

Hong Kong Exchanges and Clearing Limited, The Stock Exchange of Hong Kong Limited and the Securities and Futures Commission take no responsibility for the contents of this Application Proof, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this Application Proof.

Application Proof of

VivaVision Biotech (Zhejiang) Co., Ltd.*

維眸生物科技(浙江)股份有限公司

(the “Company”)

(A joint stock company established in the People’s Republic of China with limited liability)

WARNING

The publication of this Application Proof is required by The Stock Exchange of Hong Kong Limited (the “**Stock Exchange**”) and the Securities and Futures Commission (the “**Commission**”) solely for the purpose of providing information to the public in Hong Kong.

This Application Proof is in draft form. The information contained in it is incomplete and is subject to change which can be material. By viewing this document, you acknowledge, accept and agree with the Company, its sole sponsor, overall coordinator(s), advisers or members of the underwriting syndicate that:

- (a) this document is only for the purpose of providing information about the Company to the public in Hong Kong and not for any other purposes. No investment decision should be based on the information contained in this document;
- (b) the publication of this document or supplemental, revised or replacement pages on the Stock Exchange’s website does not give rise to any obligation of the Company, its sole sponsor, overall coordinator(s), advisers or members of the underwriting syndicate to proceed with an offering in Hong Kong or any other jurisdiction. There is no assurance that the Company will proceed with the offering;
- (c) the contents of this document or supplemental, revised or replacement pages may or may not be replicated in full or in part in the actual final listing document;
- (d) this document is not the final listing document and may be updated or revised by the Company from time to time in accordance with the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited;
- (e) this document does not constitute a prospectus, offering circular, notice, circular, brochure or advertisement offering to sell any securities to the public in any jurisdiction, nor is it an invitation to the public to make offers to subscribe for or purchase any securities, nor is it calculated to invite offers by the public to subscribe for or purchase any securities;
- (f) this document must not be regarded as an inducement to subscribe for or purchase any securities, and no such inducement is intended;
- (g) neither the Company nor any of its affiliates, advisers or underwriters is offering, or is soliciting offers to buy, any securities in any jurisdiction through the publication of this document;
- (h) no application for the securities mentioned in this document should be made by any person nor would such application be accepted;
- (i) the Company has not and will not register the securities referred to in this document under the United States Securities Act of 1933, as amended, or any state securities laws of the United States;
- (j) as there may be legal restrictions on the distribution of this document or dissemination of any information contained in this document, you agree to inform yourself about and observe any such restrictions applicable to you; and
- (k) the application to which this document relates has not been approved for listing and the Stock Exchange and the Commission may accept, return or reject the application for the subject public offering and/or listing.

If an offer or an invitation is made to the public in Hong Kong in due course, prospective investors are reminded to make their investment decisions solely based on the Company’s prospectus registered with the Registrar of Companies in Hong Kong, copies of which will be made available to the public during the offer period.

SUMMARY

*This summary aims to give you an overview of the information contained in this document. As this is a summary, it does not contain all the information that may be important to you. You should read this document in its entirety before you decide to [REDACTED] in the [REDACTED]. There are risks associated with any [REDACTED]. Some of the particular risks in [REDACTED] in the [REDACTED] are set out in “Risk Factors” of this document. You should read that section carefully before you decide to [REDACTED] in the [REDACTED]. **In particular, we are a biotech company seeking to list on the Main Board of the Stock Exchange under Chapter 18A of the Listing Rules on the basis that we are unable to meet the requirements under Rule 8.05(1), (2) or (3) of the Listing Rules.** There are unique challenges, risks and uncertainties associated with [REDACTED] in companies such as ours. Your [REDACTED] decision should be made in light of these considerations.*

OVERVIEW

Founded in 2016, we are an ophthalmology-focused biotech company, committed to becoming a global leader in the development and commercialization of innovative ophthalmic treatments. Leveraging our expertise in small-molecule drug discovery, advanced formulation development and translational research in ophthalmic diseases, we are dedicated to building a competitive and differentiated product pipeline covering ocular indications affecting the surface and back of the eye with significant unmet clinical needs. We have two Core Products, VVN461(HD) and VVN001. VVN461(HD), the high-dosage formulation of VVN461 eye drop, is a novel selective dual-target inhibitor of Janus kinase 1 (JAK1) and tyrosine kinase 2 (TYK2) with sub-nanomolar potency. We have commenced a Phase III clinical trial of VVN461(HD) in non-infectious anterior uveitis (NIAU) patients in China. VVN001, a second-generation antagonist of lymphocyte function-associated antigen-1 (LFA-1), is an innovative eye drop for the treatment of dry eye disease (DED). We have commenced a Phase III clinical trial of VVN001 in China. As of the Latest Practicable Date, we had six other drug candidates in addition to our Core Products, three of which were in the clinical stage.

WE MAY NOT BE ABLE TO ULTIMATELY DEVELOP AND MARKET OUR CORE PRODUCTS AND OTHER PIPELINE PRODUCTS SUCCESSFULLY.

SUMMARY

The following chart summarizes our product pipeline as of the Latest Practicable Date.

Program	MOA	Indication	Commercial Rights	Preclinical	IND Approval	Clinical			NDA Approval
						Phase I	Phase II	Phase III	
VVN461(HD)★ ⁽¹⁾	JAK1/TYK2	NIAU	Global	China ⁽²⁾					
				US ⁽³⁾					
		SS-DED		China ⁽⁴⁾					
		VKC		China ⁽⁵⁾					
		Scleritis		US ⁽⁶⁾					
		oGVHD		US ⁽⁶⁾					
		Pediatric uveitis ⁽⁷⁾							
VVN001★	LFA-1	DED	Global	China ⁽⁸⁾					
				US ⁽⁹⁾					
VVN461(LD) ⁽¹⁾	JAK1/TYK2	Postoperative ocular inflammation	Global	US ⁽¹⁰⁾					
VVN432 ⁽¹⁾	JAK1/TYK2	CRS	Global	China					
VVN1901	rhNGF	NK	Global	China					
VVN481 ⁽¹⁾	JAK1/TYK2	Non-infectious non-anterior uveitis	Global						
VVN611	VEGFRi/Undisclosed	DME/AMD/RVO	Global						
VVN1888	Undisclosed	Presbyopia	Global						

★ Core Product

Clinical trial phases marked as  are not required by the NMPA or FDA, as applicable

AMD: age-related macular degeneration

DED: dry eye disease

NIAU: non-infectious anterior uveitis

oGVHD: ocular graft-versus-host disease

SS-DED: Sjögren’s syndrome-related DED

CRS: chronic rhinosinusitis

DME: diabetic macular edema

NK: neurotrophic keratitis

RVO: retinal vein occlusion

VKC: vernal keratoconjunctivitis

JAK1: Janus kinase 1

rhNGF: recombinant human nerve growth factor

VEGFRi: vascular endothelial growth factor receptor kinases

LFA-1: lymphocyte function-associated antigen-1

TYK2: tyrosine kinase 2

Notes:

- (1) In February 2021, we entered into a series of asset transfer and license agreements with E-nitiate. Pursuant to such agreements, we transferred, among others, intellectual property and other rights in the compound underlying VVN461 and VVN432 (which now also underlies VVN481) to E-nitiate and E-nitiate granted us, among others, an exclusive, perpetual and irrevocable license to develop, manufacture and commercialize such compound in the ophthalmology and rhinology fields globally. See “Business—Our Collaboration and License Agreements—Arrangements with E-nitiate.”
- (2) We plan to complete the Phase III clinical trial of VVN461(HD) for the treatment of NIAU in China in the first half of 2027.
- (3) We had a Type C meeting with the FDA in November 2025, during which the FDA confirmed our plan to directly initiate a Phase III clinical trial of VVN461(HD) in the United States for the treatment of NIAU. We plan to submit an IND amendment in the second quarter of 2026 and directly commence such Phase III clinical trial by the end of 2026.
- (4) We obtained an IND approval from the NMPA to directly initiate a Phase II clinical trial of VVN461 for the treatment of SS-DED by leveraging the Phase I clinical trial results of VVN461 in China. We plan to commence such Phase II clinical trial by the end of 2026.
- (5) We plan to submit an IND application to the NMPA by the end of 2026 for directly initiating a Phase II clinical trials of VVN461 for the treatment of VKC by leveraging the Phase I clinical trial results of VVN461 in China.

SUMMARY

- (6) We plan to collaborate with academic research institutions in the United States to commence investigator-initiated trials of VVN461 for the treatment of scleritis and oGVHD by the end of 2026. We plan to submit IND amendments to the FDA for directly initiating registration-enabling pivotal clinical trials of VVN461(HD) in the United States for these indications by leveraging the investigator-initiated trial results.
- (7) We intend to develop VVN461(HD) for the treatment of pediatric uveitis. As of the Latest Practicable Date, we were developing the clinical development plan for such indication.
- (8) We plan to complete the Phase III clinical trial of VVN001 in China by the end of 2026.
- (9) Based on communications with the FDA, we directly commenced a Phase II clinical trial of VVN001 in the United States by leveraging our preclinical study results, including satisfactory safety data. We completed such Phase II clinical trial in April 2022.
- (10) Based on communications with the FDA, we directly commenced a Phase II clinical trial of VVN461 for the treatment of postoperative ocular inflammation in the United States by leveraging the Phase I clinical trial results of VVN461 in China. We completed such Phase II clinical trial in October 2024.

Our Core Products

VVN461(HD)

VVN461 is a JAK1/TYK2 inhibitor designed to block key inflammatory signaling pathways. VVN461(HD) is potentially the world’s first Janus kinase (JAK) inhibitor eye drop. VVN461 demonstrated, in our *in vitro* preclinical studies, potent inhibition of both JAK1 and TYK2 at kinase level and cellular level. With improved solubility utilizing our flash transmucosal delivery system, more drug substance of VVN461 can be delivered within the small volume that can be retained on the ocular surface, thereby increasing the amount of active drug available for corneal penetration and therapeutic effect. In our head-to-head Phase II clinical trial of VVN461 in NIAU patients in China, VVN461(HD) demonstrated anti-inflammatory efficacy comparable to that of corticosteroids while potentially avoiding the typical adverse effects associated with corticosteroids.

We obtained an IND approval from the NMPA for VVN461 for the treatment of NIAU in January 2023. We commenced a Phase I clinical trial of VVN461 in healthy subjects in China in March 2023 and completed such trial in December 2023. We commenced a Phase II clinical trial of VVN461 in patients with NIAU in China in November 2023 and completed such trial in February 2025. Based on compelling efficacy results in the Phase II clinical trial, our VVN461(HD) for the treatment of NIAU received the breakthrough therapy designation (BTD) from the NMPA. We commenced a Phase III clinical trial in patients with NIAU in China in November 2025 and expect to complete such trial in the first half of 2027. As JAK1/TYK2 inhibitors have the potential to address a broad spectrum of ocular surface inflammatory conditions, we are also developing VVN461(HD) for Sjögren’s syndrome-related DED (SS-DED), vernal keratoconjunctivitis (VKC), scleritis, ocular graft versus host disease (oGVHD) and pediatric uveitis.

In February 2021, we entered into a series of asset transfer and license agreements with E-nitiate. Pursuant to such agreements, we transferred, among others, intellectual property and other rights in the compound underlying VVN461 to E-nitiate and E-nitiate granted us, among others, an exclusive, perpetual and irrevocable license to develop, manufacture and commercialize VVN461 in the ophthalmology and rhinology fields globally. See “Business—Our Collaboration and License Agreements—Arrangements with E-nitiate.” We conducted preclinical studies of VVN461 before the transfer and licensing arrangements in February 2021 and completed preclinical studies and Phase I and Phase II clinical trials of VVN461 subsequent to the arrangements.

According to Frost & Sullivan, there were 2.9 million NIAU patients in China in 2024. The NIAU drug market is estimated to increase from US\$177.6 million in 2024 to US\$700.3 million in 2034, at a CAGR of 14.7%. As of the Latest Practicable Date, no innovative drug had been approved for NIAU treatment and there were two active innovative drug candidates at Phase II or beyond in China, including our VVN461. See “Industry Overview—Ocular Inflammation—Non-Infectious Anterior Uveitis” for details.

SUMMARY

VVN001

VVN001 is a next-generation LFA-1 antagonist designed to treat moderate-to-severe DED. VVN001 demonstrated efficacy comparable to first-generation LFA-1 antagonist in our *in vitro* preclinical studies, while having improved efficacy and safety compared to cyclosporine A (CsA), the current standard of care of moderate-to-severe DED, with no stinging sensation commonly associated with CsA, as demonstrated in our Phase II clinical trial of VVN001 in the United States. In addition, in the same clinical trial, VVN001 exhibited ocular surface irritation levels similar to vehicle and significantly lower than those observed with lifitegrast, the first-generation LFA-1 antagonist, improving patient experience and thus increased patient adherence.

We obtained an IND approval of VVN001 from the FDA in October 2020 to directly commence a Phase II clinical trial of VVN001 in the United States by leveraging our preclinical study results, including satisfactory safety data. We commenced a Phase II clinical trial in the United States in December 2020 and completed such trial in April 2022. Meanwhile, we obtained an IND approval from the NMPA in March 2021 and commenced a Phase I clinical trial of VVN001 in healthy subjects in China in August 2021. We completed such trial in December 2021. We then commenced a Phase II clinical trial of VVN001 in November 2021 in China in patients with moderate-to-severe DED and completed such trial in December 2022. We commenced a Phase III clinical trial in patients with moderate-to-severe DED in China in June 2024 and expect to complete such trial by the end of 2026.

According to Frost & Sullivan, the global DED patient population is estimated to increase from 1.6 billion in 2024 to 1.8 billion in 2034 while the DED patient population in China is estimated to increase from 359.2 million in 2024 to 372.1 million in 2034. Accordingly to Frost & Sullivan, the global DED drug market is estimated to grow from US\$6,614.3 million in 2024 to US\$9,930.5 million in 2034, at a CAGR of 4.2%, and the DED drug market in China is estimated to increase from US\$653.4 million in 2024 to US\$1,828.5 million in 2034, at a CAGR of 10.8%. As of the Latest Practicable Date, there were four innovative drugs approved for the treatment of DED and 26 active innovative drug candidates at Phase II or beyond being developed for the treatment of DED, including our VVN001, outside China. As of the Latest Practicable Date, there were five innovative drugs approved for the treatment of DED and ten active innovative drug candidates at Phase II or beyond being developed for the treatment of DED, including our VVN001, in China. See “Industry Overview—Dry Eye Disease” for details.

COMPETITION

The ophthalmic pharmaceutical market is highly competitive and is characterized by extensive research efforts. We believe our integrated technology platforms, comprehensive and differentiated product pipeline, product candidates with first-in-class potential, globalized research and development and ecosystem collaboration provide us with strong competitive advantages. We face potential competition from many different entities, including pharmaceutical and biopharmaceutical companies, academic institutions and public and private research institutions. Our Core Products and other product candidates face competition from approved and clinical-stage product candidates that focus on similar indications and target similar patient population, and these competing products may have strengths and advantages when compared to our product candidates. See “Industry Overview” and “Business—Competition.”

OUR STRENGTHS

We believe our strengths are:

- Leadership in innovative ophthalmic therapies supported by integrated technology platforms spanning entire lifecycle of drug development;
- Comprehensive and differentiated product pipeline;
- Potential first-in-class JAK inhibitor eye drop for ophthalmic anti-inflammatory therapy to reshape traditional treatment paradigms;

SUMMARY

- Dual growth engine of globalized research and development and ecosystem collaboration; and
- Expert management team supported by elite scientific advisory board and reputable investors.

OUR STRATEGIES

We plan to pursue the following strategies:

- Build an innovation-driven “VivaVision” brand with global reach;
- Accelerate the development of our globally competitive, differentiated innovative Core Products;
- Continue to enhance our R&D capabilities and expand our product pipeline;
- Establish a commercial-ready, efficient operations and manufacturing system; and
- Pursue international expansion and organic collaborations opportunities to maximize our products’ global commercial value.

RESEARCH AND DEVELOPMENT

We believe research and development is critical to our ability to grow into a biopharmaceutical company and remain competitive in the industry. We conduct our R&D activities through an in-house team as well as engagement of external CROs, as is in line with industry practice. We have established three R&D platforms to support our drug discovery and development, namely our ophthalmic small-molecule drug discovery platform, advanced formulation development platform and translational research platform for innovative ophthalmic drug. We incurred research and development expenses of RMB128.3 million and RMB65.2 million in the year ended December 31, 2024 and the nine months ended September 30, 2025, respectively. The development of our Core Products incurred research and development expenses of RMB49.2 million and RMB35.1 million in the year ended December 31, 2024 and the nine months ended September 30, 2025, respectively.

INTELLECTUAL PROPERTY

As of the Latest Practicable Date, we had 5 patents in China and 11 patents overseas. As of the same date, we had 15 patent applications in China and 37 patent applications overseas. Except for a patent of compound underlying VVN461, VVN432 and VVN481, which is licensed by E-nitiate to us, all patents and patent applications of our Core Products as of the Latest Practicable Date were self-developed and self-owned. See “Business—Our Collaboration and License Agreements—Arrangements with E-nitiate” for details. As of the Latest Practicable Date, we had registered two trademarks and one domain name in China. During the Track Record Period and up to the Latest Practicable Date, we had not been involved in any material proceeding in respect of, and we had not received notice of any material claim of infringement of, any intellectual property rights that may be threatened or pending, in which we may be a claimant or a respondent that may have a material adverse impact on us.

MANUFACTURING AND COMMERCIALIZATION

During the Track Record Period and up to the Latest Practicable Date, we engaged CDMOs to manufacture product candidates for our preclinical and clinical supplies. We intend to continue collaborating with contract manufacturing organizations for the future commercial manufacturing of our Core Products following regulatory approval. In addition, we may also consider establishing in-house manufacturing capabilities in the future.

We are actively formulating our commercialization plans in anticipation of multiple potential product launches over the next few years. In developing these strategies, we will consider key factors such as pricing, dose regimen, patient economic, social and demographic characteristics, market access and reimbursement policies. As of the Latest Practicable Date, we did not have any approved drug products and therefore had not formulated any specific

SUMMARY

pricing strategy for our product candidates. Our primary commercialization approach will center on cooperation with established pharmaceutical companies, supported by a specialized in-house team with strong medical and scientific background.

OUR SUPPLIERS

During the Track Record Period, our suppliers primarily consisted of (i) CROs for preclinical and clinical research, (ii) CDMOs for manufacturing of product candidates used in our research, (iii) SMOs for clinical trials and (iv) suppliers of laboratory consumables, machinery and equipment. In the year ended December 31, 2024 and the nine months ended September 30, 2025, our purchases from our five largest suppliers were RMB54.8 million and RMB26.1 million, respectively, accounting for approximately 72.7% and 77.8%, respectively, of our total purchases for the respective periods. In the same periods, purchases from our largest supplier were RMB17.9 million and RMB13.4 million, respectively, accounting for approximately 23.7% and 39.8%, respectively, of our total purchases for the respective periods.

PRE-[REDACTED] INVESTMENTS

We have completed rounds of Pre-[REDACTED] Investments and raised over RMB740 million. See “History, Development and Corporate Structure—Pre-[REDACTED] Investments” for further details of the Pre-[REDACTED] Investments and the Pre-[REDACTED] Investors.

RISK FACTORS

There are certain risks and uncertainties involved in [REDACTED] in our H Shares, some of which are beyond our control. These risks are set out in “Risk Factors” in this document. Some of the major risks we face include:

- We depend substantially on the success of our product candidates, all of which are undergoing preclinical or clinical development. If we are unable to successfully complete clinical development of our product candidates, or experience significant delays in doing so, our business prospects will be significantly impacted.
- Our product candidates will be subject to intense competition after commercialization and may fail to compete effectively against competitors.
- Clinical development of our product candidates involves a lengthy and expensive process with uncertain outcomes, and the results of preclinical studies and clinical trials may not be indicative of the final results.
- We incurred net losses historically and may continue to experience net losses in the foreseeable future.
- We have no track record in commercializing our product candidates. Our commercialization plan may not materialize as we expected.
- If we are unable to obtain and maintain patent protection for our product candidates, third parties could develop and commercialize products and technologies similar or identical to ours and compete directly against us, and the commercial prospects of our product candidates would be materially and adversely affected.

SUMMARY OF KEY FINANCIAL INFORMATION

This summary historical financial information set forth below is derived from, and should be read in conjunction with, our consolidated financial information, together with the accompanying notes, set forth in “Appendix I—Accountants’ Report” to this document, as well as the information set forth in “Financial Information” of this document. Our consolidated financial information has been prepared in accordance with IFRS Accounting Standards.

SUMMARY

Summary of Consolidated Statements of Profit or Loss and Other Comprehensive Income

	For the year ended December 31, 2024	For the nine months ended September 30,	
		2024	2025
		<i>(unaudited)</i>	
		<i>(RMB in thousands)</i>	
Other income and gains	8,572	2,950	3,444
Administrative expenses	(15,183)	(10,148)	(10,252)
Research and development expenses . . .	(128,261)	(91,229)	(65,178)
Other expenses	(337)	(391)	(38)
Finance costs	(66,175)	(49,402)	(59,307)
Share of profits and losses of an associate	(151)	(111)	(164)
Loss before income tax	(201,535)	(148,331)	(131,495)
Income tax expense	—	—	—
Loss for the year/period	(201,535)	(148,331)	(131,495)

Our net losses decreased from RMB148.3 million in the nine months ended September 30, 2024 to RMB131.5 million in the nine months ended September 30, 2025, primarily due to a decrease in our research and development expenses mainly as we completed a Phase II clinical trial of VVN461 in the United States in October 2024 and completed a Phase I clinical trial of VVN1901 in September 2024.

Summary of Consolidated Statements of Financial Position

	As of December 31, 2024	As of September 30, 2025
		<i>(unaudited)</i>
		<i>(RMB in thousands)</i>
Total non-current assets	25,862	25,794
Total current assets	70,914	131,066
Total current liabilities	43,238	39,804
Net current assets	27,676	91,262
Total assets less current liabilities	53,538	117,056
Total non-current liabilities	584,904	780,045
Net liabilities	(531,366)	(662,989)

We recorded net liabilities of RMB531.4 million and RMB663.0 million as of December 31, 2024 and September 30, 2025, respectively, primarily we recorded redemption liabilities on owners’ capital in relation to our Pre-[REDACTED] Investments. The redemption rights will be derecognized and credited to equity upon Listing.

SUMMARY

Summary of Consolidated Statements of Cash Flows

	For the year ended December 31, 2024	For the nine months ended September 30,	
		2024	2025
		<i>(unaudited)</i>	
		<i>(RMB in thousands)</i>	
Net cash used in operating activities . . .	(121,049)	(103,917)	(65,661)
Net cash generated from/(used in) investing activities	64,189	64,932	(79,656)
Net cash generated from/(used in) financing activities	12,392	(2,087)	130,422
Net decrease in cash and cash equivalents	(44,468)	(41,072)	(14,895)
Cash and cash equivalents at beginning of the year/period	94,798	94,798	50,783
Effect of foreign exchange rate changes, net	453	(312)	(122)
Cash and cash equivalents at end of the year/period	50,783	53,414	35,766

We had net cash outflows from our operating activities during the Track Record Period. Our uses of cash primarily relate to the research and development of our product candidates and the purchase of equipment and machinery. During the Track Record Period, we primarily funded our working capital requirement through equity financing, bank borrowings and cash generated from our operations. Going forward, we believe our liquidity requirements will be satisfied by funds from a combination of cash from operations, cash and cash equivalents, borrowings and [REDACTED] from the [REDACTED].

Taking into account the financial resources available to us, including cash from operations, cash and cash equivalents, borrowings and the estimated net [REDACTED] from the [REDACTED], our Directors are of the opinion that we have sufficient working capital to cover at least 125% of our costs, including general, administrative and operating costs and research and development expenses for at least the next 12 months from the date of this document.

Our cash burn rate refers to our average monthly (i) net cash used in operating activities, which includes research and development expenses and administrative expenses; and (ii) capital expenditures. Taking into account our cash and cash equivalents, financial assets at FVTPL and debt instrument at FVTOCI as of January 31, 2026, and assuming average monthly net cash used in operating activities going forward of 1.1 times the level in the nine months ended September 30, 2025, and the estimated capital expenditures with reference to the capital commitments as of September 30, 2025, we estimate that we will be able to maintain our financial viability for [REDACTED], or, if we also take into account the [REDACTED] from the [REDACTED] provided that the [REDACTED] is set at [REDACTED] per Share, being the low end of the indicative [REDACTED] range, [REDACTED]. Our Directors and our management team will continue to monitor our working capital, cash flows and our business development status.

KEY FINANCIAL RATIO

Our current ratio, which equals current assets divided by current liabilities, was 1.6 and 3.3 as of December 31, 2024 and September 30, 2025, respectively. See “Financial Information—Key Financial Ratio” for details.

SUMMARY

[REDACTED] STATISTICS

The statistics in the following table are based on the assumptions that (i) the [REDACTED] has been completed and [REDACTED] H Shares are newly issued in the [REDACTED] and [REDACTED] Unlisted Shares are converted into H Shares, and (ii) the [REDACTED] for the [REDACTED] is not exercised and the Convertible Bond is not converted at all, and (iii) [REDACTED] Shares are expected to be in issue following the completion of the [REDACTED]:

	Based on an [REDACTED] of [REDACTED] per [REDACTED]	Based on an [REDACTED] of [REDACTED] per [REDACTED]
Market capitalization of our Shares ⁽¹⁾	[REDACTED]	[REDACTED]
Unaudited <i>pro forma</i> adjusted net tangible assets attributable to equity shareholders of our Company per Share ⁽²⁾	[REDACTED]	[REDACTED]

Notes:

- (1) The calculation of market capitalization is based on [REDACTED] Shares expected to be in issue immediately after the completion of the [REDACTED] (assuming the [REDACTED] is not exercised).
- (2) The unaudited *pro forma* adjusted consolidated net tangible assets attributable to owners of our Company as of September 30, 2025 per Share is calculated after making the adjustments referred to in “Financial Information—Unaudited Pro Forma Adjusted Net Tangible Assets.”

FUTURE PLANS AND USE OF [REDACTED]

We estimate that we will receive [REDACTED] of approximately [REDACTED] (assuming the [REDACTED] is not exercised) after deducting the [REDACTED] fees and expenses payable by us in the [REDACTED] assuming an [REDACTED] of [REDACTED] per [REDACTED], being the mid-point of the indicative [REDACTED] of [REDACTED] to [REDACTED] per [REDACTED] set out in this document. We intend to use the [REDACTED] from the [REDACTED] for the following purposes.

- approximately [60.0]%, or [REDACTED], will be allocated for the development of our VVN461(HD), of which (i) approximately [25.0]%, or [REDACTED], will be allocated to the clinical development for the treatment of NIAU in the United States, (ii) approximately [12.5]%, or [REDACTED], will be allocated to the clinical development and registration for the treatment of NIAU in China, (iii) approximately [10.0]%, or [REDACTED], will be allocated for the treatment of SS-DED in China, and (iv) approximately [12.5]%, or [REDACTED], will be allocated to the development of VVN461(HD) for other indications, including VKC, scleritis and oGVHD;
- approximately [10.0]%, or [REDACTED], will be allocated for the clinical development and registration of our VVN001;
- approximately [15.0]%, or [REDACTED], will be allocated for the development and registration other product candidates;
- approximately [5.0]%, or [REDACTED], will be used for the establishment of an in-house commercialization team and marketing activities; and
- approximately [10.0]%, or [REDACTED], will be allocated to working capital and other general corporate purposes.

SUMMARY

[REDACTED]

Assuming the [REDACTED] is not exercised and an [REDACTED] of [REDACTED] per [REDACTED] (which is the mid-point of the [REDACTED]), we expect to incur approximately [REDACTED] of [REDACTED] (including the aggregate [REDACTED] and fees, professional fees and other expenses relating to the [REDACTED]), including (i) [REDACTED] (including [REDACTED] and other expenses of approximately [REDACTED]) and (ii) non [REDACTED] of approximately [REDACTED], comprising (a) fees and expenses of legal advisers and accountants of approximately [REDACTED] and (b) other fees and expenses of approximately [REDACTED], accounting for approximately [REDACTED] of the [REDACTED] from the [REDACTED]. Approximately [REDACTED] of our [REDACTED] is expected to be charged to our consolidated statements of profit or loss and approximately [REDACTED] is expected to be deducted from equity upon Listing. The [REDACTED] above are the latest practicable estimate for reference only, and the actual amount may differ from this estimate.

DIVIDEND POLICY

No dividend has been proposed, paid or declared by our Company since its incorporation. We do not have any plan to declare or pay any dividends in the foreseeable future. The determination of whether to pay a dividend and in which amount is based on factors the Board may deem relevant. Any dividend distribution will also be subject to the approval of the Shareholders in the Shareholder’s meeting. Under the PRC law and the Articles of Association, the general reserve requires annual appropriations of 10% of after-tax profits at each year-end until the balance reaches 50% of the relevant PRC entity’s registered capital. In view of our accumulated losses, as advised by our PRC Legal Advisers, according to the relevant PRC laws and regulations and the Articles of Association, we shall not declare or pay dividend until the accumulated losses are covered by our after-tax profits and sufficient statutory common reserve are drawn in accordance with the relevant laws and regulations.

RECENT DEVELOPMENT

Clinical Trials

Phase III of VVN461(HD) for NIAU in China

We commenced a Phase III clinical trial in NIAU patients in China of VVN461(HD) in November 2025. We expect to complete such trial in the first half of 2027. See “Business—Our Product Candidates—Our Core Products—VVN461(HD)—Non-Infectious Anterior Uveitis (NIAU)—Summary of Clinical Trials—Ongoing Phase III Clinical Trial.”

Phase I of VVN432

We commenced a Phase I clinical trial of VVN432 in healthy adults in China in November 2025. As of the Latest Practicable Date, we had completed participant enrollment for stage 1 of the trial. We expect to complete such trial in the third quarter of 2026. See “Business—Our Product Candidates—Our Other Product Candidates—VVN432—Summary of Clinical Trials—Ongoing Phase I Clinical Trial.”

Phase III Mid-term Meeting of VVN001

For the Phase III clinical trial of VVN001 in patients with moderate-to-severe DED in China, we held a mid-term meeting in December 2025, during which the independent data monitoring committee (IDMC) confirmed that the trial could proceed with the current trial design.

Phase II of VVN1901

We completed patient enrollment for stage 1 of the registration-enabling pivotal Phase II clinical trial of VVN1901 in patients with stage 2 or stage 3 NK in January 2026. We expect to complete such trial in 2028. See “Business—Our Product Candidates—Our Other Product Candidates—VVN1901—Summary of Clinical Trials—Ongoing Phase II Clinical Trial.”

SUMMARY

IND Approval

We obtained an IND approval from the NMPA in November 2025 for directly commencing a Phase II clinical trial of VVN461 for the treatment of SS-DED.

Meeting with FDA on VVN461(HD) for NIAU

We had a Type C meeting with the FDA in November 2025, during which the FDA confirmed our plan to directly initiate a Phase III clinical trial of VVN461(HD) in the United States for the treatment of NIAU.

No Material Adverse Change

The Directors confirm that, up to the date of this document, there have been no material adverse changes in our financial, operational, or trading position or prospects since September 30, 2025, being the date of the latest reporting period reported on in the Accountant’s Report in Appendix I to this document.

CSRC FILING

We submitted a filing to the CSRC for application of the Listing and the [REDACTED] on [●], 2026. The CSRC confirmed our completion of filing on [●].

DEFINITIONS AND ACRONYMS

In this document, unless the context otherwise requires, the following terms shall have the meanings set out below. Certain other terms are explained in “Glossary of Technical Terms” of this document.

DEFINITIONS

“Accountants’ Report”	the accountants’ report for the Track Record Period prepared by Ernst & Young, the text of which is set out in Appendix I to this document;
“Articles of Association” or “Articles”	the articles of association of our Company adopted on February 10, 2026 which shall become effective as of the date on which the H Shares are listed on the Stock Exchange, as amended from time to time, a summary of which is set out in “Appendix V—Summary of Articles of Association” to this document;
“associate(s)”	has the meaning ascribed to it under the Listing Rules;
“Audit Committee”	the audit committee of the Board;
“AvenaBio”	AVENABIO LLC, a limited liability company incorporated in the United States on August 4, 2023 and a wholly owned subsidiary of our Company;
“Board” or “Board of Directors”	the board of Directors;

[REDACTED]

“business day”	a day on which banks in Hong Kong are generally open for normal banking business to the public and which is not a Saturday, Sunday or public holiday in Hong Kong;

[REDACTED]

“China” or “PRC”	the People’s Republic of China, but for the purpose of this document and for geographical reference only and except where the context requires otherwise, references in this document to “China” and the “PRC” do not apply to Hong Kong, the Macau Special Administrative Region and Taiwan;
“close associates(s)”	has the meaning ascribed to it under the Listing Rules;
“Companies Ordinance”	the Companies Ordinance (Chapter 622 of the Laws of Hong Kong), as amended, supplemented or otherwise modified from time to time;
“Companies (Winding up and Miscellaneous Provisions) Ordinance”	the Companies (Winding up and Miscellaneous Provisions) Ordinance (Chapter 32 of the Laws of Hong Kong), as amended, supplemented or otherwise modified from time to time;
“Company”	VivaVision Biotech (Zhejiang) Co., Ltd. (維眸生物科技(浙江)股份有限公司) (formerly known as VivaVision Biotech (Shanghai) Co., Ltd (維眸生物科技(上海)有限公司)), a limited liability company established in the PRC on September 22, 2016 and converted into a joint stock limited liability company in the PRC on January 30, 2026;

DEFINITIONS AND ACRONYMS

“Company Law” or “PRC Company Law”	the Company Law of the PRC (中華人民共和國公司法), as amended, supplemented or otherwise modified from time to time;
“Compliance Adviser”	has the meaning ascribed to it under the Listing Rules;
“connected person(s)”	has the meaning ascribed to it under the Listing Rules;
“connected transaction(s)”	has the meaning ascribed to it under the Listing Rules;
“Conversion of Unlisted Shares to H Shares”	the conversion of [REDACTED] Unlisted Shares in aggregate held by [REDACTED] existing Shareholders into H Shares on a one-for-one basis upon the completion of the [REDACTED]. Such conversion of Unlisted Shares into H Shares and an application for the H Shares to be listed on the Stock Exchange has been filed with the CSRC on [●], 2026. The CSRC issued the filing notice on [●] in respect of the [REDACTED] and the application for listing of the H Shares on the Stock Exchange;
“Core Product”	has the meaning ascribed thereto under Chapter 18A of the Listing Rules, which is the product for the purpose of satisfying the eligibility requirements under Chapter 18A of the Listing Rules and Chapter 2.3 of the Guide for New Listing Applicants;
“Director(s)”	the director(s) of our Company;
“Dr. Shen” or “Single Largest Shareholder”	Dr. Shen Wang (沈旺), our founder, executive Director, chief executive officer and chairman of our Board and the single largest Shareholder;
“EIT Law”	the PRC Enterprise Income Tax Law (中華人民共和國企業所得稅法), as enacted by the NPC on March 16, 2007 and effective on January 1, 2008, as amended, supplemented or otherwise modified from time to time;
“Employee Incentive Scheme”	the employee incentive scheme approved and adopted by our Company on February 4, 2021, a summary of the principal terms of which is set forth in “Appendix VI—Statutory and General Information—D. Employee Incentive Scheme” to this document;
“E-nitiate”	E-nitiate Biopharmaceuticals (Hangzhou) Co., Ltd. (啟元生物(杭州)有限公司), a limited liability company established in the PRC on November 23, 2020, which is an associate of our Company and an Independent Third Party;
“Extreme Conditions”	extreme conditions as announced by the government of Hong Kong;
“Fast Interface for New Issuance” or “FINI”	an online platform operated by HKSCC that is mandatory for admission to trading and, where applicable, the collection and processing of specified information on subscription in and settlement for all new listings;
“Frost & Sullivan”	Frost & Sullivan (Beijing) Inc., Shanghai Branch Co., a global market research and consulting company, which is an Independent Third Party;
“General Rules of HKSCC”	the terms and conditions regulating the use of HKSCC’s services, as may be amended or modified from time to time and where the context so permits, shall include the HKSCC Operational Procedures;

DEFINITIONS AND ACRONYMS

[REDACTED]

“Group”	our Company and all of our subsidiaries or, where the context so requires, in respect of the period before our Company became the holding company of our present subsidiaries, the business operated by such subsidiaries or their predecessors (as the case may be);
“Guide”	the Guide for New Listing Applicants, as published by the Stock Exchange on November 29, 2023 and effective on January 1, 2024, as amended or supplemented or otherwise modified from time to time;
“H Share(s)”	shares of our Company for which an application [has been] made for listing and permission to trade on the Stock Exchange;
“H Share Registrar”	[REDACTED]

[REDACTED]

“HKSCC Nominees”	HKSCC Nominees Limited, a wholly owned subsidiary of HKSCC;
“HKSCC Operational Procedures”	the Operational Procedures of HKSCC in relation to CCASS, containing the practices, procedures and administrative requirements relating to operations and functions of CCASS, from time to time in force;
“HKSCC Participant”	a participant admitted to participate in CCASS as a direct clearing participant, a general clearing participant or a custodian participant;
“HK\$”	Hong Kong dollars, the lawful currency of Hong Kong;
“Hong Kong”	the Hong Kong Special Administrative Region of the PRC;

[REDACTED]

DEFINITIONS AND ACRONYMS

[REDACTED]

“Huzhou Xiulai” or “Employee Ownership Platform”

Huzhou Xiulai Business Consulting Partnership (Limited Partnership) (湖州修暎商務諮詢合夥企業(有限合夥)) (formerly known as Shanghai Xiulai Business Consulting Partnership (Limited Partnership) (上海修暎商務諮詢合夥企業(有限合夥))), a limited partnership established in the PRC on August 14, 2019 and the employee ownership platform of our Group;

“Independent Third Party(ies)”

individuals or company(ies), who or which, to the best of our Directors’ knowledge, information and belief, having made all reasonable enquiries, is not a connected person of our Company within the meaning of the Listing Rules;

[REDACTED]

“Latest Practicable Date”

February 5, 2026, being the latest practicable date for the purpose of ascertaining certain information contained in this document prior to its publication;

[REDACTED]

“Listing”

the listing of our H Shares on the Main Board;

“Listing Committee”

the listing sub-committee of the board of directors of the Stock Exchange;

DEFINITIONS AND ACRONYMS

“Listing Date”	the date, expected to be on or about [REDACTED], on which dealings in our H Shares first commence on the Main Board;
“Listing Rules”	the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited, as amended or supplemented or otherwise modified from time to time;
“Main Board”	the stock exchange (excluding the option market) operated by the Stock Exchange which is independent from and operated in parallel with the Growth Enterprise Market of the Stock Exchange;

[REDACTED]

“PRC Legal Advisers”	Global Law Office, our legal advisers as to PRC laws in connection with the [REDACTED];
“Pre-[REDACTED] Investment(s)”	the pre-[REDACTED] investment(s) in our Company, details of which are set out in “History, Development and Corporate Structure—Pre-[REDACTED] Investments” in this document;
“Pre-[REDACTED] Investor(s)”	the investor(s) of the Pre-[REDACTED] Investments;

[REDACTED]

“QIB(s)”	qualified institutional buyers within the meaning of Rule 144A;
“Regulation S”	Regulation S under the U.S. Securities Act;
“Renminbi” or “RMB”	the lawful currency of the PRC;

DEFINITIONS AND ACRONYMS

“Rule 144A”	Rule 144A under the U.S. Securities Act;
“Securities and Futures Commission” or “SFC”	the Securities and Futures Commission of Hong Kong;
“Share(s)”	ordinary share(s) with nominal value of RMB0.10 each in the share capital of the Company;
“Shareholder(s)”	holder(s) of our Share(s);
“Sole Sponsor,” [REDACTED]	China International Capital Corporation Hong Kong Securities Limited;
“Sophisticated Investor(s)”	has the meaning ascribed to it under Chapter 2.3 of the Guide issued by the Stock Exchange;
“State Council”	State Council of the PRC (中華人民共和國國務院);
	[REDACTED]
“Stock Exchange”	The Stock Exchange of Hong Kong Limited, a wholly owned subsidiary of Hong Kong Exchange and Clearing Limited;
“subsidiary(ies)”	has the meaning ascribed to it under the Listing Rules;
“substantial shareholder(s)”	has the meaning ascribed to it under the Listing Rules;
“Track Record Period”	the year ended December 31, 2024 and the nine months ended September 30, 2025;

[REDACTED]

“Unlisted Share(s)”	ordinary share(s) (other than H Shares) in the share capital of our Company with a nominal value of RMB0.10 each;
“U.S.” or “United States”	the United States of America, its territories, its possessions and all areas subject to its jurisdiction;
“US\$” or “U.S. dollars”	United States dollars, the lawful currency of the United States;
“U.S. persons”	U.S. persons as defined in Regulation S;
“U.S. Securities Act”	United States Securities Act of 1933, as amended, supplemented or otherwise modified from time to time;
“VivaVision Hong Kong”	VIVAVISION BIOTECH (HONG KONG) LIMITED (維眸生物(香港)有限公司), a limited liability company incorporated in Hong Kong on January 16, 2023 and a wholly owned subsidiary of our Company;
“VivaVision Shanghai”	Shanghai VivaVision Yaojing Biotech Co., Ltd. (上海維眸曜睛生物科技有限公司), a limited liability company established in the PRC on July 11, 2023 and a wholly owned subsidiary of our Company;
“VivaVision U.S.”	VIVAVISION BIOTECH INC., a limited liability company established in the United States on June 29, 2020 and a wholly owned subsidiary of our Company;

DEFINITIONS AND ACRONYMS

[REDACTED]

ACRONYMS

“AFRC”	the Accounting and Financial Reporting Council of Hong Kong;
“CAGR”	compounded annual growth rate, which is calculated by dividing the amount at the end of the period by the amount of the beginning of that period, raising the result to an exponent of one divided by the number of years in the period, and subtracting one from the subsequent result;
“CCASS”	the Central Clearing and Settlement System established and operated by HKSCC;
“CDE”	Center for Drug Evaluation (國家藥品監督管理局藥品審評中心), a division of the NMPA responsible for acceptance and technical review of applications for drug clinical trials and drug marketing authorization;
“CNIPA”	National Intellectual Property Administration of the PRC (國家知識產權局);
“CSRC”	China Securities Regulatory Commission (中國證券監督管理委員會);
“FDA”	U.S. Food and Drug Administration;
“GMP”	good manufacturing practice
“HKSCC”	Hong Kong Securities Clearing Company Limited, a wholly owned subsidiary of Hong Kong Exchanges and Clearing Limited;
“IASB”	International Accounting Standards Board;
“IFRS”	International Financial Reporting Standards;
“IND”	Investigational New Drug;
“MAH”	Marketing Authorization Holder;
“NMPA”	the National Medical Products Administration of the PRC (國家藥品監督管理局) and its predecessor, the China Food and Drug Administration (國家食品藥品監督管理總局);
“NPC”	the National People’s Congress of the PRC (中華人民共和國全國人民代表大會);
“PBOC”	the People’s Bank of China (中國人民銀行), the central bank of the PRC;
“SAFE”	the State Administration of Foreign Exchange of the PRC (中華人民共和國國家外匯管理局);

DEFINITIONS AND ACRONYMS

“SFO”	the Securities and Futures Ordinance, Chapter 571 of the Laws of Hong Kong, as amended, supplemented or otherwise modified from time to time;
“STA”	the State Taxation Administration of the PRC (中華人民共和國國家稅務總局); and
“VAT”	value-added tax.

For the purpose of this document, “we” refers to the Company or the Group, as the context requires.

For ease of reference, the names of Chinese laws and regulations, governmental authorities, institutions, natural persons or other entities (including certain of our subsidiaries) have been included in the document in both the Chinese and English languages and in the event of any inconsistency, the Chinese versions shall prevail. English translations of company names and other terms from the Chinese language are provided for identification purposes only.

Certain amounts and percentage figures included in this document were subjected to rounding adjustments. Accordingly, figures shown as totals in certain tables may not be arithmetic aggregation of the figures preceding them.

GLOSSARY OF TECHNICAL TERMS

This glossary contains definitions of certain terms used in this document in connection with us and our business. Some of these may not correspond to standard industry definitions.

“ACC score”	anterior chamber cell score, a grading of inflammatory cells present in the anterior chamber of the eye, typically assessed by slit-lamp examination using a standardized scoring scale to quantify intraocular inflammation
“ADA”	anti-drug antibodies, antibodies produced by the immune system in response to a therapeutic drug, which may affect the drug’s efficacy, safety or pharmacokinetics
“AE”	adverse event, any untoward medical occurrence in a patient or clinical trial subject associated with the use of a drug or other therapy
“AMD”	age-related macular degeneration, a degenerative disease of the macula and a leading cause of vision loss in older adults
“anterior segment”	structures in the front part of the eye, including the cornea, anterior chamber, iris, ciliary body and lens. Many topical ophthalmic therapies primarily target the anterior segment
“AUC”	area under the concentration-time curve, a pharmacokinetic parameter that represents the total systemic exposure of the body to a drug over time, calculated as the area under the plasma drug concentration versus time curve
“BFS”	blow-fill-seal, a manufacturing technology that forms, fills and seals plastic containers in a single, automated and enclosed process, enabling the production of sterile, single-use liquid pharmaceutical products with reduced risk of contamination and high consistency of dosing
“bioavailability”	the fraction of an administered dose of drug that reaches the systemic circulation, which is one of the principal pharmacokinetic properties of drugs
“biologics”	medicinal products that are derived from living organisms or produced using biological processes, and typically comprise complex biological molecules or materials, such as proteins, antibodies and other biological substances
“BQL”	below the qualification limit, concentration measurements which are too small for specific values to be assigned
“BTD”	breakthrough therapy designation, a regulatory status awarded to drugs by the NMPA that show substantial improvement over existing therapies for serious or life-threatening conditions, based on preliminary clinical evidence
“cataract”	a dense, cloudy area that forms in the lens of the eye which leads to vision loss

GLOSSARY OF TECHNICAL TERMS

“CDMO”	contract development and manufacturing organization, a company that serves other companies in the pharmaceutical industry on a contract basis to provide comprehensive services from drug development through drug manufacturing
“CFS score”	corneal fluorescein staining score, a clinical measure of damage to the surface of the cornea obtained by instilling fluorescein dye in the eye and grading the resulting staining pattern. The cornea is typically divided into five predefined zones (central, inferior, superior, temporal and nasal), each assigned a numerical score (abbreviated as cCFS, iCFS, sCFS, tempCFS and nCFS, respectively) according to a standard grading scale. A total corneal fluorescein staining score (abbreviated as “total CFS” or “tCFS”) is then calculated as the sum of the scores for the individual zones, with higher scores indicating more pronounced corneal surface damage
“C _{max} ”	the highest measured concentration of a drug in blood or plasma after administration
“cornea”	the transparent part of the coat of the eyeball that covers the iris and pupil and admits light to the interior
“corticosteroids”	class of steroid hormones that lowers inflammation in the body and reduces immune system activity
“CRO”	contract research organization, a company that provides support to pharmaceutical companies by providing a range of professional research services on a contract basis
“CRS”	chronic rhinosinusitis, a long-term inflammation of the nose and paranasal sinuses associated with symptoms such as nasal blockage, discharge, facial pressure and reduced sense of smell. Chronic rhinosinusitis is commonly classified into two forms: chronic rhinosinusitis with nasal polyps (CRSwNP) and chronic rhinosinusitis without nasal polyps (CRSSNP)
“cyclosporine A” or “CsA”	an immunomodulatory agent used in ophthalmology primarily for the treatment of dry eye disease and other inflammatory ocular surface disorders
“cytokines”	small secreted proteins released by cells that have a specific effect on the interactions and communications between cells
“DED”	dry eye disease, a common condition in which the eyes do not produce enough tears or the tears evaporate too quickly, leading to ocular surface damage and symptoms such as dryness, irritation and visual disturbance
“DME”	diabetic macular edema, swelling in the central part of the retina (macula) due to leakage from damaged blood vessels in people with diabetes
“double-masked”	a type of clinical trial in which neither the participants nor the researchers know which treatment a specific participant is receiving, which helps prevent bias or expectations from influencing the results of the study
“epithelial defect”	a loss or break in the surface layer of epithelial cells, typically referring to a discontinuity in the corneal or conjunctival epithelium of the eye, exposing the underlying tissue

GLOSSARY OF TECHNICAL TERMS

“fundus”	the inside back part of the eye, including the retina, optic nerve and blood vessels
“glaucoma”	a group of eye diseases characterized by progressive damage to the optic nerve, often associated with elevated intraocular pressure, which can lead to gradual loss of vision and, if left untreated, blindness
“Grade IIIA hospitals”	the largest and best regional hospitals in China designated as Grade III hospitals by the National Health Commission hospital classification system, typically having more than 500 beds, as for a comprehensive hospital providing high-quality professional healthcare services covering a wide geographic area and undertaking higher academic and scientific research initiatives. The Grade III hospitals are graded into three sub-levels (A, B and C) based on the assessment of competent authorities and Grade IIIA hospitals are the highest ranking hospitals among Grade III hospitals
“IC ₅₀ ”	the concentration of a drug or substance that produces 50% of its maximum inhibitory effect in a biological system
“IDMC”	independent data monitoring committee, an independent expert group that reviews data during a clinical trial to monitor safety and efficacy
“immunogenicity”	the ability of a drug, particularly a biological product, to provoke an immune response in the body, including the formation of anti-drug antibodies
“IND”	investigational new drug, the application for which is the first step in the drug review process by regulatory authorities to decide whether to permit clinical trials
“inflammatory cytokine pathways”	cell signaling pathways activated by cytokines that trigger or regulate inflammation. Dysregulation of these pathways can contribute to many immune-mediated and inflammatory diseases
“innovative drug”	a drug that contains an active ingredient or combination of active ingredients that has not been authorized before, or a drug that contains an existing active ingredient or combination of active ingredients with improvements on its structure, formulation, route of administration or indication. Under relevant PRC chemical drug registration regulations, innovative drugs include class 1 drugs (innovative new drugs), class 2 drugs (improved new drugs) and class 5.1 drugs (innovative or improved new drugs that have been marketed abroad and apply for approval in China)
“interferon” or “IFN”	a family of signaling cytokines produced by host cells in response to viruses, other pathogens and immune stimuli, and act as key mediators of antiviral defense and immune regulation
“interleukin” or “IL”	a family of signaling cytokines produced by white blood cells and function as key mediators of immune cell communication, regulating cell proliferation, differentiation, motility and survival across both innate and adaptive immunity
“intravitreal space”	the space within the eye that is filled by the vitreous humor (the clear gel-like substance between the lens and the retina)

GLOSSARY OF TECHNICAL TERMS

“investigator-initiated trial”	a clinical study that is designed and initiated by an independent investigator who acts as the sponsor, instead of being initiated by a pharmaceutical company
“ <i>in vitro</i> ”	experiments or tests performed outside a living organism
“ <i>in vivo</i> ”	experiments or tests performed within a living organism
“JAK”	Janus kinase, a family of tyrosine kinase enzymes (including JAK1, JAK2, JAK3 and TYK2) that transmit signals from various cytokine receptors involved in immune and inflammatory responses
“KOL”	key opinion leader, professional (in the context of the medical industries) who influence their peers’ medical practice
“LFA-1”	lymphocyte function-associated antigen-1, a protein found on the surface of certain white blood cells, including T cells. LFA-1 is an integrin adhesion molecule that helps immune cells adhere to other cells and migrate into tissues, and it plays an important role in immune responses and inflammation
“macula”	an oval-shaped pigmented area near the center of the retina which is responsible for central, high-resolution, color vision
“MOA”	mechanism of action, the specific way in which a drug produces its therapeutic effect in the body
“NDA”	new drug application, an application through which the drug sponsor formally proposes that the relevant regulatory authority approve a new drug for sales and marketing
“NIAU”	non-infectious anterior uveitis, an inflammation of the front part of the uvea that is not caused by infection and is often related to immune-mediated conditions
“NK”	neurotrophic keratitis, a rare degenerative disease of the cornea caused by impaired corneal nerve function, leading to reduced corneal sensitivity, poor healing and risk of corneal damage, ulceration and vision loss
“NSAIDs”	non-steroidal anti-inflammatory drugs, a class of drugs that reduce inflammation without using steroids
“oGvHD”	ocular graft-versus-host disease, an ocular manifestation of graft-versus-host disease that occurs after allogeneic hematopoietic stem cell or bone marrow transplantation, in which donor immune cells attack the recipient’s ocular tissues. This can cause severe dry eye, ocular surface inflammation, discomfort and visual disturbance, and can significantly affect quality of life
“ophthalmology”	a branch of medical science dealing with the structure, functions and diseases of the eye
“pediatric uveitis”	inflammation of the uveal tract of the eye occurring in children. It can be associated with systemic autoimmune diseases and may lead to complications such as glaucoma or cataract if not adequately treated
“Phase I clinical trial”	a study in which a drug is introduced into healthy human subjects or patients with the target disease or condition and tested for safety, dosage tolerance, absorption, metabolism, distribution, excretion and, if possible, to gain an early indication of its effectiveness

GLOSSARY OF TECHNICAL TERMS

“Phase II clinical trial”	a study in which a drug is administered to a limited patient population to identify possible adverse effects and safety risks, to preliminarily evaluate the efficacy of the drug for specific targeted diseases, and to determine dosage tolerance and optimal dosage
“Phase III clinical trial”	a study in which a drug is administered to an expanded patient population at geographically dispersed clinical trial sites to generate statistically sufficient data to evaluate the efficacy and safety of the drug for regulatory approval and to provide adequate information for the labeling of the product
“PK”	pharmacokinetics, the study of how the human body affects a drug over time, including its absorption, distribution, metabolism and excretion
“placebo”	a medical treatment or preparation with no specific pharmacological activity
“preclinical study”	research that tests a drug candidate on non-human subjects to gather efficacy and safety information to decide whether the drug candidate is ready for clinical trials in human participants
“preferred term”	the standardized medical term that represents a single medical concept and is used as the primary term for coding and analyzing safety data
“presbyopia”	an age-related loss of the eye’s ability to focus on near objects, usually becoming noticeable from around the age of 40, due to gradual stiffening of the lens
“primary endpoint”	the main outcome in a clinical trial that is used to assess whether a treatment is effective. The study is usually designed and statistically powered around this pre-specified endpoint
“randomized clinical trial”	a study in which the participants are divided by chance into separate groups that compare different treatments or other interventions
“rescue medication”	medicine intended to relieve symptoms immediately
“retina”	a thin layer of tissue that lines the back of the eye on the inside
“rNGF”	recombinant nerve growth factor, a laboratory-produced form of nerve growth factor used therapeutically to support the survival, maintenance and regeneration of certain nerve cells
“RVO”	retinal vein occlusion, blockage of a retinal vein, leading to retinal swelling, hemorrhage and potential vision loss
“SAE”	serious adverse event, AE that results in death, or is life-threatening, or requires in-patient hospitalization or causes prolongation of existing hospitalization, or results in persistent or significant disability or incapacity, or is a congenital anomaly or birth defect
“SANDE scores”	scores derived from the symptom assessment in dry eye questionnaire, a patient-reported instrument that uses visual analog scales to quantify the frequency and severity of dry eye symptoms

GLOSSARY OF TECHNICAL TERMS

“Schirmer’s test”	a diagnostic test to measure tear production, in which a strip of filter paper is placed in the lower eyelid and the length of the wetted portion is measured over a fixed period
“scleritis”	a severe, often painful inflammation of the sclera, the white outer wall of the eye. It is frequently associated with systemic autoimmune diseases and may threaten vision if not properly managed
“secondary endpoint”	outcome measured in a clinical trial to further evaluate the effect of a treatment on other relevant aspects of disease or patient benefit, beyond the primary endpoint
“small molecule”	a low molecular weight compound that can enter cells easily and interact with specific targets such as proteins or enzymes
“SMO”	site management organization, a company that provides operational support in managing clinical trial sites
“SS-DED”	Sjögren’s syndrome dry eye disease, a chronic autoimmune disease in which the immune system attacks glands that produce tears and saliva, typically causing dry eyes and dry mouth and sometimes affecting other organs
“STAT”	signal transducer and activator of transcription, a family of protein that transmit signals from cytokines and cell-surface receptors to the cell nucleus, where they regulate the expression of specific genes
“suprachoroidal space”	a space in the eye between the sclera (the white outer layer) and the choroid (the vascular layer that supplies the retina) that can be used as a route for targeted ocular drug delivery, particularly to the posterior segment of the eye
“systemic exposure”	the extent and duration to which a drug reaches the systemic circulation and tissues of the body after administration, usually described by pharmacokinetic parameters such as concentration over time
“T cell”	a type of white blood cell that develops in the thymus and plays a central role in adaptive immunity. Major subsets include CD4 ⁺ helper T cells, which support other immune cells, and CD8 ⁺ cytotoxic T cells, which destroy target cells presenting foreign or abnormal antigens
“TEAE”	treatment-emergent adverse event, an adverse event that arises or worsens after the start of study treatment in a clinical trial, regardless of whether it is considered related to the treatment
“tear film”	a thin fluid layer that covers the outer surfaces of the eye
“T-helper cell” or “Th cell”	a type of T cell that activates other immune cells by releasing cytokines and play an important role in the adaptive immune system, which is also known as CD4 ⁺ T cells
“toxicity”	the degree to which a substance or a mixture of substances can harm humans or animals. Acute toxicity involves harmful effects in an organism through a single or short-term exposure
“transmucosal delivery”	a method of drug delivery in which a medicine is absorbed through a mucous membrane (for example, oral, nasal or ocular surfaces) into the body, rather than through the skin or by injection

GLOSSARY OF TECHNICAL TERMS

“uvea”	the middle, vascular layer of the eye, lying between the sclera (white of the eye) and the retina. The uvea consists of the iris, ciliary body and choroid
“uveitis”	inflammation of the uveal tract of the eye. Uveitis can be classified by anatomical location as anterior uveitis, intermediate uveitis, posterior uveitis or panuveitis, and by cause as infectious uveitis or non-infectious uveitis
“VAS”	visual analog scale, a patient-reported outcome measure in which a person rates the severity of symptoms or discomfort along a continuous line between two end-points
“VEGF”	vascular endothelial growth factor, a signaling protein that stimulates the growth of new blood vessels
“vehicle”	in pharmaceutical formulations, the inert substance (such as a liquid, gel or cream base) used to carry the active ingredient and facilitate its administration
“VKC”	vernal keratoconjunctivitis, a chronic, recurrent allergic disease of the eye that typically affects children and young adults. It involves inflammation of the conjunctiva and cornea, and can cause intense itching, photophobia and, in severe cases, corneal damage

FORWARD-LOOKING STATEMENTS

We have included in this document forward-looking statements. Statements that are not historical facts, including statements about our intentions, beliefs, expectations or predictions for the future, are forward-looking statements.

This document contains certain forward-looking statements and information relating to our Company and our subsidiaries that are based on the beliefs of our management as well as assumptions made by and information currently available to our management. When used in this document, the words "aim," "anticipate," "believe," "could," "expect," "going forward," "intend," "may," "ought to," "plan," "project," "seek," "should," "will," "would" and the negative of these words and other similar expressions, as they relate to our Group or our management, are intended to identify forward-looking statements. Such statements reflect the current views of our management with respect to future events, operations, liquidity and capital resources, some of which may not materialize or may change. These statements are subject to certain risks, uncertainties and assumptions, including the other risk factors as described in this document. You are strongly cautioned that reliance on any forward-looking statements involves known and unknown risks and uncertainties. The risks and uncertainties facing our company which could affect the accuracy of forward-looking statements include, but are not limited to, the following:

- the timing of initiation and completion and the progress of our research and development programs and clinical trials;
- the timing and likelihood of regulatory filings and approvals, and pricing of our product candidates;
- the commercialization of our product candidates;
- the market opportunities and competitive landscape of our product candidates;
- estimates of our costs, expenses, future revenues, capital expenditures and our needs for additional financing;
- our ability to attract and retain senior management and key employees;
- our operations and business prospects;
- future developments, trends, conditions and competitive landscape in the industry and markets in which we operate;
- changes to regulatory and operating conditions in the industry and markets in which we operate;
- our strategies, plans, objectives and goals and our ability to successfully implement them;
- our financial condition and operating results and performance;
- industry trends and competition; and
- general political and economic conditions.

Subject to the requirements of applicable laws, rules and regulations, we do not have any and undertake no obligation to update or otherwise revise the forward-looking statements in this document, whether as a result of new information, future events or otherwise. As a result of these and other risks, uncertainties and assumptions, the forward-looking events and circumstances discussed in this document might not occur in the way we expect or at all. Accordingly, you should not place undue reliance on any forward-looking information. All forward-looking statements in this document are qualified by reference to the cautionary statements in this section.

In this document, statements of or references to our intentions or those of our Directors are made as of the date of this document. Any such information may change in light of future developments.

RISK FACTORS

An [REDACTED] in our H Shares involves significant risks. You should carefully consider all of the information in this document, including the risks and uncertainties described below, as well as our financial statements and the related notes, and the “Financial Information” section, before making an [REDACTED] in our H Shares. Particularly, we are a biotech company seeking to list on the Main Board of the Stock Exchange under Chapter 18A of the Listing Rules. The following is a description of what we consider to be our material risks. Any of the following risks could have a material adverse effect on our business, financial condition and results of operations. In any such case, the market price of our H Shares could decline, and you may lose all or part of your [REDACTED] given the nature of biotech industry.

These factors are contingencies that may or may not occur, and we are not in a position to express a view on the likelihood of any such contingency occurring. The information given will not be updated after the date hereof, and is subject to the cautionary statements in “Forward-looking Statements” in this document.

We believe there are certain risks and uncertainties involved in an [REDACTED] in our H Shares, some of which are beyond our control. We have categorized these risks and uncertainties into: (i) risks relating to the development of our product candidates; (ii) risks relating to the manufacturing and commercialization of our product candidates; (iii) risks relating to our financial position and need for additional capital; (iv) risks relating to extensive government regulation; (v) risks relating to our intellectual property rights; (vi) risks relating to our operations; (vii) risks relating to the [REDACTED].

Additional risks and uncertainties that are presently not known to us or that we currently deem immaterial could also harm our business, financial condition and operating results. You should consider our business and prospects in light of the challenges we face, including the ones discussed in this section.

RISKS RELATING TO THE DEVELOPMENT OF OUR PRODUCT CANDIDATES

We depend substantially on the success of our product candidates, all of which are undergoing preclinical or clinical development. If we are unable to successfully complete clinical development of our product candidates, or experience significant delays in doing so, our business prospects will be significantly impacted.

Our business will depend on the successful development of our existing product candidates and new product candidates that we may identify and develop. As of the Latest Practicable Date, we had developed a pipeline of eight product candidates, including two Core Products, namely VVN461(HD) and VVN001, and six other product candidates. Our product candidates will require further preclinical and/or clinical development before they could obtain regulatory approval in China and potentially other jurisdictions. We cannot guarantee you that we can successfully complete the preclinical and clinical development of any of our existing product candidates in a timely manner, or at all.

We are a biotech company focused on ophthalmic therapies. The development for such drugs is a complex and challenging process due to various factors, including but not limited to: (i) complicated mechanisms of ophthalmic diseases, which are multifactorial disorders that may involve genetic and environmental factors and interactions between different ocular tissues, cell types and signaling pathways; (ii) limited understanding of the relevant pathogenesises, such as non-infectious anterior uveitis and dry eye disease, despite significant advances in the research of ophthalmic diseases in recent years; (iii) heterogeneous patient populations with varying symptoms, disease severity and responses to a specific therapy; (iv) complex standards for drug evaluation, which requires the use of multiple endpoints, including functional measures, symptom-based measures, and anatomical or clinical signs; and (v) specific safety and tolerability considerations associated with topical ocular administration, including risks of ocular and systemic adverse events such as ocular surface irritation, intraocular inflammation, infection, elevations in intraocular pressure, allergic reactions and local or systemic toxicities. Therefore, the development of ophthalmic drugs is a complex and challenging process that requires a deep understanding of disease pathogenesis, careful selection of patient populations and rigorous evaluation of drug safety and efficacy.

We have invested a significant portion of our efforts and financial resources in the discovery and development of our product candidates. For the year ended December 31, 2024 and the nine months ended September 30, 2024 and 2025, our research and development expenses amounted to RMB128.3 million, RMB91.2 million and RMB65.2 million,

RISK FACTORS

respectively. We expect to continue to incur substantial expenditures through the projected commercialization of our product candidates. The success of our product candidates in terms of preclinical or clinical development will depend on a number of factors, including:

- successful completion of preclinical studies;
- receipt of regulatory approvals for our clinical trials;
- successful enrollment of patients in, and completion of, clinical trials;
- favorable safety and efficacy data from our clinical trials and other studies;
- our ability to engage qualified CDMOs to ensure supply of our product candidates for clinical use;
- our ability to effectively and simultaneously design, manage and supervise a significant number and range of clinical trials;
- our ability to reach agreements on acceptable terms with prospective CROs and trial sites, the terms of which can be subject to negotiation and may vary among different CROs and trial sites;
- the performance by CROs, or other third parties we may retain to conduct clinical trials, of their duties to us in a manner that complies with our protocols and applicable laws and that protects the integrity of the resulting data;
- our ability to control clinical trial-related costs;
- our ability to obtain sufficient supplies of competitor drugs that may be necessary for use in clinical trials for evaluation of our product candidates;
- obtaining and maintaining patent, trade secret and other intellectual property protection and regulatory exclusivity; and
- ensuring that we do not infringe upon, misappropriate or otherwise violate the patents, trade secrets or other intellectual property rights of third parties, and successfully defending against any claims by third parties against us on these fronts.

If we do not achieve one or more of these factors in a timely manner, or at all, we could experience significant delays in completing or be unable to complete the preclinical or clinical development of our product candidates, resulting in our inability to obtain regulatory approval for our product candidate. As a result, we may fail to generate sufficient revenue or cash flow from product sales to continue our operations, in which event our financial condition, results of operations and business prospects will be materially and adversely affected.

Our product candidates will be subject to intense competition after commercialization and may fail to compete effectively against competitors.

We compete in the ophthalmic drug industry. The global ophthalmic drug market is highly competitive and is characterized by extensive research efforts. In particular, according to Frost & Sullivan, competition within global ophthalmic drug market is expected to continue to intensify in the following years, primarily due to growing efforts among pharmaceutical companies to address the vast underserved medical needs in the field, favorable government policies and expansion of approved ophthalmic drugs and indications. As a result, we will face intense competition with respect to any product candidates that we may seek to develop or commercialize in the future.

Many of our product candidates will face competition from ophthalmic drugs developed by major international and domestic pharmaceutical companies with the same targets as ours. The ability of our product candidates to successfully compete with other drugs of the same targets will depend on various factors, including the timing of regulatory approval, the efficacy and safety profile of our product candidates in comparison to other drugs, convenience of our dosing regimens, pricing and market coverage of our or our commercialization partner's sales and distribution channels. However, we cannot guarantee you that we will be able to successfully compete on all or any of the aforementioned aspects against major pharmaceutical companies that operate on a global or national level, which may have stronger medical and technological capabilities, greater pricing flexibility, better track records, greater brand name recognition or greater financial, marketing and public relations resources than we do.

RISK FACTORS

Furthermore, our product candidates will also face competition from ophthalmic drugs with different mechanisms developed for the same indication. In addition, traditional treatments for dry eye disease also include the short-term use of topical corticosteroid eye drops. We cannot guarantee you that our ophthalmic drugs will successfully replace these traditional therapies for the relevant patient population. Furthermore, other innovative drugs may compete with our drugs and may prove to be more effective or commercialize more quickly.

If any or all of our product candidates fail to compete effectively in one or more of the aforementioned fronts, our competitors may be able to establish a strong market position and render our product candidates non-competitive before we can recover the expenses of developing and commercializing any of our product candidates. Our efforts to compete may compel us to reduce prices for our drug, or take other measures that may adversely affect our profitability. Such inability to compete effectively could erode our profit margins and market share, which may in turn materially and adversely affect our business, financial position, results of operations and growth potential.

Clinical development of our product candidates involves a lengthy and expensive process with uncertain outcomes, and the results of preclinical studies and clinical trials may not be indicative of the final results.

Clinical trials are expensive, difficult to design and implement, and may take years to complete. At the same time, their outcomes are inherently uncertain. Failure can occur at any time during clinical development. Moreover, the results of preclinical studies and early-stage clinical trials may not be indicative of the results of later clinical trials. Product candidates during later stages of clinical trials may fail to show the desired outcomes in safety and efficacy despite having progressed through earlier stages. In some instances, there can be significant variability in the safety and/or efficacy results among different trials of the same product candidates due to numerous factors, including changes in trial procedures, differences in the size and type of the subject pools, such as genetic differences, patient compliance with the dosing regimen and other trial protocol elements, and the rate of dropout among clinical trial participants. We cannot guarantee that our future clinical trial results will be favorable based on the current available preclinical and clinical data.

As a result, we may not be able to control the timing and expenses related to completing our clinical trials or obtaining regulatory approval. Unfavorable clinical trial results may force us to restructure our clinical trials, increase our drug development cost and delay our receipt of regulatory approval for our product candidates. Therefore, it may take us longer to begin commercializing our product candidates and navigate the path to profitability, while other companies who are developing drugs for the same indications may be able to gain a competitive advantage if they commercialize their drugs first, potentially affecting our ability to gain market share and acceptance, which may have a material adverse effect on our business, financial position and our results of operations.

If our product candidates fail to demonstrate safety and efficacy to the satisfaction of regulatory authorities or do not otherwise produce positive results, we may incur additional costs or be subject to unfavorable circumstances during the development and commercialization of our product candidates.

Before obtaining regulatory approval for the commercial sale of our product candidates, we must conduct extensive clinical trials to demonstrate the safety and efficacy of our product candidates for their proposed indications. Results of our clinical trials could reveal limited efficacy or unacceptable severity or prevalence of adverse events. In such an event, our clinical trials could be suspended or terminated and the NMPA may order us to cease further development of, or deny approval of, our product candidates for any or all targeted indications.

Even if we could obtain regulatory approval for our product candidates, in the event that the results of our clinical trials are only modestly positive, or if they raise safety concerns regarding our product candidates, we may still be subject to unfavorable circumstances, including:

- obtain approval for indications that are not as broad as intended;
- be required to market our drugs under more restrictive labels, such as adding additional warnings and cautionary statements;
- be required to suspend the sales and marketing of our drugs if they had been approved and commercialized;

RISK FACTORS

- be subject to additional post-marketing testing requirements;
- be held liable for harm caused to our patients and be subject to litigation and product liability claims; and
- be unable to obtain adequate insurance coverage or reimbursement for our drugs from the government or commercial insurers.

If we experience any of the above undesirable conditions, our business may be materially harmed, and we may not be able to generate sufficient revenues and cash flows to continue our operations and may experience a decline in the market price of our H Shares.

We may encounter difficulties in enrolling participants in our clinical trials, which may delay our clinical development activities or lead to higher development costs for our product candidates.

The timely completion of clinical trials depends on, among others, our ability to enroll a sufficient number of participants who will remain in the clinical trials until their conclusion. We may not be able to initiate or continue clinical trials for our product candidates if we are unable to locate and enroll a sufficient number of eligible participants, or if there are delays in the enrollment of eligible subjects. We may encounter challenges with enrolling participants in our clinical trials for various reasons beyond our control, such as:

- difficulties with recruiting a sufficient number of subjects that possess the traits and characteristics we seek;
- the subjects' perceptions as to the potential advantages and risks of the product candidates being studied in relation to other available drugs or product candidates;
- the resources we have to facilitate timely subject enrollment in our clinical trials;
- the efforts made by trial executing personnel, including our CROs, to screen and recruit eligible subjects; and
- the proximity and availability of clinical trial sites for prospective subjects.

Our clinical trials will likely compete with other clinical trials for product candidates that are in the same therapeutic areas as our product candidates. This competition will reduce the number and types of patients available to us as some patients might choose to enroll in a trial being conducted by one of our competitors instead of ours.

Even if we are able to enroll a sufficient number of patients in our clinical trials, patient enrollment may also be delayed as a result of public events, epidemics or similar incidences which are out of our control. Any delays in patient enrollment may result in increased costs or may affect the timing or outcome of the planned clinical trials, which could prevent timely completion of these trials and adversely affect our ability to advance the development, regulatory approval and commercialization of our product candidates.

We rely on third parties to conduct our preclinical studies and clinical trials. If these third parties do not successfully carry out their contractual duties or meet expected deadlines, we may not be able to obtain regulatory approval for or commercialize our product candidates and our business could be substantially harmed.

We may rely on third-party organizations, such as CROs, hospitals and clinics, to monitor, support and execute preclinical studies and/or clinical trials for our product candidates. We engaged 36 and 36 CROs in the year ended December 31, 2024 and the nine months ended September 30, 2025, respectively. We have limited control over the operations of such third parties, and may have less control over the timing, quality and cost of the relevant preclinical and clinical studies than if we conducted these studies by ourselves. Nevertheless, we are responsible for ensuring that each of our studies is conducted in accordance with the applicable protocol, legal and regulatory requirements and scientific standards, and our reliance on the CROs does not relieve us of our regulatory responsibilities.

RISK FACTORS

Our CROs are not our employees and, except for remedies available to us under our agreements with such CROs, we cannot control whether or not they devote sufficient time and resources to our ongoing clinical and preclinical programs. Our clinical trials may be extended, delayed or terminated and we may not be able to obtain regulatory approval for or successfully commercialize our product candidates if (i) CROs do not successfully carry out their contractual duties or obligations or meet expected deadlines; (ii) we need to replace CROs; or (iii) the quality or accuracy of the clinical data that CROs or our clinical investigators obtain is compromised due to failure to adhere to our clinical protocols and regulatory requirements. For example, the third parties on which we rely to execute our preclinical studies are required to conduct such studies in accordance with the good laboratory practice (GLP) and the Regulations for the Administration of Affairs Concerning Experimental Animals (《實驗動物管理條例》). We, our CROs and our clinical investigators are also required to comply with the Good Clinical Practice for Drug Trials (“GCP”) (《藥物臨床試驗質量管理規範》), which are regulations and guidelines enforced by the NMPA and other relevant authorities, during the clinical development of our product candidates. Our pivotal clinical trials must be conducted with products produced in accordance with the current good manufacturing practices (cGMP) standards. If any of our CROs or clinical investigators fail to comply with these regulations, the clinical data generated in our clinical trials may be deemed unreliable and the NMPA or other regulatory authorities may require us to perform additional or repeat clinical trials before approving our marketing applications, which would delay the regulatory approval process.

Furthermore, if any of our relationships with our third-party CROs is terminated, we may not be able to enter into arrangements with alternative CROs in a timely manner or on commercially reasonable terms, if at all, and we may not be able to meet our desired clinical development timelines. Even if we could successfully replace the original CROs in a timely manner, it is possible that the type and quality of services the new CROs provide do not conform to our original standards. Replacing or engaging new CROs could be time-consuming and expensive and may divert management’s time and focus. To the extent that we are unable to identify, retain and successfully manage the performance of third-party service providers in the future, our business may be adversely affected. Though we carefully manage our relationships with our CROs, there can be no assurance that we will not encounter any challenges or delays in the future or that these delays or challenges will not have a material adverse impact on our business, financial condition and prospects.

The data we gather in our research and development may be affected by factors unrelated to our product candidates or out of our control, which could adversely affect the reliability of our clinical results or analyses.

We collect, aggregate, process and analyze data when we identify a promising product candidate and while conducting preclinical studies and clinical trials. During the process, the overall quality of data collected or accessed may be affected by many factors that are unrelated to the tested product candidates and out of our control. For example, we cannot assure the trial subjects’ full compliance with the trial protocols. Additionally, we cannot guarantee that all of our employees or staff of our CROs would strictly comply with the GCP standards or other related guidelines and regulations when collecting or accessing preclinical and/or clinical data. We may not be able to discover every data issue and error when monitoring and auditing our data.

Such factors may negatively affect the reliability of our trial results and analyses and the NMPA or other regulatory authorities may require us to perform additional or repeat clinical trials before approving our marketing applications. Major issues in data integrity could also subject us to questions or claims from the NMPA or other relevant authorities, and may expose us to liability relating to our storage, handling, submission, delivery or display of clinical data. Although we maintain insurance coverage for clinical trials, this coverage may prove to be inadequate or could cease to be available to us on acceptable terms, if at all. Even unsuccessful claims could result in substantial costs and diversion of management time, attention and resources. A claim brought against us that is uninsured or under-insured could harm our business, financial condition and results of operations. Any such claims or proceedings brought against us may negatively impact our business, prospects and reputation.

RISK FACTORS

We may not be able to discover or develop suitable novel product candidates.

We plan to continue building our pipeline through our internal discovery and development platforms by identifying new therapeutic targets and product candidates and pursuing the development of our product candidates for additional indications. During the process, we may require additional technical, financial or other resources to enhance our existing research and development capabilities.

The successful discovery of new therapeutic targets or product candidates depend, to a large extent, on factors out of our control, such as the emergence of new scientific methodologies in the medical industry, initial safety and efficacy results of potential candidates and the availability of technical, financial or other resources to support our discovery effort. We cannot assure you that we will ever be able to identify additional therapeutic opportunities for our product candidates or develop suitable potential product candidates through internal research programs, any of which could materially and adversely affect our future growth and prospects. Even if we do identify initially promising product candidates, there is no guarantee that we will obtain favorable results in later clinical development of such candidates. Failure to successfully identify or develop novel and suitable product candidates may materially and adversely affect our ability to expand our pipeline and grow our business.

We may not be successful in adapting to new technologies and methodologies.

Our continued competitiveness depends on our ability to adapt to evolving technological developments and methodologies in the biotech and pharmaceutical industry. However, adapting to the latest technological developments and methodologies may require us to invest significant resources to enhance our own research and development, testing and manufacturing capabilities. There is no assurance that we will be able to secure such resources, or that we will succeed in making the necessary improvements. We also cannot guarantee that we will be successful in our attempts to adapt our product candidates to emerging technologies and methodologies in a way that will gain market acceptance. Should we fail to respond in a timely or effective manner, we may be unable to improve and maintain our competitive position and materially and adversely affect our business and prospects.

RISKS RELATING TO THE MANUFACTURING AND COMMERCIALIZATION OF OUR PRODUCT CANDIDATES

We have no track record in commercializing our product candidates. Our commercialization plan may not materialize as we expected.

We do not have any track record of successfully launching and commercializing drugs. We intend to seek opportunities of strategic cooperation with multinational pharmaceutical companies that have established commercial capabilities in ophthalmology to benefit from their existing ophthalmology salesforces. However, there is no assurance that we will be able to establish or maintain such collaborative arrangements or, even if we are able to do so, that such arrangements will facilitate the commercialization of our drugs as expected. Once we enter into such collaboration agreements, the sales and marketing of our drugs will depend, to varying degrees, on the efforts of our partners, over whom we have limited influence or control and our revenue from product sales may be lower than if we had commercialized our product candidates ourselves. Collaborations involving our product candidates are subject to various risks.

We also intend to build an in-house commercialization team to concentrate on the penetration of influential Grade IIIA hospitals, focusing on key ophthalmology centers and opinion leaders. However, establishing an in-house commercialization team requires significant expenditure, management resources and time. We would potentially have to compete with other drug companies to recruit, hire, train and retain marketing and sales personnel. Additionally, we cannot guarantee that we will succeed in establishing sufficient sales coverage and penetration to hospitals, pharmacies and other medical institutions across China, which could adversely affect the commercial opportunities of our product candidates.

RISK FACTORS

Our product candidates may fail to achieve market acceptance and commercial success.

Even if we receive the requisite regulatory approvals for our product candidates, there is no guarantee that our product candidates will gain sufficient market acceptance across the medical community and among patients. The degree of market acceptance of our product candidates will depend on, among other things, the following factors:

- the clinical indications for which our drugs are approved and patient demand for the drugs that treat those clinical indications;
- the potential and perceived advantages of our drugs over alternative treatments, including as to cost, effectiveness, safety and convenience;
- the time required to manufacture and launch our drugs, and to make them publicly available;
- the availability of adequate insurance coverage and reimbursement by the government and emerging commercial insurers;
- the willingness and ability of patients to pay out of pocket without the above-mentioned insurance coverage and reimbursement;
- reliance on and preference for current therapies by physicians, healthcare providers and clinics and patients;
- drugs commercialized by our competitors, particularly if they are launched before, at or around the same time as our own drugs;
- the prevalence and severity of any side effects;
- labeling requirements imposed by the NMPA or other relevant authorities, particularly in relation to warnings as to health and safety risks or limitations on effectiveness;
- the effectiveness of our and our commercialization partner's sales and marketing efforts;
- adverse publicity about our drugs or favorable publicity about competitive products; and
- potential product liability claims.

Additionally, innovative ophthalmic therapies are relatively limited, and extensive market education will be needed for the marketing of our future approved drugs. We cannot assure you that such education efforts will generate sufficient acceptance for our product candidates among patients with ophthalmic diseases. Even if our drugs achieve market acceptance, we may not be able to maintain such market acceptance if new drugs or treatments that are more favorably received or cost effective than ours are introduced. Failure to achieve or maintain market acceptance of our drugs could adversely affect our business, prospects and results of operations.

We may explore opportunities to commercialize our drugs globally, which may expose us to risks associated with conducting business in international markets.

We aim to become a prominent global player in ophthalmology and are therefore actively advancing the international development of our Core Products. Alongside our independent efforts to develop VVN461(HD) in both China and the United States, we are pursuing a coordinated collaboration approach to establish our presence in international markets. Should we succeed in doing so, our business is subject to risks associated with doing business globally, including (i) changes in a country or region's political and cultural climate or general economic conditions, (ii) unexpected changes in or high costs associated with complying with laws and regulatory requirements, (iii) difficulties with enforcing contractual provisions in unfamiliar jurisdictions, (iv) potential disputes with foreign partners that may be protracted or more difficult to resolve due to distance and time differences, (v) exposure to litigation or third-party product liability claims outside of China, (vi) concerns voiced by local governments and regulators on arrangements pertaining to our research and clinical trial sites or acceptability of clinical trial results across different jurisdictions, (vii) inadequate intellectual property

RISK FACTORS

protection in other countries, (viii) the possibility of economic sanctions, trade restrictions, discrimination, protectionism or unfavorable policies against foreign drug companies, including those from China, (ix) the effects of applicable local tax regimes, royalties and other payment obligations owed to local governments, and (x) fluctuations in local currency exchange rates. Any of such occurrences could negatively affect our expansion plan.

Failure to maintain effective quality control over our drugs may harm our reputation or expose us to product liability claims.

The effectiveness of our quality control procedures depends on various factors, such as the qualification and experience of our quality control staff and our ability to ensure that the relevant personnel adhere to our quality control procedures. However, we cannot assure you that our internal policies and procedures will be effective in consistently preventing and resolving deviations from our quality standards. Any significant failure of our quality control procedures could render our drugs unsuitable for use, adversely affect our ability to comply with applicable requirements, harm our market reputation and relationship with business partners. Any such events may have a material adverse effect on our business, financial condition and results of operations.

In addition, the reliability of our CDMOs may affect the quality control over our drugs. Drug manufacturers are required to comply with rules promulgated by the NMPA to ensure that quality control and manufacturing procedures conform to cGMP regulations. In addition, for any products that we seek to commercialize in the United States, we will be required to comply with the requirements of the FDA, including cGMP regulations. We will be subject to review and inspections by the FDA to assess our compliance and our adherence to commitments made in any NDAs, as well as in our responses to FDA queries and observations. We expect to expend considerable time and resources to meet, or monitor our CDMOs to meet, various regulatory compliance obligations in relation to manufacturing, production and quality control.

Guidelines, recommendations and studies published by various organizations may disfavor our product candidates.

Government agencies, professional societies, practice management groups, private health and science foundations and organizations focused on various diseases may publish guidelines, recommendations or studies that affect demand for our products candidates. Any such guidelines, recommendations or studies that reflect negatively on our product candidates, either directly or relative to drugs offered by our competitors, could diminish demand for our product candidates and adversely impact our future sales revenues. Furthermore, the sales of our future approved drugs depend in part on our ability to educate patients and members of the medical community (including healthcare providers) about our drugs and product candidates. Our ability to convey our messages effectively may be negatively impacted by the publication of guidelines, recommendations or studies on our product candidates.

Scarcity of available raw materials or increases in our raw material costs may negatively impact our business, financial condition and results of operations.

