disease drugs in China has witnessed a rapid growth in recent years. From 2019 to 2024, the market size of autoimmune disease drugs in China grew from RMB16.2 billion to RMB32.8 billion, representing a CAGR of 15.1%. It is expected that the market size of autoimmune disease drugs in China will reach RMB87.0 billion by 2028 and RMB219.6 billion by 2033, representing a CAGR of 27.6% from 2024 to 2028 and a CAGR of 20.3% from 2028 to 2033.

INDUSTRY OVERVIEW

The Market Size of Autoimmune Disease Drugs in China, 2019-2033E

Source: Frost & Sullivan Analysis

Market Drivers and Development Trends of Autoimmune Disease Drugs Market

- ***Changes in Lifestyles and Increase in Prevalence.*** A primary driver of China’s market for autoimmune disease drugs is the rising prevalence of such diseases, which is attributable to changes in lifestyles. Factors such as accelerated urbanization, the adoption of western dietary habits, increased pressures from external environment and increased psychological stress have led to a continued increase in the prevalence of autoimmune diseases. The expanding patient population not only fuels sustained growth in demand for diagnosis and treatment, but also provides long-term momentum for new drug development and market expansion, making it a key factor underpinning the growth in the sector.
- ***Advancements in Medical Standards and Increase in Patients’ Willingness to Seek Medical Treatment.*** In recent years, due to greater public health awareness, faster dissemination of medical knowledge, and the improvement of diagnostic and treatment methods, an increasing number of patients are receiving early diagnosis and actively seeking proper treatment. This trend not only drives the stable demand for existing drugs, but also lays a solid foundation for the market penetration of innovative therapies, thereby further supporting the sustained development of the sector.
- ***Diversification of Therapeutic Targets and Acceleration of Drug Development.*** In addition to traditional therapeutic targets like TNF- α , emerging targets such as JAK, BTK, IL-17 and IL-4R are also achieving breakthroughs, with related pipelines rapidly advancing into clinical studies and commercialization. The diversification of therapeutic targets not only expands treatment options to meet the diverse needs from different patient groups, but also encourages pharmaceutical companies to invest in innovative drug development, thereby injecting sustained momentum for innovation and growth potential into the market.

INDUSTRY OVERVIEW

Market Entry Barriers for the Autoimmune Diseases

The entry barriers in the autoimmune disease market include the following aspects:

- ***Technological Barriers:*** The autoimmune disease drug market is characterized by significant technological barriers, particularly arising from the highly complex R&D processes. Given the intricate pathogenesis of autoimmune diseases, which involves the abnormal modulation of multiple cytokines, signaling pathways and immune cells, successful drug development requires in-depth understanding of disease mechanisms to enable precise modulation of the immune system, which imposes high technological thresholds.
- ***Capital Barriers:*** Development of autoimmune disease drugs typically entails lengthy timeline and requires continuous and substantial capital investment across all stages, spanning from early-stage laboratory research to large-scale clinical trials. In addition, to meet rigorous regulatory requirements, drug developers must establish advanced production facilities that comply with GMP and other applicable standards, which requires substantial capital expenditure for both construction and daily maintenance. Cumulative costs from these critical stages calls for substantial capital investment, posing challenges for new entrants with limited capital strength and potentially impeding their ability to successfully enter the market.
- ***Long-Term Development Cycle Barriers:*** The full R&D cycle for autoimmune disease drugs, starting from early-stage target identification and candidate drug screening to comprehensive clinical trials designed to validate efficacy and safety, may last for a decade or even longer, with continuous capital investment required at each stage. Meanwhile, given the rapid pace of technological advancement coupled with the uncertainty on R&D outcome, growing R&D investment is imperative to address the complex disease mechanisms, and maintain market competitiveness, and thus sustain their exploration of new targets and treatment modalities.

INDUSTRY OVERVIEW

OVERVIEW OF THE ALLERGIC DISEASE DRUG MARKET

Allergic diseases are a category of disorders triggered by an abnormal or excessive reaction of the immune system to typically harmless substances (allergens). Common allergens include pollen, dust mites, pet dander and certain foods. The pathogenesis of such disorder involves the immune system mistakenly identifying an allergen as a threat, thereby releasing inflammatory mediators such as histamine and causing local or systemic inflammatory responses. Prevalence of allergic diseases is rising globally, particularly among children and adolescents. The major types of allergic diseases include, without limitation, allergic rhinitis, allergic asthma, and urticaria. From 2019 to 2024, the global market for allergic disease drugs grew from US\$45.5 billion to US\$68.8 billion, representing a CAGR of 8.6%. It is expected that the market size will reach US\$98.5 billion by 2028 and US\$131.1 billion by 2033, representing a CAGR of 9.4% from 2024 to 2028 and 5.9% from 2028 to 2033.

The Global Market Size of Allergic Disease Drugs, 2019-2033E

Source: Frost & Sullivan Analysis

Driven by advancements in pharmaceutical technology, precision medicine and personalized treatment have become a key trend in the development of allergic disease treatment. The continuous emergence of new drugs provides more options for patients with allergic diseases, contributing to the rapid growth of the allergic disease drug market in China in recent years. The market size of allergic disease drugs in China grew from RMB30.5 billion in 2019 to RMB57.5 billion in 2024, representing a CAGR of 13.5%. It is expected that such market size will reach RMB108.9 billion by 2028 and RMB293.8 billion by 2033, representing a CAGR of 17.3% from 2024 to 2028 and a CAGR of 22.0% from 2028 to 2033.

INDUSTRY OVERVIEW

The Market Size of Allergic Disease Drugs in China, 2019-2033E

Source: Frost & Sullivan Analysis

Market Drivers and Development Trends of Allergic Disease Drugs Market

- ***Rising Prevalence Driven by Urbanization, Natural Environmental Changes and Shift in Lifestyle.*** Amid the urbanization process, urban air pollution worsens, and pollen seasons become prolonged due to global warming; increased indoor activities in the modern lifestyle lead to increased use of air conditioning; pet-keeping also gained growing popularity. These factors collectively lead to increased allergen exposure, which directly drives the continuous rise in the overall prevalence of allergic diseases.
- ***Growing Patient Awareness for Allergic Disease Diagnosis and Treatment.*** Allergic symptoms used to be mistakenly dismissed as common ailments in the past. Nowadays, with improved health education, understanding of allergic diseases has deepened significantly, and patients’ willingness to seek proactive medical treatment has notably strengthened. Meanwhile, the widespread penetration of allergen detection equipment in primary medical institutions also enables the diagnosis of more patients with mild or occult allergies, substantially improving disease diagnosis rates and prompting more allergic disease patients to receive treatment.
- ***Diversification of Therapeutic Targets for Allergic Diseases.*** With deepened studies into the immune mechanisms of allergic reactions, the R&D of therapeutic targets for allergic disease drugs is also evolving from the traditional single-dimension model toward more diversified models. A number of multi-target drugs have been approved for the treatment of allergic diseases, enriching clinical treatment options and addressing differentiated medical needs with greater precision.

INDUSTRY OVERVIEW

Entry Barriers of Allergic Diseases Market

Market entry barriers in the allergic disease market include the following aspects:

- **Technological Barriers:** The anti-allergy drug sector is characterized by a dense patent thicket, with long protection periods for the core technologies. This has led to a high degree of technological concentration among the leading players. Furthermore, the production of high-end anti-allergy drugs involves complex processes, which impose stringent requirements for production equipment, quality control and technicians. New entrants face challenges in overcoming these existing technological barriers and are thus unable to rapidly build competitive product supply capabilities.
- **Capital Barriers:** Development of anti-allergy drugs is time consuming with high risk. Developing an innovative product from R&D to approval typically requires 10 to 15 years, involving substantial capital investment in various stages spanning from pre-clinical research to Phase I to III clinical trials, each bearing high risk of failure. This requires sustained funding capabilities for drug developers. New entrants lacking sufficient capital reserves may struggle to support the complete R&D cycle, and therefore may be unable to achieve product launch and commercialization.
- **Regulatory Barriers:** The pharmaceutical industry is heavily regulated. Anti-allergy drugs need to comply with vigorous approval and compliance requirements. The launch of new drugs requires extensive clinical verification and approval processes characterized by long cycles and high complexity. Enterprises must establish full-cycle production frameworks and platforms that comply with all applicable requirements, which brings high compliance costs. A drug product must, after being launched, be subject to continued adverse reaction monitoring, and securing reimbursement eligibility from national health insurance often involves complex negotiations with relevant authorities.

INDUSTRY OVERVIEW

OVERVIEW OF ATOPIC DERMATITIS DRUG MARKET

Atopic dermatitis (“AD”) is a chronic and relapsing inflammatory skin disease characterized by the symptoms of pruritus and skin lesions, often coupled with exudative tendencies. According to the Scoring Atopic Dermatitis (“SCORAD”) severity classification, AD can be categorized into mild (SCORAD < 25), moderate (SCORAD 25-50), and severe (SCORAD > 50) categories.

The onset of AD is the synergistic result of genetic, immune and environmental factors. A genetic predisposition leads to congenital defects in skin barrier function, allowing allergens and microbes to easily invade the skin tissue. This in turn triggers a disruption in local immune homeostasis, driving a Th2 cell-dominated inflammatory response that promotes the secretion of pro-inflammatory cytokines such as IL-4, IL-13 and IL-5. The inflammatory reaction can further exacerbate skin barrier damage while inducing itch sensation, forming a self-reinforcing “itch-scratch” cycle. Environmental factors act in concert to aggravate the above pathological process.

The Pathogenesis of AD

Source: JAK-STAT signaling pathway in the pathogenesis of atopic dermatitis: An updated review, Frost & Sullivan Analysis

Analysis of China’s Atopic Dermatitis Drug Market Size

The number of atopic dermatitis patients in China increased to 72.9 million in 2024, with a CAGR of 2.1% from 2019 to 2024. It is projected that the number of atopic dermatitis patients in China will reach 77.5 million by 2028, with a projected CAGR of 1.5% from 2024 to 2028. By 2033, the number of atopic dermatitis patients in China is expected to reach 80.8 million, with a projected CAGR of 0.8% from 2028 to 2033.

INDUSTRY OVERVIEW

Number of Atopic Dermatitis Patients in China, 2019-2033E

Source: Literature reviews, Frost & Sullivan Analysis

As an increasing number of innovative topical and systemic therapies become available and are applied in clinical practice, atopic dermatitis patients are expected to have access to more therapeutic options characterized by strong efficacy and fewer side effects. In conjunction with factors including the increase in future per capita disposable income and per capita medical and health care expenditure, the market size of atopic dermatitis drugs in China is expected to continue to expand. In 2024, the market size for atopic dermatitis drugs in China was approximately RMB11.0 billion. It is projected that by 2028, the market size for atopic dermatitis drugs in China will reach RMB29.7 billion, with an expected CAGR of 28.1% from 2024 to 2028. By 2033, the market size is expected to reach RMB50.2 billion, with an anticipated CAGR of 11.1% from 2028 to 2033.

INDUSTRY OVERVIEW

Historical and Forecasted of China’s Atopic Dermatitis Drug Market Size, 2019-2033E

Source: Frost & Sullivan Analysis

Main Treatment Pathway of Atopic Dermatitis

Treatment of atopic dermatitis consists primarily of long-term disease management and tiered anti-inflammatory control. With basic intervention laying the fundamentals, different treatment methods are applied based on the severity of symptoms, supplemented with targeted adjunctive measures.

- Basic treatment focuses on non-pharmacological intervention and maintaining the skin barrier. It involves appropriate level of bathing and cleansing, regularly using moisturizers to restore the skin barrier, avoiding scratching, friction and other chemical/environmental stimuli, as well as temporarily avoiding foods known to trigger skin lesions. The goal is to reduce skin microbial load, alleviate triggering effects, and minimize the frequency and severity of recurrence in the long run.
- Pharmacological therapy, being the core treatment method, consists of two levels of therapies based on the severity of symptoms, namely topical therapy and systemic therapy:
 - Topical therapy is the first-line option for patients with mild to moderate conditions, including topical corticosteroids (“TCS”), topical calcineurin inhibitors (“TCI”) and novel small-molecule inhibitors. Systemic therapy is indicated for patients with moderate to severe conditions or those with inadequate response to topical treatment. This includes short-term oral corticosteroids, antihistamines, immunosuppressants, as well as targeted therapies and oral Janus kinase (“JAK”) inhibitors.

INDUSTRY OVERVIEW

- Other treatments are used as supplementary measures, including ultraviolet (“UV”) therapy, antimicrobial therapy (for concurrent infections), and syndrome-based traditional Chinese medicine therapy. These methods can be administered in combination with standard therapies. Overall, the treatment of atopic dermatitis aims to achieve inflammation control and symptom relief through a strategy of stratified escalation and long-term management.

The following diagram illustrates the treatment pathway for AD:

Note: EASI (Eczema Area and Severity Index): assesses erythema, edema, excoriation and lichenification; total score ranges from 0 to 72. SCORAD (Scoring Atopic Dermatitis): includes assessment of objective signs and patients’ subjective symptoms (pruritus and sleep disturbance); total score ranges from 0 to 103. POEM (Patient-Oriented Eczema Measure): a patient self-assessment tool evaluating symptoms over the past seven days; total score ranges from 0 to 28.

Source: Chinese guideline for diagnosis and treatment of atopic dermatitis (2020), Expert Consensus on the Management of Medications for Atopic Dermatitis(2024 version)& (2025 version), Frost & Sullivan analysis

Drivers and Development Trends of AD Drugs Market

- **Increasing Medical Demand Driven by Large Patient Base and Improved Disease Awareness:** China has a substantial AD patient base, with trends indicating a younger age of onset and chronic disease course. In recent years, improved dermatology treatment guidelines and greater patient awareness of long-term disease management have led to a continuous increase in patient visit rates and the proportion receiving standardized treatment, which laid a foundation for the uptake of systemic therapeutic drugs.
- **Increasing Demand for Standardized Treatment Coupled with Improved Disease Awareness:** Recent years have seen continuous improvement in dermatological therapies standards. Both physicians and patients have gained a significantly better understanding of AD as a “chronic inflammatory disease”. The treatment goal is gradually shifting from short-term symptom control to long-term disease management. Increased acceptance of patients for systemic treatments, biologics and innovative modalities is driving an upgrade in the overall medication structure.

INDUSTRY OVERVIEW

- ***Rising Popularity for Innovative Drugs:*** JAK inhibitors and other novel-mechanism small molecule drugs offer advantages in speed of onset and dosing convenience. They are particularly suitable for patient groups with lower adherence to injections or those requiring rapid symptom relief. As safety data accumulates and indications expand, small molecule drugs are expected to form an effective complement to biologics in the AD treatment.

Unmet Clinical Needs for AD Treatment

Limitations of Traditional Topical Therapies in Long-term Safety and Comprehensive Efficacy: While traditional treatment options based on TCS and TCI offer advantages in cost and accessibility, long-term use carries safety concerns (e.g., skin atrophy) and poor tolerability in sensitive areas. Their effectiveness in relieving itch and repairing the skin barrier is also limited. These therapies struggle to simultaneously achieve the comprehensive treatment goals of “rapid itch relief, sustained anti-inflammatory action and long-term maintenance”, which constrains effective long-term and standardized disease management.

Inadequate Stratified Treatment System Leading to Unmet Needs across All Patient Populations: For patients with mild-to-moderate disease, there is a lack of safe and effective non-corticosteroid topical alternatives, increasing the risk of corticosteroid dependence. Patients with moderate-to-severe disease require systemic therapy; however, current biologics and small molecule drugs still face challenges related to accessibility, long-term medication management and unclear pathways for combination therapy. Overall, a mature system for stratified treatment and long-term maintenance strategies has not yet been established, adversely affecting treatment continuity and outcome stability.

Compromised Quality of Life Resulting from Insufficient Pruritus Control and Long-term Management: Pruritus (itch) is the core and most quality-of-life-impacting symptom of AD, with particularly pronounced effects on sleep and growth/development in pediatric populations. Current treatments predominantly focus on improving skin lesions, often providing inadequate rapid and sustained itch control. Furthermore, the adverse effects of some regimens limit their long-term use. Coupled with the disease’s high relapse rate and chronic progressive nature, patients still face a significant burden in long-term management.

Analysis of Mechanism and Advantages of JAK Inhibitors

Janus kinase (JAK) is a critical “hub” molecule within the body’s signaling network for inflammation and immune responses. The JAK-STAT pathway mediated by JAK is responsible for transmitting signals for various cytokines from the cell surface receptor to the nucleus, directly determining the initiation, amplification and maintenance of inflammatory responses. The core pathogenesis of AD involves a Th2-dominated immune imbalance, with key pro-inflammatory cytokines such as IL-4, IL-13 and IL-31 all exerting their effects via the JAK-STAT pathway. JAK inhibitors work by competitively binding to the ATP-binding sites of JAK family members (such as JAK1/2/3), inhibiting their kinase activity. This blocks the phosphorylation and nuclear translocation of STAT proteins, thereby suppressing the transcription of pro-inflammatory genes and reducing the release of inflammatory cytokines. Concurrently, they can upregulate the expression of barrier-related proteins like filaggrin to repair the damaged skin barrier, and also block IL-31-mediated itch signaling, alleviating the self-reinforcing “itch-scratch” cycle.

INDUSTRY OVERVIEW

In the treatment of AD, JAK inhibitors have become an important treatment option for moderate-to-severe patients due to several core advantages, and are particularly suitable for those with an inadequate response to traditional biologics or immunosuppressive agents. Compared to the slower response of traditional topical corticosteroids or calcineurin inhibitors, JAK inhibitors can rapidly alleviate symptoms such as rash, erythema, exudation and intense pruritus within a short timeframe, thereby improving patients' quality of life. Second, they exhibit broad-spectrum immunomodulatory effects, different from single-target biologics such as IL-4R α inhibitors, JAK inhibitors can simultaneously regulate multiple pro-inflammatory cytokine-dependent JAK-STAT pathways, targeting the complex pathogenesis of AD caused by multi-pathway abnormalities. JAK inhibitors can effectively reduce the need for steroid use, for steroid-dependent patients, they can decrease the dosage of topical or systemic steroids, or even gradually replace steroids, thereby avoiding adverse reactions such as skin atrophy, telangiectasia and hepatorenal impairment induced by long-term steroid therapy. JAK inhibitors may still exert therapeutic effects on refractory cases with poor responses to traditional biologics or immunosuppressive agents; they also feature low systemic exposure, which ensures better safety and further enhances the compliance and feasibility of clinical treatment.

INDUSTRY OVERVIEW

OVERVIEW OF THE MARKET FOR ALLERGIC RHINITIS DRUGS

Allergic Rhinitis (AR) is a chronic inflammatory disease of the nasal mucosa, primarily mediated by an IgE-mediated type 2 inflammatory response triggered by inhaled allergens. Based on disease course and allergen exposure patterns, allergic rhinitis is typically categorized into seasonal allergic rhinitis and perennial allergic rhinitis. Seasonal allergic rhinitis is mainly induced by allergens with distinct seasonal distributions, such as pollen, and its onset is closely related to specific seasons. Symptoms often appear or significantly worsen during the pollen season. Common triggers include tree pollen, grass pollen and weed pollen. During peak exposure periods, patients may experience pronounced symptoms such as paroxysmal sneezing, clear rhinorrhea and nasal itch, frequently accompanied by ocular allergic symptoms. Symptom presentation tends to be highly variable. Perennial allergic rhinitis is primarily caused by indoor allergens present year-round, leading to symptoms that may persist or recur throughout the year. Common allergens include dust mites, animal dander, mold and cockroaches.

Pathogenesis of Allergic Rhinitis

Allergic rhinitis involves chronic inflammation of the nasal mucosa and is characterized by two stages, i.e. sensitization phase and effector phase, accompanied by chronic inflammatory remodeling. During the sensitization phase, inhaled allergens penetrate the nasal mucosal epithelium and are captured and presented by dendritic cells to naïve T cells, driving their differentiation into Th2 cells. These Th2 cells secrete IL-4 and IL-13, which promote the differentiation of B cells into plasma cells that produce allergen-specific IgE antibodies. This IgE binds to high-affinity receptors (FcεRI) on the surface of mast cells and basophils in the nasal mucosa, thereby sensitizing these cells. During the effector phase, upon re-exposure to the same allergen, the allergen cross-links the IgE on the surface of sensitized cells, triggering the release of inflammatory mediators such as histamine and leukotrienes, which induces nasal congestion, watery rhinorrhea, nasal itching and sneezing. Meanwhile, IL-5 secreted by Th2 cells recruits eosinophil infiltration to exacerbate inflammation. ILC2 participates in the inflammatory response and neuroimmune dysregulation amplifies symptoms, and long-term allergen exposure leads to nasal mucosal barrier damage and chronic inflammatory remodeling.

INDUSTRY OVERVIEW

Pathogenesis of Allergic Rhinitis

Source: *Guidelines for the Diagnosis and Treatment of Allergic Rhinitis in China (2022 Revised Edition)*, Frost & Sullivan Analysis

Analysis of China’s Allergic Rhinitis Drug Market Size

Driven by multiple factors — including increasing seasonal pathogenic factors (such as pollen), environmental pathogenic factors (such as dust mites and animal dander), and the annual rise in the urban population (considering the higher prevalence in urban areas than in rural areas) — the total number of allergic rhinitis patients in China is expected to continue to grow. The number of allergic rhinitis patients in China increased from 232.7 million in 2019 to 245.5 million in 2024, with a CAGR of 1.1% from 2019 to 2024. It is projected to reach 255.7 million by 2028, with a projected CAGR of 1.0% from 2024 to 2028. By 2033, the number of allergic rhinitis patients in China is expected to reach 269.6 million, with a projected CAGR of 1.1% from 2028 to 2033.

INDUSTRY OVERVIEW

Number of Allergic Rhinitis Patients in China, 2019-2033E

Source: Literature reviews Frost & Sullivan Analysis

China has a large base of patients with allergic rhinitis with strong demand for anti-allergic treatment. With increasing number of allergic rhinitis patients, improved accessibility to allergic rhinitis medications, and growing demand for innovative therapy, the market size for allergic rhinitis drug in China increased from RMB2.5 billion in 2019 to RMB4.6 billion in 2024, with a CAGR of 13.0% from 2019 to 2024. It is projected that such market size will reach RMB9.7 billion by 2028, with a projected CAGR of 20.6% from 2024 to 2028. By 2033, the market size for allergic rhinitis drug in China is expected to reach RMB22.1 billion, with a projected CAGR of 17.8% from 2028 to 2033.

INDUSTRY OVERVIEW

Market Size and Forecast of Allergic Rhinitis Drugs in China, 2019-2033E

Source: Frost & Sullivan Analysis

Main Treatment Pathway of Allergic Rhinitis

Allergic rhinitis requires the combined use of preventive measures and pharmacological treatment, aiming at both symptom control and long-term management, and achieves the combination of prevention and symptom treatment as well as sustained disease control through the environmental control, patient education and standardized pharmacological intervention:

- Environmental control reduces inflammation triggers by avoiding exposure to allergens (such as dust mites and pollen) and irritants, while healthcare education enhances patients’ self-management capabilities. Treatment is administered in a tiered manner: local (intranasal) therapy serves as the core regimen indicated for most patients with mild-to-moderate conditions and some with moderate-to-severe conditions. It includes first-line treatment such as intranasal corticosteroids and intranasal antihistamines, as well as second-line treatment including intranasal mast cell stabilizers, intranasal decongestants and intranasal anticholinergics.
- Systemic therapy is reserved for patients with severe symptoms, inadequate response to topical treatment, or systemic manifestations/comorbidities. First-line treatment includes second-generation oral antihistamines, oral leukotriene receptor antagonists, and second-line treatment includes oral glucocorticoids.

INDUSTRY OVERVIEW

- Immunotherapy, being the etiological treatment for allergic rhinitis, focuses on inducing immune tolerance via sublingual or subcutaneous administration of allergens in gradually increasing doses. Despite its long treatment course, it delivers long-term benefits, reduces disease recurrence and medication requirements, and is therefore indicated for eligible patient populations.

The following diagram illustrates the treatment pathway for allergic rhinitis:

Source: Chinese Guidelines for the Diagnosis and Treatment of Allergic Rhinitis (2022 Revised Edition), Frost & Sullivan Analysis

Drivers and Development Trends of Allergic Rhinitis Drugs Market

- Traditional Therapies Remain Mainstream Choices:** The primary medications for allergic rhinitis in China continue to be intranasal corticosteroids, antihistamines and leukotriene receptor antagonists. These drugs are moderately priced, have a relatively rapid onset of action, and can effectively relieve symptoms such as nasal congestion, sneezing and rhinorrhea. Consequently, they remain the first-line treatment choice for most patients in clinical practice. However, their action is primarily focused on symptom control, with limited ability to fundamentally alter the disease course or achieve long-term management. They are associated with fluctuating efficacy and a risk of symptom recurrence.
- Growing Patient Demand for Long-term Control and Quality of Life:** Allergic rhinitis is a chronic and recurrent disease, with approximately 60% of patients experiencing relapse even after receiving traditional treatments. As public health awareness grows,

INDUSTRY OVERVIEW

patients are placing greater emphasis on quality of life, sleep quality and long-term symptom control. This shift is driving sustained growth in demand for treatment options that offer more sustainable and superior long-term efficacy, thereby creating growth space for innovative drugs.

- ***Evolution in Therapeutic Paradigm Driven by Innovative Drugs:*** Novel therapeutic options, including small-molecule chemical drugs, fixed-dose combination preparations and biologics, are gradually emerging in China. These innovative agents offer advantages over traditional drugs in terms of speed of onset, better efficacy and dosing convenience. Their introduction is expected to improve patient adherence and provide more choices regarding long-term control, symptom relief and safety profiles, thereby progressively reshaping the treatment landscape for allergic rhinitis.

Unmet Clinical Needs for Allergic Rhinitis Treatment

- ***Existing Treatments Focus on Symptomatic Relief with Limited Potential for Long-term Control:*** Existing treatment modalities for allergic rhinitis are relatively well-established. Medications such as intranasal corticosteroids, antihistamines and leukotriene receptor antagonists can effectively alleviate symptoms and are relatively affordable and accessible. However, most existing treatments primarily address symptom control and are unable to fundamentally address the chronic and recurrent nature of the disease. Consequently, approximately 60% of patients still experience recurrent symptoms, highlighting the limited long-term efficacy.
- ***Limited Real-world Accessibility of Disease-modifying Therapies Due to High Compliance Requirements:*** As one of the few treatment options with disease-modifying potential, allergen immunotherapy typically requires a treatment course of two to three years, which is highly demanding in terms of compliance, time commitment and financial capacity of the patient. This has restricted its practical clinical application. Most patients prefer fast-acting and easy-to-use symptomatic drugs, leading to persistently low coverage of etiologic treatment in clinical practice.
- ***Difficulty in Balancing Efficacy, Convenience and Long-term Management with Existing Options:*** Current treatment options still need to compromise among sustained efficacy, dosing convenience and long-term safety. Some patients experience reduced compliance due to frequent dosing requirements or fluctuations in efficacy. As patients’ expectations for quality of life increase, there is a growing clinical need for more targeted, user-friendly therapies with superior long-term safety profiles, gradually driving the expanding application space for innovative small molecule drugs, fixed-dose combination preparations and biologics.

INDUSTRY OVERVIEW

Analysis of Mechanism and Advantages of JAK Inhibitors

JAK inhibitors intervene in the core inflammatory response of allergic rhinitis (AR) by targeting and blocking the JAK-STAT signaling pathway. In the pathogenesis of AR, key pro-inflammatory cytokines such as IL-4, IL-5 and IL-13, which are driven by a TH2-Mediated immune imbalance, require JAK-mediated signal transduction to activate downstream STAT proteins, thereby regulating the expression of inflammatory genes. JAK inhibitors work by competitively binding to the ATP-binding sites of JAK family members (e.g., JAK1/2), inhibiting their kinase activity. This action blocks the phosphorylation and nuclear translocation of STAT proteins, leading to reduced secretion of pro-inflammatory cytokines. Furthermore, they can inhibit B-cell activation and the production of allergen-specific IgE, thereby reducing the sensitization and activation of mast cells and basophils and decreasing the release of inflammatory mediators like histamine. Simultaneously, JAK inhibitors suppress eosinophil infiltration, alleviate nasal mucosal edema and excessive mucus secretion, and relieve symptoms such as nasal itch, sneezing and nasal congestion. Through these mechanisms, they inhibit the amplification of the inflammatory cascade at multiple links.

In the treatment of allergic rhinitis, JAK inhibitors demonstrate advantages across multiple dimensions, including mechanism of action, delivery potential and applicability. JAK inhibitors can simultaneously block multiple Th2 inflammatory pathways, thereby reducing the activity of key cytokines concurrently and avoiding residual inflammation associated with single-target therapies. Furthermore, when administered via a nasal spray formulation, they can mitigate the systemic risks, such as hematological abnormalities and infectious concerns, traditionally associated with oral JAK inhibitors. JAK inhibitors are suitable for patients who are refractory to or intolerant of conventional medications. JAK inhibitors may be suitable for exploratory treatment in populations who are resistant or intolerant to traditional drugs, offering an effective and safe new therapeutic option for those who are intolerant to traditional drugs.

INDUSTRY OVERVIEW

Competitive Landscape of Allergic Rhinitis Treatment

Currently, drugs approved for allergic rhinitis in China include antihistamines, corticosteroids, leukotriene receptor antagonists and various intranasal preparations, such as those with anticholinergic mechanisms. As of the Latest Practicable Date, there were 23 drug candidates for allergic rhinitis in China. Among these, the only JAK inhibitor is Pumecitinib, which has currently initiated patient enrollment for its Phase III clinical trial.

The following is a list of drug candidates for allergic rhinitis that have entered Phase III clinical trials in China:

Drug Pipelines for Allergic Rhinitis in China

Target	Drug Name/Code	Company	Dosage Form	Drug Type	Clinical Stage	Latest Update Date
JAK	Pumecitinib nasal spray	PrimeGenX Therapeutics	Nasal spray	Chemical drug	Phase III	2025-12-27
IgE	LP-003	LongBio	Subcutaneous injection	Biological products	Phase III	2025-12-20

INDUSTRY OVERVIEW

OVERVIEW OF THE PRURITUS DRUG MARKET

Pruritus (itch) is one of the most common and life-quality-impairing symptoms across a wide range of dermatological and systemic diseases. It is observed in various dermatological diseases such as neurodermatitis and Olmsted syndrome. Based on the etiologies underlying chronic pruritus, the International Forum for the Study of Itch (IFSI) has established the following classification of pruritus:

Classification of Pruritus Symptoms

Category	Common Causes or Diseases
Dermatological Disease-Induced	Atopic dermatitis, psoriasis, neurodermatitis, chronic urticaria, bullous pemphigoid, scabies, cutaneous amyloidosis, etc.
Systemic Disease-Induced	① End-stage organ diseases: chronic kidney disease, chronic liver disease with or without cholestasis ② Endocrine and metabolic diseases: hyperparathyroidism, hyperthyroidism or hypothyroidism, iron deficiency, diabetes ③ Infectious diseases: human immunodeficiency virus infection and acquired immunodeficiency syndrome, parasitic diseases (including helminthiasis), viral hepatitis ④ Hematological diseases: polycythemia vera, myeloproliferative diseases, leukemia, lymphoma ⑤ Drug-induced: chloroquine, morphine, angiotensin-converting enzyme inhibitors, anti-tumor targeted drugs, arsenic-containing drugs, etc. ⑥ Solid tumors: lung cancer, prostate cancer, liver cancer, malignant tumor bone metastasis, etc.
Neuropathic	① Peripheral neuropathy: notalgia paresthetica, pruritus of the radial side of the arm, lateral femoral cutaneous neuritis, postherpetic neural pruritus ② Central neuropathy: multiple sclerosis, brain tumor, etc.
Somatoform Disorder-Induced	Anxiety, depression, delusional disorder, etc.
Mixed	Caused by two or more factors
Unknown Origin	Diagnosed after exclusion of other etiologies for chronic pruritus

Source: Literature Review, Frost & Sullivan Analysis

INDUSTRY OVERVIEW

In particular, neurodermatitis is a common chronic inflammatory dermatological disease classified as a disorder of skin neurological function. Its typical Symptoms include intermittent severe itching, accompanied by localized or generalized skin changes such as lichenification, increased skin markings and cutaneous hypertrophy. It frequently occurs at sites prone to scratching or friction, including neck, elbow, back of knee and tailbone area. Olmsted syndrome is a rare congenital dermatological disease, with approximately 100 reported cases worldwide. It is often clinically associated with intractable pruritus and pain, and, in severe cases, may impair hand and foot function and significantly reduce quality of life. However, there is currently no targeted specific therapy available.

Pruritus Patient Population in China

The total number of chronic pruritus patients in China increased from 255.7 million in 2019 to 262.0 million in 2024, with a CAGR of 0.5% from 2019 to 2024. The total number of chronic pruritus patients in China is expected to reach 266.8 million in 2028. By 2033, the number of chronic pruritus patients in China is projected to reach 272.7 million, with a projected CAGR of 0.4% from 2028 to 2033.

Number of Chronic Pruritus Patients in China, 2019-2033E

Source: Literature reviews, Frost & Sullivan Analysis

Main Treatment Pathway of Pruritus

The treatment of dermatosis-induced pruritus is mainly based on the treatment guidelines for specific diseases. Taking neurodermatitis with pruritus as an example, its treatment paradigm is centered on the core principle of anti-pruritus, anti-inflammation, barrier repair, and behavioral intervention, with emphasis on stepped hierarchical management.

- Basic treatment aims at breaking the self-reinforcing “itch-scratch” cycle through avoiding mechanical stimuli, such as scratching and friction, as well as environmental control. Topical treatment takes glucocorticoids as the first-line

INDUSTRY OVERVIEW

choice, with dosage and potency selected based on skin lesions, which is used as first-line therapy for mild-to-moderate patients, while occlusive therapy can be adopted to enhance efficacy in moderate-to-severe or refractory cases.

- Systemic treatment targets intractable pruritus or comorbidities, combining second-generation antihistamines and sedatives to regulate neuroimmune responses.
- Physical therapy (ultraviolet radiation, laser therapy) and traditional Chinese medicine acupuncture are used as adjunctive modalities for refractory skin lesions.
- Long-term management requires combining psychological interventions (cognitive-behavioral therapy, stress management) to correct scratching behaviors, supplemented by moisturizing to repair the skin barrier. Through multi-dimensional interventions, the “pruritus — scratching — inflammation” cycle is broken to achieve symptom control and recurrence prevention.

The following diagram illustrates the treatment pathway of pruritus:

Source: Guidelines for the Management of Chronic Pruritus (2024 version), Frost & Sullivan Analysis

INDUSTRY OVERVIEW

Unmet Clinical Needs for Pruritus Treatment

- ***Difficulties in Early Diagnosis and Variable Clinical Presentations:*** Pruritus is characterized by complex etiologies and diverse clinical manifestations, which could easily lead to misdiagnosis or delayed diagnosis, especially in the absence of primary skin lesions. The difficulty in early diagnosis and individual differences in symptoms often result in delayed diagnosis and treatment. Given that pruritus can be caused by local skin lesions, systemic diseases, neurological abnormalities or psychogenic factors, either individually or collectively, it exhibits high heterogeneity, making it challenging for physicians to quickly identify the underlying cause. In addition, there is currently a lack of laboratory indicators or imaging modalities with high sensitivity and specificity to assist in differential diagnosis, which further increases the risk of missed diagnosis and misdiagnosis. In primary healthcare settings, limited specialist resources often result in patients being treated as common skin allergies for a long time, thereby delaying the window of opportunity for early intervention in potentially serious diseases.
- ***Unclear Therapeutic Targets and Limitations in Immunomodulatory Drugs:*** Although targeted drugs have been developed for some immune-mediated pruritic diseases, the pathological mechanisms of many diseases remain unclear. Additionally, existing broad-spectrum immunosuppressants have significant side effects, and the development of precision-targeted drugs still faces major bottlenecks. Currently, most therapies can only alleviate symptoms without eradicating the underlying causes, and long-term use may also trigger complications such as infections or metabolic disorders. Meanwhile, distinct subtypes of pruritus (such as neuropathic, inflammatory, mixed) exhibit significantly different responses to the same drug, indicating the urgent need for more refined molecular subtyping to guide personalized treatment.
- ***Absence of Objective Quantitative Assessment Tools Leading to Severe Underestimation of Physical and Mental Disease Burden:*** Currently, as clinical assessment of pruritus severity remains highly dependent on patients’ subjective reports (such as VAS scores), there is a lack of physiological indicators or digital monitoring tools that can objectively quantify pruritus frequency, intensity and nocturnal scratching behavior. The subjectivity of such assessments not only limits the precise determination of clinical efficacy, but also poses a technical barrier to the setting of clinical trial endpoints for new drug development. More critically, the “itch-scratch” cycle formed by long-term intractable pruritus severely disrupts patients’ sleep structure and is often accompanied by mental disorders such as anxiety and depression. However, under the traditional clinical model centered on “skin symptoms”, this significant burden of various accompanying physical and mental diseases is often overlooked in clinical practice, with a lack of comprehensive intervention plans.

INDUSTRY OVERVIEW

Drivers and Development Trends of Pruritus Drugs Market

- ***Policy Support Accelerating Drug R&D:*** The Chinese government encourages R&D and innovation in the medical field. Through financial support and policy incentives, it has driven the overall development of pruritus drugs. In particular, the approval process for new therapies has been accelerated, further facilitating the expansion of the market. In recent years, regulatory pathways have been continuously optimized to address high-burden chronic conditions and unmet clinical needs, providing more efficient market access for innovative therapies. This institutional environment has not only enhanced domestic R&D enthusiasm, but also attracted more resources to pruritus-related mechanism research and translational medicine.
- ***Rapid Development of Targeted and Precision Therapies:*** With the advancement of immunology and molecular target research, the development of pruritus-related drugs in China has increasingly focused on innovative therapeutic approaches such as biologics and small-molecule targeted drugs, which will gradually replace traditional antihistamines and broad-spectrum immunosuppressants. Compared with previous symptom-centered strategies, current R&D prioritizes intervening in the underlying signaling pathways of diseases, aiming to achieve sustained remission and lower risks of adverse reactions. This transformation is driving the evolution of treatment models from empirical medication to mechanism-driven therapy, gradually aligning with international cutting-edge trends.
- ***Gradual Upgrade of Diagnosis and Treatment System towards Subtype-specific Personalization:*** With the deepened understanding of the neuro-immune mechanisms underlying pruritus, clinical practice has begun to distinguish inflammatory, neuropathic and other subtypes, driving the development of companion diagnostics, biomarkers and personalized medication strategies, and reshaping the treatment paradigm. An increasing number of medical institutions have introduced multidisciplinary collaboration models in refractory pruritus cases, conducting comprehensive judgments based on medical history characteristics, laboratory indicators and functional assessments. This refined diagnosis and treatment approach helps improve treatment response rates, and reduces ineffective interventions, laying a clinical foundation for establishing a standardized subtyping system in the future.

INDUSTRY OVERVIEW

Analysis of Mechanism and Advantages of TRPV3 Inhibitor

The core mechanism of action for TRPV3 inhibitor is to block the pathological cascade reaction mediated by abnormally activated TRPV3 channels. TRPV3 is a calcium-permeable cation channel mainly expressed in skin keratinocytes, and it exhibits high expression or abnormally activated functional status in the lesional skin of pruritus patients. By binding to TRPV3 channel proteins, TRPV3 inhibitors stabilize the closed conformation of the protein and directly blocks Ca^{2+} influx triggered by channel opening. This further inhibits the activation of downstream inflammatory signaling pathways, reduces the secretion of pro-inflammatory cytokines such as $\text{TNF-}\alpha$ and IL-6, and prevents inflammation-induced neural sensitization. Meanwhile, TRPV3 activation is a key link in pruritus signal transmission between keratinocytes and sensory nerves. The inhibitor can interrupt this signal transduction, and reduce the generation of action potentials in sensory nerve terminals, thereby inhibiting pruritus perception at the peripheral level.

Compared with other pruritus therapeutic drugs, it has particularly prominent core advantages: Firstly, it offers greater precision in targeting, outperforms the non-specific mode of action of traditional antihistamines and glucocorticoids by specifically targeting local TRPV3 channels in the skin, without interfering with other TRPV subtypes or neural pathways, thereby avoiding the potential central sedative side effects of antihistamines and the broad-spectrum immunosuppressive risks of glucocorticoids. Secondly, it integrates repair function. Unlike traditional drugs that merely alleviate symptoms, it can inhibit inflammation and regulate keratinocyte function to repair the impaired skin barrier while relieving pruritus, thereby remedying the shortcoming that antihistamines and pure neural inhibitors cannot improve pathological skin damage. Thirdly, it has broader applicability, surpassing antihistamines that are only effective for histamine-dependent pruritus. It is equally effective for non-histamine-dependent acute and chronic pruritus. Both natural and synthetic inhibitors have demonstrated efficacy in animal models, covering more comprehensive application scenarios. Fourthly, it possesses superior safety profile. Compared with targeted drugs such as systemically administered JAK inhibitor, its topical application achieves high skin concentration with extremely low systemic exposure, avoiding potential systemic adverse reactions such as hematopoietic and digestive disorders associated with systemic administration. It also outperforms glucocorticoids in terms of safety, as long-term use of glucocorticoids may cause local side effects such as skin atrophy and pigmentation.

INDUSTRY OVERVIEW

Competitive Landscape of Pruritus Treatment

As of the Latest Practicable Date, the drugs approved in China for the treatment of pruritus mainly included second-generation antihistamines, most of which have been included in the centralized procurement. As of the Latest Practicable Date, there were 16 drug candidates for the treatment of pruritus in China. Among these, PG-033 developed by PrimeGenX Therapeutics is the only TRPV3 inhibitor, which is currently in Phase I clinical stage. The following is a list of the drug pipelines for the pruritus in China:

Drug pipelines for the Pruritus in China

Target	Drug Name/Code	Company	Indication	Drug Type	Clinical Stage	Latest Update Date
KOR	Anrikefon	Haisco	Uremic pruritus, pruritus, chronic pain	Chemical Drug	Phase III	2024-08-21

INDUSTRY OVERVIEW

Overview of the Membranous Nephropathy Drug Market

Membranous nephropathy (MN) is an immune-mediated glomerular disease characterized pathologically by diffuse thickening of the glomerular basement membrane. Clinically, it is predominantly manifested as nephrotic syndrome, including massive proteinuria, hypoalbuminemia, edema and hyperlipidemia; alternatively, it may present with varying degrees of proteinuria and renal function impairment. Membranous nephropathy is classified into primary and secondary membranous nephropathy. Primary membranous nephropathy is mainly driven by autoimmune mechanisms and is often associated with anti-PLA2R antibodies and other autoantibodies. Secondary membranous nephropathy may result from factors such as infections, tumors, systemic autoimmune diseases or medication. The natural course of membranous nephropathy differs, with some patients achieving spontaneous remission, while a considerable proportion developing persistent proteinuria and progress gradually to chronic kidney disease or even end-stage renal disease. Therefore, long-term follow-up and standardized management are required based on clinical risk stratification.

Pathogenesis of Membranous Nephropathy

Source: *Membranous Nephropathy: Pathogenesis and Treatments, Frost & Sullivan Analysis*

INDUSTRY OVERVIEW

Membranous Nephropathy Patient Population in China

The total number of membranous nephropathy patients in China increased from 2.3 million in 2019 to 2.5 million in 2024, with a CAGR of 1.5% from 2019 to 2024. It is expected to reach 2.6 million in 2028. By 2033, the number of membranous nephropathy patients in China is projected to reach 2.8 million, with a projected CAGR of 1.3% from 2028 to 2033.

Number of Membranous Nephropathy Patients in China, 2019-2033E

Source: Literature reviews, Frost & Sullivan Analysis

Main Treatment Pathway of Membranous Nephropathy

The treatment of membranous nephropathy is a comprehensive process with the core objectives to reduce proteinuria, control blood pressure, protect renal function and prevent complications. It follows a stepwise process comprising induction of remission, maintenance therapy and complication management, with treatment regimens dynamically adjusted based on patient risk stratification, such as proteinuria level, renal function status and thrombotic risk. As no drugs have been approved by the NMPA for the treatment of membranous nephropathy, clinical treatment for membranous nephropathy is currently often administered off-label.

- Treatment during the induction remission phase is selected based on the level of proteinuria: mild to moderate proteinuria (<3g/d) is treated with glucocorticoid monotherapy; moderate to severe proteinuria (≥ 3 g/d) or those dependent on hormones are treated with combined immunosuppressants (such as hormones + cyclophosphamide/chlorambucil, calcineurin inhibitors tacrolimus/cyclosporine); and refractory cases are treated with rituximab (anti-CD20 monoclonal antibody) in combination with hormones.

INDUSTRY OVERVIEW

- During the maintenance treatment phase, low-toxicity agents (e.g., azathioprine, mycophenolate mofetil) are administered to consolidate remission and reduce the recurrence rate. Complication management focuses on three key aspects: thrombosis prevention, where low-molecular-weight heparin or warfarin is routinely prescribed for all high-risk patients; infection control, whose core measure is to avoid nephrotoxic drugs; and management of end-stage renal failure, where dialysis or kidney transplantation is indicated for eligible patients.
- The core treatment strategy is centered on immunosuppression, which targets autoimmune responses to reduce glomerular injury, supplemented by ACEI/ARB for proteinuria control, diuretics for edema management and anticoagulants for thrombosis prevention, along with supportive lifestyle adjustments including a low-salt diet, high-quality protein intake, smoking cessation and alcohol restriction.

The following diagram illustrates the treatment pathway for membranous nephropathy:

Treatment Pathway for Membranous Nephropathy

INDUSTRY OVERVIEW

Drivers and Development Trends of Membranous Nephropathy Drugs Market

- ***Increased Popularity and Application of Precision Diagnostic Technologies:*** The widespread use of specific biomarker detection such as anti-phospholipase A2 receptor (PLA2R) antibodies has significantly improved the diagnostic accuracy and detection rate of membranous nephropathy, which directly expands the potential population of patients eligible for drug treatment. Meanwhile, the precision monitoring system based on biomarkers enables physicians to more scientifically assess disease activity and further formulate standardized long-term treatment regimens. This trend of integrated diagnosis and treatment not only enhances patients’ treatment compliance but also provides a solid market foundation for the widespread penetration of innovative targeted drugs.
- ***Precision Intervention with Small-molecule Targeted Drugs:*** The research and development of small-molecule drugs for membranous nephropathy is at a critical stage of transformation from traditional non-specific immunosuppression to highly selective targeted intervention. The new generation of small-molecule inhibitors (e.g., BTK inhibitors, complement factor inhibitors), by precisely blocking B-cell receptor signaling or complement cascade reactions, not only significantly reduce the systemic toxic side effects of traditional therapies, but also effectively fill the treatment gap of biologics in refractory and highly recurrent cases, relying on their unique mechanism of penetrating cell membranes to act on intracellular targets and plasma cells. Meanwhile, the convenience of oral administration and superior pharmacoeconomic profiles of small-molecule drugs have greatly improved the compliance and accessibility of chronic disease management, establishing their core position in long-term maintenance therapy and differentiated market competition.
- ***Lack of Approved Indications and Demand for Compliance Driving the Acceleration of Clinical Deployment:*** no specific drugs have been approved for the indication of membranous nephropathy globally at present, and off-label drug use is commonly adopted in clinical practice. This market gap, combined with increasingly stringent compliance and regulatory requirements, has become the core driver for the development of the industry. Pharmaceutical companies that take the lead in completing registered clinical trials and obtaining indication approval will establish significant first-mover market advantages and pricing power. Therefore, filling the gap in approved indications has become a strategic priority for domestic and foreign pharmaceutical enterprises in their R&D investment and commercialization layout.

Unmet Clinical Needs for Membranous Nephropathy Treatment

- ***Lack of Approved Specific Drugs and Gap in Intervention against Pathological Mechanism:*** Currently no specific drugs have been approved for the indication of membranous nephropathy globally, and clinical treatment pathways mainly rely on off-label drug use. Current regimens mostly adopt non-specific supportive treatment with drugs such as angiotensin-converting enzyme inhibitors (ACEI) or angiotensin receptor blockers (ARB), which aim to alleviate clinical manifestations including

INDUSTRY OVERVIEW

proteinuria, hypertension and edema. These regimens fail to implement precision intervention targeting the core pathological mechanisms specific to membranous nephropathy, such as immune complex deposition and podocyte injury, and thus cannot fundamentally block disease progression.

- ***Poor Safety Profiles and Significant Risks of Toxic Side Effects Associated with Traditional Immunosuppressive Therapies:*** Immunosuppressive regimens used for moderate-to-high-risk patients (e.g., glucocorticoids combined with alkylating agents or calcineurin inhibitors) generally suffer from a narrow therapeutic window. Long-term or cumulative dosage often leads to systemic adverse reactions including myelosuppression, hepatorenal function impairment, severe secondary infections and glucose-lipid metabolism disorders. Clinics face a dilemma between pursuing disease remission and controlling drug toxicity, and the tolerance and compliance of patients with long-term medication have become a bottleneck in treatment.
- ***Unresolved Challenges of Refractoriness and High Recurrence Rate, with Risk of Progression to End-stage Disease:*** Membranous nephropathy exhibits highly heterogeneous clinical outcomes, where approximately 30%-40% of patients present with refractory characteristics and respond poorly to conventional treatment regimens. Even among the population that has achieved clinical remission, the disease recurrence rate remains persistently high. Existing pharmacological approaches have inherent limitations in maintaining long-term disease stability and effectively blocking disease progression to end-stage renal disease (ESRD). There is an urgent clinical need for next-generation treatment regimens that can overcome drug resistance mechanisms, significantly reduce recurrence risk and improve long-term renal survival rates.

Analysis of Mechanism and Advantages of JAK/ROCK Dual-Target Inhibitors

JAK/ROCK dual-target inhibitors exert therapeutic effects by intervening in the core pathological processes of membranous nephropathy through multiple dimensions. On the immune level, they can inhibit JAK kinase activity, block the JAK-STAT pathway mediated by pro-inflammatory factors such as IL-6 and IFN- γ , reduce the production of pathogenic autoantibodies including anti-phospholipase A2 receptor (PLA2R) antibodies, and alleviate glomerular immune complex deposition and complement activation. On the cytoprotective level, the inhibitors target and block the ROCK pathway, stabilize the actin cytoskeleton of glomerular podocytes, inhibit podocyte apoptosis and detachment, repair the glomerular filtration barrier, reduce proteinuria levels, and simultaneously suppress the activation of renal interstitial fibroblasts to delay the progression of glomerular fibrosis. The core advantage of this dual-target strategy lies in synergistic efficacy enhancement, which not only inhibits immune-inflammatory responses at the source but also directly protects intrinsic glomerular cells and exerts anti-fibrotic effects. Compared with single-target inhibitors, it more comprehensively covers the “immune injury-apoptosis-fibrosis” pathological chain of membranous nephropathy, mitigates the limitations of single-target treatment, and thus provides a superior therapeutic solution for membranous nephropathy.

OVERVIEW OF THE GLAUCOMA DRUG MARKET

Glaucoma is a group of degenerative eye diseases characterized primarily by pathological elevation of intraocular pressure (IOP) and progressive damage to the optic nerve. Its pathogenesis is associated with, among others, abnormalities in aqueous humor circulation and genetic susceptibility, and it predominantly affects middle-aged and elderly individuals. It can be categorized into three types: primary glaucoma (including open-angle and closed-angle), secondary glaucoma, and congenital glaucoma. Glaucoma often manifests as visual field defects and gradual loss of vision. The disease progression is insidious, with early symptoms easily overlooked. Without timely intervention, it can lead to vision loss or even permanent blindness. As one of the three leading causes of blindness globally, glaucoma exhibits a significant hereditary tendency, with individuals having a family history facing a higher risk of developing the disease.

The pathogenesis of glaucoma is complex, with pathological IOP elevation being the key driving factor, while also involving the synergistic action of multiple factors such as neuroinflammation, oxidative stress, genetic susceptibility, and vascular abnormalities. The core cause of IOP elevation is an imbalance in aqueous humor circulation. In primary open-angle glaucoma, the primary cause is dysfunction of the trabecular meshwork, leading to impaired aqueous outflow and a gradual rise in IOP. In primary closed-angle glaucoma, narrowing or closure of the anterior chamber angle blocks the aqueous outflow pathway, often

INDUSTRY OVERVIEW

accompanied by a sharp spike in IOP. Elevated IOP induces apoptosis of retinal ganglion cells through a dual mechanism: mechanical compression of the optic nerve head and interruption of axoplasmic flow, coupled with impairment of optic nerve microcirculation leading to ischemia.

Pathogenesis of Glaucoma

INDUSTRY OVERVIEW

Glaucoma Patient Population in China

The total number of glaucoma patients in China increased from 20.5 million in 2019 to 23.2 million in 2024, with a CAGR of 2.6% from 2019 to 2024. Due to the acceleration in population aging, and the widespread adoption of comprehensive eye examinations and diagnostics, the total number of glaucoma patients in China is expected to continue to rise, reaching approximately 25.6 million in 2028, with a projected CAGR of 2.5% from 2024 to 2028. By 2033, the number of glaucoma patients in China is projected to reach 28.8 million, with a projected CAGR of 2.4% from 2028 to 2033.

Number of Glaucoma Patients in China, 2019-2033E

Source: Literature reviews, Frost & Sullivan Analysis

Main Treatment Pathway of Glaucoma

The treatment for glaucoma aims to maintain and preserve patients’ visual function in the long run. Focused on intraocular pressure (IOP) control, the treatment takes a tiered strategy, and delivers individualized interventions through a combination of topical medications, laser therapy and surgical treatment.

- First-line therapy is the application of topical IOP-lowering eye drops. These medications lower IOP via three primary mechanisms: increasing aqueous humor outflow, inhibiting aqueous humor production, and reducing intraocular volume. Common drugs include miotics, prostaglandin analogues, beta-adrenergic blockers, alpha-2 adrenergic agonists, carbonic anhydrase inhibitors and hyperosmotic agents. Selection and combination of these drugs are individualized based on glaucoma subtype, IOP level, patient tolerance and compliance, and serve as the cornerstone of long-term glaucoma management.

INDUSTRY OVERVIEW

- If pharmacological therapy fails to achieve adequate IOP control, laser therapy may be adopted as an adjunct. For instance, selective laser trabeculoplasty (SLT) is indicated for primary open-angle glaucoma (POAG). It further reduces IOP by improving aqueous humor drainage, and can be used as an initial treatment or as a supplementary option when pharmacological therapy or post-surgical outcomes fail to meet the target IOP.
- When neither pharmacological nor laser therapy can achieve the desired IOP, or in cases of patient intolerance, surgical intervention is required. Surgical procedures include those designed to relieve pupillary block, reduce trabecular meshwork resistance, establish alternative aqueous humor outflow pathways, and decrease aqueous humor production, as well as combined glaucoma and cataract surgery. These procedures enhance IOP control by targeting distinct pathological mechanisms, ultimately achieving the individualized target IOP and slowing the progression of optic nerve damage.

The following diagram illustrates the treatment pathway of glaucoma:

Treatment Pathway of Glaucoma

*Note: POAG = Primary Open-Angle Glaucoma; PACG = Primary Angle-Closure Glaucoma; NVG = Neovascular Glaucoma; PRP = Panretinal Photocoagulation; IOP=Topical intraocular pressure

INDUSTRY OVERVIEW

Unmet Clinical Needs for Glaucoma Treatment

- ***Low Early Diagnosis Rates and Inadequate Screening Mechanisms:*** Glaucoma typically presents no obvious self-perceived symptoms in its early stages. The current public health system lacks systematic ophthalmic screening mechanisms and accessible professional detection capabilities at the primary care level. Consequently, most patients are identified only after irreversible visual function damage has occurred, significantly delaying intervention opportunities. Despite the large and continuously growing high-risk population for glaucoma, early detection rates remain low due to insufficient screening tools, leading to miss of the optimal treatment window. This issue is particularly pronounced in rural and remote areas where ophthalmic medical resources are severely lacking, further hindering screening and early diagnosis efforts. This leaves a large number of patients unable to receive timely and effective intervention, significantly increasing the disease burden.
- ***Significant Limitations in Existing Treatments:*** Current pharmacological, laser, and surgical therapies primarily target IOP reduction and cannot reverse optic nerve damage. Some patients are intolerant to or show insufficient response to existing drugs, creating an urgent need for novel neuroprotective or targeted mechanism-based therapies. While IOP-reduction treatments can effectively slow disease progression, current therapies fail to effectively address the repair of damaged optic nerves. Innovative drugs and treatment regimens are urgently needed to combat long-term vision loss and neurodegenerative progression in glaucoma patients. Limitations of existing treatments are also evident in the lack of personalized therapy. Variations in IOP control, drug tolerance, and individual disease progression among patients are not fully considered. Therefore, breakthroughs in targeted and neuroprotective treatments are imperative to reduce vision loss and improve patients’ quality of life.
- ***Insufficient Long-term Patient Compliance and Lack of Personalized Treatment Pathways:*** Glaucoma requires lifelong medication and regular follow-ups. However, patients often discontinue treatment due to high dosing frequency, local discomfort, and other side effects. Coupled with the lack of effective monitoring and response mechanisms for dynamic changes in the condition, current diagnosis and treatment models struggle to achieve precise, individualized treatment adjustments. Poor medication adherence and difficulties in regular follow-up make long-term management of glaucoma patients a challenging task. Personalized treatment plans are in urgent need of optimization through novel digital monitoring tools and intelligent management systems. Furthermore, existing treatment plans often fail to consider patients’ lifestyles and drug tolerance in an adequate manner. The absence of individualized treatment pathways significantly diminishes clinical effectiveness, increasing the treatment burden and risk of blindness for patients.

INDUSTRY OVERVIEW

Drivers and Development Trends in the Glaucoma Drug Market

- ***Upgraded Treatment Demand Driven by Increasing Disease Burden:*** As the leading cause of irreversible blindness globally, glaucoma has a vast patient base in China, which continues to grow with population aging. Rising public awareness of vision protection and expanded medical insurance coverage jointly drive the demand for standardized, long-term treatment of glaucoma. As population aging accelerates in China, the number of glaucoma patients continuous to grow, leading to a progressively heavier disease burden. Additionally, policy support and increased public awareness of eye disease prevention and treatment have further stimulated the glaucoma treatment market’s demand for effective long-term management solutions.
- ***Treatment Strategy Evolution from IOP Reduction to Multi-mechanism Collaborative Intervention:*** Research and development focus is gradually extending to neuroprotection, precision medicine, novel targets, and advanced drug delivery systems, with the aim of delaying neurodegenerative progression from the root causes, reducing the risk of blindness, and improving patients’ long-term quality of life. The existing therapies are primarily centered on IOP control. However, with a deeper understanding of glaucoma pathology, research focus has been turned to drugs and therapies targeting optic nerve damage. Concurrently, the continuous development of precision medicine, particularly the application of genomics and biomarkers, is expected to drive the implementation of personalized treatment plans, enhancing therapeutic efficacy and reducing adverse effects.
- ***Integration of Digital and Precision Diagnosis and Treatment Technologies:*** The application of digital technologies such as artificial intelligence, big data, and high-resolution imaging in early glaucoma screening, disease progression monitoring, and personalized treatment optimization is expected to accelerate, improving diagnosis and treatment efficiency as well as therapeutic outcomes. Artificial intelligence can assist doctors in earlier identification of glaucoma risks through data analysis and image processing. Furthermore, individualized disease progression monitoring can provide patients with real-time treatment feedback and adjustment plans. The integration of digital technologies can also improve patient compliance, reduce errors during treatment, thereby enabling more precise disease control.

Competitive Landscape of Glaucoma Drugs

As of the Latest Practicable Date, six drugs had been approved by the NMPA in China for the treatment of glaucoma. Concurrently, there are six drug candidates for glaucoma in clinical stages, with two in Phase III clinical stages, two in Phase II clinical stages, and two in Phase I clinical stages.

INDUSTRY OVERVIEW

Source of Industry Information

In connection with this [REDACTED], we have engaged Frost & Sullivan to conduct a detailed analysis of our market and prepare an industry report. Frost & Sullivan, founded in 1961 and based in the United States, is an independent global market research and consulting firm. The company provides services including market assessment, competitive landscape analysis, and strategic and market planning for multiple industries. We have included excerpts from the Frost & Sullivan Report in this Document as we believe such information will assist potential [REDACTED] in understanding our market environment.

The Frost & Sullivan Report was prepared by Frost & Sullivan based on its internal databases, independent third party reports, and publicly available information from authoritative industry organizations. Frost & Sullivan believes that the fundamental assumptions (including those used for future forecasts) adopted in preparing the Frost & Sullivan Report are factual, accurate, and not misleading. We have agreed to pay Frost & Sullivan a fee of RMB580,000 for preparing the Frost & Sullivan Report. This payment is not conditional upon the success of our [REDACTED] or the contents of the Frost & Sullivan Report.

Other than the Frost & Sullivan Report, we have not commissioned any other industry report in connection with this [REDACTED]. Our Directors confirm that, upon reasonable and prudent care, there have been no material adverse changes in the overall market information since the date of the Frost & Sullivan Report that would materially qualify, contradict or affect such information.

REGULATORY OVERVIEW

OVERVIEW OF LAWS AND REGULATIONS IN THE PRC

We are subject to a variety of PRC laws, rules and regulations affecting many aspects of our business. This section summarizes the major PRC regulatory authorities and PRC laws and regulations that we believe are relevant to our business and operations in the PRC.

REGULATIONS ON FOREIGN INVESTMENT

Investment activities in the PRC by foreign investors are principally governed by the *Catalog of Encouraged Industries for Foreign Investment (2022 version)* (《鼓勵外商投資產業目錄》(2022年版)) (the “**Encouraged Catalog**”), and the *Special Administrative Measures (Negative List) for Foreign Investment Access (2024 version)* (《外商投資准入特別管理措施(負面清單)》(2024年版)) (the “**2024 Negative List**”), which are promulgated and amended from time to time by the Ministry of Commerce of the PRC (中華人民共和國商務部) (the “**MOFCOM**”) and the National Development and Reform Commission (中華人民共和國國家發展和改革委員會) (the “**NDRC**”), and together with the Foreign Investment Law of PRC (《中華人民共和國外商投資法》) (the “**FIL**”) and its respective implementation rules and ancillary regulations.

In March 2019, the FIL was promulgated by National People’s Congress (中華人民共和國全國人民代表大會) (the “**NPC**”) and came into effect on January 1, 2020, which replaced three then existing laws on foreign investments in China, namely, the *Sino-Foreign Equity Joint Venture Enterprise Law of PRC* (《中華人民共和國中外合資經營企業法》), the *Sino-Foreign Cooperative Joint Venture Enterprise Law of PRC* (《中華人民共和國中外合作經營企業法》) and the *Wholly Foreign-owned Enterprise Law of PRC* (《中華人民共和國外資企業法》). The FIL, by means of legislation, establishes the basic framework for the access, promotion, protection and administration of foreign investment in view of investment protection and fair competition. According to the FIL, foreign investment shall enjoy pre-entry national treatment, except for those foreign invested entities that operate in industries deemed to be either “restricted” or “prohibited” in the 2024 Negative List, and the State Council (中華人民共和國國務院) shall promulgate or approve a list of special administrative measures for access of foreign investments. To ensure the effective implementation of the FIL, the *Regulations on Implementing the Foreign Investment Law of the PRC* (《中華人民共和國外商投資法實施條例》), was promulgated by State Council in December 2019 and came into effect on January 1, 2020, which further clarified that the state encourages and promotes foreign investment, protects the lawful rights and interests of foreign investors, regulates foreign investment administration, continues to optimize foreign investment environment, and advances a higher-level opening.

In December 2019, the MOFCOM and the State Administration for Market Regulation (國家市場監督管理總局) (the “**SAMR**”) promulgated the *Measures on Reporting of Foreign Investment Information* (《外商投資信息報告辦法》), which came into effect on January 1, 2020. After the *Measures on Reporting of Foreign Investment Information* came into effect, the *Interim Measures for the Administration of Filing for Establishment and Changes in Foreign Investment Enterprises* (《外商投資企業設立及變更備案管理暫行辦法》) have been repealed

REGULATORY OVERVIEW

simultaneously. Since January 1, 2020, for foreign investors carrying out investment activities directly or indirectly in China, the foreign investors or foreign-invested enterprises shall submit investment information to the relevant commerce administrative authorities according to the *Measures on Reporting of Foreign Investment Information*.

According to the *Measures for the Security Review of Foreign Investment* (《外商投資安全審查辦法》) promulgated by the NDRC and the MOFCOM on December 19, 2020 and became effective on January 18, 2021, any foreign investment that has or may have an impact on national security shall be subject to security review in accordance with the provisions hereof. A foreign investor or a party concerned in China shall take the initiative to make a declaration to the working mechanism office prior to making the investment in any important infrastructure, important transportation services and other important fields that concern national security while obtaining the actual control over the enterprises invested in.

REGULATIONS ON PHARMACEUTICAL PRODUCT

The pharmaceutical manufacturing industry in the PRC is primarily subject to regulatory oversight by the following departments under the State Council, namely, the National Medical Products Administration of the PRC (中華人民共和國國家藥品監督管理局) (the “NMPA”, formerly the China Food and Drug Administration (國家食品藥品監督管理總局) (the “CFDA”)), the National Healthcare Security Administration of the PRC (中華人民共和國國家醫療保障局), the National Health Commission of the PRC (中華人民共和國國家衛生健康委員會) (the “NHC”), the NDRC, the Ministry of Industry and Information Technology of the PRC (中華人民共和國工業和信息化部), the Ministry of Human Resources and Social Security of the PRC (中華人民共和國人力資源和社會保障部), and the Ministry of Ecology and Environment of the PRC (中華人民共和國生態環境部).

Drug Regulatory Regime

The *Drug Administration Law of the PRC* (《中華人民共和國藥品管理法》) (the “**Drug Administration Law**”) was promulgated by the Standing Committee of the NPC (全國人民代表大會常務委員會) (the “SCNPC”), in September 1984, last amended on August 26, 2019 and became effective on December 1, 2019. The *Implementation Regulations of the Drug Administration Law of the PRC* (《中華人民共和國藥品管理法實施條例》) (the “**Implementation Regulations**”) was promulgated by the State Council in August 2002, and was last amended in December 2024, and became effective on January 20, 2025. The *Drug Administration Law* and the *Implementation Regulations* have jointly established the legal framework for the administration of pharmaceutical products in the PRC, including the research, development and manufacturing of drugs. The *Drug Administration Law* applies to entities and individuals engaged in the development, production, trade, application, supervision and administration of pharmaceutical products, which regulates and provides for a framework for the administration of pharmaceutical manufacturers, pharmaceutical trading companies and medicinal preparations of medical institutions, and the development, research,

REGULATORY OVERVIEW

manufacturing, distribution, packaging, pricing and advertisements of pharmaceutical products. The Implementation Regulations, at the same time, provides the detailed implementation regulations on the Drug Administration Law.

In 2017, the drug regulatory system entered a new and significant period of reform. The General Office of the State Council (中華人民共和國國務院辦公廳) and the General Committee of the Communist Party of China (中國共產黨中央委員會) jointly issued an *Opinions on Deepening the Reform of the Evaluation and Approval Systems and Encouraging Innovation on Drugs and Medical Devices* (《關於深化審評審批制度改革鼓勵藥品醫療器械創新的意見》) (the “**Innovation Opinions**”) in October 2017. According to the Innovation Opinions, institutions for drug clinical trials should establish an independent ethics committee and the clinical trial schemes are subject to examination, approval and signing with approval opinions by the ethics committee before implementation, in order to protect the rights and interests of human subjects in clinical trials. For a multi-center clinical trial conducted in the PRC, after ethical review by the leader unit of clinical trial, other member units should recognize the review results of the leader unit and may not conduct repeated review. In addition, the expedited programs, the record-filing system, the prioritized review mechanism, the acceptance of foreign clinical data under the Innovation Opinions and other recent reforms encourage drug marketing authorization holders to seek marketing approval in China first for the development of drugs in highly prioritized therapeutic areas such as oncology or rare disease areas.

To implement the regulatory reform introduced by Innovation Opinions, the SCNPC and the NMPA, as well as other authorities, are currently responsible for revising the laws, regulations and rules regulating the pharmaceutical products and the industry.

Application for Clinical Trial

According to the *Decision on Adjusting the Approval Procedures of Certain Administrative Approval Items for Drugs* (《關於調整部分藥品行政審批事項審批程序的決定》) promulgated by the CFDA on March 17, 2017, the decision on the approval of clinical trials of drugs shall be made by the Center for Drug Evaluation (國家藥品監督管理局藥品審評中心) (the “**CDE**”) from May 1, 2017. According to the *Administrative Measures for Drug Registration* (《藥品註冊管理辦法》) (the “**Registration Measures**”), which was promulgated on January 22, 2020 and took effect on July 1, 2020, drug clinical trials shall be divided into Phase I clinical trial, Phase II clinical trial, Phase III clinical trial, Phase IV clinical trial, and bioequivalence trial. After the completion of the pharmaceutical, pharmacological and toxicological research of the drug clinical trial, the applicant may submit relevant research materials to the CDE for applying for the approval to conduct drug clinical trial. The CDE will organize pharmaceutical, medical and other technicians to review the application and to decide whether to approve the drug clinical trial within 60 days of the date of acceptance of the application. Once the decision is made, the result will be notified to the applicant through the website of the CDE and if no notice of decision is issued within the aforementioned time limit, the application of clinical trial shall be deemed as approval. In accordance with Registration Measures and the *Announcement on Adjusting Evaluation and Approval Procedures for*

REGULATORY OVERVIEW

Clinical Trials for Drugs (《關於調整藥物臨床試驗審評審批程序的公告》) issued in July 2018, if a clinical trial applicant does not receive any negative or questioned opinions from the CDE within 60 days after the date when the trial application is accepted and the fees are paid, the applicant can proceed with the clinical trial in accordance with the trial protocol submitted to the CDE.

The Registration Measures further requires that the applicant shall, prior to conducting the drug clinical trial, register the information of the drug clinical trial plan, etc. on the Drug Clinical Trial Information Platform. After obtaining the approval of clinical trial, the applicant must complete the clinical trial registration at the Drug Clinical Trial Information Platform for public disclosure in accordance with the *Circular on Drug Clinical Trial Information Platform* (《關於藥物臨床試驗信息平台的公告》), which came into effect on September 6, 2013, and the *Standard for the Management of Drug Clinical Trial Registration and Information Disclosure (Trial)* (藥物臨床試驗登記與信息公示管理規範(試行)), which came into effect on July 1, 2020. The applicant shall complete the trial pre-registration within one month after obtaining the approval of the clinical trial application in order to obtain the trial’s unique registration number and complete registration of certain follow-up information before the first subject’s enrollment in the trial. If the registration is not completed within one year after the approval, the applicant shall submit an explanation, and if the first submission is not completed within three years, the approval of the clinical trial application shall automatically expire. During the drug clinical trials, the applicant shall update registration information continuously, and register information of the outcome of the drug clinical trial upon completion.

Accelerated Approval for Clinical Trial and Registration

The *Opinions on the Reform of Evaluation and Approval System for Drugs and Medical Devices* (《關於改革藥品醫療器械審評審批制度的意見》) issued by the State Council in August, 2015, established a reform framework of the evaluation and approval system for drugs and medical devices, and indicated the tasks of enhancing the standards of approval for drug registration, accelerating the evaluation and approval process for innovative drugs, and improving the approval for clinical trials of drugs, etc.

The CFDA released the *Circular Concerning Several Policies on Drug Registration Review and Approval* (《關於藥品註冊審評審批若干政策的公告》) in November 2015, which clarified the measures and policies regarding simplifying and accelerating the approval process of clinical trials, including but not limited to a one-time approval procedure allowing the overall approval of all phases of a drug’s clinical trials, replacing the phase-by-phase application and approval.

The Innovation Opinions established a framework for reforming the evaluation and approval system for drugs, medical devices and equipment. The Innovation Opinions indicated enhancing the standard of approval for drug marketing registration and accelerating the evaluation and approval process for innovative drugs as well as improving the approval of drug clinical trials.

REGULATORY OVERVIEW

According to the *Announcement on Matters Concerning the Optimization of Drug Registration Review and Approval* (《關於優化藥品註冊審評審批有關事宜的公告》) jointly issued by the NMPA and the NHC in May 2018, the CDE will prioritize the allocation of resources for review, inspection, examination and approval of registration applications that have been included in the scope of fast track clinical trial approval.

In July 2020, the NMPA issued the *Review and Approval Procedures for Conditional Approval of Drug Marketing Applications (Trial Implementation)* (《藥品附條件批准上市申請審評審批工作程序(試行)》), pursuant to which and the Registration Measures, an applicant may submit, during the stage of clinical trials, an application for conditional approval, for pharmaceuticals which fall under the following circumstances: (i) drugs for treatment of life-threatening illnesses for which there is no effective treatment, whose clinical trial has data to prove efficacy and to forecast the clinical value thereof; (ii) drugs urgently needed for public health, whose clinical trial has data to prove efficacy and to forecast the clinical value thereof; and (iii) other vaccines urgently needed for major public health emergencies or deemed by the NHC to be urgently needed, which has been concluded upon evaluation that the benefits outweigh the risks. For applications for conditional approval, the applicant shall communicate with the CDE on the conditional approval criteria for marketing and the post-marketing research work to be continued and completed, and apply for drug marketing authorization upon communication and confirmation. If it is concluded that the conditional approval requirements are complied with, the drug registration certificate shall state the validity period of the drug registration with conditional approval, the post-marketing research work to be continued and completed and the deadline to complete such work, etc. For the drug which is granted with conditional approval, the holder shall adopt the appropriate risk management measures following marketing of the drug, and complete the drug clinical trial and relevant post-marketing research within the stipulated period, and declare so to the CDE via a supplementary application.