We procure raw materials according to our drug development plans. For certain raw materials with limited number of suppliers, should our suppliers temporarily suspend production, raise or be forced to raise their prices, or fail to supply such raw materials to us for other reasons such as logistical issues, we cannot guarantee that we will be able to find alternative suppliers who can provide the required raw materials and product components on reasonable terms, at sufficient amounts or in accordance with our desired quality standards in a timely manner, or at all.

Furthermore, we expect that our need for stable supply of raw materials will grow as we continue to expand our business and begin manufacturing drugs for commercial sale after we obtain regulatory approval. As more product candidates progress into advanced stages of clinical trials, we will also require larger amounts of comparison drugs. Any significant delay in obtaining such raw materials or comparison drugs in the quantity and quality required may delay our preclinical studies and clinical trials, the regulatory approval for our product candidates or the manufacturing of our future approved drugs.

Raw materials used in our manufacturing may be subject to price volatility caused by external conditions, such as fluctuations in transportation costs, changes in government policies and natural disasters. As a result, our raw materials costs may also fluctuate from time to time or increase substantially going forward, which could adversely affect our profitability.

RISK FACTORS

The search for replacement for our suppliers or raw materials may result in reduction in production volume and delay in our manufacturing, sales and marketing or other business operations, and may divert management attention and financial resources so as to materially and adversely affect our business, financial condition, results of operations and prospects.

There may be fewer market opportunities for our product candidates than we originally anticipated, and our product candidates may be ultimately unprofitable even if commercialized.

We estimate the extent of market opportunities for our product candidates by analyzing information from various third-party sources, such as scientific literature and industry reports. We also use such estimates to make decisions regarding our drug development strategies, including whether or not to prioritize the development of a particular product candidate. However, these estimates may be based on imprecise or inaccurate data, leading us to over- or under-estimate market opportunities for certain drugs, which will affect our resource allocation decisions.

The market opportunities available will depend on, among others, the degree of acceptance for our drugs by the medical community, patient access, drug pricing and availability of government or commercial insurance and reimbursement. From time to time, we may discover that demand for our drugs is lower than anticipated due to the smaller-than-expected target patient population, availability of other more effective or accessible therapies and difficulty in identifying or approaching new patients. Such unfavorable developments may materially and adversely affect our prospects, business and results of operations.

Medical insurance coverage and reimbursement may be limited or unavailable in certain market segments for our drugs, which may adversely affect their sales prospects. Successful sales of our future approved drugs partly depend on the availability of adequate insurance coverage and reimbursement from the government and commercial insurers, as patients often rely on such reimbursement for all or part of the costs associated with their medical treatment. Government authorities and commercial medical insurance providers will decide on the coverage of drugs and the amount of reimbursement, based on their consideration of factors such as:

- whether the drug and/or treatment is safe, effective and medically necessary;
- whether the drug and/or treatment is appropriate for specific diseases and/or patients;
- whether the drug and/or treatment is considered experimental or investigational; and
- whether the drug and/or treatment is cost-effective given their budgets or profit margins.

We cannot guarantee that reimbursement will be available for our future approved drugs and, if available, the level of reimbursement. In China, the amounts reimbursable to program participants for their drug purchases depend on the inclusion of the drugs in the NRDL or other government-sponsored medical insurance programs, as well as the tiers under which the drugs are classified in such programs. The Ministry of Human Resources and Social Security of the PRC, the National Healthcare Security Administration, together with provincial or local human resources and social security authorities and other regulatory authorities, regularly review the inclusion of or removal of drugs from the NRDL, or Provincial Reimbursement Drug List of China (“PRDL”), as well as the tier under which a drug will be classified. Even though the number of innovative drugs included in the NRDL or the PRDL is expected to increase in the future, there can be no assurance that any of our future approved drugs will be included in the NRDL, the PRDL or other government-sponsored medical insurance programs.

We are subject to risks associated with international trade policies, geopolitics and trade protection measures and our business, financial condition and results of operations could be adversely affected.

Changes in the political relationship between China and other nations may adversely affect various aspects of our business operation. For example, there has been substantial fluctuation in the level and scope of tariffs and other trade restrictions imposed by the U.S. and China over the past period. Looking ahead, there remains significant uncertainty on how the

RISK FACTORS

relevant tariffs or other trade restrictions measures may evolve. Any escalation in political tensions, as well as increases in tariffs or changes to trade policies between the U.S. and China, may have a significant impact on our business.

Although we have not started commercialization of product candidates, any unfavorable government policies on international trade, such as capital controls or tariffs, may affect the import or export of raw materials and directly disrupt our drug development and the manufacture of our product candidates. Such unfavorable policies may also negatively impact the hiring of scientists and other R&D personnel, the demand for our drug products or the competitive position of our drug products, or prevent us from selling our drug products in the United States or other countries in the future. If any new tariffs, policies, legislation and/or regulations are implemented, or if existing trade agreements are renegotiated or, in particular, if the United States government takes retaliatory trade actions due to recent United States-China trade tensions, such changes could have a material and adverse effect on our business, financial condition, results of operations and prospects.

RISKS RELATING TO OUR FINANCIAL POSITION AND NEED FOR ADDITIONAL CAPITAL

We may need to obtain substantial additional financing to fund our operations and may be forced to accept unfavorable terms or limitations on our operation during the process. If financing is not available on terms acceptable to us, or at all, we may be unable to complete the development and commercialization of our product candidates.

We need to make substantial investments to complete preclinical and clinical development, obtain regulatory approvals, manufacture sufficient quantities of product candidates for clinical and future commercial use and coordinate marketing activities in relation to our product candidates as a condition to generating revenue. We also envisage significant funds to be expended on our post-approval commitments such as monitoring the efficacy and safety of our drugs on the market, if and when they are approved and commercialized. In doing so, we must expend substantial financial resources to fund our continuing and future operations.

During the Track Record Period, we funded our operations primarily through equity financing and bank borrowings. We may continue to rely on such methods, as well as debt financing, collaboration and licensing arrangements or other sources to raise additional capital. If we resort to other financing activities, we will incur financing costs and we cannot guarantee you that the financing may be available when we need them, on terms that are favorable to us, or at all. In the event we enter into collaborations or licensing arrangements in order to raise capital, we may be required to accept unfavorable terms, including relinquishing or licensing to a third party on unfavorable terms our rights to technologies or product candidates that we otherwise would seek to develop or commercialize ourselves or potentially reserve for future potential arrangements when we might be able to achieve more favorable terms.

Furthermore, our ability to raise funds will also depend on financial, economic and market conditions and other factors, many of which are beyond our control. If adequate funding is not available to us on a timely manner, we may have to delay, limit, reduce or terminate preclinical studies, clinical trials or other research and development activities or the manufacturing and commercialization for one or more of our product candidates, which in turn will adversely affect our business prospects.

We incurred net losses historically and may continue to experience net losses in the foreseeable future.

We have incurred, and may continue to incur, significant research and development expenses, selling expenses, administrative expenses and other expenses related to our ongoing operations. For the year ended December 31, 2024 and the nine months ended September 30, 2024 and 2025, we had net loss of RMB201.5 million, RMB148.3 million and RMB131.5 million, respectively. Our ability to generate revenue will depend primarily on our ability to commercialize our product candidates, as well as the overall development of the industry we operate in, which is subject to significant uncertainty. We expect to continue to incur significant expenses and losses for the foreseeable future. We anticipate that our expenses will increase significantly as we proceed to commercialization. The amount of our future net losses will depend, in part, on our future expenses resulted from costs and expenses incurred by our research and development and in relation to our operations and our ability to generate revenues.

RISK FACTORS

Even if we achieve profitability in the future, we may not be able to sustain profitability in subsequent periods thereafter. Our prior losses and expected future losses have had, and will continue to have, an adverse effect on business, financial position and results of operations.

We had net liabilities and recorded net operating cash outflows historically which may continue in the foreseeable future and expose us to liquidity risk.

We recorded net liabilities throughout the Track Record Period. As of December 31, 2024 and September 30, 2025, we had net liabilities of RMB531.4 million and RMB663.0 million, respectively. We were in such positions primarily as we recorded redemption liabilities on owners’ capital in relation to our Pre-[REDACTED] Investments. A net liabilities position can expose us to the risk of shortfalls in liquidity, in which case our ability to raise funds or obtain bank loans will be materially and adversely affected. Also, we recorded net cash outflow from operating activities of RMB121.0 million, RMB103.9 million and RMB65.7 million for the year ended December 31, 2024 and the nine months ended September 30, 2024 and 2025, respectively. See “Financial Information—Liquidity and Capital Resources—Cash Flows.” Negative operating cash flow may require us to obtain additional financing to meet our financing needs and obligations and support our expansion plans. In the event that we are unable to generate sufficient cash flow from our operations or otherwise obtain sufficient external funds to finance our business, our liquidity and financial condition may be materially and adversely affected and we may not be able to expand our business as expected. We cannot assure you that we will have sufficient cash from other sources to fund our operations. If we resort to other financing activities, we will incur additional financing costs, and we cannot guarantee that we will be able to obtain the financing on terms acceptable to us, or at all. As a result, our business, financial condition and results of operations may be materially and adversely affected. We cannot guarantee that prospective business activities of our Group and/or other matters beyond our control, such as market competition, will not adversely affect our operating cash flow and lead to net operating cash outflows in the future. If we encounter long-term and continuous net operating cash outflow in the future, we may not have sufficient working capital to cover our operating costs, and our business, financial position and results of operations may be materially and adversely affected.

The discontinuation of any government grants or preferential tax treatment currently available to us may adversely affect our business, financial condition and results of operations.

We benefited from government grants and preferential tax treatment during the Track Record Period. We recorded government grants of RMB5.7 million, RMB0.6 million and RMB2.7 million for the year ended December 31, 2024 and the nine months ended September 30, 2024 and 2025, respectively. Such government grants primarily included subsidies received from local government authorities to compensate for expenditure arising from our research and clinical trial activities. In addition, according to applicable PRC laws and regulations, our PRC subsidiary whose annual taxable income is less than RMB1.0 million is eligible for substantial tax benefits.

We cannot assure you that we will continue to receive government grants or preferential tax treatment at the existing levels, or at all. The relevant authorities may issue administrative decisions or modify government policies that reduce the amount of government grants and preferential tax treatment that has been available to us, or end our eligibility to receive such financial subsidies. The discontinuation of government grants or preferential tax treatment currently available to us may adversely affect our results of operations and prospects. Further, prospective investors should note that should there be any changes in the amounts of our government grants and preferential tax treatment in a given year, our financial performance for that period may not be directly comparable to our historical financial results.

We have incurred and may continue to incur share-based payments. The issuance of share-based payment awards may cause dilution to our existing Shareholders and may affect the market price of our H Shares.

Historically, we have granted shares to our employees. For the year ended December 31, 2024 and the nine months ended September 30, 2024 and 2025, we recognized share-based payment expenses of RMB8.9 million, RMB6.8 million and RMB2.3 million, respectively. In the future, we may issue options and shares to our Directors, senior management and/or key employees to incentivize their performance and align their interests with ours. As a result, we may incur equity-settled share-based payments, which could have a material adverse effect on

RISK FACTORS

our profitability. Furthermore, the grant of equity-accounted share-based payments may continue to result in an immediate and potentially substantial dilution to our existing Shareholders and could result in a decline in the value of our H Shares.

We have a limited operating history, which may make it difficult to evaluate our current business and predict our future performance.

We have a relatively short operating history. Our operations to date have focused on raising capital, establishing our drug portfolio and conducting clinical trials of our product candidates. Most of our product candidates were still at various stages of development and we had not commercialized any of our product candidates as of the Latest Practicable Date. Our limited operating history, particularly in the rapidly evolving pharmaceutical industry, may make it difficult to evaluate our current business and reliably predict our future performance. Our future financial performance will depend, in part, on our ability to effectively manage any future growth. We might not be able to effectively manage our operations, which may result in weaknesses in our infrastructure, operational inefficiencies, loss of employees and reduced productivity among remaining employees. We may encounter unforeseen expenses, difficulties, complications, delays and other known and unknown factors. If we do not address these risks and difficulties successfully, our business will suffer. These risks may cause potential investors to lose substantially all of their investment in us.

RISKS RELATING TO EXTENSIVE GOVERNMENT REGULATION

The drug industry is highly regulated and such regulations are subject to change, which may adversely affect multiple aspects of our operation.

We conduct our research, development and commercialization activities in China, which regulate such activities in great depth and detail. Biotech companies in China are subject to comprehensive government regulation and supervision encompassing the approval, registration, manufacturing, packaging, licensing and marketing of new drugs. The process of obtaining regulatory approvals and compliance with appropriate laws and regulations require substantial time and financial resources. Failure to comply with the applicable requirements at any time during the product development, approval, manufacturing, sales and marketing or post-approval approval process, may subject an applicant to administrative or judicial sanctions. These sanctions could include a regulator's refusal to approve pending applications, withdrawal of an approval, license revocation, a clinical hold, voluntary or mandatory product recalls, product seizures, total or partial suspension of production or distribution, injunctions, fines, refusals of government contracts, restitution, disgorgement or civil or criminal penalties. The failure to comply with these regulations could have a material adverse effect on our business, financial condition and prospects.

In recent years, the regulatory framework in China regarding the drug industry has undergone periodic changes, and we expect that it will continue to evolve. Any such changes may increase compliance costs related to our business, cause delays in or prevent the successful development or commercialization of our product candidates and reduce the current benefits we believe are available to us from developing drugs in China. PRC governmental authorities have become increasingly vigilant in enforcing laws in the pharmaceutical industry and any failure by us or our third-party contractors to maintain compliance with applicable laws and regulations may materially and adversely affect our business activities.

The process of obtaining regulatory approval for our product candidates is lengthy, expensive and inherently uncertain.

The process required to obtain approval from the NMPA or other relevant authorities is a lengthy, expensive and uncertain process, and approval is never guaranteed. When we submit a registration application to the regulatory authorities, the regulatory authorities will decide whether to accept or reject the registration application. We cannot be certain that all of our submissions will be accepted for filing and review by the regulatory authorities. In addition, the time required to obtain approval from the regulatory authorities is unpredictable and could take years following the commencement of preclinical studies and clinical trials. Results of such applications depend upon numerous factors and are subject to substantial discretion of the regulatory authorities. As of the Latest Practicable Date, we had not received marketing approval for any of our product candidates, and it is possible that none of our product candidates or any product candidates we may discover and seek to develop in the future will ever obtain such approval.

RISK FACTORS

Our product candidates could fail to obtain regulatory approval for many reasons, including uncertainties associated with, or as a result of, our clinical trials results and procedures. However, even if we successfully complete all preclinical studies and clinical trials for our product candidates in compliance with the current regulations of the NMPA or other relevant authorities, we may still face risks of failure to obtain regulatory approval due to factors beyond our control, such as changes in approval policies or regulations that render our preclinical and clinical data insufficient or require us to amend our clinical trial protocols, regulatory requests for additional analysis, or questions regarding interpretations of data and results and the emergence of new information regarding our product candidates or other drugs. Any of these occurrences may materially and adversely affect our approval and commercialization timeline and therefore harm our business, financial condition and prospects significantly.

Even after obtaining regulatory approval for marketing, our product candidates will continue to remain subject to ongoing or additional regulatory requirements and review, which may result in significant additional expenses, or penalties if we fail to comply with such requirements.

Once approved, our drugs may be subject to ongoing or additional regulatory requirements related to manufacturing, labeling, packaging, storing, advertising, promoting, sampling, record-keeping, post-marketing clinical trials and submission of information related to safety, efficacy and other post-marketing clinical data.

Furthermore, the regulatory approvals we may obtain for our product candidates may be subject to conditions that affect the commercial potential of our drugs, or require that we conduct costly post-marketing clinical trials or other measures to monitor their safety and efficacy. The NMPA may also require us to follow a risk evaluation and mitigation program. Such conditions and requirements may lead to substantial increase in our compliance costs and any failure to comply with such conditions and requirements may cause the regulatory authorities to impose sanctions or penalties that could adversely affect our business operations.

We may be subject to applicable anti-kickback, false claims, physician payment transparency, fraud and abuse or similar healthcare laws and regulations in China, which could, in the event of noncompliance, expose us to sanctions, penalties, contractual damages, reputational harm and diminished profits and future earnings.

If we begin commercializing our drugs in China, our operations would be subject to various anti-kickback, false claims, medical staff payment transparency, fraud and abuse laws or similar healthcare laws and regulations in China, including, without limitation, the PRC Anti-Unfair Competition Law (《中華人民共和國反不正當競爭法》), the PRC Drug Administration Law (《中華人民共和國藥品管理法》) and the PRC Criminal Law (《中華人民共和國刑法》). These laws and regulations may impact, among other things, our proposed sales and marketing programs. Violations of fraud and abuse laws may be punishable by criminal and/or civil sanctions, including penalties, fines and/or exclusion or suspension from governmental healthcare programs and debarment from contracting with the PRC government.

Although we have put in place policies and procedures that ensure that we and our employees comply with fraud and abuse and other healthcare laws and regulations, we cannot guarantee that our employees, as well as third parties that we collaborate with such as CROs, hospitals, physicians and other medical professionals will fully comply with such laws and regulations at all times. In the event that our employees or other third party collaborators do not adhere to fraud and abuse and other healthcare laws and regulations, we may be subject to investigations, civil, criminal and administrative penalties and contractual damages that generate negative publicity and substantially harm our reputation, business and prospects.

Our failure to maintain or renew licenses, permits and certificates required for our business may materially and adversely affect our business, financial condition and results of operations.

Pursuant to relevant laws and regulations, we are required to obtain and maintain various licenses, permits and certificates from relevant authorities to operate our business. Some of these licenses, permits and certificates are subject to periodic renewal and/or reassessment by the relevant authorities, and the standards of such renewal and/or reassessment may change from time to time. Any failure to obtain or renew any licenses, permits and certificates necessary for our operations may result in enforcement actions thereunder, including orders

RISK FACTORS

issued by the relevant regulatory authorities suspending our operations, and corrective measures requiring capital expenditure or remedial actions, which in the future could materially and adversely affect our business, financial condition and results of operations.

Furthermore, if the interpretation or implementation of existing laws and regulations changes, or new laws or regulations come into effect, requiring us to obtain any additional licenses, permits and certificates that were previously not required to operate our existing businesses, we cannot assure you that we will successfully obtain such licenses, permits and certificates. Our failure to obtain the additional licenses, permits and certificates may restrict the conduct of our business, decrease our revenues and/or increase our costs, which could materially reduce our profitability and prospects.

RISKS RELATING TO OUR INTELLECTUAL PROPERTY RIGHTS

If we are unable to obtain and maintain patent protection for our product candidates, third parties could develop and commercialize products and technologies similar or identical to ours and compete directly against us, and the commercial prospects of our product candidates would be materially and adversely affected.

We view the proprietary protection of our drugs as integral to our entire operation. Throughout the Track Record Period, we sought to protect the product candidates and technologies that we consider commercially important by filing patent applications in China, the United States and other countries, relying on trade secrets or regulatory protection or employing a combination of these methods. Any failure by us to obtain or maintain patent protection with respect to our product candidates and technologies could materially adversely affect our business, financial condition, results of operations and prospects.

The patent application and prosecution processes are expensive, time-consuming and complex, and we may not be able to file, prosecute, maintain, enforce or license all necessary or desirable patents and patent applications at a reasonable cost or in a timely manner in all desirable territories. For example, in China, the China National Intellectual Property Administration (CNIPA) may require us to amend our patent applications after substantive examinations, including reducing the patentable coverage, and if we fail to respond within a specified period, our applications will be deemed to be withdrawn. As a result, we may not be able to prevent competitors from developing and commercializing competitive drugs in all such fields and territories. Furthermore, the patent positions of biotech and pharmaceutical companies are generally highly uncertain, involve complex legal and factual questions, and have been the subject of much litigation in recent years. As a result, the issuance, scope, validity, enforceability and commercial value of our patent rights are uncertain.

Patents may be invalidated and patent applications may not be granted for a number of reasons, including known or unknown prior art, deficiencies in the patent application or the lack of novelty of the underlying invention or technology. For example, in making any patent application, there is no guarantee that we will have been the first to develop our product candidates or other proprietary technologies through independent means. In such cases, it is possible that our patent applications will be rejected. It is also possible that we will fail to identify patentable aspects of our research and development output in time to obtain patent protection. Although we enter into non-disclosure and confidentiality agreements with parties who have access to confidential or patentable aspects of our research and development output, such as our employees, corporate collaborators, outside scientific collaborators, consultants, advisers and other third parties, any of these parties may breach such agreements and disclose such output before a patent application is filed, thereby jeopardizing our ability to obtain patent protection.

In addition, while we typically require our employees who may be involved in the development of intellectual property to execute agreements assigning such intellectual property to us, we may be unsuccessful in executing such an agreement with each party who in fact develops intellectual property that we regard as our own. Furthermore, the assignment of intellectual property rights may not be self-executing, or the assignment agreements may be breached, each of which may result in claims by or against us related to the ownership of such intellectual property.

RISK FACTORS

Furthermore, China and the U.S. have adopted the "first-to-file" system under which whoever first files a patent application will be awarded the patent if all other patentability requirements are met and no objection are raised by other parties. Under the first-to-file system, if third parties file first, they may be granted a patent relating to a technology which we invented. In addition, under the PRC patent law, any organization or individual that applies for a patent in a foreign country for an invention or utility model accomplished in China is required to report to the CNIPA for confidential examination. Otherwise, if an application is later filed in China, the patent right will not be granted.

The scope of patent protection is uncertain and our current or any future patents may be challenged and invalidated even after issuance, which would materially and adversely affect our ability to successfully commercialize any product candidates.

The scope of patent protection in various jurisdictions is uncertain. Changes in patent laws or their interpretation in China or other jurisdictions may increase the uncertainties and costs surrounding the prosecution of our patents, diminish our ability to protect our innovations, affect the value of our intellectual property, jeopardize ongoing patent applications and/or narrow the scope of our patent rights. We cannot predict whether the patent applications we are currently pursuing, and may pursue going forward, will be granted, or, if granted, whether they could continue to provide sufficient protection from competitors.

The coverage claimed in a patent application can be significantly reduced before the patent is issued, and its scope can be reinterpreted after issuance. Even if patent applications we currently own or may own in the future are granted as patents, they may not be issued in a form that will provide us with any meaningful protection, prevent competitors or other third parties from competing with us, or otherwise provide us with any competitive advantage. Any patents that we hold may be challenged, narrowed, circumvented or invalidated by third parties.

The issuance of a patent is not conclusive as to its inventorship, scope, validity or enforceability, and our patent rights may be challenged in the courts or patent offices in China, the U.S. and other countries. An adverse determination from such challenges could reduce the scope of, or invalidate, our patent rights, allow third parties to commercialize our technology or product candidates and compete directly with us without payment to us, or result in our inability to manufacture or commercialize product candidates without infringing, misappropriating or otherwise violating third-party patent rights. Such challenges also may result in substantial costs and require significant time from our scientists and management, even if the eventual outcome is favorable to us.

Furthermore, there is no guarantee that we will be granted patent extensions. Pursuant to the Patent Law of the PRC, the term for invention patents relating to new drugs may be extended for no more than five years, and the total as-extended term may not exceed 14 years. Similarly in the United States, we may apply for a patent term extension of up to five years as compensation for the patent term lost during clinical trials and the FDA regulatory review process under the Drug Price Competition and Patent Term Restoration Act of 1984. The exact duration of the extension depends on the time we spend in clinical studies, as well as getting an NDA approval from the FDA. However, a patent term extension cannot extend the remaining term of a patent beyond a total of 14 years from the date of approval, only one patent may be extended, and only those claims covering the approved drug, a method for use, or a method for manufacturing may be extended. Following the expiration of our patents, it is possible that our competitors may develop and market generic version of such drugs, thereby materially and adversely affecting our ability to compete.

Our drugs may become subject to intellectual property infringement or misappropriation claims or other legal challenges and such litigation could be costly and time-consuming and could prevent or delay us from developing or commercializing our product candidates.

Our commercial prospect depends partly upon our ability to develop, manufacture, market and sell our product candidates without infringing, misappropriating or otherwise violating the intellectual property rights of others. Many drug companies maintain worldwide patent portfolios. Their patents may cover various aspects of a single drug, including but not limited to composition, administration method, cell line constructions, vectors, growth media, manufacturing processes and purification measures. Such patents may be valid globally, including in jurisdictions where we intend to commercialize our drugs. As the drug industry

RISK FACTORS

continues to expand and more patents are applied for and granted, we are subject to higher risks of unknowingly violating the patents of third parties. Furthermore, our competitors may also obtain patents that restrict or preclude our ability to lawfully manufacture and market our drugs.

We cannot guarantee that our product candidates or any uses of our product candidates do not and will not in the future infringe upon third-party patents or other intellectual property rights. It is also possible that we failed to identify, or may in the future fail to identify, relevant patents or patent applications held by third parties that cover our product candidates. Additionally, pending patent applications which have been published can, subject to certain limitations, be later amended in a manner that could cover our product candidates or their use.

Third parties may allege that we are infringing upon their patent rights or that we have misappropriated their trade secrets, or that we are otherwise violating their intellectual property rights, whether with respect to the manner in which we have conducted our research, use or manufacture of the drugs we have developed or are developing. Such third parties might resort to litigation against us. Any patent or trademark infringement, trade secret misappropriation or other intellectual property claims or legal proceedings brought against us could result in substantial costs and divert capital resources and management attention. In the event that we are unsuccessful in defending such claims or legal proceedings, we may be compelled to accept one or more of the following solutions:

- pay substantial damages, court costs and attorneys' fees;
- obtain licenses or pay ongoing royalties on unfavorable terms;
- cease developing, manufacturing or selling drugs that incorporate the intellectual property in dispute;
- cease using and registering certain domain names, brands or trademarks in connection with some or all of our drugs and business activities in some or all jurisdictions in which we operate;
- redesign or reengineer drugs; and
- change our business processes.

Furthermore, because of the substantial amount of discovery required in connection with intellectual property litigation, there is a risk that some of our confidential information could be compromised by disclosure during this type of litigation. Thus, even if we ultimately prevail, or settle at an early stage, such litigation could burden us with substantial unanticipated costs.

As the legal threshold for bringing intellectual property claims and proceedings against us is low, we may be subject to intellectual property claims and proceedings regardless of the merit and probability of success of such claims. Any intellectual property-related disputes or litigation, regardless of outcome or merit, could result in substantial costs and expenses, negative publicity and diversion of management resources. During the course of any intellectual property claims or proceedings, there could be public announcements of the results of hearings, rulings on motions and other interim proceedings in the litigation. If securities analysts or investors regard these announcements as negative, the perceived value of our product candidates, future product candidates, programs or intellectual property could be diminished. Accordingly, the market price of our H Shares may decline. Such announcements could also harm our reputation or the market for our product candidates, which could have a material adverse effect on our business. An adverse outcome in such litigation or proceedings may expose us or any future strategic partners to loss of our proprietary position, expose us to significant liability or require us to seek licenses that may not be available on commercially acceptable terms, if at all, which could have a material adverse effect on our business.

We may face challenges associated with protecting our intellectual property rights in other jurisdictions.

As of the Latest Practicable Date, we had 5 patents in China and 11 patents overseas. As of the same date, we had 15 patent applications in China and 37 patent applications overseas.

RISK FACTORS

In the event that we are able to commercialize our drugs on an international scale, we may face challenges associated with protecting our intellectual property rights in other jurisdictions. Filing, prosecuting, maintaining and defending patents in all other countries throughout the world requires significant financial resources and management attention. Moreover, our intellectual property rights in other jurisdictions may be of different scope and strength as compared to those in our target markets. Consequently, we may not be able to entirely prevent third parties from using our intellectual property to produce, sell or import drugs in other jurisdictions. Competitors may use our technologies in jurisdictions where we have not obtained patent protection to develop their own drugs, and may also export otherwise infringing drugs to jurisdictions where we do not have patent protection or strong patent enforcement rights. Such occurrences may diminish our competitive advantages, prospects and market share.

Intellectual property rights do not necessarily protect us from all potential threats in competition.

As intellectual property rights have limitations, they do not necessarily protect us from all potential threats in our competition with other biotech companies. Some of such limitations include:

- others may be able to manufacture drugs that are similar to our product candidates or apply similar technology that is not covered by the patents we own or license, now or in the future;
- others may independently develop similar drugs through methods or means that do not technically infringe, misappropriate or otherwise violate our intellectual property rights, particularly if the scope of protection afforded by our intellectual property rights is limited by the laws and regulations of certain jurisdictions or pursuant to court judgments or other legal proceedings;
- we might not have been the first to file patent applications covering certain of our inventions;
- it is possible that our pending licensed patent applications or those that we may own in the future will not lead to issued patents;
- we may not develop additional proprietary technologies that are patentable;
- we may choose not to file a patent for certain trade secrets or know-how, and a third party may subsequently file a patent covering such intellectual property;
- our patents may be rendered invalid or unenforceable as a result of legal challenges by our competitors; and
- our competitors might conduct research and development activities in countries where we do not have patent rights and use the information learned to develop competitive drugs for sale in our major markets.

Failure to protect our know-how, trade secrets and other confidential proprietary information may adversely affect our competitiveness.

In addition to patents and pending patent applications, we rely on know-how, trade secrets and other confidential proprietary information that cannot be patented to maintain our competitive position. To protect such intellectual property, we generally enter into non-disclosure and confidentiality agreements with employees, business partners, consultants, advisers and other third parties. We also enter into standard employment contracts and proprietary rights assignment and non-compete agreements with our employees, under which we own all the rights to all inventions, technologies, know-how and trade secrets derived during the course of our employee's work. We also enter into standard non-compete agreements with our key personnel. Additionally, we require our collaborating research institutions or other individuals to sign contracts with provisions that limit their ability to disclose certain data and other information obtained during the course of their research. However, we cannot assure you that our employees or other third parties will not intentionally or inadvertently make unauthorized disclosures or uses of our know-how, trade secrets and other confidential proprietary information. We also cannot guarantee the physical and cyber security of our information technology systems from data breaches and malicious attacks. Despite measures taken to protect our intellectual property, unauthorized parties may attempt to or successfully gain access to, obtain or use information that we regard as proprietary without our consent.

RISK FACTORS

Moreover, there may not be adequate remedies readily available to mitigate their unauthorized use or disclosure of our confidential proprietary information. We may hence be unable to sufficiently protect our trade secrets and proprietary information and other parties may attempt to or successfully make use of our know-how, trade secrets and other confidential proprietary information to produce drugs that erode our competitive position. Any enforcement and/or remedial measures that we take may be expensive and time-consuming, and the eventual outcomes may be unfavorable.

In addition, while we require all of our employees to execute agreements assigning such intellectual property to us, we may be unsuccessful in executing such an agreement with each party who in fact develops intellectual property that we regard as our own. Furthermore, the assignment of intellectual property rights may not be self-executing, or the assignment agreements may be breached, each of which may result in claims by or against us related to the ownership of such intellectual property. If we fail in prosecuting or defending any such claims, in addition to paying monetary damages, we may lose valuable intellectual property rights. Even if we are successful in prosecuting or defending against such claims, litigation could result in substantial costs and be a distraction to our management and scientific personnel. Any of the foregoing could materially adversely affect our business, financial condition, results of operations and prospects.

We may be subject to claims that our employees, consultants or advisers have wrongfully used or disclosed alleged trade secrets of their former employers or claims asserting ownership of what we regard as our own intellectual property.

Many of our employees, consultants and advisers, including our senior management, were previously employed at other pharmaceutical or biotech companies, including our competitors or potential competitors. Some of these employees, consultants and advisers executed proprietary rights, non-disclosure and non-competition agreements in connection with such previous employment. Although we try to ensure that our employees do not use the proprietary information or know-how of others in their work for us, we may be subject to claims that we or these employees have used or disclosed intellectual property, including trade secrets or other proprietary information, of any such individual's former employer, or that third parties have an interest in our patents as an inventor or co-inventor. We are not aware of any threatened or pending claims related to these matters or concerning the agreements with our senior management, but such claims may rise in the future. If we fail in defending any such claims, in addition to paying monetary damages, we may lose valuable intellectual property rights or personnel. Even if we are successful in defending against such claims, litigation could result in substantial costs and be a distraction to management.

Failure to adequately protect our trade names, trademarks and other intellectual property may affect our ability to build brand recognition.

We conduct our business under the brand name of "VivaVision." As of the Latest Practicable Date, we had registered two trademarks in China. However, our measures to protect intellectual property rights afford limited protection and policing unauthorized use of our intellectual property may be difficult and expensive. In addition, the enforceability, scope and validity of laws governing intellectual property rights in China are uncertain and still evolving. We cannot guarantee that we will be able to detect unauthorized use of our intellectual property rights or take appropriate steps to enforce them in a timely and effective manner. Moreover, attempts to protect our intellectual property rights through litigation could result in substantial costs and divert resources and management attention.

Furthermore, our registered and unregistered trade names or trademarks may be challenged, infringed, circumvented or declared generic or infringing on other marks. We may not be able to protect our rights to these trade names and trademarks, which we need to build brand recognition among potential partners or customers in our markets of interest. As our products mature, our reliance on our trademarks to differentiate us from our competitors will increase, and as a result, if we are unable to prevent third parties from adopting, registering or using trademarks and trade dress that infringe, dilute or otherwise violate our trademark rights, or engaging in conduct that constitutes unfair competition, defamation or other violation of our rights, our business could be materially adversely affected.

RISK FACTORS

Additionally, there is no guarantee that we will always be able to successfully register our trade names and trademarks. Failure to do so may prevent us from using our trade names and trademarks under the protection of the relevant laws and regulations, and we risk being accused of infringing other intellectual property rights. In addition, at times, competitors may adopt trade names or trademarks similar to our own and impede our ability to build brand recognition. Over the long term, failure to establish brand recognition based on our trade names and trademarks may prevent us from competing effectively and diminish our future prospects.

RISKS RELATING TO OUR OPERATIONS

We may be unable to attract and retain senior management and qualified clinical or research and development personnel.

Our operation depends in part on our continued ability to attract, retain and motivate senior management and qualified management, clinical and scientific personnel. We believe their efforts, connections and industry expertise are key to our business development.

The loss of services of any of our key management personnel may impede the achievement of our research, development and commercialization objectives. We cannot guarantee that we will be able to promptly hire and integrate qualified replacements. Replacing executive officers or senior management personnel may be difficult and may take an extended period of time because of the limited number of individuals in our industry with the breadth of skills and experience required to successfully develop, gain regulatory approval of and commercialize ophthalmic drugs like those we develop. Competition to hire from this limited pool is intense, and we may be unable to hire, train, retain or motivate these key personnel on acceptable terms given the competition among numerous pharmaceutical and biotech companies for similar personnel.

In addition, the future growth of our business will depend partly on our ability to attract and retain qualified personnel on reasonable terms, particularly those involved in our clinical and research and development operations. We may need to compete with other drug companies for employees with the relevant qualifications and experience. We also experience competition for the hiring of scientific and clinical personnel from universities and research institutions. Our consultants and advisers may be employed by others entities and may have commitments under consulting or advisory contracts with employers that may limit their availability to us. Although we have not historically experienced unique difficulties attracting and retaining qualified employees, we could experience such problems in the future. If we are unable to continue to attract and retain high-quality personnel, our ability to pursue our growth strategy will be limited. Any inability to hire and retain personnel with the talent and technical skill that we need to conduct our business could materially adversely affect our business, financial condition, results of operations and prospects.

We entered into collaborations agreements, and may form or seek other collaborations or strategic alliances or enter into licensing arrangements in the future, and we may not realize the benefits of such alliances or licensing arrangements.

We entered into a collaboration agreement with Everads Therapy Ltd. in November 2023 to develop VVN481 utilizing Everads' proprietary delivery technology for administration of therapy via the suprachoroidal space. We may continue to explore a variety of possible strategic collaborations or license opportunities in an effort to gain access to additional product candidates, technologies or commercialization resources.

We face significant competition in seeking appropriate strategic partners and the negotiation process, which is time-consuming and complex. Moreover, we may not be successful in our efforts to establish a strategic partnership or other alternative arrangements for our product candidates, because a majority of them may be deemed to be at too early of a stage of development for collaborative effort and potential partners may not view our product candidates as having the requisite potential to demonstrate safety and efficacy or commercial viability.

In addition, collaborations involving our product candidates are subject to various risks, including, but not limited to:

- collaboration partners have significant discretion in determining the development or commercialization strategy for our product candidate during collaboration, which may be different from what we expected and may be ineffective;

RISK FACTORS

- the development or commercialization capabilities of our partners may not be as strong as we expected;
- collaboration partners may not pursue development and commercialization of our product candidates or may elect not to continue or renew development or commercialization programs based on clinical trial results, changes in their strategic focus, availability of funding or other external factors, such as a business combination that diverts resources or creates competing priorities;
- collaboration partners may not commit sufficient resources to the development or sales and marketing of one or more of our product candidates;
- we could grant exclusive rights to our collaboration partners that would prevent us from collaborating with others;
- collaboration partners may not properly obtain, protect, maintain, defend or enforce our intellectual property rights or may use our intellectual property or proprietary information in a way that gives rise to actual or threatened litigation that could jeopardize or invalidate our intellectual property or proprietary information or expose us to potential liability;
- collaboration partners may not aggressively or adequately pursue litigation against generic filers or may settle such litigation on unfavorable terms, as they may have different economic interests than ours, and such decisions could negatively impact any royalties we may receive under our license agreements;
- we may be subject to product liability claim in respect of joint developed products with our collaboration partners;
- we may encounter material disputes with collaboration partners regarding the terms of our collaboration, which could lead to disruption of the development or commercialization of our product candidates and litigations that could be time-consuming and expensive; and
- collaborations may be terminated and, if terminated, may result in a need for additional time and capital to pursue alternative partners for the development or commercialization of the applicable product candidates;

Therefore, we may not be able to realize the benefit of current or future collaborations, if we are unable to successfully integrate such collaborations with our existing operations and company culture, which could delay our timelines or otherwise adversely affect our business. We also cannot be certain that, following a strategic transaction or license, we will achieve the revenue or other financial benefits that justify such transaction. If we are unable to reach agreements with suitable collaborators on a timely basis, on acceptable terms, or at all, we may have to curtail or delay the development or commercialization of one or more of our product candidates, reduce the scope of any sales or marketing activities, or increase our expenditures and undertake such development or commercialization activities at our own expense. As a result, we may not be able to further develop our product candidates or bring them to market and generate product sales revenue, which would harm our business prospects, financial condition and results of operations.

RISK FACTORS

Our employees, CROs, collaboration partners and others with whom we deal may engage in misconduct or other improper activities, including non-compliance with regulatory standards and requirements, which could harm our reputation and subject us to penalties and significant expenses that have a material adverse effect on our business, financial condition and results of operations.

We are exposed to the risk of fraud, misconduct or other illegal activity by our employees, CROs, collaboration partners and others with whom we deal. Misconduct by these parties could include intentional, reckless and negligent conduct that fails to: (i) comply with the laws of the NMPA and other regulatory authorities; (ii) provide true, complete and accurate information to the NMPA and other regulatory authorities; (iii) comply with healthcare fraud and abuse laws in China; or (iv) report financial information or data accurately or to disclose unauthorized activities to us. If we obtain NMPA approval for any of our product candidates and begin commercializing those drugs in China, our potential exposure under relevant laws will increase significantly and our costs associated with compliance with such laws are also likely to increase. These laws may impact, among other things, our current activities with principal investigators of our clinical trials and our use of information obtained in the course of patient recruitment for clinical trials.

It is not always possible to identify and deter misconduct by employees and other parties, and the precautions we take to detect and prevent this activity may not be effective in controlling unknown or unmanaged risks or losses, or in protecting us from governmental investigations or other actions or lawsuits stemming from a failure to comply with these laws or regulations. If any such actions are instituted against us, and we are not successful in defending ourselves or asserting our rights, those actions could have a significant impact on our business, including the imposition of significant fines or other sanctions.

We relied on a limited number of suppliers during the Track Record Period.

During the Track Record Period, our suppliers primarily consisted of (i) CROs for preclinical and clinical research; (ii) CDMOs for manufacturing of drug candidates used in our research; and (iii) suppliers of laboratory consumables, machinery and equipment. For the year ended December 31, 2024 and the nine months ended September 30, 2025, our purchases from our five largest suppliers were RMB54.8 million and RMB26.1 million, respectively, accounting for approximately 72.7% and 77.8%, respectively, of our total purchases for the respective periods. In the same periods, purchases from our largest supplier were RMB17.9 million and RMB13.4 million, respectively, accounting for approximately 23.7% and 39.8%, respectively, of our total purchases for the respective periods. Should our major suppliers cease their business relationships with us and we fail to locate suitable replacements on a timely basis and at acceptable cost, our business, financial condition and results of operations may be materially and adversely affected.

We may be required to pay late payment fines or other penalties in connection with our failure to fully contribute to social insurance and housing provident funds.

During the Track Record Period, we did not fully contribute to social insurance and housing provident funds for two of our employees, and between January and April 2024, we engaged third-party human resource agencies to pay social insurance and housing provident funds for six of our employees due to the relocation of our headquarters. According to the relevant PRC laws and regulations, if we fail to make contributions to social insurance funds on time and in full, the relevant government authority can require us to rectify the shortfall in our contributions within a prescribed period, and we may be liable for a late payment fee equal to 0.05% of the shortfall in our contributions for each day of delay. If and only if we failed to do so, we may be liable for a penalty of one to three times the amount of the shortfall in our contributions. If we fail to make contributions to housing provident funds in full when due, the relevant government authority can require us to rectify the shortfall in our contributions within a prescribed period, and where the payment has not been made within the prescribed period, the relevant government authority may apply to a court for compulsory enforcement.

In light of the following: (i) based on credit reports issued by the relevant authorities, we have not been subject to any administrative penalties in relation to social insurance and housing provident fund matters during the Track Record Period; and (ii) we had not received any notification from the relevant authorities requiring us to pay shortfalls or overdue charges with respect to social insurance and housing provident funds as of the Latest Practicable Date, our PRC Legal Advisers are of the view that provided that there are no significant changes in the current policies, regulations, and the enforcement of local authorities, the likelihood of us

RISK FACTORS

being subject to active and collective demands for retroactive social security and housing fund payment, or administrative penalties resulting in material adverse effects on our business, financial condition by relevant competent authorities is low. However, we cannot assure you that the relevant government authorities will not require us to rectify such incidents or impose late payment fines or other penalties on us. If we are required to rectify the shortfall in our contributions or if severe penalties are imposed on us, our business, financial condition and results of operations may be adversely affected.

Failure to obtain property ownership certificate or sufficient documentation regarding certain of our leased properties may adversely affect our business, financial condition and results of operations.

As of the Latest Practicable Date, for one leased property, the lessor with whom we enter into lease agreement did not provide valid property ownership certificate or sufficient documentation to prove the right to lease the property to us for our intended use. Therefore, we cannot ensure that they have the rights to lease or sublease such properties to us for our intended use. If we are challenged by third parties or government authorities upon any of the circumstances stated above, we may be subject to fines and may be forced to relocate, as the case may be, and, as a result, our business, results of operations, financial performance and prospects may be adversely affected.

If we fail to comply with environmental, health and safety laws and regulations, we could become subject to fines or penalties or incur costs that could materially and adversely affect our business.

We are subject to numerous environmental, health and safety laws and regulations, including those governing laboratory procedures and the handling, use, storage, treatment and disposal of hazardous materials and wastes. Our operations may involve the use of hazardous and flammable materials, including chemicals and biological materials, and may produce hazardous waste products. We may contract with third parties for the disposal of these materials and wastes. We cannot eliminate the risk of contamination or injury from these materials. In the event of contamination or injury resulting from our use of hazardous materials, we could be held liable for any resulting damages, and any liability could exceed our resources. We also could incur significant costs associated with civil or criminal fines and penalties.

Although we maintain statutory employees' social insurance to cover us for costs and expenses we may incur due to injuries to our employees resulting from the use of or exposure to hazardous materials, this insurance may not provide adequate coverage against potential liabilities. We do not maintain insurance for environmental liability or toxic tort claims that may be asserted against us in connection with our storage, use or disposal of biological or hazardous materials.

In addition, we may be required to incur substantial costs to comply with current or future environmental, health and safety laws and regulations. These current or future laws and regulations may impair our research, development or production efforts. Failure to comply with these laws and regulations also may result in substantial fines, penalties or other sanctions. Any of the foregoing could materially adversely affect our business, financial condition, results of operations and prospects.

Changes in social trends and political policies related to environmental, social, and governance issues may adversely affect our business operation.

As a biotech company, we are subject to potential risks arising from changes in social trends and political policies related to environmental, social, and governance (ESG) issues, such as public perception with respect to animal testing for the R&D of ophthalmic drugs. Changes in social trends and political policies related to ESG issues could impact our business model in several ways. For example, if there is a shift towards more stringent regulations on environmental protection or animal welfare, we may face increased compliance costs and operational challenges. Similarly, if there is a growing demand for ophthalmic drugs that are developed and manufactured using environmentally friendly process, we may need to adapt our pipeline and invest in new technologies and process to reduce our environmental footprint. Moreover, changes in political policies related to ESG issues may impact our access to funding and other resources that are critical to our growth and success. For instance, if there is a change in government policies that restricts funding for biotech companies that do not meet certain ESG criteria, we may face challenges in securing financing for our business activities.

RISK FACTORS

Should we fail to detect or prevent violations of applicable anti-bribery laws by our employees, researchers, marketing and sales personnel and other business partners, we may experience material adverse effects on our business and be subject to significant penalties.

We are subject to anti-bribery laws in China that generally prohibit companies and their intermediaries from making payments to government officials to obtain or retain business or secure any other improper advantages. Within the healthcare industry, violations of anti-bribery and anti-corruption laws may include improper payments that facilitate outcomes in research studies and/or drug supply negotiations or opportunities to sell drugs or other healthcare products at hospitals and other medical institutions. Although we have put in place policies and procedures that ensure that we and our employees comply with anti-bribery laws, we cannot guarantee that our research and development staff, sales and marketing personnel and other employees, as well as third parties that we collaborate with such as CROs, hospitals and medical professionals will fully comply with anti-bribery and anti-corruption regulations at all times. We also cannot assure you that we will be able to detect and prevent all instances of improper practices with respect to our clinical trials and other aspects of our business. In the event that our employees or other third party collaborators such as our research and development staff, sales and marketing personnel and other employees do not adhere to anti-bribery and anti-corruption laws, we may be subject to investigations, sanctions or fines that generate negative publicity and substantially harm our reputation, business and prospects.

Negative publicity about us, our Shareholders and affiliates, our brand and management may materially and adversely affect our business, reputation and trading price of our H Shares.

We believe that market awareness and recognition of our brand image is important to our commercial prospect. Despite our efforts to promote our brand image, we may not be successful in doing so. Over the long term, negative publicity may materially and adversely affect our business and brand so as to reduce the trading price of our H Shares and diminish our competitive position.

As we continue to grow our business, we may find it necessary to expand our network of collaborators to enhance our marketing and branding efforts. Since we have limited control over such parties, we cannot guarantee that our efforts will be successful, nor that they will perform according to the standards expected. Any actions on their part that reflect negatively on our business or generate negative publicity for us may impede our efforts to establish our industry reputation.

Furthermore, negative publicity about us, our Shareholders and affiliates, alleged misconduct or improper activities or negative rumors relating to us, our management, employees, business partners or affiliates may arise from time to time in the internet and other media sources. They may harm our business and results of operations even if they are unsubstantiated. There is no guarantee that our efforts to defend ourselves against such negative publicity or rumors, or to address them internally, will be successful. Any regulatory inquiries or investigations against our directors and senior management, business partners or other affiliates regarding any perceived unethical, fraudulent or other inappropriate conduct may be particularly harmful to our reputation regardless of the merits or final outcome. In turn, this may affect our ability to grow our business and attract customers, suppliers and talented employees.

We are also particularly susceptible to negative media about the drug industry in general or particular drugs or services. Such negative media may result from the actions of competitors or other industry players, over whom we have no control. It is possible that the PRC government may promulgate laws and regulations that seek to address the source and reasons for such negative media. We cannot guarantee that we will be able to adapt to such laws and regulations in a timely and effective manner, including adequate management of the related compliance costs.

We may be involved in product liability claims or other disputes, litigation, arbitration and legal proceedings in the ordinary course of our business.

From time to time, we may be directly or indirectly involved in legal proceedings and claims that arise in the ordinary course of business or pursuant to governmental or regulatory enforcement activity. In particular, we face an inherent risk of product liability as a result of the clinical testing and any future commercialization of our product candidates. Any such product liability claims may include allegations of defects in manufacturing, defects in design, a failure to warn of dangers inherent in the drug, negligence, strict liability or a breach of warranties. Claims could also be asserted under applicable consumer protection laws. If we

RISK FACTORS

cannot successfully defend ourselves against or obtain indemnification from our collaboration partners for product liability claims, we may incur substantial liabilities or be required to limit commercialization of our product candidates. Even a successful defense would require significant financial and management resources. Regardless of the merits or the eventual outcome of such product liability claims, we may be subject to the following consequences:

- less interest in our product candidates and reduced demand for our drugs;
- reputational damage;
- withdrawal of clinical trial participants;
- inability to commercialize product candidates;
- loss of revenue;
- costs incurred to defend legal proceedings;
- substantial monetary damages payable to trial subjects or customers; and
- product recalls, withdrawals or the imposition of labeling, marketing or promotional restrictions that limit our ability to commercialize our product candidates.

If we are unable to defend ourselves against such claims, we may be subject to, among other things, civil liability for adverse events or other losses caused by our products and to criminal liability and the potential revocation of our business licenses if our products are found to be defective.

In addition to product liability claims, our employees may also sue us for labor-related disputes or occupational injuries, and we are subject to risks associated with having limited control over the behavior of employees or other business partners who may intentionally or unintentionally harm the interests of our customers. Any claims, disputes and legal proceedings brought against us could result in substantial costs and divert capital resources and management attention, even if we should mount a successful defense. We may suffer damage to our reputation regardless of the merits or outcome, leading to material adverse effects on our business, financial position and brand value.

Existing PRC laws and administrative regulations require us to maintain liability insurance to cover product liability claims on clinical trials. Any product liability insurance for clinical trials, when obtained, may be prohibitively expensive, or may not fully cover our potential liabilities. Our inability to obtain and retain sufficient product liability insurance at an acceptable cost to protect against potential product liability claims could prevent or inhibit the commercialization of product candidates we develop. Moreover, claims that may be brought against us could result in a court judgment or settlement for such amount that is not covered, in whole or in part, by our insurance or that is in excess of the limits of our insurance coverage. Our insurance policies also have various exclusions, and we may be subject to a product liability claim for which we have no coverage. We will have to pay any amounts awarded by a court or negotiated in a settlement that exceed our coverage limitations or that are not covered by our insurance, and we may not have, or be able to obtain, sufficient capital to pay such amounts.

We are exposed to risks in connection with failing to detect and prevent fraud, negligence or other misconduct committed by third parties.

Our information management system and internal control procedures are designed to monitor our operations and overall compliance. However, we cannot guarantee that they will always enable us to detect, prevent and take remedial measures in relation to fraud, negligence or other misconduct (accidental or otherwise) committed by our employees, business partners, suppliers, customers or other third parties in a timely and effective manner. There will therefore continue to be risks that fraud, negligence and other misconduct (accidental or otherwise) may occur and cause negative publicity, which may have an adverse effect on our brand and reputation. Although we have limited control over the behavior of any of these parties, we may be viewed as at least partially responsible for their conduct. We may become, or be joined as, a defendant in litigation or other administrative or investigative proceedings and be held accountable for injuries or damages sustained by our employees, business partners, suppliers, customers or other third parties from time to time. To the extent that we cannot recover related costs from the employees, business partners, suppliers, customers or other third parties involved, we may experience material adverse effects on our business, financial position and results of operations.

RISK FACTORS

Our insurance coverage may not sufficiently cover the risks related to our business operations.

We maintain insurance policies that we believe are customary with standard commercial practice in the drug industry and as required under the relevant PRC laws and regulations. However, we cannot guarantee you that our insurance policies will provide adequate coverage for all the risks in connection with our business operations. For example, although we maintain liability insurance covering our clinical trials as required under PRC laws and regulations, our coverage may be insufficient to cover any amounts payable under court judgments or settlements. Should we incur substantial amounts in product liability claims, and be unable to cover these with our existing insurance policies or internal resources, we may be forced to suspend other key operations, such as the conduct of clinical trials, to divert funds from other aspects of our business.

Moreover, there are certain losses for which insurance is not available in China on commercially practicable terms, such as losses suffered due to business interruptions, earthquakes, typhoons, flooding, war or civil disorder. We may be required to bear our losses to the extent that they are not covered by insurance, or that our insurance coverage is insufficient, and such amounts could be substantial. We could suffer significant costs and diversion of our resources as a result.

Our information technology systems, or those of our CROs or other service providers or consultants, may fail or suffer security breaches.

Despite the implementation of security measures, our internal computer systems and those of our CROs, service providers or consultants are vulnerable to damage or interruption caused by, among others, power outages, computer viruses, phishing attacks, ransomware, worms, unauthorized access, telecommunication failures, cyber-attacks, natural disasters, terrorism and war. Should such events occur and interrupt our operations, we may experience a material disruption to our business operations.

In our ordinary course of business, we collect and store sensitive information, including the personal information of our employees, various intellectual property (including trade secrets), research and development information, sales and marketing strategies and key business and financial data. We manage and maintain our information and data through on-site systems and third-party vendors. Because information systems, networks and other technologies are critical to many of our operating activities, shutdowns or service disruptions at our sites or third-party vendors may materially and adversely affect our business operations by damaging key data and equipment. Such disruptions may be caused by events such as computer hacking, phishing attacks, ransomware, dissemination of computer viruses, worms and other destructive or disruptive software, denial of service attacks and other malicious activity, as well as power outages, natural disasters (including extreme weather), terrorist attacks or other similar events. There is no guarantee that our disaster recovery and automatic recovery systems will be able to retain and recover all the equipment or data affected by shutdowns or service disruptions. In addition, we may not have adequate insurance coverage to compensate for losses associated with such events.

Furthermore, we are vulnerable to risks caused by misappropriation, misuse, leakage, falsification, or intentional or accidental release or loss of sensitive information maintained in our information systems and those of our vendors, including confidential data on our employees, customers, suppliers and clinical trial subjects. Outside parties may attempt to penetrate our information systems or those of our vendors, or fraudulently induce our employees or our vendors' employees to disclose sensitive information through means such as viruses, phishing and cyber-attacks. The number and complexity of these threats continue to increase over time. In the event of a material breach of our information technology systems or those of our vendors, our business partners, customers or other industry players may have a negative perception of the effectiveness of our security measures, and we may experience harm to our reputation and credibility. We may also be compelled to expend substantial financial resources to repair or replace our information systems. In addition, we may be subjected to collective actions and/or claims from individuals respecting issues related to data privacy laws and regulations, such as misuse or inappropriate disclosure of data and unfair or deceptive practices.

RISK FACTORS

We cannot guarantee that our internal control procedures will always be sufficient to identify and mitigate threats to our information systems. The development and maintenance of our information systems is costly and requires ongoing monitoring and updating as technologies change and efforts to overcome security measures become increasingly sophisticated. We may not always be able to adapt our internal control procedures and update our information systems in a sufficiently timely or effective manner to eliminate all such risks. Additionally, the more we outsource protection and upgrading of our information systems to vendors, engage in electronic transactions and rely on cloud-based information systems, the less control we have over the risks to our information systems. To the extent that disruptions or security breaches of our information systems or those of our vendors, CROs, service providers or other consultants compel us to temporarily suspend our business operations, we may experience delays to the development and commercialization of our product candidates.

Failure to comply with existing or future laws and regulations related to privacy or data security could lead to government enforcement actions, which could include civil or criminal fines or penalties, private litigation, other liabilities, and/or adverse publicity.

The regulatory framework for the collection, use, safeguarding, sharing, transfer and other processing of personal information in China is rapidly evolving and is likely to remain uncertain for the foreseeable future. There are numerous laws that protect the confidentiality of individually identifiable patient health information, including patient records, and restricting the use and disclosure of that protected information. Regulatory authorities may continue to introduce additional legislative and regulatory proposals concerning personal data protection.

The Standing Committee of the NPC promulgated the Personal Information Protection Law of the PRC (《中華人民共和國個人信息保護法》), which became effective on November 1, 2021, sets forth detailed rules on handling personal information and legal responsibilities and also strengthen the punishment for illegal process of personal information. Under the Personal Information Protection Law of the PRC, healthcare relevant personal information, including the information collected during clinical trials, shall be deemed as “sensitive personal information” and shall be under strict protection. Furthermore, GCP requires that the privacy of trial subjects and the confidentiality of the relevant information shall be protected.

Moreover, the Data Security Law of the PRC (《中華人民共和國數據安全法》) which has taken effect on September 1, 2021, provides that relevant authorities will establish the measures for the cross-border transfer of import data, if any company violates the Data Security Law of the PRC to provide important data outside China, such company may be punished by administration sanctions, including penalties, fines, and/or may suspension of relevant business or revocation of the business license. The Outbound Data Transfer Security Assessment Measures (the “Outbound Data Transfer Security Assessment Measures”) (《數據出境安全評估辦法》) was published on July 7, 2022 and became effective on September 1, 2022, which specifies that data processors who intend to provide important data and personal information that are collected and generated in the operation within the territory of the PRC to overseas shall be subject to security assessment. The Outbound Data Transfer Security Assessment Measures further stipulate the process and requirements for the security assessment. However, it remains uncertain how the PRC government authorities will regulate companies under such circumstances if the Outbound Data Transfer Security Assessment Measures are fully implemented as-is. These bring more uncertainties with respect to the application and enforcement of the newly published measures, and we may be subject to such outbound data security assessment. We will closely monitor and assess any relevant legislative and regulatory development and prepare for a security assessment when necessary.

Compliance with these and any other applicable laws, regulations, standards and obligations relating to data privacy, security and transfers is a rigorous and time-intensive process and may cause us to incur additional operational costs or require us to modify our data processing practices and processes. If we or our third-party vendors, collaborators, contractors and consultants fail to comply with any such laws or regulations, we may face proceedings against us by data protection authorities and governmental entities, which could subject us to significant fines, penalties, judgments, negative publicity and reputational damage, and may otherwise materially and adversely affect our business, financial condition and results of operations.

RISK FACTORS

We may be subject to natural disasters, acts of war or terrorism or other factors beyond our control.

Natural disasters, acts of war, terrorism or other factors beyond our control may adversely affect the economy, infrastructure and livelihood of the people in the regions where we conduct our business. Our operations may be under the threat of floods, earthquakes, sandstorms, snowstorms, fire or drought, power, water or fuel shortages, failures, malfunction and breakdown of information management systems, unexpected maintenance or technical problems, or are susceptible to potential wars or terrorist attacks. Serious natural disasters may result in loss of lives, injury, destruction of assets and disruption of our business and operations. Acts of war or terrorism may also injure our employees, cause loss of lives, disrupt our business network and destroy our markets. Any of these factors and other factors beyond our control could have an adverse effect on the overall business sentiment and environment, cause uncertainties in the regions where we conduct business, cause our business to suffer in ways that we cannot predict and materially and adversely impact our business, financial conditions and results of operations.

RISKS RELATING TO THE [REDACTED]

There has been no prior public market for our H Shares and an active trading market for our H Shares may not develop.

No public market currently exists for our H Shares. The initial [REDACTED] for our H Shares to the public will be the result of negotiations between our Company and the Sole [REDACTED] (on behalf of itself and the [REDACTED]), and the [REDACTED] may differ significantly from the market price of the H Shares following the [REDACTED]. We have applied to the Stock Exchange for the listing of, and permission to deal in, the H Shares. A listing on the Stock Exchange, however, does not guarantee that an active and liquid trading market for our H Shares will develop, or if it does develop, that it will be sustained following the [REDACTED], or that the market price of the H Shares will rise following the [REDACTED].

Any possible conversion of our Unlisted Shares into H Shares in the future could increase the supply of our H Shares in the market and negatively impact the market price of our H Shares.

All of our Unlisted Shares may be converted into H Shares and such converted Shares may be listed or traded on an overseas stock exchange. Any listing or trading of the converted Shares on an overseas stock exchange shall also comply with the regulatory procedures, rules and requirements of such stock exchange. However, the PRC Company Law provides that in relation to the public offering of a company, the shares of that company which are issued prior to the public offering shall not be transferred within one year from the date of the listing. Therefore, upon the completion of the relevant filing procedure, shares currently held on our Unlisted Share register may be traded, after the conversion, in the form of H Shares on the Stock Exchange after one year of the [REDACTED], which could further increase the supply of our H Shares in the market and could negatively impact the market price of our H Shares.

You will incur immediate and significant dilution and may experience further dilution if we issue additional Shares in the future.

The [REDACTED] of the [REDACTED] is higher than the net tangible asset value per Share immediately prior to the [REDACTED]. Therefore, purchasers of the [REDACTED] in the [REDACTED] will experience an immediate dilution in *pro forma* consolidated net tangible asset value, based on the mid-point of the [REDACTED]. There can be no assurance that if we were to immediately liquidate after the [REDACTED], any assets will be distributed to Shareholders after the creditors' claims.

We cannot guarantee the accuracy of facts, forecasts and other statistics obtained from official government sources or other sources contained in this document.

Certain facts, statistics and data contained in this document relating to the pharmaceutical industry in and outside China have been derived from various official government publications, industry associations, independent research institutions, third party reports and/or other publicly available sources we generally believe to be reliable, as well as a report prepared by Frost & Sullivan that we commissioned. We believe that the sources of such information are appropriate sources for such information, but the information has not been independently verified by us or any other party involved in the [REDACTED] and no representation is given as to its accuracy.

RISK FACTORS

There is no assurance whether and when we will pay dividends, which is subject to restrictions under PRC law.

No dividend had been paid or declared by our Company during the Track Record Period. Under the applicable PRC laws, the payment of dividends may be subject to certain limitations. The calculation of our profit under applicable accounting standards differs in certain respects from the calculation under IFRS. As a result, we may not be able to pay a dividend in a given year even if we were profitable as determined under IFRS. Our Board may declare dividends in the future after taking into account our results of operations, financial condition, cash requirements and availability and other factors as it may deem relevant at such time. Any declaration and payment as well as the amount of dividends will be subject to our constitutional documents and the PRC laws and regulations and requires approval at our shareholders’ meeting. No dividend shall be declared or payable except out of our profits and reserves lawfully available for distribution.

Dividends payable to investors and gains on the sale of our H Shares may be subject to PRC income taxes.

Under applicable PRC tax laws, regulations and statutory documents, non-PRC resident individuals and enterprises are subject to different tax obligations with respect to dividends received from us or gains realized upon the sale or other disposition of our H Shares. Non-PRC individuals are generally subject to PRC individual income tax under the Individual Income Tax Law of the PRC (《中華人民共和國個人所得稅法》) with respect to PRC source income or gains at a rate of 20% unless specifically exempted by the tax authority of the State Council or reduced or eliminated by an applicable tax treaty. We are required to withhold related tax from dividend payments. Pursuant to applicable regulations, domestic non-foreign-invested enterprises issuing shares in Hong Kong may generally, when distributing dividends, withhold individual income tax at the rate of 10%. However, withholding tax on distributions paid by us to non-PRC individuals may be imposed at other rates pursuant to applicable tax treaties (and up to 20% if no tax treaty is applicable) if the identity of the individual holder of H shares and the tax rate applicable thereto are known to us. There is uncertainty as to whether gains realized upon disposition of H shares by non-PRC individuals are subject to PRC individual income tax.

Non-PRC resident enterprises that do not have establishments or premises in the PRC, or that have establishments or premises in the PRC but their income is not related to such establishments or premises are subject to PRC EIT at the rate of 10% on dividends received from PRC companies and gains realized upon disposition of equity interests in the PRC companies pursuant to the EIT Law and other applicable PRC tax regulations and statutory documents, which may be reduced or eliminated under special arrangements or applicable treaties between the PRC and the jurisdiction where the non-resident enterprise resides.

Pursuant to applicable regulations, we intend to withhold tax at a rate of 10% from dividends paid to non-PRC resident enterprise holders of our H Shares (including HKSCC Nominees). Non-PRC resident enterprises that are entitled to be taxed at a reduced rate under an applicable income tax treaty will be required to apply to the PRC tax authorities for a refund of any amount withheld in excess of the applicable treaty rate, and payment of such refund will be subject to the PRC tax authorities’ verification. As of the Latest Practicable Date, there were no specific rules on how to levy tax on gains realized by non-resident enterprise holders of H shares through the sale or transfer by other means of H shares.

There remains significant uncertainty as to the interpretation and application of the relevant PRC tax laws by the PRC tax authorities, including whether and how individual income tax or EIT on gains derived by holders of our H Shares from their disposition of our H Shares may be collected. If any such tax is collected, the value of our H Shares may be materially and adversely affected.

Forward-looking statements contained in this document are subject to risks and uncertainties.

This document contains certain forward-looking statements and information relating to us that are based on the beliefs of our management as well as assumptions made by and information currently available to our management. When used in this document, the words “aim,” “anticipate,” “believe,” “can,” “continue,” “could,” “estimate,” “expect,” “going forward,” “intend,” “ought to,” “may,” “might,” “plan,” “potential,” “predict,” “project,”

RISK FACTORS

“seek,” “should,” “will,” “would” and similar expressions, as they relate to us or our business, are intended to identify forward-looking statements. Such statements reflect the current views of our management with respect to future events, business operations, liquidity and capital resources, some of which may not materialize or may change. These statements are subject to certain risks, uncertainties and assumptions, including the other risk factors as described in this document. Should one or more of these risks or uncertainties materialize, or if any of the underlying assumptions prove incorrect, actual results may diverge significantly from the forward-looking statements in this document. Whether actual results will conform to our expectations and predictions is subject to a number of risks and uncertainties, many of which are beyond our control, and reflect future business decisions that are subject to change. In light of these and other uncertainties, the inclusion of forward-looking statements in this document should not be regarded as representations that our plans or objectives will be achieved, and investors should not place undue reliance on such forward-looking statements. All forward-looking statements contained in this document are qualified by reference to the cautionary statements set out in this section. Subject to the ongoing disclosure obligations of the Listing Rules or other requirements of the Stock Exchange, we do not intend publicly to update or otherwise revise the forward-looking statements in this document, whether as a result of new information, future events or otherwise.

You should read this entire document carefully and should not consider or rely on any particular statements in published media reports without carefully considering the risks and other information contained in this document.

Prior to the publication of this document, and subsequent to the date of this document but prior to the completion of the [REDACTED], there may have been or may be press and media coverage regarding us, our business, our industry and the [REDACTED]. Such press and media coverage may include references to information that do not appear in this document or is inaccurate. We have not authorized the publication of any such information contained in such press and media coverage. Therefore, we make no representation as to the appropriateness, accuracy, completeness or reliability of any information disseminated in the press or media and do not accept any responsibility for the accuracy or completeness of any financial information or forward-looking statements contained therein. To the extent that any of such information is inconsistent or conflicts with the contents of this document, we expressly disclaim responsibility for them. Accordingly, prospective investors should only rely on information included in this document and not on any of the information in press articles or other media coverage in deciding whether or not to invest in our [REDACTED]. By applying to purchase our H Shares in the [REDACTED], you will be deemed to have agreed that you have not and will not rely on any information other than that contained in this document, the [REDACTED], and any formal announcements made by us in Hong Kong in relation to our [REDACTED].

WAIVERS FROM STRICT COMPLIANCE WITH THE REQUIREMENTS UNDER THE LISTING RULES AND EXEMPTION FROM THE COMPANIES (WINDING UP AND MISCELLANEOUS PROVISIONS) ORDINANCE

In preparation for the Listing, our Group has sought the following waivers from strict compliance with the relevant provisions of the Listing Rules and exemption from strict compliance with the relevant provisions of the Companies (Winding Up and Miscellaneous Provisions) Ordinance.

MANAGEMENT PRESENCE IN HONG KONG

Pursuant to Rules 8.12 and 19A.15 of the Listing Rules, an issuer must have sufficient management presence in Hong Kong and, in normal circumstances, at least two of the issuer's executive directors must be ordinarily resident in Hong Kong.

Since our business operations are not principally located, managed or conducted in Hong Kong, and our Directors consider that the relocation of our executive Directors to Hong Kong or the appointment of additional executive Directors who will be ordinarily resident in Hong Kong would not be beneficial to, or appropriate for, our Company and therefore would not be in the best interests of our Company and our Shareholders as a whole, our Company does not, and, for the foreseeable future, will not, have two executive Directors who are ordinarily resident in Hong Kong for the purpose of satisfying the requirements under Rules 8.12 and 19A.15 of the Listing Rules.

Accordingly, we have applied to the Stock Exchange for[, and the Stock Exchange has granted us,] a waiver from compliance with Rules 8.12 and 19A.15 of the Listing Rules subject to, among others, the following conditions:

- (a) pursuant to Rule 3.05 of the Listing Rules, we have appointed two authorized representatives (the “Authorized Representatives”), Dr. Shen Wang (沈旺), our executive Director, chief executive officer and chairman of our Board, and Dr. Sun Yanyan (孫妍妍), our joint company secretary, who will act as our Company's principal channel of communication with the Stock Exchange. Each of our Authorized Representatives will be available to meet with the Stock Exchange in Hong Kong within a reasonable time frame upon the request of the Stock Exchange and will be readily contactable by telephone, facsimile and/or email (where available). Each of our Authorized Representatives is authorized to communicate on our behalf with the Stock Exchange;
- (b) both of our Authorized Representatives have means to contact all our Directors (including our independent non-executive Directors) promptly at all times as and when the Stock Exchange wishes to contact our Directors for any matters. Our Directors who are not ordinarily resident in Hong Kong possess or can apply for valid travel documents to visit Hong Kong and will be able to meet with the Stock Exchange within a reasonable period of time, when required. Each of our Directors has provided his/her respective mobile phone numbers, office phone numbers, fax numbers and/or email addresses (where available) to our Authorized Representatives. In the event that a Director expects to travel, he/she will endeavor to provide the phone number of the place of his/her accommodation to our Authorized Representatives or maintain an open line of communication via his/her mobile phone. Each of our Directors and Authorized Representatives has provided his/her mobile phone numbers, office phone numbers, fax numbers and/or email addresses (where available) to the Stock Exchange;
- (c) pursuant to Rule 3A.19 of the Listing Rules, we have appointed Somerley Capital Limited as our Compliance Adviser, which shall have access at all times to our Authorized Representatives, Directors, senior management and other officers of our Company, and will act as an additional channel of communication between the Stock Exchange and us; and
- (d) meetings between the Stock Exchange and our Directors could be arranged through our Authorized Representatives or the Compliance Adviser, or directly with our Directors within a reasonable time frame. We will promptly inform the Stock Exchange of any changes of our Authorized Representatives and/or the Compliance Adviser.

WAIVERS FROM STRICT COMPLIANCE WITH THE REQUIREMENTS UNDER THE LISTING RULES AND EXEMPTION FROM THE COMPANIES (WINDING UP AND MISCELLANEOUS PROVISIONS) ORDINANCE

JOINT COMPANY SECRETARIES

According to Rules 3.28 and 8.17 of the Listing Rules and Chapter 3.10 of the Guide issued by the Stock Exchange, the secretary of an issuer must be a person who has the requisite knowledge and experience to discharge the functions of the company secretary and is either (i) a member of the Hong Kong Chartered Governance Institute, a solicitor or barrister as defined in the Legal Practitioners Ordinance (Chapter 159 of the Laws of Hong Kong) or a certified public accountant as defined in the Professional Accountants Ordinance (Chapter 50 of the Laws of Hong Kong); or (ii) an individual who, by virtue of his/her academic or professional qualifications or relevant experience, is, in the opinion of the Stock Exchange, capable of discharging the functions of a company secretary.

According to Chapter 3.10 of the Guide, the waiver under Rule 3.28 of the Listing Rules will be granted for a fixed period of time, but in any case, will not exceed three years from the Listing Date (the “Waiver Period”) and on the conditions that (i) the company secretary in question must be assisted by a person who possesses the qualifications or experience as required under Rule 3.28 and is appointed as a joint company secretary throughout the Waiver Period; and (ii) the waiver can be revoked if there are material breaches of the Listing Rules by our Company.

We have appointed Dr. Sun Yanyan (孫妍妍) (“Dr. Sun”) and Ms. Chan Ching Nga (陳靜雅) (“Ms. Chan”) as our joint company secretaries. Dr. Sun joined our Group in April 2023 and currently serves as a vice president of the Group. Dr. Sun has been primarily responsible for the business development, investor relations, capital market operations, corporate secretarial and corporate governance matters of our Group. Our Directors are of the view that, having regard to Dr. Sun’s thorough understanding of the overall business operations and corporate governance matters of our Group, she is considered as a suitable person to act as a company secretary of our Company. In addition, as our headquarters and principal business operations are substantially based and conducted in the PRC, our Directors believe that it is necessary to appoint Dr. Sun as a company secretary whose presence in the headquarters of our Group enables her to attend the day-to-day corporate secretarial matters of our Group and to take the necessary actions in an effective and efficient manner.

However, given that Dr. Sun does not possess a qualification stipulated in Note 1 to Rule 3.28 of the Listing Rules nor the “relevant experience” set out in Note 2 to Rule 3.28 of the Listing Rules, she is not able to solely fulfill the requirements as a company secretary of a listed issuer stipulated under Rules 3.28 and 8.17 of the Listing Rules. In order to provide support to Dr. Sun, we have appointed Ms. Chan, an associate of both The Hong Kong Chartered Governance Institute and The Chartered Governance Institute in the United Kingdom, who is qualified under Rule 3.28 of the Listing Rules, to act as the other joint company secretary to closely work with and provide support to Dr. Sun during the Waiver Period so as to enable Dr. Sun to acquire the relevant experience (as required under Note 2 to Rule 3.28 of the Listing Rules) to duly discharge her duties as a company secretary of a listed issuer.

Accordingly, we have applied to the Stock Exchange for[, and the Stock Exchange has granted us,] a waiver from strict compliance with the requirements under Rules 3.28 and 8.17 of the Listing Rules in relation to the appointment of Dr. Sun as our joint company secretary on the condition that Dr. Sun will be assisted by Ms. Chan as our joint company secretary throughout the Waiver Period. Being a senior manager of Entity Solutions at Computershare Hong Kong Investor Services Limited and by virtue of her experience in corporate secretarial practice and administration management, Ms. Chan is, in our Directors’ opinion, a qualified and suitable person to render assistance to Dr. Sun so as to enable her to acquire the relevant experience (as required under Note 2 to Rule 3.28 of the Listing Rules) to duly discharge her duties. In addition, Dr. Sun will comply with the annual professional training requirement under Rule 3.29 of the Listing Rules and will enhance her knowledge of the Listing Rules during the Waiver Period. Our Company will further ensure that Dr. Sun has access to the relevant training and support that would enhance her understanding of the Listing Rules and the duties of a company secretary of an issuer listed on the Stock Exchange.

Such waiver will be revoked immediately if and when Ms. Chan ceases to provide such assistance or our Company commits any material breaches of the Listing Rules during the Waiver Period. Before the expiry of such Waiver Period, we will liaise with the Stock Exchange

**WAIVERS FROM STRICT COMPLIANCE WITH THE REQUIREMENTS
UNDER THE LISTING RULES AND EXEMPTION FROM THE COMPANIES
(WINDING UP AND MISCELLANEOUS PROVISIONS) ORDINANCE**

to enable it to assess the then experience of Dr. Sun, having had the benefit of Ms. Chan's assistance for three years, will have acquired the relevant experience within the meaning of Rule 3.28 of the Listing Rules so that a further waiver will not be necessary.

See "Directors and Senior Management" in this document for the biographical information of Dr. Sun and Ms. Chan.

EXEMPTION FROM STRICT COMPLIANCE WITH SECTION 342(1) OF THE COMPANIES (WINDING UP AND MISCELLANEOUS PROVISIONS) ORDINANCE IN RELATION TO PARAGRAPH 27 OF PART I AND PARAGRAPH 31 OF PART II OF THE THIRD SCHEDULE TO THE COMPANIES (WINDING UP AND MISCELLANEOUS PROVISIONS) ORDINANCE

According to section 342(1)(b) of the Companies (Winding Up and Miscellaneous Provisions) Ordinance, this document shall include the matters specified in Part I of the Third Schedule thereto and the reports specified in Part II of the Third Schedule thereto.

According to paragraph 27 of Part I of the Third Schedule to the Companies (Winding Up and Miscellaneous Provisions) Ordinance, our Company is required to include in this document a statement as to the gross trading income or sales turnover (as the case may be) of our Company during each of the three financial years immediately preceding the issue of this document as well as an explanation of the method used for the computation of such income or turnover and a reasonable breakdown of the more important trading activities.

According to paragraph 31 of Part II of the Third Schedule to the Companies (Winding Up and Miscellaneous Provisions) Ordinance, our Company is required to include in this document a report prepared by our Company's auditor with respect to the profits and losses of our Company in respect of each of the three financial years immediately preceding the issue of this document and the assets and liabilities of our Company at the last date to which the financial statements were prepared.

According to section 342A(1) of the Companies (Winding Up and Miscellaneous Provisions) Ordinance, the SFC may issue, subject to such conditions (if any) as the SFC thinks fit, a certificate of exemption from strict compliance with the relevant requirements under the Companies (Winding Up and Miscellaneous Provisions) Ordinance if, having regard to the circumstances, the SFC considers that the exemption will not prejudice the interest of the investing public and compliance with any or all of such requirements would be irrelevant or unduly burdensome, or is otherwise unnecessary or inappropriate.

According to Rule 4.04(1) of the Listing Rules, the Accountants' Report contained in this document must include, among others, the results of our Company in respect of each of the three financial years immediately preceding the issue of this document or such shorter period as may be acceptable to the Stock Exchange.

According to Rule 18A.06 of the Listing Rules, an eligible biotech company shall comply with Rule 4.04 of the Listing Rules modified so that references to "three financial years" or "three years" in that rule shall instead refer to "two financial years" or "two years," as the case may be.

Accordingly, we have applied to the SFC for a certificate of exemption from strict compliance with the requirements under section 342(1) of the Companies (Winding Up and Miscellaneous Provisions) Ordinance in relation to paragraph 27 of Part I and paragraph 31 of Part II of the Third Schedule to the Companies (Winding Up and Miscellaneous Provisions) Ordinance on the following grounds:

- (a) our Company is primarily engaged in development and commercialization of innovative ophthalmic treatments, and falls within the scope of biotech company as defined under Chapter 18A of the Listing Rules;
- (b) the Accountants' Report for each of the financial year ended December 31, 2024 and 2025 [has been] disclosed in the document of the Company and is set out in Appendix I to this document in accordance with Rule 18A.06 of the Listing Rules;

**WAIVERS FROM STRICT COMPLIANCE WITH THE REQUIREMENTS
UNDER THE LISTING RULES AND EXEMPTION FROM THE COMPANIES
(WINDING UP AND MISCELLANEOUS PROVISIONS) ORDINANCE**

- (c) notwithstanding that the financial results set out in this document are only for the two years ended December 31, 2024 and 2025 in accordance with Chapter 18A of the Listing Rules, other information required to be disclosed under the Listing Rules and the Companies (Winding Up and Miscellaneous Provisions) Ordinance has been adequately disclosed in this document pursuant to the relevant requirements;
- (d) given that Chapter 18A of the Listing Rules provides that the minimum track record period for biotech companies in terms of financial disclosure is two years, strict compliance with the requirements of section 342(1) of the Companies (Winding Up and Miscellaneous Provisions) Ordinance and paragraph 27 of Part I and paragraph 31 of Part II of the Third Schedule to the Companies (Winding Up and Miscellaneous Provisions) Ordinance would be unduly burdensome for our Company as this would require additional work to be performed by us and our reporting accountants; and
- (e) our Directors are of the view that the Accountants' Report covering the two years ended December 31, 2024 and 2025, together with other disclosures in this document, has already provided the potential investors with adequate and reasonably up-to-date information in the circumstances to form a view on the track record of our Company, and our Directors confirm that all information which is necessary for the investing public to make an informed assessment of our Group's business, assets and liabilities, financial position, trading position, management and prospects has been included in this document. Therefore, the exemption would not prejudice the interest of the investing public.

The SFC [has granted] a certificate of exemption under section 342A of the Companies (Winding Up and Miscellaneous Provisions) Ordinance exempting our Company from strict compliance with section 342(1)(b) in relation to paragraph 27 of Part I and paragraph 31 of Part II of the Third Schedule to the Companies (Winding Up and Miscellaneous Provisions) Ordinance on the condition that particulars of the exemption are set out in this document and that this document will be issued on or before [●].

INDUSTRY OVERVIEW

Certain information and statistics set out in this section have been extracted from various official government publications, market data providers and a report commissioned by us and prepared by an independent third party, Frost & Sullivan. The information from official government sources has not been independently verified by us, the Sole Sponsor, [REDACTED] or any of their respective directors, officers, employees, advisers or agents or any other parties involved in the [REDACTED], and no representation is given as to its accuracy, fairness and completeness.

OVERVIEW OF GLOBAL AND CHINA’S OPHTHALMIC DRUG MARKET

Ophthalmic drugs are pharmaceutical products used for the prevention, diagnosis and treatment of diseases affecting the eye and its associated structures, including the cornea, iris, lens, vitreous body, retina, eyelids, conjunctiva and lacrimal glands. These drugs are intended to relieve ocular discomfort, reduce inflammation, regulate intraocular pressure, improve visual function or delay and reverse pathological progression, thereby maintaining and promoting overall ocular health. The following table sets forth the classification of ophthalmic drugs.

Source: Literature review, Frost & Sullivan report

In 2024, the global ophthalmic drug market was estimated at US\$41.6 billion and is projected to reach US\$47.7 billion by 2029, representing a CAGR of 2.8% from 2024 to 2029. This expansion is driven primarily by aging populations, rising prevalence of ophthalmic diseases and broader insurance coverage, which together increase treatment demand. From 2029 to 2034, the market is projected to grow further to US\$62.5 billion, representing a CAGR of 5.5%. Market growth over this period is expected to result primarily from cutting-edge technological advances and increased cross-border mergers and acquisitions among ophthalmology-focused pharmaceutical and life sciences companies, further enlarging and globalizing the market. Overall, the industry is transitioning from pandemic-driven, short-term expansion to more stable, medium-term growth led by demographic and access factors, as well as innovation and globalization.

Driven by the growing development of innovative drugs, the ophthalmic drug market in China grew rapidly from US\$2.7 billion in 2020 to US\$4.1 billion in 2024, at a CAGR of 10.8%. The market is estimated to grow to US\$6.6 billion in 2029, at a CAGR of 10.0% from 2024 to 2029 and to maintain strong growth momentum, reaching US\$11.5 billion by 2034, at a CAGR of 11.7% from 2029 to 2034. The following chart sets forth the historical and estimated ophthalmic drug market for the periods indicated.

INDUSTRY OVERVIEW

Global Ophthalmic Drug Market, 2020-2034E

Source: Frost & Sullivan report (based on annual reports of relevant companies, literature review and expert interviews)

Market Drivers and Future Trends

- Aging population and expanding disease burden.** China’s aging population is driving a sustained increase in age-related ophthalmic conditions, such as lacrimal gland hypofunction and meibomian gland dysfunction, while intensive electronic device use and high myopia prevalence are contributing to earlier-onset ocular surface disease. For elderly patients, good visual function is critical to maintaining independence and dignity in daily life, and symptoms such as dry eye–related asthenopia and blurred vision can significantly erode quality of life. This broadens the overall patient base and highlights structurally rising demand for effective therapeutic eye drops.
- Therapeutic innovation and new treatment paradigms.** Continuous advances in ophthalmic therapies, including gene therapy and high-potency small-molecule delivery, are enhancing efficacy, safety and dosing convenience. NSAIDs are emerging as differentiated solutions for chronic inflammatory ophthalmic diseases, offering lower local side effects than steroids and greater suitability for long-term use, with next-generation dual-target molecules further enhancing efficacy and duration of action and expected to reshape future standards of care.
- Shift toward high-concentration and high-efficiency formulations.** Modern eye-drop development is increasingly focused on high-concentration, high-efficiency formulations that overcome the eye’s limited fluid retention capacity. Optimized solubility, stability and tolerability enable effective drug penetration and sustained therapeutic effect within minimal instilled volumes, improving both clinical outcomes and patient adherence.
- Supportive policy environment and global expansion.** Ongoing optimization of China’s medical-insurance policies, including dynamic National Reimbursement Drug List updates, value-based pricing and multi-drug competition, is improving affordability and access to innovative ophthalmic drugs and supporting long-term management of chronic eye diseases. At the same time, leading Chinese ophthalmic companies are accelerating global expansion through parallel trials in major markets, overseas regulatory approvals and cross-border partnerships, which together enhance research and development capabilities, international brand recognition and the worldwide availability of innovative therapies.

INDUSTRY OVERVIEW

Entry Barriers

- *Technical barriers.* The ophthalmic drug market presents exceptionally high entry barriers, primarily due to the eye’s unique anatomy and physiological barriers. Unlike other therapeutic areas, drug development for ocular conditions must overcome natural obstacles such as the corneal barrier and the blood-retinal barrier. This demands molecules with specific molecular weight, solubility and lipophilicity, together with precise targeting of intraocular sites. These highly specialized requirements lengthen development timelines, raise costs and impose stringent standards on formulation design and drug-delivery systems.
- *Capital, talent and channel barriers.* In parallel, the need for sustained high investment and scarce specialized personnel makes it difficult for small and medium-sized enterprises to advance seamlessly from lead compounds to post-marketing real-world evidence. Hospital ophthalmology departments account for the majority of prescriptions, and physicians place heavy emphasis on safety and established brand data; newcomers must therefore undertake lengthy academic promotion, case accumulation and reimbursement negotiations. Coupled with limited market size per individual product and high specialized marketing costs, the break-even point is pushed upward, creating a formidable threshold for market entry.

OCULAR INFLAMMATION

Ocular inflammation refers to inflammatory manifestations such as redness, swelling, pain, increased discharge and visual impairment that occur in the eyeball and its accessory tissues due to infection, allergy, immune response or other stimulating factors, including graft rejection after corneal or ocular surface transplantation. The following table sets forth the main clinical types of ocular inflammation.

Classification	Explanation
Uveitis	Uveitis is inflammation of the eye’s middle layer. It is classified by the affected anatomical segment into anterior uveitis, intermediate uveitis, posterior uveitis and panuveitis. This classification aids precise diagnosis and personalized treatment. In children, uveitis often presents insidiously or chronically. Acute anterior uveitis is especially common in those under 16 and can cause permanent vision loss if untreated. Posterior uveitis involves the choroid, retina and vitreous, typically causing blurred vision, flashes or visual field defects, and is a major cause of visual impairment. Panuveitis, the most severe form, affects the entire uvea and adjacent structures, requiring comprehensive systemic therapy.
Conjunctivitis	Conjunctivitis is inflammation of the conjunctiva covering the eye surface and inner eyelids, presenting with redness, increased discharge, itching or mild pain. Common causes include allergens, bacteria, viruses and immune-mediated inflammation. Allergens, especially pollen and dust in spring, are a prominent trigger of seasonal allergic conjunctivitis.
Keratitis	Keratitis is inflammation of the cornea, the eye’s transparent front tissue, causing reduced vision, eye pain, photophobia and corneal opacity or ulceration. It is classified by cause into infectious (bacterial, viral, fungal and other pathogens) and non-infectious (immune-mediated or exposure-related) types.
Scleritis	Scleritis is inflammation of the sclera, the tough outer layer of the eye, presenting with deep red eye, pain and visual loss. It is classified according to location and pathological features into anterior scleritis, posterior scleritis and the more severe necrotizing scleritis.
Postoperative ocular inflammation	Postoperative ocular inflammation is a common complication after eye surgeries (such as cataract, refractive or vitrectomy procedures) and can affect the conjunctiva, cornea, sclera, uvea or other intraocular structures. Clinical manifestations include conjunctival hyperemia, corneal edema, localized scleral exudation and purulent accumulation in the anterior chamber or vitreous. Infectious cases are most often caused by <i>Staphylococcus aureus</i> from the eyelid, surgical instruments or intraocular lenses, while non-infectious inflammation is usually related to surgical trauma, residual drugs or immune reactions.
Sjögren’s syndrome–related dry eye (SS-DED)	SS-DED is an autoimmune-mediated chronic ocular surface disease characterized by lacrimal gland deficiency. Its core mechanism involves lymphocytic infiltration of the lacrimal glands, leading to reduced tear secretion and a self-perpetuating cycle of ocular surface inflammation, which can ultimately result in permanent damage to the lacrimal glands and the corneal and conjunctival tissues.

INDUSTRY OVERVIEW

Non-Infectious Anterior Uveitis

Uveitis is generally classified based on etiology (infectious vs. non-infectious) and anatomical location (anterior vs. posterior). Non-infectious anterior uveitis (NIAU) is a subtype of uveitis characterized by immune-mediated inflammation in the anterior chamber in the absence of an infectious pathogen. It involves inflammation of the iris and ciliary body and is often associated with autoimmune disorders and metabolic diseases including spondyloarthritis. NIAU may present acutely with red eye, pain, photophobia and blurred vision and can lead to permanent vision loss through secondary glaucoma, cataract or optic nerve damage. The following chart illustrates the position of NIAU within the overall classification of uveitis.

Source: Literature review, Frost & Sullivan report

The global NIAU population increased from 31.5 million in 2020 to 32.9 million in 2024, primarily driven by the rising prevalence of immune-mediated and systemic inflammatory diseases, as well as improved clinical diagnosis. Looking ahead, the global NIAU population is expected to grow steadily to 34.6 million in 2029 and 36.3 million in 2034. In China, the NIAU patient population grew from 2.8 million in 2020 to 2.9 million in 2024 and is expected to reach approximately 3.0 million by 2034.

The global NIAU drug market increased from US\$1,506.4 million in 2020 to US\$1,798.2 million in 2024, with a CAGR of 4.5%. Underpinned by the growing NIAU patient population and expanding use of long-term pharmacological treatment, the market is expected to grow to US\$2,605.9 million in 2029 and US\$3,803.6 million in 2034, further driven by the adoption of higher-value therapies. In China, the NIAU drug market grew from US\$122.9 million in 2020 to US\$177.6 million in 2024, representing a CAGR of 9.6%. It is projected to reach US\$362.0 million in 2029 and US\$700.4 million in 2034, as the expanding patient base, improving diagnosis rates and rising treatment penetration translate into increasing demand for pharmacological interventions, including higher-value therapeutic options. The following chart sets forth the historical and estimated NIAU drug market for the periods indicated.

INDUSTRY OVERVIEW

Global Non-Infectious Anterior Uveitis Drug Market, 2020-2034E

Source: Frost & Sullivan report (based on annual reports of relevant companies, literature review and expert interviews)

Treatment Paradigm

Current treatments for NIAU primarily aim at controlling inflammation and suppressing the underlying autoimmune response. For mild-to-moderate unilateral inflammation, potent topical glucocorticoids, such as fluorometholone or prednisolone acetate, are preferred, accompanied by the immediate use of cycloplegics, such as atropine or cyclopentolate, to prevent posterior synechiae. Upon symptom improvement, the dosage should be tapered gradually every three to seven days while closely monitoring for steroid-induced intraocular pressure elevation. If local therapy proves ineffective or inflammation recurs, the second step involves peribulbar glucocorticoid injections or intraocular implants, although caution is advised in children and adolescents due to potential complications. When patients present with severe bilateral inflammation, retinal involvement, persistent steroid dependence exceeding two to three months, or systemic disease, systemic therapy is initiated as the third step. This includes systemic glucocorticoids, immunosuppressants such as methotrexate, mycophenolate mofetil or cyclosporine, and biologics like adalimumab or infliximab; the core principle being that immunosuppressants should be introduced if inflammation recurs during steroid tapering. For refractory cases or patients intolerant to traditional immunosuppressants, anti-TNF- α monoclonal antibodies should be prioritized due to their robust safety and efficacy data.

The etiology of NIAU typically involves autoimmune or other inflammatory mechanisms, such as autoimmune diseases or post-traumatic immune responses. As no pathogens like bacteria or viruses are involved, antibiotics cannot suppress or eliminate the inflammation in NIAU, providing no benefit for disease control and may delay the initiation of appropriate treatment. Clinical observations have shown that antibiotics are overprescribed in the management of NIAU, often due to limited clinical experience or misdiagnosis of the condition as infectious. This leads to unnecessary use of medical resources and contributes to the potential development of antibiotic resistance.

Corticosteroids are generally effective in the management of inflammation in NIAU but are associated with well-recognized safety concerns, including corticosteroid-induced glaucoma and cataract formation with longer-term use. While alternative corticosteroid formulations, immunosuppressants and biologics have been developed and approved for NIAU, their use is limited by serious systemic adverse toxic effects, high cost, administration burden and limited long term safety data. There is a clear need for an effective anti-inflammatory therapy for NIAU that maintains robust inflammation control without corticosteroid-like adverse events associated with existing standard treatments.

INDUSTRY OVERVIEW

Competitive Landscape

As of the Latest Practicable Date, no innovative drug had been approved for the treatment of NIAU and there were three active innovative drug candidates at Phase II or beyond being developed for the treatment of NIAU outside China. The following table sets forth details of active innovative drug candidates at Phase II or beyond for NIAU outside China as of the Latest Practicable Date.

Drug Name/Code	Target	Company	Stage	First Post Time
TRS01	TLR4/NRP1/ACE2	Tarsier Pharma	Phase III	2021/9
Brepocitinib	JAK1/TYK2	Priovant Therapeutics	Phase III	2024/5
ABY-035	IL17A	Acelyrin	Phase II	2021/1

Postoperative Ocular Inflammation

Postoperative ocular inflammation refers to the intraocular inflammatory response that occurs during or following ophthalmic surgical procedures such as cataract extraction, glaucoma surgery, corneal transplantation and vitrectomy. This response is primarily triggered by factors such as tissue trauma, surgical instruments, exposure to medications or reactions to implanted devices. Clinically, postoperative ocular inflammation may manifest as increased anterior chamber cells and flare, corneal edema and conjunctival hyperemia.

Postoperative ocular inflammation is broadly classified into infectious and non-infectious forms. Infectious postoperative ocular inflammation results from direct pathogen invasion into the eye, causing inflammation of the anterior chamber, vitreous or retina. Clinical manifestations typically include severe ocular pain, rapid visual deterioration and presence of pus in the anterior chamber. In contrast, non-infectious postoperative ocular inflammation arises in the absence of pathogens and is associated with surgical trauma, drug irritation, residual implant material or immune-mediated responses. Clinical presentation can range from mild to severe and commonly include increase in anterior chamber cells, keratic precipitates or fibrinous exudates.

Within non-infectious postoperative ocular inflammation, cataract postoperative ocular inflammation is of particular clinical importance due to its high incidence and its potential to delay or compromise visual rehabilitation. This localized inflammatory response may occur following cataract extraction and intraocular lens implantation. The severity of the inflammation ranges from mild to severe. In severe cases, visual recovery can be impaired.

The global postoperative ocular inflammation patient population increased from 32.0 thousand in 2020 to 35.8 thousand in 2024. This expansion was primarily driven by rising ophthalmic surgery volumes, particularly cataract and refractive procedures. The affected population is expected to reach 41.2 thousand in 2029 and 47.2 thousand in 2034. In line with this epidemiological trend, the global postoperative ocular inflammation drug market grew from US\$1,129.8 million in 2020 to US\$1,295.5 million in 2024, with a CAGR of 3.5%.

INDUSTRY OVERVIEW

Supported by both increasing surgical volumes and the rising adoption of pharmacological management for postoperative ocular inflammation, the market is projected to reach US\$2,396.1 million in 2029 and US\$3,861.4 million in 2034. The following chart sets forth the historical and estimated postoperative ocular inflammation market for the periods indicated.

Global Postoperative Ocular Inflammation Drug Market, 2020-2034E

Source: Frost & Sullivan report (based on annual reports of relevant companies, literature review and expert interviews)

Treatment Paradigm

Treatment of postoperative ocular inflammation adheres to the core principle of “early prevention, early intervention, early tapering.” Prevailing clinical practice guidelines recommend a stepwise approach based on the severity of inflammation, with treatments primarily centered on steroid therapies. For most cases, tobramycin/dexamethasone, a combination antibiotic and steroid eye drop, is typically favored and widely used to control early postoperative inflammatory responses. For mild-to-moderate inflammation, such regimen is often combined with NSAID eye drops to enhance anti-inflammatory effects and inhibit specific complications, such as posterior capsule opacification. If patients are allergic to NSAIDs or if inflammation escalates, transition to stronger glucocorticoid therapy becomes necessary. For moderate-to-severe inflammation, such as that following certain surgical complications or refractive surgeries, treatment escalates to more potent anti-inflammatory eye drops, such as fluorometholone or prednisolone. However, these drugs may irritate the corneal epithelium and require close monitoring of intraocular pressure during use to prevent steroid-induced glaucoma. In the most challenging scenarios, such as severe persistent inflammation following vitreoretinal surgery or in patients intolerant to local steroids, treatment may expand to systemic oral glucocorticoids (*e.g.*, prednisone) or more invasive local injections, such as direct intravitreal injection of dexamethasone sustained-release preparations, to achieve high local drug concentrations.

While steroid therapy remains the cornerstone of current postoperative ocular inflammation management, significant shortcomings and unmet clinical needs persist. Accordingly, there is an urgent clinical need to develop new therapeutic strategies that are safer, have fewer side effects, require less frequent dosing, and can precisely modulate inflammation, thereby addressing the gaps in long-term safety, patient convenience, and personalized treatment associated with traditional steroid therapy.

INDUSTRY OVERVIEW

Competitive Landscape

As of the Latest Practicable Date, there were three innovative drugs approved for the treatment of postoperative ocular inflammation and four active innovative drug candidates at clinical stage outside China. The following table sets forth details of approved and active innovative drug candidates at clinical stage for the treatment of postoperative ocular inflammation outside of China as of the Latest Practicable Date.

Drug Name/Code	Target	Company	Stage	First Post Time
EYP-1902	ANXA1/GR/NR112/iNOS/NR0B1	Eyepoint Pharms	Approved	2018/02

Sjögren’s Syndrome–Related DED

SS-DED is a chronic, autoimmune-driven form of dry eye that occurs in the setting of Sjögren’s syndrome. This condition is defined not merely by reduced tear volume, but specifically as a classic manifestation of aqueous-deficient dry eye, wherein autoimmune-mediated inflammation targets the lacrimal glands. This immune attack leads to compromised lacrimal gland function, significantly diminished tear production and a shortened tear breakup time. Clinically, patients experience symptoms such as blurred vision, ocular discomfort and corneal epithelial damage, often accompanied by corneal staining positivity and elevated tear film osmolarity. SS-DED can be classified according to the presence or absence of concomitant systemic autoimmune diseases, differentiating primary SS-DED (pSS-DED) from secondary SS-DED (sSS-DED).

pSS-DED occurs in patients with primary Sjögren’s syndrome (pSS). pSS is characterized by dry eye and dry mouth (with dry eye being its most prominent ophthalmic manifestation) as the patient’s primary or sole symptoms, without any known systemic autoimmune disease. pSS-DED typically presents as severe tear deficiency, accompanied by significant ocular surface inflammation and a high rate of corneal staining positivity, which may progress to corneal erosion or even ulceration.

sSS-DED occurs in patients diagnosed with secondary Sjögren’s syndrome (sSS). Unlike pSS, sSS patients also suffer from other systemic autoimmune diseases such as rheumatoid arthritis, systemic lupus erythematosus, or systemic sclerosis. The immune dysregulation associated with these underlying conditions often exacerbates damage to the lacrimal glands, leading to the manifestation of dry eye symptoms. Clinically, the management of sSS-DED typically requires a comprehensive approach that not only addresses ocular surface health but also actively controls the activity of the underlying systemic disease.

In China, the patient population grew from 109.8 million in 2020 to 112.6 million in 2024 and is expected to reach approximately 119.0 million by 2034. As of the Latest Practicable Date, no innovative drug had been approved for the treatment of SS-DED in China and there was no clinical-stage SS-DED drug candidate. However, with further research on immune system diseases and dry eye treatment, the SS-DED drug market in China is projected to reach US\$305.9 million in 2034. The following chart sets forth the historical and estimated SS-DED drug market for the periods indicated.

INDUSTRY OVERVIEW

Sjögren’s Syndrome Dry Eye Drug Market, 2020-2034E

Source: Frost & Sullivan report (based on annual reports of relevant companies, literature review and expert interviews)

Treatment Paradigm

Sjögren syndrome (SS) is a systemic autoimmune disease characterized primarily by infiltration of immune cells, destruction of various exocrine glands and impairment of the functions of other organs. When the disease involves the eyes, it can lead to symptoms such as xerophthalmia, photophobia and ocular discomfort. At present, the pathogenesis of SS-DED is not fully understood, and there is no unified standard for its diagnosis and treatment. No radical cure has yet been identified. The treatment goals of SS focus on controlling disease progression, relieving symptoms and reducing complications. The table below sets forth the treatments recommended by prevailing clinical practice guidelines for SS-DED.

Category	Representative Drugs	Description
Artificial tears	Sodium hyaluronate-based formulations, preservative-free options	The first-line treatment for dry eye disease, acting as a substitute for natural tears. Improves tear film stability, reduces evaporation, lubricates the ocular surface, and alleviates discomfort. Sodium hyaluronate varieties also promote epithelial repair. Preservative-containing products may exacerbate ocular surface damage, so preservative-free formulations are preferred for long-term/high-frequency use.
Anti-inflammatory therapies	NSAIDs, glucocorticoids	Target the inflammatory component underlying dry eye pathogenesis, particularly indicated for moderate-to-severe cases. Glucocorticoids require strict control of treatment duration and dosage, with close monitoring for elevated intraocular pressure and epithelial damage.
Adjunctive physical and surgical interventions	Humidifier use, moisture chamber goggles, punctal occlusion	Environmental adjustments, such as increased humidity, and moisture-retaining eyewear help reduce tear evaporation. Punctal occlusion (temporary or permanent) is an option for patients with severe lacrimal gland dysfunction to conserve existing tear volume.

Source: Literature review, Frost & Sullivan report

Despite corticosteroids’ rapid anti-inflammatory effects on SS-DED, critical limitations impair long-term use. Prolonged topical application risks ocular complications such as elevated intraocular pressure and cataract formation, while systemic use causes hyperglycemia and immunosuppression. Moreover, corticosteroids provide only symptomatic relief without addressing the disease’s root cause, highlighting the urgent need for targeted disease-modifying alternatives.

INDUSTRY OVERVIEW

DRY EYE DISEASE

Dry eye disease (DED) is a multifactorial, chronic ocular surface disorder, characterized by abnormalities in tear film quality, quantity or dynamics, resulting in tear film instability combined with ocular surface microinflammation. Its core pathophysiology can be summarized as tear deficiency combined with excessive evaporation, with a range of etiologies contributing to this process. Reduced tear production is commonly associated with advanced age, collagen-vascular disease and meibomian gland dysfunction, while increased tear evaporation is often linked to intensive use of video display terminals, contact lens wear and prolonged exposure to air-conditioned or otherwise desiccating environments. These abnormalities in the tear film lead to disruption of the ocular surface microenvironment, which may be accompanied by ocular surface inflammation, tissue damage and neurosensory dysfunction. In parallel, ocular surface microinflammation, driven in part by Th17 cells and a proinflammatory cytokine milieu, further destabilizes the tear film and perpetuates a chronic inflammatory cycle. Clinically, DED manifests as ocular discomfort and visual disturbances, with patients typically presenting with dryness, burning, redness, foreign-body sensation and asthenopia. These symptoms may be accompanied by intermittent reflex tearing and the presence of mucoid strands on awakening. On slit-lamp examination, characteristic signs include a reduced tear meniscus, punctate corneal epithelial staining, plugged meibomian gland orifices and a shortened tear film break-up time. In more advanced disease, filamentary keratitis and frank corneal epithelial defects may be observed, reflecting significant compromise of the ocular surface. The chart below illustrates the classification of DED.

Source: Literature review, Frost & Sullivan report

Globally, the number of patients with DED increased from 1,577.4 million in 2020 to 1,645.5 million in 2024. It is estimated that the global DED population will reach approximately 1,731.5 million in 2029 and 1,814.8 million in 2034. The number of DED patients in China increased from 353.0 million in 2020 to 359.2 million in 2024 and is projected to reach approximately 365.6 million in 2029 and 372.1 million in 2034. Current epidemiological studies in China report a relatively high prevalence of dry eye, generally in the range of about 21.0% to 52.4%.

The global DED drug market expanded from US\$5,322.6 million in 2020 to US\$6,614.3 million in 2024, with a CAGR of 5.6%, driven by the rising prevalence of dry eye disease, increasing patient awareness, and broader adoption of long-term pharmacological treatments. The market is expected to continue growing to US\$7,583.9 million in 2029 and US\$9,930.5 million in 2034, supported by sustained demand for chronic disease management. In China, the DED drug market grew from US\$434.2 million in 2020 to US\$653.4 million in 2024, with a CAGR of 10.8%, significantly outpacing global growth. The market is projected to reach US\$1,053.5 million in 2029 and US\$1,828.5 million in 2034, driven by rapid diagnosis rate improvement, increasing treatment penetration and the gradual shift from symptomatic management to prescription drug therapies. The following chart sets forth the historical and estimated DED drug market for the periods indicated.

INDUSTRY OVERVIEW

Global Dry Eye Disease Drug Market, 2020-2034E

Source: Frost & Sullivan report (based on annual reports of relevant companies, literature review and expert interviews)

Treatment Paradigm

The existing treatment paradigm for DED is based on individualized, stepwise management guided by the “etiology–type–severity” principle. Severity is graded as mild, moderate, or severe according to the extent of corneal damage and tear film stability, and conditions that mimic DED, such as blepharitis and asthenopia, must be ruled out. In mild DED, treatment focuses on removing exacerbating factors and using artificial tears, with lipid-rich formulations when meibomian gland dysfunction is present, together with warm compresses and lid hygiene. In moderate DED, management is escalated to preservative-free artificial tears and night-time gels or ointments, with consideration of topical corticosteroids, cyclosporine or NSAIDs, oral tetracyclines, punctal plugs, moisture chamber spectacles and intense pulsed light therapy. In severe DED, treatment involves long-term anti-inflammatory therapy, oral secretagogues, autologous serum eye drops and scleral lenses, with additional options where needed including punctal occlusion, amniotic membrane transplantation, tarsorrhaphy or salivary gland transplantation. The table below sets forth the treatments recommended by prevailing clinical practice guidelines for DED.

Category	Description
Artificial tears	Mainly aqueous and lipid-based artificial tears. For long-term or high-frequency use (≥6 times/day), preservative-free or low toxicity preservative formulations are preferred.
Ocular secretagogues	3% diquafosol sodium eye drops are used to stimulate conjunctival water and mucin secretion to stabilize the tear film and repair the cornea, while varenicline nasal sprays (0.03 mg/spray) are used to activate nasal parasympathetic pathways, enhance lacrimal and meibomian gland secretion and increase natural tear production.
Ocular anti-inflammatory agents	The ocular anti-inflammatory “triad”—comprising short-term low-dose steroids, immunosuppressants led by CsA/lifitegrast, and NSAIDs—can be used alone or in combination to provide stepwise control of dry-eye inflammation.
Ocular surface-repair promoters	Severe cases may require autologous/allogeneic serum or deproteinized calf blood gel while mild cases are treated with fibroblast growth factor/epidermal growth factor/vitamin A eye drops to promote epithelial healing.
Topical or systemic antibiotics	Bacterial lid margin infections are typically treated with topical ofloxacin drops/ointment, while refractory cases or those with systemic involvement are treated with oral tetracyclines or macrolides, with close monitoring for adverse effects.
Other ocular medications	Perfluorohexyloctane supplements lipids (the oily layer of the tear film), stabilizes the tear film and helps unblock meibomian glands, while antioxidant and siRNA drops nearing launch in Europe and the US will add new therapeutic options.

Source: Literature review, Frost & Sullivan report

INDUSTRY OVERVIEW

Though topical corticosteroids are occasionally used for severe DED, they have distinct unaddressed limitations. Prolonged topical administration leads to adverse effects including elevated intraocular pressure, cataract formation and ocular surface damage. Furthermore, steroids only offer temporary symptomatic relief without targeting the disease’s underlying mechanisms, failing to maintain sustained remission after withdrawal and underscoring the urgent need for targeted, safer steroid-sparing alternatives for long-term management.

Competitive Landscape

As of the Latest Practicable Date, there were four innovative drugs approved for the treatment of DED and 26 active innovative drug candidates at Phase II or beyond being developed for the treatment of DED outside China. The following table sets forth details of approved and active clinical-stage innovative drugs at Phase II or beyond for the treatment of DED outside China as of the Latest Practicable Date.

Drug Name/Code	Target	Company	Stage	First Post Time

NEUROTROPHIC KERATITIS

Neurotrophic keratitis (NK) is a degenerative corneal disease caused by damage to, or dysfunction of, the ophthalmic branch of the trigeminal nerve, resulting in markedly reduced or absent corneal sensation. Loss of sensory input and trophic support impairs corneal epithelial healing and regeneration, leading to persistent epithelial defects, ulcers, stromal melting or even perforation, and may threaten vision if untreated.

NK begins with trigeminal nerve injury, leading to reduced corneal sensation and loss of neurotrophic support. This in turn impairs epithelial healing and diminishes protective reflexes, so that minor injuries evolve into persistent epithelial defects. These defects can then progress to ulceration, stromal melt and perforation, ultimately increasing the risk of vision-threatening outcomes. The chart below illustrates the different stages in the progression of NK.

Source: Literature review, Frost & Sullivan report

INDUSTRY OVERVIEW

In China, the patient population increased from 353.0 thousand in 2020 to 359.2 thousand in 2024, and is projected to reach 372.1 thousand by 2034. Stable growth reflects limited changes in risk factor prevalence and relatively low diagnosis rates.

In China, the NK drug market increased from US\$55.2 million in 2020 to US\$226.6 million in 2024, at a CAGR of 42.3%. Driven by improved diagnosis rates, policy support for ophthalmic innovation and growing treatment penetration in hospitals, it is projected to reach US\$716.0 million in 2029 and US\$1,576.1 million in 2034. The following chart sets forth the historical and estimated NK drug market in China for the periods indicated.

Neurotrophic Keratitis Drug Market in China, 2020-2034E

Source: Frost & Sullivan report (based on annual reports of relevant companies, literature review and expert interviews)

Treatment Paradigm

NK arises from diverse etiologies, including herpes virus infection, chronic use of topical anesthetics or other prolonged topical medications, iatrogenic nerve injury from refractive or cataract surgery, metabolic diseases such as diabetes, and congenital neurological abnormalities. Current management follows a staged, severity-based approach, with treatment goals evolving from corneal protection and epithelial healing in early disease to preservation of corneal integrity and visual function in advanced stages. The table below sets forth the main treatment categories for NK, as recommended by prevailing clinical practice guidelines.

INDUSTRY OVERVIEW

Stage	Drug Category	Description
Stage 1	Artificial tears	Preservative-free artificial-tear drops or ointment to protect epithelium and prevent ocular surface drying.
Stage 2	Biologic repair	20-50 % autologous serum eye drops or deproteinized calf-blood extract eye gel to enhance epithelial healing.
	Antibiotic	Topical antibiotic ointment used for patching to prevent secondary infection.
	Anti-inflammatory	Low- to medium-potency corticosteroid eye drops to reduce inflammation and accelerate healing.
	Cenegermin	A topical ophthalmic solution used for the treatment of moderate to severe NK. It exerts its therapeutic effect by providing exogenous nerve growth factor (NGF).
Stage 3	Biologic repair	Frequent administration of autologous serum eye drops to control stromal inflammation and aid healing.
	Anti-inflammatory / Lubricant	Scleral lenses combined with lubricants to protect cornea and inhibit corneal melting.
	Biologic scaffold	Multilayer amniotic membrane to provide mechanical protection and support tissue healing.
Novel	Neurotrophic factor	Nerve growth factor (NGF) eye drops to restore nerve function and accelerate healing.
	Nerve graft	Frontalis or contralateral nerve branch transposition to re-establish corneal innervation.

Source: Literature review, Frost & Sullivan report

Although corticosteroids are sometimes used off-label for NK, they have critical unaddressed limitations. Long-term topical use can cause adverse effects including elevated intraocular pressure, cataract formation and impaired corneal epithelial healing. Moreover, steroids do not address the core disease mechanism, namely trigeminal nerve dysfunction and corneal hypoesthesia, and instead provide only transient anti-inflammatory effects without sustaining corneal integrity, highlighting the urgent need for targeted, safer steroid-sparing therapies for long-term management.

Competitive Landscape

As of the Latest Practicable Date, there was one innovative drug approved for the treatment of NK and seven active innovative drug candidates for the treatment of NK in the clinical stage. The following table sets forth details of approved and active clinical-stage innovative drugs for the treatment of NK in China as of the Latest Practicable Date.

Drug Name/Code	Target	Company	Stage	First Post Time
Cenegermin	NGFR	Dompe Pharma	Approved	2020/08
Ipidacitin	PIK3R3	Yicheng Kangtai Biotech	Phase II	2024/07
STSP-0902	NGFR	Staidson Biopharma	Phase II	2025/04
Recombinant human nerve growth factor	NGFR	Xintrum Pharma	Phase II	2025/04
SQ-22031	undisclosed	Sinqi Pharma	Phase II	2025/04
VVN1901	NGFR	the Company	Phase II	2025/05
Recombinant human nerve growth factor eye drops	NGFR	Kerun Biologic Pharma	Phase I	2023/03
HT006.2.2	NTRK1/NGFR	Hiteck Bio Pharma	Phase I	2024/01

INDUSTRY OVERVIEW

CHRONIC RHINOSINUSITIS

Chronic rhinosinusitis (CRS) is a chronic inflammatory disease of the nasal and paranasal sinus mucosa, typically defined by symptoms persisting for more than 12 weeks. It is characterized by ongoing inflammation of the nasal mucosa and impaired sinus ventilation and drainage, leading to obstruction of the sinuses. Common symptoms include persistent nasal obstruction or congestion, anterior or posterior nasal discharge, facial pain or pressure, reduced or lost sense of smell, and may also be accompanied by headaches or sore throat.

Clinically, CRS is often classified into CRS without nasal polyps (CRSsNP), in which chronic inflammation occurs without polyp formation, and CRS with nasal polyps (CRSwNP), where inflammatory polyps are visible in the nasal cavity and sinuses. Pathologically, CRS can be further stratified according to the predominant inflammatory cell infiltration and pattern of mucosal inflammation.

The number of CRS patients in China has increased from 120.3 million in 2020 to 127.6 million in 2024. It is estimated that the number of CRS patients in China will reach about 137.9 million in 2029 and 150.0 million in 2034. Driven by rising clinical recognition and the debut of targeted therapeutic agents, the CRS drug market in China increased from US\$425.2 million in 2020 to US\$642.4 million in 2024, representing a CAGR of 10.9%. It is estimated that the market will reach approximately US\$1,348.7 million in 2029, fueled by robust CRS drug R&D pipelines, expanded clinical applications and supportive national pharmaceutical policies. By 2034, the market is estimated to further reach US\$2,178.9 million, representing a CAGR of 10.1%, reflecting novel therapy penetration, improved treatment accessibility and growing incidence of CRS-associated diseases. The table below sets forth the historical and estimated CRS drug market in China for the periods indicated.

Chronic Rhinosinusitis Drug Market in China, 2020-2034E

Source: Frost & Sullivan report (based on annual reports of relevant companies, literature review and expert interviews)

Treatment Paradigm

Treatment of CRS generally involves two approaches: drug treatment and surgical treatment. Among drug options, intranasal corticosteroids are recommended as the first-line treatment for CRS. However, while corticosteroids remain a core component of current treatment guidelines, clinical practice has increasingly recognized important limitations when relying on steroid therapies alone. Compared with the potential long-term adverse effects of steroids, non-steroidal treatments usually have fewer side effects and are better suited to long-term disease control. Owing to their greater specificity and more favorable safety profile, non-steroidal therapies are becoming increasingly important in addressing this therapeutic gap. The chart below sets forth the main pharmacological treatments for CRS recommended by prevailing clinical practice guidelines.

INDUSTRY OVERVIEW

Source: Literature review, Frost & Sullivan report

Despite the widespread use of intranasal corticosteroids as first-line therapy for CRS, critical unmet clinical needs remain. Long-term reliance on corticosteroids is linked to high rates of symptom recurrence, and prolonged oral steroid use poses risks of systemic side effects such as immunosuppression and metabolic disturbances. Moreover, a substantial subset of patients with refractory or eosinophilic CRS fail to achieve sustained symptom relief with steroids alone, creating an urgent need for safer, more durable therapeutic options that target the underlying inflammatory pathways without the drawbacks of chronic steroid exposure.

Competitive Landscape

As of the Latest Practicable Date, there were three innovative drugs approved for CRS treatment in China. As of the same date, there were 16 active clinical-stage innovative drug candidates in China, including 14 biologics drug candidates and 2 small-molecule drug candidates (including HTMC0658, an oral tablet candidate, and VVN432).

REPORT COMMISSIONED BY FROST & SULLIVAN

The contract sum to Frost & Sullivan is RMB0.7 million for the preparation and use of the F&S report, and we believe that such fees are consistent with the market rate. Frost & Sullivan is an independent global consulting firm that was founded in 1961 in New York. In compiling and preparing the F&S report, Frost & Sullivan has adopted the following assumptions: (i) global economy is likely to maintain steady growth in the next decade; (ii) global social, economic and political environment is likely to remain stable in the forecast period; (iii) no opposing government measure introduced and increasing level of acceptance to use Company's services; and (iv) there is no war or large-scale disaster during the forecast period. Frost & Sullivan has conducted detailed primary research which involved discussing the status of the industry with leading industry participants and industry experts. Frost & Sullivan has also conducted secondary research which involved reviewing annual financial reports of listed companies, independent research reports and data based on its own research database. Frost & Sullivan has obtained the figures for the projected total market size from historical data analysis plotted against macroeconomic data as well as specific related industry drivers.

REGULATORY OVERVIEW

OVERVIEW OF LAWS AND REGULATIONS IN THE PRC

This section summarizes the principal PRC laws, rules and regulations that are relevant to our business:

Regulatory Authorities

The regulatory authorities of the drug industry in the PRC include: the NMPA, the National Health Commission of the PRC (中華人民共和國國家衛生健康委員會) (the “NHC”) and the National Healthcare Security Administration (國家醫療保障局) (the “NHSA”).

The NMPA is an authority under the State Administration for Market Regulation (國家市場監督管理總局) (the “SAMR”) and is the primary regulator for medical products. It is primarily responsible for supervising and managing drugs, medical devices and cosmetics, including drafting of relevant regulations and policies; undertaking standard management, registration regulation, quality management and post-market risk management for drugs, medical devices and cosmetics; organizing and guiding the supervision and inspection of drugs, medical devices and cosmetics; and undertaking management of qualifications for licensed pharmacists.

The NHC is the primary national regulator for public health. It is primarily responsible for drafting national health policies, supervising and regulating public health, healthcare services and health emergency systems, coordinating the reform of medical and health system, organizing the formulation of national drug policies and national essential medicine system, launching an early warning mechanism for the monitoring of the use and clinical comprehensive evaluation of medicine as well as the drug shortage, giving suggestions on the pricing policy of national essential medicine, and regulating the operation of medical institutions and practicing of medical personnel.

The NHSA is an authority directly under the State Council responsible for the management of the healthcare security system. It is primarily responsible for drafting and implementing policies and standards on medical insurance, maternity insurance and medical assistance; supervising and administering the healthcare security funds; organizing the formulation of a uniform medical insurance catalog and payment standards on drugs, medical disposables and healthcare services; and formulating and supervising the implementation of the bidding and tendering policies for drugs and medical disposables.

Laws and Regulations in Relation to New Drugs

Application for New Drug Registration

Drug registration refers to an approval process where the NMPA conducts review of the safety, efficacy and quality controllability of the drugs intended for marketing according to the application for drug registration made by an applicant, and decides whether to approve the application. Pursuant to the provisions of the Measures for the Administration of Drug Registration (《藥品註冊管理辦法》), promulgated by the SAMR on January 22, 2020 and came into effect on July 1, 2020, the Measures for the Administration of Drug Registration (2020) shall apply to the development, registration, supervision and management activities carried out in the territory of the PRC for marketing of drugs. In accordance with the Measures for the Administration of Drug Registration (2020), drugs registration refers to activities that a drug registration applicant files an application and other supplementary applications for clinical drug trial, approval for drug marketing and reregistration, among others, under the legal procedures and according to the relevant requirements, and that the medical products administrative department examines the safety, effectiveness and quality controllability based on the laws and regulations, and the existing scientific cognitions, to decide whether to agree with the activities applied for. A drug registration certificate shall be valid for five years. During the validity period, a holder of a drug registration certificate shall continue to ensure the safety, effectiveness and quality controllability of the marketed drug, and apply for re-registration of the drug six months prior to the expiry of the validity period.

REGULATORY OVERVIEW

Non-clinical Research and Animal Testing

The non-clinical safety assessment of drugs for marketing approval shall be conducted in accordance with the Good Laboratory Practices for Non-clinical Laboratory Studies (《藥物非臨床研究質量管理規範》) promulgated by the State Food and Drug Administration (the "SFDA") in August 2003 and latest amended by the China Food and Drug Administration (國家食品藥品監督管理總局) (the "CFDA", revoked on March 18, 2018) in July 2017 and came into effect on September 1, 2017. The SFDA promulgated the Administrative Measures for the Certification of Good Laboratory Practices for Non-clinical Laboratory Studies (《藥物非臨床研究質量管理規範認證管理辦法》) in April 2007, which specifies the requirements for institutions applying for Good Laboratory Practices (GLP) certification of non-clinical laboratory studies. On January 19, 2023, the NMPA amended the Administrative Measures for the Certification of Good Laboratory Practices for Non-clinical Laboratory Studies (《藥物非臨床研究質量管理規範認證管理辦法》), which came into effect on July 1, 2023.

According to the Regulations for the Administration of Affairs Concerning Experimental Animals (《實驗動物管理條例》) promulgated by the State Science and Technology Commission in November 1988 and lastly amended in March 2017 by the State Council, the Administration Measures on Good Practice of Experimental Animals (《實驗動物質量管理辦法》) jointly promulgated by the State Science and Technology Commission and the State Bureau of Quality and Technical Supervision in December 1997, and the Administrative Measures on the Certificate for Experimental Animals (Trial) (《實驗動物許可證管理辦法(試行)》) promulgated by the Ministry of Science and Technology and other regulatory authorities in December 2001 and came into effect in January 2002, using experimental animals and related products requires a Certificate for Utilization of Laboratory Animals. A Certificate for Utilization of Laboratory Animals shall be valid for five years, and the holder shall apply for renewal six months prior to the expiry of the validity period. A Certificate for Utilization of Laboratory Animals shall be inspected annually by the local Science and Technology Bureau.

Application for Clinical Trial

After completing the pre-clinical studies, the applicant must obtain approval for clinical trials of drugs from the NMPA before the conduction of new clinical drug trials. According to the Decision on Adjusting the Approval Procedures of Certain Administrative Approval Items for Drugs (《關於調整部分藥品行政審批事項審批程序的決定》) promulgated by the CFDA on March 17, 2017 and came into effect on May 1, 2017, the decision on the approval of clinical trials of drugs enacted by the CFDA can be made by the CDE from May 1, 2017. Pursuant to the Drug Administration Law of the PRC (《中華人民共和國藥品管理法》) (the "Drug Administration Law") promulgated by the Standing Committee of the National People's Congress (the "SCNPC") in September 1984 and lastly amended in August 2019 and came into effect in December 2019, the dossier on a new drug research and development, including the manufacturing method, quality specifications, results of pharmacological and toxicological tests and the relevant data, files and samples, shall, in accordance with the regulations of the drug regulatory authority under the State Council be truthfully submitted to the said department for approval before clinical drug trial is conducted.

The Drug Administration Law further stipulates that the drug regulatory authority under the State Council shall decide whether to approve the clinical trial application and notify the decision to the clinical trial applicant within sixty (60) business days from the date of accepting the clinical trial application. If the drug regulatory authority under the State Council fails to do so, the clinical trial application shall be deemed as approved, and if the bioequivalence test is conducted, it is required to report it to the drug regulatory authority under the State Council for filing. According to the Announcement of the Adjustment of Procedures of the Evaluation and Examination for Drug Clinical Trial (《關於調整藥物臨床試驗審評審批程序的公告》), both promulgated by NMPA on and effective from July 24, 2018, applicants could proceed with their clinical trials if they have not received any denial or query from the CDE within 60 business days after the application has been accepted and the relevant application fees have been paid.

Before conducting the clinical trial, the applicant shall file a series of detailed documents with the NMPA. According to the Announcement on Drug Clinical Trial Information Platform (《關於藥物臨床試驗信息平台的公告》), which came into effect in September 2013, and the Standard for the Management of Drug Clinical Trial Registration and Information Disclosure (Trial) (《藥物臨床試驗登記與信息公示管理規範(試行)》), which came into effect in July 2020, all clinical trials approved by the CFDA and conducted in the PRC shall complete the clinical trial registration and information disclosure on the drug clinical trial information platform. The applicant must complete the initial registration of the trial within one month after

REGULATORY OVERVIEW

obtaining the approval of the clinical trial to obtain the unique registration number of the trial; and complete the subsequent data registration before the first patient is enrolled and submit it for the first time for disclosure. If the aforementioned disclosure has not been submitted within one year after applicant's obtaining the clinical trial approval, the applicant shall submit an explanation, and if the procedure is not completed within three years, the clinical trial approval shall automatically be annulled.

After obtaining clinical trial approval, the applicant shall choose institutions qualified for clinical trials of the drug to conduct clinical trials. Pursuant to the Administrative Regulations for Drug Clinical Trial Institutions (《藥物臨床試驗機構管理規定》), which came into effect in December 2019, drug development activities and clinical trials of drugs (including bioequivalence test conducted after filing) approved by the NMPA within the territory of the PRC, shall be conducted in the drug clinical trial institutions. Drug clinical trial institutions shall be subject to filing administration. Institutions that only engage in analysis of biological samples related to drug clinical trials shall not be subject to filing. The national drug regulatory authority is responsible for setting up a filing management information platform for the registration, filing and operation management of such institutions, as well as for the entry, sharing and disclosure of information on the supervision and inspection conducted by the drug regulatory authority and competent healthcare authority.

Conduct of Clinical Trial

In compliance with the Measures for the Administration of Drug Registration (《藥品註冊管理辦法》), clinical trials are divided into Phase I, Phase II, Phase III, Phase IV and bioequivalence trial:

A clinical drug trial to be carried out shall be examined and approved by the ethics committee. The management of drugs used in a clinical drug trial shall satisfy the relevant requirements of the GCP. A sponsor approved to carry out clinical drug trial shall, before carrying out subsequent clinical drug trial by stages, develop corresponding plan for clinical drug trial, carry out clinical drug trial upon examination and with consent of the ethics committee, and submit corresponding plan for clinical drug trial and supporting materials on the website of the CDE.

Clinical trials shall be conducted for the application of new drug registration and shall be implemented in accordance with the GCP. The GCP stipulates the criteria for the entire procedure of the clinical trial including pre-clinical trial preparation and the necessary conditions, protection of testees' rights and interests, trial protocols, duties of researchers, duties of sponsors, duties of monitors, trial record and report, data management and statistical analysis, administration of drug products for trial, guarantee for quality, polycentric trials, with reference to the internationally recognized principles.

According to the Announcement of the Adjustment of Procedures of the Evaluation and Examination for Drug Clinical Trial (《關於調整藥物臨床試驗審評審批程序的公告》), if a new drug clinical trial has been approved to be carried out, after the completion of Phase I and Phase II clinical trials and before the implementation of Phase III clinical trials, the applicant shall submit an application for a communication meeting to the CDE to discuss with the CDE on key technical issues including the design of the Phase III clinical trial. The applicant can also apply for communication meeting on key technical issues at different stages of clinical research and development.

According to the Measures for the Administration of Drug Registration (《藥品註冊管理辦法》), applicants may communicate with the CDE on major issues at critical stages such as prior to application for clinical trial of a drug, during the process of clinical trial of a drug, and prior to application for marketing authorization of a drug. According to the Measures for the Administration of Communication and Exchange in Drug Development and Technology Review (《藥物研發與技術審評溝通交流管理辦法》) promulgated by the CDE on December 10, 2020, an applicant may propose to convene a communication meeting with the CDE during the process of drug research and development and registration application. There are three types of communication and exchange meetings: Type I meetings are held to resolve major safety issues encountered in the course of clinical trials of drugs and major technical issues in the course of R&D of breakthrough therapeutic drugs; Type II meetings are held for drugs at critical stages of R&D, which mainly include pre-application meetings for new drugs, meetings after the conclusion of Phase II clinical trials and before the commencement of Phase III clinical trials, meetings before application for marketing authorization of new drugs, and meetings for risk assessment and evaluation of new drugs. Type III meetings shall refer to meetings other than Type I and Type II meetings.

REGULATORY OVERVIEW

According to the Announcement of the Opinions on Handling Issues Related to Verification of Drug Clinical Trial Data (《關於藥物臨床試驗數據核查有關問題處理意見的公告》), both promulgated by CFDA on and effective from May 22, 2017, if the clinical trial data is incomplete, ill-formed or insufficient to prove the safety and efficacy of the drug, the registration application of the drug will be rejected.

New Drug Application

Pursuant to the Measures for the Administration of Drug Registration (《藥品註冊管理辦法》), after completing the pharmaceutical research, pharmacological and toxicological research, clinical drug trial, and other researches supporting the marketing registration of a drug, determining the quality standards, completing the verification of commercial large-scale production process, and making sound preparation for the acceptance of drug registration inspection and examination, an applicant shall file an application for drug marketing authorization, and submit relevant research materials in accordance with the requirements of the application materials. After the formal examination of the application materials, an application that satisfies the requirements shall be accepted. Where a generic drug, in vitro diagnostic reagent managed as a drug, or any other eligible circumstance assessed by an applicant to be unnecessary or impossible for conducting clinical drug trial and meeting the conditions for exempting clinical drug trial, the applicant may directly file an application for drug marketing authorization. The technical guiding principles and relevant specific requirements for exempting clinical drug trial shall be developed and announced by the CDE.

The CDE shall organize pharmaceutical, medical and other technical personnel to evaluate the accepted applications for drug marketing authorization. Where the comprehensive evaluation conclusion is adopted, the drug shall be approved for marketing, and a drug registration certificate shall be issued. If the comprehensive evaluation conclusion is not adopted, a disapproval decision shall be made. A drug registration certificate shall specify the drug approval number, holder, manufacturer and other information.

Drug registration inspection means the inspection activities carried out for the development sites and production sites the authenticity and consistency of the application materials and the commercial production conditions for marketing of drugs, and to examine, among other things, the compliance of drug development and data reliability. Where necessary, it also includes the extended examination activities carried out for manufacturers, suppliers, or other entrusted institutions of chemical active pharmaceutical ingredients, auxiliary materials, and packaging materials and containers in direct contact with drugs involved in the application for drug registration.

The CDE shall decide whether to carry out on-site inspection of drug registration development based on risks, according to the degree of drug innovation and the previous acceptance of inspection by drug research institutions.

The CDE shall decide whether to launch production site inspection for drug registration based on risks according to factors such as variety, process, facility and previous acceptance of inspection for which an application is filed for registration. For innovative drugs, new modified drugs and biological products, production site inspection for drug registration and pre-marketing examination for management standards for drug production quality shall be conducted. For generic drugs, production site inspection for drug registration and pre-marketing examination for management standards for drug production quality shall be conducted based on the risks, according to whether a drug production license for the corresponding production scope has been obtained and whether a variety of the same dosage form has been marketed.

After an application for drug registration is accepted, the CDE shall conduct preliminary examination within forty (40) business days of acceptance, notify the Center for Food and Drug Inspection of NMPA (the "Center for Inspection") inspection and provide the relevant materials required for inspection, where production site inspection for drug registration is required, and concurrently notify the applicant and the medical products administrative department of the province, autonomous region or municipality in the place where the applicant or production enterprise is located. In principle, the Center for Inspection shall complete the inspection work forty (40) business days prior to the expiry of the time limit for inspection, and report the inspection information, inspection results and other relevant materials to the CDE.

REGULATORY OVERVIEW

Drug registration examination shall include standard review and sample examination. Standard review means the laboratory assessment of the scientificity of the items specified in the standards for the drug for which the applicant applies, the feasibility of the test methods and the rationality of quality control indicators, among others. Sample examination means the laboratory examination carried out for samples according to the application of the applicant or the drug quality standards verified by the CDE.

The review period for an application for drug marketing authorization shall be two hundred (200) business days. The review period for the procedures for prioritized review and approval shall be one hundred and thirty (130) business days, and the review period for the procedures for prioritized review and approval for clinically and urgently needed overseas-marketed drug for a rare disease shall be seventy (70) business days.

The following duration shall be excluded from the relevant work period: (i) time taken for the applicant to provide supplementary materials, to make corrections upon examination as well as to verify manufacturing process, quality standards and literature in accordance with the requirements; (ii) delay in examination or inspection due to reason of the applicant, time taken for organizing expert advisory meetings; (iii) the suspended duration in the event of suspension of review and approval procedures pursuant to the provisions of laws and regulations; and (iv) time taken for overseas examination where such overseas examination is activated.

Reform of Evaluation and Approval System for Drugs

In August 2015, the State Council promulgated the Opinions on the Reform of Evaluation and Approval System for Drugs and Medical Devices and Equipment (《關於改革藥品醫療器械審評審批制度的意見》) (the "Reform Opinions"), which provide a framework for reforming the evaluation and approval system for drugs and indicate the enhancement of the standard of approval for drug registration and the acceleration of the evaluation and approval process for innovative drugs.

In November 2015, the CFDA promulgated the Announcement on Certain Policies for Drug Registration, Evaluation and Approval (《關於藥品註冊審評審批若干政策的公告》) (the "Certain Policies Announcement"), which further clarifies the measures and policies on simplifying and accelerating the approval process on the basis of the Reform Opinions.

Pursuant to the Decision on Adjusting the Approval Procedures of Certain Administrative Approval Items for Drugs (《關於調整部分藥品行政審批事項審批程序的決定》) promulgated by the CFDA in March 2017 and came into effect in May 2017, the clinical trial approval decisions on drugs (including domestic and imported) can be directly made by the CDE in the name of the CFDA; decisions on approval of drug supplementary applications (including domestic and imported); decisions on approval of re-registration of imported drugs. In addition, the Circular on Issues Concerning Optimizing Drug Registration Review and Approval (《關於優化藥品註冊審評審批有關事宜的公告》), both promulgated by NMPA and NHC on and effective from May 17, 2018, further simplifies and accelerates the approval process of specific kinds of drugs.

The Evaluation and Approval Procedures for Breakthrough Therapeutic Drugs (Trial) (《突破性治療藥物審評工作程序(試行)》), the Evaluation and Approval Procedures for Conditionally Approved Drugs (Trial) (《藥品附條件批准上市申請審評審批工作程序(試行)》) and The Preferential Evaluation and Approval Procedures for Drug Marketing Authorization (Trial) (《藥品上市許可優先審評審批工作程序(試行)》) promulgated by the NMPA in July 2020 and came into effect in July 2020, replace the Opinions on Implementing Priority Review and Approval to Encourage Drug Innovation (《關於鼓勵藥品創新實行優先審評審批的意見》) promulgated by the CFDA in December 2017 and came into effect in December 2017, which further clarified the Accelerating Registration Procedures for Drugs.

Administrative Protection and Monitoring Periods for New Drugs

According to the Implementing Rules for PRC Drug Administration Law (《中華人民共和國藥品管理法實施條例》) issued on March 2, 2019 latest amended and effective on January 20, 2025 and the Reform Plan for Registration Category of Chemical Drugs (《化學藥品註冊分類改革工作方案》) issued on March 4, 2016, the NMPA may, for the purpose of protecting public health, provide for an administrative monitoring period of five years for new Category 1 drugs approved to be manufactured, commencing from the date of approval, to continually monitor the safety of those new drugs. During the monitoring period of a new drug, the NMPA will not approve any other enterprises' applications to manufacture or import the said drug.

REGULATORY OVERVIEW

Regulations on International Multi-Center Clinical Trials and Acceptance of Overseas Clinical Trial Data

According to the Notice on Issuing the International Multi-Center Clinical Trial Guidelines (Trial) (《關於發佈國際多中心藥物臨床試驗指南(試行)的通告》), ("the Multi-Center Clinical Trial Guidelines"), promulgated by the NMPA on January 30, 2015 and came into effect from March 1, 2015, international multi-center clinical trial applicants may simultaneously perform clinical trials in different centers using the same clinical trial protocol. Where the applicants plan to implement the international multi-center clinical trials in the PRC, the applicants shall comply with relevant laws and regulations, such as the Drug Administration Law, the Implementing Rules for PRC Drug Administration Law and the Measures for the Administration of Drug Registration, execute the GCP, make reference to universal international principles such as the International Council for Harmonization of Technical Requirements for Pharmaceuticals for Human Use (ICH), and comply with the laws and regulations of the countries involved in the international multi-center clinical trials. Where the applicants plan to use the data derived from the international multi-center clinical trials for approval of a drug registration in the PRC, it shall involve at least two countries, including China, and shall satisfy the requirements for clinical trials set forth in the Multi-Center Clinical Trial Guidelines and other related laws and regulations.

According to the Opinions on Deepening the Reform of the Evaluation and Approval Systems and Encouraging Innovation of Drugs and Medical Devices (《關於深化審評審批制度改革鼓勵藥品醫療器械創新的意見》), clinical trial data obtained in an international multi-center that conforms to China's requirements for registration of drugs and medical devices can be used for the application for registration in China.

According to the Technical Guiding Principles for the Acceptance of Overseas Clinical Trial Data of Drugs (《接受藥品境外臨床試驗數據的技術指導原則》) promulgated by the NMPA on July 6, 2018, the basic principles for accepting overseas clinical trial data include: (i) applicants shall ensure the authenticity, integrity, accuracy and trace-ability of overseas clinical trial data; (ii) the process of generating overseas clinical trial data shall comply with the relevant requirements of the ICH-GCP; (iii) applicants shall ensure the scientific design of overseas clinical trials, the compliance of clinical trial quality management system with the requirements, and the accuracy and integrity of statistical analysis of data; and (iv) to ensure that the clinical trial design and statistical analysis of the data are scientific and reasonable, for the drugs with simultaneous R&D at home and abroad and forthcoming clinical trials in China, the applicants may, prior to implementing registrational clinical trials, contact the CDE to ensure the compliance of registrational clinical trial's design with the essential technical requirements for drug registration in China.

Marketing Authorization Holder System

Pursuant to the Drug Administration Law and the Measures for the Administration of Drug Registration, the state implements the drug marketing authorization holder system for drug management. After obtaining a drug registration certificate, an applicant shall be the drug marketing authorization holder. During the validity period, a holder of a drug registration certificate shall continue to ensure the safety, effectiveness and quality controllability of the marketed drug, and apply for re-registration of the drug six months prior to the expiry of the validity period.

The drug marketing authorization holder shall proactively carry out post-marketing research on drugs, further confirm the safety, effectiveness and quality controllability of drugs, and strengthen the continuous management of marketed drugs. Where a drug registration certificate and its annex require the marketing authorization holder to carry out relevant research work after the drug is marketed, the marketing authorization holder shall complete the research within the prescribed time limit and file a supplementary application, undergo recordation formalities or report as required. After a drug is approved for marketing, the marketing authorization holder shall continue to conduct research on drug safety and effectiveness, undergo recordation formalities in a timely manner or file a supplementary application for revising the instructions according to the relevant data, and continuously update and improve the instructions and labels. The medical products administrative department may require the marketing authorization holder to revise the instructions and labels based on the monitoring of adverse drug reactions and the post-marketing reevaluation results of the drug.

REGULATORY OVERVIEW

The marketing authorization holder shall apply for re-registration six months prior to the expiry of the validity period of the drug registration certificate. An application for re-registration of a domestically produced drug shall be filed by the marketing authorization holder with the medical products administrative department of the province, autonomous region or municipality directly under the central government, and an application for re-registration of a drug produced overseas shall be filed by the marketing authorization holder with the CDE.

National Reimbursement Drug List of China (the “NRDL”)

Participants in the National Health Insurance Scheme and their employers (if any) have to pay a monthly premium. Participants may be reimbursed for all or part of the cost of medicines included in the medical insurance catalog. The Tentative Measures for the Administration of the Scope of Medical Insurance Coverage for Pharmaceutical Products for Urban Employee (《城鎮職工基本醫療保險用藥範圍管理暫行辦法》), jointly issued by the National Development and Reform Commission (the “NDRC”), the MOF and other authorities, came into effect on May 12, 1999, stipulates that the medicines included in the medical insurance catalog must be clinically necessary, safe and effective, reasonably priced, convenient to use and the supply of which can be guaranteed by the market.

The NRDL for Basic Medical Insurance, Maternity Insurance and Work-related Injury Insurance (《國家基本醫療保險、生育保險和工傷保險藥品目錄》) sets out the standards for payment of medicines by the basic medical insurance, work-related injury insurance and maternity insurance funds. The NHSA and other governmental organizations have the authority to determine the drugs to be included in the NRDL. Drugs listed in the NRDL are divided into two parts: Class A and Class B. Class A drugs are widely used for clinical treatment, with favorable efficacy and lower prices than their counterparts, while Class B drugs are used for clinical treatment, with favorable efficacy and slightly higher prices than Class A drugs.

On December 5, 2025, the NHSA and the Ministry of Human Resources and Social Security of the PRC released the latest NRDL (effective from January 1, 2026), which has been expanded to cover a total of 3,253 drugs. Inclusion in the NRDL will generally result in increased sales volume and lower drug prices (which are determined on a case-by-case basis and negotiated based on factors such as the initial drug price).

On July 30, 2020, the NHSA issued the Provisional Measures for the Administration of Medicines for Basic Medical Insurance (《基本醫療保險用藥管理暫行辦法》) (“Measures for the Administration of the NRDL”), which came into effect on September 1, 2020. The Measures for the Administration of the NRDL provides guidance on the inclusion and adjustment of the NRDL and the payment, management and supervision of basic medical insurance. According to the Measures for the Administration of the NRDL, a dynamic adjustment mechanism shall be established for the NRDL, which shall be adjusted annually in principle.

National Essential Drug List of China (the “NEDL”)

On August 18, 2009, the MOH and eight other ministries and commissions in the PRC issued the Provisional Measures on the Administration of the NEDL (《國家基本藥物目錄管理辦法(暫行)》), which was revised on February 13, 2015 by the Notice on Issuing the Measures on the Administration of the NEDL (《關於印發國家基本藥物目錄管理辦法的通知》), and the Guidelines on the Implementation of the NEDL System (《關於建立國家基本藥物制度的實施意見》), which aims to promote essential medicines sold to consumers at fair prices in the PRC and ensure that the general public in the PRC has equal access to the drugs contained in the NEDL. On September 13, 2018, the General Office of the State Council issued the Opinions of the General Office of the State Council on Improving the National Essential Drug System (《國務院辦公廳關於完善國家基本藥物制度的意見》). The NHC and the National Administration of Traditional Chinese Medicine promulgated the NEDL (2018 Edition) (《國家基本藥物目錄(2018年版)》) on September 30, 2018, replacing the NEDL (2012 Edition) (《國家基本藥物目錄(2012年版)》) which was promulgated on March 13, 2013. According to these regulations, basic healthcare institutions funded by the government, which primarily include county-level hospitals, county-level Chinese medicine hospitals, rural clinics and community clinics, shall stock and use drugs listed in the NEDL. The drugs listed in NEDL shall be purchased by centralized tender process and are subject to the price control by the NDRC. Remedial drugs in the NEDL are all listed in the Medical Insurance Catalog and the full amount of the purchase price of such drugs is entitled to reimbursement.

REGULATORY OVERVIEW

Human Genetic Resources Approval or Filing

Pursuant to the Regulations of the PRC on the Administration of Human Genetic Resources (《中華人民共和國人類遺傳資源管理條例》) (the “Human Genetic Resource Regulation”) promulgated by the State Council on May 28, 2019 and implemented on July 1, 2019, newly amended in March 2024 and came into effect on May 1, 2024, human genetic resource includes human genetic resource materials and information. Human genetic resource materials shall refer to organs, tissues, cells and other genetic materials containing human genome, genes and other genetic materials. Human genetic resource information shall refer to information, such as data, generated by human genetic resources materials. The Human Genetic Resource Regulation formalized the specific requirements to obtain approval relating to research collaborations between Chinese and foreign entities. Utilization of China’s human genetic resources in internally cooperative clinical trial with the purpose of obtaining marketing licenses for drugs and medical devices, which involves no export or emigration of human genetic resources, is not subject to relevant approval. However, parties to such internationally cooperative clinical trial shall submit a filing about the category, quantity, usage of human genetic resources. Foreign organisations, individuals and institutions established or actually controlled by foreign organizations and individuals are not allowed to collect or preserve human genetic resources in China or provide human genetic resources abroad.

The Bio-security Law of the PRC (《中華人民共和國生物安全法》) promulgated by the SCNPC on October 17, 2020 and last amended on April 26, 2024 and effective from the same date, provides that the PRC shall have sovereignty over the human genetic resources and biological resources of China. The Bio-security Law of the PRC further stipulates that the competent health department under the State Council shall be the competent authority for the approval or filing of activities involving China’s human genetic resources.

Good Clinical Practice Certification and Compliance with the Good Clinical Practice (GCP)

To improve the quality of clinical trials, the NMPA and NHC promulgated the Good Clinical Practice for Drug Trials (《藥物臨床試驗質量管理規範》) (the “GCP”) in April 2020 and came into effect on July 1, 2020, which aims to ensure that the clinical trials of drugs are standardized and the results are scientific and reliable, protecting the rights and safety of human subjects. Pursuant to the Opinions on Deepening the Reform of the Evaluation and Approval Systems and Encouraging Innovation of Drugs and Medical Devices (《關於深化審評審批制度改革鼓勵藥品醫療器械創新的意見》) promulgated by the general offices of the Chinese Communist Party Central Committee and the General Office of the State Council in October 2017, the qualification of clinical trial institutions shall be subject to record management. Clinical trials should follow GCP and protocols approved by the ethics committee of each research center.

Laws and Regulations in Relation to Drug Manufacturer

Drug Manufacturing Permit

Pursuant to the Drug Administration Law and the Measures on Supervision of Pharmaceutical Manufacturing (《藥品生產監督管理辦法》), promulgated by the NMPA on December 11, 2002, last amended on January 22, 2020 and effective on July 1, 2020, the state adopts an industry entry permit system for drug manufacturers. The conduct of drug manufacturing activities shall be approved and granted with a Drug Manufacturing License (《藥品生產許可證》) by the drug regulatory authority of the people’s government at provincial, autonomous regional or municipal level. The Drug Manufacturing License shall indicate the validity period and the scope of production, and shall be reviewed for renewing upon expiration.

Good Manufacturing Practices

Prior to December 1, 2019, establishment of a new drug manufacturer, construction of new production premise for a drug manufacturer or production of new dosage form were required to submit application for good manufacturing practice certification (GMP certification) with the drug regulatory authority in accordance with relevant provisions. If the Good Manufacturing Practices are satisfied, a GMP certificate will be issued. Pursuant to the Announcement on the Relevant Issues Concerning the Implementation of the Drug Administration Law of the PRC (《關於貫徹實施〈中華人民共和國藥品管理法〉有關事項的公告》), promulgated by the NMPA on November 29, 2019, and the Drug Administration Law,

REGULATORY OVERVIEW

the GMP and Good Supply Practice (GSP) certifications have been canceled, applications for GMP and GSP certifications are no longer accepted, and GMP and GSP certificates are no longer issued. When engaging in drug manufacturing activities, a manufacturer shall comply with the GMP and establish a sound GMP management system, to ensure that the entire process of drug manufacturing continue to meet the statutory requirements, and meet the GMP requirements enacted by the drug regulatory authority under the State Council in accordance with the law. The legal representative of and principal person in charge of a drug manufacturer are fully responsible for the drug manufacturing activities of the enterprise.

The Good Manufacturing Practices (《藥品生產質量管理規範》), promulgated by the Ministry of Health of the PRC (the "MOH", revoked on March 10, 2013, now known as the NHC) in December 1992, newly amended in January 2011 and came into effect on March 1, 2011, provided guidance for the quality management, organization and staffing, production premises and facilities, equipments, material and products, recognition and inspection, documentation maintenance, manufacture management, quality control and quality assurance, contractual manufacture and contractual inspection for the products, product delivery and recalls of a manufacturer in a systematical manner.

Contract Manufacturing of Drug

Pursuant to the Administrative Regulations for the Contract Manufacturing of Drug (《藥品委託生產監督管理規定》), promulgated by CFDA on August 14, 2014 and effective from October 1, 2014, in the event that a drug manufacturer in China that has obtained a drug marketing authorization temporarily lacks manufacturing conditions as a result of technology upgrade or is unable to ensure market supply due to insufficient manufacturing capabilities, it can entrust the manufacturing of that drug to another domestic drug manufacturer. Such contract manufacturing arrangements need to be approved by the provincial branch of NMPA. The Regulations further prohibit the contract manufacturing arrangement of certain special drugs, including narcotic drugs, psychoactive drugs, biochemical drugs and active pharmaceutical ingredients.

Pursuant to the Drug Administration Law, a drug marketing authorization holder may produce drugs by itself or may entrust other drug manufacturers with production. A drug marketing authorization holder that intends to manufacture drugs on its own shall obtain a drug manufacturing permit. If the holder intends to entrust a third-party to manufacture, it shall entrust a qualified drug manufacturer. The drug marketing authorization holder and the commissioned manufacturer shall enter into an entrustment agreement and a quality agreement, and strictly perform the obligations pursuant to such agreements. Blood products, anesthetics, psychotropic pharmaceuticals, toxic pharmaceuticals for medical treatment and pharmaceutical precursor chemicals may not be produced through entrustment, except as otherwise prescribed by the drug administrative department of the State Council.

Export of Drug

Pursuant to the Reply by NMPA on Certain Issues of Pharmaceutical Products Export (《國家藥品監督管理局關於藥品出口有關問題的批覆》), both promulgated on and effective from September 20, 1999, enterprises have the right to operate import and export of pharmaceutical products and the qualification shall be decided by the foreign trade authority. Export of pharmaceutical products shall mainly comply with the requirements of the importing country, so long as there is no special requirement by the importation country, the NMPA would, in principle, support the export based on the national policy of encouraging exports. However, pursuant to the Drug Administration Law, the export of narcotics and psychotropic drugs prescribed by the PRC requires an export license issued by the NMPA.

Other Laws and Regulations in Relation to Medical Industry

Basic Medical Insurance Policy

Pursuant to the Decision on the Establishment of the Urban Employee Basic Medical Insurance Program (《關於建立城鎮職工基本醫療保險制度的決定》) promulgated by the State Council on December 14, 1998 and the Tentative Measures for the Administration of the Scope of Medical Insurance Coverage for Pharmaceutical Products for Urban Employee (《城鎮職工基本醫療保險用藥範圍管理暫行辦法》), all employers in cities and towns, including enterprises (state-owned enterprises, collective enterprises, foreign-invested enterprises, private enterprises, etc.), institutions, public institutions, social organizations, private non-enterprise units and their employees are required to participate in basic medical insurance.

REGULATORY OVERVIEW

Pursuant to the Guiding Opinions on the Pilot of Basic Medical Insurance for Urban Residents (《關於開展城鎮居民基本醫療保險試點的指導意見》) promulgated by the State Council on July 10, 2007, urban residents (not urban employees) in the pilot areas can voluntarily participate in the basic medical insurance for urban residents. Pursuant to the Opinions of the State Council on the Integration of the Basic Medical Insurance System for Urban and Rural Residents (《國務院關於整合城鄉居民基本醫療保險制度的意見》) promulgated by the State Council on January 3, 2016, a unified basic medical insurance system for urban and rural residents was established, integrating the existing urban residents' medical insurance and the new rural cooperative medical system, covering all urban and rural residents except those who should be covered by the employee's basic medical insurance.

Medical Insurance Catalog

Pursuant to the Tentative Measures for the Administration of the Scope of Medical Insurance Coverage for Pharmaceutical Products for Urban Employee (《城鎮職工基本醫療保險用藥範圍管理暫行辦法》), the scope of medical insurance coverage for pharmaceutical products needs to be managed through the formulation of the Medical Insurance Catalog. A pharmaceutical product listed in the Medical Insurance Catalog must be clinically needed, safe, effective, reasonably priced, easy to use, available in sufficient quantity, and must meet the following requirements: it is set forth in the Pharmacopoeia of the PRC (current edition) (《中華人民共和國藥典》(現行版)); it meets the standards promulgated by the NMPA; and if imported, it is approved by the NMPA for import. According to the Opinions of the NHSA and the Ministry of Finance on Establishing a List-Based System for Healthcare Security Benefits (《國家醫保局、財政部關於建立醫療保障待遇清單制度的意見》), which came into effect in January 2021, all provinces shall implement the NRDL in a strict manner, and shall not have the discretion to formulate the catalog, add drugs to the catalogue, or adjust the scope of limited payment unless explicitly stipulated. After several adjustments, the currently effective one is the National Insurance Drug List for Basic Medical Insurance, Maternity Insurance and Work-related Injury Insurance (2025) (《國家基本醫療保險、生育保險和工傷保險藥品目錄(2025年)》) came into effect since January 1, 2026.

Drug Price

Pursuant to the Drug Administration Law, for drug products with market-regulated prices in accordance with the law, the drug marketing authorization holder, the drug manufacturer, the drug distributor and medical institution shall determine the price pursuant to the principles of fairness, reasonableness, integrity and trustworthiness as well as quality for value in order to supply drug users with reasonably priced drug products; and shall comply with the requirements relating to drug price administration promulgated by the State Council's pricing authorities, determine and clearly mark the retail prices of drug products. Pursuant to the Notice on Issuing Opinions on Promoting Drug Price Reform (《關於印發<推進藥品價格改革意見>的通知》) jointly promulgated by the NDRC, the NHC, the Ministry of Human Resources and Social Security, Ministry of Industry and Information Technology, the Ministry of Finance of the PRC (中華人民共和國財政部) (the “MOF”), the Ministry of Commerce of the PRC (中華人民共和國商務部) (the “MOFCOM”) and the CFDA on May 4, 2015 and came into effect on June 1, 2015, government-set drug prices were abolished except for narcotic drugs and first-class psychotropic drugs.

Advertising of Pharmaceutical Products

The Advertising Law of the PRC (《中華人民共和國廣告法》), as amended and effective on April 29, 2021, outlines the regulatory framework for the advertising industry. Advertisers, advertising service providers and advertising publishers are required to ensure that the contents of the advertisements they prepare or distribute are true and in full compliance with applicable laws and regulations. For advertisement of drugs, the advertisement contents shall be examined by the relevant authorities prior to their publishing. Pursuant to the Interim Administrative Measures for the Review of Advertisements for Drugs, Medical Devices, Health Food and Formula Food for Special Medical Purposes (《藥品、醫療器械、保健食品、特殊醫學用途配方食品廣告審查管理暫行辦法》) promulgated by SAMR in December 2019 and came into effect on March 1, 2020, advertisements for drugs, medical devices, health food and formula food for special medical purposes shall be true and legitimate, and shall not contain any false or misleading contents.

REGULATORY OVERVIEW

Insert Sheet, Labels and Packaging of Pharmaceutical Products

Pursuant to the Measures for the Administration of the Insert Sheets and Labels of Drugs (《藥品說明書和標籤管理規定》), promulgated by the SFDA and came effective on June 1, 2006, the insert sheets and labels of drugs should be reviewed and approved by the SFDA. A drug insert sheet should include the important scientific data, conclusions and information concerning drug safety and efficacy in order to direct the safe and rational use of drugs. The inner label of a drug should bear such information as the drug’s name, indication or function, strength, dose and usage, production date, batch number, expiry date and drug manufacturer. The outer label of a drug should indicate such information as the drug’s name, ingredients, description, indication or function, strength, dose and usage, adverse reaction, contraindications, precautions, storage, production date, batch number, expiry date, approval number and the name of the drug manufacturer. Pursuant to the Measures for The Administration of Pharmaceutical Packaging (《藥品包裝管理辦法》) which came effective on September 1, 1988, pharmaceutical packaging must comply with national and professional standards. If no national or professional standards are available, the enterprise can formulate and implement its standards after obtaining the approval of the food and drug administration and bureau of standards at provincial level. The enterprise shall reapply with the relevant authorities if it needs to change its packaging standard. Drugs without packaging standards must not be sold or traded (except for drugs for the military).

Provisions in Relation to the Company’s Principal Activities

The “Healthy China 2030” Planning Outline (《“健康中國2030”規劃綱要》) jointly issued and implemented by the State Council and the general offices of the Chinese Communist Party Central Committee on October 25, 2016 proposes the establishment of a comprehensive clinical evaluation system focusing on essential medicines, aiming to complete the drug price formation mechanism in accordance with the principle of combining government regulation with market adjustment, strengthen the linkage between the pricing, health insurance, procurement policies while insisting on categorized management, strengthen supervision of prices of medicines with insufficient market competition and high-value medical consumables, establish a system for monitoring and disclosing information on drug prices, and formulate and improve policies on and standards for payment for drugs covered by medical insurance.

The 14th Five-Year Plan for National Health (《“十四五”國民健康規劃》) issued and implemented by the General Office of the State Council on April 27, 2022 proposes to encourage the research and development, innovation and application of new medicines, accelerate the research, development and industrialization of urgently-needed medicines for the clinical treatment of major diseases, and support the research and development of high-quality generic medicines, deepen the reform of the review and approval procedures for medicines and medical devices, and expedite the review and approval process for innovative, clinically-needed drugs and medical devices, and drugs for the treatment of rare diseases.

The Several Opinions of the General Office of the Shanghai Municipal People’s Government on Supporting the Whole-Chain Innovation and Development of the Biopharmaceutical Industry (《上海市人民政府辦公廳關於支持生物醫藥產業全鏈條創新發展的若干意見》) issued by the General Office of the Shanghai Municipal People’s Government on July 15, 2024 and implemented on August 1, 2024 (valid until July 31, 2029) proposes to support the innovation and development of the whole chain of the biopharmaceutical industry, including accelerating the transition from the R&D achievements to pre-clinical research, continuously increasing the support for R&D of innovative drugs, optimizing the mechanism for the transformation of clinical research achievements, shortening the start-up time of clinical trials, etc.

The Several Measures for the Whole-Chain Support of the High-Quality Development of Innovative Drugs and Medical Devices (《浙江省人民政府辦公廳關於印發浙江省全鏈條支持創新藥械高質量發展若干舉措的通知》) issued by the General Office of the People’s Government of Zhejiang Province on December 30, 2024 and implemented on February 15, 2025, proposes to support the whole-chain development of innovative drugs and medical devices through initiatives including enhancing R&D capabilities, optimizing clinical research and review processes, promoting application, expanding payment channels, and strengthening data/industrial factor support, etc.

REGULATORY OVERVIEW

Laws and Regulations in Relation to Intellectual Property

Patent

Patents in the PRC are mainly protected by the Patent Law of the PRC (《中華人民共和國專利法》) (the “Patent Law”), which was promulgated by the SCNPC on March 12, 1984 and latest amended on October 17, 2020 and came into effect on June 1, 2021, and the Implementation Rules of the Patent Law of the PRC (《中華人民共和國專利法實施細則》) (the “Implementation Rules”), promulgated by the State Council on June 15, 2001 and latest amended on December 11, 2023 and came into effect on January 20, 2024. The Patent Law and the Implementation Rules provide for three types of patents, namely “invention”, “utility model” and “design”. “Invention” refers to any new technical solution relating to a product, a process or improvement thereof; “utility model” refers to any new technical solution relating to the shape, structure, or their combination, of a product, which is suitable for practical use; and “design” refers to any new design of the shape, pattern, color or the combination of any two of them, of a product, which creates an aesthetic feeling and is suitable for industrial application. The duration of a patent right for “invention” is twenty (20) years; the duration of a patent right for “utility model” is ten (10) years; and the duration of a patent right for “design” is fifteen (15) years, all of which duration are from the date of application. According to the Patent Law, for the purpose of public health, the patent administration department of the State Council may grant mandatory licensing for patented drugs manufactured and exported to countries or regions which comply with the provisions of the relevant international treaty participated by the PRC.

The newly amended Patent Law introduces patent extensions to patents of new drugs launched in the PRC, and stipulates that the patent administration department under the State Council shall, upon request of the patentee, extend the patent term of relevant invention patents of the new drug that is approved to be listed on the market in China, to compensate for the time spent for the review, examination and approval of the listing of a new drug on the market.

The compensated extension shall not exceed five (5) years, and the total valid patent term after the new drug is approved for the market shall not exceed fourteen (14) years. Such newly adopted patent term extension rule benefits the Company through longer protection terms of patents applied or registered in the PRC and related to our product candidates. During the compensated extension period of the patent term of the patent for invention related to a new drug, the scope of protection of the patent is limited to the new drug and the technical solutions related to the approved indications of the new drug. Within the scope of protection, the rights and obligations of the patentee remain the same as before the compensated extension period.

Trademarks

Registered trademarks in the PRC are mainly protected by the Trademark Law of the PRC (《中華人民共和國商標法》), which was promulgated by the SCNPC on August 23, 1982 and latest amended on April 23, 2019 and came into effect on November 1, 2019, and the Implementation Rules of the Trademark Law of the PRC (《中華人民共和國商標法實施條例》), which were promulgated by the State Council on August 3, 2002 and latest amended on April 29, 2014 and came into effect on May 1, 2014. The Trademark Office is responsible for the registration and administration of trademarks throughout the PRC, and grants a term of ten (10) years to registered trademarks. When it is necessary to continue using the registered trademark upon expiration of period of validity, a trademark registrant shall make an application for renewal within twelve (12) months before the expiration in accordance with the requirements. If such an application cannot be filed within that period, an extension period of six months may be granted. The period of validity for each renewal of registration shall be ten (10) years as of the next day of the previous period of validity. If the formalities for renewal have not been handled upon expiration of period of validity, the registered trademarks will be deregistered.

Domain Names

Domain names are regulated under the Administrative Measures on the Internet Domain Names (《互聯網域名管理辦法》) issued by the Ministry of Industry and Information Technology (the “MIIT”), on August 24, 2017 and effective from November 1, 2017. The MIIT

REGULATORY OVERVIEW

is the main regulatory authority responsible for the administration of the PRC internet domain names. Domain names registrations are handled through domain name service agencies established under the relevant regulations, and the applicants become domain name holders upon successful registration.

Trade Secret

According to the Anti-Unfair Competition Law of the PRC (《中華人民共和國反不正當競爭法》) promulgated by SCNPC, latest amended on June 27, 2025 and came into effect on October 15, 2025, the term “trade secrets” refers to technical and business information that is unknown to the public, has utility, may create business interests or profits for its legal owners or holders, and is maintained as a secret by its legal owners or holders. Under the Anti-Unfair Competition Law of the PRC, business persons are prohibited from infringing others’ trade secrets by: (i) acquiring a trade secret from the right holder by theft, bribery, fraud, coercion, electronic intrusion, or any other means; (ii) disclosing, using, or allowing another person to use a trade secret acquired from the right holder by any means as specified in the item (i) above; (iii) disclosing, using, or allowing another person use a trade secret in its possession, in violation of its confidentiality obligation or the requirements of the right holder for keeping the trade secret confidential; (iv) abetting a person, or tempting another person into or in acquiring, disclosing, using, or allowing another person to use the trade secret of the right holder in violation of his or her non-disclosure obligation or the requirements of the right holder for keeping the trade secret confidential. If a third party knows or should have known of the above-mentioned illegal conduct but nevertheless obtains, uses or discloses trade secrets of others, the third party may be deemed to have committed a misappropriation of the others’ trade secrets. The parties whose trade secrets are being misappropriated may petition for administrative corrections, and regulatory authorities may stop any illegal activities and impose fine on the infringing parties.

The Company Law and Regulations

The Company Law of the PRC (《中華人民共和國公司法》), which was amended by the SCNPC on December 29, 2023 and became effective on July 1, 2024, provides for the establishment, corporate structure and corporate management of companies, which also applies to foreign-invested enterprises in PRC.

Regulations in Relation to Foreign Direct Investment

Since January 1, 2020, the Foreign Investment Law of the PRC (《中華人民共和國外商投資法》) (the “Foreign Investment Law”) promulgated by the National People’s Congress (the “NPC”) and the Regulations for Implementation of the PRC Foreign Investment Law (《中華人民共和國外商投資法實施條例》) promulgated by the State Council came into effect and became the principal laws and regulations governing foreign investment in the PRC. The Law of the PRC on Sino-Foreign Equity Joint Ventures (《中華人民共和國中外合資經營企業法》), the Law of the PRC on Wholly Foreign-Owned Enterprises (《中華人民共和國中外合作經營企業法》) and the Law of the PRC on Sino-Foreign Cooperative Joint Ventures (《中華人民共和國中外合作經營企業法》), together with their implementation rules and ancillary regulations were abolished at the same time. Pursuant to the Foreign Investment Law, “foreign investment” shall refer to the investment activities conducted directly or indirectly by foreign individuals, enterprises or other entities in the PRC, including the following circumstances: (i) the establishment of foreign-invested enterprises in the PRC by foreign investors solely or jointly with other investors; (ii) a foreign investor’s acquisition of shares, equity interests, property portions or other similar rights and interests of enterprises in the PRC; (iii) investment in new projects in the PRC by foreign investors solely or jointly with other investors; and (iv) investments made by foreign investors through means provided in laws, administrative regulations, or other methods prescribed by the State Council. The organization form, institutional framework and standard of conduct of foreign-invested enterprises shall be subject to the provisions of the Company Law of the PRC and other laws.

The PRC government will implement the management system of pre-entry national treatment and the Negative List for foreign investment abolished the original approval and filing administration system for the establishment and change of foreign-invested enterprises. Pre-entry national treatment refers to the treatment accorded to foreign investors and their investments at the stage of investment entry which is no less favorable than the treatment accorded to domestic investors and their investments. Negative List refers to a special administrative measure for the entry of foreign investment in specific sectors as imposed by the

REGULATORY OVERVIEW

PRC. The PRC accords national treatment to foreign investment outside of the Negative List. The current Negative List is the Special Management Measures (Negative List) for the Access of Foreign Investment (2024 Revision) (《外商投資准入特別管理措施(負面清單)(2024年版)》) issued by the NDRC and the MOFCOM on September 6, 2024 and came into effect on November 1, 2024, which lists the special management measures for foreign investment access for industries regulated by the Negative List, such as equity requirements and senior management requirements. While strengthening investment promotion and protection, the Foreign Investment Law further regulates foreign investment management and proposes the establishment of a foreign investment information reporting system that replaces the original foreign investment enterprise approval and filing system of the MOFCOM.

The foreign investment information reporting is subject to the Foreign Investment Information Reporting Method (《外商投資信息報告辦法》) jointly developed by the MOFCOM and the SAMR, which came into effect on January 1, 2020. According to the Foreign Investment Information Reporting Method, the MOFCOM is responsible for coordinating and guiding the reporting of foreign investment information nationwide. The competent commercial department of the local people's government at or above the county level, as well as the relevant agencies of the pilot free trade zone and the national economic and technological development zone, are responsible for reporting information on foreign investment in the region. Foreign investors who directly or indirectly carry out investment activities in China shall submit investment information to the competent commercial department through the enterprise registration system and the national enterprise credit information publicity system and the reporting methods include initial reports, change reports, cancellation reports, and annual reports. Foreign investors who establish foreign invested enterprises in China or acquire domestic non-foreign-invested enterprises through equity merger and acquisition shall submit initial reports through the enterprise registration system when applying for the registration of the establishment of foreign-invested enterprises or applying for the registration of the change of the acquired enterprises. If the change in the information of initial reports involves registration or filing of the change of enterprises, foreign-invested enterprises shall submit change reports through the enterprise registration system when applying for the registration or filing of change of enterprises. If the change in the information of initial reports does not involve registration or filing of the change of enterprises, foreign-invested enterprises shall submit change reports through the enterprise registration system within twenty (20) business days after the change. Foreign-invested listed companies may report information on changes in investors and their shareholdings only when the cumulative change in the foreign investors' shareholding ratio exceeds 5% or the foreign parties' shareholding or relative holding status have changed.

Regulations on The Security Review of Foreign Investment

On December 19, 2020, the NDRC and the MOFCOM jointly promulgated the Measures on the Security Review of Foreign Investment (《外商投資安全審查辦法》), effective on January 18, 2021, setting forth provisions concerning the security review mechanism on foreign investment, including the types of investments subject to review, the scopes of review and procedures to review, among others.