In July 2020, NMPA issued the *Evaluation and Approval Procedures for Breakthrough Therapeutic Drugs (Trial)* (《突破性治療藥物審評工作程序(試行)》), the *Evaluation and Approval Procedures for Conditionally Approved Drugs (Trial)* (《藥品附條件批准上市申請審評審批工作程序(試行)》) and the *Priority Review and Approval Procedures for Drug Marketing Authorizations (Trial)* (《藥品上市許可優先審評審批工作程序(試行)》), at the time of application for drug marketing authorization, the following drugs which have obvious clinical value may apply for prioritized review and approval procedures: (i) clinically and urgently needed but insufficient drugs, innovative drugs and improved new drugs for prevention and treatment of major contagious diseases and rare diseases; (ii) new pediatric use pharmaceutical products, dosage form and specifications which comply with pediatric physiological characteristics; (iii) vaccines and innovative vaccines urgently needed for prevention and control of diseases; (iv) drugs included in the procedures for breakthrough therapy designation; (v) drugs which comply with conditional approval criteria; and (vi) other circumstances entitled to prioritized review as stipulated by the NMPA. Upon communication and confirmation with the CDE, when the applicant submits the application for drug marketing authorization, the applicant shall simultaneously submit an application for prioritized review and approval. If an application satisfies one of the foregoing criteria, the CDE shall announce

REGULATORY OVERVIEW

so and admit the application in the prioritized review and approval procedures. The following policy support shall be granted to an application for drug marketing authorization admitted in the prioritized review and approval procedures: (i) the review period shall be limited to no more than 130 days; (ii) for clinically and urgently needed imported drugs for rare diseases which are not yet marketed in the PRC, the review period shall be limited to no more than 70 days; (iii) priority shall be granted to examination, inspection and approval of the commonly used name of drugs (if applicable); and (iv) upon communication and confirmation, supplementary supporting materials may be required.

In July 2024, the State Council executive meeting considered and passed the *Implementation Plan for Supporting Innovative Drug Development Across the Whole Chain* (《全鏈條支持創新藥發展實施方案》), which requires strengthening the policy guarantee in the whole chain, coordinating the use of policies on price management, payment of medical insurance, commercial insurance, drug dispensing and use, investment and financing, etc., optimizing the review and approval and the assessment mechanism of medical institutions, and jointly boosting the breakthrough development of innovative drugs.

Conduct of Clinical Trial

After obtaining clinical trial approval, the applicant shall conduct clinical trials at qualified clinical trial institutions. The qualified clinical trial institution refers to institutions that have the conditions to conduct clinical trials in accordance with the requirements and technical guidelines set forth in the *Regulations for the Administration of Drug Clinical Trial Institutions* (《藥物臨床試驗機構管理規定》), which came into effect on December 1, 2019. Such clinical trial institutions shall be subject to filing requirements, with the exception of institutions that only engage in analysis of biological samples which shall not be subject to such filing requirements. The NMPA is responsible for setting up a filing management information platform for the registration, filing and operation management of drug clinical trial institutions, as well as the entry, sharing and disclosure of information from the supervision and inspection activities conducted by the drug regulatory authorities and competent healthcare authorities.

The applicant filing an application for clinical drug trial after completing the pharmaceutical research, pharmacological and toxicological research, and other researches supporting clinical drug trial shall submit relevant research materials according to the requirements for the application materials. The applicant who intends to carry out a bioequivalence test shall, after undergoing the recordation formalities for bioequivalence test at the website of the CDE as required, carry out relevant research work according to the plan recorded. The applicant who is approved to carry out clinical drug trial shall, before carrying out subsequent clinical drug trial by stages, develop corresponding plan for clinical drug trial, carry out clinical drug trial upon examination and with consent of the ethics committee, and submit corresponding plan for clinical drug trial and supporting materials on the website of the Center for Drug Evaluation. Where indications (or functions) are intended to be added for a

REGULATORY OVERVIEW

drug approved for clinical drug trial and the use of a drug in combination with other drugs is added, the applicant shall file a new application for clinical drug trial, and may only carry out new clinical drug trial with approval.

The *Announcement on Issuing the Guidelines for General Considerations for Clinical Trials on Drugs* (《關於發佈藥物臨床試驗的一般考慮指導原則的通告》) promulgated by the NMPA in January 2017 provides technical guidelines for applicants and investigators in formulating overall research and development plan of drugs and separate clinical trial and provides references for evaluation of the technical standards of the drugs.

According to the *Announcement on Adjusting Evaluation and Approval Procedures for Clinical Trials for Drugs* (《關於調整藥物臨床試驗審評審批程序的公告》), where the application for clinical trial of new investigational drug has been approved, upon the completion of Phase I and Phase II clinical trials and prior to Phase III clinical trial, the applicant shall submit the application for communication meetings to the CDE to discuss with the CDE the key technical questions including the design of the Phase III clinical trial protocol. According to the *Administrative Measures for Communication on the Research, Development and Technical Evaluation of Drugs* (《藥物研發與技術審評溝通交流管理辦法》), revised by the NMPA on December 10, 2020, during the research and development periods and in the registration applications of, among others, the innovative new drugs, the applicants may propose to conduct communication meetings with the CDE. The communication meetings can be classified into three types. Type I meetings are convened to address key safety issues in clinical trials of drugs and key technical issues in the research and development of breakthrough therapeutic drugs. Type II meetings are held during the key research and development stages of drugs, mainly including meetings before submitting the clinical trial application, meetings upon the completion of Phase II trials and prior to the Phase III trials, meetings before submitting the marketing application for a new drug, and meetings for risk evaluation and control. Type III meetings refer to other meetings not classified as Type I or Type II.

Multi-Regional Clinical Trials and Acceptance of Overseas Clinical Trial Data

On January 30, 2015, the CFDA promulgated the *Multi-Regional Clinical Trial Guidelines (Trial)* (《國際多中心藥物臨床試驗指南(試行)》) (the “**MRCT Guidelines**”), which took effect on March 1, 2015, to provide guidance for the regulation of application, implementation and administration of international multi-center clinical trials in China. Pursuant to the MRCT Guidelines, international multi-center clinical trial applicants may simultaneously perform clinical trials in different centers using the same clinical trial protocol. Where the applicant plans to make use of the data derived from the international multi-center clinical trials for application for approval of new drug registration, such international multi-center clinical trials shall satisfy the requirements set forth in the Drug Administration Law and its implementation regulations and relevant laws and regulations.

REGULATORY OVERVIEW

On October 8, 2017, the General Office of the CPC Central Committee and the General Office of the State Council jointly issued the *Opinion on Strengthening the Reform of the Drug and Medical Device Review and Approval Process to Encourage Drug and Medical Device Innovation* (《關於深化審評審批制度改革鼓勵藥品醫療器械創新的意見》) which stipulates that overseas clinical trial results are acceptable in China. Data derived from overseas clinical trials can be used in application for registration of drugs and medical devices if the data satisfy the registration requirement for drugs and medical devices in China. For initial application for marketing of pharmaceutical products and medical devices in China, the applicants are required to provide clinical trial data to indicate whether there will be difference of trial results among different ethnic groups.

On July 6, 2018, the NMPA issued the *Technical Guiding Principles for the Acceptance of the Overseas Clinical Trial Data of Drugs* (《接受藥品境外臨床試驗數據的技術指導原則》) (the “**Guiding Principles**”), which provides that overseas clinical data can be submitted for all kinds of registration applications in China, including the clinical trial authorization and new drug registration. The Guiding Principles clearly list the basic principles and requirements on the acceptance of overseas clinical trial data, and distinguish different levels of acceptance based on the quality of the data itself and different circumstances. The Guiding Principles require that the applicant shall ensure that the overseas clinical trial data are truthful, complete, accurate and traceable, and the generating process of the overseas clinical trial data shall comply with the relevant requirements of the Good Clinical Practice (臨床試驗質量管理規範) provided by the *International Conference on Harmonization of Technical Requirements for the Registration of Pharmaceuticals for Human Use* (人用藥品註冊技術國際協調會議).

Good Clinical Practices

Clinical trials must be conducted in accordance with the *Good Clinical Practice for Drug Trials* (《藥物臨床試驗質量管理規範》) (the “**GCP Rules**”) promulgated by NMPA and NHC on April 23, 2020 and became effective on July 1, 2020, which stipulates the requirements for the procedures of conducting clinical trials, including pre-clinical trial preparation, trial protocols, protection of testees’ rights and interests, duties of researchers, sponsors and monitors, as well as data management and statistical analysis. According to the GCP Rules, clinical trial means systematical investigation of drugs conducted on human subjects (patients or healthy volunteers) to prove or reveal the clinical, pharmacological and other pharmacodynamic effects, adverse reactions or absorption, distribution, metabolism and excretion of the drug being investigated. In order to ensure the quality of clinical trials and the safety of human subjects, the GCP Rules provides comprehensive and substantive requirements on the design and conduct of clinical trials in the PRC. In particular, the GCP Rules enhances the protection for study subjects and tightens the control over bio-samples collected under clinical trials.

REGULATORY OVERVIEW

The GCP Rules stipulated that the sponsor shall bear the expenses for medical treatment and the corresponding compensation for any human subject who is harmed or dies due to reasons connected with the clinical trial. The sponsor and investigator shall pay the human subject the compensation or indemnification in a timely manner. However, the GCP Rules promulgated in 2020 abolishes the compulsory insurance the sponsor provides to human subjects participating in a clinical trial compared with the GCP Rules promulgated in 2003.

The GCP Rules also set out the qualifications and requirements for the investigators and centers participating in clinical trial, including: (i) professional certification at a clinical trial center, professional knowledge, training experience and capability of clinical trial, and being able to provide the latest resume and relevant qualification documents per request; (ii) being familiar with the trial protocol, investigator’s brochure and relevant information of the trial drug provided by the applicant; (iii) being familiar with and comply with the Revised GCP Rules and relevant laws and regulations relating to clinical trials; (iv) keeping a copy of the authorization form on work allocation signed by investigators; (v) investigators and clinical trial centers shall accept supervision and inspection organized by the applicant and inspection by the drug regulatory authorities; and (vi) in the case of investigators and clinical trial centers authorizing other individual or institution to undertake certain responsibilities and functions relating to clinical trial, they shall ensure such individual or institution are qualified and establish complete procedures to ensure the responsibilities and functions are fully performed and generate reliable data.

The GCP Rules also summarizes the role of ethic committee in clinical trial process. An ethic committee shall consist of experts working in the medical, pharmaceutical and other fields. The clinical trial protocol may not be executed unless approved by the ethic committee. Pursuant to the *Announcement on Issuing the Guidelines for Ethical Review Work of Drug Clinical Trials* (《關於印發藥物臨床試驗倫理審查工作指導原則的通知》) promulgated by CFDA in November 2010, the ethics committee shall carry out a review on the project of clinical trial on the drug to decide if it is rational in terms of science and ethics, and shall be subject to guidance and supervision under the drug supervisory and administrative departments. The Regulations for the Administration of Drug Clinical Trial Institutions also stipulates that each clinical trial institution shall maintain an ethic committee responsible for the ethical review of drug clinical trial.

Non-clinical Research

The non-clinical safety evaluation study for drugs for the purpose of applying for drug registration shall be conducted in accordance with the *Administrative Measures for Good Laboratories Practice* (《藥物非臨床研究質量管理規範》), which was promulgated in August 2003 and amended in July 2017 by the CFDA. In April 2007, the CFDA issued the *Regulations on the Certification Management of Good Laboratory Practice* (《藥物非臨床研究質量管理規範認證管理辦法》), last amended on January 19, 2023 and took effect on July 1, 2023, which set forth the requirements for an institution to apply for a Certification of Good Laboratory Practice to undertake non-clinical research on drugs.

REGULATORY OVERVIEW

According to the *Regulations for the Administration of Affairs Concerning Experimental Animals* (《實驗動物管理條例》) promulgated by the former State Science and Technology Commission (國家科學技術委員會) in November 1988 and lastly amended in March 2017 by the State Council, the *Administration Measures on Good Practice of Experimental Animals* (《實驗動物質量管理辦法》) jointly promulgated by the former State Science and Technology Commission and the former State Bureau of Quality and Technical Supervision (國家質量技術監督局) in December 1997, and the *Administrative Measures on the Certificate for Experimental Animals (Trial)* (《實驗動物許可證管理辦法(試行)》) promulgated by the Ministry of Science and Technology of the PRC (中華人民共和國科學技術部) (the “MST”) and other regulatory authorities in December 2001 and came into effect in January 2002, using experimental animals and related products requires a Certificate for Utilization of Laboratory Animals. A Certificate for Utilization of Laboratory Animals shall be valid for five years, and the holder shall apply for renewal six months prior to the expiry of the validity period. A Certificate for Utilization of Laboratory Animals shall be inspected annually by the local Science and Technology Bureau.

New Drug Registration

Pursuant to the Registration Measures, upon completion of clinical trials, determination of quality standards, completion of validation of commercial-scale production processes and completion of other related preparation works, the applicant may apply with the NMPA for the marketing authorization. The NMPA then determines whether to approve the application according to applicable laws and regulations. The applicant must obtain the marketing authorization for a new drug before the drug can be manufactured and sold in the China market.

Marketing Authorization Holder Mechanism

Pursuant to the Drug Administration Law, the PRC implements the marketing authorization holder mechanism for management of the drug industry. The drug marketing authorization holder refers to an enterprise or a drug research and development institution that has obtained the drug registration certificate. The drug marketing authorization holder shall be responsible for non-clinical research, clinical trials, production and operation, post-marketing research, adverse reaction monitoring, reporting and processing of drugs in accordance with the provisions of the law.

The marketing authorization holders may manufacture drugs by themselves or entrust a pharmaceutical manufacturing enterprise to manufacture drugs. Likewise, they may sell drugs by themselves or entrust a pharmaceutical distribution enterprise to sell drugs. However, marketing authorization holders may not entrust a pharmaceutical manufacturing enterprise to produce blood products, narcotic drugs, psychotropic drugs, medical-use toxic drugs or pharmaceutical precursor chemicals for drug production, except as otherwise stipulated by the drug regulatory department under the State Council.

REGULATORY OVERVIEW

The drug marketing authorization holder shall establish a drug quality assurance system and be equipped with special personnel to take charge of quality management on drugs independently. The drug marketing authorization holder shall regularly review the quality management system of the drug manufacturer and the drug distributor, and supervise its continuous quality assurance and control capabilities. Where the marketing authorization holder is an overseas enterprise, its designated domestic enterprise shall perform the obligations of the marketing authorization holder and jointly assume responsibilities of the marketing authorization holder with the overseas enterprise.

Pharmacovigilance

Pursuant to the *Pharmacovigilance Quality Control Specifications* (《藥物警戒質量管理規範》) issued by the NMPA on May 7, 2021, and implemented from December 1, 2021, drug marketing authorization holders and drug registration applicants who are permitted to implement drug clinical trials shall establish the pharmacovigilance system to monitor, identify, evaluate and control adverse drug reactions and other drug-related harmful reactions through the effective operation and maintenance of the system. The drug marketing authorization holders shall initiate quality objectives for pharmacovigilance and establish quality assurance system for quality management on pharmacovigilance system and activities with an aim to consistently improve the efficiency of the system and ensure the compliance of the activities with the relevant laws and regulations. The legal representative and the key person-in-charge of a drug marketing authorization holder shall be fully responsible for the pharmacovigilance activities. The drug marketing authorization holders shall complete the information registration in the National Adverse Drug Reaction Monitoring System within 30 days upon the date of obtaining the first drug approval document.

Approval or Filing of Human Genetic Resources

The MST promulgated the *Service Guide for Administrative Licensing Items concerning Examination and Approval of Sampling, Collecting, Trading or Exporting Human Genetic Resources, or Taking Such Resources out of the PRC* (《人類遺傳資源採集、收集、買賣、出口、出境審批行政許可事項服務指南》) in July 2015, according to which, the sampling, collection or research activities of human genetic resources by a foreign-invested sponsor fall within the scope of international cooperation, and the cooperating organization of China shall apply for approval of the Human Genetic Resources Management Office of the PRC through the online system. The MST and the Human Genetic Resources Management Office of the PRC further respectively promulgated the *Circular on Further Optimizing the Administrative Examination and Approval of Human Genetic Resources* (《關於進一步優化人類遺傳資源行政審批流程的通知》) in October 2020, which simplify the approval of sampling and collecting human genetic resources for the purpose of listing a drug in the PRC.

REGULATORY OVERVIEW

The *Regulations on the Administration of Human Genetic Resources of the PRC* (《中華人民共和國人類遺傳資源管理條例》), promulgated by the State Council in May 2019, latest amended in March 2024 and came into effect on May 1, 2024, further stipulates that in order to obtain marketing authorization for relevant drugs and medical devices in China, no approval is required in international clinical trial cooperation using China’s human genetic resources at clinical institutions without export of human genetic resource materials. However, the type, quantity and usage of the human genetic resources to be used shall be filed with the administrative department of health under the State Council before clinical trials. In May 2023, the MST issued the *Implementation Rules for the Administrative Regulation on Human Genetic Resources* (《人類遺傳資源管理條例實施細則》), which came into effect on July 1, 2023, optimizing the scope of administrative licensing and record-keeping, enhancing the operability of the human genetic resources administration system, and implementing the registration and reporting system for the management of human genetic resources.

On October 17, 2020, the SCNPC promulgated the *Biosecurity Law of the PRC* (《中華人民共和國生物安全法》) (the “**Biosecurity Law**”) which became effective on April 15, 2021 and latest amended and became effective on April 26, 2024, establishing a comprehensive legislative framework on the current regulations in the areas including prevention and control of outbreak of major newly-emerged infectious diseases, animal and plant epidemics, security of biotechnology research, development and application, biosafety management of pathogenic microbiology laboratories, security management of human genetic resources and biological resources, prevention of the invasion of alien species and protection of biodiversity, countermeasures against microbial resistance and prevention of bioterrorism and threat of biological weapons. According to the Biosecurity Law, the high-risk and medium-risk biotechnology research and development activities shall be carried out by legal entities lawfully established in the PRC, and shall be approved or filed. The establishment of a pathogenic microbiology laboratory shall be lawfully approved or filed. Engaging in the following activities shall be approved by the administrative department of health under the State Council, (i) collecting human genetic resources of important genetic families or specific areas in the PRC, or collecting human genetic resources of which the types and quantities are subject to provisions of the administrative department of health under the State Council, (ii) preserving human genetic resources of the PRC, (iii) using human genetic resources of the PRC to carry out international scientific research cooperation, or (iv) transporting, mailing or exiting human genetic resource materials of the PRC.

REGULATIONS ON INFORMATION SECURITY AND DATA PROTECTION

Data Security and Data Export

The SCNPC promulgated the *Data Security Law of the PRC* (《中華人民共和國數據安全法》) on June 10, 2021, which became effective from September 1, 2021, for the establishment of a data classification and grading protection system to conduct classified and hierarchical protection of data. Entities engaged in data processing activities shall, in accordance with laws and regulations, establish a sound full-process data security management system, organize data security education and training, and take corresponding technical measures and other necessary measures to ensure data security.

REGULATORY OVERVIEW

On December 28, 2021, the Cyberspace Administration of China (國家互聯網信息辦公室) (the “CAC”) and other twelve PRC regulatory authorities jointly revised and promulgated the *Measures for Cybersecurity Review* (《網絡安全審查辦法》) (the “**Cyber Review Measures**”), which came into effect on February 15, 2022. The Cyber Review Measures stipulate that, among others, (i) when the purchase of network products and services by a critical information infrastructures operator (the “CIIO”) (關鍵信息基礎設施運營者) or the data processing activities conducted by a network platform operator (網絡平台運營者) affect or may affect national security, a cybersecurity review shall be conducted pursuant to the Cyber Review Measures; (ii) an application for cybersecurity review shall be made by an issuer who is a network platform operator holding personal information of more than one million users before such issuer applies to list its securities abroad; and (iii) the relevant PRC governmental authorities may initiate cybersecurity review if such governmental authorities determine that the issuer’s network products or services, or data processing activities affect or may affect national security. According to the *Measures on Security Assessment of Cross-border Data Transfer* (《數據出境安全評估辦法》) issued by the CAC on July 7, 2022 and became effective on September 1, 2022, a data processor that provides data overseas under any of the following circumstances shall apply to the national cyberspace administration for the security assessment of the outbound data transfer through local provincial cyberspace administration: (i) a data processor provides important data abroad; (ii) the CIIO or the data processor that has processed the personal information of more than 1 million people provides personal information abroad; (iii) the data processor that has provided the personal information of over 100,000 people or the sensitive personal information of over 10,000 people cumulatively since January 1 of the previous year provides personal information abroad; and (iv) any other circumstance where an application for the security assessment of outbound data transfer is required by the national cyberspace administration.

According to the *Measures for Standard Contract for Outbound Transfer of Personal Information* (《個人信息出境標準合同辦法》) issued by the CAC on February 22, 2023 and became effective from June 1, 2023, to provide personal information to an overseas recipient through the conclusion of the standard contract, a personal information processor shall meet all of the following circumstances: (i) it is not a CIIO; (ii) it has processed the personal information of less than one million individuals; (iii) it has cumulatively provided the personal information of less than 100,000 individuals to overseas recipients since January 1 of the previous year; and (iv) it has cumulatively provided the sensitive personal information of less than 10,000 individuals since January 1 of the previous year. In addition, the Measures for Standard Contract for Outbound Transfer of Personal Information require that all Outbound Transfers of personal information that have been carried out before June 1, 2023 and do not comply with the provisions of the Measures for Standard Contract for Outbound Transfer of Personal Information be rectified within 6 months.

According to the *Provisions on Promoting and Regulating Cross-border Data Flows* (《促進和規範數據跨境流動規定》), which was promulgated by the CAC on March 22, 2024 and came into effect on the same day, if the data have not been informed or publicly announced as important data by relevant departments or regions, data handlers are not required to declare security assessment for cross-border provision of the data as important data.

REGULATORY OVERVIEW

Personal Information Protection

According to the *Civil Code of the PRC* (《中華人民共和國民法典》), personal information of natural persons is protected by law. If any organization or individual needs to obtain other people’s personal information, they should obtain it in accordance with the law, ensure the security of the information, and must not illegally collect, use, process, or transmit other people’s personal information or illegally buy, sell, provide, or disclose the information. The *Personal Information Protection Law of the PRC* (《中華人民共和國個人信息保護法》) promulgated by the SCNPC on August 20, 2021 and implemented on November 1, 2021 further emphasizes the obligations and responsibilities of processors for the protection of personal information, and requests higher level of protective measures on the processing of sensitive personal information.

According to the *Cybersecurity Law of the PRC* (《中華人民共和國網絡安全法》) last amended on October 28, 2025 and took effect on January 1, 2026, network operators must follow the principles of legality, legitimacy and necessity when collecting and using personal information, publicly disclose the rules for collection and use, clearly state the purpose, method and scope of collecting and using information, and obtain the consent of the person whose data is being collected. Network operators shall not collect personal information unrelated to the services they provide. Network operators are not allowed to leak, tamper with, or damage the personal information they collect, and are not allowed to provide personal information to others without the consent of the person whose data is being collected. However, this does not apply to cases where a specific individual cannot be identified and the identity cannot be recovered after processing. Network operators should take technical measures and other necessary measures to ensure the security of the personal information they collect and prevent leakage, damage and loss of information.

REGULATIONS ON INTELLECTUAL PROPERTY

Patent Law

Pursuant to the *Patent Law of the PRC* (《中華人民共和國專利法》) latest amended by the SCNPC on October 17, 2020 and came into effect on June 1, 2021 and the *Implementation Rules of the Patent Law of the PRC* (《中華人民共和國專利法實施細則》) latest amended by the State Council on December 11, 2023 and came into effect on January 20, 2024, patents in China are divided into three types, i.e., invention patent, utility patent and design patent. The duration of a patent right for invention is 20 years, the duration of a patent right for utility model is 10 years, and the duration of a patent right for design is 15 years, all calculated from the date of application.

In terms of patent covering a pharmaceutical product, the *Trial Implementation Measures for the Mechanism for Early-Stage Settlement of Drug Patent Disputes* (《藥品專利糾紛早期解決機制實施辦法(試行)》), promulgated by the NMPA and China National Intellectual Property Administration on July 4, 2021 and effective on the same day, establishes a special mechanism to protect pharmaceutical patents from infringement of chemical generic drugs.

REGULATORY OVERVIEW

Under this mechanism, the marketing authorization holders (the “MAH”) shall register information about the drug and the corresponding patent of the drug. When applying for drug marketing authorization, the applicant of a chemical generic drug shall, by reference to the patent information registered by the MAH, make a declaration on each relevant drug patent of the generic drug. Any patentee or interested party who has an objection to the patent declaration may, within 45 days as of the date when the application for marketing authorization is made public by the national drug evaluation agency, lodge a lawsuit to a court regarding whether the relevant technical solution of the drug applied for marketing falls within the scope of protection of the relevant patent rights or request an administrative ruling from the patent administrative department of the State Council.

Trademark Law

In accordance with the *Trademark Law of the PRC* (《中華人民共和國商標法》) which was latest amended by the SCNPC on April 23, 2019, with the latest revision effective on November 1, 2019, and the *Implementation Regulations for the Trademark Law of the PRC* (《中華人民共和國商標法實施條例》) which was latest amended by the State Council on April 29, 2014, with the latest revision effective on May 1, 2014, trademarks approved and registered by the Trademark Office of the National Intellectual Property Administration are registered trademarks, including commodity trademarks, service marks, collective trademarks, and certification marks; the validity period of a registered trademark is 10 years, calculated from the date of approval of registration. A trademark registrant intending to continue to use the registered trademark upon expiry of the period of validity shall undergo the renewal formalities within 12 months before expiry according to the relevant provisions. Each renewal is valid for 10 years and is calculated from the day after the previous validity period of the trademark expires.

Copyright and Software Copyright

Copyright, including copyrighted software, is mainly protected under the *Copyright Law of the PRC* (《中華人民共和國著作權法》), the “**Copyright Law**”, which was adopted by the SCNPC on September 7, 1990 and last amended with effect from June 1, 2021, and *Implementation Regulations for the Copyright Law of the PRC* (《中華人民共和國著作權法實施條例》), which was promulgated by the State Council on August 2, 2002 and last amended with effect from March 1, 2013. These rules provide that Chinese citizens, legal persons or other organizations will, whether published or not, enjoy copyright in their works, which include, among others, works of literature, art, natural science, social science, engineering technology and computer software.

Domain Names

The Administrative Measures on Internet Domain Names (《互聯網域名管理辦法》), which were promulgated by the Ministry of Industry and Information Technology on August 24, 2017 and became effective on November 1, 2017, provides that “.CN” and “.zhongguo (in Chinese character)” are China’s national top level domains. Any party that engages in internet

REGULATORY OVERVIEW

information services must use its domain name in compliance with laws and regulations and in line with relevant provisions of the telecommunications authority and shall not use its domain name to commit any violation.

REGULATIONS ON LEASING

According to the *Civil Code of the PRC* (《中華人民共和國民法典》) promulgated by the NPC on May 28, 2020 and implemented on January 1, 2021, the creation, modification, transfer, and extinction of real property rights that are subject to registration in accordance with the law shall take effect when they are recorded in the real estate registration book. A real estate ownership certificate is the proof that the owner has the right to the real estate. Pursuant to the *Administrative Measures for Commodity Housing Leasing* (《商品房屋租賃管理辦法》) promulgated by the Ministry of Housing and Urban-Rural Development (中華人民共和國住房和城鄉建設部) on December 1, 2010 and came into effect on February 1, 2011, the parties to house leasing shall, within 30 days after the execution of the house leasing contract, go through the house leasing registration and filing formalities with the competent construction (real-estate) departments of the People’s Government of the municipality directly under the Central Government, city or county at the place where the leased house is located. If a violation of the measures occurs, the party shall be ordered to rectify within a prescribed time limit. and if any party fails to do so, it shall be imposed of a fine of more than RMB1,000 and less than RMB10,000.

Furthermore, *Regulation on Housing Leasing* (《住房租賃條例》), which was promulgated by the State Council and came into effect on September 15, 2025, stipulates that the lessors shall file the housing lease contract with the real estate administration department at the location of the leased housing through the housing leasing management service platform or other means.

REGULATIONS ON FIRE PROTECTION AND ENVIRONMENTAL PROTECTION

Fire Control

Pursuant to the *Fire Control Law of the PRC* (《中華人民共和國消防法》) promulgated by the SCNPC on April 29, 1998, and last amended on April 29, 2021 and effective therefrom, the Ministry of Emergency Management (中華人民共和國應急管理部) under the State Council and the local people’s governments at or above county level shall supervise and administer the matters of fire protection, while the fire control and rescue institutions of such people’s governments shall be responsible for implementation. The design of fire control of the construction projects must comply with the national technical standards of fire control. If the design of fire control of a construction project has not been examined pursuant to the relevant laws or failed to pass the examination, the construction of such project is not allowed. If a completed construction project has not gone through the fire safety inspection or failed to satisfy the requirements of fire safety upon inspection, such project is not allowed to be put to use or business. According to *Interim Regulations on Administration of Examination and Acceptance of Fire Control Design of Construction Projects* (《建設工程消防設計審查驗收管

REGULATORY OVERVIEW

理暫行規定》) issued by the Ministry of Housing and Urban-Rural Development on April 1, 2020 and latest amended on August 21, 2023, an examination system for fire control design and acceptance only applies to special construction projects, and for other projects, a record-filing and spot check system would be applied.

Environmental Protection

The *Environmental Protection Law of the PRC* (《中華人民共和國環境保護法》) was promulgated and effective on December 26, 1989, and most recently amended on April 24, 2014. The *Environmental Protection Law* has been formulated for the purpose of protecting and improving both the living and the ecological environment, preventing and controlling pollution and other public hazards and safeguarding people’s health. According to the provisions of the *Environmental Protection Law*, in addition to other relevant laws and regulations of the PRC, the former Ministry of Environmental Protection (中華人民共和國環境保護部) and its local counterparts are responsible for administering and supervising environmental protection matters. Pursuant to the *Environmental Protection Law*, construction projects that have environmental impact shall be subject to environmental impact assessment.

Environment Impact Assessment

On October 28, 2002, the SCNPC promulgated the *Environmental Impact Assessment Law of PRC* (《中華人民共和國環境影響評價法》), which was latest amended on December 29, 2018. According to the *Environmental Impact Assessment Law*, the State Council implemented the environmental impact assessment to classify construction projects according to the impact of the construction projects on the environment. Pursuant to the *Interim Measures for Environmental Protection Acceptance of Completed Construction Projects* (《建設項目竣工環境保護驗收暫行辦法》) effective as of November 20, 2017 and the *Regulations on the Administration Construction Project Environmental Protection* (《建設項目環境保護管理條例》), which was revised on July 16, 2017 and implemented on October 1, 2017, after the completion of a construction project for which an environmental impact report or an environmental impact report form is required, the construction entity shall, according to standards and procedures prescribed by the environmental protection administrative authorities, conduct environmental protection completion acceptance check and compile an acceptance check report. A construction project for which an environmental impact report or an environmental impact report form is required shall not be put into production or use until the environmental protection completion acceptance check has been passed.

On November 30, 2020, Ministry of Ecology and Environment of the PRC (中華人民共和國生態環境部) promulgated the *Classified Administration Catalogue of Environmental Impact Assessments for Construction Project (2021 version)* (《建設項目環境影響評價分類管理名錄(2021年版)》), which became effective on January 1, 2021. According to the *Environmental Impact Assessment Law*, where a construction entity commenced construction prior to submission of the environmental impact report and environmental impact statement of the construction project or prior to resubmission of the environmental impact report and environmental impact statement, the ecological environment authorities at the county level or

REGULATORY OVERVIEW

above shall order it to stop the construction, impose a fine of not less than 1% but not more than 5% of the overall investment amount for such construction project according to the seriousness and consequences of such violations, and order it to restore to the original status; and the person-in-charge and responsible personnel of the construction project shall be liable to administrative sanctions in accordance with laws.

Disposal of Hazardous Waste

Pursuant to the *Law on the Prevention and Control of Environmental Pollution Caused by Solid Waste of the PRC* (《中華人民共和國固體廢物污染環境防治法》), which was promulgated by the SCNPC in 1995 and was latest amended on April 29, 2020, entities generating hazardous waste shall store, utilize and dispose hazardous waste according to the relevant requirements of the state and environmental protection standards, and shall not dump or pile up hazardous waste without authorization. Furthermore, it is forbidden to entrust hazardous waste to entities without a permit for disposal, or else the competent ecological and environmental authorities shall order it to make rectification, impose fines, confiscate illegal gains, and in serious circumstance, order it to suspend business or close down upon the approval of the government authorities.

REGULATIONS ON EMPLOYMENT AND SOCIAL WELFARE

According to the *Labor Law of the PRC* (《中華人民共和國勞動法》) promulgated by the SCNPC on July 5, 1994 and last amended on December 29, 2018, the *Labor Contract Law of the PRC* (《中華人民共和國勞動合同法》) promulgated by the SCNPC on June 29, 2007 and amended on December 28, 2012, and the *Implementing Regulations of the Labor Contract Law of the PRC* (《中華人民共和國勞動合同法實施條例》) promulgated by the State Council on September 18, 2008 and came into effect on the same day, employers must enter into written labor contracts with full-time employees. All employers shall comply with local minimum wage standards. Employers must establish a system for labor safety and sanitation, strictly comply with national standards, and provide relevant education to their employees. Violations of the *Labor Contract Law* and the *Labor Law* may result in fines, and in serious cases, other administrative and criminal liabilities may be incurred.

In accordance with the *Labor Contract Law* and the *Interim Provisions on Labor Dispatching* (《勞務派遣暫行規定》) promulgated by the Ministry of Human Resources and Social Security of the PRC (中華人民共和國人力資源和社會保障部) on January 24, 2014 and became effective on March 1, 2014, it specified the scope and proportion of the usage of the laborer, execution and performance of labor dispatch agreements and legal liability. An employer shall strictly control the number of dispatched laborers which shall not exceed 10% of the total number of its workers. An employer that is in violation thereof shall be ordered to make correction by the labor administrative department. Where no correction is made by the prescribed deadline, the employer shall be subject to a fine ranging from RMB5,000 to RMB10,000 for each dispatched worker.

REGULATORY OVERVIEW

The *Social Insurance Law of the PRC* (《中華人民共和國社會保險法》) (the “**Social Insurance Law**”) issued by the SCNPC in 2010 and latest amended on December 29, 2018, has established social insurance systems of basic pension insurance, basic medical insurance, work-related injury insurance, unemployment insurance and maternity insurance and has elaborated in detail the legal obligations and liabilities of employers who fail to comply with relevant laws and regulations on social insurance. According to the *Social Insurance Law and the Provisional Regulations on Collection and Payment of Social Insurance Premiums* (《社會保險費徵繳暫行條例》) promulgated by the State Council on January 22, 1999 and most recently amended on March 24, 2019 and became effective from the same date, enterprises shall register social insurance with local social insurance and pay or withhold relevant social insurance for or on behalf of its employees. Any employer that fails to make social insurance contributions may be ordered to rectify the non-compliance and pay the required contributions within a prescribed time limit and be subject to a late fee. If the employer still fails to rectify the failure to make the relevant contributions within the prescribed time, it may be subject to a fine ranging from one to three times the amount overdue.

In accordance with the *Regulations on the Administration of Housing Provident Funds* (《住房公積金管理條例》) promulgated by the State Council on April 3, 1999, and amended on March 24, 2002, and March 24, 2019, enterprises must register at the designated administrative centers and open bank accounts for depositing employees’ housing provident funds. Employers and employees are also required to pay and deposit housing provident funds, with an amount no less than 5% of the monthly average salary of the employee in the preceding year in full and on time. In case of overdue payment or underpayment by employers, orders for payment within a specified period will be made by the housing fund management center. Where employers fail to make payment within such period, enforcement by the people’s court will be applied. In case of failure to register and open accounts for depositing employees’ housing provident funds, the housing fund management center shall order employers to go through the formalities within a specified period, where employers fail to do such formalities within the prescribed time, a fine of not less than RMB10,000 nor more than RMB50,000 shall be imposed.

REGULATIONS ON TAXATION AND FOREIGN EXCHANGE

For more details, please refer to “Appendix III — Taxation and Foreign Exchange” in this document.

REGULATIONS ON OVERSEAS LISTINGS

Pursuant to the *Trial Administrative Measures of Overseas Securities Offering and Listing by Domestic Companies* (《境內企業境外發行證券和上市管理試行辦法》) promulgated by the China Securities Regulatory Commission (中國證券監督管理委員會) (the “**CSRC**”) on February 17, 2023, which became effective on March 31, 2023, it regulates the overseas securities offering and listing activities of domestic companies, whether directly or indirectly: (1) where a PRC company carries out securities offering and listing in an overseas market, it shall go through the filing procedures with the CSRC and submit relevant information, and

REGULATORY OVERVIEW

shall submit the initial filing materials within three working days of submitting the initial public offering and listing application documents; and (2) PRC companies that are directly or indirectly listing in overseas markets and intend to conduct subsequent offerings in the same overseas markets shall go through the filing procedures with the CSRC and report relevant information; they shall also submit the filing within three working days of the completion date of the subsequent offering. In addition, no overseas offering and listing shall be conducted under any of the following circumstances: (1) it is prohibited by the PRC laws, administrative regulations or relevant rules of the state to conduct overseas offering and listing; (2) overseas offering and listing may endanger national security as reviewed and determined by the relevant competent department of the State Council in accordance with the laws; (3) a domestic enterprise or its controlling shareholder or actual controller has committed a criminal crime in the last three years; (4) a domestic enterprise is under investigation according to the laws for being suspected of crimes or major violations of laws and regulations and no conclusion has yet been made thereof; or (5) there is a major dispute over ownership of the equity interests held by the controlling shareholder or the shareholder controlled by the controlling shareholder or the actual controller.

According to the *Provisions on Strengthening the Confidentiality and Archives Management of Overseas Securities Offering and Listing by Domestic Enterprises* (《關於加強境內企業境外發行證券和上市相關保密和檔案管理工作的規定》) (the “**Archives Provisions**”) promulgated by the CSRC, the MOF, the State Secrets Bureau (中華人民共和國國家保密局) and the State Archives Administration of the PRC (中華人民共和國國家檔案局) on February 24, 2023 and implemented from March 31, 2023, domestic enterprises, securities companies and securities service institutions providing corresponding services shall strictly comply with the relevant requirements for confidentiality and archives management, establish and improve confidentiality and file management systems, and take the necessary measures to implement confidentiality and archives management responsibilities, in the direct or indirect overseas securities offering or listing activities by domestic enterprises. According to the Archives Provisions, during the process of domestic enterprises conducting offering and listing overseas, if documents or data involving state secrets or adversely affecting national security or the public interest need to be provided or publicly disclosed to relevant securities companies, securities service agencies, overseas regulatory authorities and other units and individuals, the relevant approval/filing and other regulatory procedures shall be completed.

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

OVERVIEW

We are a biotech company focused on the field of immune-inflammation, committed to becoming a leader in locally delivered targeted therapies. With innovative and original design and precise local delivery as our core capabilities, we specialize in chronic inflammatory disease treatment, aiming to provide innovative solutions that achieve efficacy, safety and long-term patient satisfaction.

Our Company was incorporated in the PRC as a limited liability company on September 26, 2016 and was converted to a joint stock company with limited liability on April 25, 2022 under the PRC Company Law. Since the incorporation of the Company, we have been led by our founder Mr. Li, who has over 18 years of experience in corporate and business management. For more details of the experience and qualifications of Mr. Li, please refer to “Directors and Senior Management” in this document.

BUSINESS DEVELOPMENT MILESTONES

The following table summarizes the key milestones in our business development:

Year	Milestone
2016	Our Company was established in Beijing, PRC.
2018	Pumecitinib gel project was initiated.
2020	Approval for clinical trials of Pumecitinib gel for the treatment of atopic dermatitis was obtained.
	Phase I clinical study of Pumecitinib gel was initiated.
2021	We completed the Equity Transfers and Capital Increase in April 2021, pursuant to which we raised approximately RMB150 million from, amongst others, Kaiyuan Hongdao, Chongqing Xianfeng and Yuhang Lapam.
	Phase II clinical study of Pumecitinib gel for the treatment of atopic dermatitis was initiated.
	Pumecitinib nasal spray project was initiated.
	PG-018 project was initiated.
2022	Our Company was converted into a joint stock company.

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

Year	Milestone
	We completed the Capital Increase in August 2022, pursuant to which we raised RMB136 million from, amongst others, Chongqing Xianfeng, Yuhang Lapam and Heze Jurong.
2023	Phase IIb clinical study of Pumecitinib gel for the treatment of atopic dermatitis was initiated. PG-033 project was initiated. IND approval of Pumecitinib nasal spray was obtained. Phase I clinical trial of Pumecitinib nasal spray was initiated. IND approval of PG-018 was obtained. Phase I clinical trial of PG-018 was initiated. PG-040 project was initiated.
2024	Phase IIa clinical trial of Pumecitinib nasal spray for the treatment of SAR was initiated. The first dose of Pumecitinib gel for the treatment of atopic dermatitis was successfully administered to the participants of pivotal Phase III clinical study. We completed the Capital Increase in May 2024, pursuant to which we raised approximately RMB100 million from Pharmaceutical Fund. IND approval for clinical trial of PG-033 for the treatment of pruritus associated with neurodermatitis was obtained. We completed the Capital Increase in December 2024, pursuant to which we raised approximately RMB116 million from, amongst others, Yitang Chuangxin and Beike Zhengqi.
2025	Phase IIb clinical trial of Pumecitinib nasal spray was initiated. First dose of Pumecitinib nasal spray was successfully administered to the participants of Phase III clinical study. Phase I clinical trial of PG-033 was initiated. The Phase IIb clinical trial results of Pumecitinib gel were published on the British Journal of Dermatology.

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

OUR SUBSIDIARY

As of the Latest Practicable Date, our Company does not have any subsidiary.

CORPORATE ESTABLISHMENT AND DEVELOPMENT

The following sets forth the major corporate history and shareholding changes of our Company.

Establishment of our Company

On September 26, 2016, the Company was established under the laws of the PRC as a limited liability company with an initial registered capital of RMB50.00 million, which was owned as to (i) 66.00% by Chifeng Puqi Pharmaceutical Technology Co., Ltd. (赤峰普祺醫藥科技有限公司) (“**Chifeng Puqi**”) which was controlled by Mr. Li, one of the controlling shareholders of the Company, chairman of the Board, an executive Director and general manager of the Company and the spouse of Ms. Wang; (ii) 17.00% by Mr. Wu, an executive Director, who held such equity interest in our Company on trust for Mr. Li and Ms. Wang; and (iii) 17.00% by Ms. Liang Hongyun (梁虹雲) (“**Ms. Liang**”) who held such equity interest in our Company on trust for Dr. Han. The above trust arrangements had been made for administrative convenience purpose.

Equity Transfers in July 2020

On May 28, 2020, (i) Ms. Liang, Chifeng Qingxi Enterprise Management Centre (Limited Partnership) (赤峰清溪企業管理中心(有限合夥)) (“**Chifeng Qingxi**”) and Beijing Bohan Technology Development Center (北京博涵科技發展中心) (“**Bohan Technology**”); (ii) Mr. Wu and Chifeng Qingxi; and (iii) Chifeng Puqi, Chifeng Qingxi and Ms. Wang, entered into three separate equity transfer agreements, pursuant to which (i) Ms. Liang transferred 15.00% of the equity interest of the Company to Bohan Technology at nil consideration; (ii) Ms. Liang transferred the 2.00% of the equity interest of the Company to Chifeng Qingxi at nil consideration; (iii) Mr. Wu transferred the 17.00% of the equity interest to Chifeng Qingxi at a consideration of RMB8.50 million; (iv) Chifeng Puqi transferred the 65.00% of the equity interest of the Company to Ms. Wang, an executive Director and spouse of Mr. Li, at a consideration of RMB32.50 million; and (v) Chifeng Puqi transferred 1.00% of the equity interest to Chifeng Qingxi at a consideration of RMB0.50 million (the “**Equity Transfers in July 2020**”). Bohan Technology is a sole proprietorship established under the PRC laws on June 13, 2018 and wholly-owned by Dr. Han, a non-executive Director of the Company. Upon completion of the equity transfers, the trust arrangement between Mr. Wu and Mr. Li and Ms. Wang; and the trust arrangement between Ms. Liang and Dr. Han was terminated.

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

The shareholding structure of our Company upon completion of the Equity Transfers in July 2020 is set out as follows:

Shareholders	Registered Capital subscribed for (RMB)	Equity interest
Ms. Wang ⁽¹⁾	32,500,000	65.00%
Chifeng Qingxi ⁽²⁾	10,000,000	20.00%
Bohan Technology ⁽³⁾	7,500,000	15.00%
Total	50,000,000	100.00%

Notes:

1. Ms. Wang is an executive Director of the Company and spouse of Mr. Li. For more details, please refer to the section headed “Directors and Senior Management” in this document.
2. Chifeng Qingxi is one of our employee incentive platforms and one of our Controlling Shareholders.
3. Bohan Technology was wholly-owned by Dr. Han, a non-executive Director of the Company.

Equity Transfer in February 2021

On February 26, 2021, Ms. Wang and Mr. Li entered into an equity transfer agreement, pursuant to which Ms. Wang transferred the 65.00% of the equity interest of the Company to Mr. Li at nil consideration (the “**Equity Transfer in February 2021**”) due to wealth planning arrangements.

The shareholding structure of our Company upon completion of the Equity Transfer in February 2021 is set out as follows:

Shareholders	Registered Capital subscribed for (RMB)	Equity interest
Mr. Li	32,500,000	65.00%
Chifeng Qingxi	10,000,000	20.00%
Bohan Technology	7,500,000	15.00%
Total	50,000,000	100.00%

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

Equity Transfers and Capital Increase in April 2021

For the purpose of obtaining funding to promote the long-term development of our business, on March 18, 2021, our Company and our then Shareholders (namely, Mr. Li, Chifeng Qingxi and Bohan Technology) entered into a capital increase agreement (the “**Capital Increase Agreement**”) with Beijing Kaiyuan Hongdao Venture Capital Center (Limited Partnership) (北京開元弘道創業投資中心(有限合夥)) (“**Kaiyuan Hongdao**”), Chongqing Xianfeng Qiyun Equity Investment L.P. (重慶險峰旗雲股權投資合夥企業(有限合夥)) (“**Chongqing Xianfeng**”), Hangzhou Yuhang Lapam Healthcare Equity Investment Fund Partnership (Limited Partnership) (杭州余杭龍磐健康醫療股權投資基金合夥企業(有限合夥)) (“**Yuhang Lapam**”), Xizang Zhifan Enterprise Management Consulting Center (Limited Partnership) (西藏智梵企業管理諮詢中心(有限合夥)) (“**Xizang Zhifan**”), Nanjing Lestar Medical Technology Partnership (Limited Partnership) (南京力思達醫療科技合夥企業(有限合夥)) (“**Nanjing Lestar**”).

On March 26, 2021 and March 29, 2021, (i) Mr. Li and Xizang Zhifan; and (ii) Mr. Li and Yuhang Lapam, entered into two separate equity transfer agreements, respectively (the “**Equity Transfer Agreements**”, together with Capital Increase Agreement, “**Equity Transfers and Capital Increase in April 2021**”).

Pursuant to the Capital Increase Agreement and the Equity Transfer Agreements, (i) Mr. Li transferred the registered capital of approximately RMB1.48 million (representing 2.96% of the equity interest) of the Company to Yuhang Lapam at a consideration of RMB12.00 million; (ii) Mr. Li transferred the registered capital of approximately RMB0.99 million (representing 1.98% of the equity interest) of the Company to Xizang Zhifan at a consideration of RMB8.00 million; and (iii) the registered capital of our Company increased from RMB50.00 million to approximately RMB66.67 million, and Kaiyuan Hongdao, Chongqing Xianfeng, Yuhang Lapam, Xizang Zhifan and Nanjing Lestar subscribed for an increased registered capital of RMB5.00 million, approximately RMB4.44 million, approximately RMB4.59 million, RMB3.00 million and approximately RMB1.11 million at a consideration of RMB45.00 million, RMB40.00 million, RMB28.00 million, RMB27.00 million and RMB10.00 million, respectively. The relevant considerations were determined based on arm’s length negotiation amongst the respective [REDACTED] and our Company after taking into consideration the status and long-term prospects of our business operations.

Dongyue	531,915	0.55%
Other Shareholders ⁽³⁾	1,509,272	1.57%
Total	96,085,212	100.00%

Notes:

1. Mr. Zhao was an Independent Third Party as at the date of the delisting from NEEQ.
2. Mr. Ai is an employee of the Company.
3. To the best knowledge of our Directors after making due enquiries, 41 other Shareholders as at the date of the delisting from NEEQ were Independent Third Parties.

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

The delisting from NEEQ was implemented around the time we commenced our preparation of our [REDACTED] on the Stock Exchange. On December 22, 2025, our Shares were delisted from NEEQ. As a protective measure for the dissenting shareholders of the Company who did not vote for the delisting from NEEQ, Mr. Li repurchased an aggregate of approximately 0.07% of the entire issued share capital of the Company as at the date of the delisting from NEEQ from 15 Shareholders who decided not to continue with their [REDACTED] in the Company at a total repurchase price of RMB2.37 million. Such considerations were determined based on arm’s length negotiations between Mr. Li and the individual Shareholders who participated in the repurchase with reference to the latest quoted prices of the Company prior to the delisting from NEEQ and taking into account the said Shareholders’ wishes to recoup the value of their individual [REDACTED] into our Company. The considerations were fully settled on January 16, 2026. In view of the delisting of the Company from NEEQ, Mr. Zhao and Inner Mongolia Jingtong, a company ultimately controlled by Mr. Zhao, entered into an equity transfer agreement, pursuant to which Inner Mongolia Jingtong transferred approximately 1.38% of the equity interest of the Company to Mr. Zhao at a consideration of approximately RMB25.00 million, which was determined based on arm’s length negotiations between the parties with reference to, among others, the status and continuous development of our business and the progress in the R&D of our pipeline products. The consideration was fully settled on January 16, 2026.

On January 15, 2026, we conducted a share subdivision pursuant to which each of our Shares will be subdivided on the basis of one to two. Upon completion of such share subdivision, the registered capital of our Company will be divided into 192,170,424 Shares.

Upon completion of the delisting from NEEQ, the share repurchase by Mr. Li, the equity transfer from Inner Mongolia to Mr. Zhao and the share subdivision and as at the Latest Practicable Date, the shareholding structure of our Company was as follows:

Shareholders	Registered Capital (RMB)	Equity interest
Mr. Li	56,043,356	29.16%
Chifeng Qingxi	20,000,000	10.41%
Dr. Han	14,288,676	7.44%
Chongqing Xianfeng	13,992,556	7.28%
Yuhang Lapam	11,737,018	6.11%
Pharmaceutical Fund	10,638,296	5.54%
Kaiyuan Hongdao	10,000,000	5.20%
Mr. Zhao	8,971,296	4.67%
Xizang Zhifan	8,740,858	4.55%
Chifeng Mingquan	7,017,544	3.65%
Heze Jurong	3,827,752	1.99%
Yitang Chuangxin	3,170,212	1.65%

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

Shareholders	Registered Capital (RMB)	Equity interest
Ms. Shen	2,965,758	1.54%
Beijing Bosentong	2,659,660	1.38%
Mr. Ai ⁽¹⁾	2,371,126	1.23%
Nanjing Lestar	2,222,222	1.16%
Inner Mongolia Niutu	2,127,660	1.11%

Capital Increase in May 2024	100.00 million	March 13, 2024	April 22, 2024	9.40	[REDACTED]%	1,690.00 million
Capital Increase in December 2024	116.00 million	September 14, 2024	December 17, 2024	9.40	[REDACTED]%	1,806.00 million

Notes:

- (1) The cost per Share is adjusted with reference to the total issued Share number of the Company after the sub-division of the shares with nominal value of RMB1.00 each on the basis of one-to-two.
- (2) The [REDACTED] to the [REDACTED] is calculated based on the foreign exchange rate as of the Latest Practicable Date and that the [REDACTED] is HK\$[REDACTED] per H Share (being the mid-point of the indicative [REDACTED] Range).
- (3) The increase in our Company’s valuation from the Equity Transfers and Capital Increase in April 2021 to the Capital Increase in March 2022 is primarily because the Company completed Phase IIa clinical trial of Pumecitinib gel in March 2022.
- (4) The equity transfer between Mr. Zhao and Inner Mongolia Jingtong is not included in the above table as the consideration of the transfer was paid and settled among the then Shareholders (instead of the Company). To the best knowledge of the Directors, the consideration of the said equity transfer was fully settled on January 16, 2026.

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

Basis of consideration	The consideration for each [REDACTED] was determined through arm’s length negotiation between the respective [REDACTED] and our Company or the then existing Shareholders with reference to, among others, the status and continuous development of our business and the progress in the R&D of our pipeline products, as well as the prevailing valuations of comparable companies within the industry.
[REDACTED] and whether they have been fully utilized	We utilized the proceeds to finance our R&D activities and to support the working capital needs of our Company. As of the Latest Practicable Date, the majority of the net proceeds from the [REDACTED] had been utilized for the aforementioned purposes.
Lock-up	Pursuant to the applicable PRC laws, within the 12 months following the [REDACTED], all existing Shareholders (including the [REDACTED]) of our Company could not dispose of any of the Shares held by them.
Strategic benefits	Our Company would benefit from the additional capital injected by the [REDACTED] in our Company, their business resources, knowledge and experience, potential business opportunities and benefits that may be provided by them. Our [REDACTED] include institutional investors, some of which are highly experienced in investing in the healthcare industry. Our Directors believed that our Company could benefit from their industry insights and guidance. Our Directors were also of the view that the [REDACTED] demonstrate the [REDACTED] commitment and confidence in the business performance and operations, strengths and long-term prospects of our Company.
Special rights of the [REDACTED]	Pursuant to the [REDACTED] agreements, certain [REDACTED] had been granted certain special rights, including, among others, (i) anti-dilution rights; and (ii) redemption rights. The redemption rights of our [REDACTED] shall cease to be exercisable one day before the first filing of the application for the [REDACTED], provided that such redemption rights shall be automatically reinstated upon occurrence of any one of the following events (whichever is earlier): (i) the Company’s [REDACTED] application is rejected, returned or terminated, and the Company fails to file an application for review within the prescribed time limit pursuant to the Listing Rules. For the avoidance of doubt, the lapse of the [REDACTED] application and the document during the [REDACTED] approval process of the Stock Exchange shall not constitute the circumstance for such reinstatement;(ii) the Company voluntarily withdraws the [REDACTED] application; and (iii) the Company fails to complete a qualified [REDACTED] within 18 months from the date of the first filing of the [REDACTED] application . All other special rights of the [REDACTED] will be terminated upon the [REDACTED].

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

EMPLOYEE SHAREHOLDING PLATFORMS

In recognition of the contributions of the core employees of our Company, and to incentivize them to further promote our development, we adopted the [REDACTED] Share Incentive Plan and granted awards to eligible grantees under the [REDACTED] Share Incentive Plan directly or indirectly through the partnership interest in the Employee Shareholding Platforms. For further details of the [REDACTED] Share Incentive Plan, please refer to “Appendix VI — Statutory and General Information — C. Further Information about Our Directors and Substantial Shareholders — 4. [REDACTED] Share Incentive Plan” to this document.

To streamline the management of share incentives and effectively segregate different batches granted to eligible participants, and after considering the restriction on the number of limited partners of a limited partnership under the relevant PRC law, we established two limited partnerships in the PRC as our Employee Shareholding Platforms, namely Chifeng Qingxi and Chifeng Mingquan.

Details of the Employee Shareholding Platforms are set out below:

Chifeng Qingxi

Chifeng Qingxi is a limited partnership formed on March 12, 2020 under the laws of the PRC, focusing on furnishing enterprise management consulting services. As of the Latest Practicable Date, Chifeng Qingxi was owned as to (i) 40% by one of its limited partners, Dr. Du, our executive Director and deputy general manager; (ii) 5.25% by its general partner, Mr. Li, one of our Controlling Shareholders, chairman of the Board, executive Director and general manager; and (iii) 54.75% by Mr. Wu (our executive Director, chief financial officer, Board secretary and one of the joint company secretaries) and other 17 limited partners, none of which owned over 30% partnership interest in Chifeng Qingxi.

Chifeng Mingquan

Chifeng Mingquan is a limited partnership formed on March 17, 2022 under the laws of the PRC, focusing on rendering enterprise management consulting services. As of the Latest Practicable Date, Chifeng Mingquan was owned as to (i) approximately 15.56% by its general partner, Mr. Li, one of our Controlling Shareholders, chairman of the Board, executive Director and general manager; and (ii) approximately 84.44% by other 18 limited partners, none of which owned over 30% partnership interest in Chifeng Mingquan.

MAJOR ACQUISITIONS AND DISPOSALS

Throughout the Track Record Period and as of the Latest Practicable Date, we did not conduct any acquisitions, mergers or disposals that we consider to be material to us.

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

COMPLIANCE WITH GUIDE FOR NEW LISTING APPLICANTS

On the basis that (i) the consideration for the [REDACTED] was settled more than 28 clear days before the date of our first submission of the [REDACTED] application form to the Stock Exchange in relation to the [REDACTED] or no less than 120 clear days before the [REDACTED] (as the case may be), and (ii) no effective special rights of the [REDACTED] will exist after the [REDACTED], the Joint Sponsors confirm that the [REDACTED] are in compliance with Chapter 4.2 of the Guide for New Listing Applicants.

PREVIOUS PRC LISTING STATUS AND PLAN

Quoting on the NEEQ

To improve our corporate image and governance as well as to gain access to the equity capital market, the Company made an application for listing on the Beijing Stock Exchange. According to the provisions of the listing rules of the Beijing Stock Exchange, one way of becoming eligible to apply for listing is for an applicant to be an innovative tier company that has been continuously quoted on the NEEQ for 12 months (the “**Eligibility Requirement**”). Therefore and in order to meet the Eligibility Requirement, our then Shareholders resolved to apply for our Domestic Shares to be quoted on the NEEQ in 2022.

On November 15, 2022, our Company received approval for quoting its Domestic Shares on the NEEQ. On December 7, 2022, all issued Domestic Shares became quoted on the NEEQ under the stock code of 873969.

Voluntary Delisting from NEEQ

Having regard to the current capital markets environment and with a view to integrating internal and external resources more effectively, advancing a capitalization path more aligned with our own development needs and better maximizing the interests of the Company and all Shareholders, our Board resolved to voluntarily delist our Shares from the NEEQ. The delisting proposal was duly approved by our Shareholders on December 2, 2025. On December 22, 2025, our Shares were delisted from the NEEQ through a voluntary delisting application.

Our Directors confirmed that (i) during the period in which the shares of our company were quoted on the NEEQ and up to the Latest Practicable Date, our Company and our respective directors were not subject to any investigations or disciplinary actions in any material aspects in relation to our Company’s quotation on the NEEQ; and (ii) there has not been any matter that needs to be brought to the attention of the regulators and Hong Kong Stock Exchange in respect of our Company’s quotation on the NEEQ and its subsequent delisting. Based on the independent due diligence work performed by the Joint Sponsors, nothing has come to the attention of the Joint Sponsors that would lead them to cast doubts on the Directors’ confirmation with regard to the compliance records of the Company on the NEEQ.

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

A-Share Listing Application

On March 1, 2024, CITIC Securities Company Limited (中信證券股份有限公司) was engaged by our Company to provide tutoring and preliminary compliance advice with regard to the requirements of the CSRC for the application for potential A share listing on the Beijing Stock Exchange (the “**Pre-listing Tutorial**”), and we submitted the materials for the Pre-listing Tutorial to the Beijing Bureau of the CSRC on the same day. On June 25, 2025, the Company passed the inspection by the Beijing Bureau of the CSRC in respect of the Pre-listing Tutorial and submitted application for A-share listing on the Beijing Stock Exchange (the “**A-Share Listing Application**”) on the same day.

Having regard to our future strategic development and external environment of the capital markets, the Board resolved to withdraw the A-Share Listing Application on a voluntary basis on October 30, 2025. As confirmed by our Directors, there was no dispute between our Company and any parties engaged by our Company for the Pre-listing Tutorial and the A-Share Listing Application.

The Directors are of the view that there are no other matters relating to the Pre-listing Tutorial and the A-Share Listing Application that might affect our suitability for [REDACTED] on the Stock Exchange or need to be brought to the attention of the Stock Exchange and the potential investors. Based on the independent due diligence work performed by the Joint Sponsors, nothing has come to the attention of the Joint Sponsors that would lead them to cast doubts on the Directors’ view above.

PUBLIC FLOAT AND FREE FLOAT

So far as our Directors are aware, immediately following the completion of the [REDACTED] (assuming the [REDACTED] is not exercised), the Shares held by our core connected persons, representing [REDACTED]% of the issued share capital of our Company, will not be counted towards the public float for the purpose of Rule 8.08 of the Listing Rules after the [REDACTED]. Details of share capital that will not be regarded as public float immediately following the completion of the [REDACTED] (assuming the [REDACTED] is not exercised) are set out below:

- (a) Mr. Li, Chifeng Qingxi and Chifeng Mingquan, being our Controlling Shareholders, are core connected persons of our Company, and will hold approximately [REDACTED]% in aggregate of the total issued Shares of our Company; and
- (b) Dr. Han, being the non-executive Director of our Company and therefore a core connected person of our Company, will hold approximately [REDACTED]% of the total issued Shares of our Company.

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

Public Float

Pursuant to Rule 19A.13A(1) of the Listing Rules, where the expected [REDACTED] at the time of [REDACTED] of our Company’s H Shares does not exceed HK\$6 billion, at least 25% of the total number of H Shares must at the time of the [REDACTED] be held by the public. With respect to the indicative [REDACTED] Range of HK\$[REDACTED], HK\$[REDACTED] and HK\$[REDACTED] per [REDACTED] (being the low end, mid-point and upper-end, respectively), the expected [REDACTED] of the Company’s H Shares would not exceed HK\$[REDACTED]. Assuming that all the [REDACTED] are [REDACTED], the number of H Shares (including H Shares that are converted from Domestic Shares) held by the public at the time of the [REDACTED] would be [REDACTED] H Shares (representing approximately [REDACTED]% of our total number of issued H Shares), which will be regarded as public float and will satisfy the requirement under Rule 19A.13A(1) of the Listing Rules.

[REDACTED]

Pursuant to Rule 19A.13C(1) of the Listing Rules, there must be sufficient H shares where an applicant is a PRC issuer with no other [REDACTED] shares at the time of [REDACTED], held by the public and available for trading upon [REDACTED]. This would normally mean that the portion of the H shares for which [REDACTED] is sought that are held by the public and not subject to any disposal restrictions (whether under contract, the Listing Rules, applicable laws or otherwise), at the time of [REDACTED], must: (1) represent at least 10% of the total number of issued shares in the class to which H shares belong at the time of [REDACTED] (excluding treasury shares), with an expected [REDACTED] at the time of [REDACTED] of not less than HK\$50,000,000; or (2) have an expected [REDACTED] at the time of [REDACTED] of not less than HK\$600,000,000.

The Company is expected to satisfy the [REDACTED] requirement under Rule 19A.13C of the Listing Rules.

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

CAPITALIZATION OF OUR COMPANY

The following table illustrates the capitalization of the Company as of the date of this document and immediately upon completion of the [REDACTED] (assuming that the [REDACTED] is not exercised).

Shareholder	As of the Latest Practicable Date		Upon completion of the [REDACTED] (assuming that the [REDACTED] is not exercised)					
	Number of Shares	Percentage of shareholding in the Domestic Shares	Number of H Shares	Percentage of Shareholding in the H Shares	Number of Domestic Shares	Percentage of Shareholding in the Domestic Shares	Number of Shares	Percentage of shareholding in the total issued share capital of our Company

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

OUR SHAREHOLDING AND CORPORATE STRUCTURE

Our Corporate Structure Immediately Prior to the Completion of the [REDACTED]

The following chart sets forth our corporate structure immediately prior to the completion of the [REDACTED].

Notes:

1. Mr. Li, Chifeng Qingxi and Chifeng Mingquan are our Controlling Shareholders. For details, please refer to the section headed “Relationship with our Controlling Shareholders” in this document.
2. Dr. Han is the non-executive Director of our Company.
3. For the details of the background information of Chongqing Xianfeng, Yuhang Lapam, Pharmaceutical Fund, Kaiyuan Hongdao, Xizang Zhifan, please refer to the paragraph headed “[REDACTED]” in this section.
4. Shareholding percentages may not add up to 100% due to rounding.

Our Corporate Structure Immediately Following Completion of the [REDACTED]

The following chart sets forth our corporate structure immediately following the completion of the [REDACTED] (assuming the [REDACTED] is not exercised).

BUSINESS

OVERVIEW

Founded in 2016, we are a biotech company focused on the field of immune-inflammation, committed to becoming a leader in locally delivered targeted therapies. With innovative and original design and precise local delivery as our core capabilities, we specialize in chronic inflammatory disease treatment, aiming to provide innovative solutions that achieve efficacy, safety and long-term patient satisfaction.

Adhering to a patient-centric R&D philosophy, we pursue advanced efficacy, improved patient experience, and long-term tolerability of our drug products, aiming to ease treatment burden for patients and improve their quality of life. Based on our in-depth understanding of the immune-inflammatory signaling pathways, we have identified that the core pathological processes underlying diverse chronic diseases are strongly correlated with the synergistic effects of extracellular immune signal transduction, transcriptional regulation (as typified by the Janus kinase-signal transducer and activator of transcription (“**JAK-STAT**”) pathway), and immune cell activation regulatory pathways. Based on this insight, we have built an innovative product pipeline with originally designed molecules targeting multiple indications with considerable unmet medical needs and first-in-class potentials.

Leveraging our in-depth understanding of these signaling pathways and our comprehensive innovative drug development system, we have developed our late-stage Core Product, PG-011 (Pumecitinib), in two dosage forms, namely Pumecitinib gel for atopic dermatitis and Pumecitinib nasal spray for allergic rhinitis. We also have a diverse portfolio of product candidates, including PG-033 tablets for pruritus, PG-018 tablets for autoimmune kidney diseases, and PG-040 ophthalmic solution for glaucoma.

- **Pumecitinib gel:** the first JAK inhibitor gel in the world for the treatment of atopic dermatitis, for which we have completed Phase III clinical trial for the indication of atopic dermatitis in adults and adolescents aged 12 to 17, pending the submission of NDA. We are currently expanding the indications of Pumecitinib gel to treat atopic dermatitis in children aged two to 11.
- **Pumecitinib nasal spray:** the first JAK inhibitor nasal spray in the world for the treatment of seasonal allergic rhinitis (“**SAR**”), currently under Phase III clinical trial for the indication of SAR in adults. We are also expanding the indications of Pumecitinib nasal spray for treatment of SAR in adolescents aged 12 to 17 and for treatment of perennial allergic rhinitis (“**PAR**”) in adults.
- **PG-033 tablet:** a transient receptor potential vanilloid 3 (“**TRPV3**”) inhibitor with first-in-class potential, inhibiting calcium ion release channels and blocking pruritus signaling pathways, currently under Phase I studies. In addition to treating pruritus associated with neurodermatitis, we have also extended the indication of PG-033 to relieve intractable pruritus and hyperkeratosis associated with Olmsted syndrome, which is a genetic disease triggered by hyperactivation of the TRPV3 gene. The disease has no approved therapies and represents an urgent unmet medical need.

BUSINESS

- **PG-018 tablet:** a JAK1-ROCK dual-target inhibitor with first-in-class potential to treat autoimmune kidney diseases, targeting both JAK1 and endothelin receptor-related Rho-associated coiled-coil containing protein kinase (“**ROCK**”), currently under Phase I clinical studies. PG-018 is designed to inhibit the abnormally activated immune functions by acting on JAK1 and reduce blood pressure by acting on ROCK. Targeting on the two pathological mechanisms simultaneously, PG-018 is expected to achieve synergistic clinical benefits for treating autoimmune kidney diseases such as membranous nephropathy and IgA nephropathy.
- **PG-040 ophthalmic solution:** a ROCK-JAK dual-target ophthalmic solution with first-in-class potential as a novel treatment of glaucoma. It is designed to reduce intraocular pressure (“**IOP**”) by ROCK inhibition and, at the same time, to achieve an anti-inflammation effect by JAK inhibition. It is expected to deliver synergistic clinical benefits achieve superior optic nerve protection compared with conventional glaucoma therapies that focus primarily on IOP lowering.

Our In-depth Understanding of Inflammatory Pathways in Chronic Diseases and Their Clinical Applications

Immunology and inflammation have long been the core area of our R&D efforts. Abnormal activation of immune-related pathways (as typified by the JAK-STAT pathway) is a shared pathological mechanism of numerous chronic diseases. Based on this fundamental insight, we aim to bridge the gap between mechanistic research and clinical translation and address the unmet medical needs through the modulation of such key pathways. We have established an integrated R&D platform of targeted drug molecule design and innovative formulation development, and built a diverse product pipeline for chronic inflammatory disorders, covering multiple therapeutic indications. The diagram below illustrates the targeted organs and tissues of our major product candidates.

BUSINESS

Our Product Pipeline

Our product pipeline mainly consists of independently developed innovative drug candidates. As of the Latest Practicable Date, the progress of our innovative drug candidates was as follows:

Product	Target	Indication	Dosage Form	Pre-clinical	IND	Phase I	Phase II	Phase III	NDA	Expected Milestones
PG-011★ (Pumecitinib)	JAK1/2	AD (adults, adolescents aged 12 to 17)	Gel							NDA planned in 2026Q1
		AD (children aged two to 11)	Gel							Phase I planned to commence in 2026Q4
		SAR (adults)	Nasal Spray							NDA planned in 2026Q4
		SAR (adolescents aged 12 to 17)	Nasal Spray							Phase I planned to commence in 2027
		PAR (adults)	Nasal Spray							Phase II planned to commence in 2026Q4
		PN ⁽¹⁾	Gel							Phase IIb planned to commence in 2028
		NSV ⁽²⁾	Gel (II)							Phase II planned to commence in 2028
PG-033	TRPV3	Pruritus (China)	Tablet							Phase II planned to commence in 2026Q4
		Olmsted Syndrome (China)	Tablet							IND planned in 2027
		Pruritus (U.S.)	Tablet							IND planned in 2027
PG-018	JAK1/ROCK	Membranous Nephropathy	Tablet							Phase II planned to commence in 2027
PG-040	ROCK/JAK	Glaucoma (China)	Eyedrop							IND planned in 2026Q2
		Glaucoma (U.S.)	Eyedrop							IND planned in 2027
PG-312	MRGPRX2	Urticaria	Capsule							IND planned in 2027

Abbreviations: JAK: Janus kinase; ROCK: Rho-associated coiled-coil containing protein kinase; TRPV3: transient receptor potential vanilloid 3; MRGPRX2: Mas-related G-protein coupled receptor member X2; AD: atopic dermatitis; SAR: seasonal allergic rhinitis; PAR: perennial allergic rhinitis; PN: prurigo nodosa; NSV: non-segmental vitiligo

Notes:

★ = Core Product

- (1) We completed a Phase I clinical trial of Pumecitinib gel for atopic dermatitis in 2021, which laid the foundation for the clinical development of Pumecitinib for the treatment of prurigo nodosa. Based on the result of such Phase I clinical trial, we have received the IND approval for Phase II clinical trial for Pumecitinib gel for the indication of prurigo nodosa, with no additional Phase I clinical trial required.
- (2) We completed a Phase I clinical trial of Pumecitinib gel (II) for atopic dermatitis in January 2025, which laid the foundation for the clinical development of Pumecitinib for the treatment of NSV indication. Based on the result of such Phase I clinical trial, we have received the IND approval for Phase II clinical trial for Pumecitinib gel (II) for the indication of non-segmental vitiligo, with no additional Phase I clinical trial required.

Our Core Product: PG-011 (Pumecitinib) — a JAK1/JAK2 Inhibitor designed for topical use

PG-011 (Pumecitinib) is a small molecule inhibitor targeting JAK1/JAK2, specifically designed to be suitable for topical use. As a key pathway of the “immune-inflammation” network, the JAK-STAT pathway can simultaneously transmit multiple cytokines relating to immune, inflammation and pruritus, making it an ideal target for us to develop locally-delivered targeted therapies (such as Pumecitinib) for atopic dermatitis and allergic rhinitis. To reduce systemic safety risks, our strategy is to develop topical JAK inhibitors with minimal absorption to blood. As of the Latest Practicable Date, we had completed a Phase III clinical

BUSINESS

trial of Pumecitinib gel for the treatment of atopic dermatitis in adults and adolescents aged 12 to 17; we were also conducting a Phase III clinical trial of Pumecitinib nasal spray for seasonal allergic rhinitis as of the same date. We are also actively exploring indication expansions for Pumecitinib, including perennial allergic rhinitis, prurigo nodularis and non-segmental vitiligo.

Pumecitinib gel: The first JAK inhibitor gel for the treatment of atopic dermatitis

Atopic dermatitis is a chronic inflammatory skin disease characterized by recurrence and the need for long-term management. Currently, there are more than 72 million patients in China, of which over 90% are mild-to-moderate cases, with a relatively high proportion being pediatric patients. Currently, a significant majority of doctors believe that existing atopic dermatitis treatment plans do not render satisfactory effects while resulting in adverse reactions. This presents significant unmet medical needs for innovative treatment methods.

Innovative Breakthrough: Pumecitinib gel can achieve a broad-spectrum anti-inflammation effect, and is designed to ensure good long-term tolerance and safety and patient compliance in clinical application. It can address the unmet medical needs for the treatment of atopic dermatitis arising from insufficient efficacy and undesirable adverse reactions of traditional topical drugs, significant systemic side effects of oral JAK inhibitors associated with high blood drug concentration, and greasiness of currently approved ointments.

- Pumecitinib can efficiently inhibit multiple inflammatory cytokines such as IL-4, IFN- γ , IL-6, IL-12, IL-1 β , and TGF- β 1, covering a wider range of inflammatory factors compared to similar drugs. By inhibiting on more inflammation-related factors, it can effectively block inflammatory signal transduction from the origin.

The following chart illustrates the inhibitory effect of Pumecitinib compared with two other approved JAK inhibitors:

BUSINESS

The following table illustrates the Phase III clinical efficacy indicators of Pumecitinib gel compared to similar topical JAK inhibitors:

Administration and Dosage Form	Pumecitinib Gel		Ivamacitinib Ointment			Ruxolitinib Cream					
	PG-011-AD-301 (BID, 8 Weeks)		(BID, 8 Weeks)			TRuE-AD1 (BID, 8 Weeks)			TRuE-AD2 (BID, 8 Weeks)		
	3% gel	Placebo	1% Ointment	0.5% Ointment	Placebo	1.5% cream	0.75% cream	Placebo	1.5% cream	0.75% cream	Placebo
Percentage Change in EASI . . .	-70.2%	-32.5%	-62.8%	-61.9%	-43.2%	-77.2%	-72.2%	-40.5%	-74.7%	-74.8%	-28.9%
Percentage of Participants											
Achieving EASI 75	53.8%	10.9%	45.1%	42.6%	17.9%	62.1%	56.0%	24.6%	61.8%	51.5%	14.4%
Percentage of Participants											
Achieving IGA Success	33.2%	3.4%	26.2%	21.3%	10.6%	53.8%	50.0%	15.1%	51.3%	39.0%	7.6%

Notes:

- (1) Percentage Change in EASI (Eczema Area and Severity Index from baseline): the proportion/degree of improvement in the Eczema Area and Severity Index. Larger absolute value means better drug efficacy.
- (2) Percentage of Participants Achieving EASI 75: the proportion of subjects with an improvement of $\geq 75\%$ in EASI score from baseline.
- (3) IGA: Investigator’s Global Assessment, with a score range of 0-4 points, where zero indicates no skin lesions, and higher score means more severe symptoms.
- (4) Percentage of Participants Achieving IGA Success: the proportion of participants whose IGA score is zero or one point after medication and has improved by at least two points from baseline, where higher value means better drug efficacy.

- Through molecular modification and formulation optimization tailored for local treatment, Pumecitinib gel is designed to retain in the skin and achieve potent local efficacy, while significantly reducing potential safety issues resulted from high blood drug concentration compared to similar drugs.

In clinical studies, Pumecitinib gel demonstrated low systemic exposure, with blood drug concentrations ranging from 0.097 ng/mL to 0.16 ng/mL after 52 weeks of treatment with 3% gel. By comparison, other approved topical JAK inhibitors have reported, at their respective treatment formulation concentrations, higher systemic exposure of 17.1 – 17.7 ng/mL (for ruxolitinib) and 4.3 – 11.4 ng/mL (for delgocitinib).

- Pumecitinib gel is grease-free and easy to apply, and spreads evenly on the skin, thus rendering a mild and soothing touch. It overcomes the issue of greasiness associated with some of the traditional topical preparations. These attributes lead to great patient compliance.

BUSINESS

Clinical Positioning and Prospects: As the first topical JAK inhibitor gel for treatment of atopic dermatitis, Pumecitinib gel demonstrates excellent efficacy in adolescent and adult atopic dermatitis patients. Compared with similar products under development in China, Pumecitinib gel shows competitive efficacy in all key efficacy endpoints. Compared with approved similar drugs, Pumecitinib gel strikes a better balance between efficacy and safety, achieving desired efficacy level with lower systemic exposure. This makes Pumecitinib gel a suitable option for long-term maintenance treatment for chronic diseases like atopic dermatitis.

Given its advantages of the lower systemic absorption than similar products and skin-friendliness, its clinical application could be expanded to pediatric populations that require higher safety standards due to their thinner, more sensitive and delicate skin. We are currently planning to commence the Phase I clinical trial for Pumecitinib gel for the indications of atopic dermatitis in children aged two to 11 years.

Pumecitinib nasal spray: The first JAK inhibitor nasal spray in the world for the treatment of seasonal allergic rhinitis

Symptoms of seasonal allergic rhinitis mainly include nasal congestion, runny nose, sneezing, nasal itching, and hyposmia, which significantly affect patients’ quality of life. According to Frost & Sullivan, there are currently more than 246 million patients with allergic rhinitis in China, with large and rapidly growing market size expected to exceed RMB22.1 billion by 2033. According to Frost & Sullivan, approximately 60% of patients in China experience disease recurrence after treatment with conventional therapies. As such, there is an urgent and huge clinical demand for an innovative drug that can break away from the traditional hormone mechanism and has both potent efficacy and good safety.

Innovative Breakthrough: Pumecitinib nasal spray is the first JAK inhibitor nasal spray globally for the treatment of seasonal allergic rhinitis. With the local delivery of JAK inhibitor enabled by nasal spray device, it offers a new paradigm for treatment of allergic rhinitis. It delivers a strong relief of symptoms while avoiding the side effects associated with systemic medications and/or localized application of hormones. Additionally, it is also capable of simultaneously controlling nasal and ocular allergic symptoms:

- Through the dosage form of nasal spray, Pumecitinib is directly delivered to the inflammatory target area of the nasal mucosa. This ensures efficient drug absorption in the nasal mucosa and provides quick and strong relief of core symptoms of allergic rhinitis, such as sneezing, nasal congestion, runny nose, and nasal itching.

BUSINESS

The following table sets forth a comparison of efficacy between Pumecitinib nasal spray and an approved nasal spray therapy (Olopatadine Hydrochloride and Mometasone Furoate Monohydrate Nasal Spray, also known as GSP301) combining antihistamine (olopatadine hydrochloride) and corticosteroid (mometasone furoate), with the least-squared (LS) mean difference between the treatment and placebo groups demonstrating the efficacy of the relevant drug:

	Pumecitinib Nasal Spray (IIa)				Pumecitinib Nasal Spray (IIb)				Olopatadine Hydrochloride and Mometasone Furoate Monohydrate Nasal Spray (GSP301) ⁽¹⁾			
	1.0%, BID	0.6%, BID	0.1%, BID	Placebo	0.6%, BID	0.6%, QD	0.3%, BID	Placebo	GSP301 (665µg/25µg, BID)	Olopatadine hydrochloride (665µg, BID)	Mometasone furoate (25µg, BID)	Placebo
Average baseline rTNSS	9.4	9.8	9.5	8.9	10.1	10.1	9.8	9.8	10.1	10.2	10.2	10.3
Change from baseline (LS mean)	-3.497	-3.479	-3.057	-2.295	-4.187	-3.008	-3.177	-1.983	-3.5	-3.1	-3.1	-2.4
LS mean difference (95% CI) . . .	-1.202 (-2.193, -0.211) ⁽²⁾	-1.184 (-2.188, -0.180) ⁽²⁾	-0.762 (-1.765, 0.240) ⁽²⁾	n/a	-2.204 (-2.985, -1.423) ⁽²⁾	-1.026 (-1.793, -0.258) ⁽²⁾	-1.195 (-1.962, -0.427) ⁽²⁾	n/a	n/a	-0.4 (-0.8, -0.1) ⁽³⁾	-0.5 (-0.9, -0.1) ⁽³⁾	-1.1 (-1.5, -0.7) ⁽³⁾

Notes:

- (1) Data extracted from the FDA-approved label for GSP301.
 - (2) Represents the LS mean difference in rTNSS between the relevant treatment group and the placebo group.
 - (3) Represents the LS mean difference in rTNSS between the relevant treatment/placebo group and the GSP301 treatment group.
- In addition to the relief of nasal symptoms, Pumecitinib nasal spray also relieves ocular allergic symptoms associated with allergic rhinitis, simultaneously solving the common clinical problem of combined ocular and nasal allergies. It is one of the few drugs that have shown comprehensive improvement in both nasal and ocular symptoms in clinical studies.
 - Pumecitinib nasal spray offers a non-hormonal innovative therapy and avoids the side effects that are commonly associated with intranasal corticosteroids, such as nose bleeding, nasal dryness, nasal mucosa thinning and headaches. As an innovative drug developed for SAR treatment, Pumecitinib nasal spray provides SAR patients with a new treatment choice. The locally applied dosage form also helps avoid the risk of systemic side effects associated with oral antihistamines and oral JAK inhibitors.

BUSINESS

Clinical Positioning and Prospects: As the first JAK inhibitor nasal spray globally for the treatment of seasonal allergic rhinitis, Pumecitinib nasal spray pioneers a new non-hormonal treatment that simultaneously relieves both nasal and ocular symptoms. Clinical study data show that it has the potential to provide a strong and effective treatment of allergic rhinitis, and is expected to bring a better treatment plan for the majority of rhinitis patients, including adults and adolescents.

Our Other Clinical-stage Pipeline Products

PG-033 tablets: Oral small molecule TRPV3 inhibitor for treatment of pruritus with first-in-class potential

Pruritus is a common clinical symptom that is difficult to treat. Antihistamine, as a traditional therapy for pruritus, often demonstrates lack of desirable relief of symptoms; other traditional therapies include glucocorticoids and immunomodulators, which often cause adverse reactions and are not suitable for long-term use. Olmsted syndrome is a rare genetic disease, which is triggered by hyperactivation the TRPV3 gene resulting from pathogenic gain-of-function mutations. It is associated with severe pruritus and skin hyperkeratosis. Currently, there is no approved therapy for Olmsted syndrome, which presents a significant unmet medical need.

Innovative Breakthrough: As a clinical-stage oral small molecule TRPV3 inhibitor with first-in-class potential, PG-033 is designed to block the pruritus signaling pathway. This presents the potential of a new treatment plan for pruritus. In addition, as a specific TRPV3 inhibitor, PG-033 targets precisely on the cause of Olmsted syndrome, which is over-activation of TRPV3. As such, PG-033 can be an effective treatment for Olmsted syndrome.

- By specifically targeting TRPV3, PG-033 can block pruritus signal mediated by multiple pro-inflammatory cytokines, and has demonstrated marked pruritus relief in pre-clinical studies, with the potential to benefit patients in clinical settings.
- Olmsted syndrome is a genetic disorder primarily caused by TRPV3 gene mutations, characterized by intractable pruritus and hyperkeratosis. PG-033 is developed as a potentially first-in-class targeted therapy, which acts directly on the pathogenic TRPV3 mutations.

Clinical Positioning and Prospects: Currently, we are advancing the Phase I clinical study of PG-033, bringing a breakthrough treatment for pruritus patients who are not satisfied with existing therapies. It also brings hope of relief for patients with the rare disease of Olmsted syndrome. We plan to further expand the indications for PG-033 to other types of pruritus and/or hyperkeratosis disorders, and to explore overseas license-out opportunities.

BUSINESS

PG-018 tablets: Dual-target inhibitor of JAK1 and endothelin receptor-related ROCK for treatment of autoimmune kidney diseases with first-in-class potential

PG-018 is an innovative small molecule drug that selectively inhibits both JAK1 and endothelin receptor-related ROCK. Since there are currently no approved drugs for membranous nephropathy globally, we believe PG-018 could provide an innovative treatment for the disease. Based on the acting mechanism of PG-018, it can also be applied to the treatment of other forms of immunological kidney diseases, such as IgA nephropathy.

Innovative Breakthrough: PG-018 tablets build a new paradigm for the treatment of autoimmune kidney diseases by acting on two pathological pathways. Given its innovative acting mechanism and high drug concentration in kidney tissue as demonstrated in pre-clinical studies, PG-018 is expected to achieve synergistic effects treating autoimmune kidney disease and offer a solution to the challenges of no approved therapy (for membranous nephropathy, for example) or insufficient efficacy with single agent therapies.

- PG-018 can inhibit abnormally activated immune function by acting on JAK1, and reduce blood pressure by acting on endothelin receptor-related ROCK. As such, it is expected to offer a more effective treatment for autoimmune kidney diseases such as membranous nephropathy through strong synergistic effects.
- In pre-clinical studies, PG-018 has demonstrated the characteristic of kidney tissue-preferential distribution. This allows efficient accumulation of PG-018 molecules at renal lesion sites, enabling it to act more effectively on the target organ.

Clinical Positioning and Prospects: Currently, PG-018 is under Phase I clinical study, and is expected to start Phase II clinical trial in 2027. It is expected to offer an efficient new treatment option for autoimmune kidney disease patients to simultaneously inhibit abnormally activated immune function and lower blood pressure without combined medications.

Our Pre-clinical Pipeline Candidates

PG-040 ophthalmic solution: a ROCK-JAK dual-target inhibitor for treatment of glaucoma with first-in-class potential

Glaucoma is an ocular degenerative disease characterized by elevated intraocular pressure (“IOP”) leading to decreased visual acuity and visual field defects. If not treated in time, it may lead to vision loss and eventual blindness. It is one of the top three eye diseases causing blindness.

Recent research has found that immune-inflammation is one of the core driving mechanisms of optic nerve damage. As such, we developed PG-040, a ROCK-JAK dual-target inhibitor for treatment of glaucoma with first-in-class potential. It is designed to simultaneously target IOP reduction and inflammation inhibition, representing a promising candidate for next-generation glaucoma treatment.

BUSINESS

Innovative Breakthrough: PG-040 integrates the effects of ROCK inhibitors and JAK inhibitors to simultaneously deliver the effects of IOP reduction and anti-inflammation, thus achieving synergistic effect to better protect the optic nerve. It has the potential of overcoming the limitations of existing glaucoma treatment, which focuses on IOP control while still facing challenges of progressive optic nerve damage, visual field defect and/or blindness.

- Through ROCK pathway inhibition, PG-040 can reduce aqueous humor outflow resistance by relaxing trabecular meshwork cells and lowering episcleral venous pressure. This helps enhance aqueous humor drainage and reduce IOP, which is traditionally recognized as the core risk factor for glaucoma-related blindness.
- Through JAK pathway inhibition, PG-040 can suppress glaucoma-associated inflammation. Specifically, it inhibits immune responses triggered by retinal ganglion cell (“**RGC**”) dysfunction and sustained excessive glial activation, thereby protecting RGCs and delaying progressive neurodegeneration associated with glaucoma. This aligns with the latest recognition that inflammatory optic nerve damage, in addition to IOP elevation, is a key factor contributing to glaucoma-related blindness.

Clinical Positioning and Prospects: As of the Latest Practicable Date, PG-040 was in pre-clinical stage. We plan to submit an IND application to the NMPA for PG-040 for the treatment of glaucoma in the second quarter of 2026. PG-040 is expected to provide a more comprehensive and effective treatment option for glaucoma patients, achieving the comprehensive effect for the treatment of glaucoma of IOP control, anti-inflammation, and optic nerve protection.

Our Other Pre-clinical Pipeline Candidates

In addition to the clinical-stage pipeline products above, we are extending our pre-clinical pipeline to other chronic diseases such as urticaria, chronic kidney diseases, acute and chronic pain, metabolic and degenerative diseases, cardiovascular and cerebrovascular diseases, and wound healing disorders. Targeting the physiological barrier characteristics and specific pathways of different tissues, we customize AI-driven molecular designs and formulation differentiated, targeted treatment strategies. We believe this diversified, wide-covering portfolio of pipeline candidates will further strengthen our core competitiveness and bring us resilience against market fluctuations and strengthen our competitiveness.

Our Generic Drug Pipeline Products

While actively promoting the development of innovative drugs, we also engage in generic drug research and development, building a more robust product matrix with a strategic focus on dermatological diseases through the combination of innovative and generic drugs. The indications of our generic drug candidates effectively supplement our innovative drug product portfolio. We expect that the commercialization of such generic drug products will enable us to realize near-term monetary values for us, as well as build up and strengthen our commercialization capabilities.

BUSINESS

OUR STRENGTHS

Forward-looking layout of multiple proprietary pipeline products focusing on the field of immune-inflammation

We have established a diversified product pipeline, comprising multiple independently-developed small molecule innovative drug candidates as well as a number of generic drug candidates targeting multiple diseases. We believe chronic inflammatory diseases share an overlapping pathogenic network anchored in signaling pathways, typified by the JAK-STAT pathway. Based on this insight, coupled with our profound understanding of the clinical pain points and application scenarios for the treatment of these diseases, we have established a diversified product pipeline across multiple therapeutic areas through targeted original design. For atopic dermatitis, we are developing the first topical JAK inhibitor gel, with a dedicated focus on optimizing patient comfort in external application; for allergic rhinitis, we have pioneered the introduction of a novel JAK-targeted anti-inflammatory strategy, establishing our leading position in this field; for glaucoma and autoimmune kidney diseases, we have leveraged our molecular design capabilities to pursue next-generation treatment with superior efficacy compared to conventional therapies. Further, building on our in-depth understanding of neuroimmune mechanisms such as cellular crosstalk and molecular regulation, we have targeted upstream ion channels and developed PG-033, a TRPV3 inhibitor with first-in-class (“FIC”) potential.

Our core product, PG-011 (Pumecitinib), is a topical small-molecule inhibitor targeting JAK1/JAK2, with leading indications including mild-to-moderate atopic dermatitis (as the first JAK inhibitor gel) and seasonal allergic rhinitis (as the first JAK inhibitor nasal spray globally for this indication); other proposed indications for PG-011, such as prurigo nodularis and non-segmental vitiligo, are also under development. In addition to PG-011, our portfolio of innovative drug candidates also include PG-033 (a TRPV3 inhibitor with FIC potential for moderate-to-severe pruritus), PG-018 (a dual-target inhibitor for autoimmune kidney diseases with FIC potential), PG-040 (a dual-target inhibitor for treatment of glaucoma with FIC potential), and PG-312 (a MRGPRX2 inhibitor for urticaria with FIC potential).

Through our R&D endeavors, we have established a diversified product pipeline covering skin diseases, allergic rhinitis, glaucoma, kidney diseases, and pruritus. We believe our innovative and market-driven small-molecule product pipeline is well-positioned to address a broad range of indications with significant unmet medical needs, with a strategic focus on innovative drugs for immune-inflammatory diseases and new topical drugs for dermatological diseases.

BUSINESS

Significant commercialization potential of our Core Product reinforced by strategic alliance with pharmaceutical leaders

According to Frost & Sullivan, the total number of patients with atopic dermatitis in China reached approximately 72.9 million in 2024 and is expected to increase to approximately 77.5 million and 80.8 million in 2028 and 2033, respectively, with over 90% patients having progressed to mild-to-moderate disease. This presents a significant addressable market for Pumecitinib gel with urgent and unmet medical needs, particularly given the limitations of traditional treatments. As of the Latest Practicable Date, we had completed the Phase III clinical trial of Pumecitinib gel for the treatment of atopic dermatitis in adults and adolescents aged 12 to 17, which ranked among the most advanced among drug candidates under clinical development in China. In parallel, we are planning to expand the target patient population to include pediatric patients aged two to 11 years.

Additionally, allergic rhinitis is also significantly impacting a vast population in China and globally. According to Frost & Sullivan, there are currently more than 246 million patients with allergic rhinitis in China, of which approximately 40% suffer from SAR, representing a market of substantial size with rapid growth potential. Based on its unique mechanism of action and local administration advantages, we believe Pumecitinib may provide a new treatment option for patients with insufficient response to existing therapies, with great commercialization potential as represented by the considerable patient population. As of the Latest Practicable Date, we were conducting a Phase III clinical trial of Pumecitinib nasal spray for seasonal allergic rhinitis in adults. We expect to complete such Phase III clinical trial and submit the NDA for Pumecitinib nasal spray in the fourth quarter of 2026. As of the Latest Practicable Date, we have entered into an exclusive cooperation agreement with Jumpcan Pharmaceutical Group Limited (“**Jumpcan Pharmaceutical**”) on the commercialization and marketing of Pumecitinib nasal spray. For details, see “— Commercialization.”

In addition, the convenient administration attribute of the topical forms of our Core Product is precisely compatible with online diagnostic and prescription scenarios, alleviating patients from the burden of onsite visits. In the future, we may expand our market channels with e-commerce platforms, further unleashing the commercialization potential of our Core Product. Furthermore, we are also actively exploring indication expansions for Pumecitinib, including perennial allergic rhinitis, prurigo nodularis and non-segmental vitiligo, which we believe may further enhance its commercialization potential.

Integrated full-chain innovative drug R&D system with comprehensive technical capabilities covering the entire drug development lifecycle

We have established an integrated, end-to-end innovative drug research and development platform covering all stages in innovative drug research and development from early-stage discovery to clinical development and commercialization. Leveraging our in-house R&D capabilities, we have advanced a number of independently discovered molecules into clinical-stage studies.

BUSINESS

We have assembled a comprehensive innovative drug research and development and commercialization platform comprising expertise in biology, medicinal chemistry, pharmacology and toxicology, drug synthesis, pharmaceutical formulation, pharmaceutical analysis, regulatory affairs, clinical medicine, clinical operations, pharmacovigilance, project management, manufacturing quality and commercial operations. This multidisciplinary structure supports effective product lifecycle management spanning research and development, quality management and pharmacovigilance, enabling us to manage our product candidates systematically from discovery through post-marketing stages.

Our in-house research and development capabilities encompass all key stages of innovative drug development, including drug target identification and mechanism-of-action validation, translational medicine research, molecule design and screening, pre-clinical studies, manufacturing and controls, as well as clinical trial design and execution. These capabilities allow us to maintain a high degree of control over development timelines, quality standards and strategic decision-making across both early- and late-stage development programs.

Proprietary core technology platforms for sustained R&D momentum

We have established proprietary and synergistic R&D platforms from novel original design to translational medicine, empowered by our accumulated know-hows in precision delivery. This enables us to efficiently transform in-depth medicine insights into differentiated drug candidates. We conduct targeted molecular design based on multi-dimensional analysis of pathological microenvironment, cellular signal networks and ideal drug properties. Targeting the need for promising skin retention and low systemic exposure in atopic dermatitis, we successfully developed the Pumecitinib molecule, whose physicochemical properties are a superb match for local treatment goals. Furthermore, our formulation capabilities transform potent molecules into suitable and user-friendly dosage forms. Pumecitinib gel and Pumecitinib nasal spray are direct evidence of our ability to transform molecular blueprints into innovative formulations available to patients.

Our translational medicine platform serves as an accelerator and decision-making hub connecting the laboratory and clinical practice. It verifies scientific hypotheses and guides clinical development through the construction of highly relevant disease models. The synergistic features of our technology platforms fuel our continuous innovation. Together, they drive the rapid advancement of our pipelines, enabling us to systematically address a series of unmet medical needs from common chronic inflammation to complex intractable diseases.

Experienced leadership and high-caliber team

We are led by an experienced and visionary management team, and we have established effective mechanisms to attract and retain high-calibre professional talent to support the sustainable development of our business. As of September 30, 2025, over 90% of our full-time employees had obtained degree of bachelors or above, with over 50% of our total full-time employees possessing advanced degrees of masters or above, reflecting the strong academic

BUSINESS

foundation of our workforce. Our core R&D personnel have extensive experience in the relevant areas and have received multiple awards in recognition of their professional achievements. Our executive Director, deputy general manager and chief medical officer Dr. Du has over 20 years of experience in the pharmaceutical industry and extensive experience in the area of innovative drug development, including discovery, clinical development, product launch and management, with more than 20 articles published in the relevant professional area. Prior to joining our Company, Dr. Du worked for over a decade at leading multinational pharmaceutical companies Pfizer Inc. and GlaxoSmithKline Plc., where he led key research and development initiatives. We believe that the depth of experience of our management team and the strong professional capabilities of our research and development personnel provide a solid foundation for the execution of our development strategy and our long-term business growth.

OUR STRATEGIES

Advance the development progress of our Core Product and pipeline candidates

We intend to continue devoting resources and execution focus to the advancement and commercialization of our Core Product. As of the Latest Practicable Date, Pumecitinib gel had completed Phase III clinical trials. We plan to submit the NDA for Pumecitinib gel in the first quarter of 2026. In parallel, Pumecitinib nasal spray has completed Phase II clinical trials and is currently undergoing Phase III clinical trial, with an NDA submission planned for the fourth quarter of 2026. We plan to allocate substantial internal resources to support clinical execution, regulatory preparation and manufacturing readiness for our Core Product.

In addition to advancing our Core Product, we will continue to advance our existing pipeline products through disciplined progression of clinical and early-stage studies. As of the Latest Practicable Date, PG-018 was under Phase I clinical trials, and we expect to initiate Phase II clinical trials in 2027; PG-033 was under Phase I clinical trial for the indication of pruritus, with Phase II clinical trial expected to commence in the fourth quarter of 2026; PG-040 and PG-312 were progressing steadily through pre-clinical and early-stage studies. Through a balanced approach that combines near-term value realization with sustained pipeline development, we aim to build a diversified portfolio of innovative drug candidates addressing significant unmet medical needs.

Prepare commercialization layout for our Core Product and future pipeline

We plan to enhance the commercial readiness for our Core Product by commencing the construction of our proprietary manufacturing facility for Pumecitinib gel and Pumecitinib nasal spray prior to obtaining the regulatory approval for commercialization. We expect the construction period for these production lines to be approximately two years, subject to regulatory requirements, construction progress and equipment commissioning. Through early capacity planning and manufacturing readiness, we aim to enhance our ability to support the commercial launch and post-approval supply of our Core Product while maintaining compliance with applicable GMP standards and ensuring desirable product quality control.

BUSINESS

In terms of commercialization, we are actively engaging in discussions with leading domestic pharmaceutical companies regarding collaboration opportunities for the commercialization rights of our Core Product. Such collaborations are intended to leverage the partners’ established commercial infrastructure and market access capabilities to accelerate the market penetration and sales growth of our Core Product after regulatory approval. As of the Latest Practicable Date, we had entered into an exclusive cooperation agreement with Jumpcan Pharmaceutical on the commercialization rights of Pumecitinib nasal spray. For details on our cooperation with such marketing and commercialization partners, see “— Commercialization.” We believe we can rapidly promote our Core Product and achieve sales growth upon its commercialization, leveraging our existing and potential partners’ distribution channels and commercialization track records. Additionally, we plan to timely establish our in-house marketing team in line with our product launch schedule, and cooperate with our partners in formulating and implementing comprehensive commercialization and marketing plans for our products. With such collaboration, we believe our in-house marketing team could also be well-poised for the marketing and promotion of our future commercialized drug products.

Further advance innovative drug development through our integrated R&D platforms

We have established an integrated, end-to-end innovative drug R&D platform and accumulated solid R&D capabilities. Our platform can efficiently advance core discovery activities, including early-stage novel target exploration and lead compound identification, and ensure continuity across subsequent development phases. This lays a solid foundation for the development of innovative drugs in the field of immune and inflammatory diseases. Focusing on significant unmet medical needs, we will continue to leverage our R&D platform to build our sustainable and differentiated product pipeline, forming a business foundation with both clinical value and commercial potential.

Building on our existing platform and research accumulation on multiple targets (such as JAK, ROCK, and TRPV3) and related pathways, we intend to further enhance our platform efficiency and deepen our R&D efforts. Going forward, we will focus on the discovery and research of core biological mechanisms, including inflammation and immune-related pathways, ion channels, the interaction between inflammatory microenvironment and immune cells, and neuro-immune regulation, to guide our development of innovative drugs and achieve breakthroughs in both the depth and breadth of our R&D capabilities. In parallel, we will focus on addressing the three core challenges in the clinical translation of original innovative drugs, namely target druggability verification, translation barriers, and seamless connection between pre-clinical and clinical studies.

We believe that translational medicine is critical to overcoming the bottlenecks in the development of original innovative drugs. However, translational medicine capabilities remain relatively underdeveloped in China. We seek to address this gap by achieving a precise alignment between disease biology and therapeutic targets through the integration of cutting-edge technologies. We expect that this approach will not only identify suitable targets for specific diseases, but also enables us to explore appropriate indications for cutting-edge targets. Specifically, we plan to integrate cutting-edge technologies, such as organoids,

BUSINESS

single-cell sequencing, multi-omics analysis, *in vivo* imaging and live-cell imaging, together with AI computing power and algorithms, to support indication-specific target discovery, target-indication adaptation, target combination strategies and clinical treatment regimens optimization from a holistic perspective. This is expected to lay a strong foundation for overcoming key obstacles in clinical translation and advancing the development of original innovative drugs.

To enhance the efficiency of our platform upgrading and R&D deepening, we plan to adopt a strategy combining external collaboration, industry-university integration, and AI empowerment, with the objective of building a comprehensive R&D cooperation ecosystem. Specifically, we intend to: (i) Collaborate with external professional translational medicine institutions to supplement technical capabilities and support novel target discovery and indication expansion; and (ii) deepen our research collaboration with academic institutions, such as universities, and jointly advance the application of cutting-edge technologies, delivering R&D outputs with advanced technologies such as organoids, single-cell sequencing, multi-omics analysis, *in vivo* imaging and live-cell imaging, thereby establishing a closed-loop translational pathway from basic research to industrialized and clinical application.

All our collaboration initiatives are closely aligned with unmet medical needs, and are supported by AI technology across the workflow. We plan to continue leveraging AI technology to integrate cross-disciplinary and multi-dimensional R&D data, strengthen our translational medicine research platform, and overcome the core technical barriers in the clinical translation of original innovative drugs. Through these efforts, we aim to continuously strengthen our capabilities in candidate drug screening and optimization, novel target discovery and indication expansion, thereby supporting the long-term, high-quality development of our business.

Recruit, cultivate and retain talents to enrich team capabilities

We plan to continue recruiting suitable high-end talents in fields such as drug discovery, clinical development, translational medicine, and regulatory affairs in the core treatment areas of immunology and inflammation, to further promote our R&D capability and achieve long-term development. At the same time, we plan to establish a sound mentorship and training framework, encourage cross-departmental cooperation, strengthen employees’ scientific and project management capabilities, and cultivate comprehensive talents with a global perspective.

In addition, we plan to establish an in-house marketing team and the corresponding marketing compliance management framework. The team members will mainly include medical affairs, market access, marketing promotion, business, sales and compliance personnel. We will also recruit academic promotion personnel in our key markets for medical affairs and market education work. We have appointed our head of sales and marketing, and will ensure all necessary sales and marketing personnel are in place and well-trained before our Core Product receives regulatory approval for commercialization. We also plan to develop a proper personnel management and performance review framework specifically for our sales and marketing team.

BUSINESS

We maintain strict standards during the recruitment of our team members, including but not limited to educational background, relevant industry experience, and proven performance track records. At the same time, we will formulate performance targets, follow-up and evaluation mechanisms, as well as incentive plans and personnel development plans to motivate the team members and improve their long-term performance.

OUR PRODUCT PIPELINE

We primarily engage in the research, development and commercialization of innovative drugs in the immune-inflammation field. We believe that optimal treatment originates from a deep understanding of diseases and patients. As such, we have established a diversified therapeutic portfolio spanning dermatology, rhinology, ophthalmology and nephrology by leveraging our two core capabilities, namely innovative and original design and precise local delivery. Our strategy is to address significant unmet medical needs by introducing globally first-in-class localized therapies with clinically validated mechanisms, followed by extension of such precision intervention paradigm to a broader range of chronic inflammatory diseases. Through this approach, we aim to consistently deliver next-generation therapeutic solutions that achieve efficacy, safety and long-term patient experience.

As of the Latest Practicable Date, our product pipeline comprised five innovative drug candidates covering 10 indications, as well as five generic drug candidates targeting multiple chronic inflammatory diseases, all of which are self-developed.

The following chart illustrates our innovative drug pipeline and summarizes the development status of our clinical-stage drug candidates and selected pre-clinical-stage drug candidates as of the Latest Practicable Date.

BUSINESS

Product	Target	Indication	Dosage Form	Pre-clinical	IND	Phase I	Phase II	Phase III	NDA	Expected Milestones
PG-011 ★ (Pumecitinib)	JAK1/2	AD (adults, adolescents aged 12 to 17)	Gel							NDA planned in 2026Q1
		AD (children aged two to 11)	Gel							Phase I planned to commence in 2026Q4
		SAR (adults)	Nasal Spray							NDA planned in 2026Q4
		SAR (adolescents aged 12 to 17)	Nasal Spray							Phase I planned to commence in 2027

PG-312	MRGPRX2	Urticaria	Capsule							IND planned in 2027

Abbreviations: JAK: Janus kinase; ROCK: Rho-associated coiled-coil containing protein kinase; TRPV3: transient receptor potential vanilloid 3; MRGPRX2: Mas-related G-protein coupled receptor member X2; AD: atopic dermatitis; SAR: seasonal allergic rhinitis; PAR: perennial allergic rhinitis; PN: prurigo nodosa; NSV: non-segmental vitiligo

★ = Core Product

- (1) We completed a Phase I clinical trial of Pumecitinib gel for atopic dermatitis in November 2020, which laid the foundation for the clinical development of Pumecitinib for the treatment of prurigo nodosa. Based on the result of such Phase I clinical trial, we have received the IND approval for Phase II clinical trial for Pumecitinib gel for the indication of prurigo nodosa, with no additional Phase I clinical trial required.
- (2) We completed a Phase I clinical trial of Pumecitinib gel (II) for atopic dermatitis in January 2024, which laid the foundation for the clinical development of Pumecitinib for the treatment of NSV. Based on the result of such Phase I clinical trial, we have received the IND approval for Phase II clinical trial for Pumecitinib gel (II) for the indication of non-segmental vitiligo, with no additional Phase I clinical trial required.

BUSINESS

OUR CLINICAL STAGE PIPELINE PRODUCTS

Core Product PG-011 (Pumecitinib): A JAK1/JAK2 Inhibitor Designed for Topical Use

Overview

Our Core Product PG-011 (Pumecitinib) is a topical small molecule inhibitor targeting JAK1/JAK2. We developed Pumecitinib by thorough integration of signaling pathway regulation with real-world patient treatment needs, enabling a paradigm shift from systemic inhibition to localized precision treatment.

We are developing PG-011 in two dosage forms, namely gel and nasal spray. Pumecitinib gel is the first JAK inhibitor in gel form globally to treat allergic dermatitis, while Pumecitinib nasal spray is the first JAK inhibitor nasal spray globally for the treatment of seasonal allergic rhinitis, according to Frost & Sullivan. Both the two dosage forms of PG-011 locally deliver the active molecules to the affected sites, thus reducing the adverse effects resulting from systemic exposure commonly seen in the traditional form of oral JAK inhibitors.

As of the Latest Practicable Date, we had completed a Phase III clinical trial of Pumecitinib gel for the treatment of atopic dermatitis in adults and adolescents aged 12 to 17, which ranked among the most advanced among drug candidates under clinical development in China. We expect to submit the NDA of Pumecitinib gel to the NMPA in the first quarter of 2026. Subject to regulatory approval, Pumecitinib gel has the potential to provide an innovative, non-steroidal treatment option for patients with mild-to-moderate atopic dermatitis. In parallel, we are planning to expand the target patient population to include pediatric patients aged two to 11 years.

As of the Latest Practicable Date, we were conducting a Phase III clinical trial of Pumecitinib nasal spray for seasonal allergic rhinitis in adults. We expect to complete such Phase III clinical trial and submit the NDA for Pumecitinib nasal spray in the fourth quarter of 2026. We are also planning to expand the target patient population to include adolescents aged 12 to 17, with Phase I clinical trial planned to commence in 2027. Additionally, we are also actively exploring indication expansions for Pumecitinib, including perennial allergic rhinitis, prurigo nodularis and non-segmental vitiligo. For details, see “— Clinical Development Plan.”

Mechanism of Action

Research suggests that immune dysregulation, impairment of the skin barrier function and disruption of the skin microbiome are among the key contributing factors of atopic dermatitis. Patients with atopic dermatitis commonly exhibit multiple immunological abnormalities, among which T helper 2 (“Th2”) cell-mediated inflammatory responses are considered to be closely associated with disease onset and progression. IL-4 and IL-13 produced by Th2 cells are upregulated in patients with atopic dermatitis. Upon binding to their respective receptors,

BUSINESS

IL-4 and IL-13 activate JAKs, which are members of the intracellular protein tyrosine kinase family, and subsequently lead to phosphorylation of STAT proteins. This signaling cascade results in reduced expression of filaggrin, thereby contributing to skin barrier defects.

PG-011 is a small molecule that selectively inhibits JAK1/JAK2, thereby suppressing the JAK-STAT signaling pathway, a cytokine-stimulated signal transduction pathway that is involved in numerous critical biological processes, including cell proliferation, differentiation, apoptosis and immune regulation. Dysregulation or aberrant upregulation of the JAK-STAT signaling pathway may give rise to inflammatory diseases, autoimmune diseases or cancer.

For patients with allergic rhinitis, allergen-specific IgE is produced following inhalation of allergens through the nasal cavity. Such IgE binds to IgE receptors on the surface of mast cells and basophils, leading to allergic reactions. Upon re-exposure, allergen-induced IgE binding to its receptors triggers the release of histamine and other inflammatory mediators, resulting in vasodilation of the nasal mucosa and increased glandular secretion, thereby causing symptoms such as nasal itching and sneezing.

Such pathogenesis of allergic rhinitis is also closely associated with activation of the JAK-STAT signaling pathway. Pumecitinib nasal spray exerts its therapeutic effects by inhibiting the kinase activity of JAK1/JAK2, thereby suppressing JAK-STAT signaling pathway transduction, resulting in regulation of inflammatory responses associated with allergic rhinitis. By targeting and inhibiting JAK activity, and thereby interfering with cytokine-driven inflammatory signal transduction, Pumecitinib nasal spray can achieve multi-dimensional therapeutic effects during both the acute exacerbation phase and the chronic inflammatory phase of allergic rhinitis.

The diagram below illustrates the mechanism of action of PG-011:

Source: Company information

BUSINESS

Market Opportunity and Competition

Atopic dermatitis is a common inflammatory skin disease, usually characterized by chronic and relapsing complications with the need for long-term treatment. The World Health Organization’s Global Burden of Disease analysis indicates that skin diseases rank fourth among non-fatal disease burdens globally, with atopic dermatitis ranking first among non-fatal skin diseases in terms of disease burden. The persistence and progression of atopic dermatitis often have varying degrees of adverse impact on patients’ daily life and social interactions.

According to Frost & Sullivan, the total number of patients with atopic dermatitis in China reached approximately 72.9 million in 2024, and is expected to increase to approximately 77.5 million and 80.8 million in 2028 and 2033, respectively, of which over 90% are suffering from mild-to-moderate disease. At present, innovative topical therapies for atopic dermatitis mainly include topical JAK inhibitors and phosphodiesterase-4 inhibitors. According to Frost & Sullivan, there were only two topical JAK inhibitor products approved globally for the treatment of atopic dermatitis as of the Latest Practicable Date, namely ruxolitinib cream and delgocitinib ointment/cream. It is estimated that the market size for atopic dermatitis drugs in China will exceed RMB50.2 billion by 2033.

For an overview of the approved and clinical-stage JAK inhibitors for treatment of atopic dermatitis in China, please see “Industry Overview.”

Allergic rhinitis is also significantly impacting a vast population in China and globally. According to Frost & Sullivan, there are currently more than 246 million patients with allergic rhinitis in China, of which approximately 40% suffer from SAR, representing a market of substantial size with significant growth potential. According to Frost & Sullivan, existing standard treatments primarily include intranasal corticosteroids, antihistamines and leukotriene receptor antagonists. However, long-term use of intranasal corticosteroids is often accompanied by local adverse effects such as epistaxis, nasal dryness and headache, leading to poor patient compliance, and approximately 60% of patients experience disease recurrence. Consequently, there is a strong and urgent clinical demand for innovative therapies that offer both robust efficacy and favorable safety profiles.

Pumecitinib nasal spray is designed to address these unmet needs, with development objectives including: (i) simultaneous and potent control of both nasal and ocular allergic symptoms, (ii) fundamental avoidance of the typical adverse effects associated with corticosteroid therapies, and (iii) provision of a convenient single-agent therapy suitable for long-term disease management. Taking into account the above, we believe Pumecitinib gel and Pumecitinib nasal spray are expected to offer patients alternative and innovative topical treatment options upon their approval with considerable commercial potential.

As of the Latest Practicable Date, there was no approved JAK inhibitor nasal spray for treatment of allergic rhinitis. For an overview of the approved drugs and clinical-stage drug candidates for treatment of allergic rhinitis in China, please see “Industry Overview.”

BUSINESS

Advantages of PG-011 (Pumecitinib)

We believe that PG-011 (Pumecitinib) has the following advantages:

Molecule specifically designed for topical administration

The previous-generation JAK inhibitors, most of which are non-selective pan-JAK inhibitors, are often associated with potential adverse effects due to unnecessary interference with other signal transduction pathways in addition to the ones related to the intended diseases. We designed Pumecitinib for topical administration with a clear objective to provide a local treatment option that effectively controls disease symptoms without safety concerns or excessive treatment burden.

Empowered by our Novel Drug Design and Discovery Platform, we engineered a unique intramolecular hydrogen-bonding structure through computer-aided drug design (“**CADD**”), which stabilizes the molecule in its optimal spatial conformation, enabling it to bind firmly at the target protein binding site. In parallel, leveraging our predictive model for dermal topical molecules (“**PRED-DERM**”), we optimized the key physicochemical parameters of the PG-011 molecule to achieve moderate skin penetration with high tissue retention while maintaining minimal systemic exposure. As a result, Pumecitinib achieves effective local activity with considerably reduced risk for common adverse effects of pan-JAK inhibitors.

Clinical data demonstrate that the systemic exposure of Pumecitinib is significantly lower than that of comparable topical JAK inhibitors, providing a strong safety foundation for long-term use, particularly for future expansion into pediatric patient population.

Clinically validated efficacy and safety profile

Currently, the domestic treatment landscape for atopic dermatitis and allergic rhinitis is still largely dominated by traditional methods such as topical corticosteroids. Long-term use of such therapies may lead to adverse effects, such as skin atrophy and thinning, impaired skin barrier function, and irreversible striae. As a result, there is a strong and urgent clinical demand for innovative non-steroid topical therapies that offer proven efficacy with a favorable safety profile. Pumecitinib gel demonstrated compelling clinical values that have been validated in Phase III clinical trials. Compared to currently approved topical JAK inhibitor for treatment of atopic dermatitis, Pumecitinib gel achieves desired efficacy level with lower systemic exposure. This distinct pharmacokinetic profile may lead to better long-term safety profile of Pumecitinib gel, making it a suitable long-term maintenance treatment for chronic diseases like atopic dermatitis.

In addition, Pumecitinib nasal spray demonstrated the ability to comprehensively control multiple symptoms in clinical studies, highlighting its strong potential to serve as a potent single-agent therapy covering a broad symptom spectrum comparable to standard-of-care treatments. Compared with standard therapies, Pumecitinib nasal spray showed superior improvement in both nasal and ocular symptoms. Specifically, results from the Phase IIa and

BUSINESS

Phase IIb clinical trials indicated that, when compared with historical data for intranasal corticosteroids, antihistamines and fixed-dose combination therapies, changes in the primary endpoint, reflective total nasal symptom score (“**rTNSS**”), and the secondary endpoint, reflective total ocular symptom score (“**rTOSS**”), were superior or comparable. Pumecitinib nasal spray is among the few therapies that have demonstrated clinically significant improvement in both nasal and ocular symptoms. Overall, Pumecitinib nasal spray has demonstrated the potential of superior efficacy comparable to standard treatments in comprehensive symptom relief, and is expected to provide a potent, safe and convenient monotherapy treatment option for patients with recurrent disease or dissatisfaction with existing therapies.

Dosage forms designed for real-world application

The gel and nasal spray forms of Pumecitinib is a critical element of our strategy to achieve local delivery and minimize systemic exposure. For instance, we selected an aqueous gel form of Pumecitinib that helps optimize local pharmacokinetics. The non-greasy texture makes it suitable for sensitive areas such as the face, neck and intertriginous areas (skin folds) and avoid staining of clothing. More importantly, this formulation enables precise control over drug distribution and release within the skin, thereby achieving effective local treatment while minimizing systemic exposure and enhancing long-term safety and convenience of use at the formulation level.

Summary of Clinical Trials

The following sets forth an overview of the key clinical trials of PG-011 (Pumecitinib):

A multi-center Phase III clinical trial to evaluate the efficacy, safety, and 52-week long-term safety of Pumecitinib gel in adult and adolescent (aged 12-17) patients with mild-to-moderate atopic dermatitis

We completed a Phase III clinical trial of Pumecitinib gel for the treatment of mild-to-moderate atopic dermatitis in adults and in adolescents aged 12 years and above in China in October 2025, and expect to submit the NDA to the NMPA in the first quarter of 2026. Based on the data collected and analyzed, we concluded that 3% Pumecitinib gel significantly alleviated clinical symptoms in patients with mild-to-moderate atopic dermatitis, and was generally well tolerated with no serious adverse events (“**SAEs**”) observed that were related to Pumecitinib. Based on the foregoing results, 3% Pumecitinib gel demonstrates meaningful clinical benefits for the treatment of mild-to-moderate atopic dermatitis in adolescents aged 12 years and above and in adults.

Trial Design. The pivotal Phase III clinical study of Pumecitinib gel was a multi-center, randomized, double-blind, placebo-controlled trial enrolling 478 participants aged 12 to 75 years with mild-to-moderate atopic dermatitis, including 59 adolescent participants aged 12 to 17 years. Participants were randomized in a 3:1 ratio to receive either the treatment group (3% Pumecitinib gel administered twice daily (“**BID**”), 359 participants) or the control group (gel

BUSINESS

placebo administered BID, 119 participants). Eligible participants were diagnosed with atopic dermatitis based on the Williams diagnostic criteria, with a disease history of at least one year for adults and at least six months for adolescents, and an affected body surface area (“BSA”) of 3% to 20%. The overall study flow is illustrated in the diagram below.

The randomized double-blind treatment period lasted for eight weeks, during which participants received either 3% Pumecitinib gel or placebo twice daily. Upon completion of the eight-week treatment period, eligible subjects entered an open-label extension period and received 3% Pumecitinib gel administered twice daily for 44 weeks.

Efficacy Results. After eight weeks of treatment, the proportion of participants achieving the primary endpoint of EASI 75 was 53.76% in the 3% Pumecitinib gel group, compared to 10.92% in the placebo group, representing a statistically significant difference between the two groups. The proportions of participants achieving investigator's global assessment (“IGA”) success in the 3% Pumecitinib gel group was significantly higher than in the placebo group. Moreover, other treatment efficacy (including pruritus numerical rating scale) and quality of life continued to improve with prolonged treatment duration.

In the adolescent subgroup, treatment with 3% Pumecitinib gel administered BID for eight weeks also demonstrated marked efficacy, with a significantly higher proportion of participants achieving the primary endpoint of EASI 75 compared to placebo (54.55% vs. 13.33%).

Taken together, these results indicate that Pumecitinib gel is effective in the treatment of mild-to-moderate atopic dermatitis in adolescents aged 12 years and above and in adults, and is associated with improvements in patients' quality of life, demonstrating meaningful clinical benefits in the management of atopic dermatitis.

BUSINESS

Safety Results. After eight weeks of double-blind treatment, there was no meaningful difference in the incidence of AEs between the Pumecitinib gel group and the placebo group. Similar safety result is also demonstrated over 52 weeks of treatment, with no particular safety issue found.

PK Results. With 52 weeks of treatment with 3% Pumecitinib gel, mean plasma concentrations derived from sparse blood sampling remained at low levels of 0.097 ng/mL to 0.16 ng/mL throughout the treatment period, indicating low systemic exposure.

A pivotal Phase III clinical trial to evaluate the efficacy, safety and PK of Pumecitinib nasal spray in adult participants aged 18 to 65 years with moderate-to-severe seasonal allergic rhinitis

The pivotal Phase III clinical trial enrolled adult participants aged 18 to 65 years with moderate-to-severe SAR. We plan to enroll a total of 600 participants, who will be randomized in a 2:1 ratio to receive either the investigational product or placebo. The primary objective of the study is to evaluate the efficacy and safety of Pumecitinib nasal spray (0.6%, 1.2 mg, administered BID) following two weeks of treatment in adult participants with moderate-to-severe SAR. We initiated the Phase III clinical trial in September 2025. As of the Latest Practicable Date, 277 participants had been enrolled and had completed 14 days of study treatment and safety follow-up.

Trial Design. Eligible participants are required to have a history of seasonal allergic rhinitis of at least two years, a positive test result for relevant local seasonal allergens, and a baseline rTNSS of at least 6 based on participant self-assessment. The primary endpoint of the study is the change from baseline in average rTNSS after 14 days of treatment. The overall study flow is illustrated in the diagram below.

As of the Latest Practicable Date, the Phase III clinical trial for Pumecitinib nasal spray remained on-going, with final results to be available after the conclusion of such trial. No severe TEAEs or SAEs were reported. Overall, Pumecitinib nasal spray has demonstrated a favorable safety profile, with no unexpected safety signals observed to date.

BUSINESS

Phase II clinical trials to evaluate the safety, efficacy and PK profile of Pumecitinib nasal spray at different dose levels and dosing frequencies in adult participants aged 18 to 65 years with moderate-to-severe seasonal allergic rhinitis

We completed two Phase II clinical trials (namely a Phase IIa trial and a Phase IIb trial) of Pumecitinib nasal spray for the treatment of moderate-to-severe SAR in China in May 2025.

Phase IIa Study

Trial Design. The Phase IIa study was an exploratory study designed to evaluate the preliminary efficacy, safety and sparse-sampling pharmacokinetic characteristics of Pumecitinib nasal spray at dose levels of 0.2 mg (0.1%), 1.2 mg (0.6%) and 2.0 mg (1.0%), administered BID for 14 days, in adult participants with moderate-to-severe SAR.

Efficacy Results. Based on the full analysis set (“FAS”), during the 14-day treatment period, the least squares mean changes from baseline in rTNSS were -3.057, -3.479, -3.497 and -2.295 for the Pumecitinib nasal spray groups (0.2 mg, 1.2 mg and 2.0 mg) and the placebo group, respectively. Compared with placebo, participants in the 1.2 mg group ($P=0.021$) and the 2.0 mg group ($P=0.018$) demonstrated statistically significant improvements in overall nasal symptoms. Improvements were also observed across key secondary efficacy endpoints, including instantaneous total nasal symptom score (“iTNSS”), rTOSS, instantaneous total ocular symptom score (“iTOSS”) and Rhinoconjunctivitis Quality of Life Questionnaire.

Compared with the placebo group, participants in the 1.2 mg group demonstrated significant improvements from baseline across individual ocular symptoms, with score reductions of -0.898 ($P=0.004$) and -0.956 ($P=0.003$) for eye itching/foreign body sensation/eye redness and tearing, respectively.

Safety Results. The incidence of TEAEs was comparable between the treatment groups and the placebo group, with no apparent dose-related trend observed among the different dose groups. No TEAEs leading to dose escalation, dose reduction, treatment interruption or discontinuation were reported. In addition, no TEAEs resulted in participant withdrawal from the study or death.

Phase IIb Study

Trial Design. The Phase IIb study was an exploratory study designed to evaluate the preliminary efficacy, safety and pharmacokinetic characteristics of Pumecitinib nasal spray at dose regimens of 0.6 mg (0.3%) BID, 1.2 mg (0.6%) once daily (“QD”) and 1.2 mg (0.6%) BID, administered for 14 days in adult participants with moderate-to-severe SAR.

Efficacy Results. Based on the FAS, the least squares mean changes from baseline in average rTNSS during the treatment period were -3.177, -3.008, -4.187 and -1.983 for the 0.6 mg (0.3%) BID group, the 1.2 mg (0.6%) QD group, the 1.2 mg (0.6%) BID group and the placebo group, respectively. The least squares mean differences in rTNSS between each

BUSINESS

Pumecitinib treatment group and the placebo group were -1.195, -1.026 and -2.204, respectively. Compared with placebo, all three Pumecitinib treatment groups demonstrated statistically significant improvements in overall rTNSS, including the 0.6 mg (0.3%) BID group ($P=0.002$), the 1.2 mg (0.6%) QD group ($P=0.009$) and the 1.2 mg (0.6%) BID group ($P<0.001$).

Among the three treatment groups, the 1.2 mg (0.6%) BID group demonstrated significantly greater improvement in rTNSS compared with both the 0.6 mg (0.3%) BID group ($P=0.018$) and the 1.2 mg (0.6%) QD group ($P=0.003$). No statistically significant difference was observed between the 0.6 mg (0.3%) BID group and the 1.2 mg (0.6%) QD group ($P=0.664$).

Compared with placebo, all three Pumecitinib treatment groups also demonstrated significant improvements in overall ocular symptoms (rTOSS; $P=0.017$, $P=0.014$ and $P<0.001$, respectively) and quality of life (RQLQ; $P=0.009$, $P=0.003$ and $P<0.001$, respectively). Based on an integrated assessment, the 1.2 mg (0.6%) BID regimen demonstrated the most favorable efficacy profile among the three treatment groups. At the same per-dose level (e.g., 1.2 mg), BID dosing demonstrated a more pronounced improvement in the primary efficacy endpoint compared with QD dosing. In addition, compared with placebo, the 1.2 mg BID group demonstrated statistically significant improvements across all individual ocular symptom components within the rTOSS, including eye itching/burning, tearing and eye redness ($P<0.05$).

Safety Results. The incidence of TEAEs and treatment-related TEAEs in the treatment groups was generally comparable to that observed in the placebo group, with no clear dose-related trend among the different dose groups. No SAE was reported in the treatment group, and there was no occurrence of TEAE that led to the discontinuation of the study or dosing.

Across the Phase IIa and Phase IIb studies, the most common adverse events in both the treatment groups and the placebo group were primarily related to investigations and infections and infestations. Common TEAEs (incidence $>2\%$) in the treatment groups included urinary tract infection, increased blood bilirubin and upper respiratory tract infection, while common TEAEs (incidence $>2\%$) in the placebo group included increased low-density lipoprotein, increased blood cholesterol, increased triglycerides and ligament sprain. The majority of TEAEs in both studies were mild in severity, and all moderate or severe TEAEs reported in the treatment groups were assessed as not related to the investigational product.

BUSINESS

Clinical Development Plan

As of the Latest Practicable Date, we had completed the Phase III clinical trial for Pumecitinib gel for the indication of atopic dermatitis in adults and adolescents aged 12 to 17 in China, and plan to submit the NDA in the first quarter of 2026. We are also planning to expand the indication of Pumecitinib gel to treat atopic dermatitis in children aged two to 11. We plan to commence the Phase I clinical trial for children aged six to 11 in China in the fourth quarter of 2026, and in children aged two to five in 2029.

As of the Latest Practicable Date, the Phase III clinical trial for Pumecitinib nasal spray was on-going. We expect to complete such Phase III clinical trial and submit the NDA in the fourth quarter of 2026. We are also planning to expand the indication of Pumecitinib nasal spray to treat seasonal allergic rhinitis (SAR) in adolescents aged 12 to 17, and to treat perennial allergic rhinitis (PAR). We plan to commence Phase I clinical trial for Pumecitinib nasal spray (for the indication of SAR in adolescents aged 12 to 17) in 2027, and Phase II clinical trial for Pumecitinib nasal spray (for the indication of PAR in adults) in the fourth quarter of 2026.

In addition, we will continue to advance the clinical development of our Core Product PG-011 (Pumecitinib) for other indications, including prurigo nodularis and non-segmental vitiligo.

Licenses, Rights and Obligations

We internally discovered and developed PG-011 (Pumecitinib), and maintain the global rights to develop and commercialize this drug candidate.

Material Communications with Competent Authorities

We had not received any relevant regulatory agency’s objections or negative feedback relating to our clinical development plans for PG-011 as of the Latest Practicable Date.

WE MAY NOT BE ABLE TO ULTIMATELY DEVELOP AND MARKET PG-011 (PUMECITINIB) SUCCESSFULLY.

BUSINESS

PG-033: Oral Small Molecule Inhibitor of TRPV3 for Treatment of Pruritus with First-in-Class Potential

Overview

Pruritus is a common clinical symptom that can result from a variety of diseases with vast patient population, for which traditional treatment often fail to achieve desirable relief or result in adverse effects. PG-033 is an innovative small molecule drug that selectively inhibits the transient receptor potential vanilloid 3 (“**TRPV3**”), which offers a novel treatment of pruritus. As a proof of concept, we are currently conducting clinical trial for PG-033 for the indication of pruritus associated with neurodermatitis. Neurodermatitis is a common skin disease, and the associated severe pruritus can significantly impair patients’ sleep and overall quality of life. As of the Latest Practicable Date, we were conducting a Phase I clinical trial of PG-033 oral tablet for the treatment of moderate-to-severe pruritus associated with neurodermatitis in China, making PG-033 the world’s first clinical-stage oral small molecule TRPV3 inhibitor for treatment of pruritus.

Additionally, PG-033 also has demonstrated the potential to relieve the intractable pruritus and hyperkeratosis associated with Olmsted syndrome, a rare disease. Olmsted syndrome is a genetic disorder primarily caused by mutations in the TRPV3 gene, characterized by intractable pruritus and hyperkeratosis that may progress to mutilation in palms and/or soles in severe cases. We are currently expanding the indication of PG-033 to the treatment of Olmsted syndrome. According to Frost & Sullivan, PG-033 is the first clinical-stage oral small molecule TRPV3 inhibitor in the world and the first-in-kind drug candidate providing a clear pathway of treatment for Olmsted syndrome, for which there has been no curative therapy as of the Latest Practicable Date.

In addition to neurodermatitis and Olmsted syndrome, PG-033 also has the potential of expanding into broader therapeutic areas, including pruritic disorders and keratinization-related skin diseases, representing a broader addressable market and patient population for PG-033.

Mechanism of Action

TRPV3 is highly expressed in skin tissues and plays an important role in physiological and pathological processes including inflammation, pruritus and skin barrier function. Activation of TRPV3 leads to an increase in intracellular calcium levels, thereby enhancing the secretion of thymic stromal lymphopoietin (TSLP) by keratinocytes and other immune cells, which is a key driver of pruritic and inflammatory pathways.

BUSINESS

PG-033 specifically targets TRPV3 and concurrently inhibits pruritic signaling mediated by multiple pro-inflammatory cytokines, including TSLP and SERPINE1, thereby effectively suppressing episodes of refractory pruritus. By reducing abnormal calcium influx, TRPV3 inhibitors protect keratinocytes from apoptosis and may promote the synthesis of normal barrier-related proteins and lipids, thereby facilitating restoration of the skin barrier. In addition, TRPV3 inhibition reduces the release of alarmins such as IL-33 and thymic stromal lymphopoietin, thereby suppressing downstream immune cell activation and recruitment and ultimately attenuating cutaneous inflammation.

Olmsted syndrome is a genetic disorder triggered by hyperactivation of gene resulting from pathogenic gain-of-function mutations, characterized by intractable pruritus and hyperkeratosis. Mutant TRPV3 channels remain persistently and aberrantly open on keratinocytes, resulting in sustained elevation of intracellular calcium levels. This leads to excessive proliferation and abnormal differentiation of keratinocytes, triggers intense inflammatory responses and induces cell death. Interactions with sensory nerve fibers further drive a self-reinforcing “itch-scratch cycle”, exacerbating clinical symptoms.

Targeted inhibition of TRPV3 allows the inhibitor to bind to mutant TRPV3 channels, stabilizing the calcium channel in a closed state, thereby directly blocking calcium influx. By restoring normal intracellular calcium homeostasis, PG-033 demonstrates the potential to suppress excessive keratinocyte proliferation and abnormal differentiation, which is expected to alleviate hyperkeratosis. In addition, TRPV3 inhibition markedly attenuates inflammatory responses, reduces the release of pro-inflammatory cytokines and decreases stimulation of sensory nerves, thereby relieving severe pruritus and interrupting the itch-scratch cycle, ultimately achieving therapeutic benefit.

Market Opportunity and Competition

Pruritus is one of the most common clinical symptoms associated with dermatological conditions such as atopic dermatitis, neurodermatitis, psoriasis, xerosis, prurigo nodularis, contact dermatitis, urticaria, and eczema. In particular, according to Frost & Sullivan, the number of patients with chronic pruritus in China reached 262.0 million in 2024 and is expected to reach 272.7 million by 2033. As of the Latest Practicable Date, the drugs approved in China for the treatment of pruritus are mainly second-generation antihistamines, most of which have been included in the centralized procurement program. PG-033 is currently the only TRPV3 inhibitor drug for the treatment of pruritus in clinical stages in China.

For an overview of the approved and clinical-stage drugs for treatment of pruritus, please see “Industry Overview.”

BUSINESS

Advantages of PG-033

PG-033 offers a novel therapeutic option for pruritus patients with its precise blockade of pruritic signal transmission and reduction of pathological tissue damage. By selectively targeting the TRPV3 calcium-permeable ion channel, PG-033 interrupts pruritic signal transmission at its neural origin, potently suppressing refractory pruritus and rapidly alleviating patients’ most burdensome symptoms.

In parallel, based on the disease pathogenesis, PG-033 is expected to address disease-associated hyperkeratotic pathology by regulating the inflammatory microenvironment of the skin, thereby potentially relieving skin thickening, scaling and related symptoms and achieving a theoretical dual therapeutic effect of symptomatic relief and pathological improvement. As an orally administered small-molecule therapy, PG-033 offers convenient dosing and the potential for improved patient compliance. Given the current absence of approved therapies, PG-033 has the potential of becoming the first precision treatment option for patients with Olmsted syndrome and related rare diseases targeting the over-activated TRPV3, with the potential to fill a significant treatment gap in this field.

Clinical Development Plan

We initiated a Phase I clinical trial of PG-033 oral tablet for the treatment of moderate-to-severe pruritus associated with neurodermatitis in China in May 2025, and we expect to complete the trial in the fourth quarter of 2026.

We expect to submit an IND application to the NMPA of PG-033 for the treatment of Olmsted syndrome in 2027.

Licenses, Rights and Obligations

We internally discovered and developed PG-033, and maintain the global rights to develop and commercialize this drug candidate.

Material Communications with Competent Authorities

We had not received any relevant regulatory agency’s objections or negative feedback relating to our clinical development plans for PG-033 as of the Latest Practicable Date.

BUSINESS

PG-018: Dual Inhibitor of JAK1 and Endothelin Receptor-related ROCK for Treatment of Autoimmune Kidney Disease with First-in-Class Potential

Overview

PG-018 is an innovative small molecule drug that selectively inhibits both JAK1 and endothelin receptor-related ROCK for the treatment of autoimmune kidney diseases. The clinical management of autoimmune kidney diseases is subject to several core challenges, including the limited efficacy of single-target therapies, the difficulty of simultaneously controlling renal injury and associated complications (such as hypertension), and the increased risk of drug-drug interactions and poor patient adherence associated with combination therapies. Currently the available treatment options are also often associated with relatively high relapse rates.

We believe PG-018 possesses the potential to offer an efficient therapeutic option capable of simultaneously controlling multiple symptoms without the need for combination therapy. It simultaneously inhibits abnormally activated immune function by acting on JAK1, and reduces blood pressure by acting on endothelin receptor-related ROCK, whereby achieving a synergistic effect of relieving multiple symptoms associated with autoimmune kidney disease.

As a proof of concept, we are currently conducting clinical trials for PG-018 for the indication of membranous nephropathy, which is an autoimmune disease with a steadily increasing prevalence in China. As of the Latest Practicable Date, PG-018 was under Phase I clinical trial. We plan to initiate a Phase II clinical trial of PG-018 oral tablet for the treatment of membranous nephropathy in China in 2027.

Mechanism of Action

Membranous nephropathy is an autoimmune kidney disease pathologically characterized by the deposition of IgG immune complexes along the glomerular basement membrane. In clinical practice, patients with progressive membranous nephropathy are commonly treated with corticosteroids and immunosuppressive agents.

PG-018 is a dual-target small molecule kinase inhibitor that acts on both JAK1 and endothelin receptor-related ROCK. By inhibiting JAK1 activity, PG-018 can suppress abnormally activated immune function. In parallel, by inhibiting ROCK, PG-018 can promote vasodilation and reduces intrarenal pressure, thereby potentially mitigating kidney damage. In addition, PG-018 can suppress cytokine-mediated inflammatory responses, improve the inflammatory microenvironment, support intrinsic renal repair mechanisms, and slow or interrupt the progression of fibrosis. As such, it demonstrates potential for clinical benefit for patients with membranous nephropathy.

BUSINESS

Market Opportunity and Competition

Membranous nephropathy is a pathological and morphological diagnostic term characterized by the deposition of immune complexes in the lateral aspect of the glomerular basement membrane and subepithelial region, accompanied by diffuse thickening of the glomerular basement membrane and changes in the permeability of the glomerular filtration membrane. The main symptoms include proteinuria, hematuria, edema, and hypertension, with proteinuria being the primary characteristic of membranous nephropathy.

According to Frost & Sullivan, the prevalence of membranous nephropathy varies significantly globally, with China exhibiting a higher prevalence. In 2024, the number of patients with primary membranous nephropathy in China was approximately 2.5 million and is expected to reach 2.8 million by 2033. Currently, there are no approved drugs for membranous nephropathy.

For an overview of the clinical stage drugs for treatment of membranous nephropathy, please see “Industry Overview.”

Advantages of PG-018

We designed PG-018 around the core concept of dual signaling pathway regulation combined with preferential distribution in kidney tissue, establishing a new therapeutic paradigm for autoimmune kidney diseases that is expected to achieve the synergistic therapeutic effects of renal injury repair and blood pressure reduction.

Specifically, PG-018 can inhibit local immune-inflammatory responses in the kidney through JAK1 pathway regulation. In parallel, its modulation of endothelin receptor-related ROCK can lower renal blood pressure and improve renal microcirculation. This dual-target mechanism of action may achieve the simultaneous control of the primary disease and the associated symptoms. This single-agent approach avoids the patient compliance challenges caused by drug incompatibility in combination therapy regimens. In addition, JAK1 inhibition also blocks the pruritus-related signal transduction, which is expected to relieve the associated pruritus in patients with advanced autoimmune kidney diseases.

In pre-clinical studies, PG-018 achieved relatively higher concentrations at sites of renal pathology while substantially reducing systemic exposure. This could significantly enhancing treatment safety and providing a strong tolerability foundation for long-term standardized therapy in patients with autoimmune kidney diseases.

BUSINESS

Phase I Single Ascending Dose Study

Overview. We have completed a Phase I single ascending dose study of PG-018 in healthy adult participants in China and received the clinical study report in May 2025. As of the Latest Practicable Date, we were conducting the final stage of a multiple ascending dose study for PG-018.

Trial design. The single ascending dose study was a randomized, double-blind, placebo-controlled, parallel-group, dose-escalation study conducted in healthy adult participants. Each cohort enrolled eight participants (six receiving PG-018 and two receiving placebo), with a male-to-female ratio of approximately 1:1.

Safety Results. A total of 19 participants experienced TEAEs, including six participants (50.0%) in the placebo group and 13 participants (36.1%) in the PG-018 treatment groups. The incidence of TEAEs in the 15 mg to 270 mg dose groups was lower than that observed in the placebo group, while the incidence increased in the 360 mg dose group and exceeded that of placebo. In the 360 mg cohort, two moderate and one severe adverse event of decreased blood pressure were reported. All other TEAEs were mild in severity. All TEAE cases were resolved or recovered.

Clinical Development Plan

We are currently conducting a multiple ascending dose study for PG-018 in China. We plan to initiate a Phase II clinical trial of PG-018 oral tablet for the treatment of membranous nephropathy in China in 2027.

Licenses, Rights and Obligations

We internally discovered and developed PG-018, and maintain the global rights to develop and commercialize this drug candidate.

Material Communications with Competent Authorities

We had not received any relevant regulatory agency’s objections or negative feedback relating to our clinical development plans for PG-018 as of the Latest Practicable Date.

OUR SELECTED PRE-CLINICAL PIPELINE CANDIDATES

PG-040: ROCK-JAK Dual-target Inhibitor for Treatment of Glaucoma

Overview

PG-040 is an innovative small molecule drug for the treatment of glaucoma that selectively inhibits both ROCK and JAK. Through dual pathway regulation, PG-040 is designed to simultaneously reduce intraocular pressure (“IOP”) and attenuate local ocular inflammatory responses, thereby offering a new generation therapeutic approach and potential comprehensive solution for the treatment of glaucoma. Glaucoma is a degenerative disease characterized by elevated IOP, leading to visual acuity decline and visual field defects. It causes damage to the optic nerve and, if left untreated, may result in irreversible vision loss and eventual blindness. According to Frost & Sullivan, glaucoma is one of the three leading causes of blindness worldwide.

Mechanism of Action

PG-040 is designed as a dual-target ROCK-JAK inhibitor, intended to improve clinical outcomes for glaucoma treatment through a synergistic mechanism integrating IOP reduction and anti-inflammatory activity. Elevated IOP is the primary and currently the only clinically modifiable risk factor for glaucoma onset and progression. The ROCK signaling pathway plays a critical regulatory role in cytoskeletal dynamics and is closely involved in glaucoma pathogenesis. Specifically, ROCK inhibition by PG-040 can reduce aqueous humor outflow resistance by relaxing trabecular meshwork cells and lowering episcleral venous pressure, thereby enhancing aqueous humor drainage and reducing IOP.

In addition to IOP elevation, glaucoma is also increasingly recognized as a multifactorial inflammatory disorder. Retinal ganglion cell (“RGC”) dysfunction, combined with sustained excessive glial activation, triggers extensive immune responses, including T cell-predominant adaptive immunity. This ultimately drives progressive glaucomatous neurodegeneration. Correspondingly, JAK inhibition by PG-040 can suppress these pathological inflammatory processes, protect RGCs, and delay neurodegeneration associated with glaucoma.

Combining the ROCK and JAK inhibiting properties, PG-040 is anticipated to achieve a synergistic effect and deliver a distinct, next-generation glaucoma therapy that simultaneously reduces IOP, alleviates inflammation, and provides enhanced optic nerve protection via one single agent.

Clinical Development Plan

As of the Latest Practicable Date, PG-040 was in pre-clinical stage. We plan to submit an IND application to the NMPA of PG-040 for the treatment of glaucoma in the second quarter of 2026. We also plan to submit an IND application to the FDA of PG-040 for the treatment of glaucoma in 2027.

BUSINESS

Material Communications with Competent Authorities

We had not received any relevant regulatory agency’s objections or negative feedback relating to our clinical development plan for PG-040 as of the Latest Practicable Date.

PG-312: A Small Molecule MRGPRX2 Inhibitor for Treatment of Chronic Refractory Urticaria

PG-312 is a novel small molecule Mas-related G-protein coupled receptor member X2 (“**MRGPRX2**”) inhibitor for the treatment of chronic refractory urticaria with first-in-class potential. Urticaria is a localized edematous reaction caused by dilation of cutaneous and mucosal blood vessels and increased vascular permeability. In both China and overseas markets, antihistamines are commonly used as the standard clinical treatment. However, approximately 10% to 50% of patients fail to achieve adequate symptom control, a condition clinically referred to as chronic refractory urticaria.

PG-312 is designed to address a significant unmet medical need by providing a novel, target-based therapeutic approach for patients with chronic refractory urticaria. As of the Latest Practicable Date, there was no approved therapy targeting MRGPRX2 globally, and therapeutic development targeting this mechanism remained at an early stage. As of the Latest Practicable Date, PG-312 was in pre-clinical stage. We expect to submit IND application to the NMPA in 2027.

OUR GENERIC DRUG PIPELINE CANDIDATES

PG-F02: An adapalene and benzoyl peroxide gel generic

PG-F02 is an adapalene and benzoyl peroxide gel indicated for the treatment of acne vulgaris in children aged nine years and above and in adults. As of the Latest Practicable Date, we submitted an abbreviated new drug application (“**ANDA**”) to the NMPA for PG-F02, and expect to receive the approval in the fourth quarter of 2026.

PG-F03: An ivermectin cream generic

PG-F03 is an ivermectin cream indicated for the treatment of rosacea. We have completed pilot-scale studies for PG-F03 and expect to submit an ANDA to the NMPA in 2027.

PG-F04 Capsules: An emedastine difumarate sustained-release capsule generic

PG-F04 sustained-release capsules contain emedastine difumarate and are indicated for the treatment of urticaria and allergic rhinitis. We have completed pilot-scale studies for PG-F04 sustained-release capsules and expect to submit an ANDA to the NMPA in 2027.