Regulations in Relation to Product Liability

The Product Quality Law of the PRC (《中華人民共和國產品質量法》), promulgated by the SCNPC on February 22, 1993 and latest amended on December 29, 2018 (the “Product Quality Law”), is the principal governing law relating to the supervision and administration of product quality. According to the Product Quality Law, manufacturers shall be liable for the quality of products produced by them and sellers shall take measures to ensure the quality of the products sold by them. A manufacturer shall be liable to compensate for any bodily injuries or damage to property other than the defective product itself resulting from the defects in the product, unless the manufacturer is able to prove that: (1) the product has never been circulated; (2) the defects causing injuries or damage did not exist at the time when the product was circulated; or (3) the science and technology at the time when the product was circulated were at a level incapable of detecting the defects. A seller shall be liable to compensate for any bodily injuries or damage to property of others caused by the defects in the product if such defects are attributable to the seller. A seller shall pay compensation if it fails to indicate neither the manufacturer nor the supplier of the defective product. A person who is injured or whose property is damaged by the defects in the product may claim for compensation from the manufacturer or the seller.

REGULATORY OVERVIEW

Pursuant to the PRC Civil Code (《中華人民共和國民法典》) promulgated by the NPC on May 28, 2020 and coming into effect on January 1, 2021, where a patient suffers damage due to defects in drugs, he may seek compensation from the drug marketing authorization holder, producer or also from the medical institution. Where the patient seeks compensation from the medical institution, the medical institution, after it has made the compensation, shall have the right to recover the compensation from the liable drug marketing authorization holder or producer.

The Law of the PRC on the Protection of the Rights and Interests of Consumers (《中華人民共和國消費者權益保護法》) was promulgated on October 31, 1993 and latest amended on October 25, 2013 and came into effect on March 15, 2014 to protect consumers' rights when they purchase or use goods and accept services. All business operators must comply with this law when they manufacture or sell goods and/or provide services to customers. All business operators must pay high attention to protecting customers' privacy and must strictly keep confidential any consumer information they obtain during their business operations.

Regulations in Relation to Production Safety

The Production Safety Law of the PRC (《中華人民共和國安全生產法》), promulgated by the SCNPC on June 29, 2002 and latest amended on June 10, 2021 and came into effect on September 1, 2021, is the basic law for governing production safety. It provides that, any entity whose production safety conditions do not meet the requirements may not engage in production and business operation activities. The production and business operation entities shall educate and train employees regarding production safety so as to ensure that the employees have the necessary knowledge of production safety, are familiar with the relevant regulations and rules for safe production and the rules for safe operation, master the skills of safe operation in their own positions, understand the emergency measures, and know their own rights and duties in terms of production safety. Employees who fail the education and training programs on production safety may not commence working in their positions. Safety facilities of new building, rebuilding or expanding project (the "construction project") shall be designed, constructed and put into operation simultaneously with the main body of the project. Investment in safety facilities shall be included in the budget of the construction project.

Regulations in Relation to Environmental Protection and Fire Safety

According to the Environmental Protection Law of the PRC (《中華人民共和國環境保護法》), promulgated by the SCNPC on December 26, 1989 and latest amended on April 24, 2014 and came into effect on January 1, 2015, the Environmental Impact Assessment Law of the PRC (《中華人民共和國環境影響評價法》), promulgated by the SCNPC on October 28, 2002 and latest amended on December 29, 2018, and the Administrative Regulations on the Environmental Protection of Construction Project (《建設項目環境保護管理條例》), promulgated by the State Council on November 29, 1998 and latest amended on July 16, 2017 and came into effect on October 1, 2017, enterprises which plan to construct projects shall engage qualified professionals to provide the assessment reports, assessment form, or registration form on the environmental impact of such projects. The assessment reports, assessment form, or registration form shall be filed with or approved by the relevant environmental protection bureau prior to the commencement of any construction work.

Enterprises generating environmental pollution in the PRC must comply with the PRC Law on the Prevention from Water Pollution (《中華人民共和國水污染防治法》) promulgated by the SCNPC on May 11, 1984, and last amended on June 27, 2017, the PRC Law on the Prevention from Atmospheric Pollution (《中華人民共和國大氣污染防治法》) promulgated by the SCNPC on September 5, 1987, and last amended on October 26, 2018, the PRC Law on the Prevention from Noise Pollution (《中華人民共和國噪聲污染防治法》) promulgated by the SCNPC on December 24, 2021 and effective from June 5, 2022, and the PRC Law on the Prevention from Environmental Pollution of Solid Waste (《中華人民共和國固體廢物環境防治法》) promulgated by the SCNPC on October 30, 1995, and last amended on April 29, 2020. The abovementioned laws regulate extensive issues in relation to the environment protection including waste water discharge, air pollution control, noise emission and solid waste pollution control. Pursuant to these laws, all the enterprises that may cause environmental pollution in the course of their production and business operation shall introduce environmental protection measures in their plants and establish a reliable system for environmental protection.

Enterprises that engage in the activities of industry, construction, catering, and medical treatment, etc. that discharges sewage into urban drainage facilities shall apply to the relevant competent urban drainage department for the permit for discharging sewage into drainage pipelines under relevant laws and regulations, including the Regulations on Urban Drainage

REGULATORY OVERVIEW

and Sewage Disposal (《城鎮排水與污水處理條例》), which was promulgated on October 2, 2013 and came into force on January 1, 2014, and the Measures for the Administration of Permits for the Discharge of Urban Sewage into the Drainage Network (《城鎮污水排入排水管網許可管理辦法》), which was promulgated on January 22, 2015 and last amended on December 1, 2022 and took effect on February 1, 2023. Drainage entities covered by urban drainage facilities shall discharge sewage into urban drainage facilities in accordance with the relevant provisions of the State. Where a drainage entity needs to discharge sewage into urban drainage facilities, it shall apply for a drainage license in accordance with the provisions of these Measures. The drainage entity that has not obtained the drainage license shall not discharge sewage into urban drainage facilities.

According to the Administrative Measures on Pollutant Discharge Permit (《排污許可管理辦法》) issued by the Ministry of Ecology and Environment on April 1, 2024 and came into effect on July 1, 2024, enterprises, public institutions and other producers and operators that are subject to the administration of pollutant discharge permits shall apply for pollutant discharge permit and discharge pollutants in accordance with the requirements of the pollutant discharge permit; and those who have not obtained the pollutant discharge permits shall not discharge pollutants. According to the Classification Management List for Fixed Source Pollution Permits (2019 Edition) (《固定污染源排污許可分類管理名錄(2019年版)》), the manufacturing of biological drugs and products falls into the classification management scope for fixed source pollution permits.

According to the Opinions of the general offices of the Chinese Communist Party Central Committee and the State Council on Fully and Accurately Implementing the New Development Concept and Doing a Good Job in Carbon Peak and Carbon Neutrality, (《中共中央、國務院關於完整準確全面貫徹新發展理念做好碳達峰碳中和工作的意見》) promulgated and came into effect on September 22, 2021, significant progress will be made in green transformation by 2030, with key industries reaching advanced international energy efficiency levels. By 2060, a green, low-carbon, circular economy and a clean, safe, and efficient energy system will be fully established, achieving the carbon neutrality goal.

According to the Fire Safety Law of the PRC (《中華人民共和國消防法》) promulgated by the SCNPC in April 1998, last amended and effective on April 29, 2021, and the Interim Provisions on Administration of Fire Protection Design Review and Acceptance of Construction Projects (《建設工程消防設計審查驗收管理暫行規定》) (the “Interim Provisions”) promulgated by the Ministry of Housing and Urban-Rural Development on April 1, 2020, and last amended on August 21, 2023, the fire protection design or construction of a construction project must conform to the national fire protection technical standards for project construction and construction projects shall undergo the fire protection design review and acceptance system. The special construction projects as defined in the Interim Provisions must apply to the fire control department for fire protection design review, and complete the fire protection acceptance procedures after the completion of the construction project. The construction unit of other construction projects must complete the fire protection filing of the fire protection design and the completion acceptance within five (5) business days after the completion acceptance of the construction project. If a construction project fails to pass the fire safety inspection before it is put into use, or does not meet the fire safety requirements after the inspection, it will be ordered to suspend the construction and use of such project, or suspend production and business, and be imposed a fine.

Regulations in Relation to Prevention and Control of Occupational Diseases

The Prevention and Control of Occupational Diseases Law of the PRC (《中華人民共和國職業病防治法》), which was promulgated by the SCNPC on October 27, 2001 and latest amended on December 29, 2018 (the “Prevention and Control of Occupational Diseases Law”), is the basic law for the prevention and control of occupational diseases. According to the Prevention and Control of Occupational Diseases Law, budget for facilities for the prevention and control of occupational diseases of a construction project shall be included in the budget of the project and those facilities shall be designed, constructed and put into operation simultaneously with the main body of the project. The entity that takes charge of the project should carry out the assessment of the effectiveness of measures for the prevention and control of occupational diseases before the final acceptance of the construction project. In addition, employers shall take required administrative measures to prevent and control occupational diseases in work.

REGULATORY OVERVIEW

Employee Stock Option Plans

On February 15, 2012, the SAFE issued the Circular on Issues concerning the Foreign Exchange Administration for Domestic Individuals Participating in Share Incentive Plans of Overseas Publicly-Listed Companies (《關於境內個人參與境外上市公司股權激勵計劃外匯管理有關問題的通知》) (the “Share Option Rules”). Under the Share Option Rules, the PRC citizens or residents habitually residing in the PRC continuously for over one year, with a few exceptions, and who have been granted, restricted shares or share options by an overseas listed company according to its employee share option or share incentive plan, are required to appoint a qualified PRC agent, register with the SAFE or its local counterparts and complete certain other procedures related to the shareholding plan, share option plan or other similar share incentive plans. Concurrent with registration with the SAFE or its local counterparts, the qualified PRC agent is required to obtain an approval from the SAFE for an annual allowance for the foreign exchanges in connection with shareholding or the exercise of a share option, and an approval for opening a special foreign exchange account at a PRC domestic bank to hold the funds required in connection with share purchases or share option exercises, returned principals or profits upon sale of shares, dividends issued on the stock and any other income or expenditures approved by the SAFE. Currently, foreign exchange income of the participating PRC residents received from the sale of share and dividends distributed by the overseas listed company are required to be fully remitted into such special domestic foreign currency account before distribution to such participants. In addition, the PRC agents are required to amend or deregister the registrations with the SAFE or its local counterparts in case of any material change in, or termination of, the share incentive plans within the time periods provided by the Share Option Rules.

Regulations in Relation to Employment and Social Securities

Pursuant to the Labor Law of the PRC (《中華人民共和國勞動法》), promulgated by the SCNPC on July 5, 1994 and latest amended on December 29, 2018 and the Labor Contract Law of the PRC (《中華人民共和國勞動合同法》), promulgated by the SCNPC on June 29, 2007 and latest amended on December 28, 2012 and came into effect on July 1, 2013, employers shall execute written labor contracts with full-time employees. All employers shall comply with local minimum wage standards. Employers shall establish a comprehensive management system to protect the rights of their employees, including a system governing occupational health and safety to provide employees with occupational training to prevent occupational injury, and employers are required to truthfully inform prospective employees of the job description, working conditions, working location, occupational hazards, and status of safe production as well as remuneration and other conditions.

According to Social Security Law of the PRC (《中華人民共和國社會保險法》), which was promulgated on October 28, 2010 and amended on December 29, 2018, an employer is required to make contributions to social insurance schemes for its employees, including basic pension insurance, basic medical insurance, unemployment insurance, maternity insurance and work-related injury insurance. If the employer fails to make social insurance contributions in full and on time, the social insurance authorities may demand the employer to make payments or supplementary payments for the unpaid social insurance premium within a prescribed time limit together with a 0.05% surcharge of the unpaid social insurance premium from the due date. If the payment is not made within such time limit, the relevant administrative authorities will impose a fine ranging from one to three times the total outstanding amount.

According to the Interim Measures for the Participation in Social Insurance of Foreigners Employed in China (《在中國境內就業的外國人參加社會保險暫行辦法》), which was promulgated on September 6, 2011, amended on December 23, 2024 and became effective on the same date, employers who hire foreigners shall register them for social insurance within 30 days from the date of obtaining employment certificates. Foreigners who participate in social insurance and meet the requirements shall enjoy social insurance benefits in accordance with the law.

According to the Reform Plan of the State Tax and Local Tax Collection Administration System (《國稅地稅徵管體制改革方案》), which was promulgated on July 20, 2018, commencing from January 1, 2019, all the social insurance premiums including the premiums of the basic pension insurance, unemployment insurance, maternity insurance, work-related injury insurance and basic medical insurance shall be collected by the tax authorities. According to the Notice on Conducting the Relevant Work Concerning the Administration of Collection of Social Insurance Premiums in a Steady, Orderly and Effective Manner (《關於

REGULATORY OVERVIEW

穩妥有序做好社會保險費徵管有關工作的通知》) promulgated by the General Office of the STA on September 13, 2018, all the local authorities responsible for the collection of social insurance are strictly forbidden to conduct self-collection of historical unpaid social insurance contributions from enterprises. The Notice on Implementing Measures to Further Support and Serve the Development of Private Economy (《關於實施進一步支持和服務民營經濟發展若干措施的通知》), promulgated by the STA on November 16, 2018, repeats that tax authorities at all levels may not organize self-collection of arrears of taxpayers including private enterprises from the previous years. The Notice of General Office of the State Council on Promulgation of the Comprehensive Plan for the Reduction of Social Insurance Premium Rate (《國務院辦公廳關於印發降低社會保險費率綜合方案的通知》), promulgated on April 1, 2019, requires steady advancement of the reform of the system of social security collection. In principle, the basic pension insurance for enterprise employees and other insurance types for enterprise employees shall be collected temporarily according to the existing collection system to stabilize the payment method. It also emphasizes that the historical unpaid arrears of the enterprise shall be properly treated. In the process of reformation of the collection system, it is not allowed to conduct self-collection of historical unpaid arrears from enterprises, and it is not allowed to adopt any method of increasing the actual payment burden of small and micro enterprises to avoid causing difficulties in the production and operation of the enterprises.

According to the Administrative Regulations on Housing Provident Funds (《住房公積金管理條例》), which was promulgated on April 3, 1999 and latest amended on March 24, 2019, employers are required to make contribution to housing provident funds for their employees. Where an employer fails to pay up housing provident funds, the housing provident fund administration center may order it to make payment within a prescribed time limit. If the employer still fails to do so, the housing provident fund administration center may apply to the court for compulsory enforcement of the unpaid amount.

Regulations in Relation to Information Security and Data Privacy

Data Security and Export

The SCNPC promulgated the Data Security Law of the PRC (《中華人民共和國數據安全法》), on June 10, 2021 (effective from September 1, 2021), for the establishment of a data classification and grading protection system to conduct classified and hierarchical protection of data. Entities engaged in data processing activities shall, in accordance with laws and regulations, establish a sound full-process data security management system, organize data security education and training, and take corresponding technical measures and other necessary measures to ensure data security.

The Measures for Cybersecurity Review (《網絡安全審查辦法》) (the “MCR”) were promulgated jointly by the Cyberspace Administration of China and the other 12 governmental authorities, and became effective on February 15, 2022. The MCR stipulates that the operators carrying out data processing activities that affect or may affect national security, shall conduct cyber security review. Pursuant to Article 2 of the MCR, besides the procurement of network products and services by critical information infrastructure operators, any data processing activity by network platform operators that affects or may affect national security shall be subject to the cybersecurity review. In accordance with Article 7 of the MCR, network platform operators mastering personal information of more than one million users must apply to the Cybersecurity Review Office for cybersecurity review when listing abroad.

According to the Measures for Security Assessment of Data Export (《數據出境安全評估辦法》) issued by the Cyberspace Administration of China on July 7, 2022 and came into effect on September 1, 2022, a data processor that provides data overseas under any of the following circumstances shall apply to the national cyberspace administration for the security assessment of the outbound data transfer through local provincial cyberspace administration: (i) a data processor provides important data abroad; (ii) the critical information infrastructure operator or the data processor that has processed the personal information of more than 1 million people provides personal information abroad; (iii) the data processor that has provided the personal information of over 100,000 people or the sensitive personal information of over 10,000 people cumulatively since January 1 of the previous year provides personal information abroad; and (iv) any other circumstance where an application for the security assessment of outbound data transfer is required by the national cyberspace administration.

REGULATORY OVERVIEW

According to the Measures for Standard Contract for Outbound Transfer of Personal Information (《個人信息出境標準合同辦法》) issued by the Cyberspace Administration of China on February 22, 2023 and effective from June 1, 2023, to provide personal information to an overseas recipient through the conclusion of the standard contract, a personal information processor shall meet all of the following circumstances: (i) it is not a critical information infrastructure operator; (ii) it has processed the personal information of less than one million individuals; (iii) it has cumulatively provided the personal information of less than 100,000 individuals to overseas recipients since January 1 of the previous year; and (iv) it has cumulatively provided the sensitive personal information of less than 10,000 individuals since January 1 of the previous year.

According to the Provisions on Facilitating and Regulating Cross-border Data Flows (《促進和規範數據跨境流動規定》), both issued by the Cyberspace Administration of China on and effective from March 22, 2024, a data handler that is not a critical information infrastructure operator, will be exempted from declaring for security assessment for outbound data transfer, signing a standard contract with overseas recipient or passing the personal protection certification, if such data handler accumulatively transfers overseas ordinary personal information of less than 100,000 individuals since the January 1 of the current year.

Personal Information Protection

According to the Civil Code (《民法典》), personal information of natural persons is protected by law. If any organization or individual needs to obtain other people's personal information, they should obtain it in accordance with the law and ensure the security of the information. They must not illegally collect, use, process, or transmit other people's personal information, and must not illegally buy, sell, provide, or disclose the information. The Personal Information Protection Law of the PRC (《中華人民共和國個人信息保護法》) promulgated by the SCNPC on August 20, 2021 and implemented on November 1, 2021, further emphasizes the obligations and responsibilities of processors for the protection of personal information, and requests higher level of protective measures on the processing of sensitive personal information.

According to the Cybersecurity Law of the PRC (《中華人民共和國網絡安全法》), promulgated by the SCNPC on November 7, 2016 and effective on June 1, 2017, as amended on October 28, 2025 and came into effect on January 1, 2026, network operators must follow the principles of legality, legitimacy and necessity when collecting and using personal information, and publicly disclose the rules for collection and use, clearly state the purpose, method and scope of collecting and using information, and obtain the consent of the person whose data is being collected. Network operators shall not collect personal information unrelated to the services they provide. Network operators are not allowed to leak, tamper with, or damage the personal information they collect; they are not allowed to provide personal information to others without the consent of the person whose data is being collected. However, this does not apply to cases where a specific individual cannot be identified and the identity cannot be recovered after processing. Network operators should take technical measures and other necessary measures to ensure the security of the personal information they collect and prevent leakage, damage and loss of information.

Laws and Regulations in Relation to Anti-Bribery

According to the Anti-Unfair Competition Law of the PRC (《中華人民共和國反不正當競爭法》), and the Interim Provisions on the Prohibition of Commercial Bribery (《關於禁止商業賄賂行為的暫行規定》) promulgated by the State Administration of Industry and Commerce of the PRC (中華人民共和國國家工商行政管理總局, the predecessor of the SAMR) on November 15, 1996, any business operator shall not provide or promise to provide economic benefits (including cash, other property or by other means) to a counter-party in a transaction or a third party that may be able to influence the transaction, in order to entice such party to secure a transactional opportunity or competitive advantages for the business operator. Any business operator breaching the relevant anti-bribery rules above-mentioned may be subject to administrative punishment or criminal liability depending on the seriousness of the cases.

Pursuant to the Provisions on the Establishment of Adverse Records of Commercial Briberies in the Medicine Purchase and Sales Industry (《關於建立醫藥購銷領域商業賄賂不良記錄的規定》), promulgated by the National Health and Family Planning Commission (currently the NHC) and came into effect on March 1, 2014, any medicine production and operation enterprises or agents that are involved in criminal, investigational or administrative procedures for commercial bribery will be listed in the adverse records of commercial bribes

REGULATORY OVERVIEW

by the relevant government authorities, as a result of which, for two years from the date the list of adverse records of commercial bribes is published, (i) their products cannot be purchased by public medical institutions or medical and health institutions receiving financial subsidies within the relevant provinces, and (ii) the scores of their products in the centralized tender processes of public medical institutions or medical and health institutions receiving financial subsidies in other provinces will be reduced. As for those enterprises or agents listed in adverse records twice within five years, their products cannot be purchased by public medical institutions or medical and health institutions receiving financial subsidies throughout China for two years from the date the list of adverse records of commercial bribes is published.

REGULATIONS ON TAXATION

Enterprise Income Tax

The PRC Enterprise Income Tax Law (《中華人民共和國企業所得稅法》) and Regulations for the Implementation of the PRC Enterprise Income Tax (《中華人民共和國企業所得稅法實施條例》) (collectively, the “EIT Laws”) were promulgated on March 16, 2007 and December 6, 2007, respectively, and were amended on December 29, 2018 and April 23, 2019, respectively. Pursuant to the EIT Laws, taxpayers consist of resident enterprises and non-resident enterprises. Resident enterprises are defined as enterprises that are established in China in accordance with PRC laws, or that are established in accordance with the laws of foreign countries but whose actual or de facto control is administered within China. Non-resident enterprises are defined as enterprises that are set up in accordance with the laws of foreign countries and whose actual administration is conducted outside China, but have established institutions or premises in China, or have no such established institutions or premises but have income generated from inside China. Pursuant to the EIT Laws and relevant implementing regulations, a uniform 25% enterprise income tax rate is imposed to both foreign invested enterprises and domestic enterprises. However, if non-resident enterprises have not formed permanent establishments or premises in China, or if they have formed permanent establishment institutions or premises in China but there is no actual relationship between the relevant income derived in China and the established institutions or premises set up by them, the enterprise income tax is, in that case, set at the rate of 10% for their income sourced from inside China. The enterprise income tax rate is reduced to 20% for qualifying small low-profit enterprises. The high-tech enterprises that need full support from the PRC’s government will enjoy a reduced tax rate of 15% for enterprise income tax.

Value-added Tax

Pursuant to the Value-Added Tax Law of the PRC (《中華人民共和國增值稅法》), which was promulgated by the SCNPC on December 25, 2024 and effective from January 1, 2026, entities and individuals engaging in selling goods, services, intangible assets, or immovables within the territory of the PRC are taxpayers of the value-added tax (“VAT”).

According to the Notice of the Ministry of Finance and the State Taxation Administration on the Adjusting Value-added Tax Rates (《財政部、稅務總局關於調整增值稅稅率的通知》) effective in May 2018, the VAT rates of 17% and 11% on sales, imported goods shall be adjusted to 16% and 10%, respectively.

According to the Announcement of the Ministry of Finance, the State Taxation Administration and the General Administration of Customs on Relevant Policies for Deepening the Value-Added Tax Reform (《財政部、稅務總局、海關總署關於深化增值稅改革有關政策的公告》) promulgated on March 20, 2019 and effective from April 1, 2019, the VAT rates of 16% and 10% on sales, imported goods shall be adjusted to 13% and 9%, respectively.

REGULATIONS ON FOREIGN EXCHANGE

Foreign Exchange Regulation

On January 29, 1996, the State Council promulgated the Administrative Regulations on Foreign Exchange of the PRC (《中華人民共和國外匯管理條例》) which became effective on April 1, 1996 and was amended on January 14, 1997 and August 5, 2008. Foreign exchange payments under current account items shall, pursuant to the administrative provisions of the foreign exchange control department of the State Council on payments of foreign currencies and purchase of foreign currencies, be made using self-owned foreign currency or foreign currency purchased from financial institutions engaging in conversion and sale of foreign currencies by presenting the valid document. Domestic entities and domestic individuals

REGULATORY OVERVIEW

making overseas direct investments or engaging in issuance and trading of overseas securities and derivatives shall process registration formalities pursuant to the provisions of the foreign exchange control department of the State Council.

On November 19, 2012, the SAFE issued the Circular of Further Improving and Adjusting Foreign Exchange Administration Policies on Foreign Direct Investment (《關於進一步改進和調整直接投資外匯管理政策的通知》), or the SAFE Circular 59, which came into effect on December 17, 2012 and was revised on May 4, 2015, October 10, 2018 and partially abolished on December 30, 2019. The SAFE Circular 59 aims to simplify the foreign exchange procedure and promote the facilitation of investment and trade. According to the SAFE Circular 59, the opening of various special purpose foreign exchange accounts, such as pre-establishment expenses accounts, foreign exchange capital accounts and guarantee accounts, the reinvestment of RMB proceeds derived by foreign investors in the PRC, and remittance of foreign exchange profits and dividends by a foreign-invested enterprise to its foreign shareholders no longer require the approval or verification of the SAFE, multiple capital accounts for the same entity may be opened in different provinces as well. Later, the SAFE promulgated the Circular on Further Simplifying and Improving Foreign Exchange Administration Policies in Respect of Direct Investment (《關於進一步簡化和改進直接投資外匯管理政策的通知》) in February 2015, which was partially abolished in December 2019, prescribed that the bank instead of the SAFE can directly handle the foreign exchange registration and approval under foreign direct investment while SAFE and its branches indirectly supervise the foreign exchange registration and approval under foreign direct investment through the bank.

On May 10, 2013, the SAFE issued the Administrative Provisions on Foreign Exchange in Domestic Direct Investment by Foreign Investors (《外國投資者境內直接投資外匯管理規定》), or the SAFE Circular 21, which became effective on May 13, 2013, amended on October 10, 2018 and partially abolished on December 30, 2019. The SAFE Circular 21 specifies that the administration by the SAFE or its local branches over direct investment by foreign investors in the PRC must be conducted by way of registration and banks must process foreign exchange business relating to the direct investment in the PRC based on the registration information provided by the SAFE and its branches.

According to the Notice on Relevant Issues Concerning the Administration of Foreign Exchange for Overseas Listing (《關於境外上市外匯管理有關問題的通知》) issued by the SAFE on December 26, 2014, the domestic companies shall register the overseas listed with the foreign exchange control bureau located at its registered address in 15 working days after completion of the overseas listing and issuance. The funds raised by the domestic companies through overseas listing may be repatriated to China or deposited overseas, provided that the intended use of the fund shall be consistent with the contents of the document and other public disclosure documents.

According to the Notice of the State Administration of Foreign Exchange on Reforming the Management Mode of Foreign Exchange Capital Settlement of Foreign Investment Enterprises (《國家外匯管理局關於改革外商投資企業外匯資本金結匯管理方式的通知》), or the SAFE Circular 19 promulgated on March 30, 2015, coming effective on June 1, 2015 and partially abolished on December 30, 2019 and March 23, 2023, foreign-invested enterprises could settle their foreign exchange capital on a discretionary basis according to the actual needs of their business operations. Whilst, foreign-invested enterprises are prohibited to use the foreign exchange capital settled in RMB (a) for any expenditures beyond the business scope of the foreign-invested enterprises or forbidden by laws and regulations; (b) for direct or indirect securities investment; (c) to provide entrusted loans (unless permitted in the business scope), repay loans between enterprises (including advances by third parties) or repay RMB bank loans that have been on-lent to a third party; and (d) to purchase real estates not for self-use purposes (save for real estate enterprises).

On June 9, 2016, the SAFE issued the Notice of the State Administration of Foreign Exchange on Reforming and Standardizing the Foreign Exchange Settlement Management Policy of Capital Account (《國家外匯管理局關於改革和規範資本項目結匯管理政策的通知》), or the SAFE Circular 16, which came into effect on the same day and partially amended on December 4, 2023. The SAFE Circular 16 provides that discretionary foreign exchange settlement applies to foreign exchange capital, foreign debt offering proceeds and remitted foreign listing proceeds, and the corresponding RMB capital converted from foreign exchange may be used to extend loans to related parties or repay inter-company loans (including advances by third parties). However, there remain substantial uncertainties with respect to the SAFE Circular 16's interpretation and implementation in practice.

REGULATORY OVERVIEW

On October 23, 2019, the SAFE promulgated the Notice on Further Facilitating Cross-Board Trade and Investment (《國家外匯管理局關於進一步促進跨境貿易投資便利化的通知》), which became effective on the same date (except for Article 8.2, which became effective on January 1, 2020), and partially amended on December 4, 2023. The notice canceled restrictions on domestic equity investments made with capital funds by non-investing foreign-funded enterprises. In addition, restrictions on the use of funds for foreign exchange settlement of domestic accounts for the realization of assets have been removed and restrictions on the use and foreign exchange settlement of foreign investors' security deposits have been relaxed. Eligible enterprises in the pilot area are also allowed to use revenues under capital accounts, such as capital funds, foreign debts and overseas listing revenues for domestic payments without providing materials to the bank in advance for authenticity verification on an item-by-item basis, while the use of funds should be true, in compliance with applicable rules and conforming to the current capital revenue management regulations.

According to the Circular on Optimizing Administration of Foreign Exchange to Support the Development of Foreign-related Business (《關於優化外匯管理支持涉外業務發展的通知》) issued by the SAFE on April 10, 2020, eligible enterprises are allowed to make domestic payments by using their capital funds, foreign credits and the income under capital accounts of overseas listing, without submitting the evidentiary materials concerning authenticity of such capital for banks in advance, provided that their capital use is authentic and in compliance with administrative regulations on the use of income under capital accounts. The bank in charge shall conduct post spot checking in accordance with the relevant requirements.

Regulations in Relation to Overseas Securities Offering and Listing by Domestic Companies

On July 6, 2021, the general offices of the Chinese Communist Party Central Committee and the General Office of the State Council jointly promulgated the Opinions on Strictly Cracking Down on Illegal Securities Activities in accordance with the Law (《關於依法從嚴打擊證券違法活動的意見》) (the “Opinions on Securities Activities”). The Opinions on Securities Activities emphasize the need to strengthen the administration over illegal securities activities and the supervision on overseas listings by China-based companies and proposed to take effective measures, such as promoting the construction of relevant regulatory systems to deal with the risks and incidents faced by China-based overseas-listed companies.

According to the Trial Administrative Measures of Overseas Securities Offering and Listing by Domestic Companies (《境內企業境外發行證券和上市管理試行辦法》) and five relevant guidelines, issued by the CSRC on February 17, 2023 and effective from March 31, 2023 (hereinafter referred to as the “Overseas Listing Trial Measures”), where a domestic company seeks overseas securities issuance and listing, the issuer shall file with the CSRC in accordance with the Overseas Listing Trial Measures. If an issuer procures an overseas initial public offering or listing, it shall file with the CSRC within three (3) business days after submitting application documents for overseas securities issuance and listing.

According to the Provisions on Strengthening Confidentiality and Archives Administration of Overseas Securities Offering and Listing by Domestic Companies (《關於加強境內企業境外發行證券和上市相關保密和檔案管理工作的規定》) jointly issued by the CSRC and other departments on February 24, 2023 and effective on March 31, 2023, in the overseas offering and listing activities of domestic enterprises, domestic enterprises, and securities companies and securities service institutions that provide corresponding services shall strictly comply with the applicable laws and regulations of the PRC and satisfy the requirements of these Provisions, enhance the legal awareness of safeguarding state secrets and strengthening archives administration, establish and improve the confidentiality and archives work system, and take necessary measures to fulfill the confidentiality and archives administration obligations, and shall not divulge state secrets or work secrets of state organs, or harm the interests of the state or the public. A domestic enterprise that, either directly or through its overseas listed entity, publicly discloses or provides to relevant securities companies, securities service institutions, overseas regulators, and other entities and individuals, any documents and materials that involve state secrets or work secrets of state organs, shall obtain approval from the competent department with the power of examination and approval according to the law, and report to the administrative department of confidentiality at the same level for filing. A domestic enterprise that, either directly or through its overseas listed entity, publicly discloses or provides to relevant securities companies,

REGULATORY OVERVIEW

securities service institutions, overseas regulators, and other entities and individuals, other documents and materials whose divulgence will have adverse impact on national security or public interest, shall strictly undergo the relevant procedures in accordance with the relevant regulations of the state.

Regulations in Relation to the “Full Circulation” of H Share

In accordance with the Guidelines for the “Full Circulation” Program for Domestic Unlisted Shares of H-share Listed Companies (《H股公司境內未上市股份申請“全流通”業務指引》) which was promulgated by the CSRC on November 14, 2019 and came into effect on the same date, which was partly revised on August 10, 2023 according to the Decision on Revising and Abolishing Part of Securities and Futures Policy Documents by CSRC (《中國證券監督管理委員會關於修改、廢止部分證券期貨制度文件的決定》), the term “full circulation” means the circulation of domestically unlisted shares (including domestically unlisted shares held by domestic shareholders prior to the listing abroad, additional domestically unlisted shares issued domestically after listing abroad and unlisted shares held by foreign shareholders) of H-share companies on the Stock Exchange. On the premise of complying with relevant laws and regulations as well as policies governing state-owned asset management, foreign investment and industrial supervision, the shareholders of domestically unlisted shares may determine the number and proportion of shares under application for circulation through negotiation at their discretion and entrust a H-share company to file an application for “full circulation”. After the domestically unlisted shares are listed for circulation on the Stock Exchange, they shall not be transferred back to the mainland China. A shareholder of domestically unlisted shares may reduce or increase its holding of the shares involved that are circulating on the Stock Exchange according to relevant business rules. H share companies shall submit a report on the relevant information to the CSRC within 15 days from completion of re-registration of the shares involved in the application to the CSDC.

In accordance with the Notice on Promulgation of the Implementing Rules for “Full Circulation” of H-shares (《關於發佈〈H股“全流通”業務實施細則〉的通知》) which was promulgated by the CSDC and Shenzhen Stock Exchange on December 31, 2019 and came into effect on the same date, it shall apply to the relevant businesses involved in “full circulation” of H-shares, such as cross-border re-registration, custodian and maintenance of holding details, entrustment of transactions and order routing, settlement, management of clearing participants, services of nominee holders etc. Upon completion of information disclosure by a H-share listed company approved by the CSRC to participate in “full circulation” of H-shares, such company shall register anew its fully tradable H-shares free from pledge, freezing, restriction of transfer and other restrictive status with the Hong Kong share registration authorities to have them become shares that can be listed and circulated on the Stock Exchange. The relevant securities shall be deposited centrally with the CSDC in China. The CSDC, as the nominee of the aforesaid securities, shall handle the business such as the depository and maintenance of holding details as well as cross-border clearing and settlement involved in the “full circulation” of H-shares, and provide services of nominee for investors. H-share listed companies shall obtain the authorization from investors and select a domestic securities company to participate in the “full circulation” of H-shares. Investors submit the trading orders for the “full circulation” of H-shares through a domestic securities company. The domestic securities company shall select a Hong Kong securities company through which investors’ trading instructions shall be reported to the Stock Exchange for trading. After transactions are concluded, the CSDC and China Securities Depository and Clearing (Hong Kong) Company Limited shall handle cross-border clearing and settlement of relevant shares and funds. The settlement currency of H-share “full circulation” transaction business is Hong Kong dollars. Where an H-share listed company entrusts the CSDC to distribute cash dividends, it shall file an application with the CSDC. The H-share listed company, when distributing cash dividends, may claim the details of the shares held by relevant investors on the equity registration date for cash dividends from the CSDC. If an investor obtains “fully tradable” non-H-shares listed on the Stock Exchange due to the equity distribution or conversion of H-shares under full circulation, the investor may sell but cannot purchase such securities; if the investor obtains the right to subscribe for shares listed on the Stock Exchange and such right is listed on the Stock Exchange, the investor may sell but shall not exercise such right.

In accordance with the Notice of China Securities Depository and Clearing Co., Ltd Shenzhen Branch on the Release of China Securities Depository and Clearing Co., Ltd Shenzhen Branch H-shares “Full Circulation” Business Guidelines (《中國結算深圳分公司關於發佈〈中國證券登記結算有限責任公司深圳分公司H股“全流通”業務指南〉的通知》) which

REGULATORY OVERVIEW

was promulgated by CSDC Shenzhen Branch on September 20, 2024 and came into effect on September 23, 2024, newly amended in June 2025 and came into effect on June 30, 2025, it specified the business preparation, account arrangement, cross-border share transfer registration and overseas centralized custody, etc. And China Securities Depository and Clearing (Hong Kong) Company Limited also promulgated the Guide to the Program for Full Circulation of H-shares (《中國證券登記結算(香港)有限公司H股“全流通”業務指南》) to specify the relevant escrow, custody, agent service of China Securities Depository and Clearing (Hong Kong) Company Limited, arrangement for settlement and delivery and other relevant matters.

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

OVERVIEW

We are an ophthalmology-focused biotech company, committed to becoming a global leader in the development and commercialization of innovative ophthalmic treatments. Leveraging our expertise in small-molecule drug discovery, advanced formulation development and translational research in ophthalmic diseases, we are dedicated to building a competitive and differentiated product pipeline covering ocular indications affecting the surface and back of the eye with significant unmet clinical needs.

Our history can be traced back to September 2016, when our Company was founded by Dr. Shen, as a limited liability company under the laws of the PRC. For the background and the relevant industry experience of Dr. Shen, see “Directors and Senior Management” in this document.

KEY MILESTONES

The following table sets forth the key milestones of our corporate and business development.

Year	Milestone events
2016	Our Company was established under the name of VivaVision Biotech (Shanghai) Co., Ltd. (維眸生物科技(上海)有限公司). We completed the Series Angel Financing and Series A Financing and raised RMB20 million.
2018	We completed the Series B Financing and raised RMB50 million.
2019	We completed the Series C Financing and raised RMB65 million.
2020	We obtained an IND approval from the FDA for VVN001.
2021	We completed the Series D Financing and raised RMB300 million. We obtained an IND approval from the NMPA and completed a Phase I clinical trial in China for VVN001.
2022	We completed Phase II clinical trials of VVN001 in the United States and China.
2023	We obtained an IND approval from the NMPA for VVN461 for the treatment of NIAU and an IND approval from the FDA for VVN461 for the treatment of postoperative ocular inflammation. We completed the Series D2 Financing and raised RMB125 million. We completed a Phase I clinical trial of VVN461 in healthy subjects in China.
2024	We obtained an IND approval from the NMPA and completed a Phase I clinical trial in China for VVN1901. We commenced a Phase III clinical trial of VVN001 in China. We completed a Phase II clinical trial of VVN461 in the United States in patients undergoing routine unilateral cataract surgery.

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

Year	Milestone events
2025	We completed a Phase II clinical trial of VVN461 in China in patients with NIAU. We received the BTD from the NMPA for VVN461(HD) for the treatment of NIAU. We obtained an IND approval of VVN432 from the NMPA for the treatment of CRS and commenced a Phase I clinical trial in China. We commenced a Phase II clinical trial of VVN1901. We obtained an IND approval from the NMPA for VVN461 for the treatment of SS-DED. We commenced a Phase III clinical trial of VVN461(HD) in NIAU patients in China. We completed the Series D2+ Financing and raised RMB175 million.

OUR PRINCIPAL SUBSIDIARIES

The following sets forth the information on our subsidiaries that have made material contribution to our operating results during the Track Record Period.

Subsidiaries	Place of incorporation	Date of incorporation	Registered capital/ Issued share capital	Principal activities
VivaVision Shanghai . . .	PRC	July 11, 2023	RMB23,000,000	Research and development of biochemistry product technologies; medical research and experimental development
VivaVision Hong Kong .	Hong Kong	January 16, 2023	1 share	Research and development of biochemistry product technologies; medical research and experimental development

As of the Latest Practicable Date, our other subsidiaries were principally engaged in investment holding. For details, see note 1 to the Accountants’ Report in Appendix I to this document.

ESTABLISHMENT AND MAJOR SHAREHOLDING CHANGES OF OUR COMPANY

1. Establishment of Our Company, Series Angel Financing and Series A Financing

On September 22, 2016, our Company was founded by Dr. Shen as a limited liability company under the laws of the PRC. Dr. Shen subscribed for registered capital of our Company in the amount of RMB5,100,000 in consideration for the transfer of intellectual property rights with an appraised value of approximately RMB5,130,000 to the Company.

In September 2016, (i) Shanghai Benyuan Entrepreneurship Incubator Management Limited (上海本苑創業孵化器管理有限公司) (“Shanghai Benyuan”) subscribed for registered capital of our Company in the amount of RMB1,567,000 at the consideration of RMB4,000,000 (the “Series Angel Financing”). The consideration was fully settled in cash on November 16, 2016; and (ii) Hangzhou Qiandai Investment Management Partnership Enterprise (Limited Partnership) (杭州千岱投資管理合夥企業(有限合夥)) (“Hangzhou Qiandai”) and Xiamen Changchong No. 1 Investment Partnership Enterprise (Limited Partnership) (廈門長翀壹號投資合夥企業(有限合夥)) (“Changchong No. 1”) subscribed for registered capital of our Company in the amount of RMB2,083,000 and RMB1,250,000 at the consideration of RMB10,000,000 and RMB6,000,000, respectively (the “Series A Financing”). The consideration was fully settled in cash on November 22, 2016. See “—Pre-[REDACTED] Investments” for further details.

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

The shareholding structure of our Company upon completion of Series Angel Financing and Series A Financing was as follows:

Shareholder	Registered capital subscribed for (RMB)	Percentage of shareholding (%)
Dr. Shen	5,100,000	51.00
Hangzhou Qiandai	2,083,000	20.83
Shanghai Benyuan ⁽¹⁾	1,567,000	15.67
Changchong No. 1	1,250,000	12.50
Total	10,000,000	100.00

Note:

- (1) In December 2017, Shanghai Benyuan transferred registered capital of our Company in the amount of RMB1,567,000 to Viva Biotech (Shanghai) Ltd. (維亞生物科技(上海)有限公司) (“Viva Biotech”) at nil consideration as its intra-group transaction. In January 2021, April 2023 and September 2023, Viva Biotech transferred registered capital of our Company in the amount of RMB395,238, RMB31,583 and RMB983,179 to Magic Honor Holdings Limited (“Magic Honor”), Hangzhou Morning Spring Feihong Venture Capital Partnership Enterprise (Limited Partnership) (杭州曉池飛鴻創業投資合夥企業(有限合夥)) (“Hangzhou Morning Spring Venture”) and Weixuchen (Shanghai) Entrepreneurship Incubator Limited (維旭晨(上海)創業孵化器有限公司) (“Weixuchen”) at the consideration of RMB10,000,000, RMB2,000,000 and RMB40,579,000, respectively. Such capital transfers were conducted based on arm’s length negotiation between the Shareholders and did not involve any increase of registered capital by our Company.

2. Series B Financing

In July 2018, Beijing Longpan Health Medical Investment Center (L.P.) (北京龍磐健康醫療投資中心(有限合夥)) (“Longpan Health”) subscribed for registered capital in our Company in the amount of RMB3,333,333 at the consideration of RMB50,000,000 (the “Series B Financing”). The consideration was fully settled in cash on September 10, 2019. See “—Pre-[REDACTED] Investments” for further details. Following the completion of Series B Financing, the registered capital of our Company increased from RMB10,000,000 to RMB13,333,333.

3. Establishment of Employee Ownership Platform in 2019

In August 2019, Huzhou Xiulai was established under the laws of the PRC to serve as our Employee Ownership Platform. In August 2019, as a contribution to the pool of awards for our Employee Incentive Scheme, Dr. Shen, Viva Biotech, Hangzhou Qiandai and Changchong No. 1 transferred registered capital in our Company in the amount of RMB510,000, RMB157,000, RMB208,000 and RMB125,000 to Huzhou Xiulai at nil consideration, respectively. Further, in September 2019, Huzhou Xiulai subscribed for registered capital of our Company in the amount of RMB500,000 at the consideration of RMB500,000. Upon completion of such subscription, the registered capital of our Company increased from RMB13,333,333 to RMB13,833,333.

4. Series C Financing

In November 2019, we completed the series C financing (the “Series C Financing”) through capital increases as detailed below. See “—Pre-[REDACTED] Investments” for further details. Following the completion of Series C Financing, the registered capital of our Company increased from RMB13,833,333 to RMB16,477,941.

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

Total	2,763,490	175,000,000	

8. Issuance of Convertible Bond in December 2025

On December 18, 2025, our Company and Wanlian Guangsheng Investment Co., Ltd. (萬聯廣生投資有限公司) (“Wanlian Guangsheng”) entered into a convertible bond investment agreement (the “CB Investment Agreement”), pursuant to which our Company agreed to issue

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

and Wanlian Guangsheng agreed to subscribe for a convertible bond in the principal amount of RMB7.0 million (the “Convertible Bond”). The consideration for the issuance of the Convertible Bond has been irrevocably received by our Company on January 23, 2026.

The terms of the Convertible Bond were arrived at arm’s length negotiation between our Company and Wanlian Guangsheng. A summary of the principal terms and conditions of the Convertible Bond are set out below:

Name of Convertible Bond Subscriber	Wanlian Guangsheng
Principal amount of the Convertible Bond	RMB7,000,000
Issuance date of the Convertible Bond	December 18, 2025
Maturity date of the Convertible Bond (the “Maturity Date”)	September 30, 2026
Interest rate	5% per annum
Basis of consideration	The consideration represents 100% of the principal amount of the Convertible Bond.
Conversion right	The Company shall have the right to convert the principal amount of the Convertible Bond into such number of Shares (“Conversion Shares”) at any time before the Maturity Date, provided that (i) the Shareholders have approved the Conversion, and (ii) no events, conditions or changes have occurred or are reasonably expected to occur that would have a material adverse effect on the Company or the Conversion (the “Conversion Conditions”).
Determination of the number of Conversion Shares	The number of Conversion Shares to be issued by our Company to Wanlian Guangsheng shall be equal to the quotient of (i) the principal amount of the Convertible Bond divided by (ii) the conversion price of RMB63.3258 (the “Conversion Price”). The Conversion Price represents a discount of approximately [REDACTED] to the mid-point of the indicative [REDACTED]. ⁽¹⁾
Redemption right	In the event that the Conversion Conditions have not been satisfied or waived as of the Maturity Date, Wanlian Guangsheng is entitled to redeem the principal amount plus any accrued and unpaid interest calculated at 5% per annum on the principal or to extend the Maturity Date until the satisfaction or waiver of the Conversion Conditions.
Use of proceeds of and strategic benefit from the issuance of the Convertible Bond	As of the Latest Practicable Date, no proceeds from the issuance of the Convertible Bonds had been used. We are of the view that our Company can benefit from the issuance of Convertible Bond by receiving additional general working capital, and the investment from Wanlian Guangsheng demonstrates its confidence in our Group and serves as an endorsement of our performance, strengths and prospects.

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

Effective shareholding assuming the Convertible Bond has been fully converted into Shares at the Conversion Price before Listing	0.38% of the total issued Shares
Lock-up period	The terms under the CB Investment Agreement did not impose any lock-up obligation over the Conversion Shares.
Special Rights of the Convertible Bond	The terms under the CB Investment Agreement did not grant any special right to Wanlian Guangsheng.

Note:

- (1) The discount to the [REDACTED] is calculated based on an adjusted Conversion Price taking into account the share subdivision completed upon the conversion of the Company into a joint stock company and the exchange rate as set out in this document.

9. Conversion into a Joint Stock Company in January 2026

On January 30, 2026, our Company was converted from a limited liability company into a joint stock company with limited liability. Based on the audited net assets of the Group as of November 30, 2025, our Company converted all Shares of the limited liability company into the Shares of the joint stock company. Upon completion of such conversion, the registered capital of our Company was RMB28,824,452 divided into 288,244,520 Shares with nominal value of RMB0.1 each, which was subscribed by all our then Shareholders in proportion to their respective interests in our Company before conversion.

10. Share Transfer in January 2026

In January 2026, Huzhou Xiulai transferred the registered capital of our Company in the amount of RMB273,684 to Wanlian Guangsheng at the consideration of RMB12,999,990. Such capital transfer was conducted based on arm’s length negotiation between the Shareholders and did not involve any increase of registered capital by our Company.

11. PRC Legal Advisers’ Confirmation

As advised by our PRC Legal Advisers, our Company has made all necessary registrations or filings with the relevant local branch of SAMR in respect of the transfers, capital increases and issuances of Shares set out above in all material respects, and such transfers, capital increases and issuances of Shares were conducted in compliance with the applicable PRC laws and regulations in all material respects.

MAJOR ACQUISITIONS, DISPOSALS AND MERGERS

We have not conducted any acquisitions, disposals or mergers that we consider to be material to us during the Track Record Period and up to the Latest Practicable Date.

PRE-[REDACTED] INVESTMENTS

Overview

Our Company obtained several rounds of investments, including Series Angel Financing, Series A Financing, Series B Financing, Series C Financing, Series D Financing, Series D2 Financing and Series D2+ Financing, from the Pre-[REDACTED] Investors through subscriptions for increased registered capital of our Company, equity transfers and subscription for the Convertible Bond. See “—Establishment and Major Shareholding Changes of Our Company” for details.

Cost per Share ⁽⁴⁾	RMB0.26	RMB0.48	RMB1.50	RMB2.46	RMB4.85	RMB6.33	RMB6.33
Basis of consideration.	The consideration for the Pre-[REDACTED] Investments which involved increase of our registered capital and in which the Company was a party was determined based on arm’s length negotiation between our Company and the relevant Pre-[REDACTED] Investors, after taking into consideration the timing of the investments, the development of our pipeline products and our business prospects.						
Discount to the [REDACTED] ⁽⁵⁾	To the best knowledge of our Company, for the Pre-[REDACTED] Investments which only involved the transfers of existing registered capital to the Pre-[REDACTED] Investors, the consideration was determined among the then Shareholders and the relevant Pre-[REDACTED] Investors upon their respective arm’s length negotiation.						
Lock-up period	[REDACTED] [REDACTED] [REDACTED] [REDACTED] [REDACTED] [REDACTED] [REDACTED] All existing Shareholders (including the Pre-[REDACTED] Investors) are subject to a lock-up period of 12 months following the Listing Date according to the applicable PRC law.						
Use of proceeds	The gross proceeds received by our Company from the Pre-[REDACTED] Investments involving increase of our registered capital amounted to RMB735 million, of which approximately 84.22% of such funds raised had been utilized as of the Latest Practicable Date. Such proceeds had been primarily utilized for the development and operation of the principal business of our Group, including but not limited to research and development of our pipeline products and our working capital. We will continue to utilize such proceeds for our operations and further development of our Group’s principal business as a supplement to the intended uses of [REDACTED] from the [REDACTED]. No [REDACTED] were received by our Company from the Pre-[REDACTED] Investments that involved transfers of existing registered capital between our then Shareholders and the relevant Pre-[REDACTED] Investors.						
Strategic benefits	Our Directors were of the view that (i) our Group would benefit from the additional capital provided by the Pre-[REDACTED] Investors for our research and development and daily operations; (ii) our Group could benefit from the Pre-[REDACTED] Investors’ knowledge and experience and take advantage of their industry resources and networks, while at the same time broaden our shareholder base; (iii) Pre-[REDACTED] Investors’ investment demonstrated their confidence in our Group and served as an endorsement of our performance, strengths and prospects.						

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

Notes:

- (1) The Pre-[REDACTED] Investments consist of both (i) subscription of additional registered capital of the Company by the Pre-[REDACTED] Investors, for which the Company was a party to such Pre-[REDACTED] Investments and received [REDACTED] from such Pre-[REDACTED] Investors, the details of which are set out in this table; (ii) transfer of existing registered capital or Shares to the Pre-[REDACTED] Investors, for which the Company was not a party to such Pre-[REDACTED] Investments and received no proceeds from such Pre-[REDACTED] Investors, the details of which are set out in the paragraphs headed “—1. Establishment of Our Company, Series Angel Financing and Series A Financing,” “—4. Series C Financing,” “—5. Series D Financing,” “—6. Series D2 Financing,” and “—10. Share Transfer in January 2026” above; and (iii) issuance of the Convertible Bond by the Company to Wanlian Guangsheng, the details of which are set out in the paragraph headed “—8. Issuance of Convertible Bond in December 2025” above.
- (2) This refers to the timing of last payment made by the relevant Pre-[REDACTED] Investor(s) in the relevant series of Pre-[REDACTED] Investments.
- (3) The post-money valuation refers to the cost per additional registered capital paid to our Company in the corresponding series of Pre-[REDACTED] Investment, multiplied by the amount of registered capital of our Company immediately after the completion of the corresponding series of Pre-[REDACTED] Investment.
- (4) The cost per Share of each series of Pre-[REDACTED] Investment is calculated by dividing the total amount of consideration by the amount of increased registered capital subscribed by the relevant Pre-[REDACTED] Investors in the corresponding series of Pre-[REDACTED] Investment.
- (5) The discount to the [REDACTED] is calculated based on the exchange rate as set out in this document and assuming the [REDACTED] is [REDACTED] per [REDACTED] (being the mid-point of the indicative [REDACTED]).

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

Special Rights of the Pre-[REDACTED] Investors

The Pre-[REDACTED] Investors had been granted with customary special rights, including, among others, redemption right, priority at liquidation, director nomination right, anti-dilution right, pre-emptive subscription rights, right of first refusal, tag-along right and drag-along right. Pursuant to a termination agreement entered into between our Company and the Shareholders (including the Pre-[REDACTED] Investors) dated February 10, 2026, (1) the redemption right, priority at liquidation and director nomination right had been automatically and irrevocably terminated from the day before the submission of the application for the Listing to the Stock Exchange, provided however that, such special rights shall be automatically restored upon the occurrence of the following events (whichever is the earliest): (i) the Listing is not completed within 18 months from the date of first submission of the Listing application; (ii) the Listing application is withdrawn voluntarily by the Company; or (iii) the Listing application is rejected by the Stock Exchange or other securities regulatory authorities, and (2) all other special rights under the Pre-[REDACTED] Investments shall be automatically and irrevocably terminated upon the Listing.

Sole Sponsor’s Confirmation

On the basis that (i) the considerations for the Pre-[REDACTED] Investments were settled more than 28 clear days before the date of our first submission of the listing application to the Stock Exchange or no less than 120 clear days before the Listing Date (as the case may be); and (ii) the redemption right, priority at liquidation and director nomination right had been terminated from the day before the first submission of the application for the Listing to the Stock Exchange and all other special rights of the Pre-[REDACTED] Investors will not exist after the Listing, the Sole Sponsor confirms that the Pre-[REDACTED] Investments are in compliance with chapter 4.2 of the Guide for New Listing Applicants issued by the Stock Exchange.

Information About Our Pre-[REDACTED] Investors

Among our Pre-[REDACTED] Investors, Longpan Investment is a Sophisticated Investor who has made meaningful investment in our Company in accordance with Chapter 2.3 of the Guide. We became acquainted with each of the Pre-[REDACTED] Investors through our network and reputation in the ophthalmic and biotech industry in the PRC.

To the best knowledge of the Directors, save for VVBI, Shanghai Weiqiandai and Huzhou Weiyuan disclosed below, each of the Pre-[REDACTED] Investors and their respective ultimate beneficial owners is an Independent Third Party and has no present or past shareholding relationship with the Company or its connected persons.

The background information of our Pre-[REDACTED] Investors who remained as our Shareholders as of the Latest Practicable Date is set out below.

Hangzhou Morning Spring Venture is a limited partnership established under the laws of the PRC, which is principally engaged in equity investment. Hangzhou Morning Spring Venture is owned as to (i) approximately 1.48% by Hangzhou Morning Spring Private Equity Fund Management Co., Ltd. (杭州曉池私募基金管理有限公司) (“Hangzhou Morning Spring Fund”) as its general partner, which is ultimately controlled by Yin Jie (尹潔); (ii) approximately 33.50% by Hangzhou Xiaoquan No. 8 Equity Investment Partnership (Limited Partnership) (杭州曉泉八號股權投資合夥企業(有限合夥)) (“Hangzhou Xiaoquan”) as its limited partner. Hangzhou Xiaoquan is owned as to (i) approximately 0.01% by Hangzhou Morning Spring Fund as its general partner; (ii) approximately 48.52% by Chen Haohua (陳浩華) as its limited partner, and (iii) approximately 51.47% by four other limited partners, none of which holds more than 30% partnership interest therein.

EMPLOYEE OWNERSHIP PLATFORM

To attract, incentivize and retain our employees and other eligible participants and maintain the stability of our management team and talents, we established Huzhou Xiulai as our Employee Ownership Platform in 2019. As of the Latest Practicable Date, Huzhou Xiulai held an aggregate of [26,561,870] Shares, representing approximately [9.22]% of the issued share capital of our Company. Immediately following the completion of the [REDACTED] (assuming the [REDACTED] is not exercised), Huzhou Xiulai will be interested in approximately [REDACTED] of the total issued Shares.

As of the date of this document, Huzhou Xiulai has [48] limited partners, among whom Dr. Xia Erning (夏爾寧) (our executive Director and chief technology officer) held approximately [12.96]% partnership interests as a limited partner therein. None of the limited partners of Huzhou Xiulai holds more than 30% of the partnership interests therein. The general partner of Huzhou Xiulai is Ms. Wu Ye (吳燁), the deputy director of human resources and administration of the Company.

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

The Employee Incentive Scheme is not subject to the provisions of Chapter 17 of the Listing Rules as it does not involve any grant of share options or awards or any issuance of new Shares by our Company after Listing. For further details of our employee ownership platform and the Employee Incentive Scheme, see “Appendix VI—Statutory and General Information—D. Employee Incentive Scheme” to this document.

CAPITALIZATION OF OUR COMPANY

As of the Latest Practicable Date and immediately after completion of the [REDACTED] (assuming the [REDACTED] is not exercised and the conversion of the Convertible Bond is not completed), the summary of the capitalization of our Company is set out as follows:

Shareholder	As of the Latest Practicable Date		Upon completion of the [REDACTED]				Whether the H Shares count towards public float or not
	Number of Shares	Percentage of shareholding	Number of H Shares	Number of Unlisted Shares	Total number of Shares	Percentage of shareholding

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

Shareholder	As of the Latest Practicable Date		Upon completion of the [REDACTED]				Whether the H Shares count towards public float or not
	Number of Shares	Percentage of shareholding	Number of H Shares	Number of Unlisted Shares	Total number of Shares	Percentage of shareholding	
Hangzhou Morning Spring Venture	315,830	0.11%	[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED]
Public Shareholders taking part in the [REDACTED]	–	–	[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED]
Total	<u>288,244,520</u>	<u>100%</u>	<u>[REDACTED]</u>	<u>[REDACTED]</u>	<u>[REDACTED]</u>	<u>100%</u>	

Public Float

Upon completion of the [REDACTED] (assuming the [REDACTED] is not exercised), [REDACTED] H Shares converted from Unlisted Shares and held by the Single Largest Shareholder, an aggregate of [REDACTED] H shares converted from Unlisted Shares and held by VVBI and Shanghai Weiqiandai, and [REDACTED] H Shares converted from Unlisted Shares and held by Huzhou Weiyuan, representing approximately [REDACTED]%, [REDACTED]% and [REDACTED]% of our total issued Shares as of the Latest Practicable Date, or approximately [REDACTED]%, [REDACTED]% and [REDACTED]% of our total issued Shares immediately following the completion of the [REDACTED] (assuming the [REDACTED] is not exercised) will not be counted towards the public float since our Single Largest Shareholder, VVBI, Shanghai Weiqiandai and Huzhou Weiyuan will be considered as our Company’s core connected persons (as defined under the Listing Rules).

To the best knowledge and information of our Directors, taking into account the conversion of Unlisted Shares into H Shares upon Listing, [REDACTED] H Shares will be counted towards the public float of our Company, representing approximately [REDACTED]% of our total issued Shares upon Listing (assuming the [REDACTED] is not exercised). Pursuant to Rule 19A.13A(1) of the Listing Rules, (i) where the expected market value at the time of listing of our Company’s H Shares does not exceed HK\$6 billion, at least 25% of the total number of H Shares must at the time of the Listing be held by the public. With respect to the indicative [REDACTED] Range of HK\$[REDACTED], HK\$[REDACTED] and HK\$[REDACTED] per [REDACTED] (being the low-end, mid-point and high-end of the indicative [REDACTED] range, respectively), the expected market capitalization of the Company’s H Shares would not exceed HK\$6 billion. As such, our Directors are of the view that our Company will be able to satisfy the public float requirement under Rule 19A.13A(1) of the Listing Rules.

Free Float

Rule 19A.13C of the Listing Rules provides that, where a new applicant is a PRC issuer with no other listed shares at the time of listing, this will normally mean that the portion of H shares for which listing is sought that are held by the public and not subject to any disposal restrictions (whether under contract, the Listing Rules, applicable laws or otherwise), at the time of listing, must: (a) represent at least 10% of the total number of issued shares in the class to which H shares belong at the time of listing (excluding treasury shares), with an expected market value at the time of listing of not less than HK\$50,000,000; or (b) have an expected market value at the time of listing of not less than HK\$600,000,000.

To the best knowledge of our Directors, the [REDACTED] H Shares to be issued pursuant to the [REDACTED] are expected to be held by the public and will not be subject to any disposal restrictions (whether under contract, the Listing Rules, applicable laws or otherwise). Based on the low-end, mid-end and the high-end of the indicative [REDACTED] range, respectively, our Company will satisfy the free float requirements under Rule 19A.13C of the Listing Rules.

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

SHAREHOLDING AND CORPORATE STRUCTURE

Corporate Structure Immediately Before the [REDACTED]

The following chart sets forth our corporate and shareholding structure immediately before the completion of the [REDACTED] (assuming the conversion of the Convertible Bonds is not completed):

Notes:

- (1) As of the Latest Practicable Date, Huzhou Xiulai was the Employee Ownership Platform. See “—Employee Ownership Platform” for the details of Huzhou Xiulai.
- (2) For the details of the background information of Longpan Entities, HSG Venture, Hangzhou Qiandai and other Pre-[REDACTED] Investors, see “—Pre-[REDACTED] Investments” for details.

HISTORY, DEVELOPMENT AND CORPORATE STRUCTURE

Corporate Structure Immediately After Completion of the [REDACTED]

The following chart sets forth our corporate and shareholding structure immediately after completion of the [REDACTED] (assuming the [REDACTED] is not exercised and the conversion of the Convertible Bond is not completed):

Notes:

- (1)-(2) Please refer to the notes in “—Shareholding and Corporate Structure—Corporate Structure Immediately Before the [REDACTED]” above.
- (3) The Shares held by these other public Shareholders are H Shares, which will be counted towards the public float together with [REDACTED] H Shares to be converted from Unlisted Shares. See “Share Capital” for further details of the conversion of Unlisted Shares into H Shares.

BUSINESS

OVERVIEW

We are an ophthalmology-focused biotech company, committed to becoming a global leader in the development and commercialization of innovative ophthalmic treatments. Leveraging our expertise in small-molecule drug discovery, advanced formulation development and translational research in ophthalmic diseases, we are dedicated to building a competitive and differentiated product pipeline covering ocular indications affecting the surface and back of the eye with significant unmet clinical needs.

The accelerating global trend of population aging, together with rising demand for therapies targeting ocular surface and posterior segment diseases, has driven advances globally in the research and development of innovative ophthalmic drugs. Leading Chinese pharmaceutical companies have been conducting clinical trials of ophthalmic drugs in the United States and other overseas regions to accelerate the international commercialization of their products. According to Frost & Sullivan, the global ophthalmic pharmaceutical market is expected to expand from US\$41.6 billion from 2024 to US\$62.5 billion in 2034, at a CAGR of 4.1%. To address this attractive market opportunity, we closely monitor market trends in China and abroad. We expect to launch our product candidates in both domestic and overseas markets and to establish an efficient globalized business model centered on innovative drugs and supported by cross-border collaborations. We have strategically established research and development centers and subsidiaries in China and overseas. This approach enables us to advance new drug research and development efficiently and to conduct clinical trials in both China and the United States, two of our key strategic markets, thereby maximizing commercialization opportunities for our product candidates and enhance our brand recognition.

We have established highly differentiated in-house research and development capabilities for innovative ophthalmic drugs and are selectively expanding into other disease areas with significant commercial potential. We have established integrated technology platforms, including ophthalmic small-molecule drug discovery, advanced formulation development and translational research, and have built a robust drug pipeline based on these platforms. As of the Latest Practicable Date, our product pipeline consisted of eight product candidates, including our Core Products, VVN461(HD) and VVN001, and six other product candidates. The following chart summarizes our product pipeline as of the Latest Practicable Date.

BUSINESS

Program	MOA	Indication	Commercial Rights	Preclinical	IND Approval	Clinical			NDA Approval
						Phase I	Phase II	Phase III	
VVN461(HD)★ ⁽¹⁾	JAK1/TYK2	NIAU	Global	China ⁽²⁾					
				US ⁽³⁾					
		SS-DED		China ⁽⁴⁾					
		VKC		China ⁽⁵⁾

VVN481 ⁽¹⁾	JAK1/TYK2	Non-infectious non-anterior uveitis	Global						
VVN611	VEGFRi/Undisclosed	DME/AMD/RVO	Global						
VVN1888	Undisclosed	Presbyopia	Global						

★ Core Product

Clinical trial phases marked as  are not required by the NMPA or FDA, as applicable

AMD: age-related macular degeneration

DED: dry eye disease

NIAU: non-infectious anterior uveitis

oGVHD: ocular graft-versus-host disease

SS-DED: Sjögren’s syndrome-related DED

CRS: chronic rhinosinusitis

DME: diabetic macular edema

NK: neurotrophic keratitis

RVO: retinal vein occlusion

VKC: vernal keratoconjunctivitis

JAK1: Janus kinase 1

rhNGF: recombinant human nerve growth factor

VEGFRi: vascular endothelial growth factor receptor kinases

LFA-1: lymphocyte function-associated antigen-1

TYK2: tyrosine kinase 2

Notes:

- In February 2021, we entered into a series of asset transfer and license agreements with E-nitiate. Pursuant to such agreements, we transferred, among others, intellectual property and other rights in the compound underlying VVN461, VVN432 (which is now also used in VVN481) to E-nitiate and E-nitiate granted us, among others, an exclusive, perpetual and irrevocable license to develop, manufacture and commercialize such compound in the ophthalmology and rhinology fields globally. See “—Our Collaboration and License Agreements—Arrangements with E-nitiate.”
- We plan to complete the Phase III clinical trial of VVN461(HD) for the treatment of NIAU in China in the first half of 2027.
- We had a Type C meeting with the FDA in November 2025, during which the FDA confirmed our plan to directly initiate a Phase III clinical trial of VVN461(HD) in the United States for the treatment of NIAU. We plan to submit an IND amendment in the second quarter of 2026 and directly commence such Phase III clinical trial by the end of 2026.
- We obtained an IND approval from the NMPA to directly initiate a Phase II clinical trial of VVN461 for the treatment of SS-DED by leveraging the Phase I clinical trial results of VVN461 in China. We plan to commence such Phase II clinical trial by the end of 2026.
- We plan to submit an IND application to the NMPA by the end of 2026 for directly initiating a Phase II clinical trials of VVN461 for the treatment of VKC by leveraging the Phase I clinical trial results of VVN461 in China.
- We plan to collaborate with academic research institutions in the United States to commence investigator-initiated trials of VVN461 for the treatment of scleritis and oGVHD by the end of 2026. We plan to submit IND amendments to the FDA for directly initiating registration-enabling pivotal clinical trials of VVN461 in the United States for these indications by leveraging the investigator-initiated trial results.

BUSINESS

- (7) We intend to develop VVN461(HD) for the treatment of pediatric uveitis. As of the Latest Practicable Date, we were developing the clinical development plan for such indication.
- (8) We plan to complete the Phase III clinical trial of VVN001 in China by the end of 2026.
- (9) Based on communications with the FDA, we directly commenced a Phase II clinical trial of VVN001 in the United States by leveraging our preclinical study results, including satisfactory safety data. We completed such Phase II clinical trial in April 2022.
- (10) Based on communications with the FDA, we directly commenced a Phase II clinical trial of VVN461 for the treatment of postoperative ocular inflammation in the United States by leveraging the Phase I clinical trial results of VVN461 in China. We completed such Phase II clinical trial in October 2024.

In response to the safety and tolerability concerns of corticosteroids, especially in long-term use to treat inflammatory conditions, and the limited efficacy of traditional non-steroidal anti-inflammatory drugs, we are developing VVN461, a non-corticosteroid anti-inflammatory eye drop. VVN461(HD), one of our Core Products, is potentially the world's first Janus kinase (JAK) inhibitor eye drop. In our preclinical *in vitro* study, VVN461 demonstrated robust and highly selective dual inhibition of Janus kinase 1 (JAK1) and tyrosine kinase 2 (TYK2). As a selective inhibitor of such key regulators for major proinflammatory cytokines in the JAK family, VVN461 is designed to block inflammatory signaling pathways and has demonstrated anti-inflammatory efficacy comparable to that of corticosteroids in a head-to-head Phase II clinical trial of VVN461 in non-infectious anterior uveitis (NIAU) patients while potentially avoiding the typical adverse effects associated with corticosteroids, such as increased intraocular pressure, cataract formation and corneal damage. In addition, VVN461 met the primary endpoints in a Phase II clinical trial in patients undergoing routine unilateral cataract surgery and demonstrated favorable efficacy and satisfactory safety and tolerability profile in such clinical trial. Based on compelling efficacy results in the Phase II clinical trial, our VVN461(HD) for the treatment of NIAU received the breakthrough therapy designation (BTD) from the NMPA. In the course of developing VVN461, our findings revealed that the molecule demonstrated promising efficacy in treating chronic rhinosinusitis (CRS). Accordingly, we are extending the application of the compound to CRS and developing VVN432 to capture additional clinical and commercial value.

In addition to VVN461, we are developing another late-stage Core Product, VVN001, which is a next-generation lymphocyte function-associated antigen-1 (LFA-1) antagonist designed to treat moderate-to-severe dry eye disease (DED). Given to the significant unmet clinical needs in the treatment of DED, we have focused on the development of VVN001 since our inception. VVN001 demonstrated efficacy comparable to first-generation LFA-1 antagonist in our *in vitro* preclinical studies, while having improved efficacy and safety profile with no stinging sensation commonly associated CsA, compared to cyclosporine A (CsA), the current standard of care of moderate-to-severe DED, as demonstrated in our Phase II clinical trial of VVN001 in the United States.

In addition to our Core Products, which are both in Phase III clinical trials, our VVN1901, a recombinant human nerve growth factor (rhNGF) being developed for the treatment of neurotrophic keratitis (NK), has commenced a registration-enabling pivotal Phase II clinical trial. At the same time, we are preparing to initiate a Phase III clinical trial for VVN461(LD) and are conducting a Phase I clinical trial for VVN432.

We believe that ocular surface programs can be developed and commercialized with relatively short timelines. Therefore, our strategic focus has been on advancing our ocular surface programs toward commercialization to establish a robust foundation for our product portfolio. Meanwhile, we have initiated programs in the posterior segment, including VVN481 and VVN611, to capture greater commercial potential in back-of-the-eye diseases to support our long-term growth.

BUSINESS

OUR STRENGTHS

Leadership in innovative ophthalmic therapies supported by integrated technology platforms spanning entire lifecycle of drug development

To address the significant unmet clinical needs in the field of innovative ophthalmic drugs, we have established integrated technology platforms, including ophthalmic small-molecule drug discovery, advanced formulation development and translational research, which together provide a differentiated and hard-to-replicate foundation of our leadership in innovative ophthalmic therapies. These three platforms function coherently as an integrated system, combining precise molecule discovery, efficient delivery formulation and translational research in innovative ophthalmic therapies. This coordinated approach addresses critical challenges in ophthalmic drug development, such as limited target specificity and efficacy, poor bioavailability and safety concerns.

- *Ophthalmology small-molecule drug discovery platform.* This platform is the core driver of our differentiated innovation, focusing on the early stage of molecule discovery. It has been purposefully developed and refined to address the specific requirements of ophthalmic therapies. It integrates advanced capabilities in precise target selection, efficient molecule optimization technologies and a robust and comprehensive patent protection framework. Discovered through this platform, our VVN461 demonstrated high activity, high selectivity, high permeability and broad coverage of inflammatory cytokine pathways and our VVN001 exhibited high aqueous solubility and high stability.
- *Advanced formulation development platform.* This platform serves as the cornerstone for us to realize precise delivery and rapid onset action of our product candidates, effectively addressing critical challenges associated with ophthalmic drug delivery. Leveraging our formulation platform, we have developed various advanced technologies for our drug candidates, including (i) the flash transmucosal delivery system, improving solubility and bioavailability for VVN461; (ii) the suprachoroidal space sustained-release delivery technology for VVN481; (iii) the enhanced formulation and packaging processes which substantially improved the stability and convenience of use for VVN1901, and (iv) the intravitreal sustained-release delivery technology, enabling long-acting sustained drug release for three to nine months for VVN611.
- *Translational research platform for innovative ophthalmic drug.* This platform is the critical contributor to establishing our robust research and development capabilities in the ophthalmology field, enabling us to secure a leading position in the industry. Developing ophthalmic disease models presents significant challenges and many CROs are unable to design and develop ophthalmology disease models that meet our requirements. Therefore, the expertise of our translational research team is crucial for the successful development of ophthalmic models. Our scientists design the animal models and collaborate closely with CRO specialists in the laboratories to establish, test and refine such models. We have intellectual property rights to all such developed models.

Together, our technology platforms operate as a cohesive system that supports the discovery, preclinical research, formulation development and clinical development of innovative ophthalmic therapies. Through this integrated framework, we are able to address key challenges in ophthalmic drug development and create a solid foundation for sustained innovation and differentiation in this therapeutic area.

Comprehensive and differentiated product pipeline

After years of dedicated efforts in ophthalmology, we have established a pipeline of highly differentiated product candidates across major ophthalmic disease areas, enabling us to effectively address unmet clinical needs while gaining a technological edge in major indications. This comprehensive and differentiated pipeline reduces our overall research and development risks and allows us to target high-growth opportunities in ophthalmic drug market, supporting strong commercialization prospects.

Our product pipeline features broad coverage, clear staging and strong continuity, covering both front and back of the eye, targeting both acute conditions and chronic disease management for both common and rare ophthalmic diseases. For the front of the eye, we focus

BUSINESS

on high-prevalence indications in China, such as DED, and orphan diseases in the United States, such as NIAU, scleritis and ocular graft-versus-host disease (oGVHD). For the back of the eye, we are developing VVN481 and VVN611. In addition, we are also developing innovative product candidates for rare ophthalmic diseases, such as our VVN1901 for the treatment of NK. This comprehensive multi-dimensional layout reflects more than a list of indications, but rather our strategic plan grounded in our deep understanding of the pathogenesis of ophthalmic diseases and the unique strengths of our technology platforms. Furthermore, during the development of our ophthalmology product pipeline, we have also discovered the potential of the VVN461 molecule in treating non-ocular inflammation and thus commenced development of VVN432 for the treatment of CRS, expanding the application of the molecule to markets with significant clinical and commercial value. From a staging perspective, we have established a virtuous development cycle, with late-stage clinical candidates leading, mid-stage clinical candidates following through, and a well-stocked preclinical asset reserve.

Our differentiated product matrix is central to our competitive advantage in pipeline planning. We focus on product candidates with first-in-class and best-in-class potential. For the treatment of ocular inflammation, our VVN461(HD), one of our Core Products, is potentially the world's first JAK inhibitor eye drop. Through its robust and highly selective dual inhibition of JAK1 and TYK2, VVN461 is designed to provide robust anti-inflammatory activity while potentially avoiding certain steroid-associated adverse effects, marking a significant advancement over current treatment options. In the expanding DED market, our self-developed VVN001 offers an improved alternative to current treatments with its enhanced solubility and formulation. For the treatment of NK, we have completed a Phase I clinical trial of our self-developed growth factor large-molecule product candidate, VVN1901, and is conducting a registration-enabling pivotal Phase II clinical trial in patients with moderate-to-severe NK. We believe that our VVN1901, developed with leading formulation and packaging technology, is well positioned to challenge the dominance of the only approved growth factor drug, due to its significantly enhanced stability and convenience in storage, transportation and daily use. For the treatment of posterior segment eye diseases, we focus on the development of innovative product candidates, such as VVN481, a next-generation posterior-segment anti-inflammatory drug targeting JAK pathway. VVN481 is designed to achieve long-acting sustained release for up to six months through innovative formulation and delivery technology. We are developing VVN481 utilizing our collaborating partner's suprachoroidal injection device to overcome the limitations of traditional intravitreal administration of posterior segment drugs, including safety concerns, high dosing frequency and low delivery efficiency.

Through a strategic approach that combines comprehensive disease coverage to address market gaps, a differentiated portfolio to ensure our competitiveness and integrated technology platforms to support continuous innovation, we have built a robust and promising product pipeline. Our product pipeline not only covers major disease areas with significant market potential, such as DED and ocular inflammation, but also addresses underserved rare diseases, such as NK, while strategically balancing opportunities in both domestic and overseas markets to support our diversified and robust growth. As the ophthalmic drug market continues to grow, we anticipate that our strong pipeline will increasingly give us a competitive edge and serve as the core driver for our next stage of development.

Potential first-in-class JAK inhibitor eye drop for ophthalmic anti-inflammatory therapy to reshape traditional treatment paradigms

VVN461(HD), our Core Product, is potentially the world's first JAK inhibitor eye drop. VVN461's core competitive advantage lies in its targeted and differentiated mechanism of action, which underpins its breakthrough anti-inflammatory efficacy. JAK plays a critical role in inflammatory signal transduction. As a highly potent and selective JAK1/TYK2 dual inhibitor, VVN461 is designed to inhibit JAK1 and TYK2 activity, thereby directly blocking the JAK-STAT signaling pathway, with the aim of achieving comprehensive control of intraocular and ocular surface inflammation and enabling effective management of inflammation throughout the entire eye. Unlike traditional corticosteroids, which broadly suppress multiple pathways and involve multiple non-inflammatory functions, VVN461 is designed to selectively inhibit specific inflammatory pathways while minimizing disruption of normal physiological functions. This targeted mechanism of action is anticipated to offer potential safety benefits. Recognizing the advantages of this mechanism, we are extending the application of the compound underlying VVN461 to rhinology through the development of

BUSINESS

VVN432, a nasal spray for the treatment of CRS, and to posterior-segment of the eye through the development of VVN481, an innovative drug designed for long-acting sustained release for the treatment of non-infectious non-anterior uveitis.

The efficacy and safety profile of VVN461 have been robustly demonstrated in multiple clinical trials, providing strong clinical evidence to support its potential to reshape the existing treatment diagram. Particularly, in the Phase II clinical trial of VVN461 for the treatment of NIAU in China, the proportion of patients achieving an improvement of at least 2 grades in anterior chamber cell scores from baseline at day 14, the primary efficacy endpoint of the trial, was 96.55% and 77.78% in the VVN461(HD)(1.0%) and corticosteroid control group, respectively. In addition to comparable efficacy, VV461 can potentially avoid the typical adverse effects associated with corticosteroids such as increased intraocular pressure, cataract formation and corneal damage. VVN461 demonstrated safety profile comparable to that of vehicle control group in the Phase II clinical trial in patients undergoing routine unilateral cataract surgery in the United States. VVN461’s topical inhibition of inflammatory pathways also lowers the safety risk associated with systemic use of JAK inhibitors. Its favorable long-term safety profiles may enhance patients’ long-term adherence. As a result, VVN461 has the potential to overcome key limitations in traditional ophthalmic anti-inflammatory therapies.

The sizeable market and significant limitations of traditional treatment options provide a solid foundation for the commercialization of VVN461. The global ocular inflammation market is expected to reach US\$33.6 billion by 2034, at a CAGR of 4.5% from 2024 to 2034. At the same time, significant unmet clinical needs remain, as many patients are unable to achieve satisfactory treatment outcomes and there is clear demand for safer and more effective innovative treatments. We believe VVN461 is well positioned to address this gap.

As potentially the world’s first JAK inhibitor eye drop, VVN461 is expected to benefit from global patent protection. Our proprietary flash transmucosal delivery system technology, which is designed to enhance ocular bioavailability and retention time, combined with the enhanced ocular penetration and stability resulting from VVN461’s unique small-molecule design, has established strong intellectual property and technology barriers to strengthen VVN461’s competitive position.

Our VVN461(HD) received the BTB for the treatment of NIAU by the NMPA in June 2025, enabling a potentially expedited commercialization process. According to Frost & Sullivan, VVN461(HD) is the first eye drop to receive the BTB in China. With our parallel research and development plan in China and the United States, we aim to obtain marketing approval for VVN461(HD) in both China and the United States, thereby laying the foundation for our global expansion. As we advance the Phase III clinical trials and further clinical data of VVN461(HD) become available, we expect to offer this innovative drug as a new treatment option to patients with ocular inflammation worldwide, while at the same time establishing our leading position in the arena of innovative ophthalmic drugs.

Dual growth engine of globalized research and development and ecosystem collaboration

Amid intensifying global competition in research and development of innovative ophthalmic drugs and rising challenges in technology translation, a single technological breakthrough is no longer sufficient for biotech companies to sustain leadership. In such context, we have captured industry development trends by establishing a dual growth engine of globalized R&D and ecosystem collaboration. We integrate quality global resources with domestic resources to accelerate technology translation and commercialization. This approach provides us with core competitive advantages in the ophthalmic pharmaceutical industry by balancing technological expertise, translational efficiency and market reach. It also tackles industry challenges such as lengthy development cycles, significant capital requirements and difficult commercial launches, thereby strengthening our competitive position in both domestic and overseas markets.

Our globalized R&D strategy serves as the foundation of our technological leadership and international expansion. Our experienced R&D team design and execute clinical trials in both China and the United States. For the development of our VVN461(HD), we adhere to the dual clinical development strategy in China and the United States to accelerate our global footprint. We have completed a Phase II clinical trial in NIAU patients in China and plan to directly initiate a Phase III clinical trial of VVN461(HD) in the United States. In addition, we have received positive preliminary written feedback from the FDA, which indicated that we may

BUSINESS

submit an NDA for VVN461(HD) to the FDA following completion of a single Phase III pivotal clinical trial in NIAU patients. This registration pathway could significantly expedite the commercialization process for VVN461(HD) in the United States. This model of parallel clinical development in different jurisdictions allows us to efficiently evaluate efficacy and safety across different patient populations and to use clinical data in China and the United States to support subsequent regulatory filings in Europe, Southeast Asia and other markets, thereby securing an early-mover advantage internationally.

Our globalized R&D strategy is also reflected in our targeted integration of international resources. Leveraging the international experience of our management team, we have assembled a scientific advisory board comprising international experts in ophthalmology and established close collaboration with leading ophthalmic drug development experts and clinical institutions worldwide, enabling us to track the latest global research progress in the treatment of ophthalmic diseases in a timely manner and supporting our continuous pipeline expansion and technology iteration. With our globalized R&D system, we are able to maintain technological leadership in global ophthalmic innovative drug arena while steering clear of an insular development process.

Ecosystem collaboration serves as a key lever of us to accelerate technology translation and strengthening our industrial footprint. By leveraging the full industry chain resource spanning across R&D, pilot-scale manufacturing, clinical development and commercial manufacturing in China Gene Medicine Valley, we have enhanced the translation efficiency from laboratory research to commercialization, providing a solid foundation for the commercial-scale manufacturing of our Core Products. Our collaborations with academic research institutions and hospitals further enhance our research and development efficiency and clinical translation. We have built and maintained long-term cooperative relationships with leading hospitals with top ophthalmology department and renowned principal investigators (PIs, usually physicians at the hospitals responsible for the conduct of our clinical trials). Through our collaborations, these hospitals and PIs have gained in-depth understanding of our pipeline, enabling efficient collaboration in our clinical trials and in so doing enabling us to accelerate the clinical development and improve the success rate of our product candidates.

Our dual growth engine of globalized research and development and ecosystem collaboration provide us a distinct competitive edge. Globalized research and development enables us to maintain international technology leadership and generate research outcomes that meet international standards, which enhance the competitiveness of our collaborations. In parallel, our local ecosystem collaborations provide efficient clinical translation platforms and broad market access to support the commercialization of our globalized research and development results. As our Core Products progress toward commercialization, we believe this dual engine will support our growth into a benchmark ophthalmology company in China and facilitate the development of “first-in-class” and “best-in-class” ophthalmic drugs, benefiting patients worldwide.

Expert management team supported by elite scientific advisory board and reputable investors

We have a visionary leadership team with extensive experience and deep scientific expertise in the ophthalmic pharmaceutical industry.