BUSINESS

PG-F04 Ophthalmic Solution: An emedastine difumarate ophthalmic solution generic

PG-F04 ophthalmic solution contains emedastine difumarate and is indicated for the treatment of allergic conjunctivitis. We have completed process for PG-F04 ophthalmic solution and expect to submit an ANDA to the NMPA in the second quarter of 2026.

PG-F06: A fusidic acid cream generic

PG-F06 is a fusidic acid cream indicated for the treatment of bacterial skin infections. As of the Latest Practicable Date, we had submitted an ANDA to the NMPA for PG-F06. We expect to receive the approval in the fourth quarter of 2026.

RESEARCH AND DEVELOPMENT

In 2024 and the nine months ended September 30, 2024 and 2025, we recorded research and development expenses of RMB146.2 million, RMB103.2 million and RMB97.1 million, respectively, with R&D expenses of RMB88.7 million, RMB59.4 million and RMB62.2 million attributable to our Core Product, respectively, representing 60.7%, 57.6% and 64.1% of our total research and development expenses, respectively. We anticipate to continue to significantly invest in our R&D efforts, since we plan to expand the indications and continue the clinical development of our Core Product, advance more pipeline candidates along clinical trials and conduct additional pre-clinical studies.

R&D Strategy

We adhere to an in-house innovative drug development strategy driven by unmet medical needs. Our R&D process comprises compound discovery and development, pre-clinical studies, IND application, clinical trials, new drug application, and post-marketing studies. Our in-house R&D capabilities cover all key stages of innovative drug development, from early discovery to late-stage development, including target discovery and mechanism validation, translational medicine research, compound molecular design and screening, pre-clinical studies, CMC, and clinical study design and execution.

We maintain strong competitiveness in terms of technological advancement and platform completeness, enabling us to manage and control the entire drug development process, which facilitates efficient R&D decision-making and execution. We have established an integrated, full-chain innovative drug R&D system with comprehensive technical capabilities covering the entire value chain of new drug development. We have advanced multiple compounds from in-house discovery at the source to the clinical stage, enabling efficient cross-disciplinary and cross-functional collaboration throughout the development and industrialization of topical formulations.

BUSINESS

R&D Team

Our R&D team has strong expertise, deep understanding and extensive experience in innovative drug development, spanning from biochemistry, molecular biology, structural biology, immunology, clinical medicine, pharmacology to pharmaceutical engineering. As of September 30, 2025, more than 50% of our R&D team members had obtained advanced degrees, including nine members with doctorate degrees and 42 members with master’s degrees. The following table sets forth a breakdown of the number of our R&D team members by function as of September 30, 2025:

Functions	Number of employees by function
Early research and clinical development	25
CMC	19
Formulation development	7
Pharmacology and toxicology studies	3
Quality control and project management	10
Total	64

We have established an end-to-end R&D framework to ensure the quality of our research and development outcome. Our R&D team is led by a team of distinguished scientists with extensive drug development experience, who lead our early research, clinical development, CMC, formulation development, pharmacology and toxicology studies, clinical registration, and project management. All our core R&D personnel have extensive experience in the pharmaceutical industry of over 15 years, with expertise covering the fields of chemistry, biology, pharmacology and medicine.

Our Platforms

We place strong emphasis on drug discovery, translational medicine and formulation innovation, and have established an end-to-end innovative drug research and development system. We have mastered proprietary technologies such as innovative molecular design and the PRED-DERM topical small-molecule prediction model, and have established a drug development approach guided by translational medicine. In addition, we possess formulation development and quality evaluation capabilities for complex topical dosage forms.

BUSINESS

We have established and leveraged a proven, integrated drug discovery and development system spanning target discovery, molecular discovery and evaluation, translational science and clinical development. Our technological capabilities include discovery of original molecular structures and new molecular entities, investigation of drug process and quality standards, as well as exploration of clinical development in all relevant stages. These research and development capabilities organically constitute our drug development framework, which enables us to efficiently advance pipeline programs through different developmental stages.

Novel Drug Design and Discovery Platform

We use AI-enabled tools to conduct exploration of pathogenesis and target proteins, forming a differentiated drug design and discovery platform. The core of this platform is a proprietary multi-dimensional evaluation and design framework. Prior to any molecular design, we conduct strategic assessments across three dimensions: (i) the disease dimension, in which we analyze pathological similarities and differences among inflammatory diseases within local tissue microenvironments to define mechanisms of action, (ii) the cellular dimension, in which we dissect signaling pathways in key immune and tissue cells to identify precise intervention targets, and (iii) the drug property dimension, in which we predefine ideal tissue distribution and penetration characteristics to establish an anchor for molecular design.

Our drug design and discovery platform employs a toolkit including CADD/AIDD and the PRED-DERM transdermal PK and physicochemical parameter design model to enable directed molecular creation and optimization. For locally targeted drugs, the PRED-DERM model is used to proactively optimize physicochemical properties to prioritize high tissue retention and low systemic exposure, a design philosophy exemplified by our Core Product PG-011 (Pumecitinib). For diseases with complex mechanisms, the platform applies a multi-target design strategy to integrate mechanisms of action to achieve synergistic efficacy or overcome development difficulties. This multi-target design capability is particularly demonstrated by our development of dual-target molecules such as PG-018 and PG-040. The platform ultimately delivers not isolated molecules, but a portfolio of rationally designed and early-validated drug candidates with clear differentiation.

BUSINESS

Immunology, Inflammation and Dermatology Translational Medicine Platform

Our translational medicine platform serves as the strategic bridge between source innovation and clinical validation. Based on deep understanding of the basic science and clinical aspects of immune-related diseases, we integrate biology, medicinal chemistry, ADME and external resources such as live-cell and skin imaging to establish a distinctive translational medicine platform for immunology, inflammation and dermatology. The platform systematically analyzes clinical phenotypes and immunobiological mechanisms to construct a comprehensive translational research framework.

The platform’s differentiated advantage is built on three core capabilities: (i) target-to-clinic translation, which converts biological characteristics of novel targets into clear clinical development pathways to support project initiation, (ii) clinical decision acceleration, which aligns biological insights with clinical strategy to improve development efficiency, and (iii) evidence value maximization, which iteratively refines predictive models through integration of accumulated knowledge and reverse validation using clinical data.

We have established translational research collaborations with hospitals and academic institutions in China, including TRPV3-related collaborations with Southern Medical University Dermatology Hospital, pruritus-related collaborations with Wuhan University, and glaucoma-related pharmacodynamic model collaborations with the Second Xiangya Hospital of Central South University.

Complex Topical Drug Formulation Innovation Platform

Our formulation innovation platform possesses formulation development and quality evaluation capabilities for complex dosage forms. It has completed formulation development for a number of innovative compounds and generic drugs, which have progressed to different clinical stages. The platform has accumulated extensive experience in topical formulation development and follows a philosophy of “product needs driving platform development and technological innovation.”

We have developed a wide range of dosage forms, including gels, creams, ointments, nasal sprays and ophthalmic solutions, which have been successfully applied to the development of innovative drugs such as our Core Product PG-011 (Pumecitinib). Through extensive candidate screening and formulation development efforts, the platform has accumulated mature expertise in formulation and process development, animal evaluation and scale-up manufacturing across multiple dosage forms, as well as in the exploration of novel formulations, technologies and methodologies.

BUSINESS

The platform enables solubilization of poorly soluble drugs, enhanced transdermal absorption, increased dermal retention and retention time, and improved development capabilities for nanomedicine formulations (such as micelles, microemulsions, nanoemulsions, nanoparticles and liposomes). It provides systematic solutions for dermatology, respiratory, otolaryngology and other specialized therapeutic needs, offering innovative solutions for large patient populations such as those with atopic dermatitis, allergic rhinitis and non-segmental vitiligo.

In terms of quality evaluation of complex topical formulations, the platform supports analytical method development, validation and testing, microstructural characterization, rheological studies, *in vitro* release test (“IVRT”) and *in vitro* permeation test (“IVPT”) studies, polymorph and particle size analysis, nanomedicine evaluation and stability studies. It has established standardized and systematic evaluation methodologies for key quality attributes of topical and transdermal products. The platform has accumulated extensive experience in rheology, IVRT, IVPT, microstructural characterization, IVPT development and validation for poorly soluble compounds, reproducibility testing, skin layer distribution and retention studies.

We have also collaborated with renowned academic institutions on the development of innovative drug formulations. For example, we founded a joint complex formulation innovation lab with China Pharmaceutical University, where we collaborate with China Pharmaceutical University in the development of complex drug formulation and delivery, the assessment of key technologies and the research of new materials.

Clinical Development

Clinical Development Team

As of September 30, 2025, our clinical development team consisted of 20 members, including scientists and physicians with strong drug development experience, who participate in the formulation of our clinical development strategies, clinical trial protocol design and clinical trial operation organization. Many of our clinical development team members had extensive relevant work experience. Among our clinical development team members, approximately 55% have obtained post-graduate degrees. Our clinical development team is generally responsible for the clinical development of our Core Product and other pipeline products.

Clinical Trial Design and Implementation

Our clinical development team manages all stages of clinical trials, from protocol design to overseeing the operations and conduct of clinical trials. Our rapid trial advancements are driven by (i) our strategic decision to initiate clinical phase trials based on pre-clinical results that are assessed as promising, (ii) optimized trial design and whole-process oversight, and (iii) long-term partnership with various hospitals and principal investigators from different regions to achieve smooth execution.

BUSINESS

Our clinical development team is also responsible for the selection of trial sites. Our site selection criteria include the site’s overall experience, understanding of the disease state, access to relevant experts and patients, regulatory and quality management, and staff proficiency. We have collaborated with numerous hospitals and PIs located in China that can support our clinical trials of different indications and at different stages. We believe the size and geographic diversity of these facilities provide us with an advantage in implementing large-scale clinical trials in China and also enable us to conduct multiple clinical trials concurrently.

During the Track Record Period, we cooperated with more than 100 PIs, to conduct the clinical trials of our product candidates. To the best of our Company’s knowledge, none of them have any past or present relationships with us, our Directors, shareholders, senior management or any of their respective associates. The PIs are responsible for conducting site-level clinical research activities according to our trial protocols and in accordance with laws, regulations, and the GCP Guideline, a quality standard for the overall conduct of the clinical trial. Each trial has a leading PI with primary responsibility to ensure compliance with trial protocol and good clinical practice over the entire trial.

Relationship with CROs

We collaborate with CROs to conduct and support our pre-clinical and clinical trials in line with industry practice. We select our CROs by weighing various factors. Upon business engagement, we assess CROs based on their business focus, capabilities and overall market recognition. Secondly, we also value the R&D capabilities of the CROs and the management skills of their leaders based on their experience and previous track records. Overall, we aim to select CROs that have optimal compatibility with our pre-clinical and clinical development programs. When collaborating with CROs on a given project, our internal project team manage such project on an end-to-end basis and closely monitors the progress, engages in regular communication with the CRO teams to understand project milestones, identify potential risks, and ensure the project deliverables. Simultaneously, the project/trial leader maintains close contact with the financial departments of both our Company and the CROs, implementing stringent financial controls at different stages of the project to ensure the timely and quality completion of the project and accurate recording of relevant expenses.

In terms of the involvement and contributions of each of the major CROs to the development of our product candidates, the pre-clinical CROs mainly provide us with services related to pre-clinical toxicity and safety evaluations, such as animal studies, of our product candidates in accordance with agreed study design and under our supervision. The clinical CROs provide us with an array of services necessary for complex clinical trials in accordance with agreed trial design and under our supervision, including trial preparation, trial management, clinical safety management, data management, and report preparation. We choose CROs based on the complexity and workload of a specific trial. We closely monitor the work of our CROs and provide specific directions to ensure the quality and efficiency of the trial execution. This approach allows us to leverage the experience of our in-house team to better focus on critical clinical trial elements, such as trial design, data analysis and decision-making.

BUSINESS

All studies of our product candidates on humans are conducted in compliance with the applicable laws, regulations and in line with the industry standards. We believe our ability to work closely with CROs to conduct pre-clinical studies and clinical trials helps us to shorten the time required for product development as well as generate the requisite data in a reliable and efficient way.

We mainly determine the service fees paid to the CROs in accordance with market prices of similar services, the number of enrolled patients, the duration of the clinical trials, and the quality and contents of the services provided.

Regulatory Affairs

Our regulatory affairs team is responsible for the regulatory process of our product candidates, including assembling application dossiers for IND and NDA, addressing inquiries from relevant authorities and monitoring our R&D projects to ensure their compliance with relevant regulations. Our regulatory affairs team manages the regulatory submission process for our product candidates, which requires filings to be made to and approved by the relevant authorities before clinical trials and commercialization can be initiated. The regulatory affairs team prepares and manages regulatory filings by coordinating filing dossiers drafting, addressing regulatory questions and conducting CMC and GMP readiness assessments for our product candidates. We possess extensive knowledge and experience with regard to regulatory filings in China and we can design our clinical trials to maximize operational efficiency.

MANUFACTURING & CONTROLS

Collaboration with CDMO Partners

As of the Latest Practicable Date, we did not have commercialization-scale manufacturing facility. We currently plan to establish our own manufacturing facility in Beijing to support the production of our Core Product after commercialization. We currently collaborate with CDMOs (including CMOs) to manufacture our drug candidates to supply for pre-clinical studies and clinical trials. We have established a comprehensive marketing authorization holder (MAH) management system and have entered into quality agreements with our contract manufacturing partners. Such agreements require, among other things, that the contract manufacturers shall possess the relevant qualifications under the GMP, and comply with the standard operating procedures formulated by us and all applicable laws and regulations when manufacturing our drug candidates. Our contract manufacturers are also required to conduct quality testing before delivering any drug candidate to us, and to ensure the drug candidate delivered meet the quality standards as mutually agreed in our agreements with them.

BUSINESS

We did not experience any material product quality issues in respect of the products manufactured by our CDMO partners during the Track Record Period. Under our agreement with our CDMO partners, the CDMO partners are required to perform their services according to the prescribed time frame as set out in the agreement. Usually, we pay the CDMO partners in installments, with a specified credit period. Our CDMO partners are responsible for manufacturing our required products in accordance with certain product specifications, in compliance with cGMP requirements (where applicable), our quality standards and other applicable laws and regulations. We retain all the intellectual property rights and grant our CDMO partners the right to use our intellectual property rights for such manufacturing and packaging activities during the contract period. We are entitled to inspect and audit our CDMO partners’ manufacturing process. We mainly determine the service fees paid to the CDMOs in accordance with market prices of similar services, the number of products manufactured, and the quality and contents of the services provided. We do not share our IPs, know-hows and trade secrets with CDMOs.

Quality Control

We strictly comply with the applicable laws, regulations, rules, standards and guidelines in our quality control processes. We have established a scientific, comprehensive and full-lifecycle quality operation, management and supervision system covering the entire lifecycle of drug research and development, manufacturing, distribution and use. This system ensures that information throughout the drug lifecycle is authentic, accurate, complete and traceable, and continuously safeguards the safety, efficacy and quality controllability of our products throughout their lifecycle. We have also established a Quality Management Committee with overall responsibility for quality-related activities and issues.

We have established comprehensive quality control and quality assurance procedures to ensure compliance with applicable regulatory requirements and our internal quality standards. We select qualified raw material suppliers and recruit manufacturing and quality management personnel in accordance with stringent standards. We conduct regular inspections of facilities and equipment to ensure proper operation, and we require CMOs/CDMOs to closely monitor the manufacturing environment, with a particular focus on key parameters such as microbiological control, temperature and humidity. We typically conduct comprehensive internal reviews on an annual basis and engage external experts and legal advisers to perform quality audits. We benchmark our quality systems against domestic and international standards and remain committed to the continuous enhancement and improvement of our quality control framework to ensure patient safety and regulatory compliance.

BUSINESS

COMMERCIALIZATION

We currently have no drug approved or in commercial stage yet. However, we have been building up our commercial planning and portfolio management capability since our pipeline drug candidates entered the late stages of clinical trials. To date, we did not have an in-house marketing team. In the long run, as we identify favorable market opportunities, we plan to assemble a dedicated in-house marketing force with extensive experience in our focused therapeutic areas. This marketing team shall be primarily responsible for marketing strategy, product positioning, market access, market penetration, promotion activities and patient support. We expect this team will work synergistically with our partners to ensure the penetration of our products in major markets.

In particular, with respect to our Core Product, PG-011 (Pumecitinib), we have formulated an adaptive commercialization strategy to accelerate its market penetration in the foreseeable future in China upon receiving relevant marketing approval. We plan to initially collaborate with industry-recognized contract sales organizations (CSOs) with experience in selling drugs, capitalizing on their extensive sales networks and distribution channels to facilitate rapid market entry and increase market coverage for our Core Product. Meanwhile, we intend to foster direct and interactive communication with influential KOLs and physicians to build advocacy for our Core Product. We also intend to identify a number of hospitals, clinics and physicians that specialize in AD and SAR treatment, and to visit the sites and physicians in person for pre-launch training and engagement. Further, we believe academic-oriented marketing efforts will be beneficial for improving alignment of expert opinion on, and promoting clinical use of, our Core Product. We have actively participated in and will continue to attend and organize academic conferences and seminars to publicize the clinical data and research results of our drug candidates, so as to raise our brand awareness and recognition.

As of the Latest Practicable Date, we had entered into an exclusive cooperation agreement with Jumpcan Pharmaceutical regarding the marketing and distribution of Pumecitinib nasal spray. Pursuant to such agreement, Jumpcan Pharmaceutical will have the exclusive right to commercialize Pumecitinib nasal spray in China during the 10 years following the regulatory approval of Pumecitinib nasal spray for sale. In return, we will receive fixed payments from Jumpcan Pharmaceutical at the agreed-upon milestones before the regulatory approval of Pumecitinib nasal spray. Under the agreement, Jumpcan Pharmaceutical is responsible for the marketing and promotion of Pumecitinib nasal spray, and we are responsible for the development and manufacturing of, and obtaining regulatory approval for, Pumecitinib nasal spray. After the commercialization of Pumecitinib nasal spray, we will pay Jumpcan Pharmaceutical annual service fees based on our sales revenue from Pumecitinib nasal spray.

BUSINESS

OUR SUPPLIERS

During the Track Record Period, our major suppliers primarily consisted of CROs and CDMOs, and we did not experience any material disputes with our suppliers. In addition, we believe that adequate alternative sources for such supplies exist, and we have developed alternative sourcing strategies for these supplies.

Below is a summary of the key terms of a typical agreement with our CROs and CDMOs.

- *Services.* The CROs or CDMOs provide us with services such as implementing a clinical research project, manufacturing products and/or providing materials as specified in the master agreement and completing ad-hoc work orders.
- *Term.* The CROs or CDMOs are required to perform its services according to the prescribed time frame set out in the master agreement or a work order.
- *Payment.* We are required to make payments to the CROs or CDMOs according to the payment schedule agreed by the parties.
- *Confidentiality.* We and the CROs or CDMOs agree to keep confidential any information in relation to the performance of the master agreement.
- *Intellectual property.* We own all intellectual property derived from the clinical research project, and we are entitled to apply patent for such intellectual properties.
- *Liabilities and termination.* The liability of a CRO or CDMO arises at the failure to provide services in accordance with the agreed upon service schedule, and our liability arises at the failure to make timely arrangements for payment. If either party is prevented from or delayed in the performance of its obligations under the agreement by force majeure for a prolonged or if either party is in material breach of the agreement and fails to remedy its breach for more than a given time period, the non-breaching party shall have the right to terminate the agreement.

In 2024 and the nine months ended September 30, 2025, our purchases from our five largest suppliers in each period in aggregate amounted to RMB32.1 million and RMB21.9 million, representing 30.6% and 34.3% of our total corresponding purchases in such period, respectively, and our purchases from the largest supplier in each period accounted for 11.0% and 9.9% of our total corresponding purchases, respectively.

BUSINESS

The following table sets forth details of our five largest suppliers during the Track Record Period.

Supplier	Background	Major Purchases	Credit Terms	Commencement of Business Relationship (Since)	Purchase Amount	% of Total Purchases for the Period
					(RMB in thousands)	
<i>For the nine months ended September 30, 2025</i>						
Supplier A . . .	A domestic Chinese CRO service provider listed on NEEQ	CRO service	20 business days	2021	6,300	9.9%
Supplier B . . .	A leading pharmaceutical contract research, development and manufacturing service provider listed in mainland China and Hong Kong	CRO service	30 calendar days	2017	5,499	8.6%
Chifeng Saliont .	A private company in China primarily engaging in the manufacturing and sale of generic drugs and contracted manufacturing of drug ingredients and products	CMO service	10 calendar days	2019	4,801	7.5%
Supplier C . . .	A group of private companies in Beijing that engage in, among others, property leasing and property management services	Property leasing and property management services	10 business days	2019	2,645	4.1%
Supplier D . . .	A professional pharmaceutical non-clinical safety evaluation institution in China	CRO service	10 business days	2024	2,645	4.1%
Total					21,890	34.3%

BUSINESS

Supplier	Background	Major Purchases	Credit Terms	Commencement of Business Relationship (Since)	Purchase Amount	% of Total Purchases for the Period
					(RMB in thousands)	
<i>For the year ended December 31, 2024</i>						
Chifeng Saliont .	A private company in China primarily engaging in the manufacturing and sale of generic drugs and contracted manufacturing of drug ingredients and products	CMO service	10 calendar days	2019	11,596	11.0%
Supplier E . . .	A leading global contract research organization	CRO service	20 business days	2022	6,773	6.4%
Supplier B . . .	A leading pharmaceutical contract research, development and manufacturing service provider listed in mainland China and Hong Kong	CRO service	30 calendar days	2017	4,824	4.6%
Supplier F . . .	A public hospital in Beijing	clinical center research	10 business days	2022	4,627	4.4%
Supplier G . . .	A Chinese CRO service provider listed on NEEQ	CRO service	10 business days	2023	4,261	4.1%
Total					32,081	30.6%

Except for Chifeng Saliont, which is controlled by our Controlling Shareholder, Mr. Li, all of our five largest suppliers in each year/period during the Track Record Period are Independent Third Parties. Except as disclosed above, none of our Directors or any Shareholder who, to the knowledge of our Directors, owns more than 5% of our issued share capital immediately following completion of the [REDACTED], nor any of their respective associates had any interest in any of our five largest suppliers during the Track Record Period. Our Directors confirm that our historical transactions with Chifeng Saliont have been conducted on arm’s-length basis.

BUSINESS

INTELLECTUAL PROPERTY

Intellectual property rights are pivotal to the success of our business. Our commercial future will depend, in part, on our ability to acquire and protect our intellectual property rights for commercially significant technologies, inventions and know-how. This includes obtaining new patents, defending existing patents, and protecting our trade secrets. We will also have to operate without infringing, misappropriating, or otherwise violating third parties’ valid, enforceable intellectual property rights.

We have a global portfolio of patents to protect our drug candidates and technologies. As of the Latest Practicable Date, we held nine patents issued in China, 18 patents issued overseas, and 59 pending patent applications. As of the Latest Practicable Date, we had not received any material concerns or inquiries from relevant competent authorities that make us believe that any of the pending patent applications will be rejected.

The following table sets forth an overview of the portfolio of our patents and patent applications as of the Latest Practicable Date that are material to our business operation. All of the patents and patents applications below are held by our Company.

Related Product	Name of Patent	Jurisdiction	Status	Date of Grant	Date of Expiration	Commercial rights

The term of an individual patent may vary based on the countries/regions in which it is granted. The actual protection afforded by a patent varies on a claim-by-claim and country-by-country basis and depends upon many factors, including the type of patent, the scope of its coverage, the availability of any patent term extension or adjustment, the availability of legal remedies in a particular country/region and the validity and enforceability of the patent. We cannot provide any assurance that patents will be issued with respect to any of our pending patent applications or any such patent applications that may be filed in the future, nor can we provide any assurance that any of our owned, or in-licensed issued patents or any such patents that may be issued in the future will be commercially useful in protecting our product candidates and the methods of manufacturing the same.

We may rely, in some circumstances, on trade secrets and/or confidential information to protect aspects of our product candidates. We seek to protect our proprietary product candidates and processes, in part, by entering into confidentiality agreements with consultants, scientific advisors and contractors, and invention assignment agreements with our employees. We have entered into confidentiality agreements with our senior management and key members of our R&D team and other employees who have access to trade secrets or confidential information about our business. Our standard employment contract, which we used to employ each of our employees, contains an assignment clause, under which we own all the rights to all inventions, technology, know-how and trade secrets derived during the course of such employee’s work.

These agreements may not provide sufficient protection of our trade secrets and/or confidential information. These agreements may also be breached, resulting in the misappropriation of our trade secrets and/or confidential information, and we may not have an adequate remedy for any such breach. In addition, our trade secrets and/or confidential information may become known or be independently developed by a third party, or misused by any collaborator to whom we disclose such information. Despite any measures taken to protect

BUSINESS

our intellectual property, unauthorized parties may attempt to or successfully copy aspects of our products or to obtain or use information that we regard as proprietary without our consent. As a result, we may be unable to sufficiently protect our trade secrets and proprietary information.

We also seek to preserve the integrity and confidentiality of our data and trade secrets by maintaining physical security of our premises and physical and electronic security of our information technology systems. Despite any measures taken to protect our data and intellectual property, unauthorized parties may attempt to or successfully gain access to and use information that we regard as proprietary. Please see “Risk Factors — Risks Relating to Our Business and Industry — Risks Relating to Our Intellectual Property Rights” for a description of risks related to our intellectual property.

We conduct our business under the brand name of “PrimeGenX” and/or “普祺醫藥.” As of the Latest Practicable Date, neither PrimeGenX nor 普祺醫藥 had been registered as trademark in mainland China. See “Risk Factors — Risks Relating to Our Business and Industry — Risks Relating to Our Intellectual Property Rights — Our brand name has not been registered as trademark in mainland China and therefore may not be adequately protected. This could adversely affect our ability to build brand recognition in our intended market, and our reputation and business could be adversely affected.”

As of the Latest Practicable Date, we held 42 registered trademarks in mainland China. We are also the owner of one domain name and seven software copyrights.

Based on the freedom-to-operate (FTO) analysis of our Core Product, we are not aware of any issued patents that may affect our rights to conduct research and development or commercialize our Core Product in China at the contemplated timeframe. FTO analysis is a patent investigation, based on a search of patent databases, that is commonly used to determine whether any existing patents cover a company’s products, and whether making, using, offering to sell, or selling the products would infringe any existing patents. However, we cannot provide any assurance that all relevant third party patents were identified or that conflicting patents will not be issued in the future.

During the Track Record Period and up to the Latest Practicable Date, (i) we were not involved in any legal, arbitral or administrative proceedings in respect of, and we had not received notice of any material claims of infringement, misappropriation or other violations of, third-party intellectual property; and (ii) we were not involved in any proceedings or claim in respect of any intellectual property rights that may be threatened or pending and that may have an influence on the research and development for any of our product candidates in which we may be a claimant or a respondent.

BUSINESS

COMPETITION

The pharmaceutical industry is characterized by rapidly advancing technologies, competition and a strong emphasis on proprietary drugs. While we believe our pipeline of clinical and pre-clinical stage proprietary assets, leading R&D capability, technology platforms and seasoned management team provide us with competitive advantages, we face potential competition from many different sources, including major pharmaceutical companies, academic institutions, and public and private research institutions. Any product candidates that we successfully develop and commercialize will compete with existing drugs and new drugs that may become available in the future. For more detailed insights into the competitive landscape of our drug candidates, please see “Industry Overview” and “— Our Drug Candidates.”

We focus on leveraging our industry experience and established R&D capabilities for the in-house discovery and development of differentiated therapeutics in the fields of autoimmune and inflammatory diseases. We face fierce competition from existing products and product candidates under development in the market. We face uncertainties in clinical trial development which are subject to a variety of factors, including satisfactory safety and efficacy results from clinical trials, successful enrollment of patients, and performance of CROs and other parties involved in clinical trial development and others.

PROPERTIES

We are headquartered in Beijing, PRC and our R&D center is located in Beijing, PRC.

Owned Properties

As of the Latest Practicable Date, we did not own any real property.

Leased Properties

As of the Latest Practicable Date, we had entered into leasing agreements with respect to six properties for business operation in mainland China with an aggregate GFA of approximately 12,466.48 sq.m. We did not lease any properties overseas. We believe our current facilities are sufficient to meet our near-term business operation needs, and additional space can be obtained on commercially reasonable terms to meet our future needs.

BUSINESS

As of the Latest Practicable Date, one of our lease agreements for properties for our business operation had not been registered with relevant authorities in China. The non-registration of lease agreements will not affect the validity of the lease agreements, but the relevant local housing administrative authorities can require us to complete registrations within a specified timeframe and if we fail to so rectify, we may be subject to a fine of between RMB1,000 and RMB10,000 for each of these leasing properties. For details, see “Risk Factors — Other Risks Relating to Our Operations — We are subject to risks associated with leasing space.” We plan to comply with the lease agreement registration requirement regarding our lease agreements. However, as the filing of the lease agreements requires the coordination of both lessors and lessees, the lessors may not cooperate and complete the registration in a timely manner. During the Track Record Period and up to the Latest Practicable Date, we have not been required by the relevant local housing administration authorities to complete the registration, nor have we been subject to any penalties or fines imposed by the relevant authorities in connection with such matters.

As of the Latest Practicable Date, no single property interest that formed part of non-property activities had a carrying amount of 15% of our total assets. Therefore, according to Chapter 5 of the Listing Rules and section 6(2) of the Companies (Exemption of Companies and Prospectuses from Compliance with Provisions) Notice (Cap. 32L of the Laws of Hong Kong), this Document is exempted from compliance with the requirements of section 342(1)(b) of the Companies (Winding Up and Miscellaneous Provisions) Ordinance in relation to paragraph 34(2) of the Third Schedule to the Companies (Winding Up and Miscellaneous Provisions) Ordinance, which requires a valuation report with respect to our interests in land or buildings.

EMPLOYEES

As of September 30, 2025, we had a total of 90 full-time employees. As of September 30, 2025, employees with a bachelor’s degree or above accounted for more than 93% of the employees, R&D personnel accounted for more than 70% of our total full-time employees and those holding a master’s or doctoral degree represented over 50% of the R&D team. The following table sets forth a breakdown of our full-time employees categorized by function as of September 30, 2025:

Function	Number	Percentage
Management	4	4.4%
R&D	64	71.1%
Administration	17	18.9%
Finance	5	5.5%
Total	90	100.0%

BUSINESS

The following table sets forth a breakdown of our full-time employees categorized by educational background as of September 30, 2025:

Educational Background	Number	Percentage
Doctoral Degree	9	10.0%
Master’s Degree	42	46.7%
Bachelor’s Degree	33	36.7%
Others	<u>6</u>	<u>6.7%</u>
Total	<u>90</u>	<u>100.0%</u>

We enter into individual employment contracts with our employees that covering salaries, bonuses, employee benefits, workplace safety, confidentiality and non-competition, work product assignment clause and grounds for termination.

To maintain our workforce’s quality, knowledge, and skill levels, we provide continuing education and training programs, including internal training, to improve their technical, professional or management skills. We also provide training programs to our employees from time to time to ensure their awareness and compliance with our policies and procedures in various aspects. Furthermore, we provide various incentives and benefits to our employees, including competitive salaries, bonuses and share-based payment, particularly our key employees.

Our employees’ remuneration comprises salaries, bonuses, provident funds, social security contributions, and other welfare payments. We have made contributions to our employees’ social security insurance funds (including pension plans, medical insurance, work-related injury insurance, unemployment insurance and maternity insurance) and housing funds pursuant to applicable laws and regulations. We have complied with all statutory social security insurance fund and housing fund obligations applicable to us under the laws and regulations in China in all material aspects during the Track Record Period and as of the Latest Practicable Date.

Training and Development

We provide our employees with a diverse array of professional development opportunities and foster a performance-driven environment. Our focus is on cultivating a culture that promotes retention and engagement. With our emphasis on our integrated in-house research and development capabilities, we place significant importance on the growth of internal talent. We consistently seek out advancement opportunities for our staff through various internal and external training and development programs, including pre-job training, on-the-job practice, cross-training, special skills training, and talent echelon development training.

BUSINESS

Workplace Safety

We have adopted and maintained a series of rules, standard operating procedures, and measures to maintain our employees’ healthy and safe environment. We implement safety guidelines to set out information about potential safety hazards and procedures. We require employees to participate in safety training to familiarize themselves with the relevant safety rules and procedures. Also, we have policies in place and have adopted relevant measures to ensure the hygiene of our work environment and the health of our employees.

During the Track Record Period and up to the Latest Practicable Date, we had not been subject to any material penalty in relation to health, work safety, social and environmental protection.

Labor Disputes

As of the Latest Practicable Date, we were not aware of any material labor disputes that had resulted in the interruption of our operations.

INSURANCE

We maintain insurance policies that we consider to be in line with market practice and adequate for our business. Our insurance policies cover adverse events in clinical trials. We currently do not maintain insurance for environmental liability or property loss. Please refer to “Risk Factors — Other Risks Relating to Our Operations — Our insurance coverage may not completely cover the risks related to our business and operations, which could expose us to significant costs and business interruptions.”

We consider that the coverage from the insurance policies maintained by us is adequate for our present operations and is in line with the industry norm. During the Track Record Period, we had not made or been the subject of any material insurance claims.

ENVIRONMENTAL, SOCIAL, HEALTH AND SAFETY MATTERS

ESG Governance

ESG Governance Structure

We have established an ESG governance framework encompassing decision-making, management and execution dimensions, forming a governance structure with clearly delineated responsibilities and seamless coordination. This provides robust organizational safeguards for systematically advancing ESG initiatives and enhancing disclosure quality.

BUSINESS

As the supreme decision-making body for ESG matters, the Board of Directors bears ultimate responsibility for ESG management. It is tasked with reviewing, evaluating and approving major ESG issues, operational objectives, key policies and external disclosure reports.

The Board office serves as the central governance hub, undertaking the day-to-day management and coordination of ESG affairs. The ESG Working Group reports directly to it. All materiality assessments, key data, and draft reports must be submitted to the Board office for discussion and confirmation. Subsequently, the Board Secretary reports to the Board, ensuring the accurate communication of decision-making information.

The ESG Working Group, as the operational body, oversees the coordination and implementation of ESG initiatives. It organizes and coordinates ESG activities across our entire operations, ensuring timely, complete and accurate disclosure of information. Through quarterly communication meetings, it continuously monitors data submission, addresses anomalies and drives improvements, thereby ensuring effective execution of all tasks mandated by Board decisions.

ESG Risk Management and Strategies

We uphold a “zero tolerance” policy towards illegal and non-compliant activities, integrating a culture of compliance into our corporate governance framework. Through comprehensive risk identification and assessment procedures, we have established a multi-dimensional oversight mechanism covering core business areas including financial reporting, compliant operations, intellectual property protection, and anti-corruption. This achieves synergy between risk prevention and our sustainable development objectives.

Environmental

Indicators

We proactively implement carbon reduction and environmental principles, adopting a series of measures to address environmental risks, including climate change and energy scarcity. Through conducting environmental impact assessments, we ensure our activities meet sustainability standards. With reference to guidelines such as the Environmental Key Performance Indicators Reporting Guidance issued by the Stock Exchange, we monitor all energy consumption metrics, ensuring full alignment with our ESG governance framework and green energy-saving targets. We persistently enhance energy utilization efficiency to achieve our sustainable development objectives.

Our core business is pharmaceutical R&D. We do not directly engage in manufacturing activities and have no subsidiaries. As we do not own or lease vehicles on a long-term basis, our primary energy consumption stems from water and electricity usage in offices and laboratories.

BUSINESS

The following table sets forth a breakdown of our key energy consumption during the Track Record Period:

	Year ended December 31,	Nine months ended September 30,
	2024	2025
Resource consumption		
Water (<i>tons</i>)	1,246.00	873.00
Electricity (<i>MWh</i>)	4.25	3.31

We are committed to strengthening the monitoring of our greenhouse gas (GHG) emissions and have conducted a comprehensive verification of emissions from our operations during the Track Record Period.

The following table sets forth a breakdown of our key greenhouse gas emissions during the Track Record Period:

	Year ended December 31,	Nine months ended September 30,
	2024	2025
Greenhouse gas emissions		
Total green house gas emissions	2.37	1.85
Scope 1 greenhouse gas emissions (tons of CO ₂ equivalent)	0	0
Scope 2 greenhouse gas emissions (tons of CO ₂ equivalent)	2.37	1.85

Note: The total greenhouse gas emissions represent the sum of Scope 1 and Scope 2 greenhouse gas emissions. Due to our asset-light operating model, we have limited control over the supply chain. Given the practical difficulties, we have not disclosed data related to Scope 3 greenhouse gas emissions.

BUSINESS

Energy Conservation, Emissions Reduction Targets and Safety Objectives

The following table sets forth our objectives towards energy conservation, emissions reduction and workplace safety:

Objectives	Reference Value
Reduction in electricity consumption intensity by 2030 relative to 2024	5%
Workplace environmental pollution incidents	0
Compliant disposal rate for laboratory hazardous waste	100%
Work-related injury rate	< 0.50%
Of which: Major laboratory safety incidents	0
Pre-employment safety training coverage rate	100%
Major complaints from clinical trial subjects and serious ethical violation incidents	0
Regulatory penalty incidents due to failure to disclose major information truthfully, accurately, and timely	0
Senior management held accountable for violations of integrity principles	0
Standardized operations; major administrative penalties due to unfair competition	0
R&D data breach incidents	0

Emissions

Our core business is innovative drug R&D. Production of clinical-stage drugs is conducted via CMOs. We do not possess our own production facilities, and thus there are no emissions of exhaust gases, wastewater, or solid waste generated from production processes.

During the Track Record Period, we have no records of environmental compliance violations or penalties. Laboratory waste treatment processes have passed environmental acceptance inspections. We regularly upgrade pollution treatment facilities and continuously improve environmental management procedures.

The following table sets forth the hazardous waste amount during the Track Record Period:

	Year ended December 31,	Nine months ended September 30,
	2024	2025
Total Hazardous Waste (<i>tons</i>)	3.95	2.60

BUSINESS

Climate Change

We acknowledge climate change as a significant challenge that cannot be overlooked in our operations. Going forward, we will continue to monitor the risks and opportunities presented by climate change and conduct systematic climate change risk assessments, thereby enabling more comprehensive implementation of mitigation measures and continuous improvement of our environmental management strategies and efficiency.

Regarding physical risks, such as natural disasters like high winds and extreme heat, our office premises may require temporary closure. This could not only lead to asset damage and R&D disruption but also threaten employee safety, ultimately potentially resulting in revenue decline. To effectively prevent and respond to these risks, we pay close attention to potential disastrous weather events and focus on properly implementing emergency response plans for extreme weather conditions, making timely adjustments based on temperature changes and weather situations. This ensures business activities can proceed as smoothly as possible, minimizing the impact of natural disasters on corporate operations. Additionally, we have invested in disaster recovery equipment and equipped our archives room with anti-theft, fire prevention, high-temperature protection, mold prevention, damp-proofing, and pest control facilities. Regular file backups are performed to ensure critical archives and data are not damaged or lost due to weather conditions.

During the Track Record Period, we were not significantly affected by the aforementioned climate change-related risks. In the future, we will continue to fulfill our corporate responsibility in addressing climate change, closely monitor climate risks and opportunities, strive to reduce the carbon footprint of our own operations, continuously improve resource use efficiency, and minimize the potential negative environmental impact of our business activities as much as possible.

Social

Employment

We are committed to continuously improving our employment system, creating a safe and comfortable working environment and a diversified development platform for our employees. Our employee structure is of high quality. We focus on talent acquisition and cultivation, safeguarding employees’ equal rights in terms of employment conditions, training, promotion, and compensation.

Our recruitment is based on business development needs and role requirements. Where possible, we prioritize internal candidates who meet the position’s criteria. Should no suitable internal candidates be available, we then seek qualified external applicants. Throughout the recruitment process, there is no discrimination based on gender, age, ethnicity, religious beliefs, disability, or similar factors. We firmly oppose any form of employment discrimination.

BUSINESS

We strictly adhere to labor-related laws and regulations. During the recruitment process, we avoid illegal or non-compliant employment through prudent information collection and approval procedures. We also prohibit forced labor, respect employees’ right to choose employment, and base work arrangements strictly on labor contract terms, without any use of violence, threats, or other forms of forced labor, fully protecting employees’ legitimate rights and interests.

The following table sets forth the key employment performance indicators:

	Year ended December 31,	Nine months ended September 30,
	2024	2025
Male	43	43
Female	51	47
Employee Turnover Rate	20%	7%

Occupational Health and Safety

We comply with employee safety and health-related laws and regulations. We provide annual health check-ups for all employees, demonstrating our commitment to their physical and mental well-being. Furthermore, we equip R&D personnel with professional protective equipment such as gloves, goggles, and protective clothing. We also purchase group accident insurance for eligible employees. New employees must undergo training and pass corresponding assessments before assuming their posts.

Clinical Trial Subject Protection

As an R&D-focused pharmaceutical company, we strictly adhere to the Good Clinical Practice (GCP) and are committed to building a comprehensive subject protection system throughout the entire process.

We implement a complete informed consent process, using clear and understandable language to fully inform subjects (or their guardians) about the clinical trial’s purpose, procedures, potential risks, rights protection, etc., ensuring subjects voluntarily sign the informed consent form with full understanding. Subject-related data is encrypted and stored with hierarchical access control. When involving contract R&D services, we require the entrusted organizations to strictly comply with regulatory provisions to safeguard subject data compliance and rights.

BUSINESS

Anti-Corruption

We consistently regard anti-corruption compliance as a core principle of corporate operations. By building and improving a management system, implementing full-chain risk prevention and control, conducting regular training and education, and establishing unobstructed supervision and reporting channels, we create an honest and compliant business operating environment, prohibiting any form of corruption, bribery, or improper benefit transfers. We explicitly prohibit providing improper benefits (such as rebates, excessive sponsorships, bid-rigging, etc.) to relevant parties including suppliers (including CROs, SMOs, reagent suppliers, etc.), clinical trial institutions, and government departments. Bribery, acceptance of bribes, and commercial fraud are strictly prohibited. The regulations also stipulate that for procurement and outsourcing businesses, contract negotiations must involve professionals from legal, technical, and other departments. Major contracts undergo multi-level approval, and contract texts must be reviewed by the legal department, with anti-corruption responsibilities and consequences for breach clearly defined in key clauses.

PERMITS, LICENSES AND OTHER APPROVALS

As of the Latest Practicable Date, we had obtained all requisite licenses, approvals and permits from relevant authorities that are material to our operations in the PRC and such licenses, permits and certifications all remain in full effect. For more details regarding the laws and regulations to which we are subject, see “Regulatory Overview.” We had not experienced any material difficulty in renewing such licenses, permits, approvals and certificates during the Track Record Period and up to the Latest Practicable Date, and we currently do not expect to have any material difficulty in renewing them when they expire, if applicable. There is no material legal impediment in renewing such licenses, permits, approvals and certificates as they expire in the future as long as we are in compliance with applicable laws, regulations and rules. During the Track Record Period and up to the Latest Practicable Date, we had not been penalized by any government authorities for any non-compliance relating to maintenance and renewal of our material licenses, permits, approvals and certificates.

BUSINESS

The following table sets forth the details of our material licenses, permits and approvals as of the Latest Practicable Date:

License/Permit	Issuing Authority	Holder	Grant Date	Expiration Date
Drug Manufacturing License (藥品生產許可證)	Beijing Municipal Medical Products Administration	Our Company	2025-12-10	2030-01-21
Filing Certificate for Enterprises Engaged in Explosive-Precursor Hazardous Chemicals (易制爆危險化學品從業單位備案證明)	Beijing Municipal Public Security Bureau Fengtai District Branch	Our Company	2024-03-19	N/A

LEGAL PROCEEDINGS AND NON-COMPLIANCE

Legal Proceedings

During the Track Record Period and up to the Latest Practicable Date, we were not a party to any actual or threatened legal or administrative proceedings. We are committed to maintaining the standards of compliance with the laws and regulations applicable to our business. However, we may from time to time be subject to various legal or administrative claims and proceedings arising in the ordinary course of business.

Legal Compliance

According to our PRC Legal Advisor, during the Track Record Period and up to the Latest Practicable Date, we had not been and were not involved in any material non-compliance incidents that led to fines, enforcement actions or other penalties that could, individually or in the aggregate, have a material adverse effect on our business, financial condition or results of operation. Our Directors confirmed that we had complied with all material applicable laws and regulations for our operations in the PRC and we were not involved in any material or systemic non-compliance incidents in the PRC.

BUSINESS

RISK MANAGEMENT AND INTERNAL CONTROL

Risk Management

We are exposed to various risks in our business operations, and we believe that risk management is important to our success. For more details, see “Risk Factors — Other Risks Relating to Our Operations.” Our Directors oversee and manage the overall risks associated with our operations. We have prepared written terms of reference in compliance with Rule 3.21 of the Listing Rules and the Corporate Governance Code and Corporate Governance Report as set out in Appendix C1 to the Listing Rules.

To monitor the ongoing implementation of our risk management policies and corporate governance measures after the [REDACTED], we have adopted or will continue to adopt, among other things, the following risk management measures:

- establish an Audit Committee to review and supervise our financial reporting process and internal control system;
- adopt various policies to ensure compliance with the Listing Rules, including but not limited to aspects related to risk management, connected transactions and information disclosure;
- provide anti-corruption and anti-bribery compliance training periodically to our senior management and employees to enhance their knowledge and compliance with applicable laws and regulations; and
- attend training sessions by our Directors and senior management in respect of the relevant requirements of the Listing Rules and duties of directors of companies listed in Hong Kong.

Internal Control

We have employed an independent internal control consultant to assess our internal control system in connection with the [REDACTED]. The internal control consultant has conducted a review procedure on our internal control system in certain aspects, including financial reporting and disclosure controls, corporate level controls, information system control and other procedures for our operations. Accordingly, we have improved our internal control by adopting and implementing the corresponding enhanced internal control measures. Going forward, we will continue to regularly review and improve these internal control policies, measures and procedures.

BUSINESS

We have also appointed external legal counsel to advise us on compliance matters, such as compliance with the regulatory requirements on clinical R&D. Under our whistle blowing policy, we make our internal reporting channel open and available for our employees to report, on an anonymous basis, any non-compliance incidents and acts, including bribery and corruption. Reported incidents and persons will be investigated and appropriate measures will be taken in response to the findings. We have also established anti-bribery guidelines and compliance requirements. After considering the remedial actions we have taken, our Directors are of the view that our internal control system is adequate and effective for our current operations.

We plan to provide our Directors, senior management, and relevant employees with continuous training programs and updates regarding the relevant laws and regulations regularly to proactively identify any concerns and issues relating to any potential non-compliance.

Anti-bribery

We maintain a strict code of conduct and anti-corruption policies among our employees. We believe we will be less affected by the increasingly stringent measures taken by the PRC government to correct corruptive practices in the pharmaceutical industry. We strictly prohibit bribery or other improper payments in our business operations. This prohibition applies to all business activities, anywhere globally, whether involving government officials or healthcare professionals. Improper payments prohibited by this policy include bribes, kickbacks, excessive gifts or entertainment, or any other payment made or offered to obtain an undue business advantage. We keep accurate books and records that reflect transactions and asset dispositions in reasonable detail. Requests for false invoices or payment of unusual, excessive or inadequately described expenses should be rejected and promptly reported. Misleading, incomplete or false entries in our books and records are never acceptable.

We have adopted comprehensive internal control measures for anti-corruption and anti-bribery by (i) providing regular anti-corruption and anti-bribery compliance training for senior management and employees, including daily compliance team meeting, annual compliance training and other ad hoc compliance training sessions, to enhance their knowledge and compliance with applicable law and regulations; (ii) monitoring books, records and accounts with respect to supplier management, tendering and bidding process management and financial payment management to identify any false, misleading or undisclosed entries; (iii) establishing whistle-blowing mechanisms and encouraging all employees, suppliers, and other relevant parties to report suspicious activities and violations of the policies.

BUSINESS

Conflict of Interest and Non-Competition

Our code of conduct clearly defines the scope of conflicts of interest, including supplier and customer relationships, hospitality and gifts, financial interests and personnel matters. Our employees, including but not limited to our Directors and R&D team members, may not have or be suspected of having a personal interest in business dealings with our suppliers, business partners, or competitors; accept monetary, financial or other benefits from our suppliers, customers, competitors or distributors; have close relatives who work for our suppliers, customers, competitors or distributors; serve as a consultant or director in an association or company in the same market or industry. At the same time, employees shall keep confidential information strictly confidential and agree on the definition of confidential information, the content covered, the use of intellectual properties, including but not limited to any transfer of know-how, acquisition of technologies, and potential breach liabilities.

Our employee agreements have included non-competition clauses, which prohibit employees from engaging in or directly or indirectly assisting any third party to engage in the same, similar and competitive business activities as our Company for a period of two years from the date of termination of employment. Any of our employees shall not, without prior written approval from our Company, own, manage, operate or control any other entity that competes with our Company.

Data Privacy Protection

We are subject to the relevant local, state, national and international data protection and privacy laws, directives regulations and standards that apply to the collection, use, retention, protection, disclosure, transfer and other processing of personal data in the various jurisdictions in which we operate and conduct our clinical trials, as well as contractual obligations.

We do not have direct access to the personal information of patients participating in our clinical trials. Such information is cleansed before we receive clinical trial data from our CROs or the CROs receive relevant trial information from the hospitals administering the trials. We require that all parties involved in clinical trials, both external and internal, comply with applicable confidentiality obligations. Our CROs and other partners are obligated to safeguard the confidentiality of such information pursuant to our contracts with them. Compliance with GCP and relevant rules ensures that only approved personnel can access clinical trial data. Data utilization is strictly confined to the use consented to by the patients, which is in line with the Informed Consent Form (“ICF”). We ensure to obtain further consent from patients for any data usage that extends beyond the ICF’s scope. Any data transfer related to our product development activities and regulatory communications must comply with relevant local data protection and privacy laws. Despite the evolving nature of these laws and our potential clinical trials, we have not encountered significant issues with data transfers so far. We believe our practices related to transferring clinical trial data are in line with industry standards.

BUSINESS

During the Track Record Period and up to the Latest Practicable Date, we did not experience any breach of confidential personal information or any other personal information-related incidents which could cause a material adverse effect on our business, financial condition or results of operations. During the Track Record Period and up to the Latest Practicable Date, we had not been subject to any material penalty in relation to data privacy, and had been in compliance with the relevant PRC laws and regulations in all material aspects in this regard.

AWARDS AND RECOGNITIONS

The table below sets forth a summary of the major awards and recognition we received during the Track Record Period.

Year of Grant	Award/Recognition	Issuing Authority
2019, 2022 and 2026	National High-Tech Enterprise (國家級高新技術企業)	Municipal Science and Technology Commission/ Finance Bureau/Beijing Tax Bureau
2025	Zhongguancun High-Tech Enterprise (中關村高新技術企 業)	Zhongguancun Science Park Administrative Committee
2023	National-level Specialized, Sophisticated, Unique and Innovative “Little Giant” Enterprise (國家級專精特新“小 巨人”企業)	Ministry of Industry and Information Technology
2023	Beijing Intellectual Property Pilot Unit (北京市知識產權試點單 位)	Beijing Intellectual Property Office
2022	Beijing Municipal Specialized, Sophisticated, Unique and Innovative SME (北京市“專精 特新”中小企業)	Beijing Municipal Bureau of Economy and Information Technology (北京市經濟和信息 化局)

CONTINUING CONNECTED TRANSACTION

OVERVIEW

Pursuant to Chapter 14A of the Listing Rules, the directors, substantial shareholders and chief executive of our Company and any person who was a director of our Company within 12 months preceding the [REDACTED] and any of their respective associates will be connected persons of our Company upon [REDACTED].

We have entered into certain agreements with Chifeng Saliont, a company controlled by Mr. Li, chairman of the Board, an executive Director, general manager and one of the Controlling Shareholders of the Company, who will become a connected person of our Company upon [REDACTED] and the transactions contemplated under such agreements will constitute continuing connected transaction of our Company under Chapter 14A of the Listing Rules upon [REDACTED]. As our Company is eligible for [REDACTED] on the Stock Exchange under Chapter 18A of the Listing Rules as a pre-revenue biotech company, the revenue ratio under Rule 14.07 of the Listing Rules would not be an appropriate measurement of the size of relevant continuing connected transactions as set out in this section. Accordingly, we have applied a percentage ratio test based on the total expenses for R&D and administrative matters of our Company as an alternative size test.

NON-EXEMPT CONTINUING CONNECTED TRANSACTION

The following transaction is made in the ordinary and usual course of business and on normal commercial terms or better which will be regarded as non-exempt continuing connected transaction of our Company under Chapter 14A of the Listing Rules.

CMO Services Framework Agreement

Transaction	Applicable Listing Rules	Waiver sought	Proposed annual caps for the year ending December 31,		
			2026	2027	2028
			(RMB'000)		
CMO Services Framework Agreement	14A.34 to 14A.36, 14A.49, 14A.51 to 14A.59, 14A.71, 14A.105	Announcement, circular, and independent shareholders' approval requirements under Chapter 14A of the Listing Rules	7,000	7,000	18,000

CONTINUING CONNECTED TRANSACTION

We have historically procured contract manufacturing organization services (the “**CMO Services**”) from Chifeng Saliont from time to time in our ordinary course of business. The CMO services primarily include processing and testing of clinical samples based on Company’s specific technical requirements. We intend to continue to engage Chifeng Saliont to provide us with CMO Services after the [REDACTED].

Principal terms

On [●], our Company and Chifeng Saliont entered into a framework agreement in relation to the procurement of CMO Services (the “**CMO Services Framework Agreement**”), pursuant to which Chifeng Saliont agreed to provide CMO Services to our Company. The CMO Services Framework Agreement has a term commencing from the [REDACTED] to December 31, 2028, which may be renewed for a further term not exceeding three years from time to time, as the parties may mutually agree, subject to compliance with the requirements under Chapter 14A of the Listing Rules and all other applicable laws and regulations. Relevant members of both parties will enter into separate CMO services agreements setting out the specific terms and conditions based on the principles provided in the CMO Services Framework Agreement.

Reasons for the Transactions

Chifeng Saliont is primarily engaged in pharmaceutical wholesale and pharmaceutical manufacturing, including: (1) production and wholesale of generic drugs; and (2) providing contract manufacturing services (CMO business) to innovative pharmaceutical companies, encompassing the synthesis of active pharmaceutical ingredients (APIs) and the processing of finished drug products.

Taking into account (i) our past collaboration with Chifeng Saliont and its track record in providing CMO Services to us, particularly its pricing, reliability in delivery of our orders, service quality and production capacity; and (ii) its understanding of our requirements for our service specifications, our Directors believe that Chifeng Saliont is able to provide the required services that suit our needs and that it is in the best interests of our Company and Shareholders to enter into the CMO Services Framework Agreement.

Pricing Policy

The service fees payable by us to the Chifeng Saliont under the CMO Services Framework Agreement shall be determined after arm’s length negotiations between the parties with reference to the nature, scope and complexity of processing service and testing service to be provided, the expected cost and expenses for provision of the required services plus a profit margin and the prevailing market price of independent third party suppliers in the same industry.

We will obtain quotations from independent third party suppliers for the services of comparable specification. We shall solicit one to three other quotations from independent third parties for comparable products to determine if the price and terms offered by the Chifeng

CONTINUING CONNECTED TRANSACTION

Salient are fair and reasonable and comparable to those offered by independent third parties. The pricing terms under the CMO Services Framework Agreement shall be no less favorable to our Company than the terms offered by independent third parties or the terms offered by the Chifeng Salient to customers who are not connected thereto. Our independent non-executive Directors will review and reassess the amounts of payments made to the Chifeng Salient on an annual basis. Besides, we will take into account factors including the quality of the services and specifications offered by independent third party qualified suppliers and as such, in the event that we are able to obtain more preferential terms from independent third party qualified suppliers, including better payment terms, and the relevant technical and quality requirements are satisfied, we may opt not to procure the products from the Chifeng Salient.

Historical amounts

The historical aggregate purchase of CMO services by our Company to the Chifeng Salient for the year ended December 31, 2024 and the nine months ended September 30, 2025 amounted to RMB11.6 million and RMB4.8 million, representing 11.0% and 7.5% of our Company’s total purchase, respectively. The fluctuations in historical transaction amounts were primarily attributable to the reduced demand for CMO services in light of the status of the research and development activities.

Annual caps

Our Directors estimate that the maximum amount of service fees payable by the Company to Chifeng Salient under the CMO Services Framework Agreement for each of the three years ending December 31, 2028 will not exceed RMB7.0 million, RMB7.0 million and RMB18.0 million, respectively.

In arriving at the above annual caps, our Directors have considered the volume, work order and estimated schedule of CMO services we expect to procure from Chifeng Salient for the three years ending December 31, 2028. Based on the current status of the clinical trial of our Core Product, we expect an increase in CMO Services for the year ending December 31, 2028.

Listing Rules implications

As one or more of the applicable percentage ratios (other than the profits ratio) in respect of the annual caps under the CMO Services Framework Agreement is expected to be more than 5% on an annual basis, the transactions contemplated under the CMO Services Framework Agreement constitute continuing connected transaction for our Company which will, upon [REDACTED], be subject to the reporting, annual review, announcement, circular and independent shareholders’ approval requirements under Chapter 14A of the Listing Rules.

CONTINUING CONNECTED TRANSACTION

WAIVER APPLICATION FOR THE NON-EXEMPT CONTINUING CONNECTED TRANSACTION

Under Rule 14A.76(2) of the Listing Rules, the transactions under the paragraph headed “Non-exempt continuing connected transaction” will constitute our continuing connected transaction subject to those requirements under Chapter 14A of the Listing Rules upon the [REDACTED].

As the non-exempt continuing connected transaction is expected to continue on a recurring and continuing basis and have been fully disclosed in this document, our Directors consider that compliance with the announcement and the independent Shareholders’ approval requirements (as the case may be) would be impractical, and such requirements would lead to unnecessary administrative costs and would be unduly burdensome to us.

Accordingly, we have applied to the Hong Kong Stock Exchange for, and the Hong Kong Stock Exchange [has granted], waivers exempting us from strict compliance with the announcement and independent Shareholders’ approval requirements under Chapter 14A of the Listing Rules in respect of the continuing connected transaction as disclosed in “Non-exempt Continuing Connected Transaction” in this section, subject to the condition that the aggregate amounts of the continuing connected transaction for each financial year shall not exceed the relevant amounts set forth in the respective annual caps (as stated above).

In the event of any future amendments to the Listing Rules imposing more stringent requirements than those applicable as of the Latest Practicable Date on the continuing connected transaction referred to in this document, we will take immediate steps to ensure compliance with such new requirements within reasonable time.

CONFIRMATION FROM OUR DIRECTORS

Our Directors (including our independent non-executive Directors) consider that all the aforesaid continuing connected transactions in this section have been and will be carried out (i) in the ordinary and usual course of our business, (ii) on normal commercial terms or better; and (iii) in accordance with the respective terms that are fair and reasonable and in the interests of our Company and our Shareholders as a whole.

Our Directors (including our independent non-executive Directors) are also of the view that the proposed annual caps of all the respective continuing connected transaction in this section are fair and reasonable and are in the interests of our Company and our Shareholders as a whole.

JOINT SPONSORS’ CONFIRMATION

Based on the documentation and information provided by our Company and the due diligence and discussions with our Company, the Joint Sponsors are of the view (i) that the continuing connected transaction described under this section has been entered into in the

CONTINUING CONNECTED TRANSACTION

ordinary and usual course of our business, on normal commercial terms or better, and are fair and reasonable and in the interests of our Company and our Shareholders as a whole; and (ii) that the proposed annual caps of such continuing connected transaction are fair and reasonable, and in the interests of our Company and our Shareholders as a whole.

INTERNAL CONTROL MEASURES TO SAFEGUARD SHAREHOLDERS’ INTERESTS

In order to further safeguard the interests of our Shareholders as a whole (including the minority Shareholders), our Company has implemented the following internal control measures in relation to the continuing connected transaction:

- We have approved internal guidelines which provide that if the value of any proposed connected transaction is expected to exceed certain thresholds, the relevant staff must report the proposed transactions to the head of the relevant business unit in order for our Company to commence the necessary additional assessment and approval procedures and ensure that we will comply with the applicable requirements under Chapter 14A of the Listing Rules; and
- We will provide information and supporting documents to the independent non-executive Directors and the auditors in order for them to conduct an annual review of the continuing connected transaction(s) entered into by our Company. In accordance with the requirements under the Listing Rules, the independent non-executive Directors will conduct annual review to ensure that the continuing connected transaction(s) have been entered into in the ordinary and usual course of business of our Company, are on normal commercial terms and are in accordance with the agreement governing them on terms that are fair and reasonable and in the interests of the Shareholders as a whole, and the auditors will also conduct annual review on the pricing and annual cap of the non-exempt continuing connected transaction(s).

DIRECTORS AND SENIOR MANAGEMENT

BOARD OF DIRECTORS

Our Board comprises nine Directors, including four executive Directors, one non-executive Director and four independent non-executive Directors. The following table sets forth information in relation to our Directors:

Name	Age	Position(s)	Date of Joining Our Company	Date of Appointment as Director	Roles and Responsibilities	Relationship with Other Directors or Senior Management Members
Mr. Li Yuliang (李雨亮)	45	Chairman of the Board, executive Director and general manager	September 26, 2016	April 10, 2021	Responsible for overall strategic planning of our Company and leading our Board	Spouse of Ms. Wang Hongmei (王紅媚)
Dr. Daniel Yunlong Du . . .	61	Executive Director, Deputy General Manager and chief medical officer	March 1, 2021	April 10, 2021	Responsible for supervising clinical development strategy and execution, and overall R&D strategy and project planning of our Company	None
Mr. Wu Xing (毋興)	48	Executive Director, Chief Financial Officer, Board Secretary, and one of the joint company secretaries	September 26, 2016	April 10, 2021	Responsible for supervising corporate investment and financing activities, overall financial planning, and investor relations management of our Company	None
Ms. Wang Hongmei (王紅媚)	46	Executive Director	May 28, 2020	May 28, 2020	Responsible for overseeing the operation and daily management of our Company	Spouse of Mr. Li Yuliang (李雨亮)

DIRECTORS AND SENIOR MANAGEMENT

Name	Age	Position(s)	Date of Joining Our Company	Date of Appointment as Director	Roles and Responsibilities	Relationship with Other Directors or Senior Management Members
Dr. Han Yongxin (韓永信)	59	Non-executive Director	September 1, 2018	May 28, 2020	Responsible for providing strategic and industry-level advice to the Board	None
Mr. Zhang Qing (張青)	47	Independent non-executive Director	January 23, 2025	January 23, 2025	Responsible for providing independent advice and judgment to our Board	None
Mr. Na Shuai (那帥)	37	Independent non-executive Director	January 23, 2025	January 23, 2025	Responsible for providing independent advice and judgment to our Board	None
Mr. Hu Wei (胡威)	42	Independent non-executive Director	January 23, 2025	January 23, 2025	Responsible for providing independent advice and judgment to our Board	None
Mr. Lang Xiaofeng (郎曉峰)	43	Independent non-executive Director	[●]	[●]	Responsible for providing independent advice and judgment to our Board	None

DIRECTORS AND SENIOR MANAGEMENT

Executive Directors

Mr. Li Yuliang (李雨亮), aged 45, is the chairman of the Board, an executive Director and general manager of our Company. Mr. Li founded our Company in September 2016 and has served as the executive Director and chairman of our Board since April 2021, and the Company’s legal representative since February 2022 and was appointed as the general manager of the Company in January 2025. He is primarily responsible for overall strategic planning of our Company and leading our Board. He is also one of our Controlling Shareholders and the spouse of Ms. Wang.

Prior to founding our Company, Mr. Li accumulated extensive experience and a successful track record across the broader healthcare industry. Mr. Li has particular experience and industry resources within the pharmaceutical and medical sectors, enabling him with a forward-looking business perspective critical to the integrated health field. Mr. Li has over 18 years of experience in corporate and business management. From October 2007 to July 2011, he served as an executive director and manager of Chifeng Jinquan Health Technology Co., Ltd. (赤峰金泉健康科技有限公司), formerly known as Chifeng Jinquan Electronic Products Co., Ltd.* (赤峰金泉電子產品有限公司), a company that is primarily engaged in production and sales of electronic products. From April 2011 to April 2025, he was the executive director and manager at Chifeng Saliont Pharmaceutical Co., Ltd.* (赤峰賽林泰藥業有限公司), a company that is primarily engaged in production and sales of drugs. In January 2016, Mr Li established Chifeng Fukang Investment Management Co., Ltd. (赤峰福康投資管理有限公司) (“Chifeng Fukang Investment”), which primarily engages in investment and operations within the comprehensive health business sector. Through Chifeng Fukang Investment, Mr. Li acquired interests in Chifeng Meinian Healthcare Management Co., Ltd. (赤峰美年大健康健康管理有限公司), a company primarily engages in body check and consulting services in April 2016. In March 2017, Mr. Li indirectly founded Chifeng Ciming Healthcare Management Co., Ltd. (赤峰慈銘健康管理有限公司), which primarily engages in body check and consulting services. In June 2019, he indirectly founded Chifeng Jinfu Real Estate Development Co., Ltd. (赤峰晉福房地開發有限公司), which primarily engages in the wellness-integrated real estate business. In May 2020, he indirectly founded Chifeng Qinghe Hospital (赤峰清河醫院), a private secondary general hospital specializing in chronic disease rehabilitation services.

Mr. Li served as a director, legal representative or the general manager of the following companies, which were established in the PRC, at the time or within 12 months from the time of their deregistration or revocation of business license. The relevant details are as follows:

Name of Enterprise	Place of Incorporation	Status	Date of Dissolution	Reason of Dissolution	Position held
Beijing Huanxiang Vision Culture Media Co., Ltd. (北京幻想視覺文化傳媒有限公司)	PRC	Deregistration	August 11, 2021	Revocation of business license	Chairman of the board and legal representative

DIRECTORS AND SENIOR MANAGEMENT

Name of Enterprise	Place of Incorporation	Status	Date of Dissolution	Reason of Dissolution	Position held
Chifeng Zhirong Investment Co., Ltd. (赤峰智榮投資有限公司)	PRC	Deregistration	March 31, 2016	Cessation of business operation	Executive director, general manager and legal representative
Shanghai Aoyun Software Co., Ltd. (上海奧雲軟件有限公司)	PRC	Deregistration	March 22, 2019	Cessation of business operation	Executive director, general manager and legal representative
Chifeng Puqi Pharmaceutical Technology Co., Ltd. (赤峰普祺醫藥科技有限公司)	PRC	Deregistration	July 25, 2022	Cessation of business operation	Executive director, general manager and legal representative

As confirmed by Mr. Li, to the best of his knowledge, (i) the aforesaid companies were solvent immediately prior to their dissolution or revocation of business license, (ii) there was no wrongful act on his part leading to the dissolution or revocation of business license, and (iii) he is not aware of any actual or potential claim that has been or will be made against him as a result of the dissolution or revocation of business license.

Mr. Li graduated from Hebei Finance University, majoring in finance in the PRC in July 2002.

Dr. Daniel Yunlong Du, aged 61, is an executive Director and deputy general manager of our Company. Dr. Du has been appointed as chief medical officer since April 2021. He has been appointed as Director since April 2021. He was further appointed as general manager from March 2021 to January 2025 and was appointed as a deputy general manager in January 2025. He is primarily responsible for supervising clinical development strategy and execution, and overall R&D strategy and project planning of our Company.

Dr. Du has over 20 years of extensive experience in the pharmaceutical and healthcare R&D industry. Dr. Du held position at Pfizer Inc., a multinational pharmaceutical company headquartered in New York from August 2002 to August 2007 with his last position as the associate director. From October 2009 to August 2015, he was the principal clinical scientist at GlaxoSmithKline Plc., a multinational pharmaceutical company headquartered in the United Kingdom. From November 2015 to March 2016, he served at Akebia Therapeutics, Inc., a pharmaceutical company in Massachusetts in the United States. From March 2016 to August 2017, he worked as the vice president at Frontage Clinical Services, Inc., a company engaged in drug development studies in New Jersey in the United States. From November 2017 to March 2021, Dr. Du worked at Hualing Pharmaceuticals Technology (Shanghai) Co., Ltd. (華領醫藥技術(上海)有限公司), a company listed on The Stock Exchange of Hong Kong Limited (stock code: 02552.HK), as the senior vice president.

DIRECTORS AND SENIOR MANAGEMENT

Dr. Du obtained his bachelor’s degree in medicine and a master’s degree in medicine with a major in basic medical science and pharmacology from Peking Medical University (北京醫科大學), now known as the Peking University Health Science Center (北京大學醫學部), in the PRC in July 1987 and July 1989 respectively. He attended Albany Medical College from August 1990, majoring in pharmacology and toxicology, and was awarded a doctor of philosophy degree by the institution, in the United States of America in May 1995.

Mr. Wu Xing (毋興), aged 48, is an executive Director, Chief Financial Officer, Board Secretary and one of the joint company secretaries of our Company. Mr. Wu was appointed as manager from September 2016 to May 2020. He was further appointed as the supervisor from May 2020 to April 2021. He was appointed as a Director in April 2021, appointed as the chief financial officer in August 2023 and appointed as Board secretary in January 2025. He is primarily responsible for supervising corporate investment and financing activities, overall financial planning, and investor relations management of our Company. Mr. Wu is also responsible for overseeing and executing various rounds of financing activities of the Company. Mr. Wu is a member of the Remuneration Committee.

Mr. Wu has over 15 years of experience in finance and investment. From February 2003 to May 2004, he worked at Beijing Zhonghongjin Information Co., Ltd. (北京中宏金資訊有限公司). She is a Chartered Secretary, a Chartered Governance Professional and an associate of both The Hong Kong Chartered Governance Institute and The Chartered Governance Institute in the United Kingdom, respectively.

BOARD COMMITTEES

Our Board delegates certain responsibilities to various dedicated committees. In accordance with relevant PRC laws, regulations, the Articles and the Hong Kong Listing Rules, we have formed three Board committees, namely, the Audit Committee, the Remuneration Committee and the Nomination Committee.

DIRECTORS AND SENIOR MANAGEMENT

Audit Committee

Our Company has established an audit committee with written terms of reference in compliance with Rule 3.21 of the Listing Rules and paragraph D.3 of the CG Code. The primary duties of our Audit Committee are to assist our Board in providing an independent view of the effectiveness of the financial reporting process, the internal control and risk management system of our Company, to oversee the audit process and to perform other duties and responsibilities as assigned by our Board. Our Audit Committee consists of three members, namely, Mr. Hu Wei (胡威), Mr. Zhang Qing (張青) and Mr. Na Shuai (那帥). Mr. Hu Wei (胡威) is the chairman of our Audit Committee. Mr. Hu Wei (胡威) possesses the appropriate accounting or related financial management expertise in compliance with the requirements under Rules 3.10(2) and 3.21 of the Listing Rules.

The primary duties of our Audit Committee are to (i) monitor and evaluate the work of the external auditor; (ii) evaluate the implementation of the internal audit system of our Company; (iii) responsible for the communications among the management level of our Company, the internal and external audit; (iv) review and comment on the financial reports of our Company; (v) examine the financial reporting system, risk management and internal control systems of our Company; (vi) make recommendations to our Company on the appointment, re-appointment and removal of the external auditor; (vii) perform daily management duties and implementing control on connected transactions; and (viii) perform such other duties determined by our Board.

Remuneration Committee

Our Company has established a remuneration committee with written terms of reference in compliance with Rule 3.25 of the Listing Rules and paragraph E.1.2 of the CG Code. Our Remuneration Committee consists of three members, namely, Mr. Lang Xiaofeng (郎曉峰) Mr. Hu Wei (胡威) and Mr. Wu Xing (毋興). Mr. Lang Xiaofeng (郎曉峰) is the chairman of our Remuneration Committee.

The primary duties of our Remuneration Committee include, but not limited to (i) establishing, reviewing and providing advices to our Board on our policy and structure concerning remuneration of our Directors and senior management and on the establishment of a formal and transparent procedure for developing policies concerning such remuneration; (ii) determining the terms of the specific remuneration package of each Director and senior management; (iii) reviewing and approving performance-based remuneration by reference to corporate goals and objectives resolved by our Directors from time to time; and (iv) reviewing and/or approving matters relating to share schemes under Chapter 17 of the Listing Rules.

DIRECTORS AND SENIOR MANAGEMENT

Nomination Committee

Our Company has established a nomination committee with written terms of reference in compliance with paragraph B.3.1 of the CG Code and Rule 3.27A of the Listing Rules. Our Nomination Committee consists of three members, namely Mr. Na Shuai (那帥), Mr. Lang Xiaofeng (郎曉峰) and Ms. Wang Hongmei (王紅媚). Mr. Na Shuai (那帥) is the chairman of our Nomination Committee.

The primary duties of our Nomination Committee are to (i) review the structure, size and composition of our Board on a regular basis and make recommendations to our Board regarding any proposed changes to the composition of our Board; (ii) identify, select or make recommendations to our Board on the selection of individuals nominated for Directorship, and ensure the diversity of our Board members; (iii) assess the independence of our independent non-executive Directors; (iv) make recommendations to our Board on relevant matters relating to the appointment, re-appointment and removal of our Directors and succession planning for our Directors; and (v) support our Company’s regular evaluation of the Board’s performance.

MANAGEMENT PRESENCE IN HONG KONG

Since our headquarters and principal business operations and management of our Company are carried out in mainland China, our executive Directors are based in mainland China to better manage and attend to our Company’s business operations. Therefore, we do not and, in the foreseeable future, will not have sufficient management presence in Hong Kong for the purpose of satisfying the requirement under Rule 8.12 of the Listing Rules. Pursuant to Rule 19A.15 of the Listing Rules, we [have applied] to the Stock Exchange for, and the Stock Exchange [has granted], a waiver from strict compliance with the requirement under Rule 8.12 and Rule 19A.15 of the Listing Rules. For details, please refer to the section headed “Waivers From Strict Compliance with the Hong Kong Listing Rules and Exemptions from Compliance with the Companies (Winding Up and Miscellaneous Provisions) Ordinance — Management Presence in Hong Kong” in this document.

CORPORATE GOVERNANCE

Our Directors recognize the importance of incorporating elements of good corporate governance in the management structures and internal procedures of our Company so as to achieve effective accountability and are committed to ensure the lawful, ethical and responsible operation of our Company’s businesses. Our Company has adopted the code provisions stated in the CG Code, with internal compliance policies in place which set out our compliance requirements so as to ensure consistency with the code provisions stated in the CG Code.

Our Company is also committed to the view that our Board should include a balanced composition of executive Directors, non-executive Director and independent non-executive Directors so that there is a strong independent element on our Board, which can effectively exercise independent judgement.

DIRECTORS AND SENIOR MANAGEMENT

As at the Latest Practicable Date, to the best of the knowledge, information and belief of our Directors having made all reasonable enquiries, save as the deviation from the code provision C.2.1 of Part 2 of the CG Code disclosed below, our Directors were not aware of any deviation from the code provisions of the CG Code as well as the Corporate Governance Guidance for Boards and Directors.

Mr. Li is the chairman of our Board and the general manager of our Company and he has been responsible for overall strategic planning of our Company and leading our Board since September 2016. Our Directors consider that vesting the roles of the chairman of our Board and the general manager of our Company in Mr. Li is beneficial to the management and business development of our Company and will provide a strong and consistent leadership to our Company. Our Board will continue to review and consider splitting the roles of the chairman of our Board and the general manager at a time when it is appropriate and suitable by taking into account the circumstances of our Company as a whole.

Board Diversity Policy

Our Board has adopted a Board diversity policy which sets out the approach to achieve diversity on our Board. Our Company recognizes and embraces the benefits of having a diverse Board and sees increasing diversity at our Board level as an essential element in supporting the attainment of our Company’s strategic objectives and sustainable development. Our Company seeks to achieve Board diversity through the consideration of a number of factors, including but not limited to talents, skills, gender, age, cultural and educational background, ethnicity, experience (professional or otherwise), independence, knowledge and length of service and any other factors that our Board may consider relevant and applicable from time to time. We will continue to implement measures and steps to promote and enhance gender diversity at all levels of our Company. We will select potential Board candidates based on merit and his/her potential contribution to our Board while taking into consideration our own business model and specific needs from time to time. All Board appointments will be based on meritocracy and candidates will be considered against objective criteria, having due regard to the benefits of diversity on our Board.

Our Directors, ranging from 37 years old to 61 years old, have a balanced mix of knowledge, skills and experience. They obtained degrees in various majors and possessed various working experience, including overall management and strategic development, business and risk management, and finance and accounting experience. The presence of female member in our management, namely Ms. Wang, contributes to the gender diversity of our management team and offers us valuable strategic, management and operational insights from female perspective. We have taken and will continue to take steps to promote gender diversity at all levels of our Company, including but without limitation at our Board level.

Our Nomination Committee is responsible for ensuring the diversity of our Board members. After [REDACTED], our Nomination Committee will review our Board diversity policy from time to time to ensure its continued effectiveness and we will disclose the implementation of our Board diversity policy in our corporate governance report on an annual basis.

DIRECTORS AND SENIOR MANAGEMENT

Taking into account our existing business model and specific needs as well as the different background and abilities of our Directors, our Directors are of the view that the current composition of our Board satisfies the principles under our Board diversity policy.

COMPENSATION OF DIRECTORS AND SENIOR MANAGEMENT

Our Directors and members of our senior management receive compensation from our Company in the form of Directors’ fee, salaries, allowances and benefits in kind, discretionary bonuses, retirement scheme contributions and equity-settled share-based payments. The aggregate remuneration (including Directors’ fee, salaries, allowances and benefits in kind, discretionary bonuses, retirement scheme contributions and equity-settled share-based payments) to our Directors for the year ended December 31, 2024 and nine months ended September 30, 2025 was approximately RMB14.1 million and RMB12.0 million, respectively. Save as disclosed above, no other amounts have been paid or are payable by any member of our Company to our Directors during the Track Record Period.

The aggregate amount of Directors’ fee, salaries, allowances and benefits in kind, discretionary bonuses, retirement scheme contributions and equity-settled share-based payments to our five highest paid individuals, excluding two and two Directors for the year ended December 31, 2024 and nine months ended September 30, 2025 was approximately RMB6.5 million and RMB5.7 million, respectively.

No remuneration was paid by us to our Directors or the five highest paid individuals as an inducement to join or upon joining us or as a compensation for loss of office during the Track Record Period. There was no arrangement under which our Directors had waived or agreed to waive any remuneration during the same periods.

Under the arrangement currently in force, the aggregate remuneration (including Directors’ fee, salaries, allowances and benefits in kind, discretionary bonuses, retirement scheme contributions and equity-settled share-based payments) of our Directors for the year ending December 31, 2026 is estimated to be no more than RMB37.8 million.

Our Board will review and determine the remuneration and compensation packages of our Directors and senior management which, following the [REDACTED], will receive recommendation from our Remuneration Committee which will take into account salaries paid by comparable companies, time commitment and responsibilities of our Directors and senior management and performance of our Company.

DIRECTORS AND SENIOR MANAGEMENT

DISCLOSURE UNDER RULE 8.10(2) OF THE Listing RULES

Set out below are interests of our Directors in businesses which may compete with our business for the purpose of Rule 8.10(2) of the Hong Kong Listing Rules as of the Latest Practicable Date:

Disclosable interest of Mr. Li

As of the Latest Practicable Date, Mr. Li holds certain interest in other healthcare companies. For details, please refer to the section headed “Relationship with Our Controlling Shareholders” in this document.

Disclosable interest of Dr. Han

As of the Latest Practicable Date, Dr. Han holds certain non-executive directorships and minority shareholdings in other healthcare companies. Dr. Han serves as a non-executive director in BroadenBio Co., Ltd. (北京伯匯生物技術有限公司) (“**BroadenBio**”) and Yikun Xingjian Biomedical (Shanghai) Co., Ltd. (宜坤行健生物醫藥(上海)有限公司) (“**Yikun Xingjian**”) (BroadenBio and Yikun Xingjian are collectively referred as “**Lapam-Invested Entities**”) by virtue of Dr. Han’s position as a member of the investment committee at Lapam Group. Besides, Dr. Han is a shareholder of less than 5% of Zhejiang Ruizhen Pharmaceutical Co., Ltd. (浙江瑞臻醫藥有限公司) (“**Zhejiang Ruizhen**”), is a company primarily engaged in research and development of oncology.

As confirmed by Dr. Han, despite Dr. Han (i) serves as a non-executive director in these Lapam-Invested Entities and (ii) holds less than 5% shareholding interest in Zhejiang Ruizhen, he is not involved in the day-to-day management of the any of the Lapam-Invested Entities and thus is unable to exert control on any of these companies. As a member of the investment committee at Lapam Group, Dr. Han is only a passive investor in the Lapam-Invested Entities. Further, he is not involved in the management and investment decision-making of Lapam-Invested Entities and Zhejiang Ruizhen, and he has no control over the composition of the board of directors of these companies, and is not involved in the daily management and operation of the above investee companies. Given that Dr. Han is not one of our Controlling Shareholders, the Directors are of the view that his interest in such companies would not render us incapable of carrying on our business independently from the other companies in which he may hold directorships or shareholding from time to time.

Save for Mr. Li and Dr. Han’s respective interests in the above entities and save as disclosed in this document, as of the Latest Practicable Date, no Controlling Shareholder, Director or any of their respective close associates had any interest in any other business apart from the business operated by our Company, which competes, or is likely to compete, either directly or indirectly, with the business of our Company and would require disclosure pursuant to Rule 8.10 of the Listing Rules.

DIRECTORS AND SENIOR MANAGEMENT

COMPLIANCE ADVISER

In compliance with Rule 3A.19 of the Hong Kong Listing Rules, we have appointed Patrons Capital Limited as our compliance adviser to provide advisory services to our Company. Pursuant to Rule 3A.23 of the Hong Kong Listing Rules, it is expected that the compliance adviser will, amongst other things, advise our Company with due care and skill in the following circumstances:

- before the publication of any regulatory announcement, circular and financial report;
- where a transaction, which might be notifiable or connected transaction, is contemplated including shares issues, sales or transfers of treasury shares and share repurchases;
- where we propose to use the [REDACTED] from the [REDACTED] in a manner different from that detailed in this document or where our business activities, developments or results of our Company deviate from any forecast, estimate, or other information in this document; and
- where the Hong Kong Stock Exchange makes an inquiry of us regarding unusual movements in the [REDACTED] or [REDACTED] volume of the Share securities, the possible development of a false market in this Shares, or any other matters in accordance with Rule 13.10 of the Hong Kong Listing Rules.

The term of the appointment shall commence on the [REDACTED] and end on the date on which we distribute our annual report in respect of our financial results for the first full financial year commencing after the [REDACTED] and such appointment may be subject to extension by mutual agreement.

RELATIONSHIP WITH OUR CONTROLLING SHAREHOLDERS

OUR CONTROLLING SHAREHOLDERS

As at the Latest Practicable Date, Mr. Li was entitled to exercise the voting rights attached to approximately 43.22% of the total issued share capital of our Company, among which, (i) Mr. Li (in his personal capacity) was interested in approximately 29.16% of our total issued share capital, and (ii) controlled approximately 14.06% of the voting rights of our Company through Chifeng Qingxi and Chifeng Mingquan, which held approximately 10.41% and 3.65% of our Shares, respectively.

Immediately following the completion of the [REDACTED] (assuming that the [REDACTED] is not exercised), Mr. Li, directly and indirectly through Chifeng Qingxi and Chifeng Mingquan, will hold and be entitled to exercise the voting rights attached to Shares representing approximately [REDACTED]% of the issued share capital of our Company. Accordingly, Mr. Li, Chifeng Qingxi and Chifeng Mingquan are our Controlling Shareholders upon [REDACTED].

Mr. Li is also our chairman of the Board, an executive Director and general manager of our Company. For further information of Mr. Li, see “Directors and Senior Management — Board of Directors.” Chifeng Qingxi and Chifeng Mingquan serve as our employee shareholding platforms. For details, see “History, Development and Corporate Structure — Employee Shareholding Platforms.”

DELINEATION OF BUSINESS

Founded in 2016, we are a biotech company focused on the field of immune-inflammation, committed to becoming a leader in locally delivered targeted therapies. With innovative and original design and precise local delivery as our core capabilities, we specialize in chronic inflammatory disease treatment, aiming to provide innovative solutions that achieve efficacy, safety and long-term patient satisfaction. For further details, please refer to the section headed “Business” of this document.

Mr. Li is the chairman of the Board, an executive Director, general manager and one of the Controlling Shareholders of the Company. As at the Latest Practicable Date, Mr. Li is the controlling shareholder of Chifeng Saliont, a company primarily engaged in pharmaceutical wholesale and pharmaceutical manufacturing, including: (1) production and wholesale of generic drugs; and (2) providing contract manufacturing services (CMO business) to innovative pharmaceutical companies, encompassing the synthesis of active pharmaceutical ingredients (APIs) and the processing of finished drug products.

RELATIONSHIP WITH OUR CONTROLLING SHAREHOLDERS

Despite Mr. Li is the controlling shareholder of Chifeng Saliont, the Company is of the view that (i) any potential competition between the Company and Chifeng Saliont is not and is unlikely to be significant, and (ii) Mr. Li is capable of avoiding any actual and potential conflicts of interest for the following reasons:

- *Different business model:* Our Company is an innovation-driven biotech company focused on the R&D of novel small-molecule drugs. In contrast, as advised by Mr. Li, Chifeng Saliont primarily operates as a service provider and supplier within the pharmaceutical sector, with core activities in active pharmaceutical ingredient (API) synthesis, formulation processing, and the sale of conventional and generic drugs. Further, according to Frost & Sullivan, innovative small-molecule drugs and generic drugs represent fundamentally different product categories with distinct commercial and regulatory pathways. They generally do not compete in the marketplace until the relevant patents for the innovative drug expire.
- *Different technological capability:* Our Company’s success is dependent on our R&D capabilities dedicated to creating novel therapies. In contrast, as advised by Mr. Li, Chifeng Saliont’s core expertise and revenue are derived from pharmaceutical production and manufacturing, focusing on processes for API synthesis, formulation, and the commercial-scale production of generic drugs. This differentiates us, as a research-oriented biotech entity, from Chifeng Saliont, a manufacturing-focused pharmaceutical producer. As confirmed by Frost & Sullivan, given that we have different technological capability and have different market positions, it is unlikely for Chifeng Saliont to compete with our Company.
- *Different clinical application of our products:* Our R&D pipeline is dedicated to addressing unmet medical needs through innovative therapies targeting specific clinical applications in fields such as dermatology. While material revenue of Chifeng Saliont during the Track Record Period was derived from generic drug products targeting general therapeutic areas such as fever, pain relief, and cardiovascular management. These include (i) Compound Aminopyrine Phenacetin Tablets (for fever and mild to moderate pain) and (ii) Rosuvastatin Calcium Tablets (for treatment of hyperlipidemia).
- *Different target customer base:* In view of the different business model and clinical application of products as discussed above, our primary route to market and target customers are prescription-driven hospital core departments. In contrast, Chifeng Saliont’s major products are primarily distributed via a retail-based, over-the-counter (OTC) model, and its target customer group consists of external distributors, wholesale agents, pharmacy chains, and retail outlets.
- Mr. Li has irrevocably confirmed that insofar as he has interest in Chifeng Saliont whether as Controlling Shareholder or otherwise, he shall abstain from voting as the Director if any conflict of interest or duty arises from the Company’s transactions with Chifeng Saliont. Furthermore, Mr. Li is aware of his fiduciary duties as Directors which require that they must, among other things, act in good faith for the

RELATIONSHIP WITH OUR CONTROLLING SHAREHOLDERS

benefit of the Company, and avoid actual conflicts between his personal interests (for instances, as the controlling shareholder of Chifeng Saliont) and the interests of the Company. In particular, if Mr. Li has material interests, he shall make full disclosure in respect of matters that conflict or potentially conflict with the interest of the Company and absent himself from the Board meetings on matters in which he or his close associates might have a material interest.

Besides, as of the Latest Practicable Date, Mr. Li has direct and/or indirect interest in each of the following companies:

- (i) Chifeng Fukang Investment Management Co., Ltd. (赤峰福康投資管理有限公司), a company primarily engages in investment and operations within the comprehensive health business sector.
- (ii) Chifeng Meinian Healthcare Management Co., Ltd. (赤峰美年大健康健康管理有限公司), a company primarily engages in body check and consulting services.
- (iii) Chifeng Ciming Healthcare Management Co., Ltd. (赤峰慈銘健康管理有限公司), a company primarily engages in body check and consulting services.
- (iv) Chifeng Jinfu Real Estate Development Co., Ltd. (赤峰晉福房地產開發有限公司), a company primarily engages in the wellness-integrated real estate business.
- (v) Chifeng Qinghe Hospital (赤峰清河醫院), a private secondary general hospital specializing in chronic disease rehabilitation services.

(together with Chifeng Saliont, collectively, “**Excluded Companies**”)

As confirmed by Mr. Li, apart from Chifeng Saliont, each of the Excluded Companies controlled by Mr. Li does not have business relationship with our Company during the Track Record Period. Further, the core business of the Excluded Companies did not form part of our principal business. The Excluded Companies have been managed by different teams of senior management independently from the senior management of our Company. Accordingly, the Directors are of the view that it would be commercially justifiable to exclude the above companies from our Company as there is a clear delineation of business between the Excluded Companies and our Company.

As such, our Directors are of the view that the potentially competing interests of Mr. Li is unlikely to give rise to any material conflict of interest for our Company as a whole.

As of the Latest Practicable Date, save as disclosed above and in the section headed “Directors and Senior Management” of this document, none of our Controlling Shareholders or Directors was engaged or had any interest in any business which competes or is likely to compete, either directly or indirectly, with our Company’s core business which would require disclosure under Rule 8.10 of the Listing Rules. Therefore, our Directors are of the view that the businesses of Mr. Li and our Company is clearly delineated.

RELATIONSHIP WITH OUR CONTROLLING SHAREHOLDERS

INDEPENDENCE FROM OUR CONTROLLING SHAREHOLDERS

Having considered the following factors, our Directors are satisfied that we are capable of carrying out our business independently from our Controlling Shareholders and his close associates after the [REDACTED].

Operational Independence

Although our Controlling Shareholders will retain a substantial interest in our Company after the [REDACTED], we have full rights to make all decisions regarding, and to carry out, our own business operations independently. We have registered the relevant intellectual property rights relating to relevant technologies of our business and our product. We hold the licenses and qualifications necessary to carry on our current business, and have sufficient capital, facilities, technology and employees to operate the business independently from our Controlling Shareholders and their respective close associates.

In addition, our organizational structure is made up of individual departments, comprising, amongst others, different functions, including, early R&D center, CMC center, preparation center, clinical research and development center, production quality center, finance center, etc. Each department takes specific areas of responsibility in our Company’s operations. We have also established a set of internal control measures to facilitate the effective operation of our business.

Save as disclosed in the section headed “Continuing Connected Transaction” in this document, our Directors do not expect that there will be any significant transaction between our Company and our Controlling Shareholders upon or shortly after the [REDACTED].

Based on the above, our Directors are satisfied that we have been operating independently from our Controlling Shareholders and their close associates during the Track Record Period and will continue to operate independently.

Management Independence

The day-to-day management of the business of our Company rests primarily with our Board and our senior management as at the Latest Practicable Date. Our Board comprises four executive Directors, one non-executive Director and four independent non-executive Directors. Mr. Li is the chairman of the Board, an executive Director and general manager of our company.

Although Mr. Li is an executive Director, our management and operational decisions are made by all our executive Directors and senior management, most of whom have served our Company for a long time and all of whom have substantial experience in the industry in which we are engaged and/or in their respective fields of expertise. The balance of power and authority is ensured by the operation of the senior management and our Board. See “Directors and Senior Management” for further details.

RELATIONSHIP WITH OUR CONTROLLING SHAREHOLDERS

Each of our Directors is aware of his fiduciary duties as a director which require, among others, that he must act for the benefit of and in the best interests of our Company and not allow any conflict between his duties as a director and his personal interests. Further, we believe our independent non-executive Directors are all well-educated with extensive experience in different professions and they have been appointed pursuant to the requirements under the Listing Rules to ensure that the decisions of our Board are made only after due consideration of independent and impartial opinions. We believe our independent non-executive Directors will bring independent judgement to the decision-making process of our Board.

In addition, our Directors shall not vote in any Board resolution approving any contract or arrangement or any other proposal in which any of their close associates has a material interest and shall not be counted in the quorum present at the particular Board meeting. In case Mr. Li is required to abstain from voting at the Board meeting due to potential conflict of interest, the rest of our Board (particularly our independent non-executive Directors) will be able to form a quorum and will ensure that the decisions of our Board are made after due consideration of independent and impartial opinions.

Our Company has also established internal control mechanisms to identify connected transactions to ensure that our Shareholders or Directors with conflicting interests in a proposed transaction will abstain from voting on the relevant resolutions. Save as disclosed in “Continuing Connected Transaction,” our Directors do not expect that there will be any significant transactions between our Company and our Controlling Shareholders upon or shortly after the [REDACTED].

Based on the above, our Directors are satisfied that our Board as a whole together with our senior management team are able to perform the managerial role in our Company independently notwithstanding that Mr. Li is the chairman of the Board, an executive Director and general manager of our Company.

Financial Independence

During the Track Record Period and up to the Latest Practicable Date, our Company has our own internal control, accounting and financial management system and we make financial decisions according to our own business needs.

Our Directors confirm that, as at the Latest Practicable Date, there were no subsisting loans, guarantees or pledges provided by our Controlling Shareholders and/or their respective close associates to our Company.

Based on the above, our Directors believe that we have the ability to operate independently of our Controlling Shareholders and their respective close associates from a financial perspective and are able to maintain financial independence from our Controlling Shareholders and their close associates.

RELATIONSHIP WITH OUR CONTROLLING SHAREHOLDERS

NON-COMPETITION UNDERTAKING

Mr. Li has signed a non-competition undertaking on January 21, 2026 in favor of our Company (the “**Non-competition Undertaking**”). Pursuant to the Non-competition Undertaking, Mr. Li has irrevocably undertaken that he would not and will procure that his associates would not, directly or indirectly, whether as principal or agent, either on their own account or in conjunction with or on behalf of any person, firm or company, whether inside or outside the PRC, among other things, carry on, engage, participate or hold any right or interest in or render any services to or otherwise be involved in any business which is or may be in competition with the business of our Company from time to time (the “**Restricted Business**”).

The above undertaking does not apply where:

- (i) Mr. Li and/or his associates hold, directly or indirectly, any equity interests in any companies listed on an accepted stock exchange other than our Company, and such companies are not engaged in the Restricted Business;
- (ii) Mr. Li and/or his associates hold any equity interests in any company other than our Company, except that:
 - (a) according to the latest audited accounts of the company, the Restricted Business in which the company is engaged (and its related assets) accounts for less than 10% of the consolidated sales or consolidated assets of the company; and
 - (b) the total number of shares held by Mr. Li and/or his associates account for no more than 5% of the shares of the same class issued by the relevant company, and Mr. Li and/or his associates have no right to appoint most of the Directors of the company;
- (iii) any opportunity to invest, participate, be engaged in and/or operate any Restricted Business has first been offered or made available by Mr. Li, and his related parties to us, and after decision by the Company, has been declined in writing or failed to respond within thirty (30) working days (the notification period could be extended to sixty (60) working days if requested by us) after being notified of such opportunity to invest, participate, be engaged in or operate the Restricted Business.

Pursuant to the Non-competition Undertaking, the above restrictions would only cease to have effect upon the earlier of: (i) the H Shares of our Company cease to be listed on the Stock Exchange; and (ii) Mr. Li ceases to be a Controlling Shareholder.

RELATIONSHIP WITH OUR CONTROLLING SHAREHOLDERS

Option for New Competing Business Opportunities

Mr. Li has undertaken in the Non-competition Undertaking that if Mr. Li and his associates become aware of, have received notice about, are recommended or provided with new business opportunities which will or may directly or indirectly compete with the Restricted Business, including but not limited to the opportunities which are the same as or similar to the Restricted Business (the “**New Competing Business Opportunities**”), Mr. Li shall refer or recommend, and shall procure his associates to refer or recommend, the New Competing Business Opportunities to our Company subject to relevant laws, requirements or contractual arrangements with third parties in accordance with the following:

- (i) Mr. Li shall provide our Company with a written notification which includes all reasonable and necessary information known to Mr. Li and his associates (including but not limited to the nature of the New Competing Business Opportunities and necessary information relating to the cost of the relevant investment or acquisition) for our Company to consider (a) whether the New Competing Business Opportunities constitute competition or potential competition to the Restricted Business; and (b) whether engaging in such New Competing Business Opportunities would be in the best interests of our Company (the “**Offer Notice**”); and
- (ii) The Company shall respond to Mr. Li and/or his associates within thirty (30) working days upon receipt of the Offer Notice (the notification period could be extended to sixty (60) working days if requested by us). If our Company fails to reply to Mr. Li and/or his associates within the above period, it shall be deemed to have abandoned the New Competing Business Opportunities. If our Company determines to take up the New Competing Business Opportunities, Mr. Li and/or his associates would be obligated to offer such New Competing Business Opportunities to our Company.

Pre-emptive Right

Mr. Li has undertaken that if Mr. Li and/or his associates intend to transfer, sell, lease or license concession to a third party any businesses engaged in by Mr. Li and/or his associates which competes or may compete with the Restricted Business or any other businesses which would cause direct or indirect competition with the Restricted Business, Mr. Li shall offer our Company such opportunity with a pre-emptive right on equal terms subject to the relevant laws, regulations and contractual arrangements with third parties in accordance with the following:

- (i) Mr. Li and/or his associates shall provide the Company with written notice no later than the time of any such disposal (the “**Disposal Notice**”). For the avoidance of doubt, Mr. Li and/or his associates are entitled to provide information and/or a Disposal Notice relating to such disposal to any third parties at the same time as or after providing the Disposal Notice to the Company;

RELATIONSHIP WITH OUR CONTROLLING SHAREHOLDERS

- (ii) The Company shall reply to Mr. Li and/or his associates in writing by whichever is the later of the thirtieth (30th) working day after receipt of the Disposal Notice (the notification period could be extended to sixty (60) working days if requested by us) or the expiration of the period offered to third parties for them to reply in writing, before exercising the pre-emptive right;
- (iii) If the Company intends to take up such pre-emptive right, the terms shall be determined with reference to fair market price; and
- (iv) Mr. Li and/or his associates shall not dispose of such businesses and interests to any third parties unless (a) the Company declines to purchase such businesses and interests in writing; (b) the notice of exercising such pre-emptive right has not been received by Mr. Li and/or his associates from the Company by whichever is the later of the thirtieth (30th) working day after receipt of the Disposal Notice (the notification period could be extended to sixty (60) working days if requested by us) and the expiration of the period offered to third parties for them to reply; or (c) the Company fails to offer Mr. Li and/or his associates the same or more favorable terms of acquisition than those offered by any third parties to Mr. Li and/or his associates.

For the avoidance of doubt, the terms of disposal offered by Mr. Li and/or his associates to any third parties shall not be more favorable than those to be offered to the Company.

Option for Purchase

To the extent that no relevant laws and regulations are breached and agreements with third parties are complied with, the Company is entitled to acquire any businesses operated by Mr. Li and/or his associates which compete or may compete with the Restricted Business or have the option to acquire any businesses or any interests engaged in by Mr. Li and/or his associates through the abovementioned New Competing Business Opportunities (the “**Option for Purchase**”). The Company is entitled to exercise the Option for Purchase, whether singly or separately, at any time, Mr. Li and/or his associates shall offer the Option for Purchase to the Company on the condition that the commercial terms of a proposed acquisition shall be arrived at solely by a committee consisting of our independent non-executive Directors after consulting the views of independent experts. Furthermore, such commercial terms shall be based on negotiation between the parties involved in line with the normal commercial practice of the Company, and shall be fair, reasonable and in the interests of the Company as a whole through the negotiation with Mr. Li and his associates.

However, if a third party has the pre-emptive right in accordance with applicable laws and regulations and/or a prior legally binding document (including, but not limited to, articles of association and/or shareholders’ agreements), the Company’s Option for Purchase shall be subject to such third-party rights. In such case, Mr. Li and/or his associates will use their best efforts to persuade the third party to waive its pre-emptive rights.

RELATIONSHIP WITH OUR CONTROLLING SHAREHOLDERS

Further Undertakings

Mr. Li has further undertaken that, subject to relevant laws, regulations or contractual arrangements with third parties: (i) at the request of the Company, he shall provide, and shall procure that his associates will provide, any necessary information for the implementation of the Non-competition Undertaking; (ii) he shall allow the authorized representatives or auditors of the Company to have reasonable access to the financial and corporate information necessary to their transactions with third parties, which would assist with the judgment of the Company in respect of whether Mr. Li and/or his associates have complied with the Non-competition Undertaking; and (iii) he shall ensure that, within ten (10) working days of receipt of the written request from the Company, necessary confirmation shall be made in writing to the Company as to the performance of the Non-competition Undertaking by Mr. Li and his associates, and the consent of Mr. Li and his associates to allow such confirmation to be included in our annual reports.

CORPORATE GOVERNANCE MEASURES

Our Company will comply with the provisions of the Corporate Governance Code in Appendix C1 to the Hong Kong Listing Rules, which sets out principles of good corporate governance. Our Directors recognize the importance of good corporate governance in protection of our Shareholders’ interests. We would adopt the following measures to safeguard good corporate governance standards and to avoid potential conflict of interests:

- as part of our preparation for the [REDACTED], we have amended our Articles of Association to comply with the Hong Kong Listing Rules. In particular, our Articles of Association provide that a Director shall not vote on any resolution in which such Director has a material interest in the company involved, and if the laws and regulations and the rules of the stock exchange where our Shares are listed imposed any further restrictions on directors’ attendance at board meetings and voting, such laws, regulation and rules shall be complied with;
- we have established internal control mechanisms to identify connected transactions. Upon the [REDACTED], if we enter into connected transactions with any of our Controlling Shareholders or their associates, our Company will comply with the applicable Hong Kong Listing Rules;
- we are committed that our Board should include a balanced composition of executive and non-executive Directors (including independent non-executive Directors). We have appointed four independent non-executive Directors and we believe our independent non-executive Directors possess sufficient experience and they are free of any business or other relationship which could interfere in any material manner with the exercise of their independent judgment and will be able to

RELATIONSHIP WITH OUR CONTROLLING SHAREHOLDERS

provide an impartial and external opinion to protect the interests of our [REDACTED]. Details of our independent non-executive Directors are set out in “Directors and Senior Management — Board of Directors — Independent Non-executive Directors;”

- in the event that the independent non-executive Directors are requested to review any conflicts of interests circumstances between our Company on the one hand and our Controlling Shareholders and/or our Directors on the other hand, our Controlling Shareholders and/or our Directors shall provide the independent non-executive Directors with all necessary information and our Company shall disclose the decisions of the independent non-executive Directors either through our annual report or by way of announcements; and
- we have appointed Patrons Capital Limited as our compliance advisor, which will provide advice and guidance to us in respect of compliance with the applicable laws and the Hong Kong Listing Rules including various requirements relating to directors’ duties and corporate governance.

SUBSTANTIAL SHAREHOLDERS

So far as our Directors are aware, immediately following the completion of the [REDACTED] and assuming that the [REDACTED] is not exercised, the following persons will have an interest or a short position in our Shares or underlying Shares which will be required to be disclosed to our Company and the Hong Kong Stock Exchange pursuant to the provisions of Division 2 and 3 of Part XV of the SFO or will be, directly or indirectly, interested in 10% or more of the nominal value of any class of share capital carrying rights to vote in all circumstances at the Shareholders’ meeting of our Company:

Name of shareholder	Nature of interest	As at the Latest Practicable Date and immediately prior to the [REDACTED]		Immediately after the [REDACTED] (assuming the [REDACTED] is not exercised)	
		Number of Shares ⁽¹⁾	Approximate percentage of interest in our Company ⁽²⁾	Number of Shares ⁽¹⁾	Approximate percentage of interest in our Company ⁽³⁾
Mr. Li ⁽⁴⁾	Beneficial owner	56,043,356	29.16%	[REDACTED]	[REDACTED]%
	Interest in controlled corporation	27,017,544	14.06%	[REDACTED]	[REDACTED]%
Ms. Wang ⁽⁵⁾	Interest of spouse	56,043,356	29.16%	[REDACTED]	[REDACTED]%
Chifeng Qingxi ⁽⁴⁾	Beneficial owner	20,000,000	10.41%	[REDACTED]	[REDACTED]%
Chifeng Mingquan ⁽⁴⁾	Beneficial owner	7,017,544	3.65%	[REDACTED]	[REDACTED]%
Dr. Du ⁽⁴⁾	Interest in controlled corporation	20,000,000	10.41%	[REDACTED]	[REDACTED]%

Notes:

- All interests stated are long positions.
- The calculation is based on the total number of 192,170,424 Shares in issue as at the Latest Practicable Date.
- The calculation is based on the total number of [REDACTED] Shares in issue immediately following the completion of the [REDACTED] and without taking into account any Shares which may be [REDACTED] pursuant to the exercise of the [REDACTED].
- As of the Latest Practicable Date, Chifeng Qingxi and Chifeng Mingquan were managed by their general partner Mr. Li. Chifeng Qingxi was owned as to 40% by Dr. Du. As such, each of Mr. Li and Dr. Du, an executive Director, is deemed under the SFO to be interested in the 20,000,000 Shares held by Chifeng Qingxi and Mr. Li is deemed under the SFO to be interested in the 7,017,544 Shares held by Chifeng Mingquan.
- Ms. Wang the spouse of Mr. Li and is deemed to be interested in the Shares held by Mr. Li under the SFO.

Save as disclosed above and in “Statutory and General Information — C. Further Information about Our Directors and Substantial Shareholders — 1. Disclosure of Interests” in Appendix VI, our Directors are not aware of any person who will, immediately following the completion of the [REDACTED] and assuming that the [REDACTED] is not exercised, have an interest or a short position in the Shares or underlying Shares which will be required to be disclosed to our Company and the Hong Kong Stock Exchange under the provisions of

SUBSTANTIAL SHAREHOLDERS

Divisions 2 and 3 of Part XV of the SFO or will be, directly or indirectly, interested in 10% or more of the nominal value of any class of share capital carrying rights to vote in all circumstances at the Shareholders’ meeting of our Company.

SHARE CAPITAL

This section presents certain information regarding the share capital of our Company following the completion of the [REDACTED].

IMMEDIATELY BEFORE THE [REDACTED]

As of the Latest Practicable Date, the registered share capital of our Company was RMB96,085,212 divided into 192,170,424 Domestic Shares with a nominal value of RMB0.5 each.

UPON COMPLETION OF THE [REDACTED]

Immediately following the completion of the [REDACTED] and the conversion of certain Domestic Shares into H Shares, assuming that the [REDACTED] are not exercised, the share capital of our Company will be as follows:

Description of Shares	Number of Shares	Approximate percentage of the total share capital
Domestic Shares in issue	[REDACTED]	[REDACTED]%
H Shares to be [REDACTED] under the [REDACTED]	[REDACTED]	[REDACTED]%
H Shares converted from Domestic Shares	[REDACTED]	[REDACTED]%
Total	<u>[REDACTED]</u>	<u>100.00%</u>

* Any discrepancies in the table between the total shown and the sum of the amounts listed are due to rounding.

Immediately following completion of the [REDACTED] and the conversion of certain Domestic Shares into H Shares, assuming the [REDACTED] are fully exercised, the issued share capital of our Company will be as follows:

Description of Shares	Number of Shares	Approximate percentage of the total share capital*
Domestic Shares	[REDACTED]	[REDACTED]%
H Shares to be [REDACTED] under the [REDACTED]	[REDACTED]	[REDACTED]%
H Shares converted from Domestic Shares	[REDACTED]	[REDACTED]%
Total	<u>[REDACTED]</u>	<u>100.00%</u>

* Any discrepancies in the table between the total shown and the sum of the amounts listed are due to rounding.

SHARE CAPITAL

RANKING

Upon completion of the [REDACTED], we would have only one class of Shares. H Shares and Domestic Shares are all ordinary Shares in the share capital of our Company. However, apart from certain qualified domestic institutional investors in the PRC, the qualified PRC investors under the Shanghai-Hong Kong Stock Connect or the Shenzhen-Hong Kong Stock Connect and other persons who are entitled to hold our H Shares pursuant to relevant PRC laws and regulations or upon approvals of any competent authorities, H Shares generally cannot be [REDACTED] or [REDACTED] between legal or natural persons of the PRC. Domestic Shares and H Shares will rank pari passu with each other in all respects and, in particular, will rank equally for all dividends or distributions declared, paid or made after the date of this document. The Company shall distribute profits in the form of cash, shares, or a combination of cash and shares, or through other methods permitted by applicable laws, administrative regulations, departmental rules, normative documents, and securities regulatory rules of the stock exchange where the shares are listed.

CONVERSION OF OUR DOMESTIC SHARES INTO H SHARES

The Company has filed for a “full circulation” of the existing [REDACTED] Domestic Shares into H Shares on a one-for-one basis, and submitted the application reports, authorization documents of the shareholders of Domestic Shares for which an H-share “full circulation” are applied, explanation about the compliance of share acquisition and other documents in accordance with the requirements of the CSRC. The relevant filings of the conversion of the existing [REDACTED] Domestic Shares held by the existing Shareholders into H Shares on a one-for-one basis have been completed on [●].

Upon completion of the [REDACTED], if any of our Shares are not [REDACTED] or [REDACTED] on any stock exchange, the holders of our Domestic Shares (other than those to be converted to H Shares) may convert their Shares into H Shares provided such conversion shall have gone through any requisite internal approval process and complied with the regulations prescribed by the securities regulatory authorities of the State Council and the regulations, requirements and procedures prescribed by the overseas stock exchange(s) and have completed the required filing with the securities regulatory authorities of the State Council, including the CSRC. The [REDACTED] of such converted Shares on the Stock Exchange will also require the approval of the Stock Exchange.

Based on the procedures for the conversion of our Domestic Shares into H Shares as disclosed in this section, we can apply for the [REDACTED] of all or any portion of our Domestic Shares on the Stock Exchange as H Shares in advance of any proposed conversion to ensure that the conversion process can be completed promptly upon notice to the Stock Exchange and delivery of Shares for entry on the H Share register. As any [REDACTED] of additional Shares after our [REDACTED] on the Stock Exchange is ordinarily considered by the Stock Exchange to be a purely administrative matter, it will not require such prior [REDACTED] for [REDACTED] at the time of [REDACTED] in Hong Kong.

SHARE CAPITAL

No class Shareholder voting is required for the [REDACTED] and [REDACTED] of the converted Shares on the Stock Exchange. Any [REDACTED] for [REDACTED] of the converted Shares on the Stock Exchange after [REDACTED] is subject to prior notification by way of announcement to inform Shareholders and the public of such proposed conversion.

After all the requisite approvals have been obtained, the following procedures will need to be completed: the relevant Domestic Shares will be withdrawn from the Share register and we will re-register such Shares on our H Share register maintained in Hong Kong and instruct the [REDACTED] to issue H Share certificates. Registration on [REDACTED] will be on the condition that (a) [REDACTED] lodges with the Stock Exchange a letter confirming the proper entry of the relevant H Shares on the [REDACTED] and the due despatch of H Share certificates and (b) the admission of the H Shares to [REDACTED] on the Stock Exchange will comply with the Listing Rules and the General Rules of HKSCC and the HKSCC Operational Procedures in force from time to time. Until the converted Shares are re-registered on [REDACTED], such Shares would not be [REDACTED] as H Shares.

TRANSFER OF SHARES ISSUED PRIOR TO THE [REDACTED]

Pursuant to the PRC Company Law, our Shares issued prior to the [REDACTED] shall not be transferred within one year from the [REDACTED]. Shares transferred by our Directors and members of the senior management each year during their tenure determined at the time of taking office shall not exceed 25% of their total respective shareholdings in our Company. The Shares that the aforementioned persons hold in our Company cannot be transferred within one year from the [REDACTED], nor within half a year after they leave their positions as Directors or members of the senior management in our Company. For more details, please refer to “Appendix V — Summary of the Articles of Association” and “[REDACTED]” for details of the lock-up undertakings.

SHAREHOLDERS’ MEETING

For details of circumstances under which our Shareholders’ meeting is required, see “Appendix IV — Summary of Principal Laws and Regulations” and “Appendix V — Summary of the Articles of Association.”

[REDACTED] SHARE INCENTIVE PLAN

We adopted the [REDACTED] Share Incentive Plan, details of which are set forth in “Appendix VI — Statutory and General Information — C. Further Information about our Directors and Substantial Shareholders — 4. [REDACTED] Share Incentive Plan.”

SHARE CAPITAL

REGISTRATION OF SHARES NOT LISTED ON AN OVERSEAS STOCK EXCHANGE

According to the Guidelines for the “Full Circulation” Program for Domestic Unlisted Shares of H-Share Listed Companies (《H股公司境內未上市股份申請全流通業務指引》) announced by the CSRC, the domestic shareholders of our Shares that are not listed on the overseas stock exchange shall handle share transfer registration business in accordance with the relevant business rules of the CSDC. Further, H-share companies should submit the relevant status reports to the CSRC within 15 days after the transfer registration with the CSDC of such shares involved in the application is completed.

FINANCIAL INFORMATION

You should read the following discussion and analysis in conjunction with our Historical Financial Information, included in Appendix I to this document, together with the respective accompanying notes. Our Historical Financial Information has been prepared in accordance with IFRS Accounting Standards.

The following discussion and analysis contain forward-looking statements that reflect our current views with respect to future events and financial performance that involve risks and uncertainties. These statements are based on our assumptions and analysis made by us in light of our experience and perception of historical trends, current conditions and expected future developments, as well as other factors we believe are appropriate under the circumstances. However, our actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors. In evaluating our business, you should carefully consider the information provided in the section headed “Risk Factors” in this document.

OVERVIEW

Founded in 2016, we are a biotech company focused on the field of immune-inflammation, committed to becoming a leader in locally delivered targeted therapies. With innovative and original design and precise local delivery as our core capabilities, we specialize in chronic inflammatory disease treatment, aiming to provide innovative solutions that achieve efficacy, safety and long-term patient satisfaction.

Adhering to a patient-centric R&D philosophy, we pursue advanced efficacy, improved patient experience, and long-term tolerability of our drug products, aiming to ease treatment burden for patients and improve their quality of life. Based on our in-depth understanding of the immune-inflammatory signaling pathways, we have identified that the core pathological processes underlying diverse chronic diseases are strongly correlated with the synergistic effects of extracellular immune signal transduction, transcriptional regulation (as typified by the JAK-STAT pathway), and immune cell activation regulatory pathways. Based on this insight, we have built an innovative product pipeline with originally designed molecules targeting multiple indications with considerable unmet medical needs and first-in-class potentials.

We currently have no products approved for commercial sale and therefore have not generated any revenue from product sales during the Track Record Period. In the year of 2024 and the nine months ended September 30, 2024 and 2025, we recorded loss for the year/period of RMB178.5 million, RMB132.6 million and RMB125.0 million, respectively. Such losses resulted primarily from our significant research and development expenses and general and administrative expenses.

FINANCIAL INFORMATION

We expect to incur significant expenses and record net losses for at least the next several years as we continue to advance our clinical development and pre-clinical research plans, prepare for the commercialization of our Core Product or other drug candidates, and recruit talents necessary to operate our business. Subsequent to the [REDACTED] and the [REDACTED], we also expect to incur costs and expenses associated with operating as a public company. Our financial performance may fluctuate from period to period due to, among other factors, the development progress of our drug candidates, regulatory approval timeline, and commercialization of our drug candidates after approval.

BASIS OF PRESENTATION

Our historical financial information has been prepared in accordance with the IFRS Accounting Standards. All applicable new and revised IFRS Accounting Standards have been adopted, except for any new and revised accounting standards that are not yet effective for the accounting period beginning on January 1, 2025. Our historical financial information has been prepared under the historical cost basis except for the financial assets measured at fair value through profit and loss, which are stated at their fair value. The historical financial information is presented in RMB and all values are rounded to the nearest thousand except when otherwise indicated.

SIGNIFICANT FACTORS AFFECTING OUR RESULTS OF OPERATIONS

Our results of operations have been, and are expected to continue to be, affected by a number of factors, many of which may be beyond our control. A discussion of the key factors is set out below.

General Factors

Our business and operating results are affected by general factors affecting the pharmaceutical industry in which we operate, including but not limited to:

- macroeconomic conditions in China and worldwide;
- growth and competition environment of the pharmaceutical market in China and globally;
- market acceptance of JAK inhibitor drugs;
- relevant laws and regulations, governmental policies and initiatives affecting the pharmaceutical and innovative drug industry in China and globally;
- political, economic and social instability of the markets in which we are conducting or plan to conduct clinical trials and/or commercialization activities; and
- technology advancements in drug development.

FINANCIAL INFORMATION

Company Specific Factors

Our Ability to Successfully Develop Our Drug Candidates

Our business and operating results depend on our ability to advance our drug development programs and obtain regulatory approvals for our drug candidates. As of the Latest Practicable Date, we had established a rationally designed and differentiated pipeline consisting of five innovative drug candidates covering 10 indications, as well as five generic drug candidates. Our drug candidates are currently under different stages of development, including (i) one Core Product, PG-011 (Pumecitinib); (ii) three key pipeline products, PG-033, PG-018, and PG-040; and (iii) one pre-clinical candidate, PG-312. This diversified pipeline reflects our proven experience in advancing drug development and is supported by our strong research and development capabilities across both the pre-clinical and clinical stages. See “Business — Our Product Pipeline” for more information on the development status of our drug candidates.

Based on our current clinical progress and ongoing regulatory communications, we expect to submit an NDA for Pumecitinib gel (for the indication of atopic dermatitis in adults and adolescents aged 12 to 17) in the first quarter of 2026, followed by an NDA for Pumecitinib nasal spray (for the indication of seasonal allergic rhinitis in adults) in the fourth quarter of 2026. However, the time required to obtain approvals from the NMPA or other competent regulatory authorities is unpredictable, but it typically takes several years following the commencement of clinical trials. See “Risk Factors — Risks relating to Our Business and Industry — Risks Relating to the Development of Our Drug Candidates and Regulatory Approval” for details of the risks in relation to advancing clinical development and obtaining regulatory approvals for our drug candidates. Whether our drug candidates can demonstrate favourable clinical trial results, and whether we can obtain the requisite regulatory approvals for our drug candidates in time, are pivotal to our business and results of operations.

Our Ability to Successfully Commercialize Our Drug Candidates

Our business and results of operations depend on our ability to commercialize our drug candidates following receipt of regulatory approvals from competent authorities. Although none of our drug candidates have yet been approved for commercial sale and we have not generated revenue from product sales, we expect to commercialize one or more candidates in the coming years as they progress toward the final stages of development.

Once commercialization begins, our business and operating results will largely depend on market acceptance of our products, the sales performance of our commercialized drugs, and our ability to manufacture at a scale sufficient to meet market demand. Successful commercialization will require substantial marketing efforts and related expenses before we are able to generate revenue from product sales. For the early stages of commercialization, we plan to collaborate with experienced industry partners and leverage their established distribution networks and sales and marketing capabilities to facilitate rapid market entry. Over the longer term, we aim to build a dedicated in-house marketing team to strengthen our commercialization capabilities and work in synergy with our partners to enhance the market

FINANCIAL INFORMATION

penetration of our products. Despite our carefully designed commercialization strategy, if our products do not achieve the expected level of market acceptance, we may be unable to generate revenue or achieve profitability as anticipated. See “Risk Factors — Risks Relating to Our Business and Industry — Risks Relating to the Commercialization of Our Drug Candidates” for more details of the risks in relation to commercialization of our drug candidates.

Our Ability to Effectively Control Our Costs and Expenses

Our ability to manage and control our costs and expenses is critical to the success of our business. Our operating expenses primarily include research and development expenses and general and administrative expenses. Research and development expenses have been, and are expected to continue to be, a major component in our cost structure. In 2024 and the nine months ended September 30, 2024 and 2025, our research and development expenses amounted to RMB146.2 million, RMB103.2 million and RMB97.1 million, respectively, and our general and administrative expenses amounted to RMB40.8 million, RMB28.2 million and RMB27.9 million, respectively. For detailed information, see “— Description of Key Components of Our Statements of Profit or Loss and Other Comprehensive Income.”

We expect our cost structure to evolve as we continue to develop and expand our business. As the pre-clinical studies and clinical trials for our drug candidates progress and as we move our pipeline products toward commercialization, our research and development expenses, manufacturing-related costs and commercialization investments are expected to increase accordingly. In addition, as we transition into operating as a public company in Hong Kong, we anticipate incurring higher legal, compliance, accounting, insurance, and investor and public relations expenses to meet ongoing regulatory and reporting requirements. These additional obligations will further contribute to the growth of our operating costs. We will continue to optimize our cost-control measures, enhance operational efficiency, and strategically allocate resources to support sustainable business expansion.

Our Ability to Attract and Maintain Strategic Partnerships

Our results of operations have been, and are likely to continue to be, influenced by our strategic collaborations with business partners. For example, we cooperate with CROs during the research and development of our drug candidates, and currently rely on external vendors to produce our active pharmaceutical ingredients (APIs). In addition, we expect to cooperate with external partners on the marketing and promotion of our drug products after they are approved for sale. As we continue to advance our drug candidates through later stages of development and prepare for potential commercialization, our relationship with key business partners may further impact our operating performance, procurement concentration, production flexibility, and overall cost management.

FINANCIAL INFORMATION

Funding for Our Operations

During the Track Record Period, we funded our operations primarily through capital contribution from shareholders and proceeds from bank loans. We expect to fund our future operations primarily with existing cash and cash equivalents, income derived from our collaboration and licensing arrangements and [REDACTED] from the [REDACTED]. Upon the successful commercialization of one or more of our drug candidates, we expect to further complement the funding for our operations with revenue generated from sales of our commercialized drug products. However, with the continuing expansion of our business, we may require further funding through public or private offerings, debt financing, collaboration and licensing arrangements or other sources. Any material fluctuation in the funding for our operations will impact our cash flow and our results of operations.

MATERIAL ACCOUNTING POLICIES AND SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES

Material Accounting Policies

Intangible Assets

Expenditure on research activities is recognized in profit or loss as incurred. Development expenditure is capitalized only if the expenditure can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable and we intend to and have sufficient resources to complete development and to use or sell the resulting asset. Otherwise, it is recognized in profit or loss as incurred. Capitalized development expenditure is subsequently measured at cost less accumulated amortization and any accumulated impairment losses.

Intangible assets, including computer software, that we acquire and have finite useful lives are measured at cost less accumulated amortization and any accumulated impairment losses.

Amortization is calculated to write off the cost of intangible assets less their estimated residual values using the straight-line method over their estimated useful lives, if any, and is generally recognized in profit or loss. Amortization methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate. The useful lives of our software and other intangible assets for the Track Record Period range from 13 months to ten years.

FINANCIAL INFORMATION

Leased Assets

At inception of a contract, we assess whether the contract is, or contains, a lease. This is the case if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Control is conveyed where the customer has both the right to direct the use of the identified asset and to obtain substantially all of the economic benefits from that use.

As a lessee

Where the contract contains lease component(s) and non-lease component(s), we have elected not to separate lease components from non-lease components and allocated the consideration in the contract to each lease component on the basis of the relative stand-alone price.

At the lease commencement date, we recognize a right-of-use asset and a lease liability, except for short-term leases that have a lease term of 12 months or less and leases of low-value assets. Where the lease is capitalized, the lease liability is initially recognized at the present value of the lease payments payable over the lease term, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, using a relevant incremental borrowing rate. After initial recognition, the lease liability is measured at amortized cost and interest expense is calculated using the effective interest method. Variable lease payments that do not depend on an index or rate are not included in the measurement of the lease liability and hence are charged to profit or loss in the accounting period in which they are incurred.

The right-of-use asset recognized when a lease is capitalized is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received. The right-of-use asset is subsequently stated at cost less accumulated depreciation and impairment losses.

FINANCIAL INFORMATION

The lease liability is remeasured when there is a change in future lease payments arising from a change in an index or rate, or there is a change in our estimate of the amount expected to be payable under a residual value guarantee, or if we change our assessment of whether it will exercise a purchase, extension or termination option. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The lease liability is also remeasured when there is a lease modification, which means a change in the scope of a lease or the consideration for a lease that is not originally provided for in the lease contract, if such modification is not accounted for as a separate lease. In this case, the lease liability is remeasured based on the revised lease payments and lease term using a revised discount rate at the effective date of the modification.

In the statement of financial position, the current portion of long-term lease liabilities is determined as the present value of contractual payments that are due to be settled within twelve months after the reporting period.

Share-based Payments

For equity settled share-based payment transactions, the fair value of the services received is recognized as an expense with a corresponding increase in equity over the vesting period during which the employees become unconditionally entitled to the equity instrument. The fair value of the services received is determined by reference to the fair value of the equity instrument granted at the date of the grant.

Impairment of Non-current Assets

At each reporting date, we review the carrying amounts of property and equipment, right-of-use assets and intangible assets to determine whether there is any indication of impairment. If any such indication exists, then the asset’s recoverable amount is estimated.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or cash-generating units (“CGUs”).

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs of disposal. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

FINANCIAL INFORMATION

An impairment loss is recognized in profit or loss if the carrying amount of an asset or CGU exceeds its recoverable amount, and is allocated to reduce the carrying amounts of the assets in the CGU on a pro rata basis.

An impairment loss is reversed only to the extent that the resulting carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortization, if no impairment loss had been recognized.

Significant Accounting Estimates and Judgements

The preparation of financial information in conformity with IFRS Accounting Standards requires our management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Research and development expenses

Development expenses incurred on our pipeline are capitalized and deferred only when we can demonstrate the technical feasibility of completing the intangible asset so that it will be available for use or sale, our intention to complete and our ability to use or sell the asset, how the asset will generate future economic benefits, the availability of resources to complete the pipeline and the ability to measure reliably the expenditure during the development. Development expense which do not meet these criteria are expensed when incurred. Our management assesses the progress of each of the research and development projects and determine the criteria met for capitalization. All our development expenses were expensed when incurred during the Track Record Period.

FINANCIAL INFORMATION

DESCRIPTION OF STATEMENTS OF PROFIT OR LOSS AND OTHER COMPREHENSIVE INCOME

The following table sets forth our statements of profit or loss and other comprehensive income for the year/periods indicated:

	Year ended December 31,	Nine months ended September 30,	
	2024	2024	2025
	<i>(RMB in thousands)</i>		
	<i>(unaudited)</i>		
Other net income	11,220	819	1,158
(Impairment losses)/reversal of impairment losses on financial assets	(172)	(93)	590
General and administrative expenses . . .	(40,753)	(28,211)	(27,937)
Research and development expenses . . .	(146,207)	(103,232)	(97,074)

Loss for the year/period	(178,496)	(132,625)	(124,976)

DESCRIPTION OF KEY COMPONENTS OF OUR STATEMENTS OF PROFIT OR LOSS AND OTHER COMPREHENSIVE INCOME

Other Net Income

Our other net income consists of government grants received from government authorities, and, to a lesser extent, fair value changes of financial assets measured at fair value through profit or loss and interest income. Our other net income was RMB11.2 million for the year ended December 31, 2024, and RMB0.8 million and RMB1.2 million for the nine months ended September 30, 2024 and 2025, respectively.

FINANCIAL INFORMATION

The following table sets forth a breakdown of our other net income for the periods indicated:

	Year ended December 31,	Nine months ended September 30,	
	2024	2024	2025
	<i>(RMB in thousands)</i>		
	<i>(unaudited)</i>		
Government grants	9,938	44	618
Fair value changes of financial assets measured at fair value through profit or loss	811	497	107
Interest income	429	281	318
Others	42	(3)	115
Total	11,220	819	1,158

General and Administrative Expenses

During the Track Record Period, our general and administrative expenses primarily consisted of staff costs, share-based payments to our management personnel, and professional service fees relating to our proposed [REDACTED] on the Beijing Stock Exchange. Our general and administrative expenses were RMB40.8 million for the year ended December 31, 2024, and RMB28.2 million and RMB27.9 million for the nine months ended September 30, 2024 and 2025, respectively.

The following table sets forth a breakdown of our general and administrative expenses for the periods indicated:

	Year ended December 31,	Nine months ended September 30,	
	2024	2024	2025
	<i>(RMB in thousands)</i>		
	<i>(unaudited)</i>		
Staff costs	18,631	13,849	13,203
Professional service fees	6,013	3,867	5,631
Share-based payments	10,843	6,405	5,035
Office, travel and hiring expenses	3,626	2,957	1,613
Depreciation and amortization	529	407	1,190
Others	1,111	726	1,265
Total	40,753	28,211	27,937

FINANCIAL INFORMATION

Research and Development Expenses

During the Track Record Period, our research and development expenses primarily consisted of (i) outsourced pre-clinical and clinical study expenses, (ii) staff costs, and (iii) share-based payments. Our research and development expenses were RMB146.2 million for the year ended December 31, 2024, and RMB103.2 million and RMB97.1 million for the nine months ended September 30, 2024 and 2025, respectively, representing 78.2%, 78.5% and 77.7% of our total operating expenses (namely the aggregate of general and administrative expenses and research and development expenses), respectively.

For the year ended December 31, 2024 and for the nine months ended September 30, 2024 and 2025, the research and development expenses for the Core Product were RMB88.7 million, RMB59.4 million and RMB62.2 million, respectively, representing 60.7%, 57.6% and 64.1% of our total research and development expenses for the same period, respectively, and 47.4%, 45.2% and 49.8% of our total operating expenses, respectively.

The following table sets forth a breakdown of our research and development expenses for the periods indicated:

	Year ended December 31,	Nine months ended September 30,	
	2024	2024	2025
	(RMB in thousands)		
	(unaudited)		
Outsourced pre-clinical and clinical study expenses	83,179	57,960	49,575
Staff costs	42,110	31,406	27,259
Share-based payments	4,936	2,765	10,787
Depreciation and amortization	3,834	2,707	3,034
Others ⁽¹⁾	12,148	8,394	6,419
Total	146,207	103,232	97,074

Note:

- (1) Primarily include raw material costs, IP right license fees, and short-term lease payments and property management fees.

Finance Costs

Our finance costs primarily represent the interest expenses incurred on our bank loans and lease liabilities. Our finance costs were RMB2.6 million for the year ended December 31, 2024, and RMB1.9 million and RMB1.7 million for the nine months ended September 30, 2024 and 2025, respectively. See “— Indebtedness” in this section for further details.

FINANCIAL INFORMATION

The following table sets forth a breakdown of our finance costs for the periods indicated:

	Year ended December 31,	Nine months ended September 30,	
	2024	2024	2025
		(RMB in thousands)	
		(unaudited)	
Interest on bank loans	2,464	1,816	1,535
Interest on lease liabilities	120	92	178
Total	2,584	1,908	1,713

Income Tax

We are subject to enterprise income tax in the PRC at the statutory rate of 25% on taxable profits calculated in accordance with the EIT Law. As an accredited High and New Technology Enterprise, our Company is entitled to a preferential tax rate of 15% for enterprise income tax in the PRC. We are also entitled to an additional tax deduction equal to 100% of our qualified research and development expenses.

During the Track Record Period, we did not pay any income tax as we did not record any taxable profit.

PERIOD-TO-PERIOD COMPARISON OF RESULTS OF OPERATIONS

Nine Months Ended September 30, 2025 Compared to Nine Months Ended September 30, 2024

Other Net Income

Our other net income increased by 50.0% from RMB0.8 million in the nine months ended September 30, 2024 to RMB1.2 million in the same period of 2025, primarily driven by higher government grants. The increase in government grants was primarily due to the additional grant introduced by government authorities in 2025 for eligible companies listed on the Innovation Class of the NEEQ, including us.

General and Administrative Expenses

Our general and administrative expenses remained relatively stable at RMB28.2 million in the nine months ended September 30, 2024 and RMB27.9 million in the same period of 2025, primarily resulting from increases in professional service fees in connection with our proposed [REDACTED] on the Beijing Stock Exchange and in depreciation and amortization arising from our newly leased property in connection with our proposed development of manufacturing facility, which were largely offset by decreases in share-based payments and office, travel and hiring expenses. The decrease in share-based payments was primarily due to certain senior management personnel transitioning to R&D responsibilities in 2025. The decrease in office, travel and hiring expenses resulted primarily from our decreased hiring activities, reflecting the improved stability of our employees.

FINANCIAL INFORMATION

Research and Development Expenses

Our research and development expenses decreased by 5.9% from RMB103.2 million in the nine months ended September 30, 2024 to RMB97.1 million in the same period of 2025, primarily attributable to the decrease in research and development expenses relating to the clinical trials for Pumecitinib gel in line with the conclusion of the observation period for its Phase III clinical trial (for the indication of atopic dermatitis) in 2025.

Finance Costs

Our finance costs decreased by 10.5% from RMB1.9 million in the nine months ended September 30, 2024 to RMB1.7 million in the same period of 2025, primarily attributable to a decrease in interest on bank loans resulting from lower interest rates.

Loss for the Period

As a result of the foregoing, our loss for the period decreased from RMB132.6 million for the nine months ended September 30, 2024 to RMB125.0 million for the nine months ended September 30, 2025.

DISCUSSION OF SELECTED ITEMS FROM OUR STATEMENTS OF FINANCIAL POSITION

The following table sets forth our statements of financial position as of the dates indicated:

	As of December 31, 2024	As of September 30, 2025
	(RMB in thousands)	
	(unaudited)	
Non-current assets		
Property and equipment	4,652	4,209
Right-of-use assets	1,574	16,436
Intangible assets	1,823	743
Other non-current assets	11,274	14,014
	<u>19,323</u>	<u>35,402</u>
Current assets		
Prepayments and other receivables	8,498	6,643
Financial assets measured at fair value through profit or loss	50,186	—
Cash and cash equivalents	189,653	154,776
	<u>248,337</u>	<u>161,419</u>

FINANCIAL INFORMATION

	As of December 31, <u>2024</u>	As of September 30, <u>2025</u>
	(RMB in thousands) (unaudited)	
Current liabilities		
Trade and other payables	27,841	48,671
Amount due to a related party	2,364	1,151
Bank loans	82,000	40,990
Lease liabilities	1,097	4,145
	<u>113,302</u>	<u>94,957</u>
Net current assets	135,035	66,462
Total assets less current liabilities	<u>154,358</u>	<u>101,864</u>
Non-current liabilities		
Bank loans	—	39,000
Lease liabilities	426	13,086
Deferred income	—	5,000
	<u>426</u>	<u>57,086</u>
NET ASSETS	<u>153,932</u>	<u>44,778</u>
CAPITAL AND RESERVES		
Share capital	96,085	96,085
Reserves	<u>57,847</u>	<u>(51,307)</u>
TOTAL EQUITY	<u>153,932</u>	<u>44,778</u>

Our net current assets decreased from RMB135.0 million as of December 31, 2024 to RMB66.5 million as of September 30, 2025, primarily attributable to decreases in our financial assets at fair value through profit or loss and our cash and cash equivalents, reflecting the cash consumed in our operations and R&D activities during the nine months ended September 30, 2025.

Property and Equipment

During the Track Record Period, our property and equipment primarily comprise machinery and equipment relating to the research and development of our drug candidates. The following table sets forth a breakdown of our property and equipment as of the dates indicated:

	As of December 31, <u>2024</u>	As of September 30, <u>2025</u>
	(RMB in thousands) (unaudited)	
Machinery and equipment	3,982	3,661

FINANCIAL INFORMATION

	As of December 31, <u>2024</u>	As of September 30, <u>2025</u>
	<i>(RMB in thousands)</i>	
	<i>(unaudited)</i>	
Office equipment and furniture	447	419
Leasehold improvements	<u>223</u>	<u>129</u>
Total	<u>4,652</u>	<u>4,209</u>

Our property and equipment decreased from RMB4.7 million as of December 31, 2024 to RMB4.2 million as of September 30, 2025, primarily as a result of depreciation of such assets.

Right-of-use Assets

Our right-of-use assets represent our leased properties used as offices and proposed manufacturing facility. Our right-of-use assets increased from RMB1.6 million as of December 31, 2024 to RMB16.4 million as of September 30, 2025, primarily due to our newly leased property in connection with the planned development of our manufacturing facility.

Other Non-Current Assets

Our other non-current assets represent our value-added tax recoverable, which is expected to be deducted from future value-added tax payable on our revenue after the commercialization of our drug candidates.

As of December 31, 2024 and September 30, 2025, our value-added tax recoverable amounting to RMB11.3 million and RMB14.0 million, respectively, reflecting our cumulative value-added tax paid in connection with our procurements for our operations and research and development activities which is expected to be deducted against the VAT payable on our future sales after the commercialization of our drug candidates.

Financial Assets Measured at Fair Value through Profit or Loss

Our financial assets measured at fair value through profit or loss represent structured deposits purchased from banks in the PRC with variable interest that we purchased as part of our cash management efforts.

As of December 31, 2024, our financial assets measured at fair value through profit or loss was RMB50.2 million. Such financial assets decreased to nil as of September 30, 2025 due to the maturity and redemption of such financial products before September 30, 2025.

FINANCIAL INFORMATION

Prepayments and Other Receivables

During the Track Record Period, our prepayments and other receivables consists primarily of our prepayments for CRO services and raw materials. The following table sets forth a breakdown of our prepayments and other receivables as of the dates indicated:

	As of December 31,	As of September 30,
	2024	2025
	<i>(RMB in thousands)</i>	
	<i>(unaudited)</i>	
Prepayments for CRO services	5,441	3,340
Prepayments for raw materials	2,205	2,074
Rental deposits	1,563	1,353
Others	3	–
Less: loss allowance	(714)	(124)
Total	8,498	6,643

Our prepayments and other receivables decreased from RMB8.5 million as of December 31, 2024 to RMB6.6 million as of September 30, 2025, primarily attributable to the de-recognition of prepayments for CRO services in line with the provision of the relevant CRO services by relevant vendors.

Cash and Cash Equivalents

Our cash and cash equivalents decreased from RMB189.7 million as of December 31, 2024 to RMB154.8 million as of September 30, 2025, primarily reflecting the consumption of cash during our operations.

Trade and Other Payables

Our trade and other payables primarily comprise amounts payable for research and development costs and staff related costs, as well as tax payables and government grants received but not meeting their conditions attached. The following table sets forth a breakdown of our trade and other payables as of the dates indicated:

	As of December 31,	As of September 30,
	2024	2025
	<i>(RMB in thousands)</i>	
	<i>(unaudited)</i>	
Payables for research and development costs	17,378	21,960
Payables for staff related costs	7,155	5,695

FINANCIAL INFORMATION

	As of December 31,	As of September 30,
	2024	2025
	(RMB in thousands)	
	(unaudited)	
Payables for other taxes	1,052	934
Government grants ⁽¹⁾	–	17,513
Others	2,256	2,569
	<u>27,841</u>	<u>48,671</u>

Note:

(1) Represents government grants received but not meeting the conditions attached.

Our trade and other payables increased from RMB27.8 million as of December 31, 2024 to RMB48.7 million as of September 30, 2025, primarily attributable to the government grant we received in 2025, for which we have not met the conditions attached.

The following table sets forth an aging analysis of the payables for research and development costs based on the date of purchase as of the dates indicated:

	As of December 31,	As of September 30,
	2024	2025
	(RMB in thousands)	
	(unaudited)	
Within 6 months	16,941	15,685
Over 6 months and within 1 year	342	4,478
Over 1 year	95	1,797
	<u>17,378</u>	<u>21,960</u>

As of November 30, 2025, RMB7.8 million, or approximately 35.7% of our payables for research and development costs as of September 30, 2025 had been subsequently settled.

Bank Loans

During the Track Record Period, our bank loans were unsecured and unguaranteed and bear annual interest rates ranging from 2.4% to 4.1%.

FINANCIAL INFORMATION

The following table sets forth the analysis of the repayment schedule of our bank loans as of the dates indicated:

	As of December 31, 2024	As of September 30, 2025
	(RMB in thousands) (unaudited)	
Within 1 year or on demand	82,000	40,990
After 1 year but within 2 years	—	39,000
Total	82,000	79,990

Our bank loans decreased from RMB82.0 million as of December 31, 2024 to RMB80.0 million as of September 30, 2025 as a result of our repayment of such loans.

Lease Liabilities

Our lease liabilities primarily represent our payment obligations under the leases for our offices and proposed manufacturing facility. Our lease liabilities increased from RMB1.5 million as of December 31, 2024 to RMB17.2 million as of September 30, 2025, primarily due to our newly leased property in connection with the planned development of our manufacturing facility.

Deferred Income

Our deferred income represent government grant we received to support our future research and development activities.

Our deferred income increased from nil as of December 31, 2024 to RMB5.0 million as of September 30, 2025, primarily reflecting the government grant we received from relevant authorities in 2025.

KEY FINANCIAL RATIO

The following table sets forth our current ratio as of the dates indicated:

	As of December 31, 2024	As of September 30, 2025
Current ratio ⁽¹⁾	2.19	1.70

Note:

- (1) Calculated by dividing our total current assets by our total current liabilities as of the end of the relevant period.

FINANCIAL INFORMATION

LIQUIDITY AND CAPITAL RESOURCES

Our primary sources of liquidity consist of cash and cash equivalents, which we have historically generated primarily through capital contribution from shareholders and proceeds from borrowings. We expect that our cash needs in the near future will primarily relate to progressing the development of our drug candidates towards initiating various stages of clinical trials, receiving regulatory approval and commencing commercialization, as well as expanding our drug candidate portfolio. For these purposes, we expect debt financing (including bank loans) and the expected [REDACTED] from the [REDACTED] to constitute our main source of funding. We monitor our cash flows and cash balance on a regular basis and strive to maintain an optimal liquidity that can meet our working capital needs.

The following table sets out a summary of our cash flows for the years/periods indicated:

	Year ended December 31,	Nine months ended September 30,	
	2024	2024	2025
	<i>(RMB in thousands)</i>		
	<i>(unaudited)</i>		
Net cash used in operating activities . . .	(159,518)	(131,842)	(79,041)
Net cash (used in)/generated from investing activities	(40,154)	(28,301)	49,146
Net cash generated from/(used in) financing activities	<u>259,621</u>	<u>127,956</u>	<u>(4,982)</u>
Net increase/(decrease) in cash and cash equivalents	59,949	(32,187)	(34,877)
Cash and cash equivalents at beginning of the year/period	<u>129,704</u>	<u>129,704</u>	<u>189,653</u>
Cash and cash equivalents at end of the year/period	<u>189,653</u>	<u>97,517</u>	<u>154,776</u>

Cash flow from Operating Activities

For the nine months ended September 30, 2025, we recorded net cash used in operating activities of RMB79.0 million, consisting of loss before taxation of RMB125.0 million and adjustments for (i) non-cash or non-operating expenses or losses, primarily including share-based payment expenses of RMB15.8 million, depreciation and amortization of RMB4.2 million, and finance costs of RMB1.7 million; and (ii) changes in working capital items, including an increase in trade and other payables of RMB21.7 million, an increase in deferred income of RMB5.0 million, an increase in other non-current assets of RMB2.7 million, and a decrease in prepayments and other receivables of RMB2.4 million.

FINANCIAL INFORMATION

For the year ended December 31, 2024, we recorded net cash used in operating activities of RMB159.5 million, consisting of loss before taxation of RMB178.5 million and adjustments for (i) non-cash or non-operating expenses or losses, primarily including share-based payment expenses of RMB15.8 million, depreciation and amortization of RMB4.4 million, and finance costs of RMB2.6 million; and (ii) changes in working capital items, including an increase in other non-current assets of RMB5.7 million, an increase of trade and other payables of RMB4.3 million, and an increase in prepayments and other receivables of RMB2.9 million.

We recorded net operating cash outflows during the Track Record Period. As a clinical-stage biotechnology company, we plan to improve our net operating cash outflow position through the following ways: (i) accelerating the clinical development of our drug candidates and advancing them towards commercialization in the next few years, particularly our Core Product, Pumecitinib; (ii) adopting comprehensive measures to effectively optimize our cost structure and control our operating expenses; (iii) closely monitoring our payables settlement, thereby enhancing working capital management and improving our cash flow positions; and (iv) successfully launching the [REDACTED] to obtain the [REDACTED].

Cash Flow from Investing Activities

For the nine months ended September 30, 2025, our net cash generated from investing activities was RMB49.1 million, primarily attributable to proceeds from redemptions of financial assets measured at fair value through profit or loss of RMB80.3 million, which is partially offset by payments for purchase of financial assets measured at fair value through profit or loss of RMB30.0 million.

For the year ended December 31, 2024, our net cash used in investing activities was RMB40.2 million, primarily attributable to payments for purchase of financial assets measured at fair value through profit or loss of RMB228.0 million, which is partially offset by proceeds from redemptions of financial assets measured at fair value through profit or loss of RMB188.7 million.

Cash Flow from Financing Activities

For the nine months ended September 30, 2025, our net cash used in financing activities was RMB5.0 million, mainly reflecting the repayment of bank loans totalling RMB74.0 million, partially offset by RMB72.0 million in proceeds from bank loans.

For the year ended December 31, 2024, our net cash generated from financing activities was RMB259.6 million, primarily attributable to RMB216.0 million in capital injection received from equity shareholders and RMB157.0 million in proceeds from bank loans, which were partially offset by repayment of bank loans totalling RMB108.6 million, interest paid for bank loans of RMB2.5 million and principal elements of lease payment of RMB2.2 million.

FINANCIAL INFORMATION

CASH OPERATING COSTS

The following table sets forth key information relating to our cash operating costs for the periods indicated:

	For the Year Ended December 31,	For the Nine Months Ended September 30,	
	2024	2024	2025
<i>(RMB in thousands)</i>			
Costs relating to the R&D of our Core Product			
Outsourced pre-clinical and clinical study expenses	56,538	45,015	28,761
Staff costs	21,390	15,924	16,807
Costs of materials and consumables . . .	3,390	3,013	852
Others	4,728	3,652	2,404
Subtotal	86,047	67,603	48,824
Costs relating to the R&D of our other product candidates			
Outsourced pre-clinical and clinical study expenses	28,116	21,560	16,874
Staff costs	19,818	16,474	11,828
Costs of materials and consumables . . .	3,287	2,196	1,321
Others	2,414	1,971	2,854
Subtotal	53,634	42,203	32,876
Staff costs	17,314	13,348	12,749
Professional service fees ⁽¹⁾	5,290	4,038	3,080
Office, travel and hiring expenses	2,713	2,250	1,275
Others	4,447	2,637	3,443
Total	169,445	132,079	102,247

Note:

- (1) Primarily represents fees paid for professional services relating to our proposed [REDACTED] on the Beijing Stock Exchange.