Dr. Shen Wang, our founder, executive director, chief executive officer and chairman of the Board, has over 30 years of experience in R&D and management in oncology, immunomodulation, metabolic diseases and antiviral therapies. Dr. Shen graduated from the University of Pittsburgh in the United States and subsequently held senior R&D positions at several multinational pharmaceutical companies, including Abbott Laboratories, Sunesis Pharmaceuticals, Inc. and Amgen Inc. Before founding our Group, Dr. Shen participated in the development of Xiidra[®], the first-in-class targeted therapy for DED approved by the FDA in the past decade, and VENCLEXTA[®], a landmark, first-in-class oncology blockbuster drug.

Dr. Xia Erning, our executive director and chief technology officer, focuses on ophthalmic pharmaceuticals and has over 30 years of experience in ophthalmic pharmaceutical research and development. Dr. Xia graduated from the College of Pharmacy at the University of Iowa in the United States, one of the few institutions worldwide that train PhD-level specialists in ophthalmic pharmaceutical sciences. Before joining our Group, Dr. Xia served as a research fellow at Bausch + Lomb. During his tenure at Bausch + Lomb, he participated in various R&D projects and was one of the developers of ReNu[®] MultiPlus Multi-Purpose

BUSINESS

Solution, LOTEMAX[®] GEL and Besivance[®]. Dr. Xia has published over 35 scientific papers and is the inventor of nearly 200 granted patents. He has received numerous prestigious awards in the United States, including Science Spectrum Trailblazer at the Conference on Minorities in Research Science awarded by Science Spectrum Magazine and Career Achievement in Industry awarded by the Emerald Honors Conference.

Dr. Tsai Albert Jr., our chief medical officer, has nearly 30 years of experience in the pharmaceutical and biotechnology industry in several established multinational pharmaceuticals, including Bayer Aktiengesellschaft, Merck & Co., Inc., G.E. HealthCare Technologies Inc., Amgen Inc. and AbbVie Inc., where he has held senior medical, commercial and operational excellence roles spanning clinical research, medical affairs, regulatory affairs and sales and marketing across multiple therapeutic areas and global markets. Dr. Cai has also served as chief medical officer of Zhaoke Ophthalmology, a company listed on the Stock Exchange (stock code: 06622), where he managed a sizeable drug pipeline in both China and the United States.

We have also assembled a scientific advisory board comprising leading experts in ophthalmology. Key members of our scientific advisory board include Professor Quan Dong Nguyen, Professor David S. Boyer and Professor Gary D. Novack. Professor Nguyen is a professor of ophthalmology at the Byers Eye Institute of Stanford University, focusing on the development of novel therapies and diagnostic technologies for retinal vascular and ocular inflammatory diseases, including diabetic retinopathy, age-related macular degeneration and uveitis. Professor Boyer is one of the leading retinal clinical researchers for new treatments in macular degeneration and diabetic macular edema. Professor Novack, with over 40 years of experience in pharmaceutical research and development, is a clinical professor of pharmacology and ophthalmology at the University of California Davis School of Medicine.

We also receive strong endorsement from industry-leading investors who have deep understanding of the pharmaceutical market in China and extensive experience in investing in the biotechnology sector. We have a stellar line-up of global and Chinese institutional investors and biotech-focused investment funds as our Shareholders, including Lapam Capital, HSG, Viva Biotech, GTJA Investment Group, Cenova Capital and V-Capital, among others.

OUR STRATEGIES

Our goal is to become a global leader in the development and commercialization of innovative ophthalmic treatments. With a focus on addressing significant unmet clinical needs in ophthalmology through a differentiated R&D strategy, we aim to offer innovative treatment options to patients worldwide. Specifically, we plan to execute the following strategies to fulfill our mission.

Build an innovation-driven “VivaVision” brand with global reach

We aim to build “VivaVision” into a specialized and innovation-driven brand with a clear clinical focus in key ophthalmic indications. Leveraging the strong global backgrounds and extensive research and development and regulatory experience of our R&D team as well as our integrated technology platform, we intend to establish deep collaborations with leading innovative research institutions and key opinion leaders to accelerate clinical adoption of innovative treatment concepts. At the same time, we will prioritize innovation and improving patient experience throughout product development and commercialization. In particular, we intend to focus on developing product candidates with innovative mechanism of action, convenient dosing, and suitability and comfort for long-term use, as well as satisfactory safety and tolerability, supported by well-designed clinical trials, with the objective of building a reputable and trusted “VivaVision” brand among patients and physicians.

We intend to proactively explore strategic collaborations with multinational pharmaceutical companies that have established commercial capabilities in ophthalmology to benefit from their existing ophthalmology salesforces, medical affairs and market access infrastructure to accelerate market access and penetration, while further strengthening our internal capabilities in global clinical development, pharmacovigilance and supply chain management. Through these efforts, we aim to bring our innovative therapies to patients in global markets and elevate the international recognition and long-term value of the “VivaVision” brand, supporting the global development and commercialization of our other product candidates.

BUSINESS

Accelerate the development of our globally competitive, differentiated innovative Core Products

We focus on developing first-in-class or clearly differentiated best-in-class product candidates to avoid homogeneous competition and to enhance the clinical and commercial potential of our pipeline. We aim to rapidly advance the clinical development of our Core Products, VVN461(HD) and VVN001, toward commercialization while continuing to explore next-generation technologies and to support our long-term pipeline development.

VVN461(HD)

- *NIAU.* In China, we are conducting a multicenter, randomized, single-masked, active-controlled Phase III clinical trial to evaluate the efficacy and safety of VVN461(HD) (1.0% VVN461 eye drop) in patients with NIAU. We commenced the trial in November 2025 and expect to complete the trial in the first half of 2027.

In the United States, we have had a formal discussion meeting with the FDA in November 2025, during which the FDA confirmed our development plan and registrational pathway of VVN461(HD) for the treatment of NIAU in the United States. We plan to directly initiate a Phase III clinical trial of VVN461(HD) in NIAU patients in the United States by the end of 2026 in parallel to the Phase III clinical trial in China to support the global commercialization of VVN461(HD).

- *Other Indications.* We obtained an IND approval from the NMPA for directly commencing a Phase II clinical trial of VVN461 for the treatment of Sjögren’s syndrome–related DED (SS-DED) in November 2025. We plan to commence a Phase II clinical trial in subjects with SS-DED in China by the end of 2026. We plan to submit IND applications to the NMPA by the end of 2026 for directly commencing a Phase II clinical trial of VVN461 for the treatment of vernal keratoconjunctivitis (VKC). We plan to collaborate with academic research institutions in the United States to commence investigator-initiated trials of VVN461 for the treatment of scleritis and oGVHD by the end of 2026. We plan to submit IND amendments to the FDA for directly initiating registration-enabling pivotal clinical trials of VVN461 in the United States for the treatment of scleritis and oGVHD by leveraging the investigator-initiated trial results. We are also developing the clinical development plan of VVN461(HD) for the treatment of pediatric uveitis.

VVN001

We are conducting a multicenter, randomized, double-masked, vehicle-controlled Phase III clinical trial of VVN001 in patients with moderate-to-severe DED in China. We held a mid-term meeting in December 2025, during which the IDMC confirmed that the trial may proceed with the current trial design. As of the Latest Practicable Date, we had enrolled nearly 70% of the planned patients. We plan to complete such trial by the end of 2026.

Continue to enhance our R&D capabilities and expand our product pipeline

We are committed to establish a fully integrated system from target discovery to commercialization.

- *Enhance drug discovery efforts.* We plan to further strengthen our in-house research and development capabilities by continuing to invest in the early discovery of small-molecule innovative drugs and biologics. Leveraging our robust ophthalmic small-molecule discovery platform, we aim to expand and optimize our pipeline with differentiated, first- or best-in-class candidates and support our long-term sustainable growth.
- *Advance and expand our pipeline for posterior segment eye diseases.* We plan to continue to advance and expand our posterior segment programs, with a focus on developing a portfolio of product candidates that feature advanced technological differentiation, address significant clinical needs and offer substantial market potential. By deepening our presence across key posterior segment indications and advancing the development of our posterior segment product candidates, including VVN481 for the treatment of non-infectious non-anterior uveitis and VVN611 for

BUSINESS

the treatment of diabetic macular edema (DME), age-related macular degeneration (AMD) and retinal vein occlusion (RVO), we aim to strengthen our competitive position in the posterior segment and support sustainable long-term growth.

- *Refine our advanced formulation development platform and extend applications.* We plan to refine and strengthen our advanced formulation development platform and explore and extend the application of such platform technology across our existing pipeline, such as posterior segment delivery, long-acting injectable formulations and preservative-free multi-dose packaging technologies. In parallel, leveraging our formulation technologies, we intend to pursue a disciplined expansion of our product pipeline and indication of our existing product candidates to maximize the value of our formulation platform and enhance the competitiveness of our product candidates.
- *Explore extension of our molecules to other disease areas.* While our primary focus is on the development of innovative ophthalmology drugs, particularly for the treatment of ocular inflammations, we remain open to opportunities to apply the mechanisms of action of our ophthalmic product candidates to inflammations in other organs. For example, we extended the application of the VVN461 compound to rhinology through development of VVN432, a nasal spray being developed for the treatment of CRS. We plan to continue monitoring and selective pursuing opportunities to expand into disease areas with significant unmet clinical needs and attractive commercial potential.

Establish a commercial-ready, efficient operations and manufacturing system

We plan to systematically establish supply chain and commercialization capabilities in preparation for the launch of our first product.

- *Strengthen supply chain capabilities.* We plan to enhance the resilience, flexibility and scalability of our supply chain to support our long-term growth and commercialization. We intend to deepen and expand our collaborations with reputable contract manufacturing organizations with robust quality management systems and Good Manufacturing Practice (GMP) compliance in our target markets. In addition, we may strategically invest in establishing in-house manufacturing capabilities, which we believe will provide better control over critical production processes and intellectual property, support late-stage clinical and commercial-scale supply and enable us to capture a greater share of the long-term economic value of our products.
- *Establish a specialized commercialization team.* We are designing a lean, highly professional commercialization team to support the launch of our Core Products. We plan to concentrate on influential Grade IIIA hospitals, focusing on key ophthalmology centers and opinion leaders. We aim to achieve efficient resource allocation, provide high-quality academic education and service through this targeted commercialization approach, laying a solid foundation for the launch of other product candidates.
- *Explore diversified collaboration models.* We plan to pursue strategic commercial collaborations with leading Chinese pharmaceutical companies with strong marketing and distribution networks in the ophthalmology field for the commercialization of certain product candidates. We may consider engaging contract sales organizations and entering into other co-promotion or licensing arrangements. We expect these collaboration models to complement our in-house commercialization capabilities to maximize the clinical and commercial value of our products, accelerate market penetration and rapidly achieve broad coverage.

Pursue international expansion and organic collaborations opportunities to maximize our products’ global commercial value

We aim to become a prominent global player in ophthalmology and are therefore actively advancing the international development of our product candidates. Alongside our independent efforts to develop VVN461(HD) in both China and the United States, we plan to actively explore international collaboration opportunities for our product candidates. By leveraging collaborating partners’ clinical, regulatory and commercial capabilities, we intend to accelerate

BUSINESS

development and commercialization of our product candidates in major global markets, enhance market access and realize the full commercial potential of our product candidates worldwide. We also plan to establish strategic partnerships with leading biotechnology companies and research institutions globally to license in novel technologies and innovative products in ophthalmology and related fields, continuously enriching our product pipeline. We expect this coordinated approach to maximize the global commercial value of our products, deepen our presence in international markets and move steadily toward our vision of becoming a globally competitive pioneer in innovative ophthalmic therapies.

OUR PRODUCT CANDIDATES

Our Pipeline

As of the Latest Practicable Date, we had developed a pipeline of eight product candidates, including two Core Products, namely VVN461(HD) and VVN001, and six other product candidates. The following chart summarizes our product pipeline as of the Latest Practicable Date.

Program	MOA	Indication	Commercial Rights	Preclinical	IND Approval	Clinical			NDA Approval
						Phase I	Phase II	Phase III	
VVN461(HD)★ ⁽¹⁾	JAK1/TYK2	NIAU	Global	China ⁽²⁾					
				US ⁽³⁾					
		SS-DED		China ⁽⁴⁾					
		VKC		China ⁽⁵⁾					
		Scleritis		US ⁽⁶⁾					
		oGVHD		US ⁽⁶⁾					
		Pediatric uveitis ⁽⁷⁾							
VVN001★	LFA-1	DED	Global	China ⁽⁸⁾					
				US ⁽⁹⁾					
VVN461(LD) ⁽¹⁾	JAK1/TYK2	Postoperative ocular inflammation	Global	US ⁽¹⁰⁾					
VVN432 ⁽¹⁾	JAK1/TYK2	CRS	Global	China					
VVN1901	rhNGF	NK	Global	China					
VVN481 ⁽¹⁾	JAK1/TYK2	Non-infectious non-anterior uveitis	Global						
VVN611	VEGFRi/Undisclosed	DME/AMD/RVO	Global						
VVN1888	Undisclosed	Presbyopia	Global						

★ Core Product

Clinical trial phases marked as  are not required by the NMPA or FDA, as applicable

AMD: age-related macular degeneration

DED: dry eye disease

NIAU: non-infectious anterior uveitis

oGVHD: ocular graft-versus-host disease

SS-DED: Sjögren’s syndrome-related DED

CRS: chronic rhinosinusitis

DME: diabetic macular edema

NK: neurotrophic keratitis

RVO: retinal vein occlusion

VKC: vernal keratoconjunctivitis

JAK1: Janus kinase 1

rhNGF: recombinant human nerve growth factor

VEGFRi: vascular endothelial growth factor receptor kinases

LFA-1: lymphocyte function-associated antigen-1

TYK2: tyrosine kinase 2

Notes:

- (1) In February 2021, we entered into a series of asset transfer and license agreements with E-nitiate. Pursuant to such agreements, we transferred, among others, intellectual property and other rights in the compound underlying VVN461, VVN432 (which is now also used in VVN481) to E-nitiate and E-nitiate granted us, among others, an exclusive, perpetual and irrevocable license to develop, manufacture and commercialize such compound in the ophthalmology and rhinology fields globally. See “—Our Collaboration and License Agreements—Arrangements with E-nitiate.”

BUSINESS

- (2) We plan to complete the Phase III clinical trial of VVN461(HD) for the treatment of NIAU in China in the first half of 2027.
- (3) We had a Type C meeting with the FDA in November 2025, during which the FDA confirmed our plan to directly initiate a Phase III clinical trial of VVN461(HD) in the United States for the treatment of NIAU. We plan to submit an IND amendment in the second quarter of 2026 and directly commence such Phase III clinical trial by the end of 2026.
- (4) We obtained an IND approval from the NMPA to directly initiate a Phase II clinical trial of VVN461 for the treatment of SS-DED by leveraging the Phase I clinical trial results of VVN461 in China. We plan to commence such Phase II clinical trial by the end of 2026.
- (5) We plan to submit an IND application to the NMPA by the end of 2026 for directly initiating a Phase II clinical trials of VVN461 for the treatment of VKC by leveraging the Phase I clinical trial results of VVN461 in China.
- (6) We plan to collaborate with academic research institutions in the United States to commence investigator-initiated trials of VVN461 for the treatment of scleritis and oGVHD by the end of 2026. We plan to submit IND amendments to the FDA for directly initiating registration-enabling pivotal clinical trials of VVN461 in the United States for these indications by leveraging the investigator-initiated trial results.
- (7) We intend to develop VVN461(HD) for the treatment of pediatric uveitis. As of the Latest Practicable Date, we were developing the clinical development plan for such indication.
- (8) We plan to complete the Phase III clinical trial of VVN001 in China by the end of 2026.
- (9) Based on communications with the FDA, we directly commenced a Phase II clinical trial of VVN001 in the United States by leveraging our preclinical study results, including satisfactory safety data. We completed such Phase II clinical trial in April 2022.
- (10) Based on communications with the FDA, we directly commenced a Phase II clinical trial of VVN461 for the treatment of postoperative ocular inflammation in the United States by leveraging the Phase I clinical trial results of VVN461 in China. We completed such Phase II clinical trial in October 2024.

Our Core Products

VVN461(HD)

VVN461(HD), the high-dosage formulation of VVN461 eye drop, is a novel selective JAK1/TYK2 inhibitor with sub-nanomolar potency. VVN461 combines “steroid-like” anti-inflammatory efficacy with a favorable safety profile that avoids the typical adverse effects associated with corticosteroids. Our VVN461(HD) is potentially the world’s first JAK inhibitor eye drop. Based on compelling efficacy results in the Phase II clinical trial, our VVN461(HD) for the treatment of NIAU received BTB from the NMPA, recognizing its therapeutic prospect and enabling a potentially expedited approval process. According to Frost & Sullivan, VVN461 is the first eye drop to receive the BTB in China.

As JAK pathway plays a key role in inflammatory responses, JAK1/TYK2 inhibitors have the potential to address a broad spectrum of ocular surface inflammatory conditions through targeted modulation of key cytokine signaling pathways. As of the Latest Practicable Date, we were developing VVN461(HD) for six indications: non-infectious anterior uveitis (NIAU), Sjögren’s syndrome-related DED (SS-DED), vernal keratoconjunctivitis (VKC), scleritis, ocular graft versus host disease (oGVHD) and pediatric uveitis.

- *NIAU*. We obtained an IND approval from the NMPA for VVN461 for the treatment of NIAU in January 2023. We completed a Phase I clinical trial of VVN461 in China in December 2023 and a Phase II clinical trial of VVN461 in NIAU patients in China in February 2025. We commenced a Phase III clinical trial in NIAU patients in China in November 2025. We plan to submit an IND amendment to the FDA in the second quarter of 2026 for directly initiating a Phase III clinical trial in NIAU patients by leveraging the Phase II clinical trial results of VVN461 in China for the treatment of NIAU.
- *SS-DED*. We obtained an IND approval from the NMPA for directly commencing a Phase II clinical trial of VVN461 for the treatment of SS-DED in November 2025.
- *VKC*. We plan to submit an IND application to the NMPA by the end of 2026 for directly commencing a Phase II clinical trial of VVN461 in patients with VKC.
- *Scleritis*. We plan to collaborate with an academic research institutions in the United States to commence an investigator-initiated trial of VVN461 in scleritis patients by the end of 2026.
- *oGVHD*. We plan to collaborate with an academic research institutions in the United States to commence an investigator-initiated trial of VVN461 in oGVHD patients by the end of 2026.

BUSINESS

- *Pediatric uveitis.* We intend to develop VVN461(HD) for the treatment of pediatric uveitis. As of the Latest Practicable Date, we were developing the clinical development plan for such indication.

In February 2021, we entered into a series of asset transfer and license agreements with E-nitiate, our associate. Pursuant to such agreements, we transferred, among others, intellectual property and other rights in the compound underlying VVN461 to E-nitiate and E-nitiate granted us, among others, an exclusive, perpetual and irrevocable license to develop, manufacture and commercialize VVN461 in the ophthalmology and rhinology fields globally. See “—Our Collaboration and License Agreements—Arrangements with E-nitiate.” We conducted preclinical studies of VVN461 before the transfer and licensing arrangements in February 2021 and completed preclinical studies and Phase I and Phase II clinical trials of VVN461 subsequent to the arrangements. We did not rely on any material R&D conducted by E-nitiate and did not employ any personnel from E-nitiate for the development of VVN461(HD).

Mechanism of Action

VVN461 is a selective inhibitor of JAK1 and TYK2 designed to treat ocular inflammation by blocking key intracellular signaling pathways that drive cytokine-mediated inflammatory responses in the eye. Many ocular inflammatory conditions are driven by an exaggerated immune response at the ocular surface or within intraocular tissues. In these settings, immune and resident cells in the eye produce elevated levels of proinflammatory cytokines. These cytokines bind to their receptors on the surface of cells in the eye and immune system, triggering intracellular signaling pathways that increase expression of genes involved in inflammation, tissue damage and chronic disease.

A central part of this signaling machinery involves the JAK family of enzymes. JAKs are intracellular proteins inside the cell membrane, associated with cytokine receptors. When a cytokine binds to its receptor, the receptor brings JAK proteins together and activates them. Activated JAKs then switch on another group of proteins called signal transducers and activators of transcription (STATs), which modulate intracellular activity including gene expression. In inflammatory eye disease, this JAK-STAT pathway helps drive the production of multiple inflammatory mediators, adhesion molecules and other factors that contribute to redness, pain, swelling, disruption of the tear film and, in some cases, damage to ocular tissues.

Among the JAK family, JAK1 and TYK2 are key regulators for several major proinflammatory cytokines that are believed to be relevant in ocular inflammation. JAK1 cooperates with other JAK family members (JAK2, JAK3 and TYK2) to mediate signaling by cytokines such as interleukin-2 (IL-2), IL-6, IL-10, IL-15 and interferons (IFN), including IFN- γ , IFN- α and IFN- β . TYK2 also plays a critical role downstream of receptors for IL-12, IL-17 and IL-23, cytokines that are involved in the differentiation and maintenance of T cell subsets implicated in chronic inflammation. Because these cytokines have been linked to a range of ocular inflammatory conditions, JAK1 and TYK2 occupy a strategic position in the network of signals that sustain inflammation on the ocular surface and within intraocular structures.

VVN461 is designed to selectively inhibit JAK1 and TYK2, thereby interrupting this signaling cascade at an early stage. By blocking JAK1/TYK2 activity, VVN461 is expected to reduce activation of STAT proteins and consequently decrease the expression of multiple genes associated with inflammation. Rather than targeting a single cytokine, this mechanism acts on a shared pathway used by several cytokines involved in ocular immune responses. As a result, VVN461 has the potential to inhibit a broad range of proinflammatory signals thought to contribute to ocular inflammation diseases such as NIAU, SS-DED, VKC, scleritis, oGVHD and pediatric uveitis. The following diagram illustrates the mechanism of action of VVN461.

BUSINESS

VVN461 is formulated for local administration to the eye. Delivering the drug directly to the ocular surface is intended to achieve high concentrations at the site of disease while limiting systemic exposure. This local approach is designed to support an improved benefit-risk profile compared with systemic JAK inhibition and to offer a non-steroidal alternative for the management of ocular inflammation. The aim is to provide effective, targeted suppression of pathogenic inflammatory pathways in the eye while potentially avoiding the adverse effects associated with long-term steroid therapy.

Our Advantages

We believe our VVN461(HD) has the following advantages:

- *Potency.* As a dual-target inhibitor of JAK1 and TYK2, our VVN461 demonstrated, in our *in vitro* preclinical studies, potent inhibition of both JAK1 and TYK2 at kinase level and cellular level, with *in vitro* IC₅₀ value (a key measure indicating the concentration of a drug needed to inhibit a specific biologic process by 50%) of 0.08nM for JAK1 and 0.55nM for TYK2, and cellular IC₅₀ value of 0.02 nM and 7.98 nM, respectively.
- *Efficacy.* In our head-to-head Phase II clinical trial of VVN461 in NIAU patients in China, VVN461(HD) demonstrated anti-inflammatory efficacy comparable to that of corticosteroids. In particular, in such trial, the proportion of patients achieving an improvement of at least 2 grades in anterior chamber cell scores from baseline at day 14 was 96.55% and 77.78% in the 1.0% VVN461 group and corticosteroid control group, respectively.
- *Safety.* Unlike traditional corticosteroids, which broadly suppress multiple pathways and involve multiple non-inflammatory functions, VVN461 is designed to selectively inhibit specific inflammatory pathways while minimizing disruption of normal physiological functions. Therefore, VVN461 can potentially avoid the typical adverse effects associated with corticosteroids, such as increased intraocular pressure, cataract formation and corneal damage. In addition, the relatively low systemic exposure of eye drops also helps offset the safety risks associated with systemic use of JAK inhibitors.
- *Flash transmucosal delivery system.* With improved solubility utilizing our flash transmucosal delivery system, more drug substance of VVN461 can be delivered within the small volume that can be retained on the ocular surface, thereby increasing the amount of active drug available for corneal penetration and therapeutic effect. Furthermore, by optimizing ionic strength, adjusting the ratio of osmotic pressure regulators and employing an advanced formulation inclusion process, we have improved the compatibility of the formulation with ocular surface mucins and enhanced bioavailability, resulting in outstanding drug concentration within anterior segment tissues in our preclinical *in vivo* studies.
- *Broad coverage.* As its highly selective inhibition of JAK1 and TYK2 enables simultaneous modulation of Th1, Th2 and Th17-type immune responses, VVN461 provides broad coverage of inflammatory cytokine pathways, with potentials to treat a broad range of ocular inflammatory conditions, including NIAU, SS-DED, VKC, scleritis, oGVHD and pediatric uveitis.
- *Expedite commercialization process.* Our VVN461(HD) is potentially the world's first JAK inhibitor eye drop. It received the BTM for the treatment of NIAU from the NMPA in June 2025, recognizing its therapeutic prospect and enabling a potentially expedited approval process. Our parallel development plan of VVN461(HD) in both China and the United States across a range of indications also provides opportunities for accelerated global commercialization process and indication expansion by leveraging existing clinical trials results for regulatory filings in different jurisdictions and for different indications.

Non-Infectious Anterior Uveitis (NIAU)

NIAU is a subtype of uveitis. It is ocular inflammation of the front part of the eye that is not caused by an infection, which can cause pain, redness, light sensitivity, tearing, floaters and decreased vision. It is a potentially sight-threatening condition that can lead to long-term

BUSINESS

structural damage and loss of vision if not diagnosed and treated promptly. NIAU is frequently associated with underlying autoimmune conditions or other systemic diseases and often requires specialist assessment and ongoing management.

Inflammation of the anterior segment of the eye in NIAU often has a complex underlying cause, including autoimmune diseases, and may be accompanied by other comorbidities. NIAU is the most common uveitis type, frequently linked to conditions like spondyloarthritis or idiopathic, requiring thorough workup and careful evaluation to find underlying causes. The need for treatment is often urgent, as the underlying inflammatory mechanisms may permanently alter the structure and function of the eye if inadequately controlled.

Market Opportunity and Competition

Uveitis is one of the leading causes of blindness worldwide, particularly in young adults. According to Frost & Sullivan, NIAU ranks among the five most common causes of blindness in high-income countries. According to Frost & Sullivan, the global NIAU patient population was 32.9 million in 2024 and is estimated to increase to 36.3 million by 2034. This expanding patient base is translating into meaningful growth of the NIAU drug market. The global NIAU drug market increased from US\$1,506.4 million in 2020 to US\$1,798.2 million in 2024 and is estimated to further grow to US\$3,803.6 million in 2034, driven by the increasing adoption of long-term pharmacological treatment and the adoption and penetration of higher-value therapies. China represents one of the most attractive and fastest-growing NIAU markets globally. According to Frost & Sullivan, there were 2.9 million NIAU patients in China in 2024. Driven by the expanding patient base, improving diagnosis rates and rising treatment penetration which translate into increasing demand for pharmacological interventions, including higher-value therapeutic options, the NIAU drug market in China is estimated to increase from US\$177.6 million in 2024 to US\$700.4 million in 2034.

Despite the size and growth prospects of the NIAU market, competition remains relatively limited. Treatment of NIAU are primarily focused on suppressing the autoimmune response. Treatment is still largely based on corticosteroids administered topically, periocularly or, in some cases, systemically. Although corticosteroids are generally effective in reducing inflammation, their use is associated with well-recognized safety concerns. In addition to corticosteroids, NIAU treatments have expanded to include immunosuppressants and biologics. While immunosuppressants, as corticosteroid-sparing therapies, have been demonstrated to be effective in NIAU associated with systemic disease, these drugs may be related to serious systemic adverse toxic effects. Biologics are effective for NIAU but have various limitations, including high cost, increased risk of severe infections, administration burden from infusions or injections, variable response, requirements for regular laboratory monitoring and limited long-term safety data. There is therefore a clear need for an effective and convenient anti-inflammatory therapy for NIAU that maintains robust control of inflammation without the adverse events associated with existing standard treatments.

As of the Latest Practicable Date, no innovative drug had been approved for NIAU and there were three active innovative drug candidates at Phase II or beyond outside China. The following table sets forth details of active innovative drug candidates for NIAU at Phase II or beyond outside China as of the Latest Practicable Date.

Drug Name/Code	Target	Company	Stage	First Post Time
TRS01	TLR4/NRP1/ACE2	Tarsier Pharma	Phase III	2021/9
Brepocitinib	JAK1/TYK2	Priovant Therapeutics	Phase III	2024/5
ABY-035	IL17A	Acelyrin	Phase II	2021/1

Summary of Clinical Trials

We commenced a Phase I clinical trial of VVN461 in healthy subjects in China in March 2023 and completed such trial in December 2023. We commenced a Phase II clinical trial of VVN461 in China in patients with NIAU in November 2023 and completed such trial in February 2025. We commenced a Phase III clinical trial in patients with NIAU in China in November 2025. We expect to complete such trial in the first half of 2027.

Ongoing Phase III Clinical Trial

- Trial design.** This is a multicenter, randomized, single-masked, active-controlled Phase III clinical trial in patients with NIAU to evaluate the efficacy and safety of 1.0% VVN461 eye drop. The primary endpoint assesses the change from baseline in anterior chamber cell score (ACC score) in the study eye at day 14. The key secondary endpoint assesses the proportion of patients whose study eye achieves an ACC score of 0 at day 14. Other secondary endpoints include proportions of participants with at least a two-grade decrease in ACC score at days 14 and 28; proportion of participants with anterior chamber flare (ACF) grade 0 at days 14 and 28; change from baseline in ACC score at day 28; proportion of participants with ACC score 0 at day 28; proportion of participant who need rescue treatment; time to first recovery of ACC score 0 in the study eye; and change from baseline in ACF score.

We plan to enroll a total of 152 participants, with 76 participants randomized to each of the 1.0% VVN461 group (study group) and the 1% prednisolone acetate group (control group). Each participant will receive one drop of VVN461 or prednisolone acetate in the study eye for 28 days as follows: six times daily (Q2h) from day 1 to day 7, four times daily (QID) from day 8 to day 14, twice daily (BID) from day 15 to day 21, and once daily (QD) from day 22 to day 28. After the last dose, participants will attend an end-of-treatment visit on day 28 and a safety follow-up visit on day 35. Participants are assessed at screening (day -2 and day -1), baseline (day 1), days 7, 14, 21 and 28 and a safety follow-up at day 35.

- Trial status.** As of the Latest Practicable Date, we had enrolled a total of 39 subjects. We expect to complete subject enrollment by the end of 2026.

Phase II Clinical Trial

- Trial design.** This trial was a multicenter, randomized, double-masked, active-controlled, non-inferiority Phase II clinical trial of VVN461 in patients with NIAU. The objective was to evaluate the efficacy and systemic and ocular safety of 0.5% and 1.0% VVN461 eye drops in patients with NIAU. The primary efficacy endpoint was the proportion of patients achieving an improvement of at least 2 grades from baseline to day 14 in ACC score in the study eye. The key secondary endpoint was the proportion of patients with an ACC score of 0 in the study eye at day 14.

We planned to enroll 120 patients, with 40 patients in each of 0.5% VVN461 group, 1.0% VVN461 group and 1% prednisolone acetate (active control) group. The study comprised a 28-day treatment period, during which all patients would receive one drop of VVN461 or control drug in the study eye six times daily (Q2h) for seven days, QID for seven days, BID for seven days and QD for seven days. Patients would return for assessments on days 3, 7, 14, 21 and 28.

- Trial status.** The trial was initiated in November 2023 and completed in February 2025. Based on the satisfactory interim efficacy data and the absence of any material safety concerns, we believed that the exploratory objectives of this Phase II trial have been

BUSINESS

fulfilled. We then decided to end the Phase II in advance and discontinued patient enrollment in December 2024. As a result, a total of 86 patients were enrolled and randomized (27, 31 and 28 in the 0.5% VVN461, 1.0% VVN461 and active control groups, respectively).

- *Efficacy.* The primary efficacy endpoint, the proportion of patients achieving an improvement of at least 2 grades in ACC scores from baseline at day 14, was 92.59%, 96.55% and 77.78% in the 0.5% VVN461, 1.0% VVN461 and prednisolone acetate groups, respectively. Both VVN461 dose groups met the predefined non-inferiority margin versus prednisolone acetate, and 1.0% VVN461 met the predefined superiority margin versus prednisolone acetate. The key secondary endpoint, the proportion of patients with an ACC score of 0 at day 14, was 48.15% ($p=0.584$), 62.07% ($p=0.110$) and 40.74% in the 0.5% VVN461, 1.0% VVN461 and prednisolone acetate groups, respectively, showing clear trend of superior efficacy compared the control group.
- *Safety.* VVN461 demonstrated a satisfactory safety and tolerability profile in this study. Among 83 participants in the safety set, 35 participants (42.2%) experienced 47 incidents of treatment-emergent adverse events (TEAEs), among which 12 incidents of TEAEs were treatment-related, including 4 (14.81%) in the 0.5% VVN461 group, 7 (24.14%) in the 1.0% VVN461 group and 1 (3.70%) in the 1% prednisolone acetate group. All treatment-related TEAEs were confined to the study eye. No SAE was reported in the study. All TEAEs were mild or moderate in severity and resolved or improved without permanent discontinuation of study drug.
- *Conclusion.* Both the 0.5% and 1.0% VVN461 eye drops demonstrated statistically significant improvement in anterior chamber inflammation, and each was non-inferior to 1% prednisolone acetate. In addition, the 1.0% VVN461 achieved superiority to 1% prednisolone acetate on the primary efficacy endpoint. Clinical improvement was observed as early as day 3 after initiation of treatment for both VVN461 groups, with the 1.0% VVN461 showing numerically better performance than the 0.5% VVN461 on certain efficacy measures, suggesting a dose-dependent relationship. VVN461 also demonstrated satisfactory safety and tolerability at both dose levels in this trial.

Phase I Clinical Trial

- *Trial design.* This trial was a single-center, randomized, double-masked, vehicle-controlled, dose-escalation Phase I clinical study to evaluate the safety, tolerability, and PK profile of 0.25%, 0.5% and 1.0% VVN461 eye drop in healthy adults. The primary objective was to assess the safety and tolerability of VVN461 following single and multiple doses in healthy adults. Secondary objectives were to (i) evaluate detectable blood concentrations of VVN461 after administration and (ii) if sufficient systemic exposure was detected, characterize the PK profile of these concentrations in healthy adult subjects.

We planned to enroll 30 healthy adults, with 10 individuals in each concentration group (0.25%, 0.5% and 1.0%). Within each group, ten individuals were randomized in a ratio of 8:2 to receive VVN461 or vehicle control. The study included a single-dose administration phase (day 1), a QID dosing phase (day 2 to 5) and a six times daily (Q2h) dosing phase (day 6 to 9) before discharge and a follow-up period.

For each administration, each participant receive one drop of VVN461 or placebo (vehicle) in the right eye. All dosing procedures would be performed during the inpatient period at the clinical research center, and subjects would be discharged after completing the required assessments on day 10. All subjects would return for a single follow-up visit on day 16 (± 1 day). The trial would proceed from one concentration level to the next only if safety of the previous concentration level was confirmed.

- *Trial status.* The clinical trial was initiated in March 2023 and completed in December 2023. A total of 30 participants were enrolled.
- *Safety.* VVN461 demonstrated a satisfactory safety and tolerability profile in this study. Among the 30 participants in safety set (SS), 3 participants (10.0%), including 1 in the vehicle control group, 1 in the 0.25% VVN461 group and 1 in the 0.5% VVN461 group, reported a total of 4 incidents of TEAEs, all of which were treatment related. The TEAEs included one moderate AE (herpes zoster), which is also an AE of special interest leading to permanent treatment discontinuation, and three mild AEs.

BUSINESS

- *PK.* The below-qualification-limit (BQL) proportion, or the proportion of participants with below the qualification limit blood concentration, for the 0.25% VVN461 group, 0.5% VVN461 group and 1.0% VVN461 group was 84.7%, 90.3% and 45.8% in the single-dose phase, respectively, 77.8%, 76.4% and 43.1% in the QID phase, respectively, and 90.5%, 77.8% and 41.7% in the Q2h phase, respectively. Across the three concentration levels, systemic exposure (C_{max} and AUC) generally increased with dose, although dose proportionality was not apparent. No apparent systemic accumulation of VVN461 was observed after repeated administration.
- *Conclusion.* In this trial, VVN461 demonstrated a satisfactory safety profile and low, non-dose-proportional systemic exposure.

Material Communications and Next Steps

We obtained an IND approval of VVN461 for the treatment of NIAU from the NMPA in January 2023. We commenced a Phase I clinical trial in China in March 2023, which was completed in December 2023. We then commenced a Phase II clinical trial of VVN461 in NIAU patients in China in November 2023, which was completed in February 2025. We conducted a pre-Phase III meeting with the NMPA in July 2025 and submitted, among others, key results from all prior trial phases and the Phase III clinical trial design. The NMPA's raised no material questions and confirmed that it had no objections to the commencement of the Phase III clinical trial during the pre-Phase III meeting. As of the Latest Practicable Date, we were conducting the Phase III clinical trial of VVN461(HD) in NIAU patients in China. We plan to complete such trial in the first half of 2027. In addition, we had a Type C meeting, which is a formal discussion meeting, with the FDA in November 2025 to discuss our clinical development plan of VVN461(HD) for the treatment of NIAU in the United States. The FDA agreed that, since we had obtained an IND approval of VVN461 for the treatment of postoperative ocular inflammation in November 2023, we could directly initiate a Phase III clinical trial of VVN461(HD) in NIAU patients in the United States after submission of an IND amendment. We plan to submit such IND amendment in the second quarter of 2026. As of the Latest Practicable Date, we had not received any relevant regulatory agency's concerns or objections to our clinical development plans. No material adverse changes had occurred since we obtained the IND approvals and up to the Latest Practicable Date.

Sjögren's syndrome-related DED (SS-DED)

SS-DED is a chronic, autoimmune-driven form of dry eye that occurs in the setting of Sjögren's syndrome and is typically more severe than non-Sjögren's DED. As the immune system attacks the tear-producing glands and the surface of the eye, people with SS-DED often have very little or poor-quality tears and ongoing inflammation. This leads to blurred vision, ocular discomfort and corneal epithelial damage, often accompanied by corneal staining positivity and elevated tear film osmolarity.

Diagnosis of SS-DED is challenging, because dry eye symptoms are common and may arise from aging, environmental factors or other ocular and systemic disorders. Accurate identification therefore relies on combining symptom assessment with tear function tests, ocular surface staining and, where appropriate, evaluation for systemic Sjögren's syndrome.

Market Opportunity and Competition

According to Frost & Sullivan, the patient population of SS-DED in China amounted to 90.1 million in 2024. There is currently no cure for SS-DED, and available therapies mainly aim to control disease progression, alleviate symptoms and reduce complications rather than reverse the underlying autoimmune process. Current treatment primarily include artificial tears, anti-inflammatory agents such as non-steroidal anti-inflammatory drugs and corticosteroids, adjunctive physical intervention such as use of humidifier and moisture chamber goggles and, in more severe cases, punctual occlusion. However, current corticosteroids therapy for SS-DED is associated with notable limitations. In particular, long-term use elevates risks of ocular complications including intraocular pressure elevation and even cataract formation, and systemic use may cause high blood sugar and immunosuppression. Therefore, there are substantial unmet needs for safe and effective therapies that can better control the Sjögren's syndrome, relieve dry eye and improve patients' quality of life.

BUSINESS

As of the Latest Practicable Date, there were no drug approved for SS-DED and no clinical-stage SS-DED drug candidates in China. However, with the further research on immune system diseases and dry eye treatment, the SS-DED drug market in China is estimated to reach US\$2,184.7 million by 2034.

Summary of Clinical Trials

We completed a Phase I clinical trial of VVN461 in healthy subjects in China in December 2023. In this trial, VVN461 was safe and well-tolerated in healthy subjects at each of 0.25%, 0.5% and 1.0% dose levels. See “—Non-Infectious Anterior Uveitis (NIAU)—Summary of Clinical Trials—Clinical Trials in China—Phase I Clinical Trial” for details.

Material Communications and Next Steps

We obtained an IND approval from the NMPA for directly commencing a Phase II clinical trial of VVN461 for the treatment of SS-DED in November 2025. We plan to commence the Phase II clinical trial in China by the end of 2026. As of the Latest Practicable Date, we had not received any relevant regulatory agency’s concerns or objections to our clinical development plans. No material adverse changes had occurred since we obtained the IND approvals and up to the Latest Practicable Date.

Other Indications

Leveraging VVN461(HD)’s broad anti-inflammatory potential as a JAK1/TYK2 inhibitor, we are also developing VVN461(HD) for VKC, scleritis, oGVHD and pediatric uveitis.

- **VKC.** VKC is a chronic bilateral ocular disease fundamentally rooted in immune hypersensitivity reactions. It predominantly affects children and adolescents before puberty, with a slightly higher incidence in males. VKC exhibits a strong seasonal correlation, typically manifesting in the early stages of spring and summer, while symptoms generally subside or disappear during autumn and winter. Symptoms primarily include intense, unrelenting itch, often accompanied by sensations of burning, photophobia, tearing and foreign body sensation. The etiology is closely linked to external allergens such as pollen and dust mites. Current treatment focuses on allergen avoidance, artificial tears and topical anti-allergic drops, such as antihistamines, mast cell stabilizers and dual-acting agents. For more severe conditions, topical corticosteroids and long-term immunomodulators such as CsA or tacrolimus are used. Allergen-specific immunotherapy is considered when a clear trigger is identified and conventional therapy fails. However, current treatment is limited by the safety and dependency issues of corticosteroids and the high irritation level of immunomodulators, suboptimal response in many children to standard antihistamines or steroids and poor adherence, highlighting the need for a non-steroidal, targeted, child-friendly maintenance therapy. We plan to submit an IND application to directly commence a Phase II clinical trial of VVN461 for VKC to the NMPA by the end of 2026.
- **Scleritis.** Scleritis is a serious inflammatory disease of the white outer coat of the eye, or the sclera, that can cause severe pain and ocular hyperemia. It is often associated with systemic autoimmune conditions such as rheumatoid arthritis and lupus. People with scleritis typically experience a severe eye pain, scleral hyperemia and tender lumps on ocular surface. Severe cases may lead to scleral thinning, perforation and even permanent blindness. As of the Latest Practicable Date, no drug had been approved by the FDA for the treatment of scleritis. In practice, treatment is stratified by severity and etiology, with common approaches including topical non-steroidal anti-inflammatory drugs and corticosteroids, systemic immunosuppressants and scleral transplantation for patients at risk of perforation. We plan to collaborate with an academic research institution to commence investigator-initiated trials of VVN461 for the treatment of scleritis by the end of 2026. After completion of such investigator-initiated trials, we plan to submit IND amendments to the FDA for directly commencing a registration-enabling pivotal clinical trial in the United States for the treatment of scleritis.

BUSINESS

- *oGVHD*. oGVHD is a complication of allogeneic hematopoietic stem cell transplantation in which donor-derived immune cells attack the tissues of the ocular surface. It typically develops as part of chronic graft versus host disease (GVHD). Common symptoms of oGVHD include dry eye, conjunctivitis and keratitis and severe cases may even lead to blindness. Currently, there is no unified clinical standard for the treatment of oGVHD. Common therapeutic approaches include topical administration of artificial tears, autologous serum eye drops, corticosteroids and immunosuppressants, as well as punctal occlusion and therapeutic contact lenses. We plan to collaborate with an academic research institution to commence investigator-initiated trials of VVN461 for the treatment of oGVHD by the end of 2026. After completion of such investigator-initiated trials, we plan to submit IND amendments to the FDA for directly commencing a registration-enabling pivotal clinical trial in the United States for the treatment of oGVHD.
- *Pediatric Uveitis*. Pediatric uveitis is a serious inflammatory eye disease that occurs in children, and is often linked to juvenile idiopathic arthritis, a childhood form of autoimmune arthritis. In pediatric uveitis, the immune system mistakenly attacks the uvea, which can lead to redness, eye pain, sensitivity to light, blurred vision and “floaters” in the field of vision. However, in many children, the condition develops quietly with few or no obvious symptoms. Without timely diagnosis and treatment, pediatric uveitis can cause serious complications such as cataracts, glaucoma, swelling of the central retina and even permanent vision loss or blindness. Current treatment starts with topical corticosteroids for anterior disease and, when needed, adding systemic corticosteroids, systemic immunosuppressants and biologics for intermediate, posterior, panuveitis or refractory cases. As of the Latest Practicable Date, we were developing the clinical development plan for such indication.

WE MAY NOT BE ABLE TO ULTIMATELY DEVELOP AND MARKET VVN461(HD) SUCCESSFULLY.

VVN001

VVN001, a second-generation antagonist of LFA-1, is an innovative eye drop for the treatment of dry eye disease (DED). DED is a multifactorial disease of the ocular surface characterized by an unstable tear film and tear hyperosmolarity (*i.e.*, less water and more salt in the tears). This imbalance triggers inflammation, which damages cells on the surface of the eye and impairs the function of the tear glands, further breaking down the tear film and reducing tear production in a vicious cycle that worsens symptoms such as redness, irritation and discomfort. Controlling this chronic inflammation is therefore a key goal in the treatment of DED.

The chronic inflammation on the ocular surface and periocular tissues is characterized by the activation and migration of T cells to the inflamed tissues. Elevated levels of inflammatory cytokines expressed by T cells have been profiled in the tear film of patients with aqueous-deficient or evaporative-loss DED. LFA-1 is an adhesion protein found on the surface of lymphocytes such as T cells that plays an important role in causing inflammation on the surface of the eye. The interaction of LFA-1 with its ligand intercellular adhesion molecule 1 (ICAM-1) triggers and maintains inflammation in DED.

We obtained IND approvals from the FDA and the NMPA for VVN001 for the treatment of DED in October 2020 and March 2021, respectively. We completed a Phase I clinical trial of VVN001 in China in December 2021, a Phase II clinical trial in the United States in April 2022 and a Phase II clinical trial in China in December 2022. We commenced a Phase III clinical trial in China in June 2024.

Mechanism of Action

VVN001, as an LFA-1 antagonist, is designed to address DED by blocking a crucial step in the inflammatory response on the eye’s surface. In DED, inflammatory signals (chemokines) activate LFA-1 proteins on the surface of immune T cell, and LFA-1 then mediates the emigration of T cells from blood vessels to the injured tissues. Furthermore, LFA-1 also plays an important role in T cell activation by adhering T cells to antigen presenting cells, such as dendritic cells. Overactivated T cells release inflammatory cytokines that cause ongoing tissue (cornea and conjunctiva) inflammation and damage. LFA-1 antagonists work by blocking the interaction between two proteins, LFA-1 on immune cells and ICAM-1 on the surface of

BUSINESS

epithelial cells of blood vessels. LFA-1 antagonists thus reduce the activation and movement of T cells to cornea and conjunctiva and lower the release of inflammatory mediators. Through this targeted action, VVN001 is intended to calm the chronic inflammation that drives DED and to improve both the clinical signs and the symptoms experienced by patients. The following diagram illustrates the mechanism of action of VVN001.

Market Opportunity and Competition

DED is one of the most prevalent ophthalmic diseases in China and globally and is increasingly recognized as a chronic, progressive disease that can materially impair quality of life and work productivity. According to Frost & Sullivan, the global DED patient population is expected to increase from 1.6 billion in 2024 to 1.8 billion in 2034 while the DED patient population in China is expected to increase from 359.2 million in 2024 to 372.1 million in 2034. Moderate-to-severe DED accounts for approximately 40% of the overall DED patients, and is associated with significant pain, limitations in performing daily activities, reduced vitality, poor general health and often depression. The chronic nature of the condition, together with high unmet need in patients with moderate-to-severe disease, underpins sustained demand for effective, long-term pharmacological treatment options.

DED is a complex ocular surface multifactorial disease affecting tear volume, flow and/or composition, and therefore effective management often requires therapies that address different mechanisms, allowing ophthalmologists and patients to alternate different treatment options to find the ones suitable for individual cases in clinical practice. Current treatment patterns remain dominated by artificial tears and lubricants, particularly in China. However, they can provide only temporary symptomatic relief but cannot address the pathological causes of the disease, and their effect is often limited in mild DED. For moderate-to-severe cases, there is substantial demand for more effective ophthalmic drugs targeting underlying pathophysiological causes of DED given its chronicity. Treatment options for moderate-to-severe DED remain relatively limited and are often associated with delayed onset of action, tolerability issues and suboptimal adherence, contributing to significant unmet medical needs.

Accordingly to Frost & Sullivan, driven by the increasing prevalence, patient awareness and penetration of long-term pharmacological treatments, the global DED drug market grew from US\$5,322.6 million in 2020 to US\$6,614.3 million in 2024 and is estimated to reach US\$9,930.5 million in 2034, supported by sustained demand for chronic disease management. In parallel, the DED drug market in China is expanding rapidly from a smaller base. According to Frost & Sullivan, the DED drug market in China increased from US\$434.2 million in 2020 to US\$653.4 million in 2024 and is estimated to further expand to US\$1,828.5 million in 2034, driven by rapid improvement in diagnosis rate, aging population, increasing treatment penetration and gradual shift from symptomatic treatment to prescription drugs.

BUSINESS

As of the Latest Practicable Date, there were four innovative drugs approved for DED treatment and 26 active innovative drug candidates at or beyond Phase II stage, including our VVN001, outside China. The following table sets forth details of approved and active innovative drug candidates for the treatment of DED at Phase II or beyond outside China as of the Latest Practicable Date.

Drug Name/Code	Target	Company	Stage	First Post Time
Lifitegrast	LFA-1	Bausch & Lomb	Approved	2016/7

BUSINESS

As of the Latest Practicable Date, there were five innovative drugs approved for DED treatment and ten active innovative drug candidates at or beyond Phase II stage, including our VVN001, in China. The following table sets forth details of approved and active innovative drug candidates for the treatment of DED at Phase II or beyond in China as of the Latest Practicable Date.

Drug Name/Code	Target	Company	Stage	First Post Time
Diquafosol	P2RY2	Santen Pharma	Approved	2022/6
Recombinant basic fibroblast growth factor	FGFR	Essex Bio-Technology	Approved	2024/10
Dextran+Hypromellose	N/A	Novartis/Alcon	Approved	2025/1
Human epidermal growth factor (hEGF)	EGFR	Uni-Bio Science Group	Approved	2025/3
SHR8058	undisclosed	Novaliq/Hengrui	Approved	2025/6
HBM9036	TNF- α	Harbour	Phase III	2022/12
VVN001	LFA-1	our Company	Phase III	2024/4
SJP-0132	TRPV1	Senju	Phase III	2024/11
OT-202	SYK/VEGFR2	Ocumension Therapeutics	Phase II	2022/12
SMR001	NGFR	Sinobioway Biomedicine	Phase II	2023/7
EG 017	AR	Changchun GeneScience	Phase II	2023/8
Ipidudine Eye drops	PIK3R3	Yicheng Biotech	Phase II	2023/9
CF04	undisclosed	Puyou Biomedical	Phase II	2024/6
TUL12101	RASP	Uni-Bio Science Group	Phase II	2025/4
SQ-22031	undisclosed	Xingqi Pharma	Phase II	2025/8

Source: Frost & Sullivan report, CDE

Our Advantages

We believe our VVN001 has the following advantages:

- Improved solubility and patient experience.** VVN001 is a molecule designed for eye drop application, with aqueous solubility more than twice that of lifitegrast, the first-generation LFA-1 antagonist, while maintaining good ocular PK. As a result, in our Phase II clinical trial of VVN001 in patients with moderate-to-severe DED in the United States, VVN001 exhibited ocular surface irritation levels similar to vehicle and significantly lower than those observed with lifitegrast, the first-generation LFA-1 antagonist. In addition, in the same trial, a lower percentage of patients in the 5% VVN001 group (5%) experienced dysgeusia (bad tastes in mouth) when compared to the lifitegrast control group (15%) and no patient in the VVN001 groups reported stinging sensation, which is a common adverse effect associated with CsA. Such improved patient experience is also likely to increase patient adherence.
- Improved efficacy.** As demonstrated in our Phase II clinical trial in the United States, patients in both VVN001 groups experienced signs of reliefs, such as increased tear secretion and decrease in inflammatory staining (including nCFS, tempCFS, cCFS and sCFS scores) compared to vehicle control group, as soon as day 14, much faster compared to CsA. In addition, both VVN001 groups showed good trend or statistically significant decrease of CFS scores in most regions when compared to vehicle control group after day 56, demonstrating improved efficacy in reducing cornea inflammation as compared to CsA, which did not display statistically significant reduced cornea inflammation when compared to its vehicle until four months into treatment.

BUSINESS

Summary of Clinical Trials

We obtained an IND approval of VVN001 from the FDA in October 2020 to directly commence a Phase II clinical trial of VVN001 in the United States by leveraging our preclinical study results, including satisfactory safety data. We commenced a Phase II clinical trial in the United States in December 2020 and completed such trial in April 2022.

Meanwhile, we obtained an IND approval from the NMPA in March 2021 and commenced a Phase I clinical trial of VVN001 in healthy subjects in China in August 2021. We completed such trial in December 2021. We then commenced a Phase II clinical trial of VVN001 in patients with moderate-to-severe DED in China in November 2021 and completed such trial in December 2022. We commenced a Phase III clinical trial in patients with moderate-to-severe DED in China in June 2024 and expect to complete such trial by the end of 2026.

Clinical Trials in China

Ongoing Phase III Clinical Trial

- *Trial design.* This is a multicenter, randomized, double-masked, vehicle-controlled Phase III trial in patients with moderate-to-severe DED. The primary endpoint measures the change from baseline to day 84 in total corneal fluorescein staining (tCFS) score of the study eye. The key secondary endpoint assesses the change over the same period in patients' dry eye symptom in terms of visual analog scale (VAS) score. Other secondary endpoints evaluate changes from baseline in tCFS scores, dry eye VAS scores, ocular discomfort VAS scores and Schirmer's test scores at each visit, as well as changes from baseline in CFS scores in each of the central, inferior, superior, nasal and temporal region.

We plan to enroll a total of 700 participants, with 350 participants in each of the 5% VVN001 group (study group) and the vehicle group (control group). Each participant will receive one drop of either 5% VVN001 or vehicle in each eye BID (morning and evening) for 12 weeks. Participants are assessed at screening (day -14), baseline (day 1), and days 14, 28, 56 and 84. After completing the first 12-week treatment, the first 300 randomized participants will enter a 40-week open-label extension, receiving 5% VVN001 BID through week 52, with visits at weeks 20, 28, 36, 44 and 52, followed by a safety follow-up at week 54. First 300 participants enrolled will complete the study at week 12 and attend a follow-up visit at week 54.
- *Trial status.* As of the Latest Practicable Date, we had enrolled a total of 480 subjects. We expect to complete subject enrollment by the third quarter of 2026. We held a mid-term meeting in December 2025, during which the IDMC confirmed that the trial could proceed with the current trial design.

Phase II Clinical Trial

- *Trial design.* This trial was a multicenter, randomized, double-masked, vehicle-controlled study to evaluate the safety and efficacy of 1% and 5% VVN001 eye drops in patients with moderate-to-severe DED. The primary objectives were to assess the safety and tolerability of VVN001 and to evaluate its efficacy in the treatment of moderate-to-severe DED. The primary endpoint was the mean change in iCFS score from baseline to day 84. The key secondary endpoint was the mean change in VAS score from baseline to day 84.

We planned to enroll 180 patients, with 60 patients in each of the 1% VVN001 group, 5% VVN001 group and vehicle control group. The trial included an 84-day treatment period, during which all patients would receive one drop of VVN001 or vehicle control in each eye BID. Patients would return to study centers for efficacy and safety assessments on days 14, 28, 56 and 84 of the treatment period.
- *Trial status.* The trial was initiated in November 2021 and completed in December 2022. A total of 182 patients were enrolled and included in the full analysis set (FAS), including 62, 61 and 59 in the 1% VVN001, 5% VVN001 and control groups, respectively.
- *Efficacy.* Both VVN001 groups demonstrated improvement from baseline in terms of inferior corneal fluorescein staining (iCFS) score. The primary endpoint, which is the mean change from baseline in iCFS score at day 84 was -1.57 (p=0.978) in the 5% VVN001 group, -1.49 (p=0.586) in the 1% VVN001 group and -1.59 in the control group. The key secondary endpoint, which is the mean change from baseline in VAS score at 84, was -29.815 (p=0.400) in the 5% VVN001 group, -26.539 (p=0.087) in the 1% VVN001 group and -32.922 in the vehicle control group. Both VVN001 groups demonstrated improvement from baseline in terms of other CFS scores, symptom assessment in dry eye

BUSINESS

(SANDE) scores and Schirmer's test results. Both the 1% and 5% VVN001 groups showed statistically significant improvement compared to the control group in superior CFS (sCFS) scores at day 84, indicating reduced corneal surface damage in the upper part of the cornea. tCFS and SANDE scores demonstrated notable improvement with a dose-dependent relationship.

- *Safety.* VVN001 demonstrated a satisfactory safety and tolerability profile in this study. Based on the FAS of 182 patients, 45 (24.7%) experienced TEAEs. Among them, five (2.7%) were related to the treatment. Classified by preferred term, drug-related TEAEs in VVN001 groups included conjunctival papillae and eye pain. In the FAS, two participants experienced SAE, both of which were not related to the study drug.
- *Conclusion.* In this trial, VVN001 demonstrated a satisfactory safety and tolerability profile. In terms of efficacy, both VVN001 groups demonstrated improvement from baseline in terms of CFS score of each region, VAS score, SANDE score and Schirmer's test results. Both VVN001 groups showed statistically significant improvement compared to the control group in sCFS scores at day 56 and day 84. Both VVN001 groups demonstrated notable dose-proportional improvements in terms of tCFS scores and SANDE scores.

Phase I Clinical Trial

- *Trial design.* This trial was a single-center, randomized, double-masked, vehicle-controlled, dose-escalation Phase I clinical study to evaluate the safety, tolerability and PK profile of 1% and 5% VVN001 eye drop in healthy adults. The primary objective was to assess the safety and tolerability of VVN001 following single and multiple doses in healthy adults. Secondary objectives were to (i) evaluate detectable blood concentrations of VVN001 after administration and (ii) if sufficient systemic exposure was detected, characterize the PK profile of these concentrations.

We planned to enroll 20 healthy adults, with 10 in each concentration group (1% and 5%). Within each group, participants were randomized in a ratio of 8:2 to receive VVN001 or vehicle control, respectively. The trial comprised a single-dose phase on day 1, a BID dosing phase from day 2 to the morning of day 5 (a total of seven doses) and a three-times-daily (TID) dosing phase from day 6 to the morning of day 9 (a total of seven doses).

For each administration, each participant would receive one drop of VVN001 or placebo (vehicle) in the right eye. All dosing was performed during an inpatient stay at the clinical research center, with discharge after assessments on day 10 and a follow-up visit on day 16. The trial would proceed from the 1% concentration level to the 5% level only if safety of the 1% concentration level was confirmed after completion of the first two phases.

- *Trial status.* The clinical trial was initiated in August 2021 and completed in December 2021. A total of 20 participants were enrolled.
- *Safety.* VVN001 demonstrated a satisfactory safety and tolerability profile in this study. Among the 20 participants in the SS, three participants (15.0%), including one in the vehicle control group and two in the 5% VVN001 group, reported a total of five incidents of TEAEs. Among all TEAEs, three incidents were treatment-related, all of which were mild AEs reported in the vehicle control group. Two moderate AEs reported in the 5% VVN001 group included influenza and eczema, which were not related to the treatment.
- *PK.* Blood concentrations in substantially all 1% VVN001 participants and most 5% VVN001 participants were BQL. The blood concentrations of three participants in the 1% VVN001 group were BQL during all dosing phases. Across the two concentration levels, systemic exposure (C_{max} and AUC) increased with increasing dose, with median T_{max} ranging from 0.3 to 0.6 hours. No apparent systemic accumulation was observed.
- *Conclusion.* In this trial, VVN001 demonstrated a satisfactory safety profile and low, dose-proportional systemic exposure.

BUSINESS

Clinical Trial in the United States

Phase II Clinical Trial

- *Trial design.* This trial was a multicenter, double masked, randomized, vehicle-controlled trial in DED patients to evaluate the safety and efficacy of 1% and 5% VVN001 eye drop in comparison with vehicle. The primary objective was to evaluate the safety and tolerability of VVN001 when administered BID compared to vehicle. The secondary objective was to evaluate the efficacy of VVN001 administered BID compared to vehicle in treating signs and symptoms of DED. The primary efficacy endpoint was the mean change in iCFS from baseline to day 84 for 1% and 5% VVN001 compared to vehicle. Key secondary efficacy endpoints were the mean change in VAS score from baseline to day 84.

We planned to enroll approximately 165 patients, with 55 patients in each of the 1% VVN001 group, 5% VVN001 group and vehicle control group. The trial included an 84-day treatment period, during which all patients would receive one drop of VVN001 or vehicle control in each eye BID. Patients were evaluated on days 14, 28, 56 and 84.

- *Trial status.* The clinical trial was initiated in December 2020 and completed in April 2022. A total of 169 subjects were enrolled and included in FAS, including 56, 57 and 56 in the 5% VVN001, 1% VVN001 and vehicle control groups, respectively.
- *Efficacy.* The primary endpoint, mean change from baseline in iCFS score in the study eye at day 84, approached statistical significance ($p=0.054$) for the 5% VVN001 group compared to the vehicle group. Improvements in terms of CFS scores were observed in all treatment groups at all time points. At day 84, the 5% VVN001 group showed statistically significant improvements versus vehicle in terms of tCFS score ($p=0.004$), nasal CFS (nCFS) ($p=0.001$), temporal CFS (tempCFS) ($p=0.015$) and central CFS (cCFS) ($p=0.009$). A statistically significant improvement versus vehicle was also observed for sCFS ($p=0.040$) and SANDE ($p=0.031$) at day 56. Schirmer's test values were significantly improved in the 5% VVN001 group compared with vehicle at day 14 ($p=0.049$) and day 28 ($p=0.017$). Improvements in VAS score were observed in all treatment groups, with numerically greater improvements generally seen in the active treatment groups.
- *Safety.* VVN001 at both the 5% and 1% dose levels was safe and well tolerated in participants with DED. No SAE was reported in the study. Among the 169 participants in the FAS, ocular TEAEs were reported in 18 (10.7%). By preferred term, the most commonly reported ocular TEAEs were instillation site pain, chalazion, eye discharge and eye pain, each occurring in a small proportion of participants. All ocular AEs identified as related to study drug were mild.

Among the 169 participants in the FAS, non-ocular TEAEs were reported in 15 participants (8.9%). There was a higher incidence of TEAEs in the 5% VVN001 treatment group, partially attributable to the higher rate of reported mild and intermittent dysgeusia, a known side effect of lifitegrast, which was only reported by three participants in the 5% VVN001 group.

- *Conclusion.* The primary efficacy endpoint in this study approached statistical significance for the 5% VVN001 group compared to the control group. The mean change from baseline in tCFS score at day 84 for the same comparison also achieved statistical significance. Clinical signs and subject-reported symptoms of DED decreased in this study in all treatment groups, with numerically greater changes from baseline generally being observed in the VVN001 groups relative to the control group. In some signs and symptoms, there was a dose-related clinically and, in some cases, statistically significant treatment effect. VVN001 also demonstrated an acceptable safety profile in this trial.

Material Communications and Next Steps

We obtained an IND approval of VVN001 for DED from the FDA in October 2020 and obtained an IND approval of VVN001 for DED from the NMPA in March 2021. We commenced a Phase I clinical trial in China in August 2021, which was completed in December 2021. We then commenced a Phase II clinical trial in the United States and a Phase II clinical trial in China in December 2020 and November 2021, respectively, which was completed in April 2022 and December 2022, respectively. We conducted a pre-Phase III consultation with the NMPA and

BUSINESS

submitted, among others, key results from all prior trial phases (including the results of Phase II clinical trial in the United States) and the Phase III clinical trial design. We received the NMPA’s official response in March 2023, which raised no material questions and confirmed that it had no objections to the commencement of the Phase III clinical trial. We commenced a Phase III clinical trial in China in June 2024 and plan to complete such trial by the end of 2026. As of the Latest Practicable Date, we had not received any relevant regulatory agency’s concerns or objections to our clinical development plans. No material adverse changes had occurred since we obtained the IND approvals and up to the Latest Practicable Date.

WE MAY NOT BE ABLE TO ULTIMATELY DEVELOP AND MARKET VVN001 SUCCESSFULLY.

Our Other Product Candidates

VVN461(LD)

VVN461(LD) is the low-dosage formulation of VVN461 eye drop. We are developing VVN461(LD) for postoperative ocular inflammation since a lower dosage of VVN461 is expected to be sufficient to achieve optimal therapeutic effect for mild inflammatory conditions. Inflammation inside the eye is a common and expected consequence of intraocular surgery such as cataract extraction and lens replacement. Surgical trauma triggers the production of prostaglandins and other vasoactive molecules, as well as pro-inflammatory cytokines, leading to redness, swelling, protein and inflammatory cells leaking into the front of the eye and, if not adequately controlled, complications such as cystoid macular edema and corneal scarring. A JAK1/TYK2 inhibitor is designed to block key cytokine-driven signaling pathways involved in this process, with the aim of dampening postoperative inflammation, reducing the risk of complications and supporting safe visual recovery after surgery. See “—Our Core Products—VVN461(HD)—Mechanism of Action” for details.

We obtained an IND approval from the FDA for VVN461 for the treatment of postoperative ocular inflammation in November 2023. We completed a Phase II clinical trial in the United States in October 2024. See “—Our Collaboration and License Agreements—Arrangements with E-nitiate” for the history of this drug candidate. We conducted preclinical studies of VVN461 before the transfer and licensing arrangements in February 2021 and completed preclinical studies and Phase I and Phase II clinical trials of VVN461 subsequent to the arrangements.

Market Opportunity and Competition

According to Frost & Sullivan, approximately 35.8 million eye surgeries were performed in 2024, and a large number of patients may develop postoperative ocular inflammation and infection as a result of eye surgery. Postoperative ocular inflammation is most commonly managed with topical corticosteroid eye drops. These medicines can reduce pain and discomfort, help restore the normal barrier between the blood and the fluid in the front of the eye and reverse visible signs of inflammation. However, long-term use of corticosteroids is limited by systemic side effects, highlighting the need for safer treatment options. The global postoperative ocular inflammation drug market in China increased from US\$1,129.8 million in 2020 to US\$1,295.5 million in 2024 and is estimated to reach US\$3,861.4 million in 2034.

As of the Latest Practicable Date, there were three innovative drugs approved for postoperative ocular inflammation treatment and four active innovative drug candidates at clinical stage, including our VVN461, outside China. The following table sets forth details of approved and active innovative drug candidates at clinical stage for postoperative ocular inflammation outside China as of the Latest Practicable Date.

TRS01	TLR4/NRP1/ACE2	Tarsier Pharma	Phase I/II	2020/1

Source: Frost & Sullivan report, *ClinicalTrials.gov*, FDA

Our Advantages

We believe our VVN461(LD), as JAK1/TYK2 inhibitor, can be a promising treatment for postoperative ocular inflammation, given its “steroid-like” anti-inflammatory efficacy with a favorable safety profile that avoids the typical adverse effects associated with corticosteroids. See “—Our Core Products—VVN461(HD)—Our Advantages” for details.

Summary of Clinical Trials

We commenced a Phase II clinical trial of VVN461 in the United States in December 2023 in patients undergoing routine unilateral cataract surgery and completed such trial in October 2024.

Phase II Clinical Trial

- Trial design.** This was a multicenter, double-masked, randomized, vehicle-controlled, parallel-comparison study evaluating the safety and efficacy of VVN461 in patients undergoing routine unilateral cataract surgery. The primary objective was to evaluate the ocular efficacy of 0.5% and 1.0% VVN461 eye drop in treating postoperative ocular inflammation associated with cataract surgery, compared with a matching vehicle. The secondary objective was to evaluate the safety of VVN461. The primary efficacy endpoint was the proportion of subjects with ACC Grade 0 in the study eye at day 14. Secondary endpoints included the proportion of subjects with ACC grade 0 in the study eye at day 7 and the proportion with ACF grade 0 in the study eye at day 14. We planned to enroll approximately 90 participants, with 30 in each of the 1.0% VVN461, 0.5% VVN461 and vehicle control group. Each participant would receive one eye drop in the study eye QID for 14 days.
- Trial status.** The trial was initiated in December 2023 and completed in October 2024. A total of 91 subjects were enrolled, with 30, 30 and 31 in the 1.0% VVN461, 0.5% VVN461 and vehicle control groups, respectively.
- Efficacy.** The primary endpoint, the proportion of subjects achieving ACC Grade 0, meaning no inflammatory cells visible in the anterior chamber on slit-lamp examination, in the study eye at day 14, was 60.0% (p=0.0012), 53.3% (p=0.0057) and 19.4% in the 1.0% VVN461 group, 0.5% VVN461 group and the vehicle control group, respectively, with statistically significant differences for both VVN461 groups. The treatment effect was apparent by day 7 and became more pronounced over time.

At day 7, ACC Grade 0 was achieved by 30.0% (p=0.0459), 20.0% (p=0.2557) and 9.7% of subjects in the 1.0% VVN461 group, 0.5% VVN461 group and the vehicle control group, respectively. For ACF, at day 7, ACF Grade 0 was achieved by 80.0% of subjects (p=0.0004) in both VVN461 groups and 35.5% in the vehicle group; by day 14, the proportion of subjects achieving ACF Grade 0 increased to 86.7% (p<0.0001), 93.3% (p<0.0001) and 45.2% in the 1.0% VVN461 group, 0.5% VVN461 group and the vehicle

BUSINESS

control group, respectively. A total of 19 participants required rescue medication for postoperative ocular inflammation, among which only 3 and 1 participants were in the 1.0% VVN461 group, 0.5% VVN461 group, respectively.

- *Safety.* VVN461 demonstrated a satisfactory safety and tolerability profile in this study. Among 91 participants in the FAS, 8 participants reported ocular TEAEs and 2 participants reported non-ocular TEAEs, all of which were considered unrelated to the study drug.
- *Conclusion.* In this trial, VVN461 eye drop at both dosing levels appeared safe and well tolerated in adult subjects recovering from cataract surgery and demonstrates both clinically and statistically significant efficacy in the management of postoperative ocular inflammation and pain relative to the vehicle control.

Phase I Clinical Trial

We completed a Phase I clinical trial of VVN461 in healthy subjects in China in December 2023. In this trial, VVN461 was safe and well-tolerated in healthy subjects at each of 0.25%, 0.5% and 1.0% dose levels. See “—Our Core Products—VVN461(HD)—Non-Infectious Anterior Uveitis (NIAU)—Summary of Clinical Trials—Clinical Trials in China—Phase I Clinical Trial” for details.

Material Communications and Next Steps

We obtained an IND approval from the FDA to directly commence a Phase II clinical trial of VVN461 for the treatment of postoperative ocular inflammation in November 2023. In addition, we had a Type C meeting with the FDA in June 2025 to discuss our clinical development plan of VVN461(LD) for the treatment of postoperative ocular inflammation in the United States. The FDA confirmed that it had no objection to our plan to submit an NDA for VVN461(LD) following completion of a single Phase III pivotal clinical trial. As of the Latest Practicable Date, we had not received any relevant regulatory agency’s concerns or objections to our clinical development plans. No material adverse changes had occurred since we obtained the IND approvals and up to the Latest Practicable Date.

WE MAY NOT BE ABLE TO ULTIMATELY DEVELOP AND MARKET VVN461(LD) SUCCESSFULLY.

VVN432

VVN432, developed based on the same compound underlying our Core Product VVN461(HD), is a non-steroidal JAK inhibitor nasal spray for chronic rhinosinusitis (CRS). According to Frost & Sullivan, our VVN432 is currently the world’s only clinical-stage JAK inhibitor for the treatment of CRS. CRS is a long-lasting inflammation of the nose and sinuses that typically persists and leads to problems such as nasal blockage, thick nasal discharge, facial pain or pressure and reduced sense of smell or taste. CRS is commonly divided into two forms: chronic rhinosinusitis with nasal polyps (CRSwNP), which are soft, non-cancerous growths in the nasal passages or sinuses often associated with more severe inflammation and smell loss, and chronic rhinosinusitis without nasal polyps (CRSsNP), which more often presents with facial pressure and nasal discharge. The condition can significantly affect quality of life, sleep and daily functioning. As the JAK pathway plays a key role in inflammatory responses, including in CRS, we are developing VVN432 to address the unmet medical needs for treatment options of CRS. See “—Our Collaboration and License Agreements—Arrangements with E-nitiate” for the history of this drug candidate. We conducted preclinical studies before the transfer and licensing arrangements in January 2024 and conducted preclinical studies and are conducting a Phase I clinical trial of VVN432 subsequent to the arrangements.

Mechanism of Action

VVN432 has the same active molecule as VVN461 and is being developed as a local, non-steroidal anti-inflammatory therapy for CRS. CRS is driven by persistent inflammation in the lining of the nose and sinuses, mediated by naturally occurring signaling proteins in the body, or cytokines. These cytokines activate JAKs, including JAK1 and TYK2, which switch on multiple genes that promote and sustain inflammation. VVN432 is designed to selectively inhibit JAK1 and TYK2 and thereby interrupt this inflammatory signaling cascade. By dampening the activity of several key cytokines that are believed to be involved in CRS,

BUSINESS

VVN432 aims to reduce swelling and inflammation in the nasal and sinus mucosa, improve symptoms such as nasal congestion and discharge and help to treat the disease and to prevent disease recurrence. See “—Our Core Products—VVN461(HD)—Mechanism of Action” for more details.

Market Opportunity and Competition

CRS can be categorized by the underlying type of inflammation, which varies between individuals and can be driven by different immune pathways. In China, CRSsNP is often driven by non-type 2 (non-T2) inflammation, usually dominated by neutrophils, a type of white blood cell, while CRSwNP more commonly shows a mixed pattern (T1/T2/T3) that may or may not include prominent eosinophilic (T2) inflammation. According to Frost & Sullivan, the overall CRS patient population in China amounted to 127.6 million in 2024 and is estimated to reach to 150.0 million in 2034.

Current treatment for CRS typically follows a stepwise approach but remains unsatisfactory for a significant proportion of patients. First-line therapy usually consists of intranasal corticosteroid sprays for at least 12 weeks, which are generally safe and well tolerated but may cause local side effects such as nosebleeds, dryness or irritation, and do not fully control symptoms in many individuals. In more severe CRSwNP, especially in patients with T2 CRS, short courses of oral corticosteroids are used, but their long-term use is limited by systemic side effects. For non-T2 CRS, long-term low-dose macrolide antibiotics may be prescribed for their anti-inflammatory and immune-modulating effects, although they can cause gastrointestinal upset, liver toxicity and heart rhythm abnormalities. Biologic therapies targeting T2 inflammation can significantly improve symptoms and reduce polyp size in difficult-to-treat CRSwNP, but are primarily effective in patients with clear T2 inflammatory features and are not suitable for all patients. Endoscopic sinus surgery is considered when at least 12 weeks of standard medical therapy fails or complications occur. Despite these options, around 20% to 30% of patients remain difficult to treat and there is a high nasal polyps recurrence rate of 98% two years post surgery, highlighting a substantial unmet medical need, particularly for effective local therapies that work across different inflammatory subtypes of CRS. The CRS drug market in China increased from US\$425.2 million in 2020 to US\$642.4 million in 2024 and is estimated to reach US\$2,178.9 million in 2034.

As of the Latest Practicable Date, there were three innovative drugs approved for CRS treatment in China. As of the same date, there were 16 active innovative drug candidates in the clinical stage, in China, including 14 biologics and 2 small-molecule drug (including our VVN432 and an oral tablet candidate).

Our Advantages

As a dual-target inhibitor of JAK1 and TYK2, our VVN432 demonstrated, in our *in vitro* preclinical studies, potent inhibition of both JAK1 and TYK2 at kinase level and cellular level, with *in vitro* IC₅₀ value of 0.08nM for JAK1 and 0.55nM for TYK2, and cellular IC₅₀ value of 0.02 nM and 7.98 nM, respectively. In addition, VVN432 is designed to selectively inhibit specific inflammatory pathways while minimizing disruption of normal physiological functions, and therefore avoiding the typical adverse effects associated with corticosteroids. Furthermore, compared with biologics, the other mainstream treatment options of CRS, our VVN432, as a nasal spray, offers significantly greater convenience of administration.

Summary of Clinical Trials

We commenced a Phase I clinical trial of VVN432 in healthy adults in China in November 2025. We expect to complete such trial in the third quarter of 2026.

Ongoing Phase I Clinical Trial

- *Trial design.* This trial is a randomized, double-masked, placebo-controlled, dose-escalation study of VVN432 nasal spray. The study comprises two stages, a single-administration stage 1 and a multiple-administration stage 2. The objective of stage 1 is to evaluate the safety, tolerability, PK profile of VVN432 in healthy adults. The objective of stage 2 is to evaluate the safety, tolerability, PD and PK profile and preliminary efficacy of VVN432 in CRS patients.

We plan to enroll 24 healthy adults for stage 1, with 8 participants in each of the 0.5% VVN432 (one spray per nostril), 1.0% VVN432 (one spray per nostril) and 1.0% VVN432 (two sprays per nostril) dosing groups. Within each dosing group, participants are

BUSINESS

randomized 3:1 to receive VVN432 or placebo, respectively. Dose escalation to the 1.0% VVN432 (two sprays per nostril) dosing group would proceed after all participants at the 1.0% VVN432 (one spray per nostril) group have completed all treatment and safety of a dose level was confirmed.

We plan to enroll 36 CRS patients for stage 2, with 12 participants in each of the 0.5% VVN432 (one spray per nostril, BID), 1.0% VVN432 (one spray per nostril, BID) and 1.0% VVN432 (two sprays per nostril, BID) dosing groups. Within each dosing group, participants are randomized 5:1 to receive VVN432 or placebo, respectively, for 28 consecutive days.

- *Trial status.* As of the Latest Practicable Date, we had completed participant enrollment for stage 1 study and a total of 24 participants were enrolled. We plan to complete the subject enrollment for stage 2 by the second quarter of 2026.

Material Communications and Next Steps

We obtained an IND approval of VVN432 from the NMPA for the treatment of CRS in June 2025. As of the Latest Practicable Date, we were conducting a Phase I clinical trial in healthy adults in China. We plan to complete such trial in the third quarter of 2026. As of the Latest Practicable Date, we had not received any relevant regulatory agency’s concerns or objections to our clinical development plans. No material adverse changes had occurred since we obtained the IND approvals and up to the Latest Practicable Date.

WE MAY NOT BE ABLE TO ULTIMATELY DEVELOP AND MARKET VVN432 SUCCESSFULLY.

VVN1901

VVN1901 is a recombinant human nerve growth factor (rhNGF) eye drop for the treatment of neurotrophic keratitis (NK). NK is a rare, sight-threatening disease of the cornea caused by damage to the corneal nerves, leading to reduced or absent corneal sensation and impaired healing. This loss of sensitivity disrupts normal protective reflexes such as blinking and tear production, so even minor irritants can trigger persistent epithelial defects, corneal ulcers and, in severe cases, corneal melting and perforation. rhNGF is a laboratory-produced form of a naturally occurring protein that supports the growth, survival and function of neurons. It has emerged as a promising therapeutic modality for nerve regeneration and protection in ocular disease. rhNGF has demonstrated a generally favorable safety and tolerability profile in clinical studies.

We obtained an IND approval from the NMPA for VVN1901 for the treatment of moderate-to-severe NK in May 2024. We completed a Phase I clinical trial of VVN1901 in China in September 2024 and commenced a pivotal registration-enabling Phase II clinical trial in China in July 2025.

Mechanism of Action

VVN1901 is designed to replace human nerve growth factor (NGF), a natural “growth and repair” protein that is missing or reduced in people with NK. In a healthy eye, tiny nerves in the cornea help keep the surface of the eye moist, smooth and able to heal quickly after minor damage. In people with NK, these nerves are damaged and do not work properly, so the eye produces less of this repair protein and the cornea can develop wounds that do not heal, ulcers and, in severe cases, tissue breakdown. VVN1901 is an eye drop containing rhNGF, a laboratory-made version of this protein, intended to support the damaged nerves and help the cornea repair itself, with the aim of closing persistent defects on the eye surface and preventing the disease from getting worse. The following diagram illustrates the mechanism of action of VVN1901.

BUSINESS

Market Opportunity and Competition

In China, NK is recognized as a rare disease, with an estimated overall patient population of 359,200 in 2024, according to Frost & Sullivan. The disease often progresses quickly: survey data indicate that about half of patients are already at a moderate or severe stage when first diagnosed, and around 90% can worsen from mild stage 1 to severe stage 3 within six months, developing persistent surface defects or ulcers and facing a risk of perforation and vision loss.

NK is managed according to disease stage, with the overarching objective of protecting and restoring the integrity of the corneal surface while addressing the underlying loss of corneal sensation. Intensive lubrication with frequent preservative-free artificial tears, gels and ointments forms the foundation of therapy at every stage. In stage 1, treatment focuses on ocular surface support with lubrication to improve epithelial health. In stage 2, characterized by persistent epithelial defects, treatment typically escalates to include autologous serum eye drops, deproteinized calf-blood extract eye gel to promote epithelial healing, as well as antibiotic ointment to prevent secondary infection and low- to medium-potency corticosteroid eye drops to reduce inflammation and accelerate healing. In advanced stage 3, where corneal ulceration or perforation may occur, frequent use of autologous serum drops are recommended to control stromal inflammation and aid healing, scleral lens and lubricants are used to protect cornea and inhibit melting and growth-factor rich multilayer amniotic membrane are used for mechanical protection and to promote healing. Novel treatment options, such as nerve growth factor eye drops have also emerged to restore nerve function and accelerate healing.

As of the Latest Practicable Date, there was one innovative drug approved for the treatment of NK and seven active innovative drug candidates for the treatment of NK in the clinical stage, including our VVN1901, in China. The following table sets forth details of approved and active clinical-stage innovative drugs for the treatment of NK in China as of the Latest Practicable Date.

BUSINESS

Drug Name/Code	Target	Company	Stage	First Post Time
Cenegermin	NGFR	Dompe Pharma	Approved	2020/08
Ipidacitin	PIK3R3	Yicheng Kangtai Biotech	Phase II	2024/07
STSP-0902	NGFR	Staidson Biopharma	Phase II	2025/04
Recombinant human nerve growth factor	NGFR	Xintrum Pharma	Phase II	2025/04
SQ-22031	undisclosed	Sinqi Pharma	Phase II	2025/04
VVN1901	NGFR	our Company	Phase II	2025/05
Recombinant human nerve growth factor eye drops	NGFR	Kerun Biologic Pharma	Phase I	2023/03
HT006.2.2	NTRK1/NGFR	Hiteck Bio Pharma	Phase I	2024/01

Source: Frost & Sullivan report, CDE

Our Advantages

We believe our VVN1901 has the following advantages as compared to currently approved rhNGF:

- *Stability.* While currently approved rhNGF requires freezing at or below -20°C for long-term storage and can be stored at 2°C to 8°C for only up to two weeks, our VVN1901, adopting the advanced formulation and packaging technologies, demonstrates high stability at 2-8°C for extended periods and can maintain stability at room temperature for a minimum of 30 days, supporting convenient transportation, storage and daily use as well as improved patient adherence.
- *User-friendly.* While currently approved rhNGF requires special instillation device for administration, the blow-fill-seal (BFS) packaging of VVN1901 allows convenient administration and therefore improve patient adherence.
- *Promising accessibility.* Currently approved rhNGF costs over RMB150,000 per treatment course and is not currently marketed in China. Leveraging our integrated R&D and cost control measures, we aim to make VVN1901 accessible to NK patients in China, addressing the absence of marketed rhNGF therapies in China while offering a more affordable option.

Summary of Clinical Trials

We commenced a Phase I clinical trial of VVN1901 in healthy subjects in China in May 2024 and completed such trial in September 2024. We commenced a pivotal registration-enabling Phase II clinical trial of VVN1901 China in patients with moderate-to-severe NK in July 2025. We expect to complete such trial in 2028.

Ongoing Phase II Clinical Trial

- *Trial design.* This is an adaptive, multicenter, double-masked, randomized, vehicle-controlled study in patients with stage 2 (persistent epithelial defect) or stage 3 (corneal ulcer) NK. The study comprises two stages, a nine-week, dose-exploration stage 1 and a 52-week confirmatory stage 2. The objective of stage 1 is to assess the dose-dependent relationship of VVN1901 in treating moderate-to-severe NK, evaluate the safety, tolerability and immunogenicity of VVN1901 and to identify the optimal dose for further study. The objective of stage 2 is to assess the efficacy of VVN1901 in comparison with vehicle control at the selected dose level, further evaluating VVN1901’s safety, tolerability, immunogenicity, recurrence rate and long-term safety in the same patient population. The primary endpoint is the percentage of subjects with complete healing of the corneal lesion in the study eye at week 8. Secondary endpoints include healing and recurrence proportions, lesion size, corneal sensitivity, visual acuity, tear secretion and 0 mm lesion rates during treatment and follow-up.