FINANCIAL INFORMATION

INDEBTEDNESS

The following table sets forth a breakdown of our indebtedness as of the dates indicated:

	As of December 31,	As of September 30,	As of November 30,
	2024	2025	2025
<i>(RMB in thousands)</i>			
<i>(unaudited)</i>			
Bank loans	82,000	79,990	80,359
Lease liabilities	1,523	17,231	16,863
Total	<u>83,523</u>	<u>97,221</u>	<u>97,222</u>

Bank loans

As of December 31, 2024, September 30, 2025 and November 30, 2025 (being the indebtedness date for the purpose of the indebtedness statement), our bank loans amounted to RMB82.0 million, RMB80.0 million and RMB80.4 million, respectively. For detailed information on the changes in our bank loans, see “— Discussion of Selected Items from Our Statements of Financial Position — Bank Loans.”

The following table sets forth our bank loans as of the dates indicated:

	As of December 31,	As of September 30,	As of November 30,
	2024	2025	2025
<i>(RMB in thousands)</i>			
<i>(unaudited)</i>			
Current	82,000	40,990	41,359
Non-current	—	39,000	39,000
Total	<u>82,000</u>	<u>79,990</u>	<u>80,359</u>

As of November 30, 2025, we had bank facilities of RMB215.0 million, of which RMB135.0 million was unutilized.

Lease Liabilities

As of December 31, 2024, September 30, 2025 and November 30, 2025 (being the indebtedness date for the purpose of the indebtedness statement), our lease liabilities amounted to RMB1.5 million, RMB17.2 million and RMB16.9 million, respectively. Our lease liabilities are in relation to properties that we lease primarily for our offices and proposed manufacturing facility.

FINANCIAL INFORMATION

The following table sets forth the payment schedule of our lease liabilities as of the dates indicated:

	As of December 31, <u>2024</u>	As of September 30, <u>2025</u>	As of November 30, <u>2025</u>
	<i>(RMB in thousands)</i>		
	<i>(unaudited)</i>		
Within 1 year	1,097	4,145	4,721
After 1 year but within 2 years	284	3,499	3,439
After 2 years but within 5 years	<u>142</u>	<u>9,587</u>	<u>8,703</u>
Total	<u>1,523</u>	<u>17,231</u>	<u>16,863</u>

Contingent Liabilities

We did not have any material contingent liabilities as of December 31, 2024 and September 30, 2025, respectively.

Indebtedness Statement

Except as disclosed above, as of November 30, 2025, being the most recent practicable date for determining our indebtedness, we did not have any outstanding mortgages, charges, debentures, other issued debt capital, bank overdrafts, borrowings, liabilities under acceptance or other similar indebtedness, hire purchase commitments, guarantees or other material contingent liabilities. Our Directors have confirmed that, except as otherwise disclosed in this document, there is no material change in our indebtedness since November 30, 2025 and up to the Latest Practicable Date.

Our Directors have confirmed that there were no material covenants on any of our outstanding debts and that we had no default in repayment or breach of covenants during the Track Record Period and up to the Latest Practicable Date that, in each case, had any material adverse effect on our business operations or financial condition. Our Directors have further confirmed that we did not experience any difficulty in obtaining bank loans and other borrowings or default in repayment of bank loans and other borrowings during the Track Record Period and up to the Latest Practicable Date.

FINANCIAL INFORMATION

CAPITAL EXPENDITURES

We regularly incur capital expenditures to purchase property and equipment and intangible assets. Historically, we have funded our capital expenditures mainly through capital contribution from shareholders and proceeds from borrowings. The following table sets forth our capital expenditures for the year/periods indicated:

	For the Year Ended December 31,	For the nine months ended September 30,	
	2024	2024	2025
	<i>(RMB in thousands)</i>		
	<i>(unaudited)</i>		
Payments for purchase of property and equipment	437	422	420
Payments for purchase of intangible assets	827	573	1,045
Total	<u>1,264</u>	<u>995</u>	<u>1,465</u>

We expect that our capital expenditures in 2026 will be primarily related to our proposed development of manufacturing facility. We plan to fund our planned capital expenditures mainly through a combination of bank loans and the [REDACTED] from the [REDACTED]. We may adjust our capital expenditures for any given period according to our development plans or in light of market conditions and other factors we believe to be appropriate.

CAPITAL COMMITMENTS

As at December 31, 2024, we were committed to enter into a new lease of five years that had not yet commenced, the lease payments under which amounted to RMB3.5 million per annum. Such lease arrangement commenced on July 1, 2025.

As of September 30, 2025, we did not have any material commitments.

FINANCIAL RISK MANAGEMENT

Exposure to credit, liquidity and currency risks arise in the normal course of our business. We are not exposed to significant interest rate risk.

FINANCIAL INFORMATION

Our exposure to these risks and the financial risk management policies and practices used by us to manage these risks are described below:

Credit Risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in a financial loss to us. Our credit risk is primarily attributable to prepayment and other receivables. Our exposure to credit risk arising from cash and cash equivalents and financial assets measured at fair value through profit or loss is limited because the counterparties are reputable banks, which we consider to have low credit risks. Management has a credit policy in place and the exposure to credit risk is monitored on an ongoing basis.

Management has assessed that during the Track Record Period, other receivables have not had a significant increase in credit risk since initial recognition. Thus, a 12-month expected credit loss approach that results from possible default event within 12 months of each reporting date is adopted by management. We recognized loss allowance of RMB0.2 million and a reversal of allowance of RMB0.6 million of other receivables for the year ended December 31, 2024 and the nine months ended September 30, 2025, respectively.

Liquidity Risk

Our policy is to regularly monitor its liquidity requirements to ensure that it maintains sufficient reserves of cash to meet its liquidity requirements in the short and longer term. For further details and an analysis of the remaining contractual maturities at the end of each year/period during the Track Record Period, see Note 24 to the Accountants’ Report set out in Appendix I to this document.

IMPACT OF THE COVID-19

During the Track Record Period and up to the Latest Practicable Date, we had not experienced material disruptions in our operations as a result of the COVID-19 pandemic. The overall impact of the COVID-19 pandemic on our clinical activities, drug development timeline, business, and results of operations has been immaterial, especially as the COVID-19 pandemic has come under control as of the Latest Practicable Date. Our Directors are of the view that it is unlikely that the COVID-19 pandemic will have a material adverse impact on our business going forward.

OFF-BALANCE SHEET ARRANGEMENTS

As of the Latest Practicable Date, we had not entered into any off-balance sheet arrangements.

FINANCIAL INFORMATION

RELATED PARTY TRANSACTIONS

For details about our material related party transactions during the Track Record Period, see Note 26 to the audited financial statements set out in Appendix I to this document.

Our Directors believe that our transactions with related parties during the Track Record Period were conducted on an arm’s-length basis, and they did not distort our results of operations or make our historical results not reflective of our future performance.

DIVIDENDS

We did not declare or pay any dividend during the Track Record Period. We currently do not have a pre-determined dividend payout ratio. We currently do not anticipate paying any cash dividends in the foreseeable future. [REDACTED] should not purchase our H Shares with the expectation of receiving cash dividends. Any future determination to pay dividends will be made at the discretion of our Directors and may be based on a number of factors, including our future operations and earnings, capital requirements and surplus, general financial condition, contractual restrictions and other factors that our Directors may deem relevant. Regulations in the PRC currently permit payment of dividends of a PRC company only out of accumulated distributable after-tax profits less any recovery of accumulated losses and appropriations to statutory and other reserves that we are required to make, as determined in accordance with its articles of association and the accounting standards and regulations in China. Taking into account the aforesaid, we may not have sufficient or any distributable profits to make dividend distributions to our Shareholders in a given year, in view of our accumulated losses, or even if we become profitable, as we will only be able to declare or pay dividends out of our distributable profits until (i) the accumulated losses are covered by our after-tax profits, and (ii) sufficient statutory and other reserves are drawn in accordance with the relevant laws, regulations and our constitutional documents. In light of our accumulated losses as disclosed in this document, it is unlikely that we will be eligible to pay dividends out of our profits in the near future.

WORKING CAPITAL

The Directors are of the opinion that, taking into account the financial resources available to us, including (i) our existing cash and cash equivalents, (ii) available bank facilities, and (iii) the estimated [REDACTED] from the [REDACTED], we have sufficient working capital to cover 125% of our cash expenditure for at least the next 12 months following the date of this document.

Our cash burn rate refers to the average monthly (i) net cash used in operating activities, (ii) capital expenditures for purchases of property and equipment and intangible assets; and (iii) principal and interest payments on lease liabilities. As of September 30, 2025, we had cash and cash equivalents of RMB154.8 million. Assuming an [REDACTED] of HK\$[REDACTED] per [REDACTED] (being the low end of the indicative [REDACTED] range) and no exercise of the [REDACTED], we estimate that we will receive [REDACTED] of approximately HK\$[REDACTED] from the [REDACTED]. Assuming an average cash burn rate going forward of 1.3 times the level for the nine months ended September 30, 2025, we estimate that our cash and cash equivalents as of September 30, 2025 will be able to maintain our financial viability for [REDACTED] months without taking into account the [REDACTED] from the [REDACTED], or, if taking into account such [REDACTED], [REDACTED] months. Our Directors and management team will continue to monitor our working capital, cash flows, and our business development progress.

FINANCIAL INFORMATION

DISTRIBUTABLE RESERVES

As of September 30, 2025, we did not have any distributable reserves.

[REDACTED] EXPENSES

[REDACTED] expenses represent professional fees, [REDACTED] commission and other fees incurred in connection with the [REDACTED]. We estimate that our [REDACTED] expenses will be approximately HK\$[REDACTED] (assuming the [REDACTED] is not exercised and based on the [REDACTED] of HK\$[REDACTED]), which account for approximately [REDACTED]% of the gross [REDACTED] from the [REDACTED]. We estimate the [REDACTED] expenses to consist of approximately HK\$[REDACTED] in [REDACTED] fees and HK\$[REDACTED] in [REDACTED] fees (which consist of fees and expenses of legal advisors and our Reporting Accountants of approximately HK\$[REDACTED] and other fees and expenses of approximately HK\$[REDACTED]). Among the total [REDACTED] expenses, approximately HK\$[REDACTED] will be directly attributable to the [REDACTED] of our H Shares, which will be deducted from equity upon the completion of the [REDACTED], and the remaining approximately HK\$[REDACTED] will be expensed in our statements of profit or loss and other comprehensive income.

UNAUDITED [REDACTED] ADJUSTED NET TANGIBLE ASSETS

The following unaudited [REDACTED] statement of adjusted net tangible assets is prepared in accordance with Rule 4.29 of the Listing Rules and is set out below to illustrate the effect of the [REDACTED] on our net tangible assets as at September 30, 2025 as if the [REDACTED] had taken place on September 30, 2025.

The unaudited [REDACTED] statement of adjusted net tangible assets has been prepared for illustrative purposes only and because of its hypothetical nature, it may not give a true picture of our financial position had the [REDACTED] been completed as of September 30, 2025 or at any future date.

	Net tangible assets as at September 30, 2025 ⁽¹⁾	Estimated [REDACTED] from the [REDACTED] ⁽²⁾⁽⁴⁾	Unaudited [REDACTED] adjusted net tangible assets	Unaudited [REDACTED] adjusted net tangible assets per Share	
	RMB'000	RMB'000	RMB'000	RMB ⁽³⁾	HKD ⁽⁴⁾
Based on an [REDACTED] of HKD[REDACTED] per [REDACTED]	44,035	[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED]
Based on an [REDACTED] of HKD[REDACTED] per [REDACTED]	44,035	[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED]

FINANCIAL INFORMATION

Notes:

- (1) Our net tangible assets as of September 30, 2025 is arrived at after deducting intangible assets of RMB0.7 million from our total equity of RMB44.8 million as of September 30, 2025, which is extracted from the Accountants’ Report set out in Appendix I to the Document.
- (2) The estimated [REDACTED] from the [REDACTED] are based on the indicative [REDACTED] of HK\$[REDACTED] per [REDACTED] (being the lower end of the [REDACTED] range) and HK\$[REDACTED] per [REDACTED] (being the higher end of the [REDACTED] range), and [REDACTED] expected to be [REDACTED] under the [REDACTED], after deduction of the [REDACTED] fees and other related expenses paid or payable by us and does not take into account any H Shares which may be [REDACTED] upon the exercise of the [REDACTED].
- (3) The unaudited [REDACTED] adjusted net tangible assets per Share is arrived at after adjustments as described in the preceding paragraphs and on the basis that [REDACTED] shares were in issue (as adjusted by the Share subdivision on a one for two basis in January 2026) immediately following the completion of [REDACTED], and does not take into account any H Shares which may be [REDACTED] upon the exercise of the [REDACTED].
- (4) The estimated [REDACTED] from [REDACTED] and the unaudited [REDACTED] adjusted net tangible assets per Share are converted from or into HK\$ at the exchange rate of RMB0.89877 to HK\$1.00 on the Latest Practicable Date. No representation is made that RMB amount have been, could have been or may be converted to HK\$, or vice versa, at that rate or at any other rate.
- (5) No adjustment has been made to the unaudited [REDACTED] adjusted net tangible assets to reflect any trading results or other transactions we entered into subsequent to September 30, 2025.

RECENT DEVELOPMENT AND NO MATERIAL ADVERSE CHANGE

We continued investing in the research and development of our drug candidates after September 30, 2025. To support our funding needs for operations and research and development, we continued to utilize available sources of funds, including bank loans. As of the Latest Practicable Date, the outstanding balance of our bank loans increased to RMB130.0 million.

After performing sufficient due diligence work that our Directors consider appropriate and after due and careful consideration, our Directors confirm that, up to the date of this document and except as disclosed in this document, there has been no material adverse change in our financial or trading position or prospects since September 30, 2025 (being the end date of the period reported on in the Historical Financial Information set out in Appendix I to this document) and there has been no event since September 30, 2025 that would materially affect the information shown in the Accountants’ Report as set out in Appendix I to this document.

DISCLOSURE REQUIRED UNDER THE LISTING RULES

Our Directors confirm that as of the Latest Practicable Date, there was no circumstance that would give rise to a disclosure requirement under Rules 13.13 to 13.19 of the Listing Rules.

FUTURE PLANS AND [REDACTED]

FUTURE PLANS

Please refer to the paragraph headed “Business — Our Strategies” for a detailed description of our future plans and strategies.

[REDACTED]

We estimate that we will receive [REDACTED] from the [REDACTED] of approximately HK\$[REDACTED], after deducting [REDACTED] commissions, fees and other estimated expenses in connection with the [REDACTED] paid and payable by us in connection with the [REDACTED] and assuming that the [REDACTED] is not exercised and an [REDACTED] of HK\$[REDACTED] per [REDACTED] (being the mid-point of the indicative [REDACTED] range).

We currently intend to apply these [REDACTED] for the following purposes, subject to changes in light of our evolving business needs and changing market conditions:

- Approximately [REDACTED]%, or HK\$[REDACTED], will be allocated to the development of our Core Product, PG-011 (Pumecitinib) including:
 - Approximately [REDACTED]%, or HK\$[REDACTED], will be used for the development of Pumecitinib gel for the indication of atopic dermatitis, including: to fund (i) the NDA submission for Pumecitinib gel for the indication of atopic dermatitis in adults, and (ii) the expansion of target patient population to children aged two to 11.
 - Approximately [REDACTED]%, or HK\$[REDACTED], will be used for the development of Pumecitinib nasal spray for the indication of allergic rhinitis, including: to fund (i) the clinical trials and NDA for the indication of seasonal allergic rhinitis in adults, (ii) the expansion of target patient population for the indication of seasonal allergic rhinitis to adolescents aged 12 to 17 and children aged two to 11, and (iii) the expansion of indications to perennial allergic rhinitis in adults.
 - Approximately [REDACTED]%, or HK\$[REDACTED], will be used to fund the clinical trials for PG-011 for additional indications, including prurigo nodularis and non-segmental vitiligo.

For details on the development stages and future development plan for PG-011, please see “Business — Our Clinical Stage Pipeline Products — Core Product PG-011 (Pumecitinib): A JAK1/JAK2 Inhibitor Designed for Topical Use.”

FUTURE PLANS AND [REDACTED]

- Approximately [REDACTED]%, or HK\$[REDACTED], will be allocated to the development of our other product candidates, including:
 - Approximately [REDACTED]%, or HK\$[REDACTED], will be used for research and development of other innovative drug candidates, including PG-033 (for the indication of pruritus and Olmsted syndrome), PG-018 (for the indication of membranous nephropathy), PG-040 (for the indication of glaucoma), and PG-312 (for the indication of urticaria).
- For current development status of innovative drug candidates above, please see “Business — Our Clinical Stage Pipeline Products” and “Business — Our Selected Pre-clinical Pipeline Candidates.”
- Approximately [REDACTED]%, or HK\$[REDACTED], will be used for the early research of new drug candidates.
- Approximately [REDACTED]%, or HK\$[REDACTED], will be used to further strengthen our innovation and commercialization capabilities with respect to complex drug formulation, including to support the construction of our proprietary manufacturing facility for Pumecitinib gel and nasal spray. The [REDACTED] will be used to fund the relevant site rental and renovation costs, the procurement and installation of relevant R&D and manufacturing equipment and devices, and to cover other expenses necessary to support our continued innovation and future product commercialization.
- Approximately [REDACTED]%, or HK\$[REDACTED], will be used for our daily operations and general corporate purposes, including working capital requirements, staff salaries, administrative expenses, marketing and business development activities and other routine operational costs.

If the [REDACTED] is exercised in full, the [REDACTED] that we will receive will be approximately HK\$[REDACTED]. In such an event, we intend to apply the additional [REDACTED] to the above purposes in the proportion as stated above.

To the extent that the [REDACTED] from the [REDACTED] are not immediately required for the above purposes, the [REDACTED] will, to the extent permitted by relevant law and regulations, be temporarily placed in short-term interest-bearing accounts with licensed commercial banks and/or other authorized financial institutions.

We will issue an appropriate announcement if there is any material change to the above proposed [REDACTED].

APPENDIX I

ACCOUNTANTS’ REPORT

The following is the text of a report set out on pages I-1 to I-[51], received from the Company’s reporting accountants, KPMG, Certified Public Accountants, Hong Kong, for the purpose of incorporation in this Document.

ACCOUNTANTS’ REPORT ON HISTORICAL FINANCIAL INFORMATION TO THE DIRECTORS OF PRIMEGENX THERAPEUTICS CO., LTD. AND CITIC SECURITIES (HONG KONG) LIMITED AND CMBC INTERNATIONAL CAPITAL LIMITED

Introduction

We report on the historical financial information of PrimeGenX Therapeutics Co., Ltd. (the “Company”) set out on pages I-[4] to I-[51], which comprises the statement of financial position of the Company as at 31 December 2024, and the statement of profit or loss and other comprehensive income, the statement of changes in equity and the statement of cash flows for the year ended 31 December 2024 (the “Relevant Period”), and material accounting policy information and other explanatory information (together, the “Historical Financial Information”). The Historical Financial Information set out on pages I-[4] to I-[51] forms an integral part of this report, which has been prepared for inclusion in the document of the Company dated [date] (the “Document”) in connection with the initial [REDACTED] of H shares of the Company on the Main Board of The Stock Exchange of Hong Kong Limited.

Directors’ responsibility for the Historical Financial Information

The directors of the Company are responsible for the preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of preparation and presentation set out in Note 1 to the Historical Financial Information, and for such internal control as the directors of the Company determine is necessary to enable the preparation of the Historical Financial Information that is free from material misstatement, whether due to fraud or error.

Reporting accountants’ responsibility

Our responsibility is to express an opinion on the Historical Financial Information and to report our opinion to you. We conducted our work in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 200 “Accountants’ Reports on Historical Financial Information in Investment Circulars” issued by the Hong Kong Institute of Certified Public Accountants (the “HKICPA”). This standard requires that we comply with ethical standards and plan and perform our work to obtain reasonable assurance about whether the Historical Financial Information is free from material misstatement.

APPENDIX I

ACCOUNTANTS’ REPORT

Our work involved performing procedures to obtain evidence about the amounts and disclosures in the Historical Financial Information. The procedures selected depend on the reporting accountants’ judgement, including the assessment of risks of material misstatement of the Historical Financial Information, whether due to fraud or error. In making those risk assessments, the reporting accountants consider internal control relevant to the entity’s preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of preparation and presentation set out in Note 1 to the Historical Financial Information in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. Our work also included evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the Historical Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion

In our opinion, the Historical Financial Information gives, for the purpose of the accountants’ report, a true and fair view of the financial position of the Company as at 31 December 2024 and of its financial performance and its cash flows for the Relevant Period in accordance with the basis of preparation and presentation set out in Note 1 to the Historical Financial Information.

Review of interim financial information

We have reviewed the interim financial information of the Company which comprises the statement of financial position of the Company as at 30 September 2025, and the statements of profit or loss and other comprehensive income, the statements of changes in equity and the statements of cash flows for the nine months ended 30 September 2024 and 2025 and other explanatory information (the “Interim Financial Information”). The directors of the Company are responsible for the preparation and presentation of the Interim Financial Information in accordance with the basis of preparation and presentation set out in Note 1 to the Historical Financial Information. Our responsibility is to express a conclusion on the Interim Financial Information based on our review. We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 “Review of Interim Financial Information Performed by the Independent Auditor of the Entity” as issued by the HKICPA.

A review consists of making enquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion. Based on our review, nothing has come to our attention that causes us to believe that the Interim Financial Information, for the purpose of the accountants’ report, is not prepared, in all material respects, in accordance with the basis of preparation and presentation set out in Note 1 to the Historical Financial Information.

APPENDIX I

ACCOUNTANTS’ REPORT

Report on matters under the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited and the Companies (Winding Up and Miscellaneous Provisions) Ordinance

Adjustments

In preparing the Historical Financial Information, no adjustments to the Underlying Financial Statements as defined on page I-[4] have been made.

Dividends

We refer to Note 23(a) to the Historical Financial Information which states that no dividends have been paid by the Company in respect of the Relevant Period.

APPENDIX I

ACCOUNTANTS’ REPORT

NOTES TO THE HISTORICAL FINANCIAL INFORMATION

(Expressed in RMB unless otherwise indicated)

1 BASIS OF PREPARATION AND PRESENTATION OF THE HISTORICAL FINANCIAL INFORMATION

PrimeGenX Therapeutics Co., Ltd. (the “Company”) was incorporated in Beijing on 26 September 2016. The Company is principally engaged in the research, development and commercialisation of the innovative topical drugs that focus on the immunology and inflammation in the People’s Republic of China (“PRC”).

The statutory financial statements of the Company for year ended 31 December 2024 were prepared in accordance with the Accounting Standards for Business Enterprises issued by the Ministry of Finance of the PRC and were audited by BDO China SHU LUN PAN Certified Public Accountants LLP (立信會計師事務所(特殊普通合伙)).

The Company has adopted 31 December as its financial year end date.

The Historical Financial Information has been prepared in accordance with all applicable IFRS Accounting Standards as issued by the International Accounting Standards Board (“IASB”). Further details of the material accounting policy information are set out in Note 2.

The IASB has issued a number of new and revised IFRS Accounting Standards. For the purpose of preparing the Historical Financial Information, the Company has consistently applied all applicable new and revised IFRS Accounting Standards throughout the Relevant Period, except for any new and revised accounting standards that are not yet effective for the accounting period beginning on 1 January 2025. The revised and new accounting standards issued but not yet effective for the accounting period beginning on 1 January 2025 are set out in Note 27.

The Historical Financial Information also complies with the applicable disclosure provisions of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

The accounting policies set out below have been applied consistently to all periods presented in the Historical Financial Information.

The Interim Financial Information has been prepared in accordance with the same basis of preparation and presentation adopted in respect of the Historical Financial Information.

As majority of the Company’s operations are conducted by the Company in the PRC, the Historical Financial Information and the Interim Financial Information are presented in RMB. All values are rounded to the nearest thousand (RMB’000) except when otherwise indicated.

APPENDIX I

ACCOUNTANTS’ REPORT

2 MATERIAL ACCOUNTING POLICY INFORMATION

(a) Basis of measurement

The measurement basis used in the preparation of the Historical Financial Information is the historical cost basis except for financial assets measured at FVPL are measured at their fair value as explained in Note 15.

(b) Use of estimates and judgements

The preparation of the Historical Financial Information in conformity with IFRS Accounting Standards requires management to make judgements, estimates and assumptions that affect the application of policies and reported amounts of assets, liabilities, income and expenses. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgements about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

Judgements made by management in the application of IFRS Accounting Standards that have significant effect on the Historical Financial Information and major sources of estimation uncertainty are discussed in Note 3.

(c) Investments in securities

The Company’s policies for investments in securities are set out below.

Investments in securities are recognised/derecognised on the date the Company commits to purchase/sell the investment. The investments are initially stated at fair value plus directly attributable transaction costs, except for those investments measured at FVPL for which transaction costs are recognised directly in profit or loss. For an explanation of how the Company determines fair value of financial instruments, see Note 24(e).

Non-equity investments are classified into FVPL, if the investment does not meet the criteria for being measured at amortised cost or fair value through other comprehensive income (“FVOCI”) — recycling. Changes in the fair value of the investment (including interest) are recognised in profit or loss.

APPENDIX I

ACCOUNTANTS’ REPORT

(d) Property and equipment

Property and equipment are stated at cost less accumulated depreciation and any accumulated impairment losses (see Note 2(g)(ii)).

If significant parts of an item of property and equipment have different useful lives, then they are accounted for as separate items (major components).

Any gain or loss on disposal of an item of property and equipment is recognised in profit or loss.

Depreciation is calculated to write off the cost of items of property and equipment less their estimated residual values, if any, using the straight-line method over their estimated useful lives, and is generally recognised in profit or loss.

The estimated useful lives are as follows:

Machinery and equipment	5-10 years
Office equipment and furniture	3-5 years
Leasehold improvements	Shorter of the useful life of 5 years or the lease term

Depreciation methods, useful lives and residual values are reviewed annually and adjusted if appropriate.

(e) Intangible assets

Expenditure on research activities is recognised in profit or loss as incurred. Development expenditure is capitalised only if the expenditure can be measured reliably, the product or process is technically and commercially feasible, future economic benefits are probable and the Company intends to and has sufficient resources to complete development and to use or sell the resulting asset. Otherwise, it is recognised in profit or loss as incurred. Capitalised development expenditure is subsequently measured at cost less accumulated amortisation and any accumulated impairment losses.

Intangible assets, including computer software, that are acquired by the Company and have finite useful lives are measured at cost less accumulated amortisation and any accumulated impairment losses (see Note 2(g)(ii)).

Amortisation is calculated to write off the cost of intangible assets less their estimated residual values using the straight-line method over their estimated useful lives, if any, and is generally recognised in profit or loss.

APPENDIX I

ACCOUNTANTS' REPORT

The estimated useful lives for the Relevant Period are as follows:

Software and others 13 months-10 years

Amortisation methods, useful lives and residual values are reviewed at each reporting date and adjusted if appropriate.

(f) Leased assets

At inception of a contract, the Company assesses whether the contract is, or contains, a lease. This is the case if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. Control is conveyed where the customer has both the right to direct the use of the identified asset and to obtain substantially all of the economic benefits from that use.

As a lessee

Where the contract contains lease component(s) and non-lease component(s), the Company has elected not to separate lease components from non-lease components and allocated the consideration in the contract to each lease component on the basis of the relative stand-alone price.

At the lease commencement date, the Company recognises a right-of-use asset and a lease liability, except for short-term leases that have a lease term of 12 months or less and leases of low-value assets. When the Company enters into a lease in respect of a low-value asset, the Company decides whether to capitalise the lease on a lease-by-lease basis. If not capitalised, the associated lease payment are recognised as an expense on a systematic basis over the lease term.

Where the lease is capitalised, the lease liability is initially recognised at the present value of the lease payments payable over the lease term, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, using a relevant incremental borrowing rate. After initial recognition, the lease liability is measured at amortised cost and interest expense is calculated using the effective interest method. Variable lease payments that do not depend on an index or rate are not included in the measurement of the lease liability and hence are charged to profit or loss in the accounting period in which they are incurred.

The right-of-use asset recognised when a lease is capitalised is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentives received. The right-of-use asset is subsequently stated at cost less accumulated depreciation and impairment losses (see Note 2(d) and 2(g)(ii)).

APPENDIX I

ACCOUNTANTS’ REPORT

The lease liability is remeasured when there is a change in future lease payments arising from a change in an index or rate, or there is a change in the Company’s estimate of the amount expected to be payable under a residual value guarantee, or if the Company changes its assessment of whether it will exercise a purchase, extension or termination option. When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

The lease liability is also remeasured when there is a lease modification, which means a change in the scope of a lease or the consideration for a lease that is not originally provided for in the lease contract, if such modification is not accounted for as a separate lease. In this case, the lease liability is remeasured based on the revised lease payments and lease term using a revised discount rate at the effective date of the modification.

In the statement of financial position, the current portion of long-term lease liabilities is determined as the present value of contractual payments that are due to be settled within twelve months after the reporting period.

(g) Credit losses and impairment of assets

(i) Credit losses from financial instruments

The Company recognises a loss allowance for expected credit losses (“ECLs”) on financial assets measured at amortised cost (including cash and cash equivalents and other receivables).

Measurement of ECLs

ECLs are a probability-weighted estimate of credit losses. Generally, credit losses are measured as the present value of all expected cash shortfalls between the contractual and expected amounts.

The expected cash shortfalls of financial assets measured at amortised cost are discounted using the effective interest rate determined at initial recognition or an approximation thereof if the effect is material.

The maximum period considered when estimating ECLs is the maximum contractual period over which the Company is exposed to credit risk.

ECLs are measured on either of the following bases:

- 12-month ECLs: these are the portion of ECLs that result from default events that are possible within the 12 months after the reporting date (or a shorter period if the expected life of the instrument is less than 12 months); and

APPENDIX I

ACCOUNTANTS’ REPORT

- lifetime ECLs: these are the ECLs that result from all possible default events over the expected lives of the items to which the ECL model applies.

The Company measures loss allowances at an amount equal to lifetime ECLs, except for the following, which are measured at 12-months ECLs:

- financial instruments that are determined to have low credit risk at the reporting date; and
- other financial instruments for which credit risk (i.e. the risk of default occurring over the expected life of the financial instrument) has not increased significantly since initial recognition.

Loss allowances for trade receivables are always measured at an amount equal to lifetime ECLs.

Significant increases in credit risk

When determining whether the credit risk of a financial instrument has increased significantly since initial recognition and when measuring ECLs, the Company considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Company’s historical experience and informed credit assessment, that includes forward-looking information.

The Company assumes that the credit risk on a financial asset has increased significantly if it is past the contractual due date.

ECLs are remeasured at each reporting date to reflect changes in the financial instrument’s credit risk since initial recognition. Any change in the ECL amount is recognised as an impairment gain or loss in profit or loss. The Company recognises an impairment gain or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

Credit-impaired financial assets

At each reporting date, the Company assesses whether a financial asset is credit-impaired. A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

APPENDIX I

ACCOUNTANTS’ REPORT

Evidence that a financial asset is credit-impaired includes the following observable events:

- significant financial difficulties of the debtor;
- a breach of contract, such as a default or being more than 90 days past due;
- the restructuring of a loan or advance by the Company on terms that the Company would not consider otherwise;
- it is probable that the debtor will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for a security because of financial difficulties of the issuer.

Write-off policy

The gross carrying amount of a financial asset is written off to the extent that there is no realistic prospect of recovery. This is generally the case when the Company determines that the debtor does not have assets or sources of income that could generate sufficient cash flows to repay the amounts subject to the write-off.

Subsequent recoveries of an asset that was previously written off are recognised as a reversal of impairment in profit or loss in the period in which the recovery occurs.

(ii) Impairment of other non-current assets

At each reporting date, the Company reviews the carrying amounts of its non-financial assets to determine whether there is any indication of impairment. If any such indication exists, then the asset’s recoverable amount is estimated.

For impairment testing, assets are grouped together into the smallest group of assets that generates cash inflows from continuing use that are largely independent of the cash inflows of other assets or cash-generating units (“CGUs”).

The recoverable amount of an asset or CGU is the greater of its value in use and its fair value less costs of disposal. Value in use is based on the estimated future cash flows, discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset or CGU.

An impairment loss is recognised if the carrying amount of an asset or CGU exceeds its recoverable amount.

APPENDIX I

ACCOUNTANTS’ REPORT

Impairment losses are recognised in profit or loss. They are allocated to reduce the carrying amounts of the assets in the CGU on a pro rata basis.

An impairment loss is reversed only to the extent that the resulting carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

(h) Receivables

A receivable is recognised when the Company has an unconditional right to receive consideration and only the passage of time is required before payment of that consideration is due.

All receivables are stated at amortised cost.

(i) Cash and cash equivalents

Cash and cash equivalents comprise cash at bank and on hand, deposits with banks and other financial institutions and other short-term, highly liquid investments that are readily convertible into known amounts of cash and which are subject to an insignificant risk of changes in value, having been within three months of maturity at acquisition. Cash and cash equivalents are assessed for ECL (see Note 2(g)(i)).

(j) Trade and other payables

Trade and other payables are initially recognised at fair value. Subsequent to initial recognition, trade and other payables are stated at amortised cost unless the effect of discounting would be immaterial, in which case they are stated at invoice amounts.

(k) Interest-bearing borrowings

Interest-bearing borrowings are measured initially at fair value less transaction costs. Subsequently, these borrowings are stated at amortised cost using the effective interest method. Interest expense is recognised in accordance with Note 2(p).

(l) Employee benefits

(i) Short term employee benefits and contributions to defined contribution retirement plans

Short-term employee benefits are expensed as the related service is provided. A liability is recognised for the amount expected to be paid if the Company has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

APPENDIX I

ACCOUNTANTS’ REPORT

Obligations for contributions to defined contribution retirement plans are expensed as the related service is provided.

(ii) Share-based payments

For equity settled share-based payment transactions, the fair value of the services received is recognised as an expense with a corresponding increase in equity over the vesting period during which the employees become unconditionally entitled to the equity instrument. The fair value of the services received is determined by reference to the fair value of the equity instrument granted at the date of the grant.

(iii) Termination benefits

Termination benefits are expensed at the earlier of when the Company can no longer withdraw the offer of those benefits and when the Company recognises costs for a restructuring.

(m) Income tax

Income tax expense comprises current tax and deferred tax. It is recognised in profit or loss except to the extent that it relates to items recognised directly in equity or in other comprehensive income.

Current tax comprises the estimated tax payable or receivable on the taxable income or loss for the year and any adjustments to the tax payable or receivable in respect of previous years. The amount of current tax payable or receivable is the best estimate of the tax amount expected to be paid or received that reflects any uncertainty related to income taxes. It is measured using tax rates enacted or substantively enacted at the reporting date. Current tax also includes any tax arising from dividends.

Current tax assets and liabilities are offset only if certain criteria are met.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes.

Deferred tax assets are recognised for unused tax losses, unused tax credits and deductible temporary differences to the extent that it is probable that future taxable profits will be available against which they can be used. Future taxable profits are determined based on the reversal of relevant taxable temporary differences. If the amount of taxable temporary differences is insufficient to recognise a deferred tax asset in full, then future taxable profits, adjusted for reversals of existing temporary differences, are considered, based on the business plans for the Company. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realised; such reductions are reversed when the probability of future taxable profits improves.

APPENDIX I

ACCOUNTANTS' REPORT

The measurement of deferred tax reflects the tax consequences that would follow from the manner in which the Company expects, at the reporting date, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset only if certain criteria are met.

(n) Provisions and contingent liabilities

Generally provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessment of the time value of money and the risks specific to the liability.

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Possible obligations, whose existence will only be confirmed by the occurrence or non-occurrence of one or more future events are also disclosed as contingent liabilities unless the probability of outflow of economic benefits is remote.

Where some or all of the expenditure required to settle a provision is expected to be reimbursed by another party, a separate asset is recognised for any expected reimbursement that would be virtually certain. The amount recognised for the reimbursement is limited to the carrying amount of the provision.

(o) Revenue and other income

Income is classified by the Company as revenue when it arises from the sale of goods in the ordinary course of the Company's business.

Revenue is recognised when control over a product or service is transferred to the customer, at the amount of promised consideration to which the Company is expected to be entitled, excluding those amounts collected on behalf of third parties. Revenue excludes value added tax or other sales taxes and is after deduction of any trade discounts.

During the Relevant Period, the Company did not generate any revenue from its business.

Details of the other income's recognition policies are as follows:

(i) Interest income

Interest income is recognised as it accrues under the effective interest method using the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the gross carrying amount of the financial asset.

APPENDIX I

ACCOUNTANTS' REPORT

(ii) Government grants

Government grants are recognised in the statement of financial position initially when there is reasonable assurance that they will be received and that the Company will comply with the conditions attaching to them. Grants that compensate the Company for expenses incurred are recognised as income in profit or loss on a systematic basis in the same periods in which the expenses are incurred. Grants that compensate the Company for the cost of an asset are recognised in profit or loss over the useful life of the asset.

(p) Borrowing costs

Borrowing costs that are directly attributable to the acquisition, construction or production of an asset which necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of that asset. Other borrowing costs are expensed in the period in which they are incurred.

(q) Related parties

(a) A person, or a close member of that person's family, is related to the Company if that person:

- (i) has control or joint control over the Company;
- (ii) has significant influence over the Company; or
- (iii) is a member of the key management personnel of the Company or the Company's parent.

(b) An entity is related to the Company if any of the following conditions applies:

- (i) The entity and the Company are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others).
- (ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member).
- (iii) Both entities are joint ventures of the same third party.
- (iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity.
- (v) The entity is a post-employment benefit plan for the benefit of employees of either the Company or an entity related to the Company.
- (vi) The entity is controlled or jointly controlled by a person identified in (a).

APPENDIX I

ACCOUNTANTS’ REPORT

(vii) A person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity).

(viii) The entity, or any member of a group of which it is a part, provides key management personnel services to the Company or to the Company’s parent.

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity.

(r) Segment reporting

Operating segments, and the amounts of each segment item reported in the financial statements, are identified from the financial information provided regularly to the Company’s most senior executive management for the purposes of allocating resources to, and assessing the performance of, the Company’s various lines of business and geographical locations.

The Company manages its businesses as a whole by the most senior executive management for the purposes of resource allocation and performance assessment. The executive directors, being the Company’s chief operating decision maker, review the Company’s results when making decisions about allocating resources and assessing performance of the Company and determine that the Company has only one operating and reportable segment. Accordingly, no further analysis of this single segment is presented.

All of the Company’s non-current assets are located in the PRC.

3 ACCOUNTING JUDGEMENT AND ESTIMATES

Note 21 contains information about the assumptions relating to fair value of restricted shares under share incentive scheme. Other significant sources of estimation uncertainty are as follows:

Research and development expenses

Development expenses incurred on the Company’s pipeline are capitalised and deferred only when the Company can demonstrate the technical feasibility of completing the intangible asset so that it will be available for use or sale, the Company’s intention to complete and the Company’s ability to use or sell the asset, how the asset will generate future economic benefits, the availability of resources to complete the pipeline and the ability to measure reliably the expenditure during the development. Development expense which do not meet these criteria are expensed when incurred. Management will assess the progress of each of the research and development projects and determine the criteria met for capitalisation. All development expenses were expensed when incurred during the Relevant Period.

APPENDIX I

ACCOUNTANTS’ REPORT

4 OTHER NET INCOME

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025
	RMB'000	RMB'000 (unaudited)	RMB'000 (unaudited)
Government grants	9,938	44	618
Fair value changes of financial assets measured at FVPL	811	497	107
Interest income	429	281	318
Others	42	(3)	115
	<u>11,220</u>	<u>819</u>	<u>1,158</u>

5 LOSS BEFORE TAXATION

Loss before taxation is arrived at after charging:

(a) Finance costs

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025
	RMB'000	RMB'000 (unaudited)	RMB'000 (unaudited)
Interest on bank loans (<i>Note 16(b)</i>)	2,464	1,816	1,535
Interest on lease liabilities (<i>Note 16(b)</i>)	120	92	178
	<u>2,584</u>	<u>1,908</u>	<u>1,713</u>

APPENDIX I

ACCOUNTANTS’ REPORT

(b) Staff costs

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025
	RMB'000	RMB'000 (unaudited)	RMB'000 (unaudited)
Salaries, wages and other benefits	56,191	41,829	37,215
Contributions to defined contribution retirement plan (i)	4,550	3,426	3,247
Equity-settled share-based payment expenses (Note 21)	15,779	9,170	15,822
	<u>76,520</u>	<u>54,425</u>	<u>56,284</u>

- (i) Employees of the Company in the PRC are required to participate in a defined contribution retirement scheme administered and operated by the local municipal government. The Company in the PRC contribute funds which are calculated on certain percentages of the average employee salary as agreed by the local municipal government to the scheme to fund the retirement benefits of the employees.

(c) Other items

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025
	RMB'000	RMB'000 (unaudited)	RMB'000 (unaudited)
Depreciation charge			
– owned property and equipment (Note 10)	1,741	1,356	952
– right-of-use assets (Note 11)	1,946	1,439	2,105
	<u>3,687</u>	<u>2,795</u>	<u>3,057</u>
Amortisation cost of intangible assets (Note 12)	675	319	1,167
Auditor’s remuneration			
– audit service	300	225	225
Research and development expenses			
(i)	146,207	103,232	97,074

- (i) During the year ended 31 December 2024 and nine months ended 30 September 2024 and 2025, research and development expenses include staff costs, depreciation and amortisation expenses of RMB50,880,000, RMB36,878,000 and RMB41,080,000 respectively, in which the respective amounts are also disclosed separately above or in note 5(b) for each of these types of expenses.

APPENDIX I

ACCOUNTANTS’ REPORT

6 INCOME TAX IN THE STATEMENTS OF PROFIT OR LOSS AND OTHER COMPREHENSIVE INCOME

Reconciliation between tax expense and accounting loss at applicable tax rates:

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025

	–	6,482	–	298	6,780	5,285	12,065

- (i) In January 2025, Mr. Xiao Qiangfu and Mr. Cui Yuan resigned as executive directors and Mr. Wang Yunhai was appointed as executive director.
- (ii) On 24 January 2025, the Company appointed Mr. Zhang Qing, Mr. Na Shuai and Mr. Hu Wei as independent non-executive directors of the Company.
- (iii) In January 2025, Ms. Zhang Hui resigned as supervisor and Mr. Xiao Qiangfu was appointed as supervisor.
- (iv) The Company abolished the supervisor committee in November 2025.

During the Relevant Period, no director or supervisor has waived or agreed to waive any emoluments and no amounts were paid or payable by the Company to the directors and the supervisors as an inducement to join or upon joining the Company or as compensation for loss of any office in connection with the management of the affairs of any member of the Company.

8 INDIVIDUALS WITH HIGHEST EMOLUMENTS

During the Relevant Period, of the five individuals with the highest emoluments, two, two and two are directors of the Company for the year ended 31 December 2024 and the nine months ended 30 September 2024 and 2025, respectively, whose emoluments are disclosed in Note 7.

APPENDIX I

ACCOUNTANTS’ REPORT

The aggregate of the emoluments in respect of the remaining individuals are as follows:

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025
	RMB'000	RMB'000	RMB'000
		(unaudited)	(unaudited)
Salaries and other emoluments	4,613	3,691	2,591
Retirement scheme contributions	171	143	102
Share-based payments	1,666	714	3,029
	<u>6,450</u>	<u>4,548</u>	<u>5,722</u>

The emoluments of the remaining individuals with the highest emoluments are within the following bands:

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025
	Number of individuals	Number of individuals	Number of individuals
		(unaudited)	(unaudited)
HKD1,500,001 to HKD2,000,000	–	3	1
HKD2,000,001 to HKD2,500,000	2	–	2
HKD2,500,001 to HKD3,000,000	1	–	–
	<u>3</u>	<u>3</u>	<u>3</u>

During the Relevant Period, no amounts were paid or payable by the Company to the above non-director highest paid individuals as an inducement to join or upon joining the Company or as compensation for loss of any office in connection with the management of the affairs of any member of the Company.

9 LOSS PER SHARE

(a) Basic loss per share

The calculation of basic loss per share is based on the loss for the year/period attributable to ordinary equity shareholders of the Company and the weighted average number of ordinary shares in issue during the respective year/period.

The weighted average number of ordinary shares throughout the periods presented has been adjusted retrospectively for the impact of the share subdivision in January 2026 (see Note 23(b)).

APPENDIX I

ACCOUNTANTS’ REPORT

Loss attributable to ordinary equity shareholders of the Company:

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025
	RMB'000	RMB'000	RMB'000
		(unaudited)	(unaudited)

Loss for the year/period attributable to ordinary equity shareholders of the Company	(178,496)	(132,625)	(124,976)

Weighted average number of ordinary shares:

	As at 31 December	As at 30 September	
	2024	2024	2025
	'000	'000	'000
		(unaudited)	(unaudited)
Issued ordinary shares at 1 January . . .	84,596	84,596	96,085
Effect of shares issued (<i>Note 23(b)</i>) . . .	3,103	2,364	–
Effect of share subdivision (<i>Note 23(b)</i>)	87,699	86,960	96,085
Weighted average number of ordinary shares at 31 December/30 September	<u>175,398</u>	<u>173,920</u>	<u>192,170</u>

(b) Diluted loss per share

There were no dilutive potential ordinary shares for the year ended 31 December 2024 and the nine months ended 30 September 2024 and 2025, therefore diluted loss per share were the same as basic loss per share for the respective year/period.

Net book value:			
At 31 December 2024	<u>962</u>	<u>612</u>	<u>1,574</u>
At 30 September 2025 (unaudited)	<u>15,872</u>	<u>564</u>	<u>16,436</u>

The right-of-use assets mainly represent the properties leased for own use. The leases typically run for an initial period of 3 to 5 years.

APPENDIX I

ACCOUNTANTS’ REPORT

The analysis of expense items in relation to leases recognised in the Company’s profit or loss are as follows:

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025
	RMB'000	RMB'000 (unaudited)	RMB'000 (unaudited)
Depreciation charge of right-of-use			
assets (Note 5(c))	1,946	1,439	2,105
Interest on lease liabilities (Note 5(a)) .	120	92	178
Expense relating to short-term leases . .	455	307	212

Note: Details of total cash outflow for leases and the maturity analysis of lease liabilities are set out in Notes 16(b) and 24(b), respectively.

12 INTANGIBLE ASSETS

	Software and others
	RMB'000
Cost:	
At 1 January 2024	848
Additions	1,870
At 31 December 2024 and 1 January 2025	2,718
Additions	87
At 30 September 2025 (unaudited)	2,805
Accumulated amortisation:	
At 1 January 2024	(220)
Charge for the year	(675)
At 31 December 2024 and 1 January 2025	(895)
Charge for the period	(1,167)
At 30 September 2025 (unaudited)	(2,062)
Net book value:	
At 31 December 2024	1,823
At 30 September 2025 (unaudited)	743

APPENDIX I

ACCOUNTANTS’ REPORT

13 OTHER NON-CURRENT ASSETS

	As at 31 December	As at 30 September
	2024	2025
	RMB'000	RMB'000 (unaudited)
Value-added tax recoverable	<u>11,274</u>	<u>14,014</u>

- (i) As at 31 December 2024 and 30 September 2025, value-added tax recoverable amounting to RMB11,274,000 and RMB14,014,000, respectively were recognised as other non-current assets as they are expected to be deducted from future value-added tax payables arising on the Company’s revenue which are not expected to be generated within the next 12 months from the end of each of the reporting period.

14 PREPAYMENTS AND OTHER RECEIVABLES

	As at 31 December	As at 30 September
	2024	2025
	RMB'000	RMB'000 (unaudited)
Prepayments for contract research organisation services	5,441	3,340
Prepayments for raw materials	2,205	2,074
Rental deposits	1,563	1,353
Others	<u>3</u>	<u>—</u>
	9,212	6,767
Less: loss allowance	<u>(714)</u>	<u>(124)</u>
Total	<u>8,498</u>	<u>6,643</u>

All of the prepayments and other receivables are expected to be recovered or recognised as expense within one year.

APPENDIX I

ACCOUNTANTS’ REPORT

15 FINANCIAL ASSETS MEASURED AT FAIR VALUE THROUGH PROFIT OR LOSS

	As at 31 December	As at 30 September
	2024	2025
	RMB'000	RMB'000 (unaudited)
Structured deposits	50,186	—

Financial assets measured at fair value through profit or loss represent structured deposits purchased from banks in the PRC with variable interest, which will mature within one year as of 31 December 2024.

16 CASH AND CASH EQUIVALENTS AND OTHER CASH FLOW INFORMATION

(a) Cash and cash equivalents comprise

	As at 31 December	As at 30 September
	2024	2025
	RMB'000	RMB'000 (unaudited)
Cash at banks	189,653	154,776

APPENDIX I

ACCOUNTANTS’ REPORT

(b) Reconciliation of liabilities arising from financing activities

The table below details changes in the Company’s liabilities from financing activities, including both cash and non-cash changes. Liabilities arising from financing activities are liabilities for which cash flows were, or future cash flows will be, classified in the Company’s cash flow statements as cash flows from financing activities.

	Bank loans	Lease liabilities	Total
	<i>RMB'000</i>	<i>RMB'000</i>	<i>RMB'000</i>
	<i>(Note 18)</i>	<i>(Note 19)</i>	
At 1 January 2024	33,596	3,083	36,679

APPENDIX I

ACCOUNTANTS’ REPORT

17 TRADE AND OTHER PAYABLES

	As at 31 December	As at 30 September
	2024	2025
	RMB'000	RMB'000 (unaudited)
Payables for research and development costs	17,378	21,960
Government grants (i)	–	17,513
Payables for staff related costs	7,155	5,695
Payables for other taxes	1,052	934
Others	2,256	2,569
	<u>27,841</u>	<u>48,671</u>

(i) The amount represents government grants received but have not met the conditions attached to the grants.

At the end of each reporting period, the ageing analysis of the payables for research and development costs based on the date of purchase is as follows:

	As at 31 December	As at 30 September
	2024	2025
	RMB'000	RMB'000 (unaudited)
Within 6 months	16,941	15,685
Over 6 months and within 1 year	342	4,478
Over 1 year	95	1,797
	<u>17,378</u>	<u>21,960</u>

The trade and other payables are expected to be settled within one year or are payable on demand.

APPENDIX I

ACCOUNTANTS’ REPORT

18 BANK LOANS

	As at 31 December	As at 30 September
	2024	2025
	RMB'000	RMB'000 (unaudited)
Bank loans	<u>82,000</u>	<u>79,990</u>

The bank loans are unsecured and unguaranteed. The bank loans bear interest rates ranging from 3.15% to 4.1% per annum as at 31 December 2024 and 2.4%-3.2% per annum as at 30 September 2025.

The analysis of the repayment schedule of bank loans is as follows:

	As at 31 December	As at 30 September
	2024	2025
	RMB'000	RMB'000 (unaudited)
Within 1 year or on demand	82,000	40,990
After 1 year but within 2 years	<u>—</u>	<u>39,000</u>
Total	<u>82,000</u>	<u>79,990</u>

Included in the current portion of bank loans as at 30 September 2025, bank loan with carrying amount RMB20,000,000 was reclassified to repayable on demand because the Company did not comply with a liabilities-to-assets financial ratio covenant required by the bank. Such bank loan was early repaid in January 2026 subsequently.

APPENDIX I

ACCOUNTANTS’ REPORT

19 LEASE LIABILITIES

At the end of each reporting period, the lease liabilities were repayable as follows:

	As at 31 December	As at 30 September
	2024	2025
	<i>RMB’000</i>	<i>RMB’000</i> (<i>unaudited</i>)
Within 1 year	1,097	4,145
After 1 year but within 2 years	284	3,499
After 2 years but within 5 years	142	9,587
	<u>426</u>	<u>13,086</u>
	<u>1,523</u>	<u>17,231</u>

20 DEFERRED INCOME

	As at 31 December	As at 30 September
	2024	2025
	<i>RMB’000</i>	<i>RMB’000</i> (<i>unaudited</i>)
Government grants	—	5,000
	<u>—</u>	<u>5,000</u>

Deferred income represents government grant received In September 2025 to subsidise the subsequent clinical study expenses of an innovative product pipeline, which would be recognised in “Other net income” in the periods when the related expenses incurred.

21 EQUITY SETTLED SHARE-BASED PAYMENTS

(a) 2019 Share Incentive Arrangement

In July 2019, as initiated by the shareholders, RMB3,000,000 paid-in-capital held by Chifeng Qingxi Enterprise Management Center (Limited Partnership) (“Chifeng Qingxi”) was granted to two eligible employees (the “Participants of 2019”) at the price of RMB1 per unit paid-in-capital. The granted shares are subject to the service condition that the Participants of 2019 are obliged to service in the Company for not less than 5 years. One of the Participants of 2019 resigned from the Company in October 2021, and the restricted shares granted to him had been forfeited accordingly.

APPENDIX I

ACCOUNTANTS’ REPORT

In March 2022, the Company had agreed with the remaining Participant of 2019 to modify and extend the vesting period. After the modification, the Participant of 2019 was subject to the service condition that the granted shares should be vested upon the expiration of a 36-month period following the Company’s [REDACTED]. This modification was ignored as it is not beneficial to the employee and the Company continues to recognise the services received measured at the grant date fair value of the shares granted.

(b) 2021 Share Incentive Scheme

In December 2021, the Board of Directors approved a share incentive scheme (“2021 Share Incentive Scheme”), pursuant to which in March 2022, (i) RMB2,939,723 paid-in capital held by Chifeng Mingquan Enterprise Management Center (Limited Partnership) (“Chifeng Mingquan”) were granted to eligible directors and employees of the Company at a price of RMB1.5 per unit paid-in capital; and (ii) RMB7,775,000 paid-in capital through Chifeng Qingxi were granted to eligible directors and employees of the Company at a price of RMB1.2 per unit paid-in capital. The 2021 Share Incentive Scheme is subject to service condition that the granted shares should be vested upon the expiration of a 36-month period following the Company’s [REDACTED].

In June 2024, also pursuant to the 2021 Share Incentive Scheme, 450,000 shares held by Chifeng Qingxi and 3,000,000 shares held by Chifeng Mingquan were granted to eligible employees of the Company at a price of RMB4.0 per share, and also subject to the service condition that the granted shares should be vested upon the expiration of a 36-month period following the Company’s [REDACTED].

(c) Subsequent modification

In January 2026, upon the approval by the shareholders’ meeting, the service condition of 2021 Share Incentive Scheme was modified to be vested upon the expiration of a 12-month period following the Company’s [REDACTED]. As the modification reduced the vesting period that is beneficial to the employees, the Company uses the modified vesting period when applying the requirements of the modified grant-date method.

(d) Forfeited restricted shares

Nil and 260,088 shares granted under the above-mentioned share incentives were forfeited due to the resignation of several employees for the year ended 31 December 2024 and the nine months ended 30 September 2025 respectively.

APPENDIX I

ACCOUNTANTS’ REPORT

(e) Fair value and assumptions

2019 Share Incentive Arrangement

The fair value of services received in return for restricted shares granted was measured by reference to the fair value of restricted shares granted and the subscription price should be paid by the two eligible employees. The fair value of the restricted shares granted is measured at the grant date referring to the equity value assessed by the independent appraiser, Beijing Zhongtianhua Asset Appraisal Co., Ltd. based on asset-based approach considering the discounted cash flow of the underlying assets. Such fair value at measurement date was RMB1.83 per share. Best estimates of key assumptions are required to be determined by management. Key assumptions used in determining the fair value of restricted shares granted are as follows:

	As at 30 June
	2019
Probability of success	13.12%-16.40%
Weighted average cost of capital (“WACC”)	16.01%

2021 Share Incentive Scheme

The fair value of services received in return for restricted shares granted was measured by reference to the fair value of restricted shares granted and the subscription price paid by the eligible directors and employees. The fair value of the restricted shares granted is measured at the grant date referring to the [REDACTED] by the independent [REDACTED]. Such fair value at measurement date was RMB15.67 per share in March 2022 and RMB18.8 per share in June 2024.

(f) Equity-settled share-based payment expenses recognised in the profit or loss during the Relevant Period:

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025
	RMB'000	RMB'000	RMB'000
		(unaudited)	(unaudited)
Research and development expenses . . .	4,936	2,765	10,787
General and administrative expenses . . .	10,843	6,405	5,035
	<u>15,779</u>	<u>9,170</u>	<u>15,822</u>

APPENDIX I

ACCOUNTANTS’ REPORT

22 INCOME TAX IN THE STATEMENTS OF FINANCIAL POSITION

Deferred tax assets not recognised

In accordance with the accounting policy set out in Note 2(m), the Company has not recognised deferred tax assets in respect of cumulative tax losses of RMB789,878,000 and RMB966,515,000 as at 31 December 2024 and 30 September 2025, respectively, as it is not probable that future taxable profits against which the losses can be utilised will be available in the relevant tax jurisdiction. The unrecognised tax losses will be expired as follows:

	As at 31 December	As at 30 September
	2024	2025
	RMB’000	RMB’000 (unaudited)
2026	1,010	1,010
2027	4,702	4,702
2028	18,044	18,044
2029	29,615	29,615
2030	35,758	35,758
2031	81,490	81,490
2032	142,002	142,002
2033	201,319	201,319
2034	275,938	275,938
2035	—	176,637
	<u>789,878</u>	<u>966,515</u>

23 CAPITAL AND RESERVES

(a) Dividends

The directors of the Company did not propose the payment of any dividend during the Relevant Period.

APPENDIX I

ACCOUNTANTS’ REPORT

(b) Share capital

Issued ordinary shares

	Number of ordinary shares	Amount
	‘000	RMB’000
Issued and fully paid:		
At 1 January 2024	84,596	84,596
Issue of new shares	<u>11,489</u>	<u>11,489</u>
At 31 December 2024 and 30 September 2025 (unaudited)	<u>96,085</u>	<u>96,085</u>

The Company has undertaken several rounds of [REDACTED]. In connection with the [REDACTED], certain [REDACTED] had been granted certain special rights against the controlling shareholder including anti-dilution rights and redemption rights, among others. The directors of the Company have confirmed that (i) the Company does not have any obligation to fulfil the abovementioned special rights granted by the controlling shareholder, including the redemption rights; and (ii) the Company has not provided any guarantee for the abovementioned special rights granted by the controlling shareholder in the event of a default by the controlling shareholder. Accordingly, no financial liability has been recorded in the Historical Financial Information with respect to these special rights granted to the [REDACTED] by the controlling shareholder.

In January 2026, the Company’s shareholders resolved to conduct the share subdivision pursuant to which each authorised issued share of nominal value of RMB1.00 each was subdivided into two shares of nominal value of RMB0.50 each.

(c) Nature and purpose of reserves

(i) Capital reserve

Capital reserve mainly comprises the capital contributions made by shareholders.

(ii) Other reserve

Other reserve mainly comprises the portion of the grant date fair value of restricted shares granted to the directors and employees of the Company that has been recognised in accordance with the accounting policy adopted for share-based payments in Note 2(1)(ii).

APPENDIX I

ACCOUNTANTS’ REPORT

(d) Capital management

The Company’s primary objectives when managing capital are to safeguard the Company’s ability to continue as a going concern, so that it can continue to provide returns for shareholders and benefits for other stakeholders, with the level of risk and by securing access to finance at a reasonable cost.

The Company actively and regularly reviews and manages its capital structure to maintain a balance between the higher shareholder returns that might be possible with higher levels of borrowings and the advantages and security afforded by a sound capital position, and makes adjustments to the capital structure in light of changes in economic conditions.

The Company was subject to a loan covenant imposed by a bank to maintain certain liabilities-to-assets ratio. As at 30 September 2025, bank loan with carrying amount RMB20,000,000 was reclassified to repayable on demand because the Company did not comply with certain financial covenant required by the bank. Such bank loan was early repaid in January 2026 subsequently.

24 FINANCIAL RISK MANAGEMENT AND FAIR VALUES OF FINANCIAL INSTRUMENTS

Exposure to credit, liquidity, interest rate and currency risks arises in the normal course of the Company’s business.

The Company’s exposure to these risks and the financial risk management policies and practices used by the Company to manage these risks are described below.

(a) Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in a financial loss to the Company. The Company’s credit risk is primarily attributable to prepayment and other receivables. The Company’s exposure to credit risk arising from cash and cash equivalents and financial assets measured at FVPL is limited because the counterparties are reputable banks, which the Company considers to have low credit risks. Management has a credit policy in place and the exposure to credit risk is monitored on an ongoing basis.

Management has assessed that during the Relevant Period, other receivables have not had a significant increase in credit risk since initial recognition. Thus, a 12-month expected credit loss approach that results from possible default event within 12 months of each reporting date is adopted by management. The Company recognised loss allowance of RMB172,000, RMB93,000 and a reversal of allowance of RMB590,000 on other receivables for the year ended 31 December 2024 and the nine months ended 30 September 2024 and 2025, respectively.

APPENDIX I

ACCOUNTANTS’ REPORT

(b) Liquidity risk

The Company’s policy is to regularly monitor its liquidity requirements to ensure that it maintains sufficient reserves of cash to meet its liquidity requirements in the short and longer term.

The following tables show the remaining contractual maturities at the end of each reporting period of the Company’s non-derivative financial liabilities, which are based on contractual undiscounted cash flows (including interest payments computed using contractual rates or, if floating, based on rates current at the end of each reporting period) and the earliest dates the Company can be required to pay:

As at 31 December 2024					
Contractual undiscounted cash flow					
	Within 1 year or on demand	More than 1 year but less than 2 years	More than 2 years but less than 5 years	Total	Carrying amount
	RMB'000	RMB'000	RMB'000	RMB'000	RMB'000
Bank loans (<i>Note</i>					
18)	83,317	–	–	83,317	82,000
Trade and other					
payables	19,634	–	–	19,634	19,634
Amount due to a					
related party (<i>Note</i>					
26)	2,364	–	–	2,364	2,364
Lease liabilities (<i>Note</i>					
19)	1,210	328	162	1,700	1,523
	<u>106,525</u>	<u>328</u>	<u>162</u>	<u>107,015</u>	<u>105,521</u>

APPENDIX I

ACCOUNTANTS’ REPORT

As at 30 September 2025 (unaudited)					
Contractual undiscounted cash flow					
	Within 1 year or on demand	More than 1 year but less than 2 years	More than 2 years but less than 5 years	Total	Carrying amount
	RMB'000	RMB'000	RMB'000	RMB'000	RMB'000
Bank loans (<i>Note</i>					
18)	42,672	39,770	–	82,442	79,990
Trade and other					
payables	24,529	–	–	24,529	24,529
Amount due to a					
related party (<i>Note</i>					
26)	1,151	–	–	1,151	1,151
Lease liabilities (<i>Note</i>					
19)	4,720	3,846	10,004	18,570	17,231
	<u>73,072</u>	<u>43,616</u>	<u>10,004</u>	<u>126,692</u>	<u>122,901</u>

(c) Interest rate risk

The Company’s interest rate risk arises primarily from bank loans. The Company consistently monitors the current and potential fluctuation of interest rates in managing the interest rate risk on a reasonable level. As the end of each reporting date, the Company did not have any bank loans at variable rates (see Note 18 for details of the loans). Cash flow interest rate risk in relation to bank balances is considered insignificant. Interest rate risk is managed by the management of the Company on an ongoing basis with the primary objective of limiting the extent to which interest expense could be affected by adverse movement in interest rates.

Since the Company has no loans with variable interest rates at the end of each reporting date, no sensitivity analysis about interest rates risk is prepared.

(d) Currency risk

The Company is not exposed to currency risk as all its cash and bank balances and transactions are denominated in RMB.

APPENDIX I

ACCOUNTANTS’ REPORT

(e) Fair values measurement

(i) *Financial assets measured at fair value*

Fair value hierarchy

The fair value of the Company’s financial instruments are measured at the end of each reporting period on a recurring basis, categorised into the three-level fair value hierarchy as defined in IFRS13, *Fair value measurement*. The level into which a fair value measurement is classified is determined with reference to the observability and significance of the inputs used in the valuation technique as follows:

- Level 1 valuations: Fair value measured using only Level 1 inputs, i.e. unadjusted quoted prices in active markets for identical assets or liabilities at the measurement date.
- Level 2 valuations: Fair value measured using Level 2 inputs, i.e. observable inputs which fail to meet Level 1, and not using significant unobservable inputs. Unobservable inputs are inputs for which market data are not available.
- Level 3 valuations: Fair value measured using significant unobservable inputs.

The fair value measurement of structured deposits falls into level 2 of the fair value hierarchy.

The fair value of structured deposits is estimated based on the amount that the Company would receive at the end of the reporting period, taking into account current market interest rates of structured deposits with similar risk profile.

During the Relevant Period, there were no transfers between Level 1 and Level 2, or transfers into or out of Level 3. The Company’s policy is to recognise transfers between levels of fair value hierarchy as at the end of each reporting period in which they occur.

(ii) *Fair values of financial assets and liabilities carried at other than fair value*

The carrying amounts of the Company’s financial instruments carried at amortised cost are not materially different from their fair values at the end of each reporting period.

25 COMMITMENTS

As at 31 December 2024, the Company was committed to enter into a new lease of 5 years that is not yet commenced, the lease payments under which amounted to RMB3,482,000 per annum. This new lease commenced on 1 July 2025.

As at 30 September 2025, the Company did not have any material commitments.

APPENDIX I

ACCOUNTANTS’ REPORT

26 MATERIAL RELATED PARTY TRANSACTIONS AND BALANCES

(a) **Name and relationship of the related party that had material transactions with the Company**

<u>Names of related party</u>	<u>Relationship</u>
Chifeng Saliont Pharmaceutical Co., Ltd..	Controlled by the controlling shareholder of the Company

(b) **Transactions with related party**

	<u>Year ended 31 December</u>	<u>Nine months ended 30 September</u>	
	<u>2024</u>	<u>2024</u>	<u>2025</u>
	<i>RMB'000</i>	<i>RMB'000</i> (<i>unaudited</i>)	<i>RMB'000</i> (<i>unaudited</i>)
Purchase of contract manufacturing organisation services	11,596	6,556	4,801

(c) **Balances with related party**

The Company’s balances with the related party as at the end of each reporting period are as follows:

	<u>As at 31 December</u>	<u>As at 30 September</u>
	<u>2024</u>	<u>2025</u>
	<i>RMB'000</i>	<i>RMB'000</i> (<i>unaudited</i>)
Amount due to a related party (trade in nature) . .	2,364	1,151

The amount due to a related party is unsecured, interest-free and repayable on demand.

APPENDIX I

ACCOUNTANTS’ REPORT

(d) Key management personnel remuneration

Remuneration for key management personnel of the Company, including amounts paid to the Company’s directors as disclosed in Note 7 and certain of the highest paid employees as disclosed in Note 8 is as follows:

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025
	RMB’000	RMB’000	RMB’000
		(unaudited)	(unaudited)
Salaries and other emoluments	7,638	5,730	6,451
Retirement scheme contributions	269	202	204
Share-based payments	8,354	5,125	9,401
	<u>16,261</u>	<u>11,057</u>	<u>16,056</u>

Total remuneration is included in “staff costs” in Note 5(b).

27 POSSIBLE IMPACT OF AMENDMENTS, NEW STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET EFFECTIVE FOR THE ACCOUNTING PERIOD BEGINNING ON 1 JANUARY 2025

Up to the date of issue of this report, the IASB has issued a number of new or amended standards, which are not yet effective for the accounting period beginning on 1 January 2025 and which have not been adopted in the Historical Financial Information. These developments include the following:

	Effective for accounting periods beginning on or after
Amendments to IFRS9 and IFRS 7, <i>Contracts Referencing</i> <i>Nature-dependent Electricity</i>	1 January 2026
Amendments to IFRS 9 and IFRS 7, <i>Amendments to the</i> <i>Classification and Measurement of Financial Instruments</i>	1 January 2026
Annual Improvements to IFRS Accounting Standards – Volume 11	1 January 2026
IFRS 18, <i>Presentation and Disclosure in Financial Statements</i> . . .	1 January 2027
IFRS 19, <i>Subsidiaries without Public Accountability:</i> <i>Disclosures</i>	1 January 2027
Amendments to IFRS 10 and IAS 28, <i>Sale or Contribution of</i> <i>Assets between an Investor and its Associate or Joint Venture</i> . .	To be determined

APPENDIX I

ACCOUNTANTS’ REPORT

The Company is in the process of making an assessment of what the impact of these developments is expected to be in the period of initial application. So far it has concluded that the adoption of them is unlikely to have a significant impact on the financial statements except the following:

IFRS 18, *Presentation and disclosure in financial statements*

IFRS 18 will replace IAS 1 *Presentation of financial statements* and aims to improve the transparency and comparability of information about an entity’s financial statements. IFRS 18 is effective for annual reporting periods beginning on or after 1 January 2027 and is to be applied retrospectively.

Among other changes, under IFRS 18, entities are required to classify all income and expenses into five categories in the statement of profit or loss, namely the operating, investing, financing, discontinued operations and income tax categories. Entities are also required to provide specific disclosures about management-defined performance measures in a single note in the financial statements.

The Company does not plan to early adopt IFRS 18. IFRS18 will impact the presentation of financial statements and is not expected to have significant impact on the financial performance and positions of the Company.

28 SUBSEQUENT EVENTS

In January 2026, the Company entered into an exclusive cooperation agreement with a third party on commercialisation and marketing of the Company’s core product, Pumecitinib nasal spray, in the PRC for a 10-year-period following its regulatory approval.

Except as disclosed above and elsewhere in the Historical Financial Information, there are no other significant events subsequent to 30 September 2025 which would materially affect the Company’s operating and financial performance.

SUBSEQUENT FINANCIAL STATEMENTS

No audited financial statements have been prepared by the Company in respect of any period subsequent to 30 September 2025.

APPENDIX II UNAUDITED [REDACTED] FINANCIAL INFORMATION

The following information does not form part of the Accountants’ Report received from the Company’s reporting accountants, KPMG, Certified Public Accountants, as set out in Appendix I to this document, and is included herein for illustrative purposes only. The unaudited [REDACTED] financial information should be read in conjunction with the section headed “Financial Information” in this document and the Accountants’ Report set out in Appendix I to this document.

A. UNAUDITED [REDACTED] STATEMENT OF ADJUSTED NET TANGIBLE ASSETS

The following unaudited [REDACTED] statement of adjusted net tangible assets of the Company is prepared in accordance with Rule 4.29 of the Listing Rules and is set out below to illustrate the effect of the [REDACTED] on the net tangible assets of the Company as at 30 September 2025 as if the [REDACTED] had taken place on 30 September 2025.

The unaudited [REDACTED] statement of adjusted net tangible assets has been prepared for illustrative purposes only and because of its hypothetical nature, it may not give a true picture of the financial position of the Company had the [REDACTED] been completed as of 30 September 2025 or at any future date.

	Net tangible assets of the Company as at 30 September 2025 ⁽¹⁾	Estimated [REDACTED] from the [REDACTED] ⁽²⁾⁽⁴⁾	Unaudited [REDACTED] adjusted net tangible assets of the Company	Unaudited [REDACTED] adjusted net tangible assets per Share	
	RMB’000	RMB’000	RMB’000	RMB ⁽³⁾	HKD ⁽⁴⁾
Based on an [REDACTED] of HKD[REDACTED] per H Share	44,035	[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED]
Based on an [REDACTED] of HKD[REDACTED] per H Share	44,035	[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED]

Notes:

- (1) The net tangible assets of the Company as of 30 September 2025 is arrived at after deducting intangible assets of RMB743,000 from the total equity of the Company of RMB44,778,000 as of 30 September 2025, which is extracted from the Accountants’ Report set out in Appendix I to the Document.
- (2) The estimated [REDACTED] from the [REDACTED] are based on the indicative [REDACTED] of HK\$[REDACTED] per [REDACTED] (being the lower end of the [REDACTED] range) and HK\$[REDACTED] per [REDACTED] (being the higher end of the [REDACTED] range), and [REDACTED] expected to be [REDACTED] under the [REDACTED], after deduction of the [REDACTED] fees and other related expenses paid or payable by the Company and does not take into account any H shares which may be [REDACTED] upon the exercise of the [REDACTED].
- (3) The unaudited [REDACTED] adjusted net tangible assets per Share is arrived at after adjustments as described in the preceding paragraphs and on the basis that [REDACTED] shares were in issue (as adjusted by the share subdivision on a one for two basis in January 2026) immediately following the completion of [REDACTED], and does not take into account any H shares which may be [REDACTED] upon the exercise of the [REDACTED].

APPENDIX II

UNAUDITED [REDACTED] FINANCIAL INFORMATION

- (4) The estimated [REDACTED] from [REDACTED] and the unaudited [REDACTED] adjusted net tangible assets per Share are converted from or into HK\$ at the exchange rate of RMB0.89877 to HK\$1.00 on the Latest Practicable Date. No representation is made that RMB amount have been, could have been or may be converted to HK\$, or vice versa, at that rate or at any other rate.
- (5) No adjustment has been made to the unaudited [REDACTED] adjusted net tangible assets of the Company to reflect any trading results or other transactions of the Company entered into subsequent to 30 September 2025.

APPENDIX III

TAXATION AND FOREIGN EXCHANGE

TAXATION OF SECURITY HOLDERS

The taxation of income and capital gains of holders of H Shares is subject to the laws and practices of the PRC and of jurisdictions in which holders of H Shares are resident or otherwise subject to tax. The following summary of certain relevant taxation provisions based on current laws and practices is subject to change and does not constitute legal or tax advice. The discussion has no intention to cover all possible tax consequences resulting from the investment in H Shares, nor does it take into account the specific circumstances of any particular investor, some of which may be subject to special regulations. Accordingly, you should consult your own tax advisor regarding the tax consequences of an investment in H Shares. The discussion is based upon laws and relevant interpretations in effect as of the Latest Practicable Date, all of which are subject to change and may have retrospective effect.

No issues on PRC or Hong Kong taxation other than income tax, capital gain and profit tax, business tax/value-added tax, stamp duty and estate duty was referred in the discussion. Prospective investors are urged to consult their financial advisors regarding the PRC, Hong Kong and other tax consequences of owning and disposing of H Shares.

THE PRC TAXATION

Taxation on Dividends

Individual Investor

Pursuant to the Individual Income Tax Law of the PRC (《中華人民共和國個人所得稅法》), which was most recently amended on August 31, 2018 and came into effect on January 1, 2019 and the Implementation Rules of the Individual Income Tax Law of the PRC (《中華人民共和國個人所得稅法實施條例》), which was last amended on December 18, 2018 and came into effect on January 1, 2019 (hereinafter collectively referred to as the “**IIT Law**”), dividends distributed by PRC enterprises are subject to individual income tax levied at a flat rate of 20%. For a foreign individual who is not a resident of the PRC, the receipt of dividends from an enterprise in the PRC is normally subject to individual income tax of 20% unless a reduction is approved by the Ministry of Finance (the “**MOF**”) or exempted by an international convention or agreement to which the PRC government is a party.

Pursuant to the Circular on Some Policy Questions Concerning Individual Income Tax (《關於個人所得稅若干政策問題的通知》) (Cai Shui [1994] No. 20), which was issued by MOF and State Taxation Administration (the “**STA**”) on May 13, 1994 and came into effect on the same date, the incomes gained by individual foreigners from dividends and bonuses of enterprise with foreign investment are exempt from individual income tax for the time being.

Pursuant to the Arrangement between the Mainland and the Hong Kong Special Administrative Region on the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes on Income (《內地和香港特別行政區關於對所得避免雙重徵稅和防止偷漏稅的安排》) (the “**Arrangement on the Avoidance of Double Taxation and**

APPENDIX III

TAXATION AND FOREIGN EXCHANGE

Prevention of Fiscal Evasion”), which was signed on August 21, 2006, the PRC government may levy taxes on the dividends paid by a PRC company to Hong Kong residents (including natural persons and legal entities) in an amount not exceeding 10% of the total dividends payable by the PRC company. If a Hong Kong resident directly holds 25% or more of the equity interest in a PRC company, then such tax shall not exceed 5% of the total dividends payable by the PRC company.

The Fifth Protocol of the Arrangement between the Mainland of China and the Hong Kong Special Administrative Region on the Avoidance of Double Taxation and the Prevention of Fiscal Evasion issued by the STA (《國家稅務總局關於<內地和香港特別行政區關於對所得避免雙重徵稅和防止偷漏稅的安排>第五議定書》) (the “**Fifth Protocol**”), which came into effect on December 6, 2019, states that such provisions shall not apply to arrangement made for the primary purpose of gaining such tax benefit.

Enterprise Investors

The Enterprise Income Tax Law of the PRC (《中華人民共和國企業所得稅法》), promulgated by the National People’s Congress (the “NPC”) on March 16, 2007, most recently amended on December 29, 2018, and the Implementation Rules of the EIT Law (《中華人民共和國企業所得稅法實施條例》), promulgated by the State Council on December 6, 2007, most recently amended on December 6, 2024 and became effective on January 20, 2025 (hereinafter collectively referred to as the “**EIT Law**”), are the principal law and regulation governing enterprise income tax in the PRC. According to the EIT Law and its Implementation Rules, enterprises are classified into resident enterprises and non-resident enterprises. Resident enterprises refer to enterprises that are legally established in the PRC, or are established under foreign laws but whose actual management bodies are located in the PRC. Non-resident enterprises refer to enterprises that are legally established under foreign laws and have set up institutions or sites in the PRC but with no actual management body in the PRC, or enterprises that have not set up institutions or sites in the PRC but have derived incomes from the PRC. A uniform income tax rate of 25% applies to all resident enterprises and non-resident enterprises that have set up institutions or sites in the PRC to the extent that such incomes are derived from their set-up institutions or sites in the PRC, or such income are obtained outside the PRC but have an actual connection with the set-up institutions or sites. Non-resident enterprises that have not set up institutions or sites in the PRC, or have set up institutions or sites but the incomes obtained by the said enterprises have no actual connection with the set-up institutions or sites, shall pay enterprise income tax at the rate of 10% in relation to their income sources from the PRC.

Pursuant to the Circular on Issues Relating to the Withholding of Enterprise Income Tax by Mainland China Resident Enterprises on Dividends Paid to Overseas Non-mainland China Resident Enterprise Shareholders of H Shares (《國家稅務總局關於中國居民企業向境外H股非居民企業股東派發股息代扣代繳企業所得稅有關問題的通知》), issued by the STA on November 6, 2008, a PRC resident enterprise distributing dividends to its overseas non-resident enterprise shareholders holding H-shares for fiscal years commencing in or after 2008 is required to withhold Enterprise Income Tax at a uniform rate of 10%.

APPENDIX III

TAXATION AND FOREIGN EXCHANGE

Pursuant to the Arrangement on the Avoidance of Double Taxation and Prevention of Fiscal Evasion and Fifth Protocol, the PRC government may impose tax on dividends paid by a PRC company to a Hong Kong resident (including natural person and legal entity), but such tax shall not exceed 10% of the total amount of dividends payable. If a Hong Kong resident directly holds 25% or more of equity interest in a PRC company and the Hong Kong resident is the beneficial owner of the dividends and meets other conditions, such tax shall not exceed 5% of the total amount of dividends payable by the PRC company. However, such provisions shall not apply to arrangements or transactions made for one of the primary purposes of obtaining such tax benefits.

In addition, the application of the dividend clause of tax agreements is subject to the requirements of PRC tax laws and regulations, such as the Notice of the STA on the Issues Concerning the Application of the Dividend Clauses of Tax Agreements (《國家稅務總局關於執行稅收協定股息條款有關問題的通知》) (Guo Shui Han [2009] No. 81), which came into effect on February 20, 2009. While determining the taxation applicable to dividends under certain tax agreements, investors shall comply with such provisions.

Tax Treaties

Non-PRC resident investors residing in countries which have entered into treaties for the avoidance of double taxation with the PRC or residing in Hong Kong or Macau are entitled to a reduction of the withholding taxes imposed on the dividends received from PRC companies. The PRC currently has entered into Avoidance of Double Taxation Treaties/Arrangements with a number of countries and regions including Hong Kong, Macau, Australia, Canada, France, Germany, Japan, Malaysia, the Netherlands, Singapore, the United Kingdom and the United States.

Non-PRC resident enterprises entitled to preferential tax rates in accordance with the relevant income tax agreements or arrangements are required to apply to the PRC tax authorities for a refund of the withholding tax in excess of the agreed tax rate, and the refund payment is subject to approval by the tax authorities.

Taxation on Gains from Share Transfer

Individual Investors

According to the IIT Law, gains realized on the sale of equity interests in the PRC resident enterprises are subject to individual income tax at a rate of 20%.

Pursuant to the Circular of Declaring that Individual Income Tax Continues to be Exempted over Income of Individuals from the Transfer of Shares (《關於個人轉讓股票所得繼續暫免徵收個人所得稅的通知》) (Cai Shui Zi [1998] No. 61) issued by the MOF and the STA on March 30, 1998, from January 1, 1997, income of individuals from transfer of the shares of listed enterprises continues to be exempted from individual income tax.

APPENDIX III

TAXATION AND FOREIGN EXCHANGE

As of the Latest Practicable Date, no aforesaid provisions have expressly provided that whether individual income tax shall be levied from non-Chinese resident individuals on the transfer of shares in PRC resident enterprises listed on overseas stock exchanges, and to our knowledge, no such individual income tax was levied by PRC tax authorities in practice. However, there is no assurance that the PRC tax authorities will not change these practices which could result in levying income tax on non-PRC resident individuals on gains from the sale of H shares.

Enterprise Investors

In accordance with the EIT Law and the Implementation Rules of the EIT Law (《中華人民共和國企業所得稅法實施條例》), a non-resident enterprise is generally subject to corporate income tax at the rate of 10% on PRC-sourced income, including gains derived from the disposal of equity interests in a PRC resident enterprise, if it does not have an establishment or premise in the PRC or has an establishment or premise in the PRC but its PRC-sourced income has no real connection with such establishment or premise. Such income tax payable for non-resident enterprises are deducted at source, where the payer of the income is required to withhold the income tax from the amount to be paid to the non-resident enterprise when such payment is made or due. Such tax may be reduced or exempted pursuant to relevant tax treaties or agreements on avoidance of double taxation.

Pursuant to the Stamp Duty Law of the PRC (《中華人民共和國印花稅法》), which was amended on June 10, 2021 and came into effect on July 1, 2022, PRC stamp duty only applies to all kinds of documents having legally binding force in the PRC and protected under the PRC laws. Therefore, PRC stamp duty shall not apply to the acquisition and disposal of H Shares by non-PRC investors outside of the PRC.

PRINCIPAL TAXATION OF OUR COMPANY IN THE PRC

Enterprise Income Tax

According to the EIT Law and the Implementing Rules, resident enterprises are subject to a standard enterprise income tax rate of 25% on their global income. Key advanced and new technology enterprises supported by the State are eligible for a preferential enterprise income tax rate of 15%.

According to the Administrative Measures for Determination of High and New Tech Enterprises (《高新技術企業認定管理辦法》), which was promulgated by the Ministry of Science and Technology on January 29, 2016 and became effective on January 1, 2016, an enterprise which is recognized as a high and new technology enterprise may apply for a preferential enterprise income tax rate of 15% pursuant to the EIT Law, its implementation regulation and relevant PRC law.

APPENDIX III

TAXATION AND FOREIGN EXCHANGE

Value-added Tax (“VAT”)

According to the Notice of the Ministry of Finance and the State Taxation Administration on the Adjusting Value-added Tax Rates (《財政部、稅務總局關於調整增值稅稅率的通知》) effective on May 1 2018, the VAT rates of 17% and 11% on sales, imported goods shall be adjusted to 16% and 10%, respectively.

According to the Announcement of the Ministry of Finance, the State Taxation Administration and the General Administration of Customs on Relevant Policies for Deepening the Value-Added Tax Reform (《財政部、稅務總局、海關總署關於深化增值稅改革有關政策的公告》) promulgated on March 20, 2019 and effective from April 1, 2019, the VAT rates of 16% and 10% on sales, imported goods shall be adjusted to 13% and 9%, respectively.

Pursuant to the Value-added Tax Law of the PRC (《中華人民共和國增值稅法》) (the “VAT Law”), promulgated by the Standing Committee of NPC on December 25, 2024, and became effective on January 1, 2026, and the Regulations for the Implementation of the Value-added Tax Law of the PRC (《中華人民共和國增值稅法實施條例》), promulgated by the State Council on December 25, 2025, and became effective on January 1, 2026, entities and individuals (including individual industrial and commercial proprietors) selling goods, services, intangible assets, real estate and importing goods within the territory of the PRC are taxpayers of VAT and shall pay VAT in accordance with the provisions of the law. Unless stated otherwise, for payers who sell goods, and provide processing, repairs and replacement services and rental services of tangible movable assets as well as import goods, the tax rate shall be 13%, and be, in certain specified circumstances, 9%, 6% and 0%.

FOREIGN EXCHANGE

The principal regulations governing foreign currency exchange in China are the Foreign Exchange Administration Regulations of the PRC (《中華人民共和國外匯管理條例》), most recently amended in August 2008. Under the PRC foreign exchange regulations, payments of current account items, such as profit distributions, interest payments and trade and service-related foreign exchange transactions, can be made in foreign currencies without prior approval from the State Administration of Foreign Exchange (the “SAFE”), by complying with certain procedural requirements. By contrast, approval from or registration with appropriate government authorities is required where Renminbi is to be converted into foreign currency and remitted out of China to pay capital account items, such as direct investments, repayment of foreign currency-denominated loans, repatriation of investments and investments in securities outside of China.

According to the Notice on Relevant Issue Concerning the Administration of Foreign Exchange for Overseas Listing (《關於境外上市外匯管理有關問題的通知》) issued by the SAFE on December 26, 2014, domestic companies shall complete foreign exchange registration for their overseas listing with the foreign exchange authority at their place of SAFE

APPENDIX III

TAXATION AND FOREIGN EXCHANGE

Circular 19 registration within 15 working days after the completion of the overseas listing and issuance. Funds raised may be repatriated to China or retained overseas, provided their use aligns with disclosures in the document or other offering documents.

The Circular on Further Simplifying and Improving the Direct Investment-related Foreign Exchange Administration Policies (《關於進一步簡化和改進直接投資外匯管理政策的通知》) (the “**SAFE Circular 13**”) promulgated by SAFE on February 13, 2015 and amended on December 30, 2019, cancels the administrative approval requirements for foreign exchange registration of domestic direct investment and overseas direct investment, and simplifies foreign exchange-related registration procedures. Pursuant to SAFE Circular 13, investors shall complete registration with qualified banks for both domestic direct investment and overseas direct investment.

The Circular on the State Administration of Foreign Exchange on Reforming and Standardizing the Foreign Exchange Settlement Management Policy of Capital Account (《國家外匯管理局關於改革和規範資本項目結匯管理政策的通知》) (the “**SAFE Circular 16**”), which, among other things, amends certain provisions of the Circular on the State Administration of Foreign Exchange on Reforming the Mode of Management of Settlement of Foreign Exchange Capital of Foreign-Funded Enterprises (《國家外匯管理局關於改革外商投資企業外匯資本金結匯管理方式的通知》) (the “**SAFE Circular 19**”). Pursuant to SAFE Circular 19 and SAFE Circular 16, the flow and use of the Renminbi capital converted from foreign currency denominated registered capital of a foreign-invested company is regulated such that Renminbi capital may not be used for business beyond its business scope or to provide loans to persons other than affiliates unless otherwise permitted under its business scope.

According to the Circular on Optimizing Administration of Foreign Exchange to Support the Development of Foreign-related Business (《國家外匯管理局關於優化外匯管理支持涉外業務發展的通知》) (the “**SAFE Circular 8**”), issued by SAFE in April 2020, under the prerequisite of ensuring true and compliant use of funds and compliance with the prevailing administrative provisions on use of income under the capital account, eligible enterprises are allowed to make domestic payments by using their capital funds, foreign credits and the income under capital accounts of overseas listing, without prior provision of the evidentiary materials concerning authenticity to the bank for each transaction. The handling banks shall conduct spot checks afterwards in accordance with the relevant requirements.

Pursuant to the Circular on Issues Concerning the Foreign Exchange Administration for Domestic Individuals Participating in Stock Incentive Plan of Overseas Publicly Listed Company (《國家外匯管理局關於境內個人參與境外上市公司股權激勵計劃外匯管理有關問題的通知》) (the “**SAFE Circular 7**”), promulgated by SAFE in February 2012, employees, directors, supervisors, and other senior management participating in any share incentive plan of an overseas publicly-listed company who are PRC citizens or who are non-PRC citizens residing in China for a continuous period of not less than one year, subject to a few exceptions, are required to register with SAFE through a domestic agency. Moreover, an overseas-entrusted institution must be retained to handle matters in connection with the exercise or sale of stock

APPENDIX III

TAXATION AND FOREIGN EXCHANGE

options and the purchase or sale of shares and interests. The income of foreign exchange PRC residents by selling out the shares according to the equity incentive plan and the dividend distributed by the overseas-listed company shall be distributed to the PRC residents after being remitted to the bank account in China opened by the domestic institutions.

On September 12, 2025, the SAFE issued the Circular of the State Administration for Foreign Exchange on Deepening of Reform in the Administration of Foreign Exchange for Cross-border Investment and Financing (《關於深化跨境投融資外匯管理改革有關事宜的通知》) (the “**SAFE Circular 43**”), cancels the registration requirements for domestic reinvestment by foreign-invested enterprises stipulated by the Circular on Further Deepening the Reform to Facilitate Cross-border Trade and Investment (《國家外匯管理局關於進一步深化改革 促進跨境貿易投資便利化的通知》) (the “**SAFE Circular 28**”). Additionally, it further narrows the negative list governing the use of capital account income originally stipulated under the SAFE Circular 28. Pursuant to the SAFE Circular 43, the restriction about funds “shall not be used to purchase residential properties for non-self-use purposes (except for enterprises engaged in real estate development or leasing operations)” has been removed from the negative list. The remaining three categories of restrictions on the use of capital account income continue to apply: (i) funds shall not be directly or indirectly used for expenditures prohibited by laws and regulations; (ii) unless otherwise specified, funds shall not be directly or indirectly used for securities investment or other investment and wealth management (except for wealth management products and structured deposits with risk rating results of not higher than Grade II); and (iii) funds shall not be used for granting loans to non-affiliated enterprises (except in the four Pilot Free Trade Zones of Shanghai, Guangzhou, Hainan, and Ningbo).

On December 26, 2025, the People’s Bank of China (中國人民銀行) (the “**PBOC**”) and the SAFE jointly promulgated the Circular on Issues Concerning the Administration of Funds for Overseas Listing of Domestic Enterprises (《關於境內企業境外上市資金管理有關問題的通知》), which will become effective on April 1, 2026. Pursuant to this circular, a domestic enterprise shall complete the registration with the competent banks within 30 working days after the date of its initial overseas listing or the completion of the over-allotment. The proceeds raised may be remitted to the PRC or deposited overseas, provided that the use of funds shall be consistent with the relevant disclosure documents, Domestic shareholders increasing or decreasing their overseas shareholdings are also required to comply with the relevant registration and account management requirements.

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

PRC LAWS AND REGULATIONS

This Appendix sets out summaries of certain aspects of PRC laws and regulations relevant to the Company’s operations and business. Laws and regulations relating to taxation and foreign exchange in the PRC are discussed separately in “Appendix III — Taxation and Foreign Exchange” to this [REDACTED]. The principal objective of this summary is to provide potential investors with an overview of the principal PRC legal and regulatory provisions applicable to the Company. This summary is not intended to include all the information which may be important to potential investors. For discussion of laws and regulations that are specifically govern our business, see “Regulatory Overview” in this [REDACTED].

The PRC Legal System

The PRC legal system is based on the Constitution of the PRC (《中華人民共和國憲法》) (the “**PRC Constitution**”), which was promulgated on September 20, 1954 and most recently amended and became effective on March 11, 2018. The PRC legal system is made up of written laws, administrative regulations, local regulations, autonomous regulations, separate regulations, rules and regulations of State Council departments, rules and regulations of local governments, laws of special administrative regions and international treaties of which the PRC government is a signatory, and other regulatory documents. Court judgments do not constitute legally binding precedents, although they may be used for the purposes of judicial reference and guidance.

Pursuant to the PRC Constitution and the Legislation Law of the PRC (《中華人民共和國立法法》) (the “**PRC Legislation Law**”), which was adopted on March 15, 2000, amended on March 13, 2023 and became effective on March 15, 2023, the National People’s Congress and its Standing Committee are empowered to exercise the legislative power of the State. The National People’s Congress has the power to formulate and amend basic laws governing State organs, civil, criminal and other matters. The Standing Committee of the National People’s Congress is empowered to formulate and amend laws other than those required to be enacted by the National People’s Congress and to supplement and amend parts of the laws enacted by the National People’s Congress during the adjournment of the National People’s Congress, provided that such supplements and amendments are not in conflict with the basic principles of such laws.

The State Council is the highest organ of the PRC administration and has the power to formulate administrative regulations based on the PRC Constitution and laws.

The people’s congresses of the provinces, autonomous regions and municipalities and their respective standing committees may formulate local regulations based on the specific circumstances and actual needs of their respective administrative areas, provided that such regulations do not contravene any provision of the PRC Constitution, laws or administrative regulations. The people’s congresses of cities with districts and their respective standing committees may formulate local regulations with respect to urban and rural construction and administration, environmental protection, historical and cultural protection and other aspects

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

according to the specific circumstances and actual needs of such cities, which will become enforceable after being reported to and approved by the standing committees of the people’s congresses of the relevant provinces or autonomous regions, provided that such local regulations do not contravene any provision of the PRC Constitution, laws, administrative regulations and local regulations of their respective provinces or autonomous regions.

The ministries and commissions of the State Council, People’s Bank of China, the National Audit Office of the PRC and the subordinate institutions with administrative functions directly under the State Council may formulate rules and regulations within the authorization of their respective departments in accordance with the laws and administrative regulations, and the decisions and orders of the State Council. The people’s governments of the provinces, autonomous regions, municipalities directly under the central government and cities with districts may formulate rules and regulations in accordance with the laws, administrative regulations and local regulations of such provinces, autonomous regions and municipalities directly under the central government.

The PRC Constitution has supreme legal authority and no laws, administrative regulations, local regulations, autonomous regulations or separate regulations may contravene the PRC Constitution. The PRC laws rank higher than administrative regulations, local regulations and rules. The administrative regulations rank higher than local regulations and rules. The rules enacted by the people’s governments of the provinces or autonomous regions rank higher than the rules enacted by the people’s governments of the cities with districts and autonomous prefectures within the administrative areas of such provinces and the autonomous regions.

The National People’s Congress has the power to alter or annul any inappropriate laws enacted by its Standing Committee, and to annul any autonomous regulations or separate regulations which have been approved by its Standing Committee but contravene the PRC Constitution or the PRC Legislation Law. The Standing Committee of the National People’s Congress has the power to annul any administrative regulations that contravene the PRC Constitution and laws, to annul any local regulations that contravene the PRC Constitution, laws or administrative regulations, and to annul any autonomous regulations or local regulations which have been approved by the standing committees of the people’s congresses of the relevant provinces, autonomous regions or municipalities, but which contravene the PRC Constitution and the PRC Legislation Law. The State Council has the power to alter or annul any inappropriate ministerial rules and rules of local governments. The people’s congresses of provinces, autonomous regions or municipalities have the power to alter or annul any inappropriate local regulations enacted or approved by their respective standing committees. The standing committees of local people’s congresses have the power to annul inappropriate rules enacted by the people’s governments at the corresponding level. The people’s governments of provinces and autonomous regions have the power to alter or annul any inappropriate rules enacted by the people’s governments at a lower level.

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

Pursuant to the PRC Constitution, the power to interpret laws is vested in the Standing Committee of the National People’s Congress. Pursuant to the Resolution of the Standing Committee of the National People’s Congress Providing an Improved Interpretation of the Law (《全國人民代表大會常務委員會關於加強法律解釋工作的決議》) passed on June 10, 1981, issues related to the further clarification or supplement of laws or decrees should be interpreted or provided by the Standing Committee of the National People’s Congress or provided by with decrees, issues related to the specific application of laws and decrees in a court trial should be interpreted by the Supreme People’s Court, issues related to the specific application of laws and decrees in a prosecution process should be interpreted by the Supreme People’s Procuratorate, and the specific application of other laws and decrees in matters other than those involved in trial or prosecution process should be interpreted by the State Council and the competent authorities. If there are differences in principle in the interpretation of the Supreme People’s court and the Supreme People’s Procuratorate, they shall be submitted to the Standing Committee of National People’s Congress for interpretation or decision. The State Council and its ministries and commissions are also vested with the power to give interpretations of the administrative regulations and departmental rules which they have promulgated. At the regional level, the power to interpret regional laws is vested in the regional legislative and administrative authorities which promulgate such laws.

The PRC Judicial System

Pursuant to the PRC Constitution, the Law of Organization of the People’s Courts of the PRC (《中華人民共和國人民法院組織法》) and the Law of Organization of the People’s Procuratorate of the PRC (《中華人民共和國人民檢察院組織法》), both most recently amended on October 26, 2018 and came into effect on January 1, 2019, the people’s courts of the PRC are classified into the Supreme People’s Court, the local people’s courts at various local levels, and other special people’s courts. The local people’s courts at various local levels are divided into three levels, namely, the primary people’s courts, the intermediate people’s courts and the higher people’s courts. The primary people’s courts are further divided into civil, criminal and economic tribunals. The intermediate people’s courts have structure similar to those of the primary people’s courts and other special tribunals, such as the intellectual property courts, military courts and maritime courts. These two levels of people’s courts are subject to supervision by people’s courts at higher levels. The Supreme People’s Court is the highest judicial authority in the PRC. It supervises the administration of justice by the people’s courts at all levels. The Chinese People’s Procuratorates are divided into the Supreme People’s Procuratorate, local people’s procuratorates at various levels, and specialized people’s procuratorates such as the Military Procuratorate. The Supreme People’s Procuratorate is the highest procuratorial organ. The Supreme People’s Procuratorate directs the work of the local people’s procuratorates and specialized people’s procuratorates at all levels, and the people’s procuratorates at higher levels direct the work of the people’s procuratorates at lower levels. The Supreme People’s Procuratorate is authorized to supervise the judgment and ruling of the people’s courts at all levels which have been legally effective, and the people’s procuratorate at a higher level is authorized to supervise the judgment and ruling of a people’s court at a lower level which have been legally effective.

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

Under the Civil Procedure Law of the PRC (《中華人民共和國民事訴訟法》) (the “**PRC Civil Procedure Law**”), which is adopted on April 9, 1991, most recently amended on September 1, 2023 and became effective on January 1, 2024, the people’s courts employ a two-tier appellate system. The judgments or rulings of the second instance at a people’s court are final. A party may appeal against the judgment or ruling of the first instance of a local people’s court. The people’s procuratorate may present a protest to the people’s court at the next higher level in accordance with the procedures stipulated by the laws. In the absence of any appeal by the parties and any protest by the people’s procuratorate within the stipulated period, the judgments or rulings of the people’s court are final. Judgments or rulings of the second instance of the intermediate people’s courts, the higher people’s courts and the Supreme People’s Court are final. Judgments or rulings of the first instance of the Supreme People’s Court are also final. However, if the Supreme People’s Court or a people’s court at the next higher level discovers an error in a final and binding judgment or ruling which has taken effect in any people’s court at a lower level, or the presiding judge of a people’s court finds an error in a final and binding judgment or ruling which has taken effect in the court over which he presides, a retrial of the case may be initiated according to the judicial supervision procedures.

The PRC Civil Procedure Law prescribes the conditions for instituting a civil action, the jurisdiction of the people’s courts, the procedures to be followed for conducting a civil action, and the procedures for enforcement of a civil judgment or ruling. All parties to a civil action conducted within the PRC must abide by the PRC Civil Procedure Law. A civil case is generally heard by the court located in the defendant’s place of domicile. The court of jurisdiction in respect of a civil action may also be chosen by explicit agreement among the parties to a contract, provided that the people’s court having jurisdiction should be located at places directly connected with the disputes, such as the plaintiff’s or the defendant’s place of domicile, the place where the contract is executed or signed or the place where the object of the action is located. However, such choice shall not in any circumstances contravene the provisions on grade jurisdiction and exclusive jurisdiction.

Foreign individuals, stateless persons, foreign enterprises or foreign organizations shall enjoy the same litigation rights and obligations as Chinese citizens, legal persons or other organizations when filing or responding to lawsuits in Chinese courts. Should a foreign court limit the litigation rights of PRC citizens and enterprises, the PRC court shall apply the same limitations to the citizens and enterprises of such foreign country. A foreign individual, a person without nationality, a foreign enterprise or a foreign organization must engage a PRC lawyer in case he/she or it needs to engage a lawyer for the purpose of initiating actions or defending against litigations at a PRC court. In accordance with the international treaties to which the PRC is a signatory or a participant or according to the principle of reciprocity, a people’s court and a foreign court may request each other to serve documents, conduct investigation, collect evidence and conduct other actions on its behalf. A PRC court shall not accommodate any request made by a foreign court which will result in the violation of sovereignty, security or public interests of the PRC.

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

All parties to a civil action shall perform legally effective judgments and rulings. If any party to a civil action refuses to abide by a judgment or ruling made by a people’s court or an award made by an arbitration tribunal in the PRC, the other party may apply to the people’s court for the enforcement of the same within two years, subject to application for postponed enforcement or revocation. If a party fails to satisfy within the stipulated period a judgment which the court has granted an enforcement approval, the court may, upon the application of the other party, mandatorily enforce the judgment.

A party seeking to enforce a legally effective judgment or ruling of a people’s court against another party who is not or whose property is not within the PRC may apply to a foreign court with jurisdiction over the case for recognition and enforcement of such judgment or ruling. Alternatively, the people’s court may, pursuant to an international treaty concluded or acceded to by the PRC or in accordance with the principle of reciprocity, request the foreign court to recognize and enforce the judgment or ruling. Likewise, if the PRC has entered into either a treaty relating to judicial enforcement with the relevant foreign country or according to the principle of reciprocity, a foreign judgment or ruling may also be recognized and enforced in accordance with the PRC enforcement procedures by a PRC court unless the people’s court considers that the recognition or enforcement of such judgment or ruling would violate the basic legal principles of the PRC, its sovereignty or national security, or would not be in the public interest.

The PRC Company Law, Overseas Listing Trial Measures and Guidance for Articles of Association

A joint stock limited company incorporated in the PRC and seeking a listing on the Hong Kong Stock Exchange is mainly subject to the following laws and regulations in the PRC:

- The PRC Company Law (《中華人民共和國公司法》) (the “**PRC Company Law**”) which was promulgated by the Standing Committee of National People’s Congress on December 29, 1993, and was most recently amended and came into effect on July 1, 2024.
- The Trial Administrative Measures of Overseas Securities Offering and Listing by Domestic Companies (《境內企業境外發行證券和上市管理試行辦法》) (the “**Overseas Listing Trial Measures**”) and five relevant guidelines which were issued by the China Securities Regulatory Commission (the “**CSRC**”) on February 17, 2023 and came into effect on March 31, 2023 pursuant to the Securities Law of the PRC (《中華人民共和國證券法》) (the “**PRC Securities Law**”) which were promulgated by the Standing Committee of the National People’s Congress on December 29, 1998, most recently amended on December 28, 2019 and came into effect on March 1, 2020, which are applicable to the direct and indirect overseas securities offering or listing of domestic companies; and

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

- The Guidelines for Articles of Association of Listed Companies (《上市公司章程指引》) (the “**Guidance for Articles of Association**”) which was most recently amended by the CSRC and came into effect on March 28, 2025. The Articles of Association is formulated based on the Guidance for Articles of Association and other relevant provisions of the CSRC on corporate governance to regulate corporate governance on a reference basis, the summary of which is set out in “Appendix V — Summary of the Articles of Association” to this [REDACTED].

Set out below is a summary of the major provisions of the PRC Company Law, the Overseas Listing Trial Measures and the Guidance for Articles of Association which are applicable to the Company.

General

A joint stock limited company (hereinafter referred to as the “**company**”) refers to a corporate legal person established in China under the PRC Company Law, all of whose shares are either par shares or no-par shares in accordance with the provisions of its articles of association; in the case of par shares, the amount of each share is equal. The liability of the company for its own debts is limited to the total amount of all assets it owns and the liability of its shareholders is limited to the extent of the shares they subscribe for.

The company shall conduct its business in accordance with relevant laws and administrative regulations. It may invest in other limited liability companies and joint stock limited companies and its liabilities with respect to such invested companies are limited to the amount invested. Unless otherwise provided by law, a company may not be a capital contributor that undertakes joint liabilities for the debts of the invested companies.

Incorporation

A company may be incorporated by promotion or floatation. A company shall be incorporated by a minimum of one but no more than two hundred promoters, and at least half of the promoters must be residents within the PRC. Companies incorporated by promotion are companies of which the entire registered capital is subscribed for by the promoters. Shares in the company incorporated by promotion shall not be offered to others unless the registered capital has been fully paid up. For companies incorporated by floatation, the registered capital is the total paid-up capital as registered with the relevant registration authorities. If laws, administrative regulations and decisions of the State Council have separate provisions on paid-in registered capital and the minimum registered capital, the company should follow such provisions.

Where a joint stock limited company is to be established by means of promotion, promoters shall fully subscribe for the shares that shall be issued at the time of the establishment of the company as provided for in the articles of association.

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

Where companies are incorporated by floatation, not less than 35% of their total number of shares must be subscribed for by the promoters, unless otherwise provided for by laws or administrative regulations. Where the shares to be issued have not been fully subscribed for at the time of the establishment of a company, or the promoters fail to hold an establishment meeting within thirty days after the full payment has been made for the shares to be issued, subscribers may claim against the promoters for refund of the payment for shares plus the interest on the bank deposits for the same term. The promoters and subscribers may not withdraw their share capital after they have made payment for the shares or delivered non-monetary property as capital contributions, except that the shares have not been fully subscribed for within the time limit, the promoters fail to hold the establishment meeting on schedule, or the establishment meeting decides not to establish the company.

Share Capital

Shareholders may make capital contributions in currencies, or non-monetary assets such as in kind, intellectual property rights or land use rights which can be appraised with monetary value and transferred lawfully, except for assets which are prohibited from being contributed as capital by laws or administrative regulations. If a capital contribution is made in non-monetary assets, a valuation of the assets contributed must be carried out pursuant to the provisions of laws or administrative regulations on valuation without any over-valuation or under-valuation.

There is no limit under the PRC Company Law to the percentage of shares held by an individual shareholder in a company. A company may issue registered shares.

The issuance of shares shall be conducted in a fair and equitable manner. Each share of the same class must carry equal rights. Shares issued at the same time and within the same class must be issued on the same conditions and at the same price. The same price per share shall be paid by any share subscriber (whether an entity or an individual). The share offering price may be equal to or greater than the par value of the share but may not be less than the par value.

Under the Overseas Listing Trial Measures, if a domestic company offers and lists securities overseas, it may raise funds and make dividend distributions in foreign currency or Renminbi.

Under the PRC Company Law, a company shall maintain a register of shareholders which sets forth the following matters:

- (i) the name and domicile of each shareholder;
- (ii) the class and number of shares held by each shareholder;
- (iii) the serial numbers of shares if the shares are issued in paper form; and
- (iv) the date on which each shareholder acquired the shares.

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

Increase in Share Capital

In light of its operational and development needs and in accordance with laws and regulations, a company may increase its share capital under any of the following methods, subject to the resolutions be passed at a shareholders’ general meeting: (i) a public offering of shares; (ii) a private placement of shares; (iii) offering of bonus shares to existing shareholders; (iv) the conversion of reserve funds into shares; and (v) any other methods provided in law and administrative regulations and approved by the CSRC.

Pursuant to the PRC Company Law, where a company is issuing new shares, resolutions shall be passed at general meeting in accordance with the articles of association in respect of the class and amount of the new shares, the issue price of the new shares, the commencement and end dates for the issue of the new shares and when the new shares are proposed to be issued to existing shareholders, the class and amount of such new shares and if any no par value stock is issued, the proceeds from the issuance of the new stocks shall be included into the registered capital.

To offer overseas, the domestic company shall report the application documents for offering and listing to the CSRC for record-filing within three business days after submission of the application documents for offering and listing overseas.

Reduction of Share Capital

A company may reduce its registered capital in accordance with the following procedures prescribed by the PRC Company Law:

- (i) the company shall prepare a balance sheet and a list of properties;
- (ii) the reduction of registered capital must be approved by shareholders at the general meeting;
- (iii) the company shall notify its creditors of the reduction in registered capital within ten days and publish an announcement of the reduction in newspapers within thirty days or the National Enterprise Credit Information Publicity System after the resolution approving the reduction has been passed;
- (iv) the creditors may within thirty days after receiving the notice, or within forty-five days of the public announcement if no notice has been received, require the company to pay its debts or provide guarantees covering the debts; and
- (v) where a company reduces its registered capital, it shall reduce the amount of capital contribution or shares in proportion to the capital contribution or shares held by the shareholders, unless it is otherwise prescribed by any law, or is agreed upon by all the shareholders of a limited liability company or is otherwise prescribed by the articles of association of a joint stock limited company.

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

Repurchase of Shares

Pursuant to the PRC Company Law, a company shall not purchase its own shares other than in any of the following circumstances:

- (i) reducing its registered capital;
- (ii) merging with another company which holds its shares;
- (iii) utilizing the shares for employee stock ownership plan or stock ownership incentive scheme;
- (iv) acquiring its own shares at the request of its shareholders who vote in a shareholders’ general meeting against a resolution regarding a merger or separation;
- (v) utilizing the shares for conversion of corporate bonds which are convertible into shares issued by a company; and
- (vi) where it is necessary for a listed company to maintain its corporate value and protect its stockholders’ equity.

Any company’s purchase of its own shares for any reason specified in item (i) and item (ii) of the preceding paragraph shall be subject to a resolution of the general meeting; any company’s purchase of its own shares for any reason specified in item (iii), item (v) and item (vi) of the preceding paragraph may be subject to a resolution of the board meeting with more than two thirds of directors present, according to the provisions of the articles of associations or upon authorization by the general meeting.

The shares acquired by the company under the circumstance stipulated in item (i) hereof shall be deregistered within ten days from the date of acquisition of shares; the shares shall be assigned or deregistered within six months if the repurchase of shares is made under the circumstances stipulated in either item (ii) or item (iv); and the shares held in total by a company after the repurchase under any of the circumstances stipulated in item (iii), item (v) or item (vi) shall not exceed 10% of the company’s total outstanding shares, and shall be assigned or deregistered within three years.

A company shall not accept its own shares as the subject matter of a mortgage.

Transfer of Shares

Shares held by shareholders may be transferred in accordance with the relevant laws. Pursuant to the PRC Company Law, a shareholder should effect a transfer of his shares on a stock exchange established in accordance with laws or by any other means as required by the State Council. Shares may be transferred after the shareholders endorse the back of the share certificates or in any other manner specified by laws or administrative regulations. Following

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

the transfer, the company shall enter the names and addresses of the transferees into its share register. No changes of registration in the share register described above shall be effected during a period of twenty days prior to convening a shareholders’ general meeting or five days prior to the record date for the purpose of determining entitlements to dividend distributions, subject to any law, administrative regulations or by the CSRC on the registration of changes in the share register of listed companies. The transfer of bearer share certificates shall become effective upon the delivery of the certificates to the transferee by the shareholder.

Pursuant to the PRC Company Law, shares of the company issued prior to the public offering of shares may not be transferred within one year of the date of the company’s listing on a stock exchange. Directors, supervisors and the senior management of a company shall declare to the company their shareholdings in the company and any changes thereof. During their terms of office determined upon taking office, they may transfer no more than 25% of the total number of shares they hold in the company per annum. They shall not transfer the shares they hold within one year of the date of the company’s listing on a stock exchange, nor within half a year after they leave their positions in the company. The articles of association may set out other restrictive provisions in respect of the transfer of shares in the company held by its directors, supervisors and the senior management.

Shareholders

Under the PRC Company Law and the Guidance for Articles of Association, the rights of shareholders include the rights:

- (i) to receive a return on assets, participate in significant decision-making and select management personnel;
- (ii) to petition the people’s court to revoke any resolution passed on a shareholders’ general meeting or a meeting of the board of directors that has not been convened in compliance with the laws, regulations or the articles of association or whose voting has been conducted in an invalid manner, or any resolution the contents of which is in violation of the articles of association, provided that such petition shall be submitted within sixty days of the passing of such resolution;
- (iii) to transfer the shares according to the applicable laws and regulations and the articles of association;
- (iv) to attend or appoint a proxy to attend shareholders’ general meetings and exercise the voting rights;
- (v) to inspect the articles of association, share register, counterfoil of company debentures, minutes of shareholders’ general meetings, board resolutions, resolutions of the supervisory committee and financial and accounting reports, and to make suggestions or inquiries in respect of the company’s operations;

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

- (vi) to receive dividends in respect of the number of shares held;
- (vii) to participate in distribution of residual properties of the company in proportion to their shareholdings upon the liquidation of the company; and
- (viii) any other shareholders’ rights provided for in laws, administrative regulations, other normative documents and the articles of association.

The obligations of shareholders include the obligation to abide by the company’s articles of association, to pay the subscription capital in respect of the shares subscribed for, to be liable for the company’s debts and liabilities to the extent of the amount of subscription capital agreed to be paid in respect of the shares taken up by them and any other shareholder obligation specified in the articles of association.

Pursuant to the Overseas Listing Trial Measures, a domestic company offering and listing overseas shall file with the CSRC as per requirement of such Measures, submit relevant materials that contain a filing report and legal opinions, and provide truthful, accurate and complete information on the shareholders, etc.

Shareholders’ General Meetings

The shareholder’s general meeting is the organ of authority of the company, which exercises its powers in accordance with the PRC Company Law. The general meeting may exercise its powers:

- (i) to elect and remove the directors and supervisors (not being representative(s) of employees) and to decide on the matters relating to the remuneration of directors and supervisors;
- (ii) to review and approve the reports of the board of directors;
- (iii) to review and approve the reports of the supervisory committee or supervisors;
- (iv) to review and approve the company’s profit distribution proposals and loss recovery proposals;
- (v) to decide on any increase or reduction of the company’s registered capital;
- (vi) to decide on the issue of corporate bonds;
- (vii) to decide on merger, division, dissolution and liquidation of the company or change of its corporate form;
- (viii) to amend the company’s articles of association; and
- (ix) to exercise any other authority stipulated in the articles of association.

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

Pursuant to the PRC Company Law and the Guidance for Articles of Association, a shareholders' general meeting is required to be held once every year within six months after the end of the previous accounting year. An extraordinary general meeting is required to be held within two months of the occurrence of any of the following circumstances:

- (i) the number of directors is less than the number stipulated by the law or less than two thirds of the number specified in the articles of association;
- (ii) the outstanding losses of the company amounted to one-third of the company's total paid in share capital;
- (iii) shareholders individually or in aggregate holding 10% or more of the company's shares request that an extraordinary general meeting is convened;
- (iv) the board of directors deems necessary;
- (v) the supervisory committee so proposes; or
- (vi) any other circumstances as provided for in the articles of association.

A shareholders' general meeting shall be convened by the board of directors and presided over by the chairman of the board of directors. In the event that the chairman is incapable of performing or is not performing his duties, the meeting shall be presided over by the vice chairman. In the event that the vice chairman is incapable of performing or is not performing his duties, a director nominated by more than half of the directors shall preside over the meeting. Where the board of directors is incapable of performing or is not performing its duties to convene the general meeting, the supervisory committee shall convene and preside over such meeting in a timely manner. If the supervisory committee fails to convene and preside over such meeting, shareholders individually or in aggregate holding 10% or more of the company's shares for ninety days or more consecutively may unilaterally convene and preside over such meeting.

Pursuant to the PRC Company Law, a notice of the general meeting stating the date and venue of the meeting and the matters to be considered at the meeting shall be given to all shareholders twenty days before the meeting. A notice of extraordinary general meeting shall be given to all shareholders fifteen days prior to the meeting.

There is no specific provision in the PRC Company Law regarding the number of shareholders constituting a quorum in a shareholders' general meeting.

Pursuant to the PRC Company Law, shareholders present at a shareholders' general meeting have one vote for each share they hold, except the shareholders of classified shares. The company may not have a voting right for the shares it holds.

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

An accumulative voting system may be adopted for the election of directors and supervisors at the general meeting pursuant to the provisions of the articles of association or a resolution of the general meeting. Under the accumulative voting system, each share shall be entitled to the number of votes equivalent to the number of directors or supervisors to be elected at the general meeting, and shareholders may consolidate their votes for one or more directors or supervisors when casting a vote.

Pursuant to the PRC Company Law, resolutions of the general meeting must be passed by more than half of the voting rights held by shareholders present at the meeting, with the exception of resolutions relating to merger, division or dissolution of the company, increase or reduction of registered share capital, change of corporate form or amendments to the articles of association, which in each case must be passed by more than two-thirds of the voting rights held by the shareholders present at the meeting. Where the PRC Company Law and the articles of association provide that the transfer or acquisition of significant assets or the provision of external guarantees by the company must be approved by way of resolution of the general meeting, the board of directors shall convene a shareholders' general meeting promptly to vote on such matters.

A shareholder may entrust a proxy to attend the general meeting on his/her behalf. The proxy shall present the shareholders' power of attorney to the company specifying the agent's powers, the agenda items covered, and the duration of the authorization, and exercise voting rights within the scope of authorization.

Minutes shall be prepared in respect of matters considered at the general meeting and the chairman and directors attending the meeting shall endorse such minutes by signature. The chairman of the meeting and directors attending the meeting shall sign to endorse such minutes. The minutes shall be kept together with the shareholders' attendance register and the proxy forms.

Board of Directors

Pursuant to the Company Law, a company shall have a board of directors composed of not less than three members. Members of the board of directors may include staff representatives, who shall be democratically elected by the company's staff at a staff representative assembly, general staff meeting or otherwise. The term of a director shall be stipulated in the articles of association, provided that no term of office shall last for more than three years. A director may serve consecutive terms if re-elected. A director shall continue to perform his/her duties as a director in accordance with the laws, administrative regulations and the articles of association until a duly re-elected director takes office, if re-election is not conducted in a timely manner upon the expiry of his/her term of office or if the resignation of directors results in the number of directors being less than the quorum.

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

Under the PRC Company Law, the board of directors may exercise its powers:

- (i) to convene shareholders' general meetings and report on its work to the shareholders' general meetings;
- (ii) to implement the resolutions passed by the shareholders at the shareholders' general meetings;
- (iii) to decide on the company's operational plans and investment proposals;
- (iv) to formulate the company's profit distribution proposals and loss recovery proposals;
- (v) to formulate proposals for the increase or reduction of the company's registered capital and the issue of corporate bonds;
- (vi) to formulate proposals for the merger, division or dissolution of the company or change of corporate form;
- (vii) to decide on the setup of the company's internal management organs;
- (viii) to appoint or dismiss the company's manager and decide on his/her remuneration and, based on the manager's recommendation, to appoint or dismiss any deputy manager and financial officer of the company and to decide on their remunerations;
- (ix) to formulate the company's basic management system; and
- (x) to exercise any other authority stipulated in the articles of association.

Meetings of the board of directors shall be convened at least twice each year. Notices of meeting shall be given to all directors and supervisors ten days before the meeting. Interim board meetings may be proposed to be convened by shareholders representing more than 10% of the voting rights, more than one-third of the directors or the supervisory committee. The chairman shall convene the meeting within ten days of receiving such proposal and preside over the meeting. The board of directors may otherwise determine the means and the period of notice for convening an interim board meeting. Meetings of the board of directors shall be held only if more than half of the directors are present. Resolutions of the board of directors shall be passed by more than half of all directors. Each director shall have one vote for a resolution to be approved by the board of directors. Directors shall attend the meetings of the board of directors in person. If a director is unable to attend for any reason, he/she may appoint another director to attend the meeting on his/her behalf by a written power of attorney specifying the scope of authorization. The board of directors shall make minutes of the meeting's decisions on the matters discussed at the meeting, and the directors attending the meeting shall sign the minutes.

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

If a resolution of the board of directors violates any laws, administrative regulations or the articles of association or resolutions of the general meeting, and as a result of which the company sustains serious losses, the directors participating in the resolution are liable to compensate the company. However, if it can be proved that a director expressly objected to the resolution when the resolution was voted on, and that such objection was recorded in the minutes of the meeting, such director shall be relieved from that liability.

Under the PRC Company Law, the following person may not serve as a director in a company:

- (i) a person without capacity or restricted capacity to undertake any civil liabilities;
- (ii) a person who has been convicted of an offense of corruption, bribery, embezzlement, misappropriation of property or destruction of the socialist economic order, or who has been deprived of his political rights due to his crimes, in each case where no more than five years have elapsed since the date of completion of the sentence, or in the case of a suspended sentence, two years have not elapsed since the probation period was completed;
- (iii) a person who has been a former director, factory manager or manager of a company or an enterprise that has entered into insolvent liquidation and who was personally liable for the insolvency of such company or enterprise, where no more than three years have elapsed since the date of the completion of the bankruptcy and liquidation of the company or enterprise;
- (iv) a person who has been a legal representative of a company or an enterprise that has had its business license revoked due to violations of the law or has been ordered to close down by law and the person was personally responsible, where less than three years have elapsed since the date of such revocation of business license or shutdown order; or
- (v) a person identified as a subject of enforcement for breach of trust by the people's court for failure to repay a significant amount of overdue debts.

Where a company elects or appoints a director to which any of the above circumstances applies, such election or appointment shall be null and void. A director to which any of the above circumstances applies during his/her term of office shall be released from his/her duties by the company.

Pursuant to the PRC Company Law, the board of directors shall appoint a chairman and may appoint a vice chairman. The chairman and the vice chairman shall be elected with approval of more than half of all the directors. The chairman shall convene and preside over board meetings and review the implementation of board resolutions. The vice chairman shall assist the chairman to perform his/her duties. Where the chairman is incapable of performing or is not performing his/her duties, the duties shall be performed by the vice chairman. Where the vice chairman is incapable of performing or is not performing his/her duties, a director elected by more than half of the directors shall perform his/her duties.

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

Supervisory Committee or Audit Committee

Pursuant to the PRC Company Law, a company shall have a supervisory committee composed of not less than three members. The supervisory committee shall consist of representatives of the shareholders and an appropriate proportion of representatives of the company's staff, among which the proportion of representatives of the company's staff shall not be less than one-third, and the actual proportion shall be determined in the articles of association. Representatives of the company's staff at the supervisory committee shall be democratically elected by the company's staff at the staff representative assembly, general staff meeting or otherwise. The supervisory committee shall appoint a chairman and may appoint a vice chairman. The chairman and the vice chairman of the supervisory committee shall be elected by more than half of the supervisors. Directors and senior management shall not act concurrently as supervisors.

The chairman of the supervisory committee shall convene and preside over supervisory committee meetings. Where the chairman of the supervisory committee is incapable of performing or is not performing his/her duties, the vice chairman of the supervisory committee shall convene and preside over supervisory board meetings. Where the vice chairman of the supervisory committee is incapable of performing or is not performing his/her duties, a supervisor nominated by more than half of the supervisors shall convene and preside over meetings of the supervisory committee.

Each term of office of a supervisor is three years and he/she may serve consecutive terms if re-elected. A supervisor shall continue to perform his/her duties as a supervisor in accordance with the laws, administrative regulations and the articles of association until a duly re-elected supervisor takes office, if re-election is not conducted in a timely manner upon the expiry of his/her term of office or if the resignation of supervisors results in the number of supervisors being less than the quorum.

The supervisory committee may exercise its powers:

- (i) to examine the company's financial operations;
- (ii) to supervise the directors and senior management in their performance of their duties and to propose the removal of directors and senior management who have violated laws, regulations, the articles of association or shareholders' resolutions;
- (iii) when the acts of directors or senior management are detrimental to the company's interests, to require the director and senior management to correct these acts;
- (iv) to propose the convening of extraordinary shareholders' general meetings and to convene and preside over shareholders' general meetings when the board fails to perform the duty of convening and presiding over shareholders' general meetings under the PRC Company Law;

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

- (v) to submit proposals to the shareholders’ general meetings;
- (vi) to bring actions against directors and senior management pursuant to the relevant provisions of the PRC Company Law; and
- (vii) to exercise any other authority stipulated in the articles of association.

Supervisors may be present at board meetings and make inquiries or proposals in respect of the resolutions of the board. The supervisory committee may investigate any irregularities identified in the operation of the company and, when necessary, may engage an accounting firm to assist its work at the cost of the company.

A company may, in accordance with its articles of association, set up an audit committee consisting of directors on its board to exercise the powers and functions of the supervisory committee under the provisions of the PRC Company Law and may not have a supervisory committee or supervisors.

Pursuant to the PRC Company Law, an audit committee shall have three or more members, more than half of whom shall not hold any position within the company other than that of director and shall not have any relationship with the company that may affect their independent and objective judgment. Employee representatives serving as members of the company’s board of directors may serve as members of the audit committee. Resolutions of the audit committee shall be adopted by more than half of its members. Each member of the audit committee shall have one vote in the voting on resolutions. The procedures for deliberation and voting of the audit committee, unless otherwise stipulated by the PRC Company Law, shall be specified in the company’s articles of association.

Where a listed company establishes an audit committee within its board of directors, the board of directors shall obtain the approval of more than half of all members of the audit committee before adopting resolutions on the following matters:

- (i) engaging or dismissing an accounting firm undertaking the company’s audit business;
- (ii) appointing or dismissing the financial officer;
- (iii) disclosure of financial and accounting reports; and
- (iv) other matters stipulated by the CSRC.

Pursuant to the Guidance for Articles of Association, a listed company should set up audit committee to exercise the powers and functions of the supervisory committee provided in the PRC Company Law.

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

Manager and Senior Management

Pursuant to the PRC Company Law, a company shall have a manager who shall be appointed or removed by the board of directors. The manager shall report to the board of directors and exercise functions and powers as specified in the articles of association or as authorized by the board of directors.

The manager shall attend meetings of the board of directors as a non-voting attendee.

Pursuant to the PRC Company Law, senior management refers to the manager, deputy manager, financial officer, secretary to the board of directors of a listed company and other personnel as stipulated in the articles of association.

Duties of Directors, Supervisors, Managers and Other Senior Management

Directors, supervisors and senior management are required under the PRC Company Law to comply with the relevant laws, regulations and the articles of association, and shall be obliged to be faithful and diligent towards the Company.

Directors and senior management are prohibited from:

- (i) embezzling company property, misappropriation of the company's capital;
- (ii) depositing company funds into accounts under their own names or the names of other individuals;
- (iii) giving bribes or accepting any other illegal proceeds by taking advantage of their own power;
- (iv) accepting commissions paid by a third party for transactions conducted with the company for their own benefit;
- (v) unauthorized divulgence of confidential information of the company; and
- (vi) other acts in violation of their duty of loyalty to the company.

Income generated by directors or senior management in violation of aforementioned shall be returned to the company.

A director, supervisor or senior management who contravenes any laws, regulations or the company's articles of association in the performance of his/her duties resulting in any loss to the company shall be liable to the company for compensation.

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

The Guidance for Articles of Association provides that a company’s directors and senior management shall have duties of diligence towards the company, for example, the directors shall be prudent, serious and diligent in exercising the authority conferred by the company to ensure that the business activities of the company comply with state’s laws, administrative regulations and various economic policy requirements and that the business activities do not go beyond the scope of business activities specified in the company’s business license; the directors shall treat all shareholders equally; the shareholders shall keep abreast of the company’s business management status; both the directors and the senior management shall sign written statements confirming periodic reports of the company and ensure that the information disclosed by the company is true, accurate and complete; both the directors and the senior management shall provide accurate information and materials to the supervisory committee and shall not interfere with the performance of duties by the supervisory committee or individual supervisors; both the directors and the senior management shall have other diligence duties prescribed by laws, administrative regulations, departmental rules and the company’s articles of association.

The Overseas Listing Trial Measures stipulate that the filing materials for overseas listing of domestic companies shall be true, accurate and complete, and shall not contain false records, misleading statements or material omissions. Domestic companies and their controlling shareholders, de facto controllers, directors, supervisors and senior management shall fulfill their obligations of information disclosure in accordance with the law, be honest, trustworthy, diligent and responsible and ensure that the filling materials are true, accurate and complete.

Finance and Accounting

Pursuant to the PRC Company Law, a company shall establish its own financial and accounting systems according to the laws, administrative regulations and the regulations of the competent financial departments of the State Council. At the end of each financial year, a company shall prepare a financial report which shall be audited by an accounting firm in accordance with the laws. The financial and accounting reports shall be prepared in accordance with the laws, administrative regulations and the regulations of the financial departments of the State Council.

The company’s financial reports shall be made available for shareholders’ inspection at the company twenty days before the convening of an annual general meeting. A joint stock limited company that makes public stock offerings shall publish its financial reports.

When distributing each year’s profits after taxation, the company shall set aside 10% of its profits after taxation for the company’s statutory common reserve fund until the fund has reached more than 50% of the company’s registered capital. When the company’s statutory common reserve fund is not sufficient to make up for the company’s losses for the previous years, the current year’s profits shall first be used to make good the losses before any allocation is set aside for the statutory common reserve fund. After the company has made allocations to the statutory common reserve fund from its profits after taxation, it may, upon passing a resolution at a shareholders’ general meeting, make further allocations from its profits after

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

taxation to the discretionary common reserve fund. After the company has made good its losses and made allocations to the abovementioned reserve fund, the remaining profits after taxation shall be distributed in proportion to the number of shares held by the shareholders, except for those which are not distributed in a proportionate manner as provided by the articles of association.

Profits distributed to shareholders by a resolution of a shareholders’ general meeting or the board of directors before losses have been made good and allocations have been made to the statutory common reserve fund in violation of the requirements described above must be returned to the company. The company shall not be entitled to any distribution of profits in respect of shares held by it.

The reserve of a company shall be used for making up losses, expanding the production and business scale or increasing the registered capital of the company. Where the reserve of a company is used for making up losses, the discretionary reserve and statutory reserve shall be firstly used. If losses still cannot be made up, the capital reserve can be used according to the relevant provisions. Upon the transfer of the statutory common reserve fund into capital, the balance of the statutory common fund shall not be less than 25% of the registered capital of the company before such transfer.

The company shall have no accounting books other than the statutory books. The company’s assets shall not be deposited in any account opened under the name of an individual.

Appointment and Dismissal of Accounting Firm

The Guidance for Articles of Association provides that a company shall engage an accounting firm which is qualified with the PRC Securities Law to provide services including the audit of financial statements, the verification of net assets and other relevant consultancy services. The engagement term is one year and may be extended.

Pursuant to the PRC Company Law, the appointment or dismissal of an accounting firm responsible for the company’s auditing shall be determined by shareholders at a shareholders’ general meeting or the board of directors in accordance with the articles of association. The accounting firm should be allowed to make representations when the general meeting or the board of directors conduct a vote on the dismissal of the accounting firm. The company should provide true and complete accounting evidence, accounting books, financial and accounting reports and other accounting information to the engaged accounting firm without any refusal, withholding or falsification of information. Furthermore, the Guidance for Articles of Association provides that the audit fee for the accounting firm shall also be determined by shareholders at a general meeting.

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

Profit Distribution

Pursuant to the PRC Company Law, a company shall not distribute profits before losses are covered and the statutory common reserve fund is drawn. At the same time, the Overseas Listing Trial Measures stipulate that domestic enterprises may raise funds and pay dividends in foreign currencies or RMB for overseas listings.

Amendments to the Articles of Association

Pursuant to the PRC Company Law, the resolution of a shareholders’ general meeting regarding any amendment to a company’s articles of association requires affirmative votes by more than two-thirds of the votes held by shareholders attending the meeting.

Pursuant to the Guidance for Articles of Association, the company shall amend its articles of association under any of the following circumstances:

- (i) where, after any amendment to the PRC Company Law or any other applicable law or administrative regulation, the provisions of the articles of association conflict with the law and/or administrative regulations amended;
- (ii) where the company’s circumstances change to such an extent that they are inconsistent with what is recorded in the articles of association; and
- (iii) where the shareholders’ general meeting decides to amend the articles of association.

The Guidance for Articles of Association further provides that where any amendment to the articles of association adopted by a shareholders’ general meeting is subject to approval by the competent authorities, such amendment shall be submitted for approval; where any amendment involves the company’s registration items, the company’s registration with the authority shall also be amended. In addition, an announcement shall be made in accordance with the applicable provisions provided that the amendment to the articles of association is required to be disclosed by any law or regulation.

Dissolution and Liquidation

Pursuant to the PRC Company Law, a company shall be dissolved for any of the following reasons:

- (i) the term of its operation set out in the articles of association has expired or other events of dissolution specified in the articles of association have occurred;
- (ii) the shareholders have resolved at a shareholders’ general meeting to dissolve the company;

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

- (iii) the company is dissolved by reason of its merger or division;
- (iv) the business license of the company is revoked or the company is ordered to close down or to be dissolved in accordance with the laws; or
- (v) the company is dissolved by a people's court in response to the request of shareholders holding shares that represent more than 10% of the voting rights of all shareholders of the company, on the grounds that the operation and management of the company has suffered serious difficulties that cannot be resolved through other means, rendering ongoing existence of the company a cause for significant losses to the shareholders' interests.

In the event of paragraph (i) or (ii) above, and it has not distributed the assets to its shareholders yet, the company may carry on its existence by amending its articles of association or upon a resolution of the shareholders' meeting. The amendments to the articles of association in accordance with the provisions described above shall require the approval of more than two-thirds of voting rights of shareholders attending a shareholders' general meeting.

Where the company is dissolved under the circumstances set forth in paragraph (i), (ii), (iv) or (v) above, it should establish a liquidation committee within fifteen days of the date on which the dissolution event occurs. The directors, who are the liquidation obligors of the company, shall form a liquidation group to carry out liquidation within fifteen days from the date of occurrence of the cause of dissolution. The liquidation committee may exercise following powers during the liquidation:

- (i) to dispose of the company's assets and to prepare a balance sheet and an inventory of assets;
- (ii) to notify the company's creditors or publish announcements;
- (iii) to deal with and settle any outstanding business related to the liquidation;
- (iv) to pay any overdue tax together with any tax arising during the liquidation process;
- (v) to settle the company's claims and liabilities;
- (vi) to distribute the company's remaining assets after its debts have been paid off; and
- (vii) to represent the company in any civil procedures.

The liquidation committee shall notify the company's creditors within ten days from its establishment and publish an announcement in newspapers within sixty days.

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

A creditor shall lodge his claim with the liquidation committee within thirty days of receipt of the notification or within forty-five days of the date of the announcement if he has not received any notification.

A creditor shall, in making his claim, state matters relevant to his creditor’s rights and furnish relevant evidence. The liquidation committee shall register such creditor’s rights. The liquidation committee shall not make any settlement to creditors during the period of the claim.

Upon disposal of the company’s property and preparation of the required balance sheet and inventory of assets, the liquidation committee shall draw up a liquidation plan and submit this plan to a shareholders’ general meeting or a people’s court for endorsement. The remaining assets of the company, after payment of liquidation expenses, employee wages, social insurance expenses and statutory compensation, outstanding taxes and the company’s debts, shall be distributed to shareholders in proportion to shares held by them. The company shall continue to exist during the liquidation period, although it cannot engage in operating activities that are not related to the liquidation. The company’s property shall not be distributed to shareholders before repayments are made in accordance with the requirements described above.

Upon liquidation of the company’s property and preparation of the required balance sheet and inventory of assets, if the liquidation committee becomes aware that the company does not have sufficient assets to repay its liabilities, it must apply to a people’s court for a declaration of bankruptcy liquidation in accordance with the laws. After the people’s court accepts the application for bankruptcy, the liquidation committee shall hand over the liquidation matters to the bankruptcy administrator designated by the people’s court.

Upon completion of the liquidation, the liquidation committee shall prepare a liquidation report and submit it to the shareholders’ general meeting or a people’s court for confirmation of its completion, and to the company registration authority to cancel the company’s registration. The members of the liquidation group performing their duties of liquidation are obliged to loyalty and diligence. Any member of the liquidation group who neglects to fulfill his/her liquidation duties, thus causing any loss to the company, shall be liable for compensation, and any member of the liquidation group who causes any loss to any creditor due to his/her intentional or gross negligence shall be liable for compensation.

Liquidation of a company declared bankrupt according to laws shall be processed in accordance with the laws on corporate bankruptcy.

Overseas Listing

Pursuant to the Overseas Listing Trial Measures, both initial public offerings or listings in overseas markets shall be filed with the CSRC within three business days after the relevant application is submitted overseas. Subsequent securities offerings of an issuer in the same overseas market where it has previously offered and listed securities shall be filed with the CSRC within three business days after the offering is completed. Moreover, where the filing

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

documents are complete and in compliance with stipulated requirements, the CSRC will, within twenty business days after receiving the filing documents, conclude the filing procedure and publish the filing results on the CSRC website. Where the filing documents are incomplete or do not conform to stipulated requirements, the CSRC shall request supplementation and amendment thereto within five business days after receiving the filing documents. The issuer shall then complete supplementation and amendment within thirty business days.

Loss of Share Certificates

A shareholder may, in accordance with the public notice procedures set out in the PRC Civil Procedure Law, apply to a people's court if his share certificate(s) in registered form is either stolen, lost or destroyed, for a declaration that such certificate(s) will no longer be valid. After such a declaration has been obtained, the shareholder may apply to the company for the issue of a replacement certificate(s).

Merger and Demerger

Pursuant to the PRC Company Law, merger of companies may be conducted by absorption or consolidation. If companies adopt the method of absorption, the absorbed company shall be dissolved. If companies are incorporated in the form of consolidation, the parties to the merger shall be dissolved.

The parties to the merger shall enter into a merger agreement and prepare a balance sheet and a list of properties. The companies involved shall notify their creditors within ten days from the date of the resolution on the merger and make an announcement within thirty days. Within ten days of the date on which the resolution on merger is made, the creditors shall be notified by the company and a public announcement in newspaper or on the National Enterprise Credit Information Publicity System shall be made in the press within thirty days. The creditors may require the company to repay its debts or provide guarantees for covering the debts within thirty days of receipt of the notification or within forty-five days of the date of the announcement if the creditor has not received any notification; and in case of a merger, the credits and debts of the merging parties shall be assumed by the surviving or the new company.

In case of a division, the company's assets shall be divided and a balance sheet and an inventory of assets shall be prepared. Within ten days of the date on which the resolution on division is made, the creditors shall be notified by the company and a public announcement in the newspaper or the National Enterprise Credit Information Publicity System shall be made in the press within thirty days. The liabilities of the company which have accrued prior to the division shall be jointly borne by the separated companies, unless otherwise stipulated in the agreement in writing entered into by the company with creditors in respect of the settlement of debts prior to division.

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

The PRC Securities Law, Regulations and Regulatory Regimes

The PRC has promulgated a series of regulations that relate to the issue and trading of the shares and disclosure of information. In October 1992, the State Council established the Securities Committee and the CSRC. The Securities Committee is responsible for coordinating the drafting of securities regulations, formulating securities-related policies, planning the development of securities markets, directing, coordinating and supervising all securities related institutions in the PRC and administering the CSRC. The CSRC is the regulatory arm of the Securities Committee and is responsible for the drafting of regulatory provisions governing securities markets, supervising securities companies, regulating public offerings of securities by PRC companies in the PRC or overseas, regulating the trading of securities, compiling securities-related statistics and undertaking relevant research and analysis. In April 1998, the State Council consolidated the Securities Committee and the CSRC and reformed the CSRC.

The PRC Securities Law is the first national securities law in China, and the regulatory matters include the issuance and trading of securities, the acquisition of listed companies, information disclosure, obligations and responsibilities of stock exchanges, securities companies and securities regulatory authorities, etc. The PRC Securities Law comprehensively regulates activities in the PRC securities market.

Pursuant to the PRC Securities Law, domestic enterprises issuing securities overseas directly or indirectly or listing and trading their securities overseas shall comply with the relevant provisions of the State Council. At present, the issuance and trading of shares (including H Shares) issued overseas is mainly regulated by rules and regulations issued by the State Council and the CSRC.

Arbitration and Enforcement of Arbitral Awards

The Arbitration Law of the PRC (《中華人民共和國仲裁法》) (the “**PRC Arbitration Law**”) was enacted by the Standing Committee of the National People’s Congress on August 31, 1994, and was last amended on September 1, 2017 and came into effect on January 1, 2018. The PRC Arbitration Law provides that an arbitration committee may, before the promulgation of arbitration regulations by the PRC Arbitration Association, formulate interim arbitration rules in accordance with the PRC Arbitration Law and the PRC Civil Procedure Law. Where the parties have agreed to settle disputes by means of arbitration, a people’s court will refuse to handle a legal proceeding initiated by one of the parties at such people’s court, unless the arbitration agreement is invalid.

Under the PRC Arbitration Law and the PRC Civil Procedure Law, an arbitral award shall be final and binding on the parties involved in the arbitration. If any party fails to comply with the arbitral award, the other party to the award may apply to a people’s court for its enforcement.

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

If the respondent puts forward evidence to prove that the arbitral award is under any of the following circumstances, the award shall not be enforced upon examination and verification by an arbitration tribunal of the people’s court:

- (i) the parties have no arbitration clause in their contract, nor have subsequently reached a written agreement on arbitration;
- (ii) the matter to be ruled does not fall within the scope of the arbitration agreement or the arbitration institution has no right to arbitrate;
- (iii) the composition of the arbitration tribunal or the arbitration procedure violates the legal procedure;
- (iv) the evidence on which the award is based is forged;
- (v) the other party conceals evidence sufficient to influence the impartial award from the arbitration institution;
- (vi) the arbitrators have committed acts of embezzlement, bribery, favoritism and malpractices, or perverting the law in arbitrating the case.

If the people’s court determines that the enforcement of the award violates the public interest, the award shall not be enforced.

Any party seeking to enforce an arbitral award of a foreign affairs arbitration organ of the PRC against a party who or whose property is not located within the PRC may apply to a foreign court with jurisdiction over the case for recognition and enforcement of the award. Likewise, an arbitral award made by a foreign arbitration body may be recognized and enforced by a PRC court in accordance with the principle of reciprocity or any international treaties concluded or acceded to by the PRC.

The PRC acceded to the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (《承認及執行外國仲裁裁決公約》) (the “**New York Convention**”) adopted on June 10, 1958 pursuant to a resolution of the Standing Committee of the National People’s Congress passed on December 2, 1986. The New York Convention provides that all arbitral awards made in a state which is a party to the New York Convention shall be recognized and enforced by other parties thereto subject to their rights to refuse enforcement under certain circumstances, including where the enforcement of the arbitral award is against the public policy of that state. At the time of the PRC’s accession to the convention, the Standing Committee of the National People’s Congress declared that (i) the PRC will only apply the New York Convention to the recognition and enforcement of arbitral awards made in the territory of another contracting state based on the principle of reciprocity; and (ii) the New York Convention will only apply to disputes deemed under PRC law to be arising from contractual or non-contractual mercantile legal relations.

APPENDIX IV SUMMARY OF PRINCIPAL LAWS AND REGULATIONS

The Arrangements on the Mutual Enforcement of Arbitral Awards between the Mainland and the Hong Kong Special Administrative Region (《關於內地與香港特別行政區相互執行仲裁裁決的安排》) were passed at the Judicial Committee meetings of the Supreme People’s Court on June 18, 1999, which came into effect on February 1, 2000. The Supplementary Arrangements of Supreme People’s Court on Reciprocal Enforcement of Arbitration Awards between the Mainland and the Hong Kong Special Administrative Region (《關於內地與香港特別行政區相互執行仲裁裁決的補充安排》) were promulgated by the Supreme People’s Court on December 26, 2020. Under these arrangements, if a party fails to perform the arbitral award rendered in the Mainland or the Hong Kong Special Administrative Region of the PRC (“**Hong Kong**”), the other party may apply for enforcement to the relevant court in the place where the respondent is domiciled or where the property is located.

Judicial Judgment and its Enforcement

Pursuant to the Arrangements for Reciprocal Recognition and Enforcement of Judgments in Civil and Commercial Cases between Courts of the Mainland and Hong Kong Special Administrative Region (《關於內地與香港特別行政區法院相互認可和執行民商事案件判決的安排》), which was promulgated by the Supreme People’s Court on January 25, 2024 and implemented on January 29, 2024, except for judgments in civil and commercial cases that are not applicable under Article 3 of this Arrangements, judgments that can be recognized and enforced in both places are those made by mainland China and Hong Kong Special Administrative Region courts on or after January 29, 2024. The mutually recognized and enforced judgments include monetary judgments and non-monetary judgments.

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

This Appendix is mainly providing investors with an overview on the Articles of Association of our Company. The following information is only a summary, not covering all the information that may be material to investors.

SHARES AND REGISTERED CAPITAL

The issuance of the shares of our Company shall be conducted in the principle of fairness and justness, and each share of the same class shall be entitled to equal rights. For shares issued at the same time and within the same class, it shall be issued in the same conditions and price; and subscribers shall pay the same price for each share they subscribe. The domestic unlisted shares issued by our Company shall be deposited at a domestic securities depository and settlement agency. The overseas [REDACTED] shares [REDACTED] by our Company may be deposited in accordance with applicable laws of Hong Kong and the general practice of securities registration and depository and may be held by the Shareholder in the name of an individual.

INCREASE/DECREASE, REPURCHASE AND TRANSFER OF SHARES

Increase/Decrease of Shares

According to the needs for the operation and development of our Company, and subject to applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue, and requirements by relevant domestic and overseas securities regulatory authorities upon respective resolution by a Shareholders’ meeting, our Company may increase its registered capital by any of the following means:

- (1) issuing shares to non-specifically designated parties;
- (2) issuing shares to specifically designated parties;
- (3) distribution of bonus shares to existing Shareholders;
- (4) converting the reserved funds into share capital; or
- (5) other means stipulated by applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and approved by or filed with the relevant domestic and overseas securities regulatory authorities.