We plan to enroll a total of 70 participants for stage 1, who will be randomized 2:2:2:1 to receive one drop of 10 µg/ml VVN1901, 20 µg/ml VVN1901, 40 µg/ml VVN1901 or vehicle control, respectively, in the study eye six times daily (Q2h) for eight weeks, followed by an one-week follow-up period. We plan to enroll 87 new participants for stage 2, who will be randomized 2:1 to receive one drop of VVN1901 or vehicle at the selected dose level in the study eye six times daily (Q2h) for eight weeks, followed by

BUSINESS

a 44-week follow-up period. In both stages, participants will attend on-treatment visits at weeks 1, 2, 4, 6 and 8 for efficacy and safety assessments. Stage 1 includes an additional visit at week 9, and stage 2 includes follow-up visits at weeks 12, 20, 28, 40 and 52.

- *Trial status.* As of the Latest Practicable Date, we had completed patient enrollment for stage 1 and a total of 70 patients were enrolled.

Phase I Clinical Trial

- *Trial design.* This trial was a single-center, randomized, double-masked, vehicle-controlled, dose-escalation Phase I clinical study to evaluate the safety, tolerability and PK profile of VVN1901 in healthy adults. The primary objective was to assess the safety and tolerability of 10 µg/mL, 20 µg/mL and 40 µg/mL VVN1901 eye drop following single and multiple administration in healthy adults. The secondary objectives were to characterize the PK profile, if sufficient systemic exposure was detected, and to assess immunogenicity.

The dose-escalation phase of this study included three dose groups: 10 µg/mL, 20 µg/mL and 40 µg/mL. We planned to enroll 30 healthy adults with 10 participants in each dose group. Within each dose group, participants were randomized in a ratio of 8:2 to receive VVN1901 or vehicle control, respectively. The trial comprised a single-dose phase on day 1, a QID dosing phase from day 2 to the morning of day 5 (a total of seven doses) and a six times daily (Q2h) dosing phase from day 6 to the morning of day 9 (a total of seven doses).

For each administration, each participant would receive one drop of VVN1901 or placebo (vehicle) in the right eye. All dosing was performed during an inpatient stay at the clinical research center, with discharge after assessments on day 10 and a follow-up visit on day 16. Dose escalation to the next group would proceed after all participants at a dose level have completed all treatment and safety of a dose level was confirmed.

- *Trial status.* The clinical trial was initiated in May 2024 and completed in September 2024. A total of 30 participants were enrolled.
- *Safety.* VVN1901 demonstrated a satisfactory safety and tolerability profile in this study. Among the 30 participants in the SS, 9 participants reported a total of 11 incidents of TEAEs, all of which were mild and non-treatment related or possibly non-treatment related.
- *PK.* Blood concentrations in all participants across the three dose groups were BQL after single and multiple administration.
- *Immunogenicity.* While an anti-drug antibody (ADA) positive participant in the 40 µg/mL group showed a higher ADA titre than those ADA positive participants in the 20 µg/mL group, the presence of a pre-existing, unchanged ADA signal in the vehicle control group suggests the possibility of physiological NGF antibodies. No SAE occurred in any ADA-positive participant. The safety results, together with BQL blood concentration, indicated no apparent increase in systemic safety risk related to ADA development.
- *Conclusion.* In this trial, VVN1901 demonstrated a satisfactory safety profile with BQL systemic exposure.

Material Communications and Next Steps

We obtained an IND approval of VVN1901 from the NMPA for the treatment of NK in May 2024. We commenced a Phase I clinical trial in healthy adults in China in May 2024 and completed such trial in September 2024. We conducted an end-of-Phase I consultation with the NMPA and submitted, among others, key results from the Phase I clinical trial and the Phase II clinical trial design. We received the NMPA's official response in March 2025, which raised no material questions and confirmed that we may commence the Phase II clinical trial as a registration-enabling pivotal trial. As of the Latest Practicable Date, we were conducting a Phase II clinical trial in patients with moderate-to-severe NK in China. We plan to complete such trial in 2028. As of the Latest Practicable Date, we had not received any relevant regulatory agency's concerns or objections to our clinical development plans. No material adverse changes had occurred since we obtained the IND approvals and up to the Latest Practicable Date.

BUSINESS

WE MAY NOT BE ABLE TO ULTIMATELY DEVELOP AND MARKET VVN1901 SUCCESSFULLY.

VVN481

VVN481 is a novel preclinical-stage JAK1/TYK2 inhibitor developed based on the same compound underlying our Core Product VVN461(HD). It is designed to treat non-infectious non-anterior uveitis with long-acting sustained release. Non-infectious non-anterior uveitis usually involves chronic inflammation of the uvea and adjacent retinal tissues that persists and often recurs. This form of uveitis typically presents as intermediate, posterior or panuveitis. People with this condition may experience redness, eye pain, sensitivity to light, blurred or cloudy vision and "floaters" in their vision. It is frequently associated with autoimmune diseases. If not adequately controlled, non-infectious non-anterior can lead to serious complications such as macular swelling, glaucoma, cataracts, retinal damage and permanent vision loss. Current treatment relies mainly on systemic or intravitreal corticosteroids and other anti-inflammatory or immune-suppressing medicines, which often require prolonged use and careful monitoring to balance disease control with treatment-related side effects.

Unlike traditional steroid therapies, VVN481 aims to control inflammation through a targeted mechanism that may offer a differentiated safety and efficacy profile over the long term. VVN481 is expected to be administered into the suprachoroidal space, a small area at the back of the eye close to the inflamed tissues, with long-acting sustained release. This route of administration is intended to deliver higher local drug levels directly to the uvea, where uveitis occurs, while limiting the amount of drug circulating through the rest of the body. We entered into a collaboration agreement with Everads Therapy Ltd. ("Everads") in November 2023 to develop VVN481 utilizing Everads' proprietary delivery technology for administration of therapy via the suprachoroidal space. See "—Our Collaboration and License Agreements—Collaboration with Everads on VVN481." See also "—Our Collaboration and License Agreements—Arrangements with E-nitiate" for the history of this drug candidate.

As of the Latest Practicable date, we were conducting preclinical toxicity and PK studies for VVN481. We plan to submit an IND application for VVN481 in the first half of 2027.

WE MAY NOT BE ABLE TO ULTIMATELY DEVELOP AND MARKET VVN481 SUCCESSFULLY.

VVN611

VVN611 is a novel dual-target product candidate being developed for the treatment of diabetic macular edema (DME), age-related macular degeneration (AMD) and retinal vein occlusion (RVO). DME, AMD and RVO are three distinct serious retinal diseases that can cause irreversible vision loss if not treated promptly. In DME, long-term diabetes damages small blood vessels in the retina, leading to fluid leakage and swelling in the macula, the area responsible for sharp central vision. AMD, particularly the "wet" form seen mainly in older adults, involves abnormal, leaky blood vessel growth under the macula and results in progressive loss of central vision. RVO arises when a retinal vein is blocked, causing hemorrhage, fluid leakage and macular swelling, often presenting as a sudden, painless loss or blurring of vision, usually in one eye. Despite different underlying causes, all three conditions commonly lead to macular edema and are currently treated mainly with intravitreal anti-vascular endothelial growth factor (anti-VEGF) injections, often requiring frequent dosing over many years.

While current anti-VEGF therapies are effective in stopping vascular permeability, resulting in rapid initial improvement or stabilization of vision, real world follow-up of anti-VEGF use has found that their efficacy decreases significantly over time. The decrease may be attributed to multiples reasons, including non-adherence to injection schedule due to cumbersome frequent injections, as well as the gradual fibrosis of macula. VVN611 is designed to address these two important issues. VVN611 is designed for slow release over six to nine months via intravitreal implant. With its dual-target mechanism of action, VVN611 is designed to stop vascular permeability by targeting VEGF receptor kinases (VEGFRi) and decreasing or stopping fibrosis. As of the Latest Practicable date, we were conducting PD and PK screening studies for VVN611.

BUSINESS

WE MAY NOT BE ABLE TO ULTIMATELY DEVELOP AND MARKET VVN611 SUCCESSFULLY.

VVN1888

VVN1888 is a combination drug with synergizing dual activity being developed for the treatment of presbyopia. Presbyopia is a very common age-related change in vision that usually becomes noticeable from around 40 years of age. People with presbyopia often find it harder to read small prints, require more light for close work and may experience eyestrain or headaches after prolonged near tasks. While presbyopia can be managed with glasses or contact lenses, such methods do not address the underlying loss of focusing ability. There is therefore a significant unmet need for pharmacological treatments that can improve near vision, reduce dependence on corrective lenses and offer patients more flexible, lifestyle-friendly options as they age.

In a preclinical *in vivo* study of VVN1888 in rabbits, we found that VVN1888 performed as well as current leading presbyopia drug in decreasing the size of pupil, but with more extended duration. As of the Latest Practicable date, we were developing and optimizing the formulation for VVN1888.

WE MAY NOT BE ABLE TO ULTIMATELY DEVELOP AND MARKET VVN1888 SUCCESSFULLY.

OUR COLLABORATION AND LICENSE ARRANGEMENTS

Arrangements with E-nitiate

On February 5, 2021, we entered into an intellectual property agreement (as supplemented on February 10, 2021 and January 29, 2024 and amended and reinstated on February 6, 2026, the “E-nitiate Agreement”) with E-nitiate, a biotech company focused on autoimmune diseases with a last known registered capital of RMB52.5 million, with respect to the transfer and license of certain intellectual property rights related to the compound underlying VVN461 and VVN432 (which now also underlies VVN481) (the “Relevant Compound”). Pursuant to the E-nitiate Agreement, we transferred the intellectual property rights we had developed and controlled as of February 5, 2021 that are necessary to develop, manufacture or commercialize the Relevant Compound or product candidates comprising the Relevant Compound (the “Relevant Candidates”) to E-nitiate, effective on and from February 5, 2021. Substantially concurrently, E-nitiate granted us an exclusive, perpetual and irrevocable license to develop, manufacture and commercialize the Relevant Compound in the ophthalmology field (effective on and from February 10, 2021) and rhinology field (effective on and from January 29, 2024) globally. Key terms of the E-nitiate Agreement are summarized as follows.

- *Scope of transfer.* Effective on and from February 5, 2021, we transferred all rights in the Relevant Compound along with any existing preclinical study materials and results of the Relevant Candidates as of February 5, 2021 to E-nitiate (the “Transfer”). After the Transfer, E-nitiate is the sole and exclusive owner of all rights in the Relevant Compound, as well as any assets solely developed by E-nitiate based on, or in relation to, the Relevant Compound after the Transfer.
- *Scope of license.* Effective on and from February 10, 2021, E-nitiate granted us an exclusive (even as to E-nitiate), fully paid-up, royalty-free, perpetual and irrevocable global license to develop, manufacture and commercialize the Relevant Compound in the ophthalmology field globally (the “Ophthalmology License”). Effective on and from January 29, 2024, E-nitiate further granted us an exclusive (even as to E-nitiate), license fee-bearing, royalty-free, perpetual and irrevocable global license to develop, manufacture and commercialize the Relevant Compound in the rhinology field globally (the “Rhinology License”, together with the Ophthalmology License, the “Licenses”). With respect to the Licenses, we also have the right to grant sublicense without prior notice or consent of E-nitiate provided that we shall notify E-nitiate within ten days after the grant of a sublicense. After granting the Licenses, E-nitiate has the exclusive global right to develop, manufacture and commercialize the Relevant Compound in all fields other than ophthalmology and rhinology.
- *Transfer fee and payment schedule.* In consideration of the Transfer, E-nitiate shall pay us a one-time, non-refundable and non-creditable fee of RMB8.5 million, which we received in March 2021. In addition, we shall pay E-nitiate (i) a one-time, non-refundable and non-creditable upfront payment of RMB0.5 million with regard

BUSINESS

to the Rhinology License and (ii) a one-time, non-refundable and non-creditable milestone payment of RMB0.5 million within 30 business days from obtaining the first (and only the first) NDA/BLA approval (or equivalent) for the Relevant Candidates in the ophthalmology or rhinology field. We made the upfront payment of RMB0.5 million in November 2024. For avoidance of doubt, there was no upfront payment for the Ophthalmology License.

- *Non-compete.* We, and any sublicensee, shall not, directly or indirectly, develop, manufacture or commercialize, or enter into any collaboration or license agreement with any third party in connection with, an oral dosage formulation of the Relevant Compound in ophthalmology and rhinology fields.
- *Research and development.* Each party has the sole right to develop the Relevant Compound in its respective field at its own costs and expenses, including conducting the relevant clinical trials.
- *Regulatory filings.* Each party has the sole right to conduct regulatory activities necessary for obtaining and maintaining regulatory approvals for the Relevant Candidates in its respective field at its own costs and expenses. Each party shall apply for regulatory approvals of the Relevant Candidates in its respective field in its own name at its sole discretion and own costs and expenses and be the regulatory approval holder. However, before submitting an NDA for the Relevant Candidates in China, each party shall notify the other party at least 30 days in advance.
- *Joint Steering Committee (JSC).* We agree to establish a JSC with E-nitiate to coordinate parties’ activities under the E-nitiate Agreement. Each party shall appoint two representatives to the JSC, each of which shall have sufficient seniority and relevant expertise. We shall have the sole discretion and right to make all final decisions regarding development, manufacture and commercialization of the Relevant Compound in the ophthalmology and rhinology field.
- *Commercialization.* Each party has the sole right to commercialize the Relevant Compound in its respective field at its own costs and expenses.
- *Intellectual Property.* Inventorship and discoveries, including improvements solely developed or conceived by or on behalf of a party in connection with the activities conducted under the E-nitiate Agreement, shall be exclusively owned by such party. If any inventions are developed or conceived jointly by or on behalf of both parties in connection with the activities conducted under the E-nitiate Agreement, such inventions shall be jointly owned by both parties and each party may independently exploit such inventions without the duty of accounting or seeking consent from the other party except otherwise restricted by the E-nitiate Agreement.
- *Confidentiality.* Except to the extent expressly authorized by the E-nitiate Agreement or otherwise agreed in writing by the parties, both parties are under strict confidentiality with respect to any information received or learned by the other party under the E-nitiate Agreement.
- *Term.* The E-nitiate Agreement has a perpetual term commencing from February 6, 2026 unless terminated in accordance with the terms of the E-nitiate Agreement. We may terminate the E-nitiate Agreement in its entirety with 60 days’ prior written notice of termination to E-nitiate. It may also be terminated by other triggering events, such as one party’s uncured material breach or insolvency, as stipulated in the E-nitiate Agreement.

Collaboration with Everads on VVN481

On November 1, 2023, we entered into a research collaboration agreement (as supplemented by a side letter on the same day, the “Everads Agreement”) with Everads Therapy Ltd. (“Everads”), an ophthalmology-focused biotech company based in Israel, which is an Independent Third Party, with proprietary delivery technology for administration of therapy via the suprachoroidal space, to collaborate and test the potential for treating certain ophthalmology disease via delivery of VVN481 into the suprachoroidal space using Everads’ technology in accordance with an agreed research plan (the “Research Plan”). Under the Research Plan, we are responsible for the operation and finance of *in vitro* studies of VVN481. The parties shall engage CROs for *in vivo* studies with oversight by Everads, with Everads and

BUSINESS

us sharing the costs at an agreed ratio. Everads shall also provide the delivery devices and trainings for the *in vivo* studies at its internal cost. Under the Research Plan, we shall also be responsible for the formulation development of VVN481 at our internal cost. The Everads Agreement has a term of six months after completion of the Research Plan.

Pursuant to the Everads Agreement, for intellectual properties developed in the Research Plan, intellectual properties that constitutes an improvement or modification to the the delivery devices shall be owned by Everads; intellectual properties that constitutes a new use or application of the devices in combination with VVN481 shall be jointly owned by the parties in equal undivided share; and intellectual properties that constitutes an improvement or modification to the VVN481 shall be owned by us. The parties shall jointly own all results arising from the performance of the Research Plan. Under the Everads Agreement, each party shall grant the other party a non-exclusive fully paid-up, royalty-free global license to any knowhow, technology, device, new chemical entity (NCE) needed for the purpose of conducting the Research Plan. We agree to treat the delivery devices transferred to us under the Everads agreement as strictly confidential and as the sole and property of Everads, and to use the delivery devices solely for the purpose of the Research Plan. Similarly, Everads also agrees to use materials of our VVN481 and other NCEs transferred to it only to conduct activities solely for the purposes of the Research Plan. Both parties are under strict confidentiality with respect to any information received or learned by the other party under the Everads Agreement.

Pursuant to the Everads Agreement, if both parties deem the test results worthy of continued development, then, within six months of the conclusion of the Research Plan, parties will enter into good faith negotiations to further develop VVN481 (the “Future Collaboration”). For the Future Collaboration, we will pay royalties on sales to Everads while retaining the sole commercial rights of VVN481 in the PRC. With respect to commercial rights outside the PRC, Everads and us shall share ownership of commercial rights outside the PRC.

RESEARCH AND DEVELOPMENT

We are a biotech company focused on ophthalmic therapies. We believe research and development is critical to our ability to grow into a biopharmaceutical company and remain competitive in the industry. We have conducted the research and development of all of our product candidates and are dedicated to continuing to expand our innovative product pipeline.

We conduct our R&D activities through an in-house team as well as engagement of external CROs, as is in line with industry practice. We have established three R&D platforms to support our drug discovery and development, namely our ophthalmic small-molecule drug discovery platform, advanced formulation development platform and translational research platform for innovative ophthalmic drug. We incurred research and development expenses of RMB128.3 million and RMB65.2 million in the year ended December 31, 2024 and the nine months ended September 30, 2025, respectively. The development of our Core Products incurred research and development expenses of RMB49.2 million and RMB35.1 million in the year ended December 31, 2024 and the nine months ended September 30, 2025, respectively, representing 34.3% and 46.6% of our total operating expenses in the respective periods. See “Financial Information—Description of Selected Components of Consolidated Statements of Profit or Loss and Other Comprehensive Income—Research and Development Expenses” for details.

In-House Research and Development Capabilities

In-House R&D Team

Our in-house R&D team consisted of 49 members as of September 30, 2025. Our R&D team is led by senior management members with a proven track record in drug R&D, including Dr. Shen Wang (our CEO, who is primarily responsible for drug discovery and early-stage development), Dr. Xia Erning (our CTO, who is primarily responsible for drug formulation development and drug product manufacturing) and Dr. Tsai Albert Jr. (our CMO, who is primarily responsible for clinical development), all of whom have approximately 30 years of extensive experience in their respective field of work. See “Directors and Senior Management” for further details on their past experience. As of September 30, 2025, over 50% of our R&D team members had a master’s degree or above in chemistry, biology/pharmacy, medicine or related field. All key R&D personnel involved in the research and development of our Core Products remained employed by us during the Track Record Period and as of the Latest Practicable Date.

BUSINESS

Scientific Advisory Board

Our in-house research and development team is supported by our Scientific Advisory Board (SAB). Each member of our SAB is an influential expert and thought leader in the ophthalmic pharmaceutical field, holding high level positions in prestigious hospital or university. Key members of our SAB include Dr. Quan Duan Nguyen (a professor of ophthalmology at the Stanford Byers Eye Institute focusing on the development of novel therapies and diagnostic technologies for retinal vascular and ocular inflammatory diseases), Dr. Gary D. Novack (a clinical professor of pharmacology and ophthalmology at the UC Davis School of Medicine with over 40 years of experience in pharmaceutical research and development) and Dr. David S. Boyer (one of the leading retinal clinical researchers for new treatments in macular degeneration and diabetic macular edema). We believe, we are able to further enhance our R&D capabilities by virtue of the valuable and unique expertise and domain-specific insight of our SAB members in various disciplines.

Our Technology Platforms

To support the development of our product candidates, our research and development team has established, managed and operated three integrated technology platforms, including our ophthalmic small-molecule drug discovery platform for precise molecule discovery, advanced formulation development platform for efficient delivery formulation and translational research platform for innovative ophthalmic drug.

Ophthalmology small-molecule drug discovery platform

Our ophthalmic small-molecule drug discovery platform is the core driver of our differentiated innovation, beginning from the early stage of molecule discovery. This platform is dedicated to addressing the therapeutic limitations associated with conventional single-target drugs. By recognizing the multi-target-driven mechanisms underlying ophthalmic diseases, it aims to deliver more accurate and effective treatment.

Discovered through this platform, our VVN461 demonstrated high activity, high selectivity, high permeability and broad coverage of inflammatory cytokine pathways. In addition, during the development of our VVN001, our discovery platform facilitated the high aqueous solubility and high stability of VVN001.

Advanced formulation development platform

Our advanced formulation development platform serves as the cornerstone for us to realize precise delivery and rapid onset action of our investigational drugs, effectively addressing critical challenges associated with ophthalmic drug delivery. For ophthalmic drugs, formulation development is key to a product's clinical value, commercialization potential and competitive barriers. The unique value of formulation development arises from the need for precise drug delivery and patient adherence due to the special physiological structure of the eye. Leveraging our formulation platform, we have developed the following advanced formulations for our drug candidates.

- *Flash transmucosal delivery system (VVN461)*. Utilizing cyclodextrin encapsulation technology, we improved the solubility of the VVN461 molecule by 100 to 200 times, allowing a higher drug load to be delivered within the small volume that can be retained on the ocular surface, thereby increasing the amount of active drug available for corneal penetration and therapeutic effect. Furthermore, by optimizing ionic strength, adjusting the ratio of osmotic pressure regulators and employing an advanced formulation inclusion process, we have improved the compatibility of the formulation with ocular surface mucins and enhanced bioavailability, resulting in outstanding drug concentration within anterior segment tissues in our preclinical *in vivo* studies.
- *Suprachoroidal space sustained-release delivery technology (VVN481)*. This long-acting injectable formulation is designed for sustained drug release. By controlling the particle size and particle dissolution rate, it manages the rate at which the drug is released. When combined with the patented suprachoroidal delivery device developed by Everads Therapy Ltd., this approach enables tangential suprachoroidal injection via blunt dissection and ensures that drug substance can be continuously released in the back of the eye for up to six months.

BUSINESS

- *Enhanced formulation and packaging processes (VVN1901).* By optimizing the formulation and utilizing BFS packaging, we have substantially improved the stability and convenience of VVN1901. VVN1901 demonstrates high stability at 2°C to 8°C for extended periods and can maintain stability at room temperature for a minimum of 30 days. Furthermore, the BFS packaging of VVN1901 allows for convenient administration. These enhanced formulation and packaging process support convenient transportation, storage and daily use and therefore better patient adherence.
- *Intravitreal sustained-release delivery technology (VVN611).* We have developed an intraocular retinal implant rod enabling long-acting sustained drug release for three to nine months. Through optimization of biodegradable polymer composition in vitreous fluid, combined with the use of a specific crystal form of a highly potent compound, as well as control over particle size and dissolution rate in its crystalline state, we have developed VVN611. Following intravitreal injection, this implant is designed to provide sustained release over approximately six months, maintaining therapeutic concentrations of the drug substance to inhibit vascular leakage at the fundus and retinal fibrosis, potentially offering improved therapeutic outcomes for retinal diseases compared with existing treatment options.

Translational research platform for innovative ophthalmic drug

Our translational research platform for innovative ophthalmic drugs is the critical contributor to establishing our robust research and development capabilities in the ophthalmology field, enabling us to secure a leading position in the industry. Developing ophthalmic disease models is highly challenging and requires more sophisticated operations due to the high technical and procedural requirements for achieving precise ocular modeling. Additionally, many CROs are unable to design and develop ophthalmic disease models that meet our requirements. Therefore, the expertise of our translational research team is crucial for the successful development of ophthalmic models. Our translational medicine team has developed various animal models leveraging the research animal resources of CROs. These models include glaucoma models, uveitis models, ocular surface nerve growth models and retinal vascular leakage models. Our scientists design each model and collaborate closely with CRO specialists in the laboratories to establish, test and refine them. We have intellectual property rights to all such developed models.

Drug Discovery and Preclinical Research

Our drug discovery team is dedicated to the discovery of novel product candidates indicated for ophthalmology diseases to address unmet clinical needs. Our senior management and R&D team members review and discuss feedback from KOLs, physicians and academic institutions to identify potential R&D opportunities. Through the communications, we identify clinical needs and develop or adjust our product candidates to address these needs, which in turn ensures the market acceptance and demand for our products later on. Leveraging our ophthalmology small-molecule drug discovery platform, we translate promising biological targets and mechanisms into patentable small-molecule candidate compounds with strong druggability potential. Through this process, we complete the key early-stage research and development steps that underpin subsequent preclinical and clinical development. Our internal research and development team takes a leading role in the design and management of the research projects and outsources certain daily execution tasks, such as pharmacologic, pharmacokinetic and toxicologic evaluation, to multiple CROs. See “—Collaboration with CROs” below.

Clinical Development

Our clinical team has solid capabilities with respect to clinical trial design, execution and regulatory expertise spanning all clinical phases of drug development. Our clinical team performs core functions such as designing clinical development strategies, plans and protocols, and executing clinical trials. We formulate our clinical trials in accordance with current standard of care or recommended modality according to national and international guidelines. We strategically design the clinical trials of our product candidates, critically select the registration pathways and diligently conduct our clinical trials to ensure speed of execution, optimal clinical efficacy and data quality. We also maintain constructive dialogs with regulatory authorities to accelerate the approval process of our product candidates. Our clinical

BUSINESS

team is comprised of personnel with extensive research expertise and rich practical experience. Our clinical team also cooperates with research institutions, such as well-known hospitals and CROs, and experienced experts (as leading PIs) for our clinical trials. See “—Collaboration with CROs.”

Collaboration with CROs

In line with industry practice, we engage reputable CROs to support our preclinical and clinical studies from time to time. We proactively seek well-known CROs with good reputation in the industry and evaluate self-recommendations from CROs offering services to us. When selecting CROs, we consider a number of factors, including their technical expertise, their past experience in preclinical and clinical studies, their reputation and influence in the industry, their qualifications and credentials, professional experience of their employees, their ability to collaborate effectively with us and pricing. When determining service fees for CROs, we discuss with the CROs and set the pricing based on various factors, including the academic and professional qualifications of their team, their experience in the industry and market fee levels. The work scope of CROs in the development of our product candidates may vary, subject to our overall management and instructions. We engaged 36 and 36 CROs in the year ended December 31, 2024 and the nine months ended September 30, 2025, respectively, except for Viva Biotech, all of which were Independent Third Parties to the best of our knowledge.

With respect to preclinical studies, CROs typically provide us with services related to preclinical PK, PD and toxicity evaluations, both *in vitro* and *in vivo*, of our product candidates in accordance with our study design and under our supervision. With respect to clinical studies, CROs typically provide us with a comprehensive suite of services, or occasionally part of the services, required in complex clinical trials in accordance with our trial design and under our supervision. CROs generally assist us in the implementation and management of clinical trials, including day-to-day site management, trial preparation, source data verification, clinical safety management, data management and report preparation.

After we select a CRO to support our clinical trial, we enter into service agreements with the CRO, which sets out, among other things, the purpose and content of the clinical trial, responsibilities of each party, research procedures and the payment schedule. We also enter into framework agreements with certain CROs, which typically specify the work scope and service fees. We have set in place various procedures regarding the management and monitoring of the performance by CROs. Our clinical development department is responsible for managing the overall clinical trial process and overseeing CROs’ work. We hold regular progress meetings with CROs and provide specific directions to ensure the quality and efficiency of the trial execution. We conduct regular and *ad hoc* on-site audits of CROs, including interviewing their employees, and reviewing documentations and records, such as relevant data and reports. We would keep formal records of such audits and follow up regarding issues discovered in the process. For clinical CROs, we would also refer to the NMPA compliance record of their previous clinical trials. Our CROs are also required to fully cooperate with our monitoring and inspection activities and rectify any issue identified during such inspections. If the CROs fail to conduct the studies in compliance with the relevant laws and regulations, we may be subject to liability. See “Risk Factors—Risks Relating to the Development of Our Product Candidates—We rely on third parties to conduct our preclinical studies and clinical trials. If these third parties do not successfully carry out their contractual duties or meet expected deadlines, we may not be able to obtain regulatory approval for or commercialize our product candidates and our business could be substantially harmed.” Under the agreements, we own all intellectual property and trial results and the CROs must maintain strict confidentiality with respect to the information they acquire during clinical trials. There was no material non-compliance incidence during our cooperation with CROs and we did not have any material disputes or disagreements with the engaged CROs during the Track Record Period and up to the Latest Practicable Date.

REGULATORY AFFAIRS

Our regulatory affairs team is responsible for the regulatory approval process of our product candidates from clinical research to commercialization stage in both China and international markets. Its responsibilities include assembling application dossiers for IND applications, addressing inquiries from relevant regulatory authorities and monitoring ongoing R&D projects to ensure compliance with relevant laws and regulations. The team members are familiar with regulatory processes of relevant governmental agencies, such as the NMPA and

BUSINESS

FDA. As of the Latest Practicable Date, we had successfully obtained seven IND approvals (five from the NMPA and two from the FDA) for our product candidates. We believe our team's extensive experience in navigating the regulatory process will be critical for our commercial success.

MANUFACTURING

During the Track Record Period and up to the Latest Practicable Date, we engaged qualified CDMOs to manufacture product candidates for our preclinical and clinical supplies. We select CDMOs based on several criteria, including manufacturing capacity and qualifications, technical expertise, reputation, geographic proximity, track record, product quality, production cost, compliance with applicable regulations and guidelines. We enter into service agreements with CDMO, which sets out, among other things, the specifics of the manufacturing services to be provided, the applicable procedural and quality standards, responsibilities of each party and the payment schedule. We have established, and will continue to implement, robust procedures to ensure that the production qualifications, facilities and processes of our CDMOs comply with all relevant regulatory requirements, as well as our internal policies and quality standards. We intend to continue to collaborate with contract manufacturing organizations for the future commercial manufacturing of our Core Products, VVN001 and VVN461(HD), following regulatory approval. In addition, we may also consider establishing in-house manufacturing capabilities in the future.

Quality Management

Our quality assurance team is responsible for maintaining our quality management system, covering our entire R&D process, ensuring compliance with good manufacturing practice (GMP), good clinical practice (GCP) and good distribution practice (GDP) requirements, and safeguarding product quality and patient safety.

We implement a rigorous supplier management program, which includes thorough qualification of CDMOs via regular on-site and documentary audits, quality system assessments and the maintenance of an approved supplier list. With each CDMO, we enter into quality agreements that clearly define responsibilities for manufacturing, quality control, batch release, deviation management, change control and complaint handling. Our designated quality personnel retain final authority for reviewing batch production records, analytical reports and supporting documentation, and make independent batch release decisions to ensure full adherence to registered specifications and internal protocols. To further strengthen compliance and traceability, we have implemented comprehensive standard operating procedures spanning the entire CDMO partnership lifecycle, ensuring all quality activities are systematically standardized, thoroughly documented and readily auditable, supporting both regulatory compliance and sustained product quality throughout the product lifecycle.

COMMERCIALIZATION

We are actively formulating our commercialization plans in anticipation of multiple potential product launches over the next few years, including our Core Products, VVN001 and VVN461(HD). Drawing on our management team's deep knowledge and extensive experience in biopharmaceutical industry, particularly in ophthalmology, we intend to tailor commercialization strategies for each late-stage product candidate according to its market positioning. In developing these strategies, we will consider key factors such as pricing, dose regimen, patient economic, social and demographic characteristics, market access and reimbursement policies. As of the Latest Practicable Date, we did not have any approved drug products and therefore had not formulated any specific pricing strategy for our product candidates.

Taking into account our resource allocation and cost efficiency, as well as speed and access to market, we have adopted a practical commercialization model. Our primary commercialization approach will center on cooperation with established pharmaceutical companies, supported by a specialized in-house team with strong medical and scientific background. We plan to establish a commercialization team with strong medical and/or business development expertise as our product candidates approach commercialization. See "Future Plans and Use of [REDACTED]."

INTELLECTUAL PROPERTY

As a biotech company focused on ophthalmic therapies, our intellectual property is critical to our innovation. Our success depends, in part, on our ability to obtain and maintain patents and other intellectual property and proprietary protections for commercially important technologies, inventions and knowhow related to our business, defend and enforce our patents,

BUSINESS

preserve the confidentiality of our trade secrets and operate without infringing, misappropriating or otherwise violating the valid and enforceable intellectual property rights of third parties. We actively seek patent protection for our drug product candidates in China, the United States and other major jurisdictions and file additional patent applications, when appropriate, to cover certain active compounds, formulations, manufacturing process and drug delivery systems. We have developed a significant portfolio of intellectual property rights to protect our technologies and products. As of the Latest Practicable Date, we had 5 patents in China and 11 patents overseas. As of the same date, we had 15 patent applications in China and 37 patent applications overseas. Except for a patent of compound underlying VVN461, VVN432 and VVN481, which is licensed by E-nitiate to us, all patents and patent applications of our Core Products as of the Latest Practicable Date were self-developed and self-owned. See “—Our Collaboration and License Agreements—Arrangements with E-nitiate” for details.

The table below lists the material patents and patent applications of our Core Products, VVN461(HD) and VVN001, as of the Latest Practicable Date.

Core Product	Patent/ Application	Patent/ Application Number	Type of Patent	Jurisdiction	Status	Application Date	Expiration Date
VVN461 . . .	a cyano-substituted cyclic hydrazine derivative and its applications (一種氰基取代的環肼衍生物及其應用) ⁽¹⁾	ZL201910872780.1	Invention	China	Granted	September 16, 2019	September 15, 2039
		US12,478,620B2	Invention	United States	Granted	June 11, 2020	June 10, 2040
		20864315.5	Invention	Europe	Pending	June 11, 2020	N/A
		EA045871B1	Invention	Euroasia	Granted	June 11, 2020	June 10, 2040
		JP7620333B1	Invention	Japan	Granted	June 11, 2020	June 10, 2040
VVN461 . . .	ophthalmic composition for treating non-infectious inflammatory diseases (一種用於治療非感染性炎症疾病的眼科組合物)	TWI749644B	Invention	Taiwan	Granted	June 11, 2020	June 10, 2040
		202310484101.X	Invention	China	Pending	April 28, 2023	N/A
		18/693,334	Invention	United States	Pending	May 25, 2023	N/A
		23848463.8	Invention	Europe	Pending	May 25, 2023	N/A
		2024-508982	Invention	Japan	Pending	May 25, 2023	N/A
		10-2024-7024066	Invention	Korea	Pending	May 25, 2023	N/A
		3,231,266	Invention	Canada	Pending	May 25, 2023	N/A
		2023316921	Invention	Australia	Pending	May 25, 2023	N/A
		11202400923R	Invention	Singapore	Pending	May 25, 2023	N/A
		42024101316.8	Invention	Hong Kong	Pending	December 24, 2024	N/A
VVN461 . . .	JAK inhibitors for treating inflammatory eye conditions	310946	Invention	Israel	Pending	May 25, 2023	N/A
		PCT/CN2025/128136	Invention	International (WIPO)	Pending	October 16, 2025	N/A
VVN001 . . .	phosphorus-containing compound and preparation and use thereof (一種含磷化合物及其製備和應用)	ZL201810291023.0	Invention	China	Granted	April 3, 2018	April 2, 2038
		US11,325,929B2	Invention	United States	Granted	May 21, 2018	May 20, 2038
		EP3647315	Invention	Europe	Granted	May 21, 2018	May 20, 2038
		KR10-2208639B1	Invention	Korea	Granted	May 21, 2018	May 20, 2038
		JP6949967B2	Invention	Japan	Granted	May 21, 2018	May 20, 2038
		HK1261734A1	Invention	Hong Kong	Granted	April 3, 2018	April 2, 2038
		AU2018291666B2	Invention	Australia	Granted	May 21, 2018	May 20, 2038
		CA3092885C	Invention	Canada	Granted	May 21, 2018	May 20, 2038
VVN001 . . .	an immune cell migration inhibitor (一種免疫細胞遷徙抑制劑)	ZL201711050899.8	Invention	China	Granted	October 31, 2017	October 30, 2037
VVN001 . . .	a compound containing a five-membered ring and its preparation and applications (一種含五元環的化合物及其製備和應用)	ZL201810455868.9	Invention	China	Granted	May 14, 2018	May 13, 2038
VVN001 . . .	a preparation method for an LFA-1 inhibitor (一種LFA-1抑制劑的製備方法)	202210596940.6	Invention	China	Pending	May 30, 2022	N/A
		PCT/CN2024/074488	Invention	International (WIPO)	Pending	January 29, 2024	N/A

BUSINESS

Core Product	Patent/ Application	Patent/ Application Number	Type of Patent	Jurisdiction	Status	Application Date	Expiration Date
VVN001 . . . a VVN001-containing ophthalmic composition (一種含 VVN001 的眼科組合物)		202310476403.2	Invention	China	Pending	April 27, 2023	N/A
		18/718,308	Invention	United States	Pending	May 25, 2023	N/A

Notes:

- (1) Licensed to our Company by E-nitiate. See “—Our Collaboration and License Agreements—Arrangements with E-nitiate.”
- (2) Inventors of the listed registered patents related to VVN461 include Dr. Shen, Dr. Xia Erning and Ms. Han Qiao, and certain supporting R&D staff. Inventors of the listed registered patents related to VVN001 include Dr. Shen, Dr. Xia Erning, Dr. Ding Yue and Ms. Han Qiao as well as certain supporting R&D staff and technicians from CROs we engaged in the development of VVN001. According to Frost & Sullivan, it is in line with industry practice to include technicians from CROs in the patent inventors.

As of the Latest Practicable Date, we had registered two trademarks and one domain name in China. See “Appendix VI—Statutory and General Information” to this document for further information.

During the Track Record Period and up to the Latest Practicable Date, we had not been involved in any material proceeding in respect of, and we had not received notice of any material claim of infringement of, any intellectual property rights that may be threatened or pending, in which we may be a claimant or a respondent that may have a material adverse impact on us. Based on the freedom-to-operate (FTO) analysis with respect to our Core Products, we were not aware of any issued patents that may affect our rights to conduct research and development or commercialization of our Core Products in China and the United States as of the Latest Practicable Date.

SUPPLIERS

During the Track Record Period, our suppliers primarily consisted of (i) CROs for preclinical and clinical research, (ii) CDMOs for manufacturing of product candidates used in our research, (iii) SMOs for clinical trials and (iv) suppliers of laboratory consumables, machinery and equipment.

The factors that may affect our selection of suppliers mainly include scale and capabilities, technical expertise, qualifications and credentials, project managers’ experience, market reputation, pricing competitiveness and their ability to collaborate effectively with us. We conduct a formal evaluation process when selecting suppliers and usually select those who have demonstrated appropriate expertise and reliability. In addition to vetting new suppliers, we also conduct regular evaluations of existing suppliers and require suppliers to promptly address any issues discovered during such evaluations. See “—Research and Development—Collaboration with CROs” and “—Manufacturing” for details on our relationships with CROs and CDMOs. We maintain relationships with a diversified pool of qualified CRO and CDMOs and do not rely on any single such service provider.

During the Track Record Period, we did not encounter any material dispute with our suppliers or any material breach of our purchase agreements, nor did we experience any material shortage, delay or price fluctuation in the supply of our raw materials. For risks related to supply of our raw materials, see “Risk Factors—Risks Relating to the Manufacturing and Commercialization of Our Product Candidates—Scarcity of available raw materials or increases in our raw material costs may negatively impact our business, financial condition and results of operations.”

BUSINESS

In the year ended December 31, 2024 and the nine months ended September 30, 2025, our purchases from our five largest suppliers were RMB54.8 million and RMB26.1 million, respectively, accounting for approximately 72.7% and 77.8%, respectively, of our total purchases for the respective periods. In the same periods, purchases from our largest supplier were RMB17.9 million and RMB13.4 million, respectively, accounting for approximately 23.7% and 39.8%, respectively, of our total purchases for the respective periods.

The following tables set forth details of our five largest suppliers during the Track Record Period.

Supplier	Products/ service purchased	Purchase Amount (RMB'000)	% of Total Purchase	Commencement of Business Relationship	Payment Terms
Nine months ended September 30, 2025					
A ⁽¹⁾	CRO services	13,356	39.8	2024	15 days
B ⁽²⁾	CRO services	9,044	27.0	2023	22 days
C ⁽³⁾	CDMO and SMO services	1,765	5.3	2016	15 or 30 days
D ⁽⁴⁾	CDMO services	1,028	3.1	2022	20 days
E ⁽⁵⁾	CDMO services	906	2.7	2023	30 days
Total		26,100	77.8		
Year ended December 31, 2024					
F ⁽⁶⁾	Preclinical services	17,877	23.7	2022	30 days
A	CRO services	12,076	16.0	2024	15 days
B	CRO services	11,336	15.0	2023	22 days
G ⁽⁷⁾	CRO services	7,939	10.5	2019	30 days
C	CDMO, SMO and CRO services	5,597	7.4	2016	15 or 30 days
Total		54,824	72.7		

Notes:

- (1) Supplier A is a CRO based in Guangzhou, Guangdong, with a last known registered capital of RMB385.6 million. Supplier A is listed on the Shenzhen Stock Exchange.
- (2) Supplier B is a CRO based in Beijing, with a last known registered capital of RMB72.6 million.
- (3) Supplier C is a CRO/CDMO company based in Wuxi, Jiangsu, with a last known registered capital of RMB2,933.3 million. Supplier C is listed on the Hong Kong Stock Exchange and Shanghai Stock Exchange.
- (4) Supplier D is a company focused on R&D and manufacturing of drugs for the treatment of respiratory and ophthalmology diseases. Supplier D is based in Suzhou, Jiangsu, with a last known registered capital of RMB145.8 million.
- (5) Supplier E is a pharmaceutical company based in Taizhou, Zhejiang, with a last known registered capital of RMB311.0 million.
- (6) Supplier F is a CDMO/CMO company based in Shanghai, with a last known registered capital of RMB210.0 million.
- (7) Supplier G is a specialized ophthalmology CRO based in North Carolina, the United States.

None of our five largest suppliers was our customers during the Track Record Period. To the best of our knowledge, all of our five largest suppliers during each year/period of the Track Record Period are Independent Third Parties. As of the Latest Practicable Date, to the best of our knowledge, none of our Directors, their close associates or any Shareholders which, to the knowledge of our Directors, owned more than 5% of the issued share capital of our Company as of the Latest Practicable Date, had any interest in any of our five largest suppliers during the Track Record Period.

COMPETITION

The ophthalmic pharmaceutical market is highly competitive and is characterized by extensive research efforts. We believe our integrated technology platforms, comprehensive and differentiated product pipeline, product candidates with first-in-class potential, globalized research and development and ecosystem collaboration provide us with strong competitive advantages. We face potential competition from many different entities, including

BUSINESS

pharmaceutical and biopharmaceutical companies, academic institutions and public and private research institutions. Our Core Products and other product candidates face competition from approved and clinical-stage product candidates that focus on similar indications and target similar patient population, and these competing products may have strengths and advantages when compared to our product candidates. For competitive landscape of our product candidates, see “—Our Product Candidates” and “Industry Overview” for details.

Many of the companies we are competing against or against which we may compete in the future have significantly greater financial resources and expertise in research and development, manufacturing, preclinical testing, conducting clinical trials, obtaining regulatory approvals and marketing approved drugs than we do. Mergers and acquisitions in the pharmaceutical and biopharmaceutical industries may result in even more resources being concentrated among a smaller number of our competitors. We also face competition from other small and early-stage companies, particularly their collaborative arrangements with large and established companies. These competitors also compete with us in recruiting and retaining qualified scientific and management personnel and establishing clinical trial sites and patient registration for clinical trials, as well as in acquiring technologies or products complementary to, or necessary for, our research and development.

Our commercial opportunity could be reduced or eliminated if our competitors develop and commercialize drugs that are safer or more effective, have fewer or less severe side effects, are more convenient or are less expensive than any drugs that we may develop. Our competitors also may obtain regulatory approval for their drugs earlier than we obtain approval for ours, which could result in our competitors establishing a strong market position before we or our collaborators are able to enter the market. See “Risk Factors—Risks Relating to the Development of Our Product Candidates—Our product candidates will be subject to intense competition after commercialization and may fail to compete effectively against competitors.”

EMPLOYEES

As of September 30, 2025, we had 63 employees, all of whom were based in the PRC. The following table sets forth the details of our employees by function as of September 30, 2025.

Function	Number of Employees	Percentage
Research and development.	49	77.8%
Management and administrative.	14	22.2%
Total	63	100.0%

We recruit our employees primarily through recruiting websites, third-party recruiters and internal referrals. In compliance with the applicable labor laws, we enter into individual employment contracts with our employees, covering matters such as wages, employee benefits, workplace safety and grounds for termination. Our standard employment contract also contains a confidentiality clause and an assignment clause, under which we own all the rights to all inventions, technologies, know-how and trade secrets derived during the course of our employees’ work. We also enter into standard non-compete agreements with all employees.

To maintain a stable workforce and retain key personnel in our Company, we offer our employee competitive remuneration packages. Our employees’ remuneration comprises salary and bonus, which is generally based on their qualifications, position and performance. We offer remuneration packages based on individuals’ qualifications and experiences and generally match the market rate for salary to stay competitive in the labor market. We also take into consideration the long-term growth and advancement of our employees and offer opportunities for both job promotion and technical development. We conduct new employee training, as well as professional training for all employees in accordance with our internal procedures. Additionally, we established an employee incentive scheme to better retain and motivate our employees, with eligible participants primarily comprising core management members and key technical/business personnel of our Group. None of our employees are currently represented by labor unions. During the Track Record Period and up to the Latest Practicable Date, we did not experience any strikes or labor disputes which had a material effect on our business.

BUSINESS

INSURANCE

We maintain insurance policies that are required under PRC laws and regulations as well as based on our assessment of our operational needs and industry practice. In line with industry practice in China, we maintain different types of insurance policies, such as clinical trials liability insurance. Our Directors consider that our existing insurance coverage is generally in line with the industry practice in China. See “Risk Factors—Our insurance coverage may not sufficiently cover the risks related to our business operations.”

ENVIRONMENTAL, SOCIAL AND GOVERNANCE

We are subject to various social, health, safety and environmental laws and regulations and our operations are regularly inspected by local government authorities. We believe we have adequate policies ensuring compliance with all social, health, safety and environmental protection regulations. Particularly, we believe our continued growth rests on integrating social values into our business. We intend to create a lasting positive environmental, social and governance (“ESG”) impact on our customers, suppliers and the broader community whom our operation may impact. We acknowledge our responsibilities on environmental protection and social responsibilities and are aware of the climate-related issues that may have impact on our business.

Our ESG Governance Framework

We are committed to continuously improving our ESG management system to establish a solid foundation for sustainable development. We have established a comprehensive risk management and internal control framework designed to address major ESG-related risks and compliance requirements identified in our operations. To effectively manage our ESG-related matters and continuously improve ESG performance, we have established a top-down ESG management structure.

- *Board of Directors.* As the highest decision-making body for our ESG matters, the Board assumes ultimate responsibility for ESG management strategy, risk management, target setting and progress monitoring, as well as ESG performance.
- *Audit Committee.* Our Audit Committee coordinates and manages ESG work, including our ESG strategy and major ESG issues, regularly monitors and reviews ESG target and ESG performance, and maintains communication and cooperation with various stakeholders on ESG issues.
- *ESG Working Group.* We have established an ESG working group comprised of officers from various functional departments and subsidiaries, responsible for identifying and managing ESG risks in our daily operations, executing various ESG initiatives and implementing our ESG strategies, policies and targets.

Our Directors possess knowledge and skills covering industry experience, finance, risk management and corporate governance, and are fully capable of identifying and assessing material issues. Taking into account the characteristics of our industry and business, applicable regulatory requirements and the expectations of stakeholders, we identify and select our material ESG issues and use these as the basis for our ESG risk management. To ensure ongoing effectiveness of ESG risk management, we implement continuous monitoring measures including regular ESG training for the Board on topics such as climate change, annual third-party environmental testing and reporting for emissions, periodic quality audits of CMO facilities and raw material suppliers led by our quality department and regular workplace hazard identification and risk assessments conducted by our operations management department.

Environmental Matters

We are committed to building a green, low-carbon sustainable development model and putting green operation concepts into practice. We strictly comply with national and local environmental protection laws and regulations, continuously optimize the management of emissions and waste, and promote resource recycling and energy efficiency improvement. We continuously promote the development of corporate environmental management capabilities to fulfill our corporate environmental responsibilities and to contribute to an ecologically friendly society. The following table sets forth our resource use and emission-related indicators during the Track Record Period.

BUSINESS

	Year ended December 31,	Nine months ended September 30,
	2024	2025
Resource consumption		
Purchased electricity (MWh)	452	364
Water consumption (tons)	1,179	966
Emission		
Hazardous solid waste produced (tons)	7	4
Greenhouse gas emissions (tons of CO ₂ equivalent)		
– Scope 1 (direct emissions)	–	–
– Scope 2 (indirect emissions)	242	195
– Scope 3 (indirect emissions)	1,418	631

Resource Consumption

Our primary resource consumption includes electricity purchased from the grid and water. Purchased electricity constitutes the principal source of our carbon emissions. Accordingly, we are committed to enhancing energy efficiency to reduce our carbon emissions. As part of our broader efforts to mitigate overall greenhouse gas emissions, we have integrated the principle of resource conservation into our corporate culture and into day-to-day operations related office activities, thereby enabling us to monitor and manage resource consumption effectively.

We target to reduce the intensity of energy consumption by R&D expenditure by 15% by 2027 as compared to 2025. To achieve this target, we have formulated a series of measures. We plan to gradually shift to energy-efficient air conditioning units. For server rooms and equipment rooms requiring constant temperature and humidity environments, we plan to install split units to reduce energy consumption from long-term operation of high-power integrated air conditioning units. We regularly clean the condensers and evaporators of existing air conditioning units to improve their operating efficiency and reduce their energy consumption. We turn off air conditioning in unoccupied areas. For temporarily used spaces such as meeting rooms and reception areas, we turn on the air conditioning 15 to 30 minutes in advance and turn off the air conditioning immediately after use. We also prioritize natural ventilation when outdoor temperature is no more than 28°C to further reduce use of air conditioning. In addition, we regularly inspect water and electricity equipment, prioritize the selection of high-efficiency energy-saving equipment and advocate the use of natural lighting.

We adhere to the concept of water conservation in daily operations and implement standardized water management methods. We target to reduce the intensity of water consumption by R&D expenditure by 5% by 2027 as compared to 2025. To achieve this target, we have formulated a series of measures. We conduct water conservation awareness and education activities to encourage employees to adopt water-saving practices as part of their routine office behavior. In terms of water recycling, we collect high-quality miscellaneous drainage water, which can be used after simple treatment for cleaning floor and windows, irrigating plants. In addition, we adopt sensor-activated faucets and post water conservation signs at water usage points. We regularly inspect water pipes, faucets and washrooms in offices to promptly replace aging components and prevent hidden water dripping.

Emissions

Our greenhouse gas emissions primarily consist of Scope 2 emissions. Scope 1 direct emissions include the direct greenhouse gas emissions from activities under our operational control. We do not engage in Scope 1 greenhouse gas emission because we do not carry out any production activities and our business operations do not involve direct energy consumption. Scope 2 energy indirect emissions primarily include the greenhouse gas emissions from our usage of purchased electricity. Other indirect emissions that occur outside of our direct operational control but are related to our value chain activities are categorized as Scope 3 indirect emissions. For Scope 3 greenhouse gas emissions, we have compiled and calculated the emission data corresponding to external consulting services and raw material and packaging material procurements under Category 1 (purchased goods and services) of the Scope 3 emission. Going forward, we will progressively improve the data collection and calculation for other categories of Scope 3 emissions, and enhance the completeness and transparency of our Scope 3 emissions disclosure, so that our data collection work aligns with industry practices and emerging reporting standards.

BUSINESS

With the expansion of our business and anticipated commercialization of our product candidates, we endeavor to curb the increase in our emissions and aim to keep them relatively stable. We will continue to adopt a wide range of environment conservation measures to limit resource consumption and emissions. Through measures to reduce energy consumption and enhance energy efficiency, we target to reduce our Scope 1 and Scope 2 greenhouse gas emissions intensity by R&D expenditure by 5% by 2027 as compared to 2025.

Waste Management

We have implemented a series of targeted measures to manage waste, wastewater and exhaust gases. We also engage qualified third-party institutions to test our emissions and ensure that our emissions meet discharge standards, and our waste is disposed of in compliance with relevant regulations. We target to ensure 100% compliant discharge of exhaust gases and wastewater, as well as 100% compliant disposal of solid waste across all company facilities, including laboratories and offices. Furthermore, we are committed to continuously reducing the intensity of hazardous waste by R&D expenditure year by year.

- *General Solid Waste.* We classify and recycle general solid waste. We have established a standard management process of ‘collection, storage, transportation and disposal’, and maintain dedicated and detailed record, ensuring proper management and disposal of waste.
- *Hazardous Waste.* Our hazardous waste mainly includes laboratory waste, laboratory waste liquids, spent activated carbon and waste reagent packaging from our R&D activities. We collect and classify them on-site and transport them to dedicated hazardous waste storage facilities. We then transfer such hazard waste to qualified third parties for harmless disposal. We have established a systematic onboard training management process to provide knowledge and skills training and assessment on hazardous waste collection and transfer to relevant employees, reducing risks in the hazardous waste disposal process.
- *Wastewater.* We have implemented classified and tiered treatment process for production wastewater and domestic sewage. Production wastewater is pre-treated at our facilities and discharged into the municipal sewage network after meeting all discharge standards. Domestic sewage is treated through the properties’ sewage treatment system. To ensure continuous compliance, we have established a monitoring system to regularly monitor wastewater discharge outlets and inspect and maintain treatment facilities to ensure stable operation of treatment facilities and compliant discharge of wastewater.
- *Exhaust Gas.* We reduce the escape of volatile organic compounds through scientific management of chemical use processes and ensure the continuous and stable operation of pollution prevention facilities by regularly replacing activated carbon and other adsorbents. We also maintain facility maintenance record with clearly designated responsible persons. We have formulated regular monitoring plans and engage third-party institutions to monitor key indicators at discharge outlets to ensure that exhaust gas meet emission requirements.

During the Track Record Period and up to the Latest Practicable Date, we complied with the relevant environmental laws and regulations in all material aspects. As of the Latest Practicable Date, given our business nature, we believe that our assets or business activities are not subject to material climate-related transition risks or physical risks.

Supply Chain Management

Our quality department, in collaboration with relevant business departments, conduct annual audits of raw material suppliers and CDMOs. The audit covers product quality, non-conforming product handling, production conditions, service quality, ESG risks (including environmental compliance, labor rights and business ethics compliance) and implementation of audit recommendations. Prior to manufacturing of clinical trial samples, we conduct on-site inspections of CDMOs and execute quality agreements specifying requirements and responsibilities for quality matters. During the service term, we conduct on-site supervision and review quality-related documents and records in accordance with quality agreement

BUSINESS

requirements, ensuring CDMOs properly handle, use, store, treat and dispose of hazardous materials and waste in compliance with GMP requirements and our quality management standards as well as their compliance with environmental and health requirements.

Data Privacy

To ensure data privacy and security, we have established an information security and privacy protection mechanism covering account access management and email security protection, with granular permission settings for each employee to ensure data access minimization and controllability. We deployed email gateway systems to comprehensively prevent sensitive information leakage and network threats, providing reliable security safeguards for daily operations and business data.

Occupational Health and Work Safety

We strive to provide a safe working environment that guards the health and safety of our employees and communities. We are subject to occupational health and safety laws and regulations in the PRC. We have established an occupational health and safety monitoring mechanism, with our operations management department responsible for organizing workplace hazard identification and risk assessment work and formulating response measures. In addition, we have improved hazardous chemical management measures at the operational safety level, achieving closed-loop standardized control of classification, labeling, storage and disposal. We also organize specialized training on chemicals, environmental health and safety and biosafety, and conduct hazardous chemical spill emergency drills and fire evacuation exercises to enhance employees' safety awareness and ability to respond to emergencies. To comprehensively protect employees' occupational health and safety, we also provide employees with health benefits such as annual health check-ups, supplementary commercial medical insurance and labor protection equipment, effectively safeguarding employees' physical and mental health.

During the Track Record Period and as of the Latest Practicable Date, we complied with the relevant occupational health and safety laws and regulations in the PRC and we did not have any incidents or complaints which had a material and adverse effect on our business, financial condition or results of operations during the same period.

Social Responsibilities

In respect of social responsibilities, we are committed to offering a fair and caring working environment to our employees. We have transparent policies on recruitment, compensation, dismissal, equal opportunities, diversity and anti-discrimination. We hire employees based on their merits and it is our corporate vision to offer equal opportunities to our employees. We encourage our employees who encounter any discrimination to seek immediate assistance, which also allows us to conduct timely investigation and follow up as needed. In addition, we provide training programs on industry and regulatory developments to our employees. In the nine months ended September 30, 2025, our overall employee turnover rate was 4.8%. As of September 30, 2025, we had 40 female employees, accounting for 63.5% of our total employees.

In addition, we are committed to continuously improving our internal anti-corruption and business ethics management system in compliance with the relevant laws and regulations. We have established whistleblowing and complaints procedures and related monitoring mechanisms to ensure timely identification and handling of illegal or non-compliant conduct. We also conduct regular anti-corruption and compliance training to enhance employees' awareness of anti-bribery and improve their compliance capabilities. We have included anti-commercial bribery clauses in certain procurement contracts to prevent corruption and maintain clean, transparent business relationships. During the Track Record Period and up to the Latest Practicable Date, we did not have any litigation or proceedings relating to corruption, bribery or unfair competition.

PROPERTIES

We are headquartered in Wenzhou, Zhejiang province. As of the Latest Practicable Date, we did not own any real property. As of the Latest Practicable Date, we leased four properties with an aggregate gross floor area of 2,331 sq.m. in Wenzhou, Shanghai and Hong Kong for our daily business operations and R&D functions.

BUSINESS

LICENSES, PERMITS AND APPROVALS

We are required to maintain or renew the necessary permits, licenses and certifications for our business. During the Track Record Period and up to the Latest Practicable Date, we obtained all requisite licenses, approvals and permits from relevant authorities that are material to our operations. The table below sets forth the relevant details of the material license we hold for our operations in China.

Company	License	Status
Our Company	Business license	Perpetual
VivaVision Shanghai	Business license	Effective until July 10, 2043
VivaVision Hong Kong	Business registration certificate	Effective until January 15, 2027

RISK MANAGEMENT AND INTERNAL CONTROL

We are subject to various risks during our operations. See “Risk Factors.” We have established a consolidated risk management system and relevant policies and procedures which we consider suitable for our business operations. Our policies and procedures are aimed at managing and monitoring our business performance.

To monitor the continuous implementation of risk management policies and corporate governance measures after the Listing, we have adopted or will continue to adopt, among other things, the following risk management measures:

- establish an audit committee to review and supervise our financial reporting process and internal control system. Our audit committee consists of three members: Mr. Xu Decai, chairman of the committee, Mr. Shen Hongquan and Mr. Huang Yide. For the qualifications and experiences of these members, see “Directors and Senior Management”;
- adopt various policies to ensure compliance with the Listing Rules, including but not limited to policies in respect of risk management, connected transactions and information disclosure;
- provide regular anti-corruption and anti-bribery compliance training for senior management and employees to enhance their knowledge of and compliance with applicable laws and regulations; and
- arrange our Directors and senior management to attend training seminars on Listing Rules requirements and the responsibilities as directors of a Hong Kong-listed company.

LEGAL PROCEEDINGS AND COMPLIANCE

During the Track Record Period and up to the Latest Practicable Date, we had not been involved in any litigation, arbitration or administrative proceedings which could have a material adverse impact on our business, financial condition or results of operations. As of the Latest Practicable Date, we were not aware of any pending or threatened litigation, arbitration or administrative proceedings against us which may have a material and adverse impact on our business, financial condition or results of operations.

During the Track Record Period and as of the Latest Practicable Date, we had not had any non-compliance incidents which our Directors believe would, individually or in the aggregate, have a material operational or financial impact on our company as a whole.

DIRECTORS AND SENIOR MANAGEMENT

BOARD OF DIRECTORS

Our Board of Directors comprises seven Directors, including two executive Directors, two non-executive Directors and three independent non-executive Directors. The powers and duties of our Board include, among others, determining our business and investment plans, preparing our annual financial budgets and final reports, and exercising such other powers, functions and duties as may be conferred by the Articles. The table below sets out the key information of our Directors.

Name	Age	Date of joining our Group	Date of appointment as Director ⁽¹⁾	Existing position(s) in our Group	Roles and responsibilities	Relationship with other Directors and senior management
<i>Executive Directors</i>						
Dr. Shen Wang (沈旺) . . .	61	September 22, 2016	February 10, 2026	Executive Director, chief executive officer and chairman of our Board	Responsible for the strategic planning, business direction and daily operations and management of our Group	None
Dr. Xia Erning (夏爾寧) . . .	66	March 1, 2020	February 10, 2026	Executive Director and chief technology officer	Responsible for overseeing the product research and development of our Group	None
<i>Non-executive Directors</i>						
Ms. Sun Jialin (孫佳林) . . .	43	January 30, 2026	February 10, 2026	Non-executive Director	Responsible for providing guidance for the strategy and business development of our Group	None
Mr. Huang Yide (黃益德) . . .	42	January 30, 2026	February 10, 2026	Non-executive Director	Responsible for providing guidance for the strategy and business development of our Group	None
<i>Independent non-executive Directors</i>						
Mr. Xu Decai (徐德才) . . .	53	January 30, 2026	February 10, 2026	Independent non-executive Director	Responsible for providing independent advice to our Board	None
Mr. Shen Hongquan (申紅權) . . .	55	January 30, 2026	February 10, 2026	Independent non-executive Director	Responsible for providing independent advice to our Board	None
Mr. Zhang Nan (張楠)	42	January 30, 2026	February 10, 2026	Independent non-executive Director	Responsible for providing independent advice to our Board	None

Note:

(1) The re-designation of each Director as an executive Director, a non-executive Director or an independent non-executive Director was approved by the Shareholders on February 10, 2026.

Executive Directors

Dr. Shen Wang (沈旺), aged 61, is an executive Director, chief executive officer, chairman of the Board and our Single Largest Shareholder. Dr. Shen founded our Group in September 2016 and has been serving as a Director and the chief executive officer since then, and as chairman of the Board since March 2018. Dr. Shen was re-designated as an executive Director on February 10, 2026. Dr. Shen held directorship in various subsidiaries of the Company, including as a director of VivaVision U.S. since May 2023, VivaVision Shanghai since July 2023 and VivaVision Hong Kong since July 2024. He is primarily responsible for the strategic planning, business direction and daily operations and management of our Group.

DIRECTORS AND SENIOR MANAGEMENT

Dr. Shen has over 30 years of experience in the pharmaceutical and biotechnology industries. Prior to founding the Group, from September 1993 to May 2001, he served various positions at Abbott Laboratories, a company listed on the NYSE (stock code: ABT), with his last position as a medicinal chemistry research group leader. From June 2001 to April 2005, he served as an associate director of medicinal chemistry at Sunesis Pharmaceuticals, Inc., a company formerly listed on NASDAQ (ticker symbol: SNSS). From May 2005 to December 2008, he served as a principal scientist at Amgen Inc., a company listed on NASDAQ (ticker symbol: AMGN). From January 2009 to March 2016, he served as the president of the United States office of Jiangsu Kanion Pharmaceutical Co., Ltd. (江蘇康緣藥業股份有限公司), a company listed on the Shanghai Stock Exchange (stock code: 600557). From August 2015 to March 2016, he served as the vice president of chemistry at Vivace Therapeutics, Inc.. Since November 2020, Dr. Shen has served as chairman of the board of E-nitiate, which is held as to approximately 16.18% by our Company.

Dr. Shen obtained his bachelor’s degree in science from Fudan University (復旦大學) in the PRC in July 1985, and obtained his Doctor of Philosophy from the University of Pittsburgh in the United States in August 1991.

Dr. Xia Erning (夏爾寧), aged 66, is an executive Director and chief technology officer of our Group. Dr. Xia joined our Group on March 1, 2020 and has served as our chief technology officer since then. Dr. Xia was re-designated as our executive Director on February 10, 2026. He is primarily responsible for overseeing the product research and development of our Group.

Dr. Xia has 30 years of experience in pharmaceuticals and medical devices research and development. From May 1995 to May 2014, he was a research fellow at Bausch + Lomb. From January 2008 to December 2012, he served as an honored distinguished research fellow at the Shandong Institute of Pharmaceutical Research (山東省藥學科學院). From September 2013 to March 2019, he served as the chief technology officer at Fulcrum International Technologies, Inc. Since April 2024, he has served as chairman of the board of Jiangxi Shining Weimou Pharmaceutical Co., Ltd. (江西閃亮維眸醫藥有限公司), an associate which is held as to approximately 25.00% by our Company. Since June 2025, he has served as a deputy director of the Laboratory for Ophthalmic Drug Innovation and Medical Device Research and Development of the Zhejiang Province (全省眼科藥物創製與醫療器械研發重點實驗室).

Dr. Xia obtained a bachelor’s degree and a master’s degree in science from the Nanjing College of Pharmacy (南京藥學院), now known as China Pharmaceutical University (中國藥科大學), in the PRC in July 1982 and June 1985, respectively. He obtained a Doctor of Philosophy from the University of Iowa in the United States in August 1995.

Non-executive Directors

Ms. Sun Jialin (孫佳林), aged 43, joined our Group and was re-designated as our non-executive Director on February 10, 2026. She is primarily responsible for providing guidance for the strategy and business development of our Group.

Ms. Sun has over 18 years of experience in venture capital and investment management. Since August 2007, she has served various positions at ShenZhen GTJA Investment Group Co., Ltd. (深圳市高特佳創業投資集團有限公司), with her current position as general manager. Since July 2021, she has served as a legal representative and executive director at Shanghai GTJA Investment Management Co., Ltd. (上海高特佳創業投資管理有限公司).

Ms. Sun obtained her bachelor’s degree in law from Yangzhou University (揚州大學) in the PRC in June 2005, and her master’s degree in law from Soochow University (蘇州大學) in the PRC in June 2008.

Mr. Huang Yide (黃益德), aged 42, joined our Group and was re-designated as our non-executive Director on February 10, 2026. He is primarily responsible for providing guidance for the strategy and business development of our Group.

Mr. Huang has over 15 years of experience in scientific research and development and relevant investment activities. From September 2010 to July 2012, he served at the Xiamen Huli District Center for Disease Control and Prevention (廈門市湖裡區疾病預防控制中心). From July 2012 to December 2016, he served at the Institute of Urban Environment of the Chinese Academy of Sciences (中國科學院城市環境研究所). He has worked at Xiamen Changrong Investment Management Co., Ltd. (廈門長融投資管理有限公司) since January

DIRECTORS AND SENIOR MANAGEMENT

2017, with his current position as an investment director. From April 2021 to July 2022, he served as a director of Proviva Therapeutics, Inc. Since September 2021, he has served as a director of Eubulus Biotherapeutics Inc.. From September 2025 to February 2026, he served as a director of Arthroli Therapeutics, Inc. He has served as a director of CR Capital Management Inc. since December 2025.

Mr. Huang obtained his bachelor's degree in medicine in June 2007 and his master's degree in medicine majoring in nutrient and food hygiene in June 2010 from Central South University (中南大學) in the PRC.

Independent non-executive Directors

Mr. Xu Decai (徐德才), aged 53, was re-designated as our independent non-executive Director on February 10, 2026. He is primarily responsible for providing independent advice to our Board.

Mr. Xu has over 20 years of experience in financial management. Earlier in his career, among other positions, he served as the finance director of multimedia at TCL Technology Group Corporation (TCL科技集團股份有限公司), a company listed on the Shenzhen Stock Exchange (stock code: 100). From September 2011 to March 2016, he worked at China Resources Pharmaceutical Holdings Company Limited (華潤醫藥控股有限公司), a subsidiary of China Resources Pharmaceutical Group Limited (華潤醫藥集團有限公司), a company listed on the Stock Exchange (stock code: 3320). Since May 2016, Mr. Xu has served as the chief financial officer at Beijing Ape Power Technology Co., Ltd. (北京猿力科技有限公司).

Mr. Xu obtained his bachelor's degree in engineering from Beihang University (北京航空航天大學) in the PRC in July 1994, and his master's degree in economics from Peking University (北京大學) in the PRC in July 1998. Mr. Xu was qualified as a non-practising member of the Beijing Institute of Certified Public Accountants (北京註冊會計師協會) in the PRC in July 1996.

Mr. Shen Hongquan (申紅權), aged 55, was re-designated as our independent non-executive Director on February 10, 2026. He is primarily responsible for providing independent advice to our Board.

Mr. Shen has over 30 years of experience in investment management in the pharmaceutical and healthcare industries. From September 1993 to February 2007, he worked at China Resources Company Limited (中國華潤有限公司). He later worked as a director and a vice general manager at China Resources Sanjiu Medical & Pharmaceutical Co., Ltd. (華潤三九醫藥股份有限公司), a company listed on the Shenzhen Stock Exchange (stock code: 999) from April 2008 to February 2009 and from June 2008 to February 2009, respectively. He subsequently worked at China Resources Pharmaceutical Holdings Company Limited (華潤醫藥控股有限公司), a subsidiary of China Resources Pharmaceutical Group Limited (華潤醫藥集團有限公司), a company listed on the Stock Exchange (stock code: 3320) from December 2012 to January 2015, with his last position as the director of marketing. Since October 2017, he has served as a founding partner at Suzhou Longmen Venture Capital Partnership (Limited Partnership) (蘇州隆門創業投資合夥企業(有限合夥)). Since September 2021, he has served as founding partner of Hainan Qishen Venture Capital Partnership (Limited Partnership) (海南啟申創業投資合夥企業(有限合夥)). Since July 2025, he has served as senior consultant of the Shanghai Biomedical Mergers and Acquisition Fund LP (上海生物醫藥並購私募基金合夥企業(有限合夥)) of Shanghai Shangshi Capital Management Company Limited (上海上實生物醫藥管理諮詢有限公司). He currently also serves as a director of Bono Kangyuan (Beijing) Pharmaceutical Technology Co., Ltd. (博諾康源(北京)藥業科技有限公司), a director and general manager of Huzhou Maoshen Enterprise Management Co., Ltd. (湖州茂申企業管理有限公司), and a director of Shanghai Keku Medical Technology Co., Ltd. (上海科庫醫療技術有限公司).

Mr. Shen obtained his bachelor's degree in engineering from Beijing University of Technology (北京工業大學) in the PRC in July 1993, and his Master of Business Administration from Renmin University of China (中國人民大學) in the PRC in June 2002. Mr. Shen obtained his legal profession qualification from the Ministry of Justice of the PRC in September 2002.

DIRECTORS AND SENIOR MANAGEMENT

Mr. Zhang Nan (張楠), aged 42, was re-designated as our independent non-executive Director on February 10, 2026. He is primarily responsible for providing independent advice to our Board.

Mr. Zhang has over 17 years of experience in investment management and financial services. From November 2007 to October 2010, he worked at CITIC Securities Co., Ltd. (中信證券股份有限公司). From November 2010 to September 2012, he served as a corporate client manager at Deutsche Bank (China) Co., Ltd. (德意志銀行(中國)有限公司). From December 2013 to February 2016, he served as deputy general manager at CNCB (Beijing) Equity Investment Fund Management Co., Limited (信銀振華(北京)股權投資基金管理有限公司). From January 2016 to September 2017, he served as the general manager at Beijing Xinwen Capital Management Co., Ltd. (北京信文資本管理有限公司). From September 2018 to September 2021, he served as a partner at Suzhou MING Bioventures LP (蘇州聚明投資管理合夥企業(有限合夥)). Since October 2021, Mr. Zhang has served as a partner at Beijing Seasonal Investment Management Co., Ltd. (北京時節投資管理有限公司).

Mr. Zhang obtained his bachelor of science in economics and finance from The Hong Kong University of Science and Technology in November 2006. He obtained his master of arts from the University of Toronto in Canada in June 2007.

Save as disclosed above and in this document, each of our Directors has confirmed that he/she has no other relationship with any other Directors or senior management of our Company and none of our Directors has held any other directorships in listed companies during the three years immediately preceding the date of this document.

Save as disclosed below, each of our Directors has confirmed that there are no other matters relating to his/her appointment as a Director that need to be brought to the attention of our Shareholders and there is no other information in relation to his/her appointment which is required to be disclosed pursuant to Rule 13.51(2) of the Listing Rules.

Ms. Sun Jialin (“Ms. Sun”) was a supervisor of Rinpak Technology (Shanghai) Co., Ltd. (潤百計算機(上海)有限公司) (“Rinpak Technology”), the business license of which was revoked on December 23, 2016 due to difficulties in its business operations and failure to conduct annual inspections in a timely manner. As confirmed by Ms. Sun, the revocation of the business license of Rinpak Technology was not caused by her, and she did not bear any personal responsibility and was not subject to any claim by third party for such revocation or for serving as a supervisor of Rinpak Technology.

Each of our Directors has confirmed that he/she obtained the legal advice on February 1, 2026 with regard to the requirements under the Listing Rules that are applicable to him/her as a director of a listed issuer and the possible consequences of making a false declaration or giving false information to the Stock Exchange as set out in Rule 3.09D of the Listing Rules and he/she understood his/her obligations as a director of a listed issuer.

Each of our independent non-executive Directors has confirmed his independence with regards to each of the factors as set out in Rule 3.13(1) to (8) of the Listing Rules and that there are no other factors that may affect his independence at the time of his/her appointment.

SENIOR MANAGEMENT

Our senior management is responsible for the day-to-day management of our business. The table below sets out the key information of our senior management:

Name	Age	Date of joining our Group	Date of appointment as senior management	Existing position(s) in our Group	Roles and responsibilities	Relationship with other Directors and senior management
Dr. Shen Wang (沈旺)	61	September 22, 2016	September 22, 2016	Executive Director, chief executive officer and chairman of our Board	Responsible for the strategic planning, business direction and daily operations and management of our Group	None

DIRECTORS AND SENIOR MANAGEMENT

Name	Age	Date of joining our Group	Date of appointment as senior management	Existing position(s) in our Group	Roles and responsibilities	Relationship with other Directors and senior management
Dr. Xia Erning (夏爾寧) . . .	66	March 1, 2020	March 1, 2020	Executive Director and chief technology officer	Responsible for overseeing the product research and development of our Group	None
Dr. Tsai Albert Jr. (蔡建明). . .	52	September 22, 2025	September 22, 2025	Chief medical officer	Responsible for overseeing the medical research and development of our Group	None

Dr. Shen Wang (沈旺), aged 61, is an executive Director, chief executive officer, chairman of the Board and our Single Largest Shareholder. For his biography, see “—Board of Directors—Executive Directors” in this section.

Dr. Xia Erning (夏爾寧), aged 66, is an executive Director and chief technology officer of our Company. For his biography, see “—Board of Directors—Executive Directors” in this section.

Dr. Tsai Albert Jr. (蔡建明), aged 52, joined our Group in September 2025 and has served as our chief medical officer since then. He is primarily responsible for overseeing the medical research and development of our Company.

Dr. Tsai has over 28 years of experience in the pharmaceutical and biotechnology industries. Prior to joining the Group, from June 1997 to June 2000, he served as a sales representative and regional trainer at AbbVie Inc., a company listed on New York Stock Exchange (ticker symbol: ABBV). From July 2000 to February 2003, he served various positions at Amgen Inc., a company listed on NASDAQ (ticker symbol: AMGN), with his last position as a licensing operations manager at the global market and licensing department. From April 2003 to May 2005, he served as a senior consultant at G.E. HealthCare Technologies Inc., a company listed on NASDAQ (ticker symbol: GEHC). From May 2005 to June 2007, he served as a Hong Kong country medical director at Merck & Co., Inc., a company listed on New York Stock Exchange (ticker symbol: MRK). From June 2007 to March 2013, he served various positions at Bayer Aktiengesellschaft, a company listed on the Frankfurt Stock Exchange (stock code: BAYN), with his last position as the head of medical. From March 2013 to April 2014, he served as the chief executive officer and principal consultant at Healthcare Research Institute (HRI). From April 2014 to July 2019, he served as the vice president and general manager of the Asia Pacific region at The Medicines Company, a company listed on NASDAQ (ticker symbol: MDCO). From July 2019 to February 2021, he served as the vice president and regional medical officer of the Asia Pacific region at PPD, Inc., a company listed on NASDAQ (ticker symbol: PPD). From February 2021 to September 2025, he served as the chief medical officer at Zhaoke Ophthalmology Limited (兆科眼科有限公司), a company listed on the Stock Exchange (stock code: 6622).

Dr. Tsai obtained his bachelor’s degree of science in medicine in June 1994 and a doctor’s degree of medicine in June 1997 from the Northwestern University in the United States. He further obtained a master of business administration degree from the Gordon S. Marshall School of Business of the University of Southern California in the United States in May 2002.

JOINT COMPANY SECRETARIES

Dr. Sun Yanyan (孫妍妍) was appointed as our joint company secretary in February 2026. Dr. Sun joined our Group in April 2023 as the head of business development department and has served as a vice president since May 2024.

Dr. Sun has around ten years of experience in investment management. From March 2016 to June 2018, she served as an investment manager of the investment and finance department at Shanghai United Imaging Healthcare Co., Ltd. (上海聯影醫療科技有限公司). From March 2020 to November 2022, she served as a non-executive director at Viva Biotech Holdings Group (維亞生物科技控股集團). From June 2018 to December 2022, she served as an investment director at Fenghong Investment Management (Shanghai) Co., Ltd. (風鴻投資管理(上海)有限公司).

DIRECTORS AND SENIOR MANAGEMENT

Dr. Sun obtained a bachelor’s degree in science, majoring in biological science from Nanchang University (南昌大學) in the PRC in June 2009, and a doctoral degree in science, majoring in neurobiology from Fudan University (復旦大學) in the PRC in October 2016.

Ms. Chan Ching Nga (陳靜雅) was appointed as our joint company secretary in February 2026.

Ms. Chan has over 20 years of experience in company secretarial and corporate governance fields and is currently a senior manager of Entity Solutions at Computershare Hong Kong Investor Services Limited. She holds a master’s degree in corporate governance from The Hong Kong Polytechnic University. Ms. Chan is an associate of both The Hong Kong Chartered Governance Institute and The Chartered Governance Institute in the United Kingdom.

BOARD COMMITTEES

Our Board has established the Audit Committee, the Remuneration Committee and the Nomination Committee and delegated various responsibilities to these committees, which assist our Board in discharging its duties and overseeing particular aspects of our Group’s activities.

Audit Committee

We have established the Audit Committee pursuant to Rule 3.21 of the Listing Rules with written terms of reference in compliance with paragraph D.3 of Part 2 of the Corporate Governance Code, as set out in Appendix C1 to the Listing Rules (the “CG Code”). The Audit Committee consists of Mr. Xu Decai, Mr. Shen Hongquan and Mr. Huang Yide. Mr. Xu Decai is the chairperson of the Audit Committee and has the appropriate professional qualifications or accounting or related financial management expertise as required under Rule 3.10(2) of the Listing Rules.

The primary duties of the Audit Committee include, but are not limited to: (i) reviewing the disclosure of financial information in financial accounting reports and periodic reports, and internal control evaluation reports; (ii) appointing or removing the Company’s external auditor; (iii) appointing or removing the Company’s financial controller; (iv) amending accounting policies, accounting estimates, or correcting major accounting errors for reasons other than changes in accounting standards; (v) supervising the Company’s financial reporting system, risk management and internal control systems; and (vi) performing other duties and responsibilities required by the relevant laws, regulations, the Listing Rules and the Company’s Articles of Association.

Remuneration Committee

We have established the Remuneration Committee pursuant to Rule 3.25 of the Listing Rules with written terms of reference in compliance with paragraph E.1 of Part 2 of the CG Code. The Remuneration Committee consists of Mr. Zhang Nan, Mr. Huang Yide and Mr. Xu Decai. Mr. Zhang Nan is the chairperson of the Remuneration Committee.

The primary duties of the Remuneration Committee include, but are not limited to: (i) establishing performance appraisal criteria for our Directors and senior management and conduct appraisals; (ii) formulating and reviewing remuneration policies and plans for our Directors and senior management; (iii) making recommendations to our Board on the formulating procedure, policy and structure of remuneration for our Directors and senior management; (iv) making recommendations to our Board on the formulation or amendment of employee incentive schemes; (v) making recommendations to our Board on the realization of conditions for the incentive targets in obtaining and exercising their granted rights; (vi) making recommendations to our Board and senior management on the establishment of employee incentive schemes; and (vii) performing other duties and responsibilities as assigned by our Board.

Nomination Committee

We have established the Nomination Committee pursuant to Rule 3.27A of the Listing Rules with written terms of reference in compliance with paragraph B.3 of Part 2 of the CG Code. The Nomination Committee consists of Mr. Shen Hongquan, Mr. Zhang Nan and Ms. Sun Jialin. Mr. Shen Hongquan is the chairperson of the Nomination Committee.

DIRECTORS AND SENIOR MANAGEMENT

The primary duties of the Nomination Committee include, but are not limited to: (i) formulating the selection criteria and procedures for Directors and senior management; (ii) selecting and reviewing the candidates and qualifications for Directors and senior management; (iii) making recommendations to our Board on the size and composition of the Board based on the Company's business operations, scale of assets and equity structure; (iv) making recommendations on the selection criteria, procedure and methods for Directors and senior management; (v) identifying qualified candidates for Directors and senior managements and submitting them to the Board for consideration; (vi) making recommendations to our Board on the nomination, appointment or removal of Directors; (vii) making recommendations to our Board on the evaluation of the independence of independent non-executive Directors; (viii) making recommendations on the adoption of a board diversity policy and disclose such policy or a summary of it in the corporate governance report; (ix) making recommendations on the appointment or removal of senior management; and (x) performing other duties and responsibilities as assigned by our Board.

BOARD DIVERSITY POLICY

Our Board [has] adopted a board diversity policy ("Board Diversity Policy"), which sets out the approach to achieve diversity on our Board. Our Company recognizes and embraces the benefits of having a diverse Board and sees increasing diversity at the Board level as an essential element in supporting the attainment of our Company's strategic objectives and sustainable development. Our Company seeks to achieve Board diversity through the consideration of a number of factors, including but not limited to talent, skills, gender, age, cultural and educational background, ethnicity, professional experience, independence, knowledge and length of service. We will select potential Board candidates based on merit and his/her potential contribution to our Board while taking into consideration our own business model and specific needs from time to time. All Board appointments will be based on meritocracy and candidates will be considered against objective criteria, having due regard to the benefits of diversity on our Board.

Our Board has a balanced mix of knowledge, skills and experience, including but without limitation to pharmacy and biotechnology, business management, operations management, financial management and investment management. Members of our Board have obtained degrees in various majors including but not limited to science, pharmacy, law, business administration, engineering and arts. We have three independent non-executive Directors from different backgrounds, including accounting, financial management and investment management. Furthermore, our Directors are of a wide range of age, from 42 years old to 66 years old.

With regards to gender diversity on the Board, we recognize the particular importance of gender diversity. Our Board currently comprises one female Director and six male Directors and expects to continue to maintain an appropriate gender mix in the Board upon Listing. We have taken and will continue to take steps to promote and enhance gender diversity at all levels of our Company, including but without limitation at our Board and senior management levels. Our Board Diversity Policy provides that our Board should aim to increase the proportion of female members over time after Listing where possible when selecting and making recommendations on suitable candidates for Board appointments. We will also ensure that there is gender diversity when recruiting staff at mid to senior level so that we will have a pipeline of female senior management and potential successors to our Board going forward. It is our objective to maintain an appropriate balance of gender diversity with reference to the expectations of stakeholders and international and local recommended best practices.

Our Nomination Committee is responsible for ensuring the diversity of our Board members. After Listing, our Nomination Committee will review our Board Diversity Policy and its implementation from time to time to monitor its continued effectiveness and we will disclose the implementation of our Board Diversity Policy, including any measurable objectives set for implementing the Board Diversity Policy and the progress on achieving these objectives, in our corporate governance report on an annual basis.