To reduce its registered capital, our Company shall proceed in compliance with the PRC Company Law, the Listing Rules, other relevant applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association.

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

Repurchase of Shares

In any of the following circumstances, our Company may repurchase its issued shares in accordance with the PRC Company Law, the Listing Rules and other relevant applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association and subject to the registration or filing with the relevant domestic and overseas securities regulatory authorities:

- (1) reducing the registered capital of our Company;
- (2) merging with another company holding shares of our Company;
- (3) using shares for stock incentive plans and employee stock plans;
- (4) acquiring the shares of Shareholders who vote against any resolution adopted at the Shareholders’ meeting on the merger or demerger of our Company and request our Company to acquire their shares;
- (5) using shares for converting corporate bonds issued by our Company convertible into shares;
- (6) as required for our Company to maintain corporate value and Shareholders’ interests; or
- (7) other circumstances approved by applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and regulatory authorities.

Any repurchase under circumstances (3), (5) or (6) above, subject to the requirements of the Listing Rules and the regulatory rules and guidelines of the Hong Kong Stock Exchange, shall be conducted through open and centralized trading.

A resolution of a Shareholders’ meeting is required for repurchasing shares under circumstances (1) or (2) above. In accordance with the provisions of the Articles of Association or the authorization of the Shareholders’ meeting, repurchase of shares under circumstances (3), (5) or (6) above may be resolved by a resolution of a meeting of the Board with a quorum of no less than two-thirds of Directors, unless otherwise provided by the Listing Rules. In compliance with securities regulatory provisions of the stock exchange [REDACTED] venue, the shares acquired under the above circumstance (1), shall be de-registered within ten days from the date of repurchase; the shares acquired under the above circumstances (2) or (4), shall be transferred or de-registered within six months; and the shares acquired under the above circumstances (3), (5) or (6), shall be transferred or de-registered within three years, and the shares held in total by our Company shall not exceed 10% of total shares issued by our Company. Where applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and domestic and overseas securities regulatory authorities provide otherwise regarding the relevant matters involved in the aforementioned share repurchase, those provisions shall prevail.

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

Where our Company acquires its own shares, it shall fulfill its information disclosure obligations in accordance with applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the relevant requirements of domestic and overseas securities regulatory authorities.

Transfer of Shares

Unless otherwise required by applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association, the fully paid shares of our Company may be transferred freely. The transfer of overseas listed shares shall be registered with the local Hong Kong share registrar entrusted by our Company.

Shares issued by our Company prior to the [REDACTED] shall not be transferred within one year from the date our Company’s shares are [REDACTED] and [REDACTED] on the Hong Kong Stock Exchange.

The Directors and senior management of our Company shall report their shareholding in our Company and changes thereof to our Company, and during their tenure determined at the time of taking office, the shares transferred by them each year shall not exceed 25% of the total number of Company shares held by them; the shares held by them shall not be transferred within one year from the date when the shares of our Company are [REDACTED] and [REDACTED]; within half a year from departure from our Company, the aforesaid persons shall not transfer our Company shares held by them. If applicable laws, administrative regulations, departmental rules, normative documents and securities regulatory provisions of the stock exchange [REDACTED] venue provide otherwise, such rules shall apply in the principle of strictness.

All transfers of overseas listed shares shall adopt the written transfer instrument in general or common format or any other form acceptable to the Board (including the standard transfer format or transfer form prescribed by Hong Kong Stock Exchange from time to time) or a form permitted by applicable laws, administrative regulations, department rules, regulatory documents, or securities regulatory provisions of the stock exchange [REDACTED] venue (including the standard transfer format or transfer form prescribed by Hong Kong Stock Exchange from time to time); the written transfer documents may only be manually signed with signatures, or (if the transferor or the transferee is a corporation) stamped with valid seals. If the transferor or transferee of the shares of our Company is a recognized clearing house or its nominee as defined by the relevant regulations in force from time to time under the laws of Hong Kong, the written transfer documents may be signed by hand or machine printing. All transfer documents must be placed at the legal address of our Company, the address of the transfer office or such other place as the Board may designate from time to time. If our Company refuses to register the transfer of shares, our Company shall, within two months from the date of the formal application for transfer, provide the transferor and transferee with a notice of refusal to register the transfer of the shares.

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

SHAREHOLDERS AND SHAREHOLDERS' MEETING

Shareholders

Our Company establishes its register of Shareholders based on certificates provided by the securities registrar and the register of Shareholders shall be the prima facie evidence of share ownership, unless there is evidence to the contrary. Shareholders enjoy rights and assume obligations according to the class of shares they hold; each share of the same class shall bear the same rights and obligations.

The Shareholders of our Company shall be entitled to the following rights:

- (1) receiving dividends and other forms of interest distribution in proportion to their shareholdings;
- (2) requiring, convening, chairing, attending by person or by proxy a Shareholders' meeting pursuant to the laws, and exercising the relevant speaking right, inquiry right and voting right at the meeting (except for waiver of voting right required by the securities regulatory rules in the jurisdiction where our Company's shares are listed);
- (3) supervising, presenting suggestions on or making inquiries about the business operation of our Company;
- (4) transferring, gifting or pledging the shares held by them, in accordance with applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association;
- (5) accessing and replicating the Articles of Association, the register of Shareholders, minutes of Shareholders' meeting, resolutions of Board and publicly disclosed financial data and accounting reports;
- (6) participating in the distribution of residual assets of our Company in proportion to their shareholdings, upon termination or liquidation of our Company;
- (7) for Shareholders who vote against any resolution adopted at the Shareholders' meeting on the merger or demerger of our Company, requesting our Company to acquire its shares; and
- (8) any other rights stipulated by applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue or the Articles of Association.

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

In the event that any resolution by the Shareholders’ meeting or the Board meeting violates applicable laws and administrative regulations, the Shareholders may request people’s court to invalidate such a resolution. In the event that the convening procedures or voting means of the Shareholders’ meeting or the Board meeting violate applicable laws, administrative regulations or the Articles of Association, or any resolution violates the Articles of Association, Shareholders may request people’s court to withdraw such resolution within sixty days from the date of resolution, unless there are only minor defects in the convening procedures or voting means of the Shareholders’ meeting or the Board meeting, which do not have a material impact on the resolutions.

The Shareholders of our Company shall undertake the following obligations:

- (1) abiding by applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association;
- (2) making payment according to the number of shares subscribed for and the manners of subscription;
- (3) not withdrawing the shares, unless otherwise stipulated by applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association;
- (4) not abusing Shareholder’s rights to harm the interests of our Company or other Shareholders; not abusing the independent legal person status of our Company and the limited liability of Shareholders to harm the interests of our Company’s creditors; and
- (5) any other obligations stipulated by applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association.

Any Shareholder who abuses Shareholder’s rights causing losses to our Company or other Shareholders shall be liable for compensation pursuant to the laws. Any Shareholder who abuses the independent legal person status of our Company and the limited liability of Shareholders to evade debts and severely infringe upon the interests of our Company’s creditors shall be held jointly and severally liable for our Company’s debts.

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

Controlling Shareholder and Actual Controller

The controlling Shareholder and actual controller of our Company shall exercise their rights and perform their obligations pursuant to the provisions of applicable laws, administrative regulations, department rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue, and domestic and foreign securities regulatory requirements, protect the interests of our Company. The controlling Shareholder and actual controller of our Company shall comply with the following provisions:

- (1) exercise shareholder rights in accordance with the law, and shall not abuse controlling rights or use connected relationships to harm the legitimate rights and interests of our Company or other shareholders;
- (2) strictly fulfill all public statements and commitments made, and shall not arbitrarily modify or waive them;
- (3) strictly perform information disclosure obligations in accordance with relevant regulations, actively cooperate with our Company in information disclosure work, and promptly inform our Company of any major events that have occurred or are planned to occur;
- (4) shall not occupy Company's funds in any form;
- (5) shall not compel, direct, or require our Company and its personnel to provide illegal or non-compliant guarantees;
- (6) shall not use our Company's undisclosed material information for personal gain, disclose any undisclosed material information related to our Company in any form, or engage in illegal or non-compliant activities such as insider trading, short-swing trading, or market manipulation;
- (7) shall not harm the legitimate rights and interests of our Company and other Shareholders through non-arm's length connected transactions, profit distribution, asset restructuring, external investments, or any other means;
- (8) ensure our Company's asset integrity, personnel independence, financial independence, organizational independence and business independence, and shall not affect our Company's independence in any way; and
- (9) other provisions stipulated by applicable laws, administrative regulations, department rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association.

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

If our Company's controlling shareholder or actual controller does not serve as a director but de facto manages our Company's affairs, the provisions of the Articles of Association regarding directors' fiduciary duties and duty of diligence shall apply.

If our Company's controlling shareholder or actual controller instructs a director or senior management personnel to engage in conduct that harms the interests of our Company or its Shareholders, such controlling shareholder or actual controller shall bear joint and several liability with such director or senior management personnel.

General Rules for Shareholders' Meetings

The Shareholders' meeting is the organ of authority of our Company, and shall duly exercise the following functions and powers:

- (1) to elect and remove any Director and to determine the remuneration of the relevant Directors;
- (2) to review and approve the reports of the Board;
- (3) to review and approve our Company's annual financial budget plan and final accounts plan;
- (4) to review and approve our Company's annual report;
- (5) to review and approve our Company's profit distribution plans and loss recovery plans;
- (6) to resolve on our Company's increase/decrease of registered capital;
- (7) to resolve on our Company's issuance of bonds or any class of shares, warrants and other similar securities as well as the [REDACTED];
- (8) to resolve on our Company's merger, division, spin-off, dissolution, liquidation or change of its corporate form;
- (9) to amend the Articles of Association;
- (10) to decide on the engagement or dismissal of the accounting firm and the audit fee of the accounting firm;
- (11) to review and approve the motions proposed by Shareholder(s) individually or jointly holding at least 1% voting shares of our Company;

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

- (12) to review and approve the relevant transactions and guarantee matters required to be resolved by the Shareholders' meeting as specifically provided in the Articles of Association;
- (13) to review and approve transactions between our Company and its connected persons that meet the requirements for approval by the Shareholders' meeting under Listing Rules;
- (14) to review and approve our Company's purchase or disposals of material assets accumulated within one year in the amount exceeding 30% of the latest audited total assets of our Company;
- (15) to review and approve the change in the use of raised proceeds;
- (16) to review and approve the stock incentive plans and employee stock plans;
- (17) to adopt resolutions on certain acquisition of our Company's own shares by itself due to the circumstances as specifically provided in the Articles of Association; and
- (18) other matters to be decided by Shareholders' meeting under applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association.

There are two types of Shareholders' meetings, namely annual Shareholders' meeting and extraordinary Shareholders' meeting. The annual Shareholders' meeting shall be convened once a year and shall be held within six months from the end of last accounting year.

The extraordinary Shareholders' meeting shall be convened within two months from the date of occurrence of any of the following events:

- (1) the number of Directors is less than two-thirds of the quorum required by the PRC Company Law, or less than two-thirds of the quorum required by the Articles of Association;
- (2) the outstanding losses of our Company account for one-third of our Company's total share capital;
- (3) Shareholder(s) individually or jointly holding at least 10% shares of our Company send(s) a written request for meeting;
- (4) the Board deems necessary;
- (5) the Audit Committee proposes to convene the meeting;

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

- (6) more than two independent non-executive Directors propose to convene the meeting; or
- (7) other circumstances under applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue or the Articles of Association.

The motions proposed by the convener shall be included in the agenda of the Shareholders' meeting under circumstances (3), (4),(5), or (6) above.

Convening of Shareholders' Meetings

With the approval of more than half of all independent non-executive Directors, the independent non-executive Directors may propose to convene an extraordinary Shareholders' meeting. In accordance with applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association, the Board shall provide written feedback on whether to agree or disagree with the proposal to convene such extraordinary Shareholders' meeting within ten days after receiving the proposal. In the event the Board agrees to convene an extraordinary Shareholders' meeting, the Board shall issue an extraordinary Shareholders' meeting notice within five days of making its resolutions. In the event that the Board declines to convene an extraordinary Shareholders' meeting, the Board shall specify the reasons and make an announcement.

The Audit Committee may propose in writing to convene an extraordinary Shareholders' meeting. In accordance with applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association, the Board shall provide written feedback on whether to agree or disagree with the proposal to convene such extraordinary Shareholders' meeting within ten days after receiving the proposal. In the event the Board agrees to convene an extraordinary Shareholders' meeting, the Board shall issue an extraordinary Shareholders' meeting notice within five days of making its resolutions, and any changes to the original proposal in such notice shall be agreed upon by the Audit Committee. In the event that the Board declines to convene an extraordinary Shareholders' meeting or fails to respond within ten days, it shall be deemed to be unable or to fail to fulfill its duty to convene a Shareholders' meeting and then the Audit Committee may convene and preside over the meeting on its own.

Shareholder(s) individually or jointly holding 10% or more of shares may request in writing to convene an extraordinary Shareholders' meeting to the Board and specify the subject of the meeting. In accordance with applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue, and the Articles of Association for the meeting, the Board shall provide written feedback on whether to agree or disagree with the request to convene such extraordinary Shareholders' meeting within ten days after receiving the request. In the event the Board agrees to convene an extraordinary Shareholders' meeting, the Board shall issue an

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

extraordinary Shareholders' meeting notice within five days of making its resolutions, and any changes to the original request in such notice shall be agreed upon by the requesting Shareholder(s). In the event that the Board declines to convene an extraordinary Shareholders' meeting or fails to respond in writing within ten days after receiving the request, Shareholder(s) individually or jointly holding 10% or more of shares may request in writing to convene an extraordinary Shareholders' meeting to the Audit Committee. In the event the Audit Committee agrees to convene an extraordinary Shareholders' meeting, the Audit Committee shall issue an extraordinary Shareholders' meeting notice within five days of receiving such request, and any changes to the original request in such notice shall be agreed upon by the requesting Shareholder(s). In the event that the Audit Committee fails to issue the notice within the time limit, it shall be deemed to fail to convene and chair a Shareholders' meeting, and then the Shareholder(s) individually or collectively holding 10% or more of shares for at least ninety consecutive days may convene and chair the meeting on its/their own.

In the event of the Audit Committee or the Shareholder(s) convening and holding a Shareholders' meeting on its/their own, the necessary expenses incurred for such meeting shall be borne by our Company, which may be recovered by deducting the amount from any sums due to any defaulting Director(s) by our Company.

Notice of Shareholders' Meetings

To hold an annual Shareholders' meeting, the convener shall notify all Shareholders by announcement twenty-one days in advance. To hold an extraordinary Shareholders' meeting, the convener shall notify all Shareholders by announcement ten business days or fifteen days (whichever is longer) in advance. If applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association provide otherwise, such rules shall apply. The period shall exclude the date on which the meeting is convened.

The notice of Shareholders' meeting shall be made in writing (including paper documents or electronic documents that meet the requirements of the relevant regulatory rules of the [REDACTED] venue) and include the following:

- (1) the time, place and duration of meeting;
- (2) convening method of the meeting;
- (3) matters and proposals submitted to the meeting for review;
- (4) If any Director or senior officer has a material interest in the matter to be discussed at the meeting, the nature and degree of interest shall be disclosed; if the influence of the matter to be discussed on such a Director or senior officer in their capacity as Shareholders is different from the influence on other Shareholders, such difference shall be explained;

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

- (5) meeting materials necessary for Shareholder's voting;
- (6) explain in conspicuous words that all Shareholders have the right to attend the Shareholders' meeting and may appoint a proxy in writing to attend the meeting and participate in the vote, and the Shareholder proxy need not be a Shareholder of our Company;
- (7) state the time and address of delivery of the power of attorney for the voting proxy;
- (8) share registration date of the Shareholders entitled to attend the Shareholders' meeting;
- (9) the convener and chair of a meeting, the proposer of an extraordinary Shareholders' meeting and the proposer's written proposal;
- (10) name and telephone number of the permanent contact person for conference affairs;
- (11) time and voting procedures for online or other method of voting; and
- (12) the notice and supplementary notice shall contain information as required by Listing Rules and the Articles of Association and shall fully, completely and accurately disclose the specific contents of all proposals and all the information or explanations necessary for the Shareholders to make reasonable judgment on the proposed matters. In case the opinions of independent non-executive Directors are necessary for matters to be discussed, the opinions and reasons given by independent non-executive Directors shall be disclosed at the same time when the Shareholders' meeting notice or supplementary notice is issued.

Proposals at Shareholders' Meetings

When our Company convenes a Shareholders' meeting, the Shareholder(s) individually or jointly holding 1% or more of shares of our Company are entitled to put forward new proposals to our Company and submit them in writing to the convener ten days in advance, and the convener of the Shareholders' meeting shall issue a supplemental notice of Shareholders' meeting, announcing the contents of the new proposals, within two days after receiving such proposals, and include the matters in the new proposals that fall within the scope of authorities of the Shareholders' meeting in the agenda of the meeting and submit the same to the Shareholders' meeting for deliberation.

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

Proxy at Shareholders' Meetings

A Shareholder may appoint one or more persons (such persons need not be Shareholders) as proxies to attend and vote within the authorization scope on the Shareholders behalf.

The power of attorney issued by any Shareholder for appointing a proxy to attend the Shareholders' meeting shall include the instructions to vote for, vote against or abstain from each matter to be discussed as listed in the agenda of the Shareholders' meeting. Such power of attorney shall specify whether the proxy may vote at his/her own discretion in absence of instructions from the Shareholder. If it is not specified, it shall be deemed that the proxy is entitled to vote at his/her own discretion.

Where the appointing Shareholder dies, loses the capacity to act, withdraws the power of attorney, withdraws the authorization to sign the power of attorney or where the relevant shares have been assigned before voting, the vote made by the proxy so appointed shall be still valid, as long as our Company did not receive a notice in writing of such events before meeting.

Resolutions of Shareholders' Meetings

There are two kinds of resolutions made at Shareholders' meeting, namely ordinary resolutions and special resolutions. Ordinary resolutions shall be approved by more than half of voting rights held by the Shareholders (including proxies) attending the Shareholders' meeting. Special resolutions shall be approved by above two-thirds of the voting rights held by Shareholders (including proxies) attending the Shareholders' meeting.

A Shareholder or proxy shall exercise its voting rights pertaining to the voting shares held by it when voting at Shareholders' meeting, and each share shall have one vote. When voting on shares, Shareholders (including their proxies) with two or more voting rights are not required to cast all their votes in favor, against or in abstention on a proposal. However, there is no voting rights attached to the shares held by our Company, and such portion of shares shall not be included in the total number of shares with voting rights at Shareholders' meeting.

When the matters of connected transactions (as defined in the Listing Rules) are reviewed at Shareholders' meeting, connected Shareholders or their close associates (as defined in the Listing Rules) shall not vote, and the number of voting shares held by them shall not be included in the total number of valid votes. The announcement on resolution of Shareholders' meeting shall fully disclose the voting results of non-connected Shareholders. Before the Shareholders' meeting reviews connected transactions, our Company shall determine the scope of connected Shareholders in accordance with applicable laws, administrative regulations, departmental rules, normative documents, normative documents and securities regulatory provisions of the stock exchange [REDACTED] venue. Connected Shareholders or their proxies may attend the Shareholders' meeting and express their views to the attending Shareholders in accordance with the meeting procedures.

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

The following matters shall be approved by ordinary resolutions at the Shareholders’ meeting:

- (1) the election and replacement of Directors, determination of matters related to the remuneration of Directors;
- (2) the work report of the Board;
- (3) our Company’s annual report;
- (4) our Company’s annual financial budgets and final accounts plan formulated by the Board of Directors;
- (5) the profit distribution plan and plan for covering losses formulated by the Board;
- (6) the issuance of any class of shares, warrants and other similar securities as well as the [REDACTED] of our Company (provided that such matters have not been delegated to the Board by the Shareholders’ meeting);
- (7) the engagement and dismissal of the accounting firm(s) undertaking our Company’s auditing services, and the determination the auditing fees for the accounting firm(s);
- (8) certain acquisition of our Company’s own shares by itself due to the circumstances as specifically provided in the Articles of Association;
- (9) the relevant transactions and guarantee matters required to be resolved by the Shareholders’ meeting as specifically provided in the Articles of Association;
- (10) connected transactions between our Company and its connected persons that meet the requirements for approval by the Shareholders’ meeting under the Listing Rules;
- (11) change in the use of raised proceeds;
- (12) the stock incentive plans and employee stock plans; and
- (13) other matters to be decided by the Shareholders’ meeting other than those required to be approved by a special resolution under applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association.

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

The following matters shall be approved by special resolutions at the Shareholders' meeting:

- (1) the increase or decrease of share capital of our Company;
- (2) the merger, division, spin-off, termination, dissolution, liquidation or change of organizational form of our Company;
- (3) the amendment to the Articles of Association;
- (4) the purchase, disposals of material assets or provision of guarantees accumulated within one year in the amount exceeding 30% of latest audited total assets of our Company; and
- (5) any other matters to be approved by extraordinary resolutions as required by applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association as well as other matters that are determined by the ordinary resolutions of the Shareholders' meeting to have a significant impact on our Company and require to be approved by special resolutions.

DIRECTORS AND THE BOARD OF DIRECTORS

Directors

The Directors of our Company shall be natural persons.

Directors shall be elected or replaced at Shareholders' meeting, for a tenure of three years. Upon the expiration of his tenure, a Director may be re-elected and serve consecutive terms.

The tenure of the Director shall be from the date of appointment to the expiry of tenure of the current Board. If a Director's tenure expires but an alternate Director is not elected in time, then before the alternate Director holds office, the original Director shall still perform the duties as Director, in accordance with applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association.

A Director may propose resignation before expiry of tenure, by filing a resignation report in writing to the Board. The Board will disclose the relevant information within the time limit specified by applicable laws, administrative regulations, departmental rules, normative documents and securities regulatory provisions of the stock exchange [REDACTED] venue. Directors shall not evade their responsibilities through resignation or other means. If the resignation of a Director causes the number of Board members to be less than the quorum, then before the alternate Director holds office, the original Director shall still perform the duties as Director under applicable laws, administrative regulations, departmental rules, normative

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association. Otherwise, a Director’s resignation shall be effective from the time such resignation report is delivered to the Board.

Chairman

The Board shall have one chairman and may have several vice chairmen, who shall be elected by more than half of Directors.

The chairman of the Board shall exercise the following powers and functions:

- (1) leading the Board and ensuring the effective operation of the Board;
- (2) presiding over Shareholders’ meetings, convening and presiding over Board meetings, formulating and approving the agenda for each Board meeting, taking into account any matters proposed to be added to the agenda by other Directors where appropriate, and ensuring that all Directors at the Board meeting are properly informed of such matters;
- (3) supervising and inspecting the implementation of resolutions of the Board;
- (4) signing the securities issued by our Company;
- (5) signing the important documents of the Board within the scope of authorization by the Board and other documents which shall be signed by the legal representative of our Company, and to exercise the authorities of the legal representative;
- (6) in the event of extraordinary natural disasters, infectious disease epidemics or other force majeure emergencies, exercising special disposal rights for our Company’s affairs that are in line with applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue or the Articles of Association and the interests of our Company, and reporting to our Company’s Board and Shareholders’ meeting afterwards;
- (7) ensuring that Directors receive adequate information in a timely manner and that such information is accurate, clear, complete and reliable;
- (8) ensuring that appropriate measures are taken to maintain effective liaison with Shareholders and ensuring that Shareholders’ opinions can be conveyed to the entire Board;
- (9) ensuring that good corporate governance practices and procedures are formulated by our Company;

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

- (10) encouraging dissenting Directors to express their concerned matters, providing adequate time to discuss these matters, and ensuring that the resolutions of the Board can fairly reflect the consensus of the Board;
- (11) examining and approving other matters beyond the scope of authorities of the Shareholders’ meeting, the Board and the general manager prescribed by applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue or the Articles of Association; and
- (12) other duties granted by the Board.

Where the chairman is incapable of performing or fails to perform its duties, such duties shall be performed by vice chairmen; where the vice chairmen is incapable of performing or fails to perform its duties, such duties shall be performed by a Director jointly elected by more than half of Directors.

Board

Our Company sets up the Board, composed of 9 Directors. Directors of our Company shall be divided into executive Directors, non-executive Directors and independent non-executive Directors. The number of independent non-executive Directors shall account for at least one-third of the total number of the Board and shall be no less than three.

The Board shall exercise the following functions and powers:

- (1) convening the Shareholders’ meeting and submitting work reports to the Shareholders’ meetings;
- (2) implementing resolutions of the Shareholders’ meetings;
- (3) determining the operating plans and investment schemes of our Company;
- (4) formulating our Company’s annual financial budget plan and final accounts plan;
- (5) formulating the profit distribution plan and loss makeup plan of our Company;
- (6) formulating our Company’s plans for increase or decrease of the registered capital, issuance of corporate bonds or other securities, or [REDACTED] plans;
- (7) reviewing and approving the conversion of the domestic unlisted shares held by the Shareholders of our Company into overseas listed shares and the [REDACTED] and trading thereof on the Hong Kong Stock Exchange;

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

- (8) contemplating the plans for major acquisitions, share repurchase, merger, division, dissolution or change of corporate form of our Company;
- (9) deciding, to the extent authorized by the Shareholders’ meeting, our Company’s external investment, acquisition and sale of assets, mortgage of assets, external guarantee, entrusted management of wealth, connected transactions, external donations and other matters;
- (10) deciding on the setup of internal management bodies of our Company;
- (11) deciding on the appointment or dismissal of our Company’s general manager, Board secretary and other senior management personnel, and determining their remuneration and reward/punishment matters; Based on the nomination of the general manager, deciding on the appointment or dismissal of our Company’s deputy general manager, the person in charge of finance (or chief financial officer, the same as below), etc. and determining their remuneration and reward/punishment matters;
- (12) formulating and reviewing the fundamental management systems of our Company as well as business regulation policies and practices;
- (13) formulating the stock incentive plans and employee stock plans;
- (14) formulating the modification plan of the Articles of Association;
- (15) managing the information disclosure of our Company;
- (16) proposing to the Shareholders’ meeting the engagement or replacement of the accounting firm undertaking our Company’s audit services;
- (17) hearing the work reports by the general manager of our Company and inspecting the work performed by the general manager;
- (18) reviewing and supervising of the training and continuing professional development of Directors and senior management personnel;
- (19) reviewing and supervising our Company’s policies and practice in respect of compliance with applicable laws, administrative regulations, departmental rules, normative documents, and securities regulatory rules of the place where the shares are listed;
- (20) reviewing Company Compliance with the Code on Corporate Governance (Appendix C1 of the Hong Kong Listing Rules) and Disclosure in the Corporate Governance Reports;
- (21) changes in the main business of our Company and access to new business areas;

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

- (22) resolving on certain acquisition of our Company's own shares by itself due to the circumstances as specifically provided in the Articles of Association; and
- (23) any other functions and powers granted by applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue, the Articles of Association or the Shareholders' meeting.

Upon the consent of more than half of the Board, the chairman may be authorized to exercise certain functions and powers of the Board when it is not in session, which shall be determined by the Board resolutions. However, major matters of our Company shall be decided collectively by the Board. The statutory functions and powers that should be exercised by the Board shall not be delegated to the chairman, the general manager or others.

The Board shall explain to Shareholders' meeting about the non-standard audit opinions issued by the CPA firm against the financial statements of our Company.

The Board may hold two kinds of meetings, namely regular meetings and interim meetings. The Board shall hold at least four regular meetings per year, approximately once every quarter, convened by the chairman. The chairman shall hold at least one meeting annually with the independent non-executive Directors without the presence of other Directors. The notice and relevant documents for the regular meeting shall be delivered to all Directors at least fourteen days prior to the date of regular meetings (excluding the day on which the meeting is held) for the purpose of enabling all Directors to attend the meeting.

The notice of interim meetings shall be sent to all Directors five days prior to the date of interim meetings by fax, e-mail or other means. In an emergency requiring the Board to hold an interim meeting as soon as possible, the notice of meeting may be given by telephone or other oral means, provided that the convener shall make explanations at the meeting. With the consent of all Directors of our Company, the notification time limit specified as the foregoing may be waived.

A meeting of the Board may not be held without more than half of Directors being present. To determine whether a quorum of the meeting exists, any Director who or whose close associates (as defined in the Listing Rules) has an interest in or has a connection with any matter to be resolved at the meeting or is required to abstain from voting according to the Listing Rules shall not be counted.

Every Director may cast one vote. A motion at the meeting of the Board may be passed as resolution by a simple majority of all Directors unless otherwise required by the Articles of Association, and any Director who or whose close associates (as defined in the Listing Rules) has an interest in or has a connection with any matter to be resolved at the meeting, or is required to abstain from voting according to the Listing Rules shall abstain from

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

voting, nor shall they exercise voting rights on behalf of other Directors. Where the number of Directors who are not related (even connected) Directors attending the meeting is less than three persons, such proposal shall not be voted on and the matter shall be submitted to the Shareholders’ meeting for deliberation.

Directors shall attend Board meetings in person or actively participate in Board meetings through electronic means. A Director who is unable to attend a meeting for any reason shall appoint another Director to attend a Board meeting on its behalf in writing, and the appointed Director shall issue the power of attorney to the Board. The appointed Director shall exercise the rights as Director within the scope of authorization. The failure of a Director to attend a Board meeting in person or by proxy shall be deemed as forfeiting his/her voting rights at such meeting.

Board Special Committees

Audit Committee

The Board shall establish an Audit Committee. The Audit Committee shall comprise at least three members, all of whom must be non-executive Directors and may not serve as senior management of our Company. A majority shall be independent non-executive Directors, and at least one member shall be an independent non-executive Director who possesses either (1) an appropriate professional qualification recognized under the Hong Kong Listing Rules or (2) appropriate accounting or related financial-management expertise. The chairman must be an independent non-executive Director. In addition, more than half of the members may not hold any position in our Company other than that of Director and may not have any relationship with our Company that could affect their independent and objective judgment. Employee-representative Directors on the Board may serve on the Audit Committee. A former partner of our Company’s current external auditor is ineligible to serve on the Audit Committee for two years from the later of (1) the date he or she ceased to be a partner of the audit firm, or (2) the date he or she no longer holds any financial interest in the firm.

The Audit Committee is responsible for reviewing our Company’s financial information and its disclosure, supervising and evaluating the work of both internal and external auditors, and assessing internal controls. The following matters must be approved by a majority of all Audit Committee members before being submitted to the Board for consideration:

- (1) the disclosure of financial information in financial statements and periodic reports, as well as internal-control evaluation reports;
- (2) the engagement or dismissal of the accounting firm undertaking our Company’s auditing service;
- (3) the appointment or dismissal of the person in charge of finance of our Company;

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

- (4) changes in accounting policies or estimates, or corrections of material accounting errors, other than those resulting from changes in accounting standards;
- (5) any other matters required by applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue the Articles of Association, or domestic and foreign securities regulators.

The Audit Committee shall meet at least once each quarter. Extraordinary meetings may be convened upon the request of two or more members or whenever the convener deems it necessary. An Audit Committee meeting may be held only when at least two-thirds of its members are present, one of whom must be an independent non-executive Director. Resolutions of the Audit Committee shall be adopted by a simple majority of its members. Each member is entitled to one vote. Minutes of the meeting shall be prepared in accordance with applicable requirements and signed by all attending members. The Board shall adopt detailed rules governing the Audit Committee's work.

Nomination Committee and Remuneration Committee

The Board shall establish a Nomination Committee and a Remuneration Committee, which shall perform their duties in accordance with the Articles of Association and the Board's authorization. Proposals adopted by these committees shall be submitted to the Board for decision. The Board shall adopt detailed rules governing each committee's work.

The Nomination Committee shall be chaired by the Chairman of the Board or an independent non-executive Director; a majority of its members shall be independent non-executive Directors and it shall include at least one Director of a different gender.

The Remuneration Committee shall be chaired by an independent non-executive Director; a majority of its members shall be independent non-executive Directors.

The Nomination Committee is responsible for establishing selection criteria and procedures for Directors and senior management, identifying and reviewing candidates and their qualifications, and making recommendations to the Board on:

- (1) the nomination or removal of Directors;
- (2) the appointment or dismissal of senior management;
- (3) any other matters required by applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue, or the Articles of Association.

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

Where the Board does not adopt, or only partially adopts, the Nomination Committee's recommendations, the Board resolution must set out the committee's views and the specific reasons for non-adoption, and such information must be disclosed.

The Remuneration Committee is responsible for formulating performance-evaluation standards for Directors and senior management, conducting such evaluations, and designing, reviewing and recommending policies and procedures governing remuneration decisions, payment and claw-back arrangements. It shall advise the Board on:

- (1) the remuneration of Directors and senior management;
- (2) the adoption or amendment of equity-incentive plans or employee-share-ownership plans, and the fulfilment of conditions for the grant or exercise of benefits under such plans;
- (3) arrangements for Directors and senior management to hold shares in a subsidiary proposed to be spun off;
- (4) any other matters required by applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue, or the Articles of Association.

Where the Board does not adopt, or only partially adopts, the Remuneration Committee's recommendations, the Board resolution must set out the committee's views and the specific reasons for non-adoption, and such information must be disclosed.

Senior Management

Our Company shall have one general manager, to be appointed or dismissed by the Board. Our Company may appoint one or more Deputy General Managers; upon nomination by the General Manager, the Board shall decide on their appointment or dismissal. Deputy General Managers shall assist the General Manager in handling our Company's affairs.

The term of office of the general manager shall be three years and may be re-elected and serve consecutive terms.

The general manager shall be responsible to the Board, and exercises the following functions and powers:

- (1) taking charge of the production, operation and management of our Company, organizing the implementation of resolutions made at Board meetings and reporting to the Board;
- (2) organizing the implementation of the annual operation plan and investment plan of our Company;

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

- (3) contemplating the internal management setup plan of our Company;
- (4) contemplating the fundamental management system of our Company;
- (5) formulating the specific rules and regulations of our Company;
- (6) requesting the Board to appoint or dismiss our Company's deputy general manager and the person in charge of finance;
- (7) appointing or dismissing a manager other than those who should be appointed or dismissed by the Board;
- (8) deciding on the salaries, benefits, rewards and punishments for our Company's employees, and deciding on the employment and dismissal of our Company's staff in accordance with the relevant provisions formulated by the Shareholders' meeting and the Board;
- (9) representing our Company to sign various contracts, agreements and other legal documents related to our Company's daily production and business operations in accordance with the authorization of the Board of Directors and the provisions of the Articles of Association;
- (10) approving matters such as foreign investments, asset acquisitions and disposals, asset mortgages, external guarantees, entrusted investments, related-party transactions, and external donations that do not meet the standards set by the Board; and
- (11) other duties authorized by the Articles of Association or the Board.

The senior management shall faithfully perform his/her duties and safeguard the maximum interest of our Company and all Shareholders. If the senior management fails to faithfully perform their duties or violate their integrity obligations, causing damage to the interest of our Company and the public Shareholders, they shall bear compensation liability in accordance with the law.

Eligibility and Obligations of Directors and Senior Management

Any of the following persons shall not act as Director, general manager or other senior management of our Company:

- (1) who has no or limited civil capacity;
- (2) who was sentenced for corruption, bribery, embezzlement or misappropriation of properties or destruction of the order of socialist market-oriented economy, and the execution of such sentence has expired for no more than five years; or who was

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

deprived of political rights due to any crime, and the execution of such deprivation has expired for no more than five years, and for those who have been declared on probation, the probation period has expired for no more than two years;

- (3) who acted as Director, factory manager, manager of a Company or enterprise in bankruptcy liquidation, and was personally liable for the bankruptcy of such a company or enterprise, and a three-year period has not elapsed since the completion of bankruptcy liquidation of such company or enterprise;
- (4) who acted as the legal representative of a company or enterprise whose business license was revoked, or which was ordered to close down due to violation of law and who is personally liable, and a three-year period has not elapsed since the revocation of the business license or the closure of such company or enterprise;
- (5) who has a significant amount of due and outstanding debts and was listed as dishonest person subjected to enforcement by the people's court;
- (6) who has been barred from the securities market by the CSRC for a certain period of time and such period has not expired yet;
- (7) who have been publicly identified by the stock exchange [REDACTED] venue as unsuitable for serving as Directors or senior management personnel of listed companies, and such period has not expired yet; or
- (8) any other circumstances stipulated by applicable laws, administrative regulations, departmental rules, normative documents and securities regulatory provisions of the stock exchange [REDACTED] venue.

The Directors shall comply with applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association and assume the duty of loyalty to our Company. Such obligations include:

- (1) shall not accept any bribery or other illegal income by using his or her powers and position;
- (2) shall not embezzle our Company's property or misappropriate our Company's funds;
- (3) shall not open accounts in his/her own name or in the names of others to deposit funds or assets of our Company;
- (4) shall not lend our Company's funds to others or pledge Company's properties in favor of others in violation of the Articles of Association or without the approval of the Shareholders' meeting or the Board;

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

- (5) shall not accept commission for transactions with our Company as personal gains;
- (6) shall not take advantage of duty to seek business opportunities for themselves or others that would have been directed to our Company, except for those that our Company may not take the advantage of as resolved by the Board or the Shareholders' meeting or as stipulated by applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association;
- (7) shall not engage in business like those of our Company for themselves or others, without the approval of the Board or the Shareholders' meeting in accordance with the Articles of Association;
- (8) shall not conclude any contract directly or indirectly with our Company without the approval of the Board or the Shareholders' meeting in accordance with the Articles of Association; these provisions shall apply to the close relatives of Directors or enterprises directly or indirectly controlled by their close relatives, as well as connected persons with other connections with Directors where they conclude contracts or conduct transactions with our Company;
- (9) shall not disclose any confidential information involving our Company without authorization;
- (10) shall not impair the interests of our Company through connected relationship; and
- (11) other loyalty obligations provided under applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association.

The senior management assume the aforementioned duty of loyalty.

The Directors shall comply with applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association and assume the duty of diligence to our Company. Such obligations include:

- (1) shall exercise the powers granted by our Company carefully, faithfully and diligently to ensure the business carried out by our Company is in compliance with applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and economic policies of the state, and such business activities are within the scope of business scope specified in our Company's business license;
- (2) shall treat all Shareholders equally;

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

- (3) shall stay informed with the business and operation of our Company timely;
- (4) shall sign the written confirmation opinions on our Company’s regular reports, and ensure that the information disclosed by our Company is true, accurate, and complete;
- (5) shall provide relevant information and materials to the Audit Committee truthfully and shall not hinder the Audit Committee from performing their duty; and
- (6) other diligence obligations in accordance with applicable laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue and the Articles of Association.

The senior management assume the aforementioned obligations.

FINANCIAL ACCOUNTING POLICY

Our Company formulates the financial and accounting system according to applicable laws, administrative regulations, departmental rules, normative documents and securities regulatory provisions of the stock exchange [REDACTED] venue.

The Board shall submit the financial reports prepared by our Company as required by applicable laws, administrative regulations, departmental rules, normative documents as well as securities regulatory provisions of the stock exchange [REDACTED] venue to Shareholders at each annual Shareholders’ meeting. Our Company shall not establish other accounting books other than those required by laws. Our Company’s assets shall not be deposited into any account opened in the name of any individual person.

The financial report shall be made available for Shareholders’ inspection twenty-one days prior to the annual Shareholders’ meeting. The foregoing financial report shall include the Board report, the balance sheet (including various documents as required to be attached by the PRC or other applicable laws, administrative regulations, department rules, normative documents and securities regulatory provisions of the stock exchange [REDACTED] venue) and the profit and loss statement (income statement) or income and expenditure statement (cash flow statement) or a financial summary report approved by the Hong Kong Stock Exchange (provided that there will be no violation of applicable PRC laws, administrative regulations, departmental rules or normative documents).

Our Company shall publish the financial reports at international or Hong Kong accounting standards twice each accounting year, that is, publish the annual report within four months from the end of said accounting year, and publish the interim report within three months from the end of the first six months of an accounting year. Our Company shall publish the annual performance announcement within three months from the end of an accounting year and publish the interim performance announcement within two months from the end of the first six months of an accounting year. Our Company shall prepare the above-mentioned annual

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

report and interim report in accordance with applicable laws, administrative regulations, departmental rules, normative documents and the securities regulatory provisions of the stock exchange [REDACTED] venue, and report, disclose and/or submit the annual report and interim report and other documents to Shareholders. If the relevant laws, administrative regulations, departmental rules, normative documents, securities regulatory provisions of the stock exchange [REDACTED] venue, or the domestic and overseas securities regulatory authorities provide otherwise, such provisions shall prevail.

PROFITS DISTRIBUTION

To distribute after-tax profits for the current year, our Company shall allocate 10% of profits for the statutory reserves of our Company. If the cumulative amount of statutory reserves exceeds 50% of the registered capital of our Company, no further allocation is required. If the statutory reserves are insufficient to make up for previous losses, then our Company shall firstly make up for previous losses with current profits, before any allocation is made to the statutory reserves in accordance with the preceding sentence.

After foregoing provision for statutory reserves, our Company may also draw discretionary reserves from after-tax profits, subject to the resolution of the Shareholder's meeting.

The remaining after-tax profits after loss makeup and provisions for reserves shall be distributed to Shareholders in proportion to their shareholding percentages, except for those that are not distributed in proportion to the shareholding percentages as stipulated in the Articles of Association.

If the Shareholder's meeting breaches the foregoing provisions and distributes profits to Shareholders before losses are made up and the statutory reserves are drawn, then Shareholders shall refund the distributed profits to our Company in violation of the foregoing provisions. Where such violation causes losses to our Company, Shareholders and duty-bound Directors and senior officers shall be jointly and severally liable for compensation.

The shares held by our Company per se shall not participate in the profit distribution.

The reserves of our Company are used to make up losses, expand business, or increase the registered capital of our Company. To make up for our Company's losses, the discretionary reserves and statutory reserves should be used first; if it is still unable to make up for it, the capital reserves can be used in accordance with relevant provisions.

When the statutory reserves are converted into capital, the remaining amount of said reserves shall not be less than 25% of the registered capital of our Company before such conversion.

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

After the Shareholders’ meeting of our Company has resolved on the profit distribution plan, the Board shall complete the distribution of dividends within six months from the date of the Shareholders’ meeting.

The holder of any shares shall be entitled to interest on amounts paid in advance of a call by our Company, provided that no Shareholder shall have the right to participate in dividends declared after such advance payment in respect of the prepaid amount.

Our Company shall appoint a collection agent for the holders of overseas listed shares, who shall receive the dividends and other payables of our Company in respect of overseas listed shares, on behalf of said Shareholders.

The collection agent appointed by our Company shall meet the requirements of laws of Hong Kong and the relevant regulations of Hong Kong Stock Exchange.

The collection agent appointed by our Company for the holders of overseas shares listed in Hong Kong Stock Exchange shall be a trust company registered under the Trustee Ordinance of Hong Kong.

Subject to the relevant laws and Listing Rules, our Company may forfeit any dividend unclaimed, provided that such power of forfeiture shall not be exercised before the expiration of its applicable limitation period.

Our Company also has the power to terminate the delivery of a dividend warrant by post to a holder of offshore listed shares; provided that our Company may exercise such power of termination only if the cash on such dividend warrant is not withdrawn consecutively two times or more. However, our Company may also exercise this power if the dividend warrant has been returned undelivered to the recipient on the first attempt.

Our Company has the right to issue warrants to bearer holders. No new warrant shall be issued to replace a lost warrant unless it is reasonably assured that the original warrant has been lost. Our Company shall have the power to sell the shares of offshore listed Shareholders who have been unable to contact in such a manner as the Board may think appropriate, provided, however, that:

- (1) dividends are distributed onto such shares at least three times within twelve years, but such dividends are unclaimed in such period; and
- (2) upon expiration of the twelve-year period, our Company shall publish a public announcement on one or more newspapers in Hong Kong, specifying the intention to sell such shares, and shall notify the Hong Kong Stock Exchange.

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

ENGAGEMENT OF ACCOUNTING FIRM

Our Company shall engage an independent accounting firm in compliance with relevant state regulations, to conduct accounting statement auditing, net asset verification and other related consulting services. The engagement period is one year and can be renewed.

The accounting firm engaged by our Company is entitled to the following rights:

- (1) to access the books of accounts, records, or vouchers of our Company at any time, and require the Directors, general manager, or other senior management of our Company to provide related information and explanations;
- (2) to require our Company to take all reasonable measures to obtain from its subsidiaries all information and notes required for said accounting firm to perform its duties; and
- (3) to attend Shareholders' meeting, receive the notice of meeting accessible to any Shareholder, or other information related to the meeting, and make a speech at any Shareholders' meeting in respect of any matter involving its role as the accounting firm of our Company.

If any position of the accounting firm is vacant, the Board may appoint an accounting firm to fill up such a vacancy before the convening of the Shareholders' meeting. Any other accounting firm which has been engaged by our Company may continue to act during the period when such a vacancy exists.

The Shareholders' meeting may, by means of an ordinary resolution, dismiss any accounting firm prior to the expiration of its term of office, notwithstanding the terms in the contract between the accounting firm and our Company, but without prejudice to such accounting firm's right, if any, to claim damages from our Company in respect of such dismissal.

The engagement, removal or dismissal of an accounting firm and the remuneration of the accounting firm shall be decided by an ordinary resolution of the Shareholders' meeting. The Board shall not engage an accounting firm prior to the decision by the Shareholders' meeting.

Our Company shall send fifteen-day prior notice to the accounting firm, in order to dismiss or not to reappoint the accounting firm, and the said accounting firm is entitled to give opinions when the Shareholders' meeting votes on the dismissal of the same. The accounting firm, in order to resign, shall make representations regarding whether our Company has any improper affairs to the Shareholders' meeting.

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

MERGER AND DIVISION OF OUR COMPANY

The merger of our Company may take two forms: merger by absorption or merger by new establishment.

If our Company merges with a company in which it holds more than ninety percent of the shares, the merger does not require a resolution of the Shareholders’ meeting of the merged company, but other Shareholders must be notified and have the right to request our Company to purchase their shares at a reasonable price.

If the consideration for the merger does not exceed ten percent of our Company’s net assets, a resolution of the Shareholders’ meeting is not required, unless otherwise provided by the Articles of Association, securities regulatory provisions of the stock exchange [REDACTED] venue and securities regulatory authorities.

Mergers conducted in accordance with the preceding two paragraphs without a resolution of the Shareholders’ meeting must be approved by a resolution of the Board.

In a merger of our Company, all parties to the merger shall sign the merger agreement and shall prepare their respective balance sheets and inventory lists of assets. Our Company shall notify its creditors within ten days from the date of passing the merger resolution and make a public announcement in newspaper or on the National Enterprise Credit Information Publicity System and the website of the Hong Kong Stock Exchange within thirty days from the date of passing the merger resolution. Upon the merger, the creditors’ rights and the indebtedness of each merging party shall be assumed by the surviving entity or the newly established company resulting from the merger.

Where our Company is to be divided, its assets shall be divided accordingly. In the event of the division of our Company, the parties to such division shall prepare a balance sheet and a list of assets. Our Company shall notify its creditors within ten days from the date of the resolution on such division and shall make a public announcement in newspaper or on the National Enterprise Credit Information Publicity System and the website of the Hong Kong Stock Exchange within thirty days from the date of the resolution on such division. The post-division company shall be jointly and severally liable for the pre-division debts of our Company, unless provided otherwise in a written agreement pertaining to the payment of debts between our Company and its creditors prior to the division.

Where our Company undergoes a merger or division, changes in the particulars of our Company shall be registered with our Company registration authorities in accordance with the laws. Where our Company is dissolved, cancellation of its registration shall be conducted in accordance with the laws. Where a new company is established, it shall be registered in accordance with the laws.

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

DISSOLUTION AND LIQUIDATION OF OUR COMPANY

Our Company shall be dissolved upon the occurrence of any of the following events:

- (1) expiry of the valid term of the business or the occurrence of other events of dissolution as stated in the Articles of Association;
- (2) a resolution for dissolution is passed by a Shareholders' meeting;
- (3) dissolution is necessary due to a merger or division of our Company;
- (4) our Company is revoked of business license, ordered to close or canceled according to law; or
- (5) serious difficulties arise in the operation and management of our Company and its continued existence would cause material loss to the interests of the Shareholders and such difficulties cannot be resolved through other means, in which case Shareholders holding at least 10% of all Shareholders' voting rights may petition a people's court to dissolve our Company.

Where our Company is dissolved in accordance with the provisions of items (1), (2), (4) and (5) above, it shall be liquidated. The Directors shall be the obligors of our Company's liquidation and shall form a liquidation committee to carry out the liquidation within fifteen days from the date on which the cause of dissolution arises. The members of the liquidation committee shall be Directors or as otherwise provided by the Articles of Association or any other persons appointed by a Shareholders' meeting. If a liquidation committee is not established within the time period or a liquidation is not carried out after the establishment of the liquidation committee, the interested parties may apply to the people's court to designate relevant personnel to establish a liquidation committee to proceed with the liquidation.

The liquidation committee shall exercise the following functions and powers during the period of liquidation:

- (1) to dispose of the property of our Company, and to prepare a balance sheet and a list of properties;
- (2) to inform creditors by notice and public announcement;
- (3) to dispose of unfinished business of our Company relating to the liquidation;
- (4) to pay up all outstanding taxes and tax arising during the liquidation process;
- (5) to clear up claims and debts;

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

- (6) to distribute the residual properties of our Company after the full settlement of debts; and
- (7) to represent our Company in civil litigation.

The liquidation committee shall notify the creditors within ten days after its establishment and publish announcements in the newspaper or on the National Enterprise Credit Information Publicity System within sixty days. Creditors shall, within thirty days from the date of receiving the notice; or for creditors who do not receive the notice, within forty-five days from the date of the public announcement, declare their claims to the liquidation committee.

The creditor shall provide a description and supporting evidence of matters relating to their claims. The liquidation committee shall register the creditors' claims.

The liquidation committee shall not make any debt settlement during the period of declaration of claims.

A liquidation plan shall be formulated by the liquidation committee after the stocktaking of our Company's assets has been carried out and the balance sheet and a detailed inventory of assets have been formulated and shall be submitted to the Shareholders' meeting or people's court for confirmation.

The assets of our Company shall be applied for liquidation in the following order: payment of liquidation expenses, staff wages, social insurance expenses and statutory compensation, payment of outstanding taxes, and payment of our Company's debts. The residual assets of our Company after settlement of all liabilities in accordance with the provisions of the preceding sentence shall be distributed to the Shareholders of our Company in proportion to their shareholdings.

During the liquidation period, our Company shall continue to exist but shall not carry out business activities unrelated to the liquidation. Before our Company's debts have been fully repaid in accordance with the provisions of the preceding paragraph, no assets of our Company shall be distributed to its Shareholders.

Where the liquidation committee, having examined our Company's assets and having prepared a balance sheet and an inventory of assets, discovers that our Company's assets are insufficient to pay its debts in full, it shall immediately apply to the people's court for a declaration of bankruptcy. Once the people's court has accepted a bankruptcy application, the liquidation committee shall turn over any matters regarding the liquidation to the administrator appointed by the people's court.

APPENDIX V SUMMARY OF THE ARTICLES OF ASSOCIATION

Following the completion of liquidation, the liquidation committee shall formulate a report on liquidation, which shall be submitted to the Shareholders’ meeting or the people’s court for confirmation. The liquidation committee shall also submit the aforesaid documents to our Company registration authority and apply for cancellation of registration of our Company and terminate our Company.

Where our Company has incurred no debts during its existence or has paid off all its debts, it may, upon the joint undertaking of all Shareholders, apply for deregistration under the simplified procedure in accordance with applicable regulations. When applying for deregistration under the simplified procedure, our Company shall publish a notice on the National Enterprise Credit Information Publicity System for a period of no less than twenty days. If no objection is raised upon expiry of the notice period, our Company may file an application for deregistration with our company registration authority within twenty days. If any Shareholder’s undertaking as set forth in the Articles of Association is untrue, the Shareholders shall be jointly and severally liable for our Company’s debts existing prior to the deregistration.

AMENDMENT TO THE ARTICLES OF ASSOCIATION

Under one of the following circumstances, our Company shall amend the Articles of Association:

- (1) when the Articles of Association contradict the newly implemented amendments of PRC Company Law, the Listing Rules and any other applicable laws, administrative regulations, departmental rules, normative documents and securities regulatory provisions of the stock exchange [REDACTED] venue;
- (2) due to any change, when the information of our Company is inconsistent with the matters set forth in the Articles of Association; or
- (3) when the Shareholders’ meeting has made a resolution to amend the Articles of Association.

In the event that the amendment to the Articles of Association adopted by the Shareholders’ meeting needs to be approved by the competent authority, our Company shall seek approval from relevant authority and if it involves company registration matters, change registration shall be handled in accordance with the law. The Board shall follow such resolutions by the Shareholders’ meeting and the approval opinions of relevant authority when amending the Articles of Association.

In the event that an amendment to the Articles of Association qualifies as required disclosure under applicable laws, administrative regulations, departmental rules, normative documents and securities regulatory provisions of the stock exchange [REDACTED] venue, such amendment should be publicly announced.

APPENDIX VI

STATUTORY AND GENERAL INFORMATION

A. FURTHER INFORMATION ABOUT OUR COMPANY

1. Incorporation of Our Company

Our Company was incorporated in the PRC as a limited liability company on September 26, 2016 and was converted to a joint stock company with limited liability on April 25, 2022 under the PRC Company Law.

We have established a principal place of business in Hong Kong at Room 1910, 19/F, Lee Garden One, 33 Hysan Avenue, Causeway Bay, Hong Kong and have been registered with the Registrar of Companies in Hong Kong as a non-Hong Kong company under Part 16 of the Companies Ordinance on [●]. Ms. Sham Ying Man, one of our joint company secretaries, has been appointed as the authorized representative of our Company for the acceptance of service of process and notices in Hong Kong, whose correspondence address is at Room 1910, 19/F, Lee Garden One, 33 Hysan Avenue, Causeway Bay, Hong Kong.

As the Company was incorporated in the PRC, our corporate structure and Articles of Association are subject to the relevant PRC Law. A summary of the relevant PRC Laws and regulations and of the Articles of Association is set out in “Regulatory Overview,” Appendix IV and V, respectively.

2. Changes in the Share Capital of Our Company

Assuming the [REDACTED] is not exercised, upon completion of the [REDACTED], our issued share capital will increase to RMB[REDACTED], made up of [REDACTED] Domestic Shares and [REDACTED] H Shares (including [REDACTED] Converted H Shares) fully paid up or credited as fully paid up, representing [REDACTED]% and [REDACTED]% of our registered share capital, respectively. For further details, please refer to the section headed “Share Capital” in this document.

Save as disclosed above and in the section headed “History, Development and Corporate Structure” in this document, there has been no alteration in the share capital of our Company within two years immediately preceding the date of this document.

3. The Shareholders’ Resolutions of Our Company

At our Shareholders’ meeting held on January 15, 2026, the following resolutions, among other things, were duly passed:

- (i) the sub-division of the Shares with nominal value of RMB1.00 each on the basis of one to two (the “Share Subdivision”), and taking into account the Share Subdivision, the [REDACTED] of H Shares of nominal value of RMB0.5 each and such H Shares be [REDACTED] on the Hong Kong Stock Exchange;
- (ii) the number of H shares to be [REDACTED] shall be up to [REDACTED], and the grant of the [REDACTED] in respect of no more than [REDACTED]% of the number of H Shares [REDACTED] pursuant to the [REDACTED];

APPENDIX VI

STATUTORY AND GENERAL INFORMATION

- (iii) authorization of the Board or its authorized individual to handle all matters relating to, among other things, the [REDACTED], the [REDACTED] and [REDACTED] of H Shares on the Hong Kong Stock Exchange; and
- (iv) subject to the completion of the [REDACTED], the conditional adoption of the revised Articles of Association, which shall become effective on the [REDACTED], and the Board has been authorized to amend the Articles of Association in accordance with any comments from the Stock Exchange and the relevant PRC regulatory authorities and for the purpose of its filing with the relevant regulatory authorities.

Save as aforesaid, as at the Latest Practicable Date, there were no other intellectual property rights which were material to our Company’s business.

APPENDIX VI

STATUTORY AND GENERAL INFORMATION

C. FURTHER INFORMATION ABOUT OUR DIRECTORS AND SUBSTANTIAL SHAREHOLDERS

1. Disclosure of Interests

(a) *Interests of our Directors and the chief executive of our Company*

Immediately following the completion of the [REDACTED] (assuming the [REDACTED] is not exercised), the interests and/or short positions (as applicable) of the Directors and the chief executive of our Company in the Shares, underlying Shares and debentures of the Company and any interests and/or short positions (as applicable) in shares, underlying Shares or debentures of any of the Company’s associated corporations (within the meaning of Part XV of the SFO) which (i) will have to be notified to our Company and the Hong Kong Stock Exchange pursuant to Divisions 7 and 8 of Part XV of the SFO (including interests and/or short positions (as applicable) which they are taken or deemed to have under such provisions of the SFO), (ii) will be required, pursuant to Section 352 of the SFO, to be entered in the register referred to therein or (iii) will be required, pursuant to the Model Code for Securities Transactions by Directors of Listed Issuers as set out in Appendix C3 to the Hong Kong Listing Rules, to be notified to the Company and the Hong Kong Stock Exchange, in each case once the [REDACTED] are [REDACTED] on the Hong Kong Stock Exchange, will be as follows:

(i) *Interests in our Company*

Name of Director or chief executive	Nature of interest	Number of Shares ⁽¹⁾	Approximate percentage of interest in our Company as of the Latest Practicable Date and immediately prior to the [REDACTED] ⁽²⁾	Approximate percentage of shareholding in the total [REDACTED] and outstanding share capital of our Company immediately following the completion of the [REDACTED] ⁽³⁾
Mr. Li (李雨亮) ⁽⁴⁾ . . .	Beneficial owner	56,043,356	29.16%	[REDACTED]%
	Interest in controlled corporation	27,017,544	14.06%	[REDACTED]%
Ms. Wang (王紅媚) ⁽⁵⁾ .	Interest of spouse	56,043,356	29.16%	[REDACTED]%
Dr. Du ⁽⁴⁾	Interest in controlled corporation	20,000,000	10.41%	[REDACTED]%
Dr. Han (韓永信)	Beneficial owner	14,288,676	7.44%	[REDACTED]%

Notes:

- All interests stated are long positions.
- The calculation is based on the total number of 192,170,424 Shares in issue as at the Latest Practicable Date.
- The calculation is based on the total number of [REDACTED] Shares in issue immediately following the completion of the [REDACTED] and without taking into account any Shares which may be [REDACTED] pursuant to the exercise of the [REDACTED].

APPENDIX VI

STATUTORY AND GENERAL INFORMATION

4. As of the Latest Practicable Date, Chifeng Qingxi and Chifeng Mingquan were managed by their general partner Mr. Li. Chifeng Qingxi was owned as to 40% by Dr. Du. As such, each of Mr. Li and Dr. Du is deemed under the SFO to be interested in the 20,000,000 Shares held by Chifeng Qingxi and Mr. Li is deemed under the SFO to be interested in the 7,017,544 Shares held by Chifeng Mingquan.
5. Ms. Wang is the spouse of Mr. Li and is deemed to be interested in the Shares held by Mr. Li under the SFO.

(b) Interests of the Substantial Shareholders

For information on the persons who will, immediately following the completion of the [REDACTED] without taking into account any Shares which may be [REDACTED] pursuant to the exercise of the [REDACTED], have interests or short positions in our Shares or underlying Shares which would be required to be disclosed to us and the Hong Kong Stock Exchange under the provisions of Divisions 2 and 3 of Part XV of the SFO, or who will directly and/or indirectly, be interested in 10% or more of the nominal value of any class of share capital carrying the rights to vote in all circumstances at our Shareholders’ meeting, please refer to the section headed “Substantial Shareholders.”

Save as disclosed in the section headed “Substantial Shareholders,” our Directors and the chief executive of our Company are not aware of any person, not being a Director or chief executive of our Company, who has an interest or short position in our Shares, underlying Shares or debentures of our Company which, once our H Shares are [REDACTED], would have to be disclosed to us under the provisions of Divisions 2 and 3 of Part XV of the SFO, or who is, directly or indirectly, interested in 10% or more of the nominal value of any class of share capital carrying rights to vote in all circumstances at our Shareholders’ meeting.

2. Directors’ Service Contracts and Letters of Appointment

We [have entered] into a service contract or letter of appointment with each of our Directors. The principal particulars of these service contracts and letters of appointment include (i) the term of service, and (ii) are subject to termination in accordance with their respective term. The service contracts and letters of appointment may be renewed in accordance with our Articles of Association and the applicable Listing Rules.

Save as disclosed above, none of the Directors has entered into any service contracts or letters of appointment as a director with the Company (excluding contracts expiring or determinable by the employer within one year without payment of compensation (other than statutory compensation)).

3. Remuneration of Directors

The aggregate remuneration (including Directors’ fee, salaries, allowances and benefits in kind, discretionary bonuses, retirement scheme contributions and equity-settled share-based payments) paid to our Directors for the year ended December 31, 2024, and for the nine months ended September 30, 2025 was approximately RMB14.1 million and RMB12.0 million, respectively.

APPENDIX VI

STATUTORY AND GENERAL INFORMATION

Save as disclosed above, no other payments have been made or are payable, in respect of the year ended December 31, 2024, and the nine months ended September 30, 2025 by the Company to any of our Directors.

4. [REDACTED] Share Incentive Plan

The following is a summary of the principal terms of the [REDACTED] Share Incentive Plan adopted in 2021 and amended and restated in 2026 by the Company. The terms of the [REDACTED] Share Incentive Plan are not subject to the provisions of Chapter 17 of the Listing Rules as the [REDACTED] Share Incentive Plan does not involve the grant of new options or awards by our Company to subscribe for H Shares after the [REDACTED].

Principal Terms of the [REDACTED] Share Incentive Plan

(a) Objectives

The objectives of the [REDACTED] Share Incentive Plan are to build incentive and constructive mechanisms for core employees, to achieve our medium and long-term strategies and to advance development of the Company.

(b) Eligible Participants

The participants of the [REDACTED] Share Incentive Plan include (i) employees who were department directors or above and core technical personnel as at the time of the adoption of the [REDACTED] Share Incentive Plan in 2021; (ii) other current employees who are identified by the Board as particularly outstanding; and (iii) other employees who are planned to be introduced in the future and meet the share incentive criteria of the Board.

(c) Grant of Awards

Each participant will be granted restricted shares in the form of economic interest in Chifeng Qingxi and/or Chifeng Mingquan (“**Share Incentive Platforms**”) as a limited partner (the “**Awards**”). Upon becoming the limited partner of the relevant Share Incentive Platforms, the participant indirectly receives economic interest in the number of Shares underlying the Awards granted to the participant held by the relevant Share Incentive Platforms.

(d) Payment of the Price of the Awards

The participants shall subscribe for the Awards through self-financing methods with their own legal funds. The Company will review the legal source of the funds and will not furnish any financial support or funding to the participants. The participants shall make the corresponding payment for Awards in a full and timely manner.

APPENDIX VI

STATUTORY AND GENERAL INFORMATION

(e) Administration

The [REDACTED] Share Incentive Plan shall be explained and implemented by the Board as the administrator. The Board has the authority to delegate the chairman of the Board to handle the following matters in relation to the [REDACTED] Share Incentive Plan:

- (i) determine the participants, as well as the price and quantity of the Awards;
- (ii) determine the grant date and attend to the grant procedures;
- (iii) adjust the number of Awards when certain specific events occur;
- (iv) attend to all matters related to the participants and the lock-up period;
- (v) decide on the modification and termination of the [REDACTED] Share Incentive Plan;
- (vi) manage and adjust the [REDACTED] Share Incentive Plan;
- (vii) attend to other necessary matters required for the implementation of the [REDACTED] Share Incentive Plan, save for those rights explicitly stipulated in relevant documents that need to be exercised by the shareholders’ meeting of the Company; and
- (viii) attend to procedures with relevant authorities and execute relevant approval documents for the [REDACTED] Share Incentive Plan.

(f) Restrictions on Transfer

Prior to the [REDACTED], the Share Incentive Platforms may not transfer or entrust third parties to manage any or all of their interests in the Company and the participants may not dispose of the Shares underlying the Awards by any means. Within 12 months subsequent to the [REDACTED], the Share Incentive Platforms may not (i) transfer or entrust third parties to manage any or all of their interests before the [REDACTED] in the Company; or (ii) request the Company to repurchase such interests, and the participants may not dispose of the Shares underlying the Awards by any means. Beyond 12 months subsequent to the [REDACTED], the transfer or sale by the Share Incentive Platforms and the participants of their interests in the Company shall be in compliance with the pertinent applicable laws and regulations.

(g) Rights attached to the Awards

Unless otherwise specified in the respective shareholding platform partnership agreement, articles of association or the grant agreement, the eligible participants under the [REDACTED] Share Incentive Plan have the rights to any dividends or distributions from any Shares underlying the awards.

APPENDIX VI STATUTORY AND GENERAL INFORMATION

5. Directors’ Competing Interests

Save as disclosed in the sections headed “Directors and Senior Management” and “Relationship with Our Controlling Shareholders” in this document, none of our Directors is interested in any business apart from our Company’s business which competes or is likely to compete, directly or indirectly, with the business of our Company.

6. Disclaimers

Save as disclosed in this document:

- (a) none of our Directors or chief executive of our Company has any interests or short positions in the shares, underlying shares and debentures of our Company or our associated corporations (within the meaning of Part XV of the SFO) which will be required to be notified to our Company and the Hong Kong Stock Exchange pursuant to Divisions 7 and 8 of Part XV of the SFO (including interests or short positions which he is taken or deemed to have taken under such provisions of the SFO) or which will be required, pursuant to Section 352 of the SFO, to be entered in the register referred to in that section, or which will be required, pursuant to the

APPENDIX VI

STATUTORY AND GENERAL INFORMATION

Model Code for Securities Transactions by Directors of Listed Issuers, to be notified to our Company and the Hong Kong Stock Exchange, once the Shares are [REDACTED] on the Hong Kong Stock Exchange;

- (b) so far as is known to any Director or chief executive of our Company, no person has an interest or short position in the Shares and underlying Shares which would fall to be disclosed to our Company and the Hong Kong Stock Exchange under the provisions of Divisions 2 and 3 of Part XV of the SFO, or is, directly or indirectly, interested in 10% or more of the nominal value of any class of share capital carrying rights to vote in all circumstances at our Shareholders’ meeting;
- (c) none of our Directors, nor any of the persons listed in “— D. Other Information — 5. Qualification of Experts” below is interested in the promotion of, or in any assets which have been, within the two years immediately preceding the issue of this document, acquired or disposed of by or leased to our Company, or are proposed to be acquired or disposed of by or leased to our Company;
- (d) none of our Directors, nor any of the persons listed in “— D. Other Information — 5. Qualification of Experts” below is materially interested in any contract or arrangement with our Company subsisting at the date of this document which is unusual in its nature or conditions or which is significant in relation to the business of our Company as a whole;
- (e) save in connection with [REDACTED] Agreements, none of the persons listed in “— D. Other Information — 5. Qualification of Experts” below has any shareholding in our Company or the right (whether legally enforceable or not) to subscribe for or to nominate persons to subscribe for securities in our Company;
- (f) none of our Directors has entered or has proposed to enter into any service agreements with our Company (other than contracts expiring or determinable by the employer within one year without payment of compensation other than statutory compensation); and
- (g) save as contemplated under the [REDACTED] Agreements, none of our Directors, their respective associates (as defined under the Hong Kong Listing Rules), or Shareholders who are interested in more than 5% of the issued share capital of our Company has any interest in our Company’s five largest customers and five largest suppliers.

APPENDIX VI

STATUTORY AND GENERAL INFORMATION

D. OTHER INFORMATION

1. Estate duty

Our Directors have been advised that no material liability for estate duty is likely to fall on our Company.

2. Litigation

As of the Latest Practicable Date, our Company was not engaged in any litigation, arbitration or claim of material importance, and no litigation, arbitration or claim of material importance was known to our Directors to be pending or threatened by or against our Company, that would have a material adverse effect on its business, financial condition or results of operations.

3. Joint Sponsors

The Joint Sponsors satisfy the independence criteria applicable to sponsors set out in Rule 3A.07 of the Hong Kong Listing Rules.

The Joint Sponsors will receive an aggregate fee of approximately US\$[REDACTED] for acting as the sponsors for the [REDACTED].

4. No Material Adverse Change

Our Directors confirm that, up to the date of this document, there has been no material adverse change in the financial or trading position or prospects of our Company since December 31, 2024 (being the date to which the latest audited financial statements of our Company were prepared).

APPENDIX VI

STATUTORY AND GENERAL INFORMATION

5. Qualification of Experts

The following are the qualifications of the experts (as defined under the Hong Kong Listing Rules and the Companies (Winding Up and Miscellaneous Provisions) Ordinance) who have given opinions or advice which are contained in this document:

Name	Qualification
CITIC Securities (Hong Kong) Limited	Licensed corporation under the SFO to conduct type 4 (advising on securities) and type 6 (advising on corporate finance) as defined under the SFO
CMBC International Capital Limited	Licensed to conduct Type 1 (dealing in securities) and Type 6 (advising on corporate finance) of regulated activities under the SFO
KPMG	Certified Public Accountants Public Interest Entity Auditor registered in accordance with the Accounting and Financial Reporting Council Ordinance
Fangda Partners	Legal advisors as to PRC Law
Frost & Sullivan (Beijing) Inc., Shanghai Branch Co.	Industry consultant

6. Consents of Experts

Each of the experts as referred to in “— D. Other Information — 5. Qualification of Experts” has given and has not withdrawn their respective written consents to the issue of this document with the inclusion of their reports and/or letters and/or legal opinion (as the case may be) and references to their names included in the form and context in which it respectively appears.

None of the experts named above has any shareholding interests in our Company or the right (whether legally enforceable or not) to subscribe for or to nominate persons to subscribe for securities in our Company.

APPENDIX VI

STATUTORY AND GENERAL INFORMATION

7. Promoters

The promoters of our Company are as follows:

No.	Name of promoters of our Company
1. . . .	Li Yuliang (李雨亮)
2. . . .	Han Yongxin (韓永信)
3. . . .	Huang Shuo (黃碩)
4. . . .	Ai Lianghua (艾良華)
5. . . .	Chifeng Qingxi (赤峰清溪)
6. . . .	Chifeng Mingquan (赤峰名泉)
7. . . .	Beijing Kaiyuan Hongdao Venture Capital Center (Limited Partnership) (北京開元弘道創業投資中心(有限合夥))
8. . . .	Chongqing Xianfeng Qiyun Equity Investment Partnership (Limited Partnership) (重慶險峰旗雲股權投資合夥企業(有限合夥))

8. Preliminary Expenses

We have not incurred any material preliminary expense.

9. Taxation of Holders of H Shares

The sale, purchase and transfer of H Shares are subject to Hong Kong stamp duty if such sale, purchase and transfer are affected on the [REDACTED] of members of our Company, including in circumstances where [REDACTED] are affected on the Stock Exchange. The current rate of Hong Kong stamp duty for such sale, purchase and transfer is 0.2% of the consideration or, if higher, the fair value of the H Shares being sold or transferred (the buyer and seller each paying half of such stamp duty). In addition, a fixed duty of HK\$5.0 is currently payable on any instrument of transfer of H Shares.

APPENDIX VI

STATUTORY AND GENERAL INFORMATION

10. Application for [REDACTED]

The Joint Sponsors has made an application on behalf of our Company to the [REDACTED] Committee for the [REDACTED] of, and permission to [REDACTED] in, the H Shares. All necessary arrangements have been made to enable the securities to be admitted into CCASS.

11. Binding Effect

This document shall have the effect, if an application is made in pursuance of this document, of rendering all persons concerned bound by all of the provisions (other than the penal provisions) of Sections 44A and 44B of the Companies (Winding Up and Miscellaneous Provisions) Ordinance insofar as applicable.

12. Bilingual Document

The English language and Chinese language versions of this document are being published separately, in reliance upon the exemption provided by Section 4 of the Companies (Exemption of Companies and Prospectuses from Compliance with Provisions) Notice (Chapter 32L of the Laws of Hong Kong).

This document is written in the English language and contains a Chinese translation for information purpose only. Should there be any discrepancy between the English language of this document and the Chinese translation, the English language version of this document shall prevail.

13. Miscellaneous

Save as disclosed in this document,

- (a) within the two years immediately preceding the date of this document, neither we nor any of our subsidiaries has issued or agreed to issue any share or loan capital fully or partly paid up either for cash or for a consideration other than cash;
- (b) no share or loan capital of our Company or any of our subsidiaries is under option or is agreed conditionally or unconditionally to be put under option;
- (c) within the two years immediately preceding the date of this document, no commissions, discounts, brokerage or other special terms have been granted in connection with the issue or sale of any shares or loan capital of our Company;
- (d) within the two years immediately preceding the date of this document, no commission has been paid or payable (except commission to [REDACTED]) to any persons for subscription, agreeing to subscribe, procuring subscription or agreeing to procure subscription of any shares of our Company or any of our subsidiaries;

APPENDIX VI