CORPORATE GOVERNANCE

Our Company aims to achieve high standards of corporate governance which are crucial to the development and safeguard the interests of our Shareholders. To accomplish this, our Company expects to comply with the CG Code and the associated Listing Rules after the Listing save for the deviation as mentioned below. Any deviation from the code provisions

DIRECTORS AND SENIOR MANAGEMENT

shall be carefully considered, and the reasons for any deviation and explanation of how good corporate governance was achieved by means other than strict compliance with the code provisions shall be given in the interim report and the annual report in respect of relevant period.

According to code provision C.2.1 of Part 2 of the CG Code, the roles of chairman and chief executive should be separate and should not be performed by the same individual. The roles of chairman of the Board and chief executive officer are currently performed by Dr. Shen. In view of Dr. Shen’s substantial contribution to our Group since our establishment and his extensive experience, our Board believes that it is in the best interest of our Group to have Dr. Shen taking up both roles for effective management and operations. Therefore, our Directors consider that the deviation from such code provision is appropriate. Notwithstanding such deviation, our Directors are of the view that our Board is able to work efficiently and perform its responsibilities with all key and appropriate issues discussed in a timely manner. In addition, as all major decisions will be made in consultation with members of our Board and the relevant Board committees, and there are three independent non-executive Directors on our Board offering independent perspective, our Board is therefore of the view that there are adequate safeguards in place to ensure sufficient balance of powers within our Board. Our Board shall nevertheless review the structure and composition of our Board and senior management from time to time in light of prevailing circumstances to maintain a high standard of corporate governance practices of our Company.

COMPENSATION OF DIRECTORS AND SENIOR MANAGEMENT

Our Directors and members of our senior management receive compensation from our Group in the form of fees, salaries and other benefits and contribution to pension scheme.

The aggregate remuneration (including salaries, allowances, benefits in kind, discretionary bonuses, retirement scheme contributions and share-based payments) paid or payable to our Directors for the year ended December 31, 2024 and the nine months ended September 30, 2025 was RMB3.0 million and RMB2.5 million, respectively. Save as disclosed above, no amounts have been paid or are payable by any member of our Group to our Directors for the year ended December 31, 2024 and the nine months ended September 30, 2025.

The aggregate amount of salaries, allowances, benefits in kind, discretionary bonuses, retirement scheme contributions and share-based payments paid or payable to our five highest paid individuals in respect of the year ended December 31, 2024 and the nine months ended September 30, 2025 was RMB18.0 million and RMB7.8 million, respectively.

No remuneration was paid by us to our Directors or the five highest paid individuals as an inducement to join or upon joining us or as a compensation for loss of office in respect of the year ended December 31, 2024 and the nine months ended September 30, 2025. Further, none of our Directors had waived or agreed to waive any remuneration during the same periods.

Under the arrangement currently in force, the aggregate remuneration (including salaries, allowances, benefits in kind, discretionary bonuses, retirement scheme contributions and share-based payments) of our Directors for the year ending December 31, 2026 is estimated to be no more than approximately RMB4.7 million.

Our Board will review and determine the remuneration and compensation packages of our Directors and senior management and will, following the Listing, receive recommendation from the remuneration and appraisal committee which will take into account salaries paid by comparable companies, time commitment and responsibilities of our Directors and performance of our Group.

EMPLOYEE INCENTIVE SCHEME

For further details of our employees’ incentive scheme, See “Appendix VI—Statutory and General Information—D. Employee Incentive Scheme” for details.

COMPETITION

Each of our Directors confirms that, as of the Latest Practicable Date, he/she did not have any interest in any business which competes, or is likely to compete, directly or indirectly, with our business, and requires disclosure under Rule 8.10 of the Listing Rules.

DIRECTORS AND SENIOR MANAGEMENT

COMPLIANCE ADVISER

We have appointed Somerley Capital Limited as our Compliance Adviser pursuant to Rule 3A.19 of the Listing Rules. Pursuant to Rule 3A.23 of the Listing Rules, our compliance adviser will advise our Company in the following circumstances:

- before the publication of any regulatory announcement, circular and financial report;
- where a transaction, which might be notifiable or connected transaction under the Listing Rules, is contemplated including shares issues, sales or transfer of treasury shares and share repurchases;
- where our Company proposes to use the [REDACTED] from the [REDACTED] in a manner different from that detailed in this document or where our business activities, developments or results deviate from any forecast, estimate or other information in this document; and
- where the Stock Exchange makes an inquiry of our Company under Rule 13.10 of the Listing Rules.

The term of the appointment shall commence on the Listing Date and end on the date on which our Company distribute our annual report in respect of our financial results for the first full financial year commencing after the Listing Date.

SUBSTANTIAL SHAREHOLDERS

So far as our Directors are aware, immediately following the completion of the [REDACTED] and assuming the [REDACTED] Option is not exercised and the conversion of the Convertible Bond is not completed, the following persons will have interests and/or short positions in the Shares or underlying shares of our Company which would fall to be disclosed pursuant to the provisions of Divisions 2 and 3 of Part XV of the SFO, or, directly or indirectly, be interested in 10% or more of the nominal value of any class of share capital carrying the rights to vote in all circumstances at general meetings of our Company:

Name of Shareholder	Type of Shares to be held upon Listing	Nature of Interest	As of the Latest Practicable Date		Immediately following the completion of the [REDACTED] (assuming the [REDACTED] is not exercised)

(1) All interests stated are long positions.

- (2) Longpan Health is owned as to approximately 1.07% by Longpan Yijing as its general partner. Longpan Yijing is held as to (i) approximately 0.46% by Beijing Longpan as its general partner, which is ultimately controlled by Mr. Yu; (ii) approximately 53.60% by Xiamen C&D as its limited partner, which is ultimately controlled by State-owned Assets Supervision and Administration Commission of Xiamen Municipal People's Government (廈門市人民政府國有資產監督管理委員會); and (iii) approximately 27.02% by Mr. Yu as its limited partner. Therefore, each of Longpan Yijing, Xiamen C&D and Mr. Yu is deemed to be interested in the Shares held by Longpan Health. Tibet Longpan is owned as to approximately 1.01% by Tibet Ruihan Enterprise Management Consulting Center (Limited Partnership) (西藏瑞瀚企業管理諮詢中心(有限合夥)) as its general partner, which is held as to 76.47% by Mr. Yu as its general partner. Therefore, Mr. Yu is deemed to be interested in the Shares held by Tibet Longpan.
- (3) Huzhou Xiulai is managed by its general partner, Ms. Wu. Therefore, Ms. Wu is deemed to be interested in the Shares held by Huzhou Xiulai.
- (4) HSG Venture is wholly owned by HongShan Capital Venture Fund VIII, L.P., whose general partner is HSG Venture VIII Management, L.P. The general partner of HSG Venture VIII Management, L.P. is HSG Holding Limited, a wholly-owned subsidiary of SNP China Enterprises Limited whose sole shareholder is Mr. Neil Nanpeng Shen. Therefore, each of HongShan Capital Venture Fund VIII, L.P., HSG Venture VIII Management, L.P., HSG Holding Limited, SNP China Enterprises Limited and Mr. Neil Nanpeng Shen is deemed to be interested in the Shares held by HSG Venture.

Save as disclosed herein, our Directors are not aware of any other person who will, immediately following the completion of the [REDACTED] (assuming that the [REDACTED] is not exercised and the conversion of the Convertible Bond is not completed) and the Conversion of Unlisted Shares into H Shares, have any interest and/or short positions in the Shares or underlying shares of our Company which would fall to be disclosed to the Company pursuant to the provisions of Divisions 2 and 3 of Part XV of the SFO, or, who is, directly or indirectly, interested in 10% or more of the nominal value of any class of our share capital carrying rights to vote in all circumstances at general meetings of our Company.

SHARE CAPITAL

As of the Latest Practicable Date, the registered share capital of our Company was RMB28,824,452 divided into 288,244,520 Unlisted Shares, with a nominal value of RMB0.10 each.

Immediately after the completion of the [REDACTED] and the Conversion of Unlisted Shares into H Shares (assuming the [REDACTED] is not exercised), the share capital of our Company will be as follows:

Number of Shares	Description of Shares	Approximate percentage of total issued share capital
[REDACTED]	H Shares to be converted from Unlisted Shares	[REDACTED]%
[REDACTED]	H Shares to be issued under the [REDACTED]	[REDACTED]%
<u>[REDACTED]</u>		<u>100.00%</u>

Immediately after the completion of the [REDACTED] and the Conversion of Unlisted Shares into H Shares (assuming the [REDACTED] is exercised in full), the share capital of our Company will be as follows:

Number of Shares	Description of Shares	Approximate percentage of total issued share capital
[REDACTED]	H Shares to be converted from Unlisted Shares	[REDACTED]%
[REDACTED]	H Shares to be issued under the [REDACTED]	[REDACTED]%
<u>[REDACTED]</u>		<u>100.00%</u>

SHARE CLASSES AND RANKING

Upon the completion of the Conversion of Unlisted Shares into H Shares and the [REDACTED], our Shares will consist of H Shares. H Shares are ordinary Shares only.

Apart from certain qualified domestic institutional investors in the PRC, the qualified PRC investors under the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect and other persons who are entitled to hold our H Shares pursuant to relevant PRC laws and regulations or upon approvals of any competent authorities, H Shares generally cannot be subscribed by or traded between legal or natural PRC persons.

All dividend for H Shares will be denominated and declared in Renminbi, and paid in Hong Kong dollars or Renminbi. Other than cash, dividends could also be paid in the form of shares or a combination of cash and shares.

CIRCUMSTANCES UNDER WHICH GENERAL MEETING ARE REQUIRED

Pursuant to the PRC Company Law and the terms of the Articles of Association, our Company may from time to time by special resolution of shareholders, among others, increase its capital or decrease its capital. For details of circumstances under which our Shareholders’ general meetings are required, see “Appendix V—Summary of Articles of Association” to this document.

CONVERSION OF UNLISTED SHARES INTO H SHARES

Pursuant to the regulations prescribed by the securities regulatory authorities of the State Council, the Unlisted Shares may be converted into H Shares. Such converted Shares could be listed or traded on an overseas stock exchange, provided that prior to the conversion and trading of such converted Shares, any requisite internal approval process has been duly

SHARE CAPITAL

completed and all the filing procedures with the relevant regulatory authorities, including CSRC which requires administrative filing procedures for the conversion and trading of such converted Shares, have been obtained. In addition, such conversion and trading shall comply with the regulations, requirements and procedures prescribed by the relevant overseas stock exchange. If any of the Unlisted Shares are to be converted, listed and traded as H Shares on the Stock Exchange, such conversion, listing and trading will need to be filed with the relevant PRC regulatory authorities, including the CSRC, and the approval of the Stock Exchange.

Filing with the CSRC and Full Circulation Application

In accordance with the Guidelines for the “Full Circulation” Program for Domestic Unlisted Shares of H-share Listed Companies (《H股公司境內未上市股份申請“全流通”業務指引》) and the Overseas Listing Trial Measures announced by the CSRC, H-share listed companies which apply for the conversion of domestic shares and unlisted foreign shares into H shares for listing and circulation on the Stock Exchange shall file the application with the CSRC according to the administrative filing procedures necessary for the Overseas Listing Trial Measures. An H-share listed company may apply for a “Full Circulation” separately or when applying for refinancing overseas. An unlisted domestic joint stock company may apply for “Full Circulation” when applying for an overseas initial public offering.

We have filed with the CSRC for, and received the filing notice from the CSRC dated [●], 2026 in relation to the [REDACTED] and the conversion of [REDACTED] Unlisted Shares into H Shares on a one-for-one basis upon Listing.

Listing Approval by the Stock Exchange

We have applied to the Stock Exchange for the approval for the granting of listing of, and permission to deal in, our H Shares to be issued pursuant to the [REDACTED] (including any H Shares which may be issued pursuant to the exercise of the [REDACTED]) and the H Shares to be converted from [REDACTED] Unlisted Shares on the Stock Exchange, which is subject to the approval by the Stock Exchange.

We will perform the following procedures for the Conversion of Unlisted Shares into H Shares after receiving the approval of the Stock Exchange: (a) giving instructions to our H Share Registrar regarding relevant share certificates of the converted H Shares; and (b) enabling the converted H Shares to be accepted as eligible securities by HKSCC for deposit, clearance and settlement in the CCASS.

The Conversion of Unlisted Shares into H Shares will involve an aggregate of [REDACTED] Unlisted Shares held by [REDACTED] existing Shareholders, representing [REDACTED]% of total issued Shares of the Company as of the Latest Practicable Date and approximately [REDACTED]% of total issued Shares of the Company upon completion of the Conversion of Unlisted Shares into H Shares and the [REDACTED] (assuming the [REDACTED] is not exercised).

TRANSFER OF SHARES ISSUED PRIOR TO [REDACTED]

The PRC Company Law provides that in relation to the public offering of a company, the shares issued prior to the public offering shall not be transferred within a period of one year from the date on which the publicly offered shares are listed on any stock exchange. Accordingly, Shares issued by our Company prior to the [REDACTED] shall be subject to such statutory restriction and not be transferred within a period of one year from the Listing Date. See “History, Development and Corporate Structure—Pre-[REDACTED] Investments.”

REGISTRATION OF SHARES NOT LISTED ON THE OVERSEAS STOCK EXCHANGE

According to the Guidelines for the “Full Circulation” Program for Domestic Unlisted Shares of H-share Listed Companies (《H股公司境內未上市股份申請“全流通”業務指引》), the domestic shareholders of unlisted shares shall handle share transfer registration in accordance with the relevant rules of China Securities Depository and Clearing Corporation Limited (中國證券登記結算有限責任公司) (the “CSDC”), and H-share companies should submit relevant status reports to the CSRC within 15 days after the shares involved in the application completing the transfer registration in the CSDC.

FINANCIAL INFORMATION

You should read the following discussion and analysis in conjunction with our audited consolidated financial statements included in “Appendix I—Accountants’ Report” to this document, together with the accompanying notes. Our consolidated financial information has been prepared in accordance with IFRS Accounting Standards, which may differ in material aspects from generally accepted accounting principles in other jurisdictions. You should read the entire Accountants’ Report and not merely rely on the information contained in this section.

The following discussion and analysis contain forward-looking statements that reflect the current views with respect to future events and financial performance. These statements are based on assumptions and analyses made by us in light of our experience and perception of historical trends, current conditions and expected future developments, as well as other factors that we believe are appropriate under the circumstances. However, whether the actual outcome and developments will meet our expectations and predictions depends on a number of risks and uncertainties over which we do not have control. For details, see “Forward-looking Statements” and “Risk Factors.”

OVERVIEW

We are an ophthalmology-focused biotech company, committed to becoming a global leader in the development and commercialization of innovative ophthalmic treatments. Leveraging our expertise in small-molecule drug discovery, advanced formulation development and translational research in ophthalmic diseases, we are dedicated to building a competitive and differentiated product pipeline covering ocular indications affecting the surface and back of the eye with significant unmet clinical needs. We have established highly differentiated in-house research and development capabilities for innovative ophthalmic drugs and are selectively expanding into other disease areas with significant commercial potential. We have established integrated technology platforms, including ophthalmic small-molecule drug discovery, advanced formulation development and translational research, and have built a robust drug pipeline based on these platforms. As of the Latest Practicable Date, our product pipeline consisted of eight product candidates, including our Core Products, VVN461(HD) and VVN001, and six other product candidates.

BASIS OF PRESENTATION

Our Company was established in the PRC as a limited liability company on September 22, 2016 and was converted into a joint stock company with limited liability on January 30, 2026. The historical financial information and interim financial information have been prepared in accordance with IFRS Accounting Standards, which comprise all standards and interpretations approved by the International Accounting Standards Board (“IASB”), and is presented in Renminbi unless otherwise stated. We have consistently adopted all IFRS Accounting Standards that are effective for the accounting period beginning from January 1, 2025 throughout the Track Record Period.

The historical financial information and interim financial information have been prepared under the historical cost convention, except for certain financial instruments which have been measured at fair value. For details, see note 2.1 to the Accountants’ Report set out in Appendix I to this document.

MAJOR FACTORS AFFECTING OUR RESULTS OF OPERATIONS AND FINANCIAL CONDITION

Our results of operations and financial conditions have been and will continue to be affected by a number of factors, including those key factors set out below.

Our Ability to Successfully Develop and Commercialize Our Product Candidates

Our business and results of operations depend on our ability to successfully develop and manufacture as well as our receipt of regulatory approval for and successful commercialization of our product candidates. As of the Latest Practicable Date, we had developed a pipeline of eight product candidates, including two Core Products, namely VVN461(HD) and VVN001, and six other product candidates. Our product pipeline includes product candidates at various stages of development. For instance, for our VVN461(HD), we are conducting a Phase III

FINANCIAL INFORMATION

clinical trial and expect to complete the trial in the first half of 2027. Based on compelling efficacy results in the Phase II clinical trial of VVN461 for the treatment NIAU, our VVN461(HD) for the treatment of NIAU has received BTD from the NMPA, recognizing its therapeutic prospect and enabling a potentially expedited approval process. In addition, for VVN001, we completed a Phase I clinical trial in China in December 2021, a Phase II clinical trial in the United States in April 2022 and a Phase II clinical trial in China in December 2022. We commenced a Phase III clinical trial in China in June 2024. Our business and results of operations depend on our product candidates demonstrating favorable safety and efficacy profiles in clinical trials and our or our collaborators’ ability to obtain the requisite regulatory approvals for the product candidates.

Our Operating Expenses

Our business and results of operations are significantly affected by our operating expenses, particularly our research and development expenses and administrative expenses, details of which are set out below.

- *Research and development expenses.* Our research and development expenses primarily consist of salary and benefits expenses for our R&D personnel, trial and testing fees primarily in relation to the payments to CROs and CDMOs and R&D material costs. In 2024 and the nine months ended September 30, 2024 and 2025, our research and development expenses amounted to RMB128.3 million, RMB91.2 million and RMB65.2 million, respectively.
- *Administrative expenses.* Our administrative expenses primarily consist of salary and employee benefits for our administrative personnel, professional service fees in relation to marketing research and consulting and general office expenses, primarily including property management fees and travelling and business expenses. In 2024 and the nine months ended September 30, 2024 and 2025, our administrative expenses amounted to RMB15.2 million, RMB10.1 million and RMB10.3 million, respectively.

As we move from a clinical-stage company to a commercial-stage company, our cost structure will become more sophisticated with research and development expenses and administrative expenses continuing to increase in complexity.

Our Ability to Maintain Adequate Funding for Our Operations

During the Track Record Period, we funded our operations primarily through equity financing, bank borrowings and cash generated from our operations. Going forward, in the event of the successful commercialization of one or more of our product candidates, we expect to fund our operations primarily from the sales of our products. However, with the continuing expansion of our business and product portfolio, we may require further funding through public or private offerings, debt financing, collaborations and licensing arrangements or other sources. Any fluctuation in our ability to fund our operations will impact our cash flow and our results of operations.

MATERIAL ACCOUNTING POLICY INFORMATION AND CRITICAL JUDGMENTS AND ESTIMATES

We have identified certain accounting policies that are significant to the preparation of our consolidated financial statements. Some of our accounting policies involve subjective assumptions and estimates, as well as complex judgments relating to accounting items. Estimates and judgments are continually re-evaluated and are based on historical experience and other factors, including industry practices and expectations of future events that we believe to be reasonable under the circumstances. We have not changed our assumptions or estimates in the past and have not noticed any material errors regarding our assumptions or estimates. Under current circumstances, we do not expect that our assumptions or estimates are likely to change significantly in the future. We set forth below those accounting policies that we believe are of critical importance to us or involve the most significant estimates and judgments used in the preparation of our consolidated financial statements. For other material accounting policy information, estimates, assumptions and judgments, which are important for understanding our financial condition and results of operations, please refer to notes 2.3 and 3 to the Accountants’ Report in Appendix I to this document.

FINANCIAL INFORMATION

Material Accounting Policy Information

Research and Development Expenses

All research costs are charged to profit or loss as incurred.

Expenditure incurred on projects to develop new products is capitalized and deferred only when we can demonstrate the technical feasibility of completing the intangible asset so that it will be available for use or sale, its intention to complete and its ability to use or sell the asset, how the asset will generate future economic benefits, the availability of resources to complete the project and the ability to measure reliably the expenditure during the development. Product development expenditure which does not meet these criteria is expensed when incurred.

Fair Value Measurement

We measure financial assets at fair value through profit or loss (FVTPL) at fair value at the end of each reporting period. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by us. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

We use valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximizing the use of relevant observable inputs and minimizing the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the Accountants' Report in Appendix I to this document are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 – based on quoted prices (unadjusted) in active markets for identical assets or liabilities
- Level 2 – based on valuation techniques for which the lowest level input that is significant to the fair value measurement is observable, either directly or indirectly
- Level 3 – based on valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognized in the financial statements on a recurring basis, we determine whether transfers have occurred between levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Investments and Other Financial Assets

Initial Recognition and Measurement

We classify financial assets, at initial recognition, as subsequently measured at amortized cost and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and our business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which we have applied the practical expedient of not adjusting the effect of a significant financing component, we initially measure a financial asset at its fair value, plus in the case of a financial asset not at fair value through profit or loss, transaction costs.

FINANCIAL INFORMATION

In order for a financial asset to be classified and measured at amortized cost or fair value through other comprehensive income, it needs to give rise to cash flows that are solely payments of principal and interest ("SPPI") on the principal amount outstanding. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

Our business model for managing financial assets refers to how we manage our financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortized cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows, while financial assets classified and measured at fair value through other comprehensive income are held within a business model with the objective of both holding to collect contractual cash flows and selling. Financial assets which are not held within the aforementioned business models are classified and measured at fair value through profit or loss.

Purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace are recognized on the trade date, that is, the date that we commit to purchase or sell the asset.

Subsequent measurement

The subsequent measurement of financial assets depends on their classification as follows:

Financial assets at amortized cost (debt instruments)

Financial assets at amortized cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognized in profit or loss when the asset is derecognized, modified or impaired.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are carried in the statement of financial position at fair value with net changes in fair value recognized in profit or loss.

Financial Liabilities

Initial Recognition and Measurement

Financial liabilities are classified, at initial recognition, as loans and borrowings or payables, as appropriate.

All financial liabilities are recognized initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs. Redemption liabilities are initially recognized at the net present value of the redemption amount.

Our financial liabilities include trade and other payables, interest-bearing bank borrowings and redemption liabilities on owners' capital.

Subsequent Measurement

The subsequent measurement of financial liabilities depends on their classification as follows:

Financial liabilities at amortized cost (trade and other payables, amount due to a related party, borrowings and redemption liabilities on owners' capital)

After initial recognition, trade and other payables, amount due to a related party, interest-bearing bank borrowings and redemption liabilities on owners' capital are subsequently measured at amortized cost, using the effective interest rate method unless the effect of discounting would be immaterial, in which case they are stated at cost. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as through the effective interest rate amortization process.

Amortized cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortization is included in finance costs in profit or loss.

FINANCIAL INFORMATION

Redemption Liabilities on Owners' Capital

For the redeemable equity shares issued by us as detailed in note 23 to the Accountants' Report in Appendix I to this document, financial liabilities are recognized based on the net present value of the redemption amount and debited to equity. Changes of the net present value during the reporting period are recognized in profit or loss. When the redemption rights related to the redeemable owners' capital are terminated, redemption liabilities on owners' capital are extinguished and credited to equity.

Share-Based Payments

Employees (including directors) of our Group receive remuneration in the form of share-based payments, whereby employees render services in exchange for equity instruments ("equity-settled transactions"). The cost of equity-settled transactions with employees is measured by reference to the fair value at the date at which they are granted. The fair value is determined by an external valuer. Further details are set out in note 26 to the Accountants' Report in Appendix I to this document.

The cost of equity-settled transactions is recognized in employee benefit expense, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled. The cumulative expense recognized for equity-settled transactions at the end of each reporting period until the vesting date reflects the extent to which the vesting period has expired and our best estimate of the number of equity instruments that will ultimately vest. The charge or credit to profit or loss for a period represents the movement in the cumulative expense recognized as at the beginning and end of that period.

Service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of our best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other conditions attached to an award, but without an associated service requirement, are considered to be non-vesting conditions. Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions.

For awards that do not ultimately vest because non-market performance and/or service conditions have not been met, no expense is recognized. Where awards include a market or non-vesting condition, the transactions are treated as vesting irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied.

Where the terms of an equity-settled award are modified, as a minimum an expense is recognized as if the terms had not been modified, if the original terms of the award are met. In addition, an expense is recognized for any modification that increases the total fair value of the share-based payments, or is otherwise beneficial to the employee as measured at the date of modification. Where an equity-settled award is canceled, it is treated as if it had vested on the date of cancellation, and any expense not yet recognized for the award is recognized immediately.

Property, Plant and Equipment and Depreciation

Property, plant and equipment, other than construction in progress, are stated at cost less accumulated depreciation and any impairment losses. The cost of an item of property, plant and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use.

Expenditure incurred after items of property, plant and equipment have been put into operation, such as repairs and maintenance, is normally charged to profit or loss in the period in which it is incurred. In situations where the recognition criteria are satisfied, the expenditure for a major inspection is capitalized in the carrying amount of the asset as a replacement. Where significant parts of property, plant and equipment are required to be replaced at intervals, we recognize such parts as individual assets with specific useful lives and depreciate them accordingly.

FINANCIAL INFORMATION

Depreciation is calculated on the straight-line basis to write off the cost of each item of property, plant and equipment to its residual value over its estimated useful life. The principal annual rates used for this purpose are as follows:

Computer and office equipment . . .	19% to 31.67%
Machinery and equipment	19% to 31.67%
Motor vehicles	19% to 31.67%
Leasehold improvements	Over the shorter of remaining lease terms and estimated useful lives

Where parts of an item of property, plant and equipment have different useful lives, the cost of that item is allocated on a reasonable basis among the parts and each part is depreciated separately. Residual values, useful lives and the depreciation method are reviewed, and adjusted if appropriate, at least at each financial year end.

An item of property, plant and equipment including any significant part initially recognized is derecognized upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss on disposal or retirement recognized in profit or loss in the year the asset is derecognized is the difference between the net sales proceeds and the carrying amount of the relevant asset.

Construction in progress is stated at cost less any impairment losses, and is not depreciated. It is reclassified to the appropriate category of property and equipment when completed and ready for use.

Significant Accounting Judgments and Estimates

The preparation of our historical financial information and interim financial information requires management to make judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and their accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amounts of the assets or liabilities affected in the future.

Judgments

Research and Development Expenses

All research costs are charged to profit or loss as incurred. Costs incurred on each pipeline to develop new products are only capitalized and deferred in accordance with the accounting policy for research and development expenses in note 2.3 to the Accountants' Report in Appendix I to this document. Determining the amounts to be capitalized requires management to make judgments on the technical feasibility of existing pipelines to be successfully commercialized and bring economic benefits to our Group.

Deferred Tax Assets

Deferred tax assets are recognized for deductible temporary differences and unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilized. Significant management judgment is required to determine the amount of deferred tax assets that can be recognized, based upon the likely timing and level of future taxable profits together with future tax planning strategies.

Estimation Uncertainty

Impairment of Non-Financial Assets (Other Than Goodwill)

We assess whether there are any indicators of impairment for all non-financial assets (including right-of-use assets) at the end of each reporting period. The non-financial assets are tested for impairment when there are indicators that the carrying amounts may not be recoverable. An impairment exists when the carrying value of an asset or a cash-generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The calculation of the fair value less costs of disposal is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. When value in use calculations are undertaken, management must estimate the expected future cash flows from the asset or cash-generating unit and choose a suitable discount rate in order to calculate the present value of those cash flows.

FINANCIAL INFORMATION

Notwithstanding that we recorded a loss for the year end December 31, 2024 and the nine months ended September 30, 2025, no indicators of the impairment for non-financial assets are identified as of December 31, 2024 and September 30, 2025, since (i) the assets’ value have not declined significantly, (ii) the assets are not obsolete or physically damaged; and (iii) the R&D project progress remains in line with expectations.

Accrual of Research and Development Expenses

We rely on contract research organizations, clinical site management operators and clinical trial centers (collectively referred to as “Outsourced Service Providers”) to conduct, supervise, and monitor our Group’s ongoing clinical trials. Determining the amounts of research and development expenses incurred up to the end of the reporting period requires the management of our Group to estimate and measure the progress of receiving research and development services under the contracts with Outsourced Service Providers using inputs such as number of patient enrolments, time elapsed and milestones achieved.

Fair Value of Share-Based Payment Transactions

Estimating the fair value of share-based payment transactions requires the determination of the most appropriate valuation model, which depends on the terms and conditions of the grant. This estimate also requires the determination of the most appropriate inputs to the valuation model including the expected life of the share option, volatility and dividend yield and making assumptions about them.

For the measurement of the fair value of share-based payment transactions with employees at the grant date, we use the back solve from recent transaction method. The assumptions and models used for estimating fair value for share-based payment transactions are disclosed in note 26 to the Accountants’ Report in Appendix I to this document.

DESCRIPTION OF SELECTED COMPONENTS OF CONSOLIDATED STATEMENTS OF PROFIT OR LOSS AND OTHER COMPREHENSIVE INCOME

The selected financial information set out below has been extracted from our financial information set out in the Accountants’ Report in Appendix I to this document.

	For the year ended December 31, 2024	For the nine months ended September 30, 2024	2025
		(unaudited)	
		(RMB in thousands)	
Other income and gains	8,572	2,950	3,444
Administrative expenses	(15,183)	(10,148)	(10,252)
Research and development expenses . . .	(128,261)	(91,229)	(65,178)
Other expenses	(337)	(391)	(38)
Finance costs	(66,175)	(49,402)	(59,307)
Share of profits and losses of an associate	(151)	(111)	(164)
Loss before income tax	(201,535)	(148,331)	(131,495)
Income tax expense	—	—	—
Loss for the year/period	(201,535)	(148,331)	(131,495)

Revenue

We are a pre-revenue biotech company. We did not generate any revenue or incur any cost of revenue during the Track Record Period.

FINANCIAL INFORMATION

Other Income and Gains

Our other income primarily consists of (i) government grants, primarily representing subsidies received from local government authorities to compensate for expenditure arising from our research and clinical trial activities, (ii) interest income from banks, (iii) interest income from the loan to an employee, and (iv) interest income from the loan to a related party. Our other gains consist of (i) foreign exchange gains and (ii) gains on financial assets at FVTPL, primarily in relation to our wealth management products. The following table sets forth a breakdown of other income for the year/periods indicated.

	For the year ended December 31, 2024	For the nine months ended September 30,	
		2024	2025
		<i>(unaudited)</i>	
		<i>(RMB in thousands)</i>	
Other income			
Government grants	5,650	637	2,744
Bank interest income	1,283	1,159	218
Interest income from the loan to an employee	38	33	34
Interest income from the loan to a related party	143	116	116
Others ⁽¹⁾	500	500	36
Other Gains			
Foreign exchange gains, net	453	—	—
Gains on financial assets at FVTPL	505	505	296
Total	8,572	2,950	3,444

Note:

(1) Others primarily consisted of technical service fees from an associate.

Administrative Expenses

Our administrative expenses primarily consist of (i) salary and employee benefits for our administrative personnel, (ii) professional service fees, mainly in relation to marketing research and consulting, (iii) share-based payment expenses, (iv) general office expenses, primarily including property management fees and traveling and business expenses, and (v) depreciation and amortization in relation to our office renovation, leases and electronic equipment. The following table sets forth a breakdown of our administrative expenses for the year/periods indicated.

	For the year ended December 31, 2024	For the Nine months ended September 30,	
		2024	2025
		<i>(unaudited)</i>	
		<i>(RMB in thousands)</i>	
Employee benefits expenses	6,614	5,184	4,990
Professional service fees	3,056	1,160	2,470
Share-based payment	2,660	1,913	1,546
General office expenses	943	641	586
Depreciation and amortization	1,253	876	492
Others ⁽¹⁾	657	374	168
Total	15,183	10,148	10,252

Note:

(2) Others primarily consisted of bank charges and other taxes.

FINANCIAL INFORMATION

Research and Development Expenses

Our research and development expenses primarily consist of (i) outsourced research and development costs primarily in relation to the payments to CROs and CDMOs, (ii) salary and benefits expenses for our R&D personnel, (iii) depreciation and amortization, (iv) R&D material costs, and (v) share-based payments expenses. The following table sets forth a breakdown of our research and development expenses for the year/periods indicated.

	For the year ended December 31, 2024	For the Nine months ended September 30,	
		2024	2025
		<i>(unaudited)</i>	
		<i>(RMB in thousands)</i>	
Outsourced research and development costs	81,919	56,928	34,972
Employee benefits expenses	28,140	20,965	20,982
Depreciation and amortization	5,034	3,822	3,594
Material cost	2,341	1,650	1,066
Share-based payment expenses	6,215	4,917	789
Others ⁽¹⁾	4,612	2,947	3,776
Total	128,261	91,229	65,178

Note:

(1) Others primarily consisted of traveling and business expense and software expenses.

The following table sets forth a breakdown of our research and development expenses for our Core Products and other product candidates by development stage for the years/periods indicated.

	For the year ended December 31, 2024	For the Nine months ended September 30,	
		2024	2025
		<i>(unaudited)</i>	
		<i>(RMB in thousands)</i>	
Core Products	49,158	30,239	35,125
Phase II clinical trial	16,943	10,371	3,572
Phase III clinical trial	32,215	19,868	31,553
Other product candidates	79,103	60,990	30,053
Total	128,261	91,229	65,178

Our research and development expenses attributable to our Core Products were RMB49.2 million, RMB30.2 million and RMB35.1 million in 2024 and the nine months ended September 30, 2024 and 2025, respectively, accounting for 34.3%, 29.8% and 46.6% of our total operating expenses in the same periods, respectively. Our research and development expenses attributable to our Core Products increased by 16.2% from RMB30.2 million in the nine months ended September 30, 2024 to RMB35.1 million in the nine months ended September 30, 2025, primarily as we commenced Phase III clinical trial for VVN461 in 2025 and Phase III clinical trial for VVN001 in June 2024.

Other Expenses

Our other expenses primarily consist of costs in relation to technical service for one of our associates or loss on disposal of items of property, plant and equipment. During the Track Record Period, we incurred RMB337,000, RMB391,000 and RMB38,000 in 2024 and the nine months ended September 30, 2024 and 2025.

FINANCIAL INFORMATION

Finance Costs

Our finance costs primarily consist of (i) interest on redemption liabilities on owners’ capital in relation to the special rights granted to our Pre-[REDACTED] Investors for their Pre-[REDACTED] Investments, (ii) interest on lease liabilities, (iii) interest on interest-bearing bank borrowings, and (iv) Interest on borrowing from a related party. The following table sets forth a breakdown of finance costs for the year/periods indicated.

	For the year ended December 31, 2024	For the nine months ended September 30,	
		2024	2025
		(unaudited)	
		(RMB in thousands)	
Interest on redemption liabilities on owners’ capital	66,030	49,302	58,891
Interest on lease liabilities	120	100	94
Interest on interest-bearing bank borrowings	25	—	100
Interest on borrowing from a related party	—	—	222
Total	66,175	49,402	59,307

Share of Profits and Losses of an Associate

Our share of profits and losses of an associate comprises invest income in one of our associates, Jiangxi Shining Weimou Pharmaceutical Co., Ltd., which primarily engaged in the research and development of ophthalmic drugs. In 2024 and the nine months ended September 30, 2024 and 2025, we recognized share of losses of an associate of RMB151,000, RMB111,000 and RMB164,000.

Income Tax

We did not record any income tax expense during the Track Record Period.

In accordance with the PRC Corporate Income Tax Law, the statutory tax rate of our Company and our PRC subsidiary during the Track Record Period shall be 25%. According to applicable PRC laws and regulations, the enterprise income tax payable of our PRC subsidiary whose annual taxable income is less than RMB1.0 million is calculated as the product of 25% of its actual taxable amount and a reduced tax rate of 20%. Our subsidiary incorporated in Hong Kong was subject to Hong Kong profits tax at the statutory rate of 16.5% on any estimated assessable profits arising in Hong Kong during the Track Record Period. Our subsidiary incorporated in the State of Delaware is subject to federal tax at a rate of 21% and State of Delaware profits tax at a rate of 8.7%.

PERIOD TO PERIOD COMPARISON OF RESULTS OF OPERATIONS

Nine Months Ended September 30, 2025 Compared to Nine Months Ended September 30, 2024

Revenue

We did not have any revenue or cost of revenue in the nine months ended September 30, 2024 or 2025.

Other income and gains

Our other income and gains increased by 16.7% from RMB3.0 million in the nine months ended September 30, 2024 to RMB3.4 million in the nine months ended September 30, 2025, primarily due to an increase of RMB2.1 million in government grants received from the local government authorities in 2025 to compensate for the expenditure arising from our research and clinical trial activities, partially offset by a decrease of RMB0.9 million in bank interest income, primarily in relation to decreased cash and cash equivalent.

FINANCIAL INFORMATION

Administrative expenses

Our administrative expenses remained relatively stable at RMB10.1 million and RMB10.3 million in the nine months ended September 30, 2024 and 2025, respectively. Specifically, we experienced an increase of RMB1.3 million in our professional service fees mainly in relation to marketing research and consultation activities, which was partially offset by (i) a decrease of RMB0.4 million in our share-based payments, mainly as the lockup period for the majority of participants of our share-based payment plan ended before September 30, 2025, and (ii) a decrease of RMB0.4 million in depreciation and amortization mainly as the depreciation of our leasehold improvements were fully completed in 2024.

Research and development expenses

Our research and development expenses decreased by 28.6% from RMB91.2 million in the nine months ended September 30, 2024 to RMB65.2 million in the nine months ended September 30, 2025, primarily due to a decrease of RMB22.0 million in outsourced research and development costs mainly as we completed a Phase II clinical trial of VVN461 in the United States in October 2024 and completed a Phase I clinical trial of VVN1901 in September 2024.

Other expenses

Our other expenses decreased by 90.3% from RMB391,000 in the nine months ended September 30, 2024 to RMB38,000 in the nine months ended September 30, 2025, primarily due to a decrease of RMB336,000 in costs in relation to technical services for one of our associates.

Finance costs

Our finance costs increased by 20.0% from RMB49.4 million in the nine months ended September 30, 2024 to RMB59.3 million in the nine months ended September 30, 2025, primarily due to an increase of RMB9.6 million in interest on redemption liabilities on owners' capital in relation to our Pre-[REDACTED] investments.

Share of profits and losses of an associate

Our share of losses of an associate increased by 47.7% from RMB0.1 million in the nine months ended September 30, 2024 to RMB0.2 million in the nine months ended September 30, 2025, primarily due to the loss incurred by our associate mainly as the associate was still at an early R&D stage.

Loss for the period

As a result of the foregoing, we recorded loss for the period of RMB148.3 million and RMB131.5 million in the nine months ended September 30, 2024 and 2025, respectively.

DESCRIPTION OF CERTAIN CONSOLIDATED STATEMENTS OF FINANCIAL POSITIONS ITEMS

The following table sets forth a summary of our consolidated statements of financial position as of the dates indicated.

	As of December 31, 2024	As of September 30, 2025
		(unaudited)
	(RMB in thousands)	
Non-current assets		
Property, plant and equipment	9,523	8,225
Right-of-use assets	4,003	2,948
Intangible assets	24	–
Investments in associates	1,099	935
Prepayments, other receivables and other assets . .	11,213	13,686
Total non-current assets	25,862	25,794

FINANCIAL INFORMATION

	As of December 31, 2024	As of September 30, 2025
		(unaudited)
		(RMB in thousands)
Current assets		
Prepayments, other receivables and other assets . .	15,185	10,498
Financial assets at fair value through profit or loss (“FVTPL”)	–	80,240
Amounts due from related parties	4,946	4,562
Cash and cash equivalents	50,783	35,766
Total current assets	70,914	131,066

Net liabilities	(531,366)	(662,989)

Prepayments, Other Receivables and Other Assets

Our prepayments and other receivables during the Track Record Period comprised of (i) rental and other deposits, relating to our leased properties, (ii) advances of loans to an employee, (iii) value added tax recoverable, (iv) prepayments for purchase of items of property, plant and equipment, (v) prepayments for research and development services, (vi) other receivables, and (vii) other prepayments, primarily include prepaid property management fees and parking fees. The following table sets forth the breakdown of our prepayments, other receivables and other assets as of the dates indicated.

	As of December 31, 2024	As of September 30, 2025
		(unaudited)
		(RMB in thousands)
Non-current portion		
Rental and other deposits	276	436
Value-added tax recoverable	10,759	13,140
Prepayments for purchase of items of property, plant and equipment	178	110
	11,213	13,686
Current portion		
Prepayments for research and development services	10,704	5,856
Other receivables	771	585
Other prepayments	50	405
Advances of loans to an employee	3,660	3,652
	15,185	10,498
Total	26,398	24,184

FINANCIAL INFORMATION

Our prepayments, other receivables decreased by 8.4% from RMB26.4 million as of December 31, 2024 to RMB24.2 million as of September 30, 2025, primarily due to a decrease in prepayment for research and development services mainly as a result of the completion of the Phase II clinical trial of VVN461 for the treatment of NIAU in China in early 2025 and the continuous advancement of the Phase III clinical trial for VVN001 in 2025. The decrease was partially offset by an increase in value-added tax recoverable, primarily due to continuous clinical and preclinical research activities.

During the Track Record Period, we recorded advances of loans to an employee. We entered into a written loan agreement with this employee. All of the amount due from the employee were unsecured, bearing interest rate of 1.26% per annum with no fixed repayment term and non-trade in nature. These balances will be settled before Listing. As confirmed by our PRC Legal Advisers, our loan agreement with such employee is binding and valid and the provisions therein do not violate the Provisions of the Supreme People’s Court on Several Issues Concerning the Application of Law in the Trial of Private Lending Cases (《最高人民法院關於審理民間借貸案件適用法律若干問題的規定》).

As of January 31, 2026, RMB3.8 million, or 15.9%, of our other receivables and prepayments as of September 30, 2025 had been subsequently settled.

Trade and Other Payables

Our trade and other payables consisted of (i) trade payables for raw material and R&D service fee, (ii) accrued research and development expenses, (iii) payables for property, plant and equipment, (iv) payroll payables, (v) other tax payables, and (vi) others. The following table sets forth the breakdown of our trade and other payables as of the dates indicated.

	As of December 31, 2024	As of September 30, 2025
		(unaudited)
		(RMB in thousands)
Trade payables	221	90
Accrued research and development expenses	26,689	24,229
Payables for property, plant and equipment	43	455
Payroll payables	4,192	3,265
Other taxes payables	259	225
Others	4,811	4,416
Total	<u>36,215</u>	<u>32,680</u>

Our trade and other payables decreased by 9.8% from RMB36.2 million as of December 31, 2024 to RMB32.7 million as of September 30, 2025, primarily due to (i) a decrease of RMB2.5 million in accrued research and development expenses and (ii) a decrease of RMB0.1 million in trade payables. Both decreases were primarily due to the payment schedule for our clinical and preclinical service expenses.

During the Track Record Period, our suppliers typically granted us a credit period of three months. As of December 31, 2024 and September 30, 2025, all of our trade payables were due within three months.

As of January 31, 2026, RMB14.4 million, or 44.2%, of our trade and other payables as of September 30, 2025 had been subsequently settled.

FINANCIAL INFORMATION

Amounts Due from Related Parties

Our amounts due from related parties represented (i) loans to a director, and (ii) receivables for services provided to our associate. The following table sets forth the breakdown of our amounts due from related parties as of the dates indicated.

	As of December 31, 2024	As of September 30, 2025
	(RMB in thousands) (unaudited)	
Amounts due from:		
A director	4,446	4,562
An associate	500	—
Total	4,946	4,562

We had amounts due from a director of RMB4.4 million and RMB4.6 million as of December 31, 2024 and September 30, 2025, respectively. We entered into a written loan agreement with the Director. All of the amounts due from a director were unsecured, bearing interest rate of 3.65% per annum with no fixed repayment term and non-trade in nature. These balances will be settled before Listing. As confirmed by our PRC Legal Advisers, our loan agreement with the Director is binding and valid and the provisions therein do not violate the Provisions of the Supreme People’s Court on Several Issues Concerning the Application of Law in the Trial of Private Lending Cases (《最高人民法院關於審理民間借貸案件適用法律若干問題的規定》).

We had amounts due from an associate of RMB500,000 as of December 31, 2024. The amounts due from an associate were service fees that were trade in nature. These balances were settled in the first half of 2025.

Financial Assets at FVTPL

Our financial assets at FVTPL represented contracts of wealth management products with banks. The returns of the wealth management products are determined by reference to the performance of the underlying instruments in the market, therefore they are recognized as financial assets at FVTPL. Our financial assets at FVTPL were nil as of December 31, 2024 and RMB80.2 million as of September 30, 2025, primarily as we had made full redemption of wealth management products as of December 31, 2024 and purchased new wealth management products in 2025.

We purchase wealth management products as a supplemental means to improve utilization of our cash on hand on a short-term basis. We believe that investment in low-risk financial products helps us make better use of our cash, expand our source of income while ensuring sufficient cash flow for business operation or capital expenditures. The purchases of wealth management products are carefully reviewed and assessed by our finance department and are subject to the approval of our senior management team. Additionally, we have established a set of risk management and capital preservation investment policy, and have implemented a series of internal control measures regarding our investment in wealth management products. These policies and measures include:

- we make investment decisions after thoroughly considering a number of factors, including but not limited to the macro-economic environment, general market conditions, risk control and credit of issuing financial institutions, our working capital conditions and the expected returns;
- we only purchase low-risk wealth management products issued by qualified financial institutions; and
- after making an investment, we closely monitor its performance and fair value on a regular basis.

FINANCIAL INFORMATION

Redemption Liabilities on Owners’ Capital

Our redemption liabilities on owners’ capital represent redeemable interests held by our Pre-[REDACTED] investors. Our redemption liabilities on owners’ capital increased by 33.3% from RMB582.7 million as of December 31, 2024 to RMB776.8 million as of September 30, 2025, primarily in relation to our Series D2+ Financing which was partially settled in the first nine months of 2025.

LIQUIDITY AND CAPITAL RESOURCES

Overview

Our uses of cash primarily relate to the research and development of our product candidates and the purchase of equipment and machinery. During the Track Record Period, we primarily funded our working capital requirement through equity financing, bank borrowings and cash generated from our operations. Going forward, we believe our liquidity requirements will be satisfied by funds from a combination of cash from operations, cash and cash equivalents, borrowings and net proceeds from the [REDACTED]. As of January 31, 2026, our cash and cash equivalents amounted to RMB67.7 million and unutilized bank facilities of RMB15.0 million.

Net Current Assets/(Liabilities)

	As of December 31, 2024	As of September 30, 2025	As of January 31, 2026
		(unaudited)	
		(RMB in thousands)	
Current assets			
Prepayments, other receivables and other assets	15,185	10,498	16,487
Financial assets at FVTPL	–	80,240	20,048
Debt investments at fair value through other comprehensive income (“FVOCI”)	–	–	30,112
Amount due from related parties	4,946	4,562	4,614
Cash and cash equivalents	50,783	35,766	67,710
Total current assets	70,914	131,066	138,971
Current liabilities

Total current liabilities	43,238	39,804	55,579
Net current assets	27,676	91,262	83,392

Our net current assets decreased from RMB91.3 million as of September 30, 2025 to RMB83.4 million as of January 31, 2026, primarily due to an increase in trade and other payables in relation to listing expenses for the [REDACTED].

Our net current assets increased from RMB27.7 million as of December 31, 2024 to RMB91.3 million as of September 30, 2025, primarily due to an increase of RMB80.2 million in financial assets at FVTPL mainly as we had made full redemption of wealth management product as of December 31, 2024 and purchased new wealth management products in 2025 with cash received from our Series D2+ financing, partially offset by a decrease in cash and cash equivalent of RMB15.0 million mainly as a result of cash outflow to support our operating activities and purchase of wealth management products.

FINANCIAL INFORMATION

Cash Operating Costs

The following table provides information regarding our cash operating costs, in accrual basis, for the year/periods indicated.

	For the year ended December 31, 2024	For the nine months ended September 30,	
		2024	2025
		<i>(unaudited)</i>	
		<i>(RMB in thousands)</i>	
R&D expenses			
Research and Development Costs for Core Product Candidates			
– Staff compensation	9,051	6,768	7,457
– Technical service fee	33,269	32,141	19,707
– Registration fee	556	329	106
– Consulting fees	557	268	783
– Raw material expenses	92	3	167
– Others	771	528	548
R&D costs for our other product candidates			
– Staff compensation	19,659	15,286	14,281
– Technical service fee	39,439	34,714	13,013
– Registration fee	639	549	710
– Consulting fees	415	71	379
– Raw material expenses	2,249	1,647	899
– Others	1,674	1,202	1,249
Total R&D expenses	108,371	93,506	59,299

Net cash generated from/(used in) financing activities	12,392	(2,087)	130,422
Net decrease in cash and cash equivalents	(44,468)	(41,072)	(14,895)
Cash and cash equivalents at beginning of the year/period	94,798	94,798	50,783
Effect of foreign exchange rate changes, net	453	(312)	(122)
Cash and cash equivalents at end of the year/period	50,783	53,414	35,766

Net Cash Used in Operating Activities

For the nine months ended September 30, 2025, our net cash used in operating activities was RMB65.7 million, which was primarily attributable to our loss before taxation of RMB131.5 million, as positively adjusted by (i) finance cost of RMB59.3 million, (ii) depreciation of property, plant and equipment of RMB2.3 million, and (iii) decrease in prepayments, other receivables and other assets of RMB2.1 million and negatively adjusted by decrease in trade and other payables of RMB3.9 million.

For the year ended December 31, 2024, our net cash used in operating activities was RMB121.0 million, which was primarily attributable to our loss before taxation of RMB201.5 million, as positively adjusted by (i) finance cost of RMB66.2 million, (ii) increase in trade and other payables of RMB8.5 million, (iii) share-based payment compensation of RMB8.9 million, (iv) depreciation of property, plant and equipment of RMB3.8 million, and (v) depreciation of right-of-use assets of RMB2.4 million and negatively adjusted by increase in prepayments, other receivables and other assets of RMB6.6 million.

Net Cash from/(Used in) Investing Activities

For the nine months ended September 30, 2025, net cash used in investing activities was RMB79.7 million, primarily due to placement of financial assets at FVTPL of RMB120.0 million, partially offset by withdrawal of financial assets at FVTPL of RMB40.1 million.

For the year ended December 31, 2024, net cash generated from investing activities was RMB64.2 million, primarily due to withdrawal of financial assets at FVTPL of RMB120.6 million, partially offset by placement of financial assets at FVTPL of RMB70.0 million.

Net Cash Generated from/(Used in) Financing Activities

For the nine months ended September 30, 2025, net cash generated from financing activities was RMB130.4 million, primarily due to capital injection from shareholders of RMB135.0 million.

For the year ended December 31, 2024, net cash generated from financing activities was RMB12.4 million, primarily due to capital injection from shareholders of RMB10.0 million.

FINANCIAL INFORMATION

Interest-Bearing Bank Borrowings

The following table sets forth our interest-bearing bank borrowings as of the dates indicated. As of December 31, 2024, September 30, 2025 and January 31, 2026, all of such borrowings were due within one year, with an effective interest rate from 3.0% to 2.9% per annum.

	As of December 31, 2024	As of September 30, 2025	As of January 31, 2026
	(unaudited) (RMB in thousands)		
Borrowings from banks - unsecured and unguaranteed	5,005	5,003	5,003
Total	<u>5,005</u>	<u>5,003</u>	<u>5,003</u>

During the Track Record Period, we secured short-term bank borrowings from certain commercial banks in the PRC to cover research and development costs.

Our bank borrowings contain standard terms, conditions and covenants that are customary for commercial bank loans. Our Directors confirm that we did not experience any difficulty in obtaining bank loans and other borrowings, default in payments of bank loans and other borrowings, or breach of covenants during the Track Record Period and up to the Latest Practicable Date.

Lease Liabilities

Our lease liabilities are in relation to properties that we lease for daily business operations and R&D functions. As of December 31, 2024, September 30, 2025 and January 31, 2026, our lease liabilities amounted to RMB4.2 million, RMB2.9 million and RMB2.2 million, respectively.

Our lease liabilities decreased from RMB4.2 million as of December 31, 2024 to RMB2.9 million as of September 30, 2025, primarily due to the settlement of lease payments during the third quarter of 2025. Our lease liabilities further decreased to RMB2.2 million as of January 31, 2026, primarily due to the payment for relevant leases.

RELATED PARTY TRANSACTIONS

During the Track Record Period, we entered into a number of related party transactions. In 2024, we provided services to one of our associates and extended loans to one of our Director. See note 29 to the Accountant’s Report in Appendix I to this document.

Our Directors believe that such related party transactions were conducted on an arm’s-length basis, and they would not distort our results of operations or cause our historical results to become not reflective of our future performance.

CAPITAL EXPENDITURES

Our capital expenditures during the Track Record Period included purchase of property, plant and equipment. Our capital expenditures amounted to RMB3.0 million, RMB2.1 million and RMB0.6 million in 2024 and the nine months ended September 30, 2024 and 2025, respectively.

FINANCIAL INFORMATION

CAPITAL COMMITMENTS

As of December 31, 2024 and September 30, 2025, we did not have any capital commitments contracted but not yet provided for.

CONTINGENT LIABILITIES

As of December 31, 2024 and September 30, 2025, we did not have any contingent liabilities. As of the Latest Practicable Date there had been no material changes to our contingent liabilities.

OFF-BALANCE SHEET COMMITMENTS AND ARRANGEMENTS

As of the Latest Practicable Date, we had not entered into any off-balance sheet arrangements.

KEY FINANCIAL RATIO

The following table sets forth our key financial ratio as of the dates indicated.

	As of December 31, 2024	As of September 30, 2025
Current ratio ⁽¹⁾	1.64	3.29

Note:

(1) Current ratio equals current assets divided by current liabilities as of the same date.

QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT FINANCIAL RISK

We are exposed to market, interest rate, credit and liquidity risks arises in the normal course of our business. We manage and monitor these exposures to ensure appropriate measures are implemented on a timely and effective manner. See note 32 to the Accountants’ Report in Appendix I to this document for a detailed description of our financial risk management.

Credit Risk

We trade only with recognized and creditworthy third parties. It is our policy that all customers who wish to trade on credit terms are subject to credit verification procedures. In addition, receivable balances are monitored on an ongoing basis and our exposure to bad debts is not significant. See note 32 to the Accountants’ Report in Appendix I to this document for credit quality and the maximum exposure to credit risk.

Foreign Currency Risk

We have transactional currency exposures. Such exposures arise from financing activities by subsidiaries in currencies other than the subsidiaries’ functional currencies. See note 32 to the Accountants’ Report in Appendix I to this document for a sensitivity analysis of our foreign currency risk.

Liquidity Risk

We monitor and maintain a level of cash and cash equivalents deemed adequate by our management to finance the operations and mitigate the effects of fluctuations in cash flows. See note 32 to the Accountants’ Report in Appendix I to this document for a maturity profile of our financial liabilities.

FINANCIAL INFORMATION

Capital Management

The primary objectives of our capital management are to safeguard our abilities to continue as a going concern and to maintain healthy capital ratios in order to support its business and maximize shareholders’ value.

We manage our capital structure and make adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, we may return capital to shareholders or issue new shares. We are not subject to any externally imposed capital requirements. No changes were made in the objectives, policies or processes for managing capital during the Track Record Period.

DIVIDEND POLICY

No dividend has been proposed, paid or declared by our Company since its incorporation. We do not have any plan to declare or pay any dividends in the foreseeable future. The determination of whether to pay a dividend and in which amount is based on factors the Board may deem relevant. Any dividend distribution will also be subject to the approval of the Shareholders in the Shareholder’s meeting. Under the PRC law and the Articles of Association, the general reserve requires annual appropriations of 10% of after-tax profits at each year-end until the balance reaches 50% of the relevant PRC entity’s registered capital. In view of our accumulated losses, as advised by our PRC Legal Advisers, according to the relevant PRC laws and regulations and the Articles of Association, we shall not declare or pay dividend until the accumulated losses are covered by our after-tax profits and sufficient statutory common reserve are drawn in accordance with the relevant laws and regulations.

DISTRIBUTABLE RESERVES

As of September 30, 2025, we did not have any distributable reserves available for distribution to our shareholders.

[REDACTED]

Assuming the [REDACTED] is not exercised and an [REDACTED] of HK\$[REDACTED] per [REDACTED] (which is the mid-point of the [REDACTED] range), we expect to incur approximately HK\$[REDACTED] million of [REDACTED] (including the aggregate [REDACTED] and fees, professional fees and other expenses relating to the [REDACTED]), including (i) [REDACTED] expenses (including [REDACTED] and other expenses of approximately HK\$[REDACTED]) and (ii) non [REDACTED] of approximately HK\$[REDACTED], comprising (a) fees and expenses of legal advisers and accountants of approximately HK\$[REDACTED] and (b) other fees and expenses of approximately HK\$[REDACTED], accounting for approximately [REDACTED]% of the gross [REDACTED] from the [REDACTED]. Approximately HK\$[REDACTED] of our [REDACTED] is expected to be charged to our consolidated statements of profit or loss and approximately HK\$[REDACTED] is expected to be deducted from equity upon Listing. The [REDACTED] above are the latest practicable estimate for reference only, and the actual amount may differ from this estimate.

DISCLOSURE UNDER RULES 13.13 TO 13.19 OF THE LISTING RULES

Our Directors confirm that, as of the Latest Practicable Date, there was no circumstance that would give rise to a disclosure requirement under Rules 13.13 to 13.19 of the Listing Rules.

UNAUDITED PRO FORMA STATEMENT OF ADJUSTED NET TANGIBLE LIABILITIES

The following unaudited *pro forma* statement of adjusted consolidated net tangible assets of the Group prepared in accordance with Rule 4.29 of the Rules Governing the Listing of Securities on the Stock Exchange of Hong Kong Limited and with reference to Accounting Guideline 7 *Preparation of Pro Forma Financial Information for Inclusion in Investment Circulars* issued by the Hong Kong Institute of Certified Public Accountants is to illustrate the effect of the [REDACTED] on the consolidated net tangible assets of the Group attributable to owners of the parent as at September 30, 2025 as if the [REDACTED] had taken place on that date.

FINANCIAL INFORMATION

The unaudited *pro forma* statement of adjusted consolidated net tangible assets of the Group has been prepared for illustrative purposes only and, because of its hypothetical nature, it may not provide a true picture of the consolidated net tangible assets attributable to owners of the parent had the [REDACTED] been completed as at September 30, 2025 or at any future date.

	Unaudited consolidated net tangible assets of the Group attributable to owners of the parent as at September 30, 2025	Estimated [REDACTED] from the [REDACTED]	Estimated impact related to the termination of redemption right on ordinary shares upon Listing	Unaudited <i>pro forma</i> adjusted consolidated net tangible assets attributable to owners of the parent as at September 30, 2025	Unaudited <i>pro forma</i> adjusted consolidated net tangible assets attributable to owners of the parent per share as at September 30, 2025	
	RMB'000 (Note 1)	RMB'000 (Note 2)	RMB'000 (Note 3)	RMB'000	RMB (Note 4)	HK\$ (Note 5)
Based on an [REDACTED] of HK\$[REDACTED] per H Share . . .	(662,989)	[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED]
Based on an [REDACTED] of HK\$[REDACTED] per H Share . . .	(662,989)	[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED]

Notes:

- (1) The unaudited consolidated net tangible assets of the Group attributable to owners of the parent as at September 30, 2025 is equal to the unaudited net assets attributable to owners of the parent as of September 30, 2025 of RMB(662,989,000) set out in the Accountants' Report in Appendix I to this document.
- (2) The estimated [REDACTED] from the [REDACTED] are based on an [REDACTED] of HK\$ [REDACTED] and HK\$[REDACTED] per H Share, being the low end and high end of the [REDACTED] range, respectively, after deduction of the [REDACTED] and other related expenses payable by the Company and does not take into account any Shares which may be issued upon the exercise of the [REDACTED]. The estimated [REDACTED] from the [REDACTED] are converted into RMB at an exchange rate of RMB1.00 to HK\$[REDACTED].
- (3) For the purpose of the unaudited *pro forma* information, considering the estimated impact related to the termination of redemption rights on the ordinary shares upon Listing, the redemption liabilities on owners' capital amounting to RMB[REDACTED] will be derecognised and accordingly increase the unaudited *pro forma* adjusted consolidated net tangible assets of the Group as at 30 September 2025 by RMB[REDACTED].
- (4) The unaudited *pro forma* adjusted consolidated net tangible assets per Share is arrived at after adjustments referred in note 3 above and on the basis of [REDACTED] Shares are in issue, assuming that the conversion into a joint stock company and the [REDACTED] have been completed on September 30, 2025 but does not take into account any Shares which may be sold pursuant to the exercise of the [REDACTED].
- (5) For the purpose of this unaudited *pro forma* statement of adjusted net tangible assets, the balances stated in RMB are converted into HK\$ at an exchange rate of RMB1.00 to HK\$[1.1228].
- (6) No adjustment has been made to the unaudited *pro forma* adjusted consolidated net tangible assets to reflect any trading results or other transactions of the Group entered into subsequent to September 30, 2025.

NO MATERIAL ADVERSE CHANGE

The Directors confirm that, up to the date of this document, there have been no material adverse changes in our financial, operational, or trading position or prospects since September 30, 2025, being the date of the latest reporting period reported on in the Accountants' Report in Appendix I to this document.

FUTURE PLANS AND USE OF [REDACTED]

FUTURE PLANS

For details of our future plans, see “Business—Our Strategies.”

USE OF [REDACTED]

We estimate that we will receive [REDACTED] of approximately HK\$[REDACTED] (assuming the [REDACTED] is not exercised) after deducting the [REDACTED] and expenses payable by us in the [REDACTED] assuming an [REDACTED] of HK\$[REDACTED] per [REDACTED], being the mid-point of the indicative [REDACTED] range of HK\$[REDACTED] to HK\$[REDACTED] per [REDACTED] set out in this document. We intend to use the [REDACTED] from the [REDACTED] for the following purposes.

- (i) approximately [70.0]%, or HK\$[REDACTED], will be allocated for the development and registration of our Core Products, VVN461(HD) and VVN001, of which:
 - (a) approximately [60.0]%, or HK\$[REDACTED], will be allocated for the development of our VVN461(HD), of which:
 - (1) approximately [25.0]%, or HK\$[REDACTED], will be allocated to the clinical development of VVN461(HD) for the treatment of NIAU in the United States. We plan to commence a Phase III clinical trial in the United States by the end of 2026 to evaluate the efficacy and safety of VVN461(HD) in patients with NIAU;
 - (2) approximately [12.5]%, or HK\$[REDACTED], will be allocated to the clinical development and registration of VVN461(HD) for the treatment of NIAU in China. We commenced a Phase III clinical trial in China in November 2025 to evaluate the efficacy and safety of VVN461(HD) in patients with NIAU. We expect to complete such trial in the first half of 2027;
 - (3) approximately [10.0]%, or HK\$[REDACTED], will be allocated to the clinical development of VVN461(HD) for the treatment of SS-DED in China. We plan to commence a Phase II clinical trial in China by the end of 2026 to evaluate the efficacy and safety of VVN461 in subjects with SS-DED; and
 - (4) approximately [12.5]%, or HK\$[REDACTED], will be allocated to the development of VVN461(HD) for other indications, including VKC, scleritis and oGVHD. We plan to submit IND applications to the NMPA by the end of 2026 for directly commencing a Phase II clinical trial in patients with VKC and commence the Phase II clinical trial after the respective IND approval. We plan to collaborate with academic research institutions to commence investigator-initiated trials for the treatment of scleritis and oGVHD by the end of 2026. After completion of such investigator-initiated trials, we plan to submit IND amendments to the FDA for directly initiating registration-enabling pivotal clinical trials in the United States for these indications by leveraging the investigator-initiated trial results;
 - (b) approximately [10.0]%, or HK\$[REDACTED], will be allocated for the clinical development and registration of our VVN001. We commenced a Phase III clinical trial in China in June 2024 to evaluate the efficacy and safety of VVN001 in patients with moderate-to-severe DED. We expect to complete such trial by the end of 2026;

FUTURE PLANS AND USE OF [REDACTED]

- (ii) approximately [15.0]%, or HK\$[REDACTED], will be allocated for the development of other product candidates, of which:
 - (a) approximately [5.0]%, or HK\$[REDACTED], will be allocated for the clinical development of our VVN432. We commenced a Phase I clinical trial in China in December 2025 to evaluate the safety, tolerability and PK profile of VVN432 in healthy adults. We expect to complete such trial in the third quarter of 2026 and subsequently proceed with a Phase II clinical trial;
 - (b) approximately [5.0]%, or HK\$[REDACTED], will be allocated for the clinical development of our VVN1901. We commenced a Phase II clinical trial in China in July 2025 to evaluate the efficacy and safety of VVN1901 in patients with moderate-to-severe NK. We expect to complete such trial in 2028; and
 - (c) approximately [5.0]%, or HK\$[REDACTED], will be allocated for the research and development of our remaining product candidates, including VVN461 (LD), VVN481, VVN1888 and VVN611;
- (iii) approximately [5.0]%, or HK\$[REDACTED], will be used for the establishment of an in-house commercialization team and marketing activities. We plan to establish a commercialization team of approximately ten members with strong medical and/or business development expertise; and
- (iv) approximately [10.0]%, or HK\$[REDACTED], will be allocated to working capital and other general corporate purposes.

The above allocation of the [REDACTED] will be adjusted on a *pro rata* basis in the event that the [REDACTED] is fixed at a higher or lower level compared to the mid-point of the indicative [REDACTED] range. If the [REDACTED] is set at HK\$[REDACTED] per Share, being the high end of the indicative [REDACTED] range, the [REDACTED] from the [REDACTED] will increase by approximately HK\$[REDACTED]. If the [REDACTED] is set at HK\$[REDACTED] per Share, being the low end of the indicative [REDACTED] range, the [REDACTED] from the [REDACTED] will decrease by approximately HK\$[REDACTED].

The additional [REDACTED] that we would receive if the [REDACTED] was exercised in full would be HK\$[REDACTED] (assuming an [REDACTED] of HK\$[REDACTED] per Share, being the midpoint of the indicative [REDACTED] range). We intend to apply the additional [REDACTED] to the above uses on a *pro rata* basis.

To the extent that the [REDACTED] of the [REDACTED] are not immediately applied to the above purposes or if we are unable to effect any part of our future development plans as intended, we may hold such funds in short-term interest-bearing accounts at licensed commercial banks and/or other authorized financial institutions (as defined under the Securities and Futures Ordinance or applicable laws and regulations in other jurisdictions. We will make an appropriate announcement if there is any change to the above proposed use of [REDACTED].

ACCOUNTANTS’ REPORT

The following is the text of a report received from the independent reporting accountants, Ernst & Young, Certified Public Accountants, Hong Kong, prepared for the purpose of incorporation in this Document.

[To insert the firm’s letterhead]

ACCOUNTANTS’ REPORT ON HISTORICAL FINANCIAL INFORMATION TO THE DIRECTORS OF VIVAVISION BIOTECH (ZHEJIANG) CO., LTD. AND CHINA INTERNATIONAL CAPITAL CORPORATION HONG KONG SECURITIES LIMITED

Introduction

We report on the historical financial information of VivaVision Biotech (Zhejiang) Co., Ltd. (the “Company”) and its subsidiaries (together, the “Group”) set out on pages I-[●] to I-[●], which comprises the consolidated statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows of the Group for the year ended 31 December 2024 (the “Relevant Period”), and the consolidated statement of financial position of the Group and the statement of financial position of the Company as at 31 December 2024 and material accounting policy information and other explanatory information (together, the “Historical Financial Information”). The Historical Financial Information set out on pages I-[●] to I-[●] forms an integral part of this report, which has been prepared for inclusion in the document of the Company dated [Date] (the “Document”) in connection with the initial listing of the shares of the Company on the Main Board of The Stock Exchange of Hong Kong Limited (the “Stock Exchange”).

Directors’ responsibility for the Historical Financial Information

The directors of the Company are responsible for the preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information, and for such internal control as the directors determine is necessary to enable the preparation of the Historical Financial Information that is free from material misstatement, whether due to fraud or error.

Reporting accountants’ responsibility

Our responsibility is to express an opinion on the Historical Financial Information and to report our opinion to you. We conducted our work in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 200 *Accountants’ Reports on Historical Financial Information in Investment Circulars* as issued by the Hong Kong Institute of Certified Public Accountants (the “HKICPA”). This standard requires that we comply with ethical standards and plan and perform our work to obtain reasonable assurance about whether the Historical Financial Information is free from material misstatement.

APPENDIX I

ACCOUNTANTS’ REPORT

Our work involved performing procedures to obtain evidence about the amounts and disclosures in the Historical Financial Information. The procedures selected depend on the reporting accountants’ judgement, including the assessment of risks of material misstatement of the Historical Financial Information, whether due to fraud or error. In making those risk assessments, the reporting accountants consider internal control relevant to the entity’s preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information, in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity’s internal control. Our work also included evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the Historical Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion

In our opinion, the Historical Financial Information gives, for the purposes of the accountants’ report, a true and fair view of the financial position of the Group and the Company as at 31 December 2024 and the financial performance and cash flows of the Group for the Relevant Period in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information.

Review of interim financial information

We have reviewed the interim financial information of the Group which comprises the consolidated statements of profit or loss and other comprehensive income, statements of changes in equity and statements of cash flows for the nine months ended 30 September 2024 and 2025, and the consolidated statement of financial position of the Group and the statement of financial position of the Company as at 30 September 2025 and other explanatory information (the “Interim Financial Information”). The directors of the Company are responsible for the preparation of the Interim Financial Information in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information. Our responsibility is to express a conclusion on the Interim Financial Information based on our review. We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 *Review of Interim Financial Information Performed by the Independent Auditor of the Entity* as issued by the HKICPA. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion. Based on our review, nothing has come to our attention that causes us to believe that the Interim Financial Information, for the purposes of the accountants’ report, is not prepared, in all material respects, in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information.

APPENDIX I

ACCOUNTANTS’ REPORT

Report on matters under the Rules Governing the Listing of Securities on the Stock Exchange and the Companies (Winding Up and Miscellaneous Provisions) Ordinance

Adjustments

In preparing the Historical Financial Information, no adjustments to the Underlying Financial Statements as defined on page I-[●] have been made.

Dividends

We refer to note 11 to the Historical Financial Information which states that no dividends have been paid by the Company in respect of the Relevant Period and the nine months ended 30 September 2024 and 2025.

APPENDIX I

ACCOUNTANTS’ REPORT

I. HISTORICAL FINANCIAL INFORMATION AND INTERIM FINANCIAL INFORMATION

Preparation of Historical Financial Information and Interim Financial Information

Set out below is the Historical Financial Information and Interim Financial Information which form an integral part of this accountants’ report.

The consolidated financial statements of the Group for the Relevant Period, on which the Historical Financial Information is based, were audited by Ernst & Young in accordance with Hong Kong Standards on Auditing as issued by the HKICPA (the “Underlying Financial Statements”). The Interim Financial Information in this report was prepared based on management accounts of the Group for the nine months ended 30 September 2024 and 2025.

The Historical Financial Information and Interim Financial Information are presented in Renminbi (“RMB”) and all values are rounded to the nearest thousand (RMB’000) except when otherwise indicated.

ACCOUNTANTS’ REPORT

II. NOTES TO THE HISTORICAL FINANCIAL INFORMATION

1. CORPORATE AND GROUP INFORMATION

VivaVision Biotech (Zhejiang) Co., Ltd. (the “Company”) was established as a limited liability company in the People’s Republic of China (the “PRC”) on 22 September 2016 and was converted into a joint-stock company with limited liability on 30 January 2026. The registered office of the Company is located at Room 4020, Building B, North Zone, Gene Valley, Ouhai District, Wenzhou City, Zhejiang Province, China.

The Company and its subsidiaries (the “Group”) are principally engaged in the development and commercialisation of innovative ophthalmic treatments.

As at the date of this report, the Company had direct and indirect interests in its subsidiaries, all of which are private limited liability companies, the particulars of which are as follows:

Name	Place and date of incorporation/registration and place of operations	Issued ordinary share/registered capital	Issued ordinary share/registered capital		Principal activities
			Direct	Indirect	
Shanghai Vivavision Yaojing Biotech Co., Ltd. (上海維眸曜晴生物科技有限公司)* (note a)	PRC/Chinese mainland 11 July 2023	RMB23,000,000	100%	–	Research and development of biochemistry product technologies; medical research and experimental development
VIVAVISION BIOTECH (HONG KONG) LIMITED (note b)	Hong Kong 16 January 2023	HKD1	100%	–	Research and development of biochemistry product technologies; medical research and experimental development
VIVAVISION BIOTECH INC. (note a)	United States of America (“USA”) 29 June 2020	USD5,000	100%	–	Investment holding
AVENABIO LLC (note a) .	USA 4 August 2023	USD5,000	–	100%	Investment holding

* This entity is a limited liability enterprise established under the PRC law. The English name of this entity represents the best effort made by the directors of the Company to translate its Chinese name, as it has not been registered with an official English name.

Notes:

- (a) No audited financial statements have been prepared for the entity for the year ended 31 December 2024, as these entities were not subject to any statutory audit requirements under the relevant rules and regulations in their jurisdictions of incorporation/registration.
- (b) The statutory financial statements for the year ended 31 December 2024 prepared in accordance with Hong Kong Small and Medium-sized Entity Financial Reporting Standard (“SME-FRS”) issued by the HKICPA were audited by KAIZEN CPA LIMITED, certified public accountants registered in Hong Kong.

APPENDIX I

ACCOUNTANTS’ REPORT

The carrying amounts of the Company’s investments in subsidiaries are as follows:

	As at 31 December	As at 30 September
	2024	2025
	RMB’000	RMB’000 (Unaudited)
Investments, at cost	68,973	78,623
Deemed investment arising from share-based payments	6,776	9,112
Total	<u>75,749</u>	<u>87,735</u>

As at 30 September 2025, no impairment indicator was identified for the investments in subsidiaries, considering (i) the fact that the progress of all pipelines remains in line with expectations; (ii) no significant adverse changes in the operating environment and management stability of these subsidiaries; and (iii) no plan for the discontinuation, restructuring or disposal of any of the subsidiaries.

2.1 BASIS OF PREPARATION

The Historical Financial Information and Interim Financial Information have been prepared in accordance with IFRS Accounting Standards, which comprise all standards and interpretations approved by the International Accounting Standards Board (the “IASB”). All IFRS Accounting Standards effective for the accounting period commencing from 1 January 2025, together with the relevant transitional provisions, have been consistently adopted by the Group in the preparation of the Historical Financial Information and Interim Financial Information.

The Historical Financial Information and Interim Financial Information have been prepared under the historical cost convention, except for certain financial instruments which have been measured at fair value.

Basis of consolidation

The Historical Financial Information and Interim Financial Information include the financial information of the Group for the Relevant Period and the nine months ended 30 September 2024 and 2025. A subsidiary is an entity (including a structured entity), directly or indirectly, controlled by the Company. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee (i.e., existing rights that give the Group the current ability to direct the relevant activities of the investee).

The Historical Financial Information and Interim Financial Information have been prepared on a going concern basis notwithstanding that, as at 30 September 2025, the Group had net liabilities of RMB662,989,000 (unaudited) and continually incurred losses from operations, it recorded net current assets of RMB91,262,000 (unaudited). The directors have reviewed the Group’s cash flow projections, which cover a period of at least twelve months from 30 September 2025. The directors are of the opinion that the Group will have sufficient working capital to meet its financial liabilities and obligations as and when they fall due and to sustain its operations for the next 12 months from 30 September 2025.

Generally, there is a presumption that a majority of voting rights results in control. When the Company has less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

- (a) the contractual arrangement with the other vote holders of the investee;
- (b) rights arising from other contractual arrangements; and
- (c) the Group’s voting rights and potential voting rights.

The financial statements of the subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies. The results of subsidiaries are consolidated from the date on which the Group obtains control and continue to be consolidated until the date that such control ceases.

Profit or loss and each component of other comprehensive income are attributed to the owners of the parent of the Group and to the non-controlling interests, even if this results in the non-controlling interests having a deficit balance. All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control described above. A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

APPENDIX I

ACCOUNTANTS’ REPORT

If the Group loses control over a subsidiary, it derecognises the related assets (including goodwill), liabilities, any non-controlling interest and the foreign currency translation reserve; and recognises the fair value of any investment retained and any resulting surplus or deficit in profit or loss. The Group’s share of components previously recognised in other comprehensive income is reclassified to profit or loss or retained profits, as appropriate, on the same basis as would be required if the Group had directly disposed of the related assets or liabilities.

2.2 ISSUED BUT NOT YET EFFECTIVE IFRS ACCOUNTING STANDARDS

The Group has not applied the following new and amended IFRS Accounting Standards, that have been issued but are not yet effective, in the Historical Financial Information and Interim Financial Information. The Group intends to apply these new and amended IFRS Accounting Standards, if applicable, when they become effective.

IFRS 18	<i>Presentation and Disclosure in Financial Statements</i> ²
IFRS 19 and its amendments	<i>Subsidiaries without Public Accountability: Disclosures</i> ²
Amendments to IFRS 9 and IFRS 7	<i>Amendments to the Classification and Measurement of Financial Instruments</i> ¹
Amendments to IFRS 9 and IFRS 7	<i>Contracts Referencing Nature-dependent Electricity</i> ¹
Amendments to IFRS 10 and IAS 28	<i>Sale or Contribution of Assets between an Investor and its Associate or Joint Venture</i> ³
Amendments to IAS 21	<i>Translation to a Hyperinflationary Presentation Currency</i> ²
<i>Annual Improvements to IFRS Accounting Standards—Volume 11</i>	Amendments to IFRS 1, IFRS 7, IFRS 9, IFRS 10 and IAS 7 ¹

¹ Effective for annual periods beginning on or after 1 January 2026

² Effective for annual/reporting periods beginning on or after 1 January 2027

³ No mandatory effective date yet determined but available for adoption

IFRS 18 replaces IAS 1 *Presentation of Financial Statements*. While a number of sections have been brought forward from IAS 1 with limited changes, IFRS 18 introduces new requirements for presentation within the statement of profit or loss and other comprehensive income, including specified totals and subtotals. Entities are required to classify all income and expenses within the statement of profit or loss and other comprehensive income into one of the five categories: operating, investing, financing, income taxes and discontinued operations and to present two new defined subtotals. It also requires disclosures about management-defined performance measures in a single note and introduces enhanced requirements on the grouping (aggregation and disaggregation) and the location of information in both the primary financial statements and the notes. Some requirements previously included in IAS 1 are moved to IAS 8 *Accounting Policies, Changes in Accounting Estimates and Errors*, which is renamed as IAS 8 *Basis of Preparation of Financial Statements*. As a consequence of the issuance of IFRS 18, limited, but widely applicable, amendments are made to IAS 7 *Statement of Cash Flows*, IAS 33 *Earnings per Share* and IAS 34 *Interim Financial Reporting*. In addition, there are minor consequential amendments to other IFRS Accounting Standards. The application of IFRS 18 is not expected to have a material impact on the financial position of the Group but is expected to affect the presentation of the statement of profit or loss and other comprehensive income and statement of cash flows and additional disclosure will be included in the financial statements.

Except for IFRS 18, the directors of the Company anticipate that the application of these new and amended IFRS Accounting Standards will have no material impact on the Group’s financial performance and financial position in the foreseeable future.

2.3 MATERIAL ACCOUNTING POLICY INFORMATION

Investments in associates

An associate is an entity in which the Group has a long term interest of generally not less than 20% of the equity voting rights and over which it has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee, but is not control or joint control over those policies.

The Group’s investments in associates are stated in the consolidated statement of financial position at the Group’s share of net assets under the equity method of accounting, less any impairment losses. Adjustments are made to bring into line any dissimilar accounting policies that may exist.

APPENDIX I

ACCOUNTANTS' REPORT

The Group's share of the post-acquisition results and other comprehensive income of associates is included in consolidated profit or loss and consolidated other comprehensive income, respectively. In addition, when there has been a change recognised directly in the equity of the associate, the Group recognises its share of any changes, when applicable, in the consolidated statement of changes in equity. Unrealised gains and losses resulting from transactions between the Group and its associates are eliminated to the extent of the Group's investments in the associates, except where unrealised losses provide evidence of an impairment of the assets transferred. Goodwill arising from the acquisition of associates is included as part of the Group's investments in associates.

Upon loss of significant influence over the associate, the Group measures and recognises any retained investment at its fair value. Any difference between the carrying amount of the associate upon loss of significant influence and the fair value of the retained investment and proceeds from disposal is recognised in profit or loss.

Fair value measurement

The Group measures its financial assets at FVTPL at fair value at the end of each reporting period. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the Historical Financial Information and Interim Financial Information are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1 — based on quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2 — based on valuation techniques for which the lowest level input that is significant to the fair value measurement is observable, either directly or indirectly

Level 3 — based on valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Impairment of non-financial assets

Where an indication of impairment exists, or when annual impairment testing for an asset is required (other than inventories and financial assets), the asset's recoverable amount is estimated. An asset's recoverable amount is the higher of the asset's or cash-generating unit's value in use and its fair value less costs of disposal, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is determined for the cash-generating unit to which the asset belongs.

An impairment loss is recognised only if the carrying amount of an asset exceeds its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. An impairment loss is charged to profit or loss in the period in which it arises in those expense categories consistent with the function of the impaired asset.

APPENDIX I

ACCOUNTANTS' REPORT

An assessment is made at the end of each reporting period as to whether there is an indication that previously recognised impairment losses may no longer exist or may have decreased. If such an indication exists, the recoverable amount is estimated. A previously recognised impairment loss of an asset other than goodwill is reversed only if there has been a change in the estimates used to determine the recoverable amount of that asset, but not to an amount higher than the carrying amount that would have been determined (net of any depreciation/amortisation) had no impairment loss been recognised for the asset in prior years. A reversal of such an impairment loss is credited to profit or loss in the period in which it arises.

Related parties

A party is considered to be related to the Group if:

- (a) the party is a person or a close member of that person's family and that person
 - (i) has control or joint control over the Group;
 - (ii) has significant influence over the Group; or
 - (iii) is a member of the key management personnel of the Group or of a parent of the Group;

or

- (b) the party is an entity where any of the following conditions applies:
 - (i) the entity and the Group are members of the same group;
 - (ii) one entity is an associate or joint venture of the other entity (or of a parent, subsidiary or fellow subsidiary of the other entity);
 - (iii) the entity and the Group are joint ventures of the same third party;
 - (iv) one entity is a joint venture of a third entity and the other entity is an associate of the third entity;
 - (v) the entity is a post-employment benefit plan for the benefit of employees of either the Group or an entity related to the Group;
 - (vi) the entity is controlled or jointly controlled by a person identified in (a);
 - (vii) a person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity); and
 - (viii) the entity, or any member of a group of which it is a part, provides key management personnel services to the Group or to the parent of the Group.

Property, plant and equipment and depreciation

Property, plant and equipment, other than construction in progress, are stated at cost less accumulated depreciation and any impairment losses. The cost of an item of property, plant and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use.

Expenditure incurred after items of property, plant and equipment have been put into operation, such as repairs and maintenance, is normally charged to profit or loss in the period in which it is incurred. In situations where the recognition criteria are satisfied, the expenditure for a major inspection is capitalised in the carrying amount of the asset as a replacement. Where significant parts of property, plant and equipment are required to be replaced at intervals, the Group recognises such parts as individual assets with specific useful lives and depreciates them accordingly.

APPENDIX I

ACCOUNTANTS’ REPORT

Depreciation is calculated on the straight-line basis to write off the cost of each item of property, plant and equipment to its residual value over its estimated useful life. The principal annual rates used for this purpose are as follows:

Computer and office equipment	19% to 31.67%
Machinery and equipment	19% to 31.67%
Motor vehicles	19% to 31.67%
Leasehold improvements	Over the shorter of remaining lease terms and estimated useful lives

Where parts of an item of property, plant and equipment have different useful lives, the cost of that item is allocated on a reasonable basis among the parts and each part is depreciated separately. Residual values, useful lives and the depreciation method are reviewed, and adjusted if appropriate, at least at each financial year end.

An item of property, plant and equipment including any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss on disposal or retirement recognised in profit or loss in the year the asset is derecognised is the difference between the net sales proceeds and the carrying amount of the relevant asset.

Construction in progress is stated at cost less any impairment losses, and is not depreciated. It is reclassified to the appropriate category of property and equipment when completed and ready for use.

Intangible assets (other than goodwill)

Intangible assets acquired separately are measured on initial recognition at cost. The cost of intangible assets acquired in a business combination is the fair value at the date of acquisition. The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are subsequently amortised over the useful economic life and assessed for impairment whenever there is an indication that the other intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year end.

Research and development expenses

All research costs are charged to profit or loss as incurred.

Expenditure incurred on projects to develop new products is capitalised and deferred only when the Group can demonstrate the technical feasibility of completing the intangible asset so that it will be available for use or sale, its intention to complete and its ability to use or sell the asset, how the asset will generate future economic benefits, the availability of resources to complete the project and the ability to measure reliably the expenditure during the development. Product development expenditure which does not meet these criteria is expensed when incurred.

Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

APPENDIX I

ACCOUNTANTS’ REPORT

(a) *Right-of-use assets*

Right-of-use assets are recognised at the commencement date of the lease (that is the date the underlying asset is available for use). Right-of-use assets are measured at cost, less accumulated depreciation and any impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease terms and the estimated useful lives of the assets as follows:

Office premises and laboratories	2 to 5 years

If ownership of the leased asset transfers to the Group by the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

(b) *Lease liabilities*

Lease liabilities are recognised at the commencement date of the lease at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for termination of a lease, if the lease term reflects the Group exercising the option to terminate the lease. The variable lease payments that do not depend on an index or a rate are recognised as an expense in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in lease payments (e.g., a change to future lease payments resulting from a change in an index or rate used to determine such lease payments) or a change in assessment of an option to purchase the underlying asset.

Investments and other financial assets

Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost and FVTPL.

The classification of financial assets at initial recognition depends on the financial asset’s contractual cash flow characteristics and the Group’s business model for managing them. With the exception of trade receivables that do not contain a significant financing component or for which the Group has applied the practical expedient of not adjusting the effect of a significant financing component, the Group initially measures a financial asset at its fair value, plus in the case of a financial asset not at FVTPL, transaction costs.

In order for a financial asset to be classified and measured at amortised cost or fair value through other comprehensive income, it needs to give rise to cash flows that are solely payments of principal and interest (“SPPI”) on the principal amount outstanding. Financial assets with cash flows that are not SPPI are classified and measured at FVTPL, irrespective of the business model.

The Group’s business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows, while financial assets classified and measured at fair value through other comprehensive income are held within a business model with the objective of both holding to collect contractual cash flows and selling. Financial assets which are not held within the aforementioned business models are classified and measured at FVTPL.

APPENDIX I

ACCOUNTANTS’ REPORT

Purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace are recognised on the trade date, that is, the date that the Group commits to purchase or sell the asset.

Subsequent measurement

The subsequent measurement of financial assets depends on their classification as follows:

Financial assets at amortised cost (debt instruments)

Financial assets at amortised cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

Financial assets at FVTPL

Financial assets at FVTPL are carried in the statement of financial position at fair value with net changes in fair value recognised in profit or loss.

Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Group’s consolidated statement of financial position) when:

- the rights to receive cash flows from the asset have expired; or
- the Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a “pass-through” arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

Impairment of financial assets

The Group recognises an allowance for expected credit losses (“ECLs”) for all debt instruments not held at FVTPL. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

General approach

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12 months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

At the end of each reporting period, the Group assesses whether the credit risk on a financial instrument has increased significantly since initial recognition. When making the assessment, the Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information that is available without undue cost or effort, including historical and forward-looking information. The Group considers that there has been a significant increase in credit risk when contractual payments are more than 30 days past due.

The Group considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group. A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

APPENDIX I

ACCOUNTANTS’ REPORT

Financial assets at amortised cost are subject to impairment under the general approach and they are classified within the following stages for measurement of ECLs.

- Stage 1 — Financial instruments for which credit risk has not increased significantly since initial recognition and for which the loss allowance is measured at an amount equal to 12-month ECLs
- Stage 2 — Financial instruments for which credit risk has increased significantly since initial recognition but that are not credit-impaired financial assets and for which the loss allowance is measured at an amount equal to lifetime ECLs
- Stage 3 — Financial assets that are credit-impaired at the reporting date (but that are not purchased or originated credit-impaired) and for which the loss allowance is measured at an amount equal to lifetime ECLs

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as loans and borrowings, or payables, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs. Redemption liabilities on owners’ capital are initially recognised at the net present value of the redemption amount.

The Group’s financial liabilities include trade and other payables, interest-bearing bank borrowings and redemption liabilities on owners’ capital.

Subsequent measurement

The subsequent measurement of financial liabilities depends on their classification as follows:

Financial liabilities at amortised cost (trade and other payables, amount due to a related party, borrowings and redemption liabilities on owners’ capital)

After initial recognition, trade and other payables, amount due to a related party, interest-bearing bank borrowings and redemption liabilities on owners’ capital are subsequently measured at amortised cost, using the effective interest rate method unless the effect of discounting would be immaterial, in which case they are stated at cost. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the effective interest rate amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included in finance costs in profit or loss.

Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled, or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and a recognition of a new liability, and the difference between the respective carrying amounts is recognised in profit or loss.

Redemption liabilities on owners’ capital

For the redeemable equity shares issued by the Company as detailed in note 23, financial liabilities are recognised based on the net present value of the redemption amount and debited to equity. Changes of the net present value during the reporting period are recognised in profit or loss. When the redemption rights related to the redeemable owners’ capital are terminated, redemption liabilities on owners’ capital are extinguished and credited to equity.

APPENDIX I

ACCOUNTANTS' REPORT

Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise cash on hand and at banks, and short-term highly liquid deposits with a maturity of generally within three months that are readily convertible into known amounts of cash, subject to an insignificant risk of changes in value and held for the purpose of meeting short-term cash commitments.

For the purpose of the consolidated statement of cash flows, cash and cash equivalents comprise cash on hand and at banks, and short-term deposits as defined above, less bank overdrafts which are repayable on demand and form an integral part of the Group's cash management.

Income tax

Income tax comprises current and deferred tax. Income tax relating to items recognised outside profit or loss is recognised outside profit or loss, either in other comprehensive income or directly in equity.

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period, taking into consideration interpretations and practices prevailing in the countries in which the Group operates.

Deferred tax is provided, using the liability method, on all temporary differences at the end of the reporting period between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- when the deferred tax liability arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss and does not give rise to equal taxable and deductible temporary difference; and
- in respect of taxable temporary differences associated with investments in subsidiaries, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, and the carry forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences, and the carry forward of unused tax credits and unused tax losses can be utilised, except:

- when the deferred tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss and does not give rise to equal taxable and deductible temporary difference; and
- in respect of deductible temporary differences associated with investments in subsidiaries, deferred tax assets are only recognised to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at the end of the reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at the end of the reporting period and are recognised to the extent that it has become probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

APPENDIX I

ACCOUNTANTS’ REPORT

Deferred tax assets and deferred tax liabilities are offset if and only if the Group has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

Government grants

Government grants are recognised at their fair value where there is reasonable assurance that the grant will be received and all attaching conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the costs, for which it is intended to compensate, are expensed.

Where the grant relates to an asset, the fair value is credited to a deferred income account and is released to profit or loss over the expected useful life of the relevant asset by equal annual instalments.

Other income

Interest income is recognised on an accrual basis using the effective interest method by applying the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, when appropriate, to the net carrying amount of the financial asset.

Share-based payments

Employees (including directors) of the Group receive remuneration in the form of share-based payments, whereby employees render services in exchange for equity instruments (“equity-settled transactions”). The cost of equity-settled transactions with employees is measured by reference to the fair value at the date at which they are granted. The fair value is determined by an external valuer. Further details are set out in note 26 to the Historical Financial Information.

The cost of equity-settled transactions is recognised in employee benefit expense, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled. The cumulative expense recognised for equity-settled transactions at the end of each reporting period until the vesting date reflects the extent to which the vesting period has expired and the Group’s best estimate of the number of equity instruments that will ultimately vest. The charge or credit to profit or loss for a period represents the movement in the cumulative expense recognised as at the beginning and end of that period.

Service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of the Group’s best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other conditions attached to an award, but without an associated service requirement, are considered to be non-vesting conditions. Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an award unless there are also service and/or performance conditions.

For awards that do not ultimately vest because non-market performance and/or service conditions have not been met, no expense is recognised. Where awards include a market or non-vesting condition, the transactions are treated as vesting irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied.

Where the terms of an equity-settled award are modified, as a minimum an expense is recognised as if the terms had not been modified, if the original terms of the award are met. In addition, an expense is recognised for any modification that increases the total fair value of the share-based payments, or is otherwise beneficial to the employee as measured at the date of modification. Where an equity-settled award is cancelled, it is treated as if it had vested on the date of cancellation, and any expense not yet recognised for the award is recognised immediately.

APPENDIX I

ACCOUNTANTS’ REPORT

Other employee benefits

Pension schemes

The employees of the Group’s subsidiaries which operate in the Chinese mainland are required to participate in a central pension scheme operated by the local municipal government. The subsidiaries operating in the Chinese mainland are required to contribute a certain percentage of their payroll costs to the central pension scheme. The contributions are charged to profit or loss as they become payable in accordance with the rules of the central pension scheme.

Borrowing costs

All borrowing costs are recognised in profit or loss in the period in which they are incurred.

Events after the reporting period

If the Group receives information after the reporting period, but prior to the date of authorisation for issue, about conditions that existed at the end of each reporting period, it will assess whether the information affects the amounts that it recognises in its financial statements. The Group will adjust the amounts recognised in its financial statements to reflect any adjusting events after the reporting period and update the disclosures that relate to those conditions in light of the new information. For non-adjusting events after the reporting period, the Group will not change the amounts recognised in its financial statements, but will disclose the nature of the non-adjusting events and an estimate of their financial effects, or a statement that such an estimate cannot be made, if applicable.

Foreign currencies

The Historical Financial Information and Interim Financial Information are presented in RMB, which is the Company’s functional currency. Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. Foreign currency transactions recorded by the entities in the Group are initially recorded using their respective functional currency rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency rates of exchange ruling at the end of the reporting period. Differences arising on settlement or translation of monetary items are recognised in profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was measured. The gain or loss arising on translation of a non-monetary item measured at fair value is treated in line with the recognition of the gain or loss on change in fair value of the item (i.e., translation difference on the item whose fair value gain or loss is recognised in other comprehensive income or profit or loss is also recognised in other comprehensive income or profit or loss, respectively).

The functional currencies of certain overseas subsidiaries are currencies other than RMB. As at the end of the reporting period, the assets and liabilities of these entities are translated into RMB at the exchange rates prevailing at the end of the reporting period and their profits or losses are translated into RMB at the exchange rates that approximate to those prevailing at the dates of the transactions.

The resulting exchange differences are recognised in other comprehensive income and accumulated in the foreign currency translation reserve, except to the extent that the differences are attributable to non-controlling interests. On disposal of a foreign operation, the cumulative amount in the reserve relating to that particular foreign operation is recognised in profit or loss.

For the purpose of the consolidated statement of cash flows, the cash flows of the overseas subsidiaries are translated into RMB at the exchange rates ruling at the dates of the cash flows. Frequently recurring cash flows of the overseas subsidiaries which arise throughout the year are translated into RMB at the weighted average exchange rates for the year.

3. SIGNIFICANT ACCOUNTING JUDGEMENTS AND ESTIMATES

The preparation of the Group’s Historical Financial Information and Interim Financial Information requires management to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and their accompanying disclosures. Uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amounts of the assets or liabilities affected in the future.

APPENDIX I

ACCOUNTANTS’ REPORT

Judgements

In the process of applying the Group’s accounting policies, management has made the following judgements, apart from those involving estimations, which have the most significant effect on the amounts recognised in the Historical Financial Information and Interim Financial Information:

Research and development expenses

All research costs are charged to profit or loss as incurred. Costs incurred on each pipeline to develop new products are only capitalised and deferred in accordance with the accounting policy for research and development expenses in note 2.3 to the Historical Financial Information. Determining the amounts to be capitalised requires management to make judgements on the technical feasibility of existing pipelines to be successfully commercialised and bring economic benefits to the Group.

Deferred tax assets

Deferred tax assets are recognised for deductible temporary differences and unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and level of future taxable profits together with future tax planning strategies.

Significant influence even though the Group holds less than 20% of the voting rights

The Group considers that it has significant influence on certain companies even though it owns less than 20% of the voting rights. This is because the Group has the power to obtain representation on such companies’ boards of directors and is able to exercise significant influence on their financial and operating decisions. Details of the basis of such management judgement are set out in note 15.

Estimation uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

Impairment of non-financial assets (other than goodwill)

The Group assesses whether there are any indicators of impairment for all non-financial assets (including right-of-use assets) at the end of each reporting period. The non-financial assets are tested for impairment when there are indicators that the carrying amounts may not be recoverable. An impairment exists when the carrying value of an asset or a cash-generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The calculation of the fair value less costs of disposal is based on available data from binding sales transactions in an arm’s length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. When value in use calculations are undertaken, management must estimate the expected future cash flows from the asset or cash-generating unit and choose a suitable discount rate in order to calculate the present value of those cash flows.

Notwithstanding that the Group recorded a loss for the year end 31 December 2024 and the nine months ended 30 September 2025, no indicators of the impairment for non-financial assets are identified as of 31 December 2024 and 30 September 2025, since (i) the assets’ value have not declined significantly, (ii) the assets are not obsolete or physically damaged; and (iii) the R&D project progress remains in line with expectations.

Accrual of research and development expenses

The Group relies on contract research organisations, clinical site management operators and clinical trial centres (collectively referred to as “Outsourced Service Providers”) to conduct, supervise, and monitor the Group’s ongoing clinical trials. Determining the amounts of research and development expenses incurred up to the end of the reporting period requires the management of the Group to estimate and measure the progress of receiving research and development services under the contracts with Outsourced Service Providers using inputs such as number of patient enrolments, time elapsed and milestones achieved.

APPENDIX I

ACCOUNTANTS’ REPORT

Fair value of share-based payment transactions

Estimating the fair value of share-based payment transactions requires the determination of the most appropriate valuation model, which depends on the terms and conditions of the grant. This estimate also requires the determination of the most appropriate inputs to the valuation model including the expected life of the restricted shares, volatility and dividend yield and making assumptions about them.

For the measurement of the fair value of share-based payment transactions with employees at the grant date, the Group uses the backsolve from recent transaction method. The assumptions and models used for estimating fair value for share-based payment transactions are disclosed in note 26 to the Historical Financial Information.

4. OPERATING SEGMENT INFORMATION

Operating segment information

For management purposes, the Group has only one reportable operating segment, which engages in the research and development of innovative drugs. Since this is the only reportable operating segment of the Group, no further operating segment analysis thereof is presented.

Geographical information

(a) *Revenue from external customers*

As the Group is still in the research and development stage and has not achieved commercialisation, there was no external sales revenue.

(b) *Non-current assets*

Since all of the Group’s non-current assets were located in the Chinese mainland, no geographical information in accordance with IFRS 8 *Operating Segments* is presented.

5. OTHER INCOME AND GAINS

An analysis of other income and gains is as follows:

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025
	RMB'000	RMB'000 (Unaudited)	RMB'000 (Unaudited)
<u>Other income</u>			
Government grants*	5,650	637	2,744
Bank interest income	1,283	1,159	218
Interest income from the loan to an employee. . .	38	33	34
Interest income from the loan to a related party .	143	116	116
Others	500	500	36
Total other income	<u>7,614</u>	<u>2,445</u>	<u>3,148</u>
<u>Gains</u>			
Foreign exchange gains, net.	453	—	—
Gains on financial assets at FVTPL	505	505	296
Total gains	<u>958</u>	<u>505</u>	<u>296</u>
Total	<u>8,572</u>	<u>2,950</u>	<u>3,444</u>

* The government grants mainly represent subsidies received from local government authorities for the purpose of compensation for expenditure arising from research and clinical trial activities. Certain government grants related to income have future related costs expected to be incurred and require us to comply with conditions attached to the grants and the government to acknowledge the compliance of these conditions. This grant related to income was recognised in profit or loss when related costs are subsequently incurred and the Group received government acknowledge of compliance. There are no unfulfilled conditions or contingencies relating to other government grants.

APPENDIX I

ACCOUNTANTS’ REPORT

6. FINANCE COSTS

An analysis of finance costs is as follows:

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025
	RMB'000	RMB'000 (Unaudited)	RMB'000 (Unaudited)
Interest on redemption liabilities on owners’ capital	66,030	49,302	58,891
Interest on lease liabilities	120	100	94
Interest on interest-bearing bank borrowings	25	–	100
Interest on borrowing from a related party	–	–	222
Total	<u>66,175</u>	<u>49,402</u>	<u>59,307</u>

7. LOSS BEFORE TAX

The Group’s loss before tax is arrived at after charging/(crediting):

	Notes	Year ended 31 December	Nine months ended 30 September	
		2024	2024	2025
		RMB'000	RMB'000 (Unaudited)	RMB'000 (Unaudited)
Depreciation of property, plant and equipment	13	3,817	2,845	2,272
Amortisation of intangible assets		58	44	24
Depreciation of right-of-use assets	14	2,412	1,809	1,790
Research and development expenses*		128,261	91,229	65,178
Government grants	5	(5,650)	(637)	(2,744)
Bank interest income	5	(1,283)	(1,159)	(218)
Interest income from the loan to an employee	5	(38)	(33)	(34)
Interest income from the loan to a related party	5	(143)	(116)	(116)
Foreign exchange (gains)/losses, net.	5	(453)	53	–**
Loss on disposal of items of property, plant and equipment		1	1	38
Gains on financial assets at FVTPL		(505)	(505)	(296)
Auditor’s remuneration		208	57	153
Employee benefit expense (including directors’ and chief executive’s remuneration (note 9)):				
– Salaries, allowances and benefits in kind		32,155	24,209	24,077
– Performance related bonuses		2,064	1,548	1,474
– Pension scheme contributions		535	392	421
– Equity-settled share-based payments		8,875	6,830	2,335
Total employee benefit expense		<u>43,629</u>	<u>32,979</u>	<u>28,307</u>

* The “Research and development expenses” amount includes amortisation of intangible assets, depreciation of property, plant and equipment, depreciation of right-of-use assets and staff costs which are also included in the respective total amounts of the items disclosed above.

** The amounts are less than RMB1,000.

APPENDIX I

ACCOUNTANTS’ REPORT

8. DIRECTORS’ AND CHIEF EXECUTIVE’S REMUNERATION

Directors’ and chief executive’s remuneration for the Relevant Period and the nine months ended 30 September 2024 and 2025, disclosed pursuant to the Listing Rules, section 383(1)(a), (b), (c) and (f) of the Hong Kong Companies Ordinance and Part 2 of the Companies (Disclosure of Information about Benefits of Directors) Regulation, is as follows:

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025
	RMB’000	RMB’000 (Unaudited)	RMB’000 (Unaudited)
Fees	—	—	—
Other emoluments:			
Salaries, allowances and benefits in kind	1,892	1,421	1,934
Performance related bonuses	1,100	825	75
Pension scheme contributions	8	4	37
Equity-settled share-based payments	—	—	440
Total fees and other emoluments	<u>3,000</u>	<u>2,250</u>	<u>2,486</u>

During the previous year and the year ended 31 December 2024, share awards were granted to certain directors in respect of their services to the Group, further details of which are included in the disclosures in note 26 to the Historical Financial Information. The fair values of such share awards, which have been recognised in profit or loss over the vesting period, were determined as at the dates of grant and the amounts included in the Historical Financial Information for the Relevant Period and the nine months ended 30 September 2024 and 2025 are included in the above directors’ and chief executive’s remuneration disclosures.

Notes:

- (a) Dr. Shen Wang was appointed as a director and chief executive officer of the Company with effect from September 2016 and was re-designated as an executive director of the Company with effect from February 2026.
- (b) Mr. Xu Daqiang was appointed as a director of the Company with effect from March 2021 and has resigned as a director of the Company with effect from February 2026.

APPENDIX I

ACCOUNTANTS’ REPORT

- (c) Mr. Zong Yiwei was appointed as a director of the Company with effect from June 2016 and has resigned as a director of the Company with effect from January 2026.
- (d) Mr. Fan Jianxun was appointed as a director of the Company with effect from August 2019 and has resigned as a director of the Company with effect from January 2026.
- (e) Mr. Han Yongxin was appointed as a director of the Company with effect from June 2018 and has resigned as a director of the Company with effect from May 2025.
- (f) Ms. Gu Cuiping was appointed as a director of the Company with effect from March 2021 and has resigned as a director of the Company with effect from January 2026.
- (g) Ms. Mao Jun was appointed as a director of the Company with effect from June 2016 and has resigned as a director of the Company with effect from January 2026.
- (h) Mr. Wang Haikuan was appointed as a director of the Company from May 2025 and has resigned as a director of the Company with effect from January 2026.
- (i) Mr. Zhao Jianghua was appointed as a director of the Company from June 2025 and has resigned as a director of the Company with effect from January 2026.
- (j) Mr. Lu Ying was appointed as a director of the Company with effect from June 2025 and has resigned as a director of the Company with effect from January 2026.
- (k) Dr. Xia Erning was appointed as a director of the Company with effect from January 2026 and was re-designated as an executive director of the Company with effect from February 2026.
- (l) Ms. Sun Jialin was appointed as a director of the Company with effect from January 2026 and was re-designated as a non-executive director of the Company with effect from February 2026.
- (m) Mr. Huang Yide was appointed a director of the Company with effect from January 2026 and was re-designated as a non-executive director of the Company with effect from February 2026.
- (n) Mr. Xu Decai was appointed as a director of the Company with effect from January 2026 and re-designated as an independent non-executive director of the Company with effect from February 2026.
- (o) Mr. Shen Hongquan was appointed as a director of the Company with effect from January 2026 and re-designated as an independent non-executive director of the Company with effect from February 2026.
- (p) Mr. Zhang Nan was appointed as a director of the Company with effect from January 2026 and re-designated as an independent non-executive director of the Company with effect from February 2026.

There was no arrangement under which a director or the chief executive waived or agreed to waive any remuneration during the Relevant Period and the nine months ended 30 September 2024 and 2025.

APPENDIX I

ACCOUNTANTS’ REPORT

9. FIVE HIGHEST PAID EMPLOYEES

The five highest paid employees during the year ended 31 December 2024 and the nine months ended 30 September 2024 and 2025, included one director, one (unaudited) director and two (unaudited) directors, the details of whose remuneration are set out in note 8 above. In addition, included in the five highest paid employees for the nine months ended 30 September 2025 was an individual being appointed as a director during the nine months ended 30 September 2025. The total remuneration of this individual for the nine months ended 30 September 2025, including the remuneration in respect of his qualifying services as a director, is comprised of salaries, allowances and benefits in kind of RMB900,000, pension scheme contribution of RMB55,000 and equity-settled share award expense of RMB613,000, respectively. Details of the remuneration of the remaining highest paid employees who are neither a director nor chief executive of the Company are as follows:

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025
	RMB'000	RMB'000 (Unaudited)	RMB'000 (Unaudited)
Salaries, allowances and benefits in kind	7,160	5,315	3,905
Performance related bonuses	996	709	514
Pension scheme contributions	85	104	47
Share-based payment expenses	6,758	5,230	302
Total fees and other emoluments	14,999	11,358	4,768

The numbers of non-director and non-chief executive highest paid employees whose remuneration fell within the following bands are as follows:

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025
	Number of employees	Number of employees (Unaudited)	Number of employees (Unaudited)
HKD500,001 to HKD1,000,000	—	1	—
HKD1,000,001 to HKD1,500,000	1	—	1
HKD1,500,001 to HKD2,000,000	—	—	1
HKD2,000,001 to HKD2,500,000	—	1	1
HKD2,500,001 to HKD3,000,000	1	1	—
HKD3,500,001 to HKD4,000,000	1	—	—
HKD6,500,001 to HKD7,000,000	—	1	—
HKD8,500,001 to HKD9,000,000	1	—	—
Total	4	4	3

APPENDIX I

ACCOUNTANTS’ REPORT

During the previous year and the year ended 31 December 2024, share awards were granted to the non-director and non-chief executive highest paid employees in respect of their services to the Group, further details of which are included in the disclosures in note 26 to the Historical Financial Information. The fair values of such share awards, which have been recognised in profit or loss over the vesting period, were determined as at the date of grant and the amounts included in the Historical Financial Information for the Relevant Period and the nine months ended 30 September 2024 and 2025 are included in the above non-director and non-chief executive highest paid employees’ remuneration disclosures.

During the Relevant Period and the nine months ended 30 September 2024 and 2025, no highest paid employees waived or agreed to waive any remuneration, and no remuneration was paid by the Group to any of the five highest paid employees as an inducement to join or upon joining the Group or as compensation for loss of office.

10. INCOME TAX

The Group is subject to income tax on an entity basis on profits arising in or derived from the jurisdictions in which members of the Group are domiciled and operate.

Hong Kong

The subsidiary incorporated in Hong Kong was subject to Hong Kong profits tax at the statutory rate of 16.5% on any estimated assessable profits arising in Hong Kong during the Relevant Period and the nine months ended 30 September 2024 and 2025. No provision for Hong Kong profits tax has been provided as the Group’s entity in Hong Kong had no estimated assessable profits during the Relevant Period and the nine months ended 30 September 2024 and 2025.

Chinese mainland

The provision for PRC corporate income tax is based on the statutory rate of 25% of the assessable profits as determined in accordance with the PRC Corporate Income Tax Law which was approved and became effective on 1 January 2008, except for certain subsidiaries of the Group in the Chinese mainland which are granted tax concession and are taxed at preferential tax rates.

Pursuant to Caishui [2023] No. 12 “Circular of the Ministry of Finance, the State Administration of Taxation Issued on the Tax Policies for Further Supporting the Development of Small Low-profit Enterprises and Self-employed Businesses” (財政部稅務總局關於進一步支持小微企業和個體工商戶發展有關稅費政策的公告), a subsidiary whose annual taxable income is less than RMB1,000,000 will be included in the actual taxable income at 25%, based on which the enterprise income tax payable will be calculated at the reduced tax rate of 20%. This policy took effect on 1 January 2023 and will expire on 31 December 2027.

USA

The entities in the State of Delaware are subject to Federal Tax at a rate of 21% and State of Delaware Profits Tax at a rate of 8.7%. Operations in the USA have incurred net accumulated operating losses for income tax purposes and no income tax provisions were recorded during the Relevant Period and the nine months ended 30 September 2024 and 2025.

APPENDIX I

ACCOUNTANTS’ REPORT

A reconciliation of the tax expense applicable to loss before tax at the statutory tax rates for the jurisdictions in which the Company and the majority of its subsidiaries are domiciled and/or operate to the tax expense at the effective tax rates is as follows:

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025
	RMB'000	RMB'000 (Unaudited)	RMB'000 (Unaudited)
Loss before tax	(201,535)	(148,331)	(131,495)
Tax at the statutory tax rate (25%).	(50,384)	(37,083)	(32,874)
Effect of different tax rates enacted by local authorities	3,150	2,636	979
Additional deductible allowance for research and development expenses	(11,274)	(8,332)	(6,151)
Tax losses and temporary differences not recognised	41,276	29,784	22,699
Expenses not deductible for tax	17,232	12,995	15,347
Tax charge at the Group’s effective rate	—	—	—

The Group also has tax losses arising in the Chinese mainland of RMB624,972,000 and RMB711,285,000 (unaudited) at 31 December 2024 and 30 September 2025, respectively, that will expire in one to ten years for offsetting against future taxable profits. The Group also has tax losses from foreign operations of RMB16,339,000 and RMB19,976,000 (unaudited) at 31 December 2024 and 30 September 2025, respectively, which can be carried forward indefinitely to offset against future taxable profits of the companies in which losses were incurred.

The Group has unrecognised deductible temporary differences of nil and RMB2,025,000 (unaudited) as at 31 December 2024 and 30 September 2025, respectively. The unrecognised deductible temporary differences are mainly related to the interest on redemption liabilities on owners’ capital before final settlement.

Deferred tax assets have not been recognised in respect of these losses and temporary differences as they have arisen in the subsidiaries that have been loss-making for some time and it is not considered probable that taxable profits in the foreseeable future will be available against which the tax losses can be utilised.

11. DIVIDENDS

No dividend was paid or declared by the Company during the Relevant Period and the nine months ended 30 September 2025.

12. LOSS PER SHARE ATTRIBUTABLE TO ORDINARY EQUITY HOLDERS OF THE PARENT

The calculation of the basic loss per share amounts is based on the loss attributable to ordinary equity holders of the parent, and the weighted average numbers of ordinary shares outstanding after taking into account the retrospective adjustments on the assumption that the conversion into a joint stock company with limited liability as disclosed in note 33 to the Historical Financial Information had been in effect on 1 January 2024.

APPENDIX I

ACCOUNTANTS’ REPORT

No adjustment has been made to the basic loss per share amounts presented for the Relevant Period and the nine months ended 30 September 2024 and 2025 in respect of a dilution as the impact of redemption liabilities on owners’ capital had an anti-dilutive effect on the basic loss per share amounts presented.

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025
		(Unaudited)	(Unaudited)
Loss			
Loss attributable to ordinary equity holders of the parent, for the purpose of calculating basic and diluted loss per share (RMB’000)	(201,535)	(148,331)	(131,495)
Shares			
Weighted average number of ordinary shares outstanding during the year/period used in the basic and diluted loss per share calculation . . .	239,736,085	239,731,770	248,680,217
Loss per share (basic and diluted) (RMB per share)	(0.84)	(0.62)	(0.53)

As at the end of the Relevant Period and 30 September 2025, there were no pledged property, plant and equipment.

14. LEASES

The Group as a lessee

The Group has lease contracts for various items of office premises and laboratories used in its operations. Leases of office premises and laboratories generally have lease terms between 2 and 5 years. Generally, the Group is restricted from assigning and subleasing the leased assets outside the Group.

(a) Right-of-use assets

The carrying amounts of the Group’s right-of-use assets and the movements during the Relevant Period and the nine months ended 30 September 2025 are as follows:

The Group

	Office premises and laboratories
	RMB'000
As at 1 January 2024	3,843
Additions	2,572
Depreciation charge	<u>(2,412)</u>
As at 31 December 2024 and 1 January 2025.	<u>4,003</u>
Additions	735
Depreciation charge	<u>(1,790)</u>
As at 30 September 2025 (unaudited).	<u>2,948</u>

Interest on lease liabilities	120	100	94
Total amount recognised in profit or loss	<u>2,532</u>	<u>1,909</u>	<u>1,884</u>

(d) The total cash outflows for leases are disclosed in note 27(c) to the Historical Financial Information.

15. INVESTMENTS IN ASSOCIATES

The Group and the Company

	As at 31 December	As at 30 September	
	2024	2024	2025
	RMB'000	RMB'000 (Unaudited)	RMB'000 (Unaudited)
Share of net assets	<u>1,099</u>	<u>1,139</u>	<u>935</u>

The Group’s shareholdings in the associates held directly.

Particulars of the material associates are as follows:

Name	Particulars of issued shares held	Place of incorporation/ registration and business	Percentage of ownership interest attributable to the Group	Principal activity
Jiangxi Shining Weimou Pharmaceutical Co., Ltd. (“江 西閃亮維眸醫藥有限公司”) . .	Ordinary shares	PRC	25%	Research and development
E-nitiate Biopharmaceuticals (Hangzhou) Co., Ltd. (note) (“啟元生物(杭州)有限公司”) .	Ordinary shares	PRC	16.1769%	Research and development

The following table illustrates the financial information of the Group’s associates that are not material:

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025
	RMB'000	RMB'000 (Unaudited)	RMB'000 (Unaudited)
Share of the associates’ loss and total comprehensive loss for the year/period.	(151)	(111)	(164)
Aggregate carrying amount of the Group’s investments in the associates	<u>1,099</u>	<u>1,139</u>	<u>935</u>

Note: The Group was able to exercise significant influence over E-nitiate Biotechnology (Hangzhou) Co., Ltd. since the inception of this investment because it has the power to appoint one out of six directors under the Articles of Association of the company.

APPENDIX I

ACCOUNTANTS’ REPORT

16. PREPAYMENTS, OTHER RECEIVABLES AND OTHER ASSETS

The Group

	As at 31 December	As at 30 September
	2024	2025
	RMB'000	RMB'000 (Unaudited)
Non-current:		
Rental and other deposits	276	436
Value-added tax recoverable	10,759	13,140
Prepayments for purchase of items of property, plant and equipment	178	110
Total	11,213	13,686
Current:		
Prepayments for research and development services	10,704	5,856
Other receivables	771	585
Other prepayments	50	405
Advances of loans to an employee	3,660	3,652
Total	15,185	10,498

The Company

	As at 31 December	As at 30 September
	2024	2025
	RMB'000	RMB'000 (Unaudited)
Non-current:		
Rental and other deposits	81	88
Value-added tax recoverable	10,736	12,953
Prepayments for purchase of items of property, plant and equipment	178	70
Total	10,995	13,111
Current:		
Prepayments for research and development services	9,950	4,898
Other receivables	733	331
Other prepayments	50	8
Total	10,733	5,237

The financial assets included in the above balances relate to receivables for which there was no recent history of default and past due amounts. In addition, there is no significant change in the economic factors based on the assessment of the forward-looking information, so the directors of the Company are of the opinion that the ECLs in respect of these balances are minimal. The balances of advances of loans to an employee are not secured with collateral, with an annual interest rate of 1.26% and are settled on demand.

APPENDIX I

ACCOUNTANTS’ REPORT

17. FINANCIAL ASSETS AT FVTPL

The Group and the Company

	As at 31 December	As at 30 September
	2024	2025
	RMB'000	RMB'000 (Unaudited)
Wealth management products	–	80,240
	–	–

The above wealth management products were issued by banks in the Chinese mainland. They were mandatorily classified as financial assets at FVTPL as their contractual cash flows are not solely payments of principal and interest.

18. CASH AND CASH EQUIVALENTS

The Group

	As at 31 December	As at 30 September
	2024	2025
	RMB'000	RMB'000 (Unaudited)
Cash and bank balances	50,783	35,766
Cash and cash equivalents	50,783	35,766
Denominated in:		
USD	22,749	4,773
RMB	23,793	25,938
HKD	4,241	5,055
Total	50,783	35,766

The Company

	As at 31 December	As at 30 September
	2024	2025
	RMB'000	RMB'000 (Unaudited)
Cash and bank balances	37,133	24,445
Cash and cash equivalents	37,133	24,445
Denominated in:		
RMB	37,133	24,445
Total	37,133	24,445

The RMB is not freely convertible into other currencies, however, under the Chinese mainland’s Foreign Exchange Control Regulations and Administration of Settlement, and Sale and Payment of Foreign Exchange Regulations, the Group is permitted to exchange RMB for other currencies through banks authorised to conduct foreign exchange business.

Cash at banks earns interest at floating rates based on daily bank deposit rates. Short term time deposits are made for varying periods of between one day and three months depending on the immediate cash requirements of the Group, and earn interest at the respective short term time deposit rates. The bank balances and time deposits are deposited with creditworthy banks with no recent history of default.

APPENDIX I

ACCOUNTANTS’ REPORT

19. TRADE AND OTHER PAYABLES

The Group

	As at 31 December	As at 30 September

	2024	2025
	RMB'000	RMB'000 (Unaudited)
Net deferred tax assets recognised in the consolidated statement of financial position	—	—
Net deferred tax liabilities recognised in the consolidated statement of financial position	—	—
	=	=

23. REDEMPTION LIABILITIES ON OWNERS’ CAPITAL

From November 2016 to June 2025, the Company completed six rounds of pre-[REDACTED] investments, namely Series A Investments, Series B Investments, Series C Investments, Series D Investments, Series D2 Investments and Series D2+ Investments (collectively referred to as “Pre-[REDACTED] Investments”). A total of 20,672,926 paid-in capital was issued at a total cash consideration of RMB695,000,000 under the Pre-[REDACTED] Investments.

The key terms of the shares are summarised as follows:

Redemption features

Upon occurrence of the specified events (such as the failure to achieve a qualified [REDACTED] within five years from the completion of Series D2 Investments) defined in the investment agreement, the Pre-[REDACTED] investors shall have the right to require the Company to redeem the shares.

The redemption amount is calculated as the sum of the original issue price of the shares, plus interest calculated with an effective interest rate at 8%, and plus all declared but unpaid dividends thereon.

Liquidation preferences

In the event of any liquidation, dissolution or termination of the Company, or in the event of the overall sale of the Company, holders of the shares shall be entitled to be paid out of the funds and assets available for distribution to the members of the Company, the amount for liquidation is the higher of (i) the original issue price for each series equity share at 8% interest rate per annum, plus any dividends declared but unpaid thereon; (ii) the actual paid-in shareholding ratio of the investor in the Company multiplied by the amount of distributable liquidation assets.

Anti-dilution right

If the Company increases its paid-in capital at a price lower than the price paid by the investors on a per paid-in capital basis, the investors have a right to require the founding team to transfer the shares at zero consideration or at the minimum consideration permitted by law to the investors.

Presentation and classification

The Group recognised Pre-[REDACTED] Investments as redemption liabilities on owners’ capital initially at the present value of the expected redemption amount, and subsequently measured at amortised cost. Such liabilities are classified as non-current because the Group considers it has the right to defer the settlement of the liabilities after 12 months as at the end of the Relevant Period and the nine months ended 30 September 2025 based on the terms for redemption event.

Accretion of interest	58,891
At 30 September 2025 (unaudited).	776,757

24. PAID-IN CAPITAL

The Company was incorporated in September 2016 with initial registered capital of RMB10,000,000.

A summary of movements in the Company’s paid-in capital during the Relevant Period and the nine months ended 30 September 2025 is as follows:

Fully paid:

	Paid-in capital
	RMB'000
As at 1 January 2024	23,973
Capital injection (a).	158
As at 31 December 2024 and 1 January 2025	24,131
Capital injection (b).	2,132
As at 30 September 2025 (unaudited).	26,263

Notes:

- (a) In December 2024, a certain investor subscribed for RMB158,000 paid-in capital of the Company at a total consideration of RMB10,000,000, among which RMB158,000 was recognised as paid-in capital and the remaining balance was recorded in capital reserve.
- (b) In 2025, certain investors subscribed for RMB2,132,000 paid-in capital of the Company at a total consideration of RMB135,000,000, among which RMB2,131,835 was recognised as paid-in capital and the remaining balance was recorded in capital reserve.

APPENDIX I

ACCOUNTANTS’ REPORT

25. DEFICITS

The Group

The amounts of the Group’s deficits and the movements therein for the Relevant Period and the nine months ended 30 September 2025 are presented in the consolidated statements of changes in equity.

(a) Capital reserve

The capital reserve of the Group represents the difference between the paid-in capital and the consideration received.

(b) Share-based payment reserve

The share-based payment reserve represents the equity-settled share awards as set out in note 26 to the Historical Financial Information.

(c) Other reserves

Other reserves of the Group represent the amount debited for the redemption liabilities of owners’ capital stipulated in note 23 to the Historical Financial Information.

The Company

	Capital reserve	Share-based payment reserve	Other reserves	Accumulated losses	Total
	RMB'000	RMB'000	RMB'000	RMB'000	RMB'000

APPENDIX I

ACCOUNTANTS’ REPORT

26. EQUITY-SETTLED SHARE-BASED PAYMENTS

Employee Incentive Scheme

The Company adopted a pre-[REDACTED] equity incentive scheme (the “Employee Incentive Scheme”) in order to recognise and reward the contributions of certain directors and employees to the growth and development of the Group, and to retain eligible employees for the continuous operation and development of the Group.

In December 2021, 2,123,339 restricted shares of the Company under the Employee Incentive Scheme were granted to certain employees and a certain director through the equity incentive platform, Huzhou Xiulai Business Consulting Partnership (Limited Partnership) (formerly known as Shanghai Xiulai Business Consulting Partnership (Limited Partnership)) (“Xiulai”) at a price of RMB1.00 per restricted share (“Batch 2021”). In April 2024, 280,000 restricted shares of the Company under the Employee Incentive Scheme were granted to certain employees through Xiulai at a price of RMB1.00 per restricted share (“Batch 2024”).

The restricted shares granted to the participants shall be unlocked in four equal instalments from the commencement date, subject to the service condition that a four-year service period from the commencement date has been completed or the achievement of performance targets as specified in the relevant grant notice.

As at the end of the Relevant Period and 30 September 2025, 954,000 and 277,000 (unaudited) restricted shares granted were unvested, respectively.

The fair values of the equity incentives granted under the Scheme at the grant dates were as follows:

	Number of restricted shares	Fair value at grant date
		<i>RMB per restricted share</i>
Batch 2021	2,123,339	28.31
Batch 2024	280,000	16.86

The fair value of the services received in return for the equity incentives granted is measured by reference to the fair value of the restricted shares granted less the consideration of RMB1.00 per restricted shares paid to Xiulai. The fair value of the restricted shares granted in December 2021 was measured at the grant date based on the valuation report applying the discounted cash flow approach conducted by an independent third-party valuer. The fair value of the restricted shares granted in April 2024 was measured at the grant date at the market value of the paid-in capital and was determined using the backsolve approach (backsolve from recent transaction method, in particular).

Major inputs used for the determination of the fair value of restricted shares granted during the Relevant Period and the nine months ended 30 September 2025 are listed as follows:

	Batch 2024
Expected volatility	49.72%
Dividend yield	0.00%
Risk-free interest rate	2.04%

During the Relevant Period and the nine months ended 30 September 2024 and 2025, the Group recognized share-based compensation expenses of RMB8,875,000, RMB6,830,000 (unaudited) and RMB2,335,000 (unaudited), respectively.

APPENDIX I

ACCOUNTANTS’ REPORT

27. NOTES TO THE CONSOLIDATED STATEMENTS OF CASH FLOWS

(a) Major non-cash transactions

During the Relevant Period and the nine months ended 30 September 2025, the Group had non-cash additions to right-of-use assets and lease liabilities of RMB2,572,000 and RMB735,000 (unaudited), respectively, in respect of lease arrangements for office premises and laboratories.

(b) Changes in liabilities arising from financing activities

(c) Total cash outflows for leases

The total cash outflows for leases included in the consolidated statements of cash flows are as follows:

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025
	RMB’000	RMB’000 (Unaudited)	RMB’000 (Unaudited)
Within financing activities	2,588	2,087	2,132

APPENDIX I

ACCOUNTANTS’ REPORT

28. COMMITMENTS

The Group had the following contractual commitments at the end of the Relevant Period and 30 September 2025:

	As at 31 December	As at 30 September
	2024	2025
	RMB'000	RMB'000 (Unaudited)
Acquisition of property, plant and equipment	268	569

29. RELATED PARTY TRANSACTIONS

The Directors are of the view that the following companies are related parties that have material transactions or balances with the Group during the Relevant Period and the nine months ended 30 September 2025.

(a) Names and relationships of the related parties

Name	Relationship with the Group
Jiangxi Shining Weimou Pharmaceutical Co., Ltd. (“江西閃亮維眸醫藥有限公司”)	Associate
E-nitiate Biopharmaceuticals (Hangzhou) Co., Ltd. (“啟元生物(杭州)有限公司”)	Associate
VVBI Limited	Company controlled by a director
Xia Erning (“夏爾寧”)	Director of the Company

(b) Related party transactions

The Group had the following material transactions with related parties during the Relevant Period and the nine months ended 30 September 2024 and 2025.

	Year ended 31 December	Nine months ended 30 September	
	2024	2024	2025
	RMB'000	RMB'000 (Unaudited)	RMB'000 (Unaudited)
Purchase of services from			
An associate	472	—	—
Company controlled by a director	1,103	—	298
	<u>472</u>	<u>—</u>	<u>298</u>
Rendering of services to			
An associate	472	472	—
	<u>472</u>	<u>472</u>	<u>—</u>
Advance of loans to

Interest on borrowing from			
Company controlled by a director	—	—	222
	<u>—</u>	<u>—</u>	<u>222</u>

The purchases from related parties were negotiated on an arm-length basis and in accordance with common commercial terms in the same manner as other external suppliers. The services rendered to the associate were charged based on the cost plus a certain mark-up.

APPENDIX I

ACCOUNTANTS’ REPORT

(c) Outstanding balances with related parties

The Group

	Nature	As at 31 December	As at 30 September
		2024	2025
		RMB'000	RMB'000 (Unaudited)
Amounts due from:			
An associate	Trade	500	–
A director	Non-trade	4,446	4,562
		<u> </u>	<u> </u>
Amount due to:			
Company controlled by a director	Trade	–	130
		<u> </u>	<u> </u>

The loan to the key management personnel of RMB4,250,000 is unsecured, bearing interest rate of 3.65% per annum and settled on demand. The amount due from the associate is unsecured, interest-free and normally settled on demand.

The Company

	Nature	As at 31 December	As at 30 September
		2024	2025
		RMB'000	RMB'000 (Unaudited)
Amounts due from:			
A subsidiary	Trade	6,360	6,360
Subsidiaries	Non-trade	734	727
An associate	Trade	500	–
A director	Non-trade	4,446	4,562
Total		<u>12,040</u>	<u>11,649</u>
Amounts due to:			
Subsidiaries	Non-trade	13,884	18,715
Subsidiaries	trade	7,074	4,399
Total		<u>20,958</u>	<u>23,114</u>

The maximum amounts of the non-trade related receivables due from a director during the Relevant Period and the nine months ended 30 September 2025:

	Year ended 31 December	Nine months ended 30 September
	2024	2025
	RMB'000	RMB'000 (Unaudited)
Amount due from:		
A director	Non-trade	4,446
		<u>4,562</u>

The Group has assessed the expected loss rate for amounts due from related parties by considering the financial position and credit history of these related parties and assessed that the expected credit loss is minimal.

Amount due to a related party	—	130
Redemption liabilities on owners’ capital	582,689	776,757
Total	<u>619,458</u>	<u>811,080</u>

APPENDIX I

ACCOUNTANTS’ REPORT

31. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS

Fair values

Management has assessed that the fair values of cash and cash equivalents, financial assets included in prepayments, other receivables and other assets (in the current portion), amounts due from related parties, amount due to a related party, financial liabilities included in trade and other payables and interest-bearing bank borrowings approximate to their carrying amounts largely due to the short-term maturities of these instruments. The fair values of other non-current financial assets and financial liabilities have been calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities. The changes in fair value as a result of the Group’s own non-performance risk for time deposits with an initial term of over three months and interest-bearing bank borrowings as at the end of the Relevant Period and 30 September 2025 were assessed to be insignificant.

The Group’s finance department headed by the finance manager is responsible for determining the policies and procedures for the fair value measurement of financial instruments. At the end of the Relevant Period and 30 September 2025, the finance department analyses the movements in the values of financial instruments and determines the major inputs applied in the valuation. The valuation is reviewed and approved by the finance manager.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values.

The Group invests in wealth management products issued by banks in the Chinese mainland. The Group has estimated the fair value of these wealth management products by using a discounted cash flow valuation model based on the market interest rates of instruments with similar terms and risks.

An analysis of the fair value measurement of financial instruments at 31 December 2024 and 30 September 2025 is as follows:

Fair value hierarchy

Financial assets at FVTPL:

At 31 December 2024

	Fair value measurement using			Total
	Quoted prices in active markets	Significant observable inputs	Significant unobservable inputs	
	(Level 1)	(Level 2)	(Level 3)	
	RMB’000	RMB’000	RMB’000	RMB’000
Wealth management products	–	80,240	–	80,240
	=	=	=	=

32. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Group’s principal financial instruments comprise cash and cash equivalents, financial assets at FVTPL and interest-bearing bank borrowings. The main purpose of these financial instruments is to raise finance for the Group’s operations. The Group has various other financial assets and liabilities such as trade receivables and trade and other payables, which arise directly from its operations.

The main risks arising from the Group’s financial instruments are credit risk, foreign currency risk and liquidity risk. The directors review and agree policies for managing each of these risks and they are summarised below.

Credit risk

The Group trades only with recognised and creditworthy third parties. It is the Group’s policy that all customers who wish to trade on credit terms are subject to credit verification procedures. In addition, receivable balances are monitored on an ongoing basis and the Group’s exposure to bad debts is not significant.

APPENDIX I

ACCOUNTANTS’ REPORT

Maximum exposure and year/period-end staging

The tables below show the credit quality and the maximum exposure to credit risk based on the Group’s credit policy, which is mainly based on past due information unless other information is available without undue cost or effort, and year/period-end staging classification as at the end of the Relevant Period and 30 September 2025.

The amounts presented are gross carrying amounts for financial assets.

At 31 December 2024

	12-month ECLs	Lifetime ECLs			
	Stage 1	Stage 2	Stage 3	Simplified approach	Total
	RMB’000	RMB’000	RMB’000	RMB’000	RMB’000
Amounts due from related parties	4,446	–	–	500	4,946
Financial assets included in prepayments, other receivables and other assets – normal*	4,707	–	–	–	4,707

APPENDIX I

ACCOUNTANTS’ REPORT

Foreign currency risk

The Group has transactional currency exposures. Such exposures arise from financing activities of subsidiaries in currencies other than the subsidiaries’ functional currencies.

The following table demonstrates the sensitivity at the end of the Relevant Period and 30 September 2025 to a reasonably possible change in the USD exchange rates, with all other variables held constant, of the Group’s loss before tax (arising from USD denominated financial instruments) and the Group’s equity.

	Increase/(decrease) in rate of foreign currency	Increase/(decrease) in loss before tax	Increase/(decrease) in equity
	%	RMB’000	RMB’000
31 December 2024			
If RMB weakens against USD	5	(1,057)	1,057
If RMB strengthens against USD	(5)	1,057	(1,057)
30 September 2025 (unaudited)			
If RMB weakens against USD	5	(40)	40
If RMB strengthens against USD	(5)	40	(40)

Liquidity risk

The Group monitors and maintains a level of cash and cash equivalents deemed adequate by the management of the Group to finance the operations and mitigate the effects of fluctuations in cash flows.

The maturity profile of the Group’s financial liabilities as at the end of the Relevant Period and 30 September 2025, based on the contractual undiscounted payments, is as follows:

The Group

	As at 31 December 2024			
	Within 1 year	1 to 5 years	Over 5 years	Total
	RMB’000	RMB’000	RMB’000	RMB’000
Financial liabilities included in trade and other payables	31,764	—	—	31,764
Interest-bearing bank borrowings. . .	5,073	—	—	5,073
Redemption liabilities on owners’ capital.	—	852,179	—	852,179

Total	36,494	1,017,870	—	1,054,364

APPENDIX I

ACCOUNTANTS’ REPORT

Capital management

The primary objectives of the Group’s capital management are to safeguard the Group’s abilities to continue as a going concern and to maintain healthy capital ratios in order to support its business and maximise shareholders’ value.

The Group manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Group may return capital to shareholders or issue new shares. The Group is not subject to any externally imposed capital requirements. No changes were made in the objectives, policies or processes for managing capital as at the end of the Relevant Period and 30 September 2025.

33. EVENTS AFTER 30 SEPTEMBER 2025

- (a) In November 2025, the Company completed its series D2+ investments with a total of 632,000 paid-in capital issued at a total cash consideration of RMB40,000,000.
- (b) In December 2025, the Company obtained a loan of RMB7,000,000 from a third-party investor with an interest rate of 5% per annum, maturing on 30 June 2026. The Company shall have the right to convert the principal amount of the loan into the shares of the Company before the maturity date with a conversion price of RMB63.3258, provided that the conversion conditions stipulated in the agreement is satisfied.
- (c) Pursuant to the shareholders’ resolutions and the promoters’ agreement dated 27 January 2026, the then shareholders of the Company agreed to convert the Company into a joint stock company with limited liability. The net assets of the Company as of the conversion base date, including paid-in capital, other reserve and accumulated losses, were converted into 288,244,520 ordinary shares at RMB0.1 each. Upon the completion of registration with the Administration of Market Regulation of Wenzhou City on 30 January 2026, the Company was converted into a joint stock company with limited liability under PRC Company Law.
- (d) In February 2026, 7,315,320 (after taking into account the conversions into a joint stock company with limited liability on 30 January 2026) restricted shares of the Company under the Employee Incentive Scheme were granted to certain participants through Xiulai at a price of RMB0.10 per restricted share.

34. SUBSEQUENT FINANCIAL STATEMENTS

No audited financial statements have been prepared by the Company, the Group or any of the subsidiaries now comprising the Group in respect of any period subsequent to 30 September 2025.

APPENDIX II

UNAUDITED PRO FORMA FINANCIAL INFORMATION

The following information does not form part of the Accountants’ Report from Ernst & Young, Certified Public Accountants, Hong Kong, the Company’s reporting accountants, as set out in Appendix I to this document, and is included for information purposes only. The unaudited pro forma financial information should be read in conjunction with the section headed “Financial Information” in this document and the Accountants’ Report set out in Appendix I to this document.

A. UNAUDITED PRO FORMA STATEMENT OF ADJUSTED CONSOLIDATED NET TANGIBLE ASSETS

The following unaudited *pro forma* statement of adjusted consolidated net tangible assets of the Group prepared in accordance with Rule 4.29 of the Rules Governing the Listing of Securities on the Stock Exchange of Hong Kong Limited and with reference to Accounting Guideline 7 *Preparation of Pro Forma Financial Information for Inclusion in Investment Circulars* issued by the Hong Kong Institute of Certified Public Accountants is to illustrate the effect of the [REDACTED] on the consolidated net tangible assets of the Group attributable to owners of the parent as at 30 September 2025 as if the [REDACTED] had taken place on that date.

The unaudited *pro forma* statement of adjusted consolidated net tangible assets of the Group has been prepared for illustrative purposes only and, because of its hypothetical nature, it may not provide a true picture of the consolidated net tangible assets attributable to owners of the parent had the [REDACTED] been completed as at 30 September 2025 or at any future date.

Based on an [REDACTED] of HK\$[REDACTED] per H Share . . .	(662,989)	[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED]	[REDACTED]

Notes:

- (1) The unaudited consolidated net tangible assets of the Group attributable to owners of the parent as at 30 September 2025 is equal to the unaudited net assets attributable to owners of the parent as at 30 September 2025 of RMB(662,989,000) set out in the Accountants’ Report in Appendix I to this document.
- (2) The estimated [REDACTED] from the [REDACTED] are based on an [REDACTED] of HK\$[REDACTED] and HK\$[REDACTED] per H Share, being the low end and high end of the [REDACTED] range, respectively, after deduction of the [REDACTED] and other related expenses payable by the Company and does not take into account any Shares which may be issued upon the exercise of the [REDACTED]. The estimated [REDACTED] from the [REDACTED] are converted into RMB at an exchange rate of RMB1.00 to HK\$[1.1228].
- (3) The redemption rights have been terminated in February 2026. The redemption liabilities on owners’ capital amounting to RMB[REDACTED] have been derecognised and accordingly increased the unaudited *pro forma* adjusted consolidated net tangible assets of the Group as at 30 September 2025 by RMB[REDACTED].
- (4) The unaudited *pro forma* adjusted consolidated net tangible assets per Share is arrived at after adjustments referred in note 3 above and on the basis of [REDACTED] Shares are in issue, assuming that the conversion into a joint stock company and the [REDACTED] have been completed on 30 September 2025 but does not take into account any Shares which may be sold pursuant to the exercise of the [REDACTED].

APPENDIX II

UNAUDITED PRO FORMA FINANCIAL INFORMATION

- (5) For the purpose of this unaudited *pro forma* statement of adjusted net tangible assets, the balances stated in RMB are converted into HK\$ at the rate of RMB1.00 to HK\$[1.1228].
- (6) No adjustment has been made to the unaudited *pro forma* adjusted consolidated net tangible assets to reflect any trading results or other transactions of the Group entered into subsequent to 30 September 2025.

APPENDIX III

TAXATION AND FOREIGN EXCHANGE

TAXATION OF SECURITY HOLDERS

The taxation of income and capital gains of holders of H Shares is subject to the laws and practices of the PRC and jurisdictions in which holders of H Shares are residents or otherwise subject to tax. The following summary of certain relevant taxation provisions is based on current laws and practices, and has not taken in to account the expected change or amendment to the relevant laws and policies and does not constitute any opinion or advice. The discussion does not deal with all possible tax consequences relating to an investment in the H shares, nor does it take into account the specific circumstances of any particular investor, some of which may be subject to special regulation. Accordingly, you should consult your own tax adviser regarding the tax consequences of an investment in the H shares. The discussion is based upon laws and relevant interpretations in effect as of the Latest Practicable Date, all of which are subject to change and may have retrospective effect.

This discussion does not address any aspects of PRC taxation other than income tax, VAT, stamp duty and estate duty. Prospective investors should consult their own advisers regarding PRC, Hong Kong and other tax consequences of purchasing, owning and disposing of the H Shares.

Taxation in the PRC

Taxation on Dividends

Individual Investors

Pursuant to the Individual Income Tax Law of the PRC (《中華人民共和國個人所得稅法》), which was most recently amended on August 31, 2018 and the Implementation Provisions of the Individual Income Tax Law of the PRC (《中華人民共和國個人所得稅法實施條例》), which was most recently amended on December 18, 2018 (hereinafter collectively referred to as the “IIT law”), dividends distributed by PRC enterprises are subject to individual income tax levied at a flat rate of 20%. For a foreign individual who is not a resident of the PRC, the receipt of dividends from an enterprise in the PRC is normally subject to individual income tax of 20% unless specifically exempted by the tax authority of the State Council or reduced by relevant tax treaty.

Pursuant to the Arrangement between the Mainland of China and the Hong Kong Special Administrative Region for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes on Income (《內地和香港特別行政區關於對所得避免雙重徵稅和防止偷漏稅的安排》) (the “Arrangement for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes on Income (《對所得避免雙重徵稅和防止偷漏稅的安排》)”) signed by the Mainland of China and the Hong Kong Special Administrative Region on August 21, 2006, the PRC government may impose tax on dividends paid by a PRC company to a Hong Kong resident (including natural person and legal entity), but such tax shall not exceed 10% of the total amount of dividends payable. If a Hong Kong resident directly holds 25% or more of equity interest in a PRC company and the Hong Kong resident is the beneficial owner of the dividends and meets other conditions, such tax shall not exceed 5% of the total amount of dividends payable by the PRC company. The Fifth Protocol to the Arrangement between the Mainland of China and the Hong Kong Special Administrative Region for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with Respect to Taxes on Income (《國家稅務總局關於<內地和香港特別行政區關於對所得避免雙重徵稅和防止偷漏稅的安排>第五議定書》) (the “Fifth Protocol”) issued by the STA and became effective on December 6, 2019 provides that such provisions shall not apply to arrangements or transactions made for one of the primary purposes of obtaining such tax benefits.

Enterprise Investors

In accordance with the Enterprise Income Tax Law of the PRC (《中華人民共和國企業所得稅法》) issued by NPC on March 16, 2007 and latest amended on December 29, 2018 and the Implementation Provisions of the Enterprise Income Tax Law of the PRC (《中華人民共和國企業所得稅法實施條例》) issued by the State Council on December 6, 2007, came into effect on January 1, 2008 latest and amended on December 6, 2024 (hereinafter collectively referred to as the “EIT Law”), a non-resident enterprise is generally subject to a 10% enterprise

APPENDIX III

TAXATION AND FOREIGN EXCHANGE

income tax on PRC-sourced income (including dividends received from a PRC resident enterprise), if it does not have an establishment or premise in the PRC or has an establishment or premise in the PRC but its PRC-sourced income has no real connection with such establishment or premise. The aforesaid income tax payable for non-resident enterprises are deducted at source, where the payer of the income is required to withhold the income tax from the amount to be paid to the non-resident enterprise. Such withholding tax may be reduced or exempted pursuant to an applicable treaty for the avoidance of double taxation.

The Circular of the State Administration of Tax on Issues Relating to the Withholding and Remitting of Enterprise Income Tax by PRC Resident Enterprises on Dividends Distributed to Overseas Non-Resident Enterprise Shareholders of H Shares (《國家稅務總局關於中國居民企業向境外H股非居民企業股東派發股息代扣代繳企業所得稅有關問題的通知》), which was issued and implemented by the STA on November 6, 2008, further clarified that a PRC-resident enterprise must withhold corporate income tax at a rate of 10% on the dividends paid to non-PRC resident enterprise holders of H Shares which are derived out of profit generated since 2008. Non-PRC resident enterprise shareholders who need to enjoy tax treaty benefits, the relevant provisions of such tax treaty shall apply.

Pursuant to the Arrangement for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes on Income (《對所得避免雙重徵稅和防止偷漏稅的安排》), the PRC government may impose tax on dividends paid by a PRC company to a Hong Kong resident (including natural person and legal entity), but such tax shall not exceed 10% of the total amount of dividends payable. If a Hong Kong resident directly holds 25% or more of equity interest in a PRC company and the Hong Kong resident is the beneficial owner of the dividends and meets other conditions, such tax shall not exceed 5% of the total amount of dividends payable by the PRC company. The Fifth Protocol provides that such provisions shall not apply to arrangements or transactions made for one of the primary purposes of obtaining such tax benefits.

Although there may be other provisions under the Arrangement for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes on Income (《對所得避免雙重徵稅和防止偷漏稅的安排》), the treaty benefits under the criteria shall not be granted in the circumstance where relevant gains, after taking into account all relevant facts and conditions, are reasonably deemed to be one of the main purposes for the arrangement or transactions which will bring any direct or indirect benefits under this Arrangement, except when the grant of benefits under such circumstance is consistent with relevant objective and goal under the Arrangement. The application of the dividend clause of tax agreements is subject to the requirements of PRC tax law and regulation, such as the Notice of the State Taxation Administration on the Issues Concerning the Application of the Dividend Clauses of Tax Agreements (《國家稅務總局關於執行稅收協定股息條款有關問題的通知》).

Tax Treaties

Non-resident investors residing in jurisdictions which have entered into treaties or adjustments for the avoidance of double taxation with the PRC might be entitled to a reduction of the Chinese corporate income tax imposed on the dividends received from PRC companies. The PRC currently has entered into Avoidance of Double Taxation Treaties or Arrangements with a number of countries and regions including Hong Kong Special Administrative Region, Macau Special Administrative Region, Australia, Canada, France, Germany, Japan, Malaysia, the Netherlands, Singapore, the United Kingdom and the United States. Non-PRC resident enterprises entitled to preferential tax rates in accordance with the relevant taxation treaties or arrangements are required to apply to the Chinese tax authorities for a refund of the corporate income tax in excess of the agreed tax rate, and the refund application is subject to approval by the Chinese tax authorities.

Tax related to equity transfer income

Individual Investors

Under the Individual Income Tax Law and its implementation rules, individuals are subject to individual income tax at a rate of 20% on gains realized on the sale of equity interests in PRC resident enterprises.

APPENDIX III

TAXATION AND FOREIGN EXCHANGE

Pursuant to the Circular on Continuing the Temporary Exemption of Individual Income Tax on Gains from Share Transfers by Individuals (《關於個人轉讓股票所得繼續暫免徵收個人所得稅的通知》), which was promulgated by the MOF and the STA and became effective on March 30, 1998, from January 1, 1997, income of individuals from the transfer of shares in listed companies continues to be temporarily exempted from individual income tax. The STA does not specify whether to continue to exempt individuals from personal income tax on the income from the transfer of shares in listed companies in the newly revised EIT Law and Implementation Rules of the EIT Law. According to the Announcement of the MOF and the STA on the Catalog of Continuing Effective Preferential Individual Income Tax Policies (《財政部國家稅務總局關於繼續有效的個人所得稅優惠政策目錄的公告》) issued by the MOF and the STA on December 29, 2018, the Circular on Continuing the Temporary Exemption of Individual Income Tax on Gains from Share Transfers by Individuals (《關於個人轉讓股票所得繼續暫免徵收個人所得稅的通知》) shall continue to be effective.

Although the IIT Law and its implementation rules have not stated whether it will continue exempting individual income tax on income of individuals from transfer of listed shares, the Circular on Relevant Issues Concerning the Collection of Individual Income Tax over the Income Received by Individuals from Transfer of Listed Shares Subject to Sales Limitation (《關於個人轉讓上市公司限售股所得徵收個人所得稅有關問題的通知》) ("Notice") promulgated jointly by the MOF, the STA and the CSRC on 31 December 2009 and implemented on the same day, the Notice of State Taxation Administration of the PRC on Issues Relating to Levying and Payment of Individual Income Tax on Income from Transfer of Moratorium Shares (《國家稅務總局關於限售股轉讓所得個人所得稅徵繳有關問題的通知》) promulgated by the STA on 18 January 2010 and effective from 18 January 2010 and the Circular on Relevant Issues Concerning the Collection of Individual Income Tax over the Income Received by Individuals from Transfer of Listed Shares Subject to Sales Limitation (《關於個人轉讓上市公司限售股所得徵收個人所得稅有關問題的補充通知》) promulgated by the MOF, the STA and CSRC on 10 November 2010 and effective from 10 November 2010, states that individuals' income from transfer of listed shares on certain domestic stock exchanges (including Shanghai Stock Exchange and the Shenzhen Stock Exchange) shall continue being exempting from individual income tax, except for the shares subject to sales restriction. As of the Latest Practicable Date, the aforesaid provision has not expressly provided that individual income tax shall be collected from non-PRC resident individuals on the sale of shares of PRC resident enterprises listed on overseas stock exchanges.

Enterprise Investors

In accordance with the EIT Law and its implementing regulations, a non-resident enterprise is generally subject to a 10% enterprise income tax on PRC-sourced income (including gains from the sale of shares held by a PRC resident enterprise), if such non-resident enterprise does not have an establishment or place in the PRC, or has an establishment or place in the PRC but the PRC-sourced income is not connected with such establishment or place in the PRC. The income tax payable by a non-resident enterprise shall be withheld at source, and the payer shall be the withholding agent. The tax shall be withheld by the withholding agent from the amount paid to the non-resident enterprise when such payment is made or due. The tax may be reduced or exempted pursuant to the applicable tax treaty or arrangement.

Shanghai-Hong Kong Stock Connect Taxation Policy

According to the Circular on Tax Policies relating to the Pilot Program of Shanghai-Hong Kong Stock Connect (《關於滬港股票市場交易互聯互通機制試點有關稅收政策的通知》) issued by the MOF, the STA and the CSRC on October 31, 2014 and effective as of November 17, 2014, gains from the transfer price difference from investments by domestic enterprises in stocks listed on the Hong Kong Stock Exchange through the Shanghai-Hong Kong Stock Connect shall be included in their total revenues subject to EIT in accordance with the law. For dividends received by mainland individual investors investing in H-shares listed on the Hong Kong Stock Exchange through the Shanghai-Hong Kong Stock Connect, the H-share company shall apply to CSDC, which shall provide the H-share company with the roster of mainland individual investors, and then the H-share company shall withhold the individual income tax according to the tax rate of 20%.

APPENDIX III

TAXATION AND FOREIGN EXCHANGE

According to the Announcement on Continued Implementation of Individual Income Tax Policies relating to Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Mutual Recognition of Funds between the Mainland China and the Hong Kong Special Administrative Region (《關於延續實施滬港、深港股票市場交易互聯互通機制和內地與香港基金互認有關個人所得稅政策的公告》) promulgated on August 21, 2023 and implemented on the same day, individual income tax shall be exempted on gains from the transfer price difference from investments by mainland individual investors in stocks listed on the Hong Kong Stock Exchange through the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect to December 31, 2027.

According to the Circular on Tax Policies relating to the Pilot Program of Shanghai-Hong Kong Stock Connect, income from dividends from investments by mainland resident enterprises in stocks listed on the Hong Kong Stock Exchange through the Shanghai-Hong Kong Stock Connect shall be included in their total revenue and subject to enterprise income tax in accordance with the law. Dividend income derived by mainland resident enterprises from holding H-shares continuously for 12 months is exempted from enterprise income tax in accordance with the law. The company of such H Shares will not withhold the income tax on dividends for mainland enterprise investors and those investors shall report and pay the relevant tax themselves.

Shenzhen-Hong Kong Stock Connect Taxation Policy

According to the Circular on Tax Policies relating to the Pilot Program of Shenzhen-Hong Kong Stock Connect (《關於深港股票市場交易互聯互通機制試點有關稅收政策的通知》) issued by the MOF, the STA and the CSRC on November 5, 2016 and effective as of December 5, 2016, gains from the transfer price difference from investments by domestic enterprises in stocks listed on the Hong Kong Stock Exchange through the Shenzhen-Hong Kong Stock Connect shall be included in their total revenue and subject to EIT in accordance with the law. For dividends received by mainland individual investors investing in H-shares listed on the Hong Kong Stock Exchange through the Shenzhen-Hong Kong Stock Connect, the H-share company shall apply to CSDC, which shall provide the H-share company with the roster of mainland individual investors, and then the H-share company shall withhold the individual income tax according to the tax rate of 20%.

According to the Announcement on Continuing the Implementation of Individual Income Tax Policies relating to Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Mutual Recognition of Funds between the Mainland China and the Hong Kong Special Administrative Region (《關於繼續執行滬港、深港股票市場交易互聯互通機制和內地與香港基金互認有關個人所得稅政策的公告》) jointly issued by the MOF, the STA, and the CSRC on December 4, 2019 and effective as of December 5, 2019 and the Announcement on Continued Implementation of Individual Income Tax Policies relating to Shanghai-Hong Kong Stock Connect and Shenzhen-Hong Kong Mutual Recognition of Funds between the Mainland China and the Hong Kong Special Administrative Region (《關於延續實施滬港、深港股票市場交易互聯互通機制和內地與香港基金互認有關個人所得稅政策的公告》) promulgated on August 21, 2023 and implemented on the same day, individual income tax shall be exempted on gains from the transfer price difference from investments by mainland individual investors in stocks listed on the Hong Kong Stock Exchange through the Shanghai-Hong Kong Stock Connect from December 5, 2019 to December 31, 2027.

According to the Circular on Tax Policies relating to the Pilot Program of Shenzhen-Hong Kong Stock Connect, income from dividends from investments by mainland enterprise investors in stocks listed on the Hong Kong Stock Exchange through the Shenzhen-Hong Kong Stock Connect shall be included in their total revenue and subject to enterprise income tax in accordance with the law. Dividend income derived by mainland resident enterprises from holding H-shares continuously for 12 months shall be exempted from enterprise income tax in accordance with the law. The company of such H Shares will not withhold the income tax on dividends for domestic enterprises and those enterprises shall report and pay the relevant tax themselves.

APPENDIX III

TAXATION AND FOREIGN EXCHANGE

Stamp Duty

According to the Stamp Duty Law of the People’s Republic of China (《中華人民共和國印花稅法》), which was promulgated on June 10, 2021 and came into effect on July 1, 2022, the disposal of H Shares by non-mainland China investors outside of the mainland China is not subject to the requirements of the Stamp Duty Law of the People’s Republic of China.

Estate duty

According to the PRC law, no estate duty is currently levied in the mainland China.

MAJOR TAXATION OF OUR COMPANY IN THE PRC

Enterprise Income Tax

According to the Enterprise Income Tax Law of the People’s Republic of China, within the territory of the PRC, the enterprises and other organizations (the “enterprises”) that have incomes are taxpayers of enterprise income tax and shall pay enterprise income tax in accordance with this law.

Enterprises are classified into resident and non-resident enterprises. Where non-resident enterprises do not have an establishment or place in the PRC, or have an establishment or place in the PRC but the PRC-sourced income is not connected with such establishment or place in the PRC, they shall be subject to enterprise income tax on PRC-sourced income. The income tax payable by a non-resident enterprise shall be withheld at source, and the payer shall be the withholding agent. The tax shall be withheld by the withholding agent from the amount paid to the non-resident enterprise when such payment is made or due. Meanwhile, any gains realized on the transfer of shares by such investors are subject to enterprise income tax by way of withholding if such gains are regarded as income derived from the transfer of property within the PRC.

VAT

According to the Value-Added Tax Law of the PRC (《中華人民共和國增值稅法》) (“VAT Law”) promulgated by the SCNPC on December 25, 2024 and became effective on January 1, 2026, any entity or individual who sells goods, services, intangible assets, and real estate within the territory of the PRC is subject to pay VAT, the applicable VAT rates for general taxpayers are 13%, 9% and 6% respectively.

FOREIGN EXCHANGE ADMINISTRATION IN THE PRC

The lawful currency of the PRC is the Renminbi. The SAFE, authorized by the PBOC, is empowered with the functions of administering all matters relating to foreign exchange, including the enforcement of foreign exchange regulations.

Pursuant to the Foreign Exchange Administrative Regulations of the PRC (《中華人民共和國外匯管理條例》) promulgated by the State Council on January 29, 1996, effective on April 1, 1996 and last amended on August 5, 2008, and the Administrative Regulations on Foreign Exchange Settlement, Sales and Payment (《結匯、售匯及付匯管理規定》) promulgated by the PBOC on June 20, 1996 and effective on July 1, 1996, Renminbi is freely convertible for payments of current account items such as trade and service-related foreign exchange transactions and dividend payments after the relevant financial institutions have reasonably examined the authenticity of the transaction documents and their consistency with foreign exchange receipts and payments, but are not freely convertible for capital expenditure items such as direct investment, loans or investments in securities outside the PRC unless the approval of the SAFE or its local counterparts is obtained in advance.

According to the Notice on Issues concerning the Foreign Exchange Administration of Overseas Listing (《關於境外上市外匯管理有關問題的通知》) promulgated by the SAFE on December 26, 2014, a domestic company shall, within 15 working days after the completion of its overseas listing, go through the registration of overseas listing with the foreign exchange bureau at its place of registration.

APPENDIX III

TAXATION AND FOREIGN EXCHANGE

According to the Guidance on Foreign Exchange Business for Capital Account (2024 Edition) (《資本項目外匯業務指引(2024年版)》), proceeds raised by domestic companies through overseas listings shall, in principle, be repatriated to China in a timely manner, either in RMB or foreign currency. The use of proceeds must be consistent with the relevant content disclosed in public documents such as prospectuses, corporate bond offering circulars, shareholders’ circulars, board of directors or shareholders’ meeting resolutions. Where domestic companies use proceeds raised from overseas listings to engage in activities such as outbound direct investment, overseas securities investment, or overseas lending, they must comply with the relevant foreign exchange regulations.

According to the Circular of the State Administration of Foreign Exchange on Reforming and Regulating Policies for the Administration over Foreign Exchange Settlement of Capital Accounts (《國家外匯管理局關於改革和規範資本項目結匯管理政策的通知》) announced by SAFE which became effective on June 9, 2016, and was last amended on December 4, 2023, the Notice of the State Administration of Foreign Exchange on Further Deepening Reform to Promote Cross-border Trade and Investment Facilitation (《國家外匯管理局關於進一步深化改革促進跨境貿易投資便利化的通知》) announced by SAFE which became effective on December 4, 2023, and the Circular of the State Administration of Foreign Exchange on Matters Concerning Deepening the Reform of Foreign Exchange Administration for Cross-Border Investment and Financing (《國家外匯管理局關於深化跨境投融資外匯管理改革有關事宜的通知》) announced by SAFE which became effective on September 12, 2025, the foreign exchange receipts under capital accounts of domestic institutions are subject to discretionary settlement policies. The foreign exchange receipts under capital accounts (including foreign exchange capital, foreign debts, and repatriated funds raised through overseas listing) subject to discretionary settlement as expressly prescribed in the relevant policies may be settled with banks according to the actual need of the domestic institutions for business operation. Domestic institutions may, at their discretion, settle up to 100% of foreign exchange receipts under capital accounts for the time being, SAFE may adjust the above proportion in due time according to the balance of payments. While eligible for the discretionary settlement of foreign exchange receipts under capital accounts, domestic institutions may also opt to use their foreign exchange receipts according to the payment-based settlement system. A bank shall, in handling each transaction of foreign exchange settlement for a domestic institution according to the principle of payment-based settlement, review the authenticity and compliance of the use of the funds settled in the previous foreign exchange settlement (including discretionary settlement and payment-based settlement) of such domestic institution. Domestic institutions’ foreign exchange receipts under the capital account and the RMB funds obtained from the settlement thereof shall not directly or indirectly, be used for expenditure beyond the enterprise’s business scope or expenditure prohibited by laws and regulations of the state, shall not directly or indirectly, be used for investments in securities or other investments or wealth management unless otherwise expressly specified (excluding financial products with a risk rating no higher than level II and structured deposits), and shall not be used for the granting of loans to non-affiliated enterprises (except where it is expressly permitted in the business scope).

According to the Circular on Optimizing Administration of Foreign Exchange to Support the Development of Foreign-related Business by the State Administration of Foreign Exchange (《國家外匯管理局關於優化外匯管理支持涉外業務發展的通知》) issued by the SAFE on April 10, 2020, eligible enterprises are allowed to make domestic payments by using receipts under capital accounts, such as their capital funds, foreign credits and the income from overseas listing, without need to provide the evidentiary materials concerning authenticity on a transaction-by-transaction basis to banks in advance, provided that their capital use shall be authentic and in line with provisions, and conform to the prevailing administrative regulations on the use of receipts under capital accounts. Local foreign exchange authorities shall strengthen monitoring analysis and interim and post regulation.

APPENDIX III

TAXATION AND FOREIGN EXCHANGE

According to the Circular of the State Administration of Foreign Exchange on Further Simplifying and Improving the Policies for the Administration of Foreign Exchange in Direct Investment (《國家外匯管理局關於進一步簡化和改進直接投資外匯管理政策的通知》) promulgated on February 13, 2015 and effective on June 1, 2015, the SAFE has canceled the requirement for the foreign exchange registration approval for domestic and overseas direct investments. Instead, the banks are directly responsible for the review and handling of foreign exchange registration for domestic and overseas direct investments, and the SAFE and its branches exercise indirect supervision over foreign exchange registration for direct investment via the banks.

APPENDIX IV SUMMARY OF PRINCIPAL LEGAL AND REGULATORY PROVISIONS

PRC LAWS AND REGULATIONS

This Appendix sets out summaries of certain aspects of PRC laws and regulations, which are relevant to the Company’s operations and business. Laws and regulations relating to taxation in the PRC are discussed separately in “Appendix III—Taxation and Foreign Exchange” to this document. The principal objective of this summary is to provide potential investors with an overview of the principal PRC legal and regulatory provisions applicable to the Company. This summary is not intended to include all the information which may be important to potential investors. For more details on laws and regulations which are relevant to our business, please refer to the section headed “Regulatory Overview” in this document.

The PRC Legal System

The PRC legal system is based on the PRC Constitution (《中華人民共和國憲法》), which was adopted on September 20, 1954 and subsequently amended on January 17, 1975, March 5, 1978, December 4, 1982, April 12, 1988, March 29, 1993, March 15, 1999, March 14, 2004 and March 11, 2018. The PRC legal system is made up of written laws, administrative regulations, local regulations, autonomous regulations, separate regulations, rules and regulations of State Council departments, rules and regulations of local governments, laws of special administrative regions and international treaties of which the PRC government is a signatory, and other regulatory documents. Court judgments do not constitute legally binding precedents, although they may be used for the purposes of judicial reference and guidance.

Pursuant to the PRC Constitution and the PRC Legislation Law (《中華人民共和國立法法》), which was adopted on March 15, 2000 and amended on March 15, 2015 and March 13, 2023, the NPC and its Standing Committee are empowered to exercise the legislative power of the State. The NPC has the power to formulate and amend basic laws governing state organs, civil, criminal and other matters. The SCNPC is empowered to formulate and amend laws other than those required to be enacted by the NPC and to supplement and amend parts of the laws enacted by the NPC during the adjournment of the NPC, provided that such supplements and amendments are not in conflict with the basic principles of such laws.

The State Council is the highest organ of state administration and has the power to formulate administrative regulations based on the PRC Constitution and laws.

The people’s congresses of the provinces, autonomous regions and municipalities and their respective standing committees may formulate local regulations based on the specific circumstances and actual needs of their respective administrative areas, provided that such regulations do not contravene any provision of the PRC Constitution, laws or administrative regulations. The people’s congresses of cities with districts and their respective standing committees may formulate local regulations with respect to urban and rural construction and administration, environmental protection, historical and cultural protection and other aspects according to the specific circumstances and actual needs of such cities, which will become enforceable after being reported to and approved by the standing committees of the people’s congresses of the relevant provinces or autonomous regions, provided that such local regulations do not contravene any provision of the PRC Constitution, laws, administrative regulations and local regulations of their respective provinces or autonomous regions.

The ministries and commissions of the State Council, PBOC, the National Audit Office of the PRC and the subordinate institutions with administrative functions directly under the State Council may formulate rules and regulations within the authorization of their respective departments in accordance with the laws and administrative regulations, and the decisions and orders of the State Council. The people’s governments of the provinces, autonomous regions, municipalities directly under the central government and cities with districts, autonomous prefecture may formulate rules and regulations in accordance with the laws, administrative regulations and local regulations of such provinces, autonomous regions and municipalities directly under the central government.

The PRC Constitution has supreme legal authority and no laws, administrative regulations, local regulations, autonomous regulations or separate regulations may contravene the PRC Constitution. The PRC laws rank higher than administrative regulations, local regulations and rules. The administrative regulations rank higher than local regulations and

APPENDIX IV

SUMMARY OF PRINCIPAL LEGAL AND REGULATORY PROVISIONS

rules. The rules enacted by the people's governments of the provinces or autonomous regions rank higher than the rules enacted by the people's governments of the cities with districts and autonomous prefectures within the administrative areas of such provinces and the autonomous regions.

The NPC has the power to alter or annul any inappropriate laws enacted by its Standing Committee, and to annul any autonomous regulations or separate regulations which have been approved by its Standing Committee, but which contravene the PRC Constitution or the PRC Legislation Law. The SCNPC has the power to annul any administrative regulations that contravene the PRC Constitution and laws, to annul any local regulations that contravene the PRC Constitution, laws or administrative regulations, and to annul any autonomous regulations or local regulations which have been approved by the standing committees of the people's congresses of the relevant provinces, autonomous regions or municipalities, but which contravene the PRC Constitution and the PRC Legislation Law. The State Council has the power to alter or annul any inappropriate ministerial rules and rules of local governments. The people's congresses of provinces, autonomous regions or municipalities have the power to alter or annul any inappropriate local regulations enacted or approved by their respective standing committees. The standing committees of local people's congresses have the power to annul inappropriate rules enacted by the people's governments at the corresponding level. The people's governments of provinces and autonomous regions have the power to alter or annul any inappropriate rules enacted by the people's governments at a lower level.

According to the PRC Constitution and the PRC Legislation Law, the power to interpret laws is vested in the SCNPC. Pursuant to the Resolution of the SCNPC Providing an Improved Interpretation of the Law (《全國人民代表大會常務委員會關於加強法律解釋工作的決議》) implemented on 10 June 1981, issues related to the further clarification or supplement of laws should be interpreted or provided by the SCNPC, issues related to the specific application of laws and decrees in a court trial should be interpreted by the Supreme People's Court, issues related to the specific application of laws and decrees in a prosecution process should be interpreted by the Supreme People's Procuratorate, and the legal issues other than the above-mentioned should be interpreted by the State Council and the competent authorities. If there are differences in principle in the interpretation of the Supreme People's court and the Supreme People's Procuratorate, they shall be submitted to the SCNPC for interpretation or decision. The State Council and its ministries and commissions are also vested with the power to give interpretations of the administrative regulations and departmental rules which they have promulgated. At the regional level, the power to interpret regional laws is vested in the regional legislative and administrative authorities which promulgate such laws.

The PRC Judicial System

Pursuant to the PRC Constitution and the Law of Organization of the People's Courts of the PRC (《中華人民共和國人民法院組織法》) most recently revised on 26 October 2018 and taking effect on 1 January 2019, the people's courts of the PRC are classified into the Supreme People's Court, the local people's courts at various local levels, and other special people's courts. The local people's courts at various local levels are divided into three levels, namely, the primary people's courts, the intermediate people's courts and the higher people's courts. The primary people's courts are further divided into civil, criminal and economic tribunals. The intermediate people's courts have structure similar to those of the primary people's courts and other special tribunals, such as the intellectual property courts, military courts and maritime courts. These two levels of people's courts are subject to supervision by people's courts at higher levels. The Supreme People's Procuratorate is authorized to supervise the judgment and ruling of the people's courts at all levels which have been legally effective, and the people's procuratorate at a higher level is authorized to supervise the judgment and ruling of a people's court at a lower level which have been legally effective. The Supreme People's Court is the highest judicial authority in the PRC. It supervises the administration of justice by the people's courts at all levels.

The people's courts employ a two-tier appellate system. The judgments or rulings of the second instance at a people's court are final. A party may appeal against the judgment or ruling of the first instance of a local people's court. The people's procuratorate may present a protest to the people's court at the next higher level in accordance with the procedures stipulated by the laws. In the absence of any appeal by the parties and any protest by the people's procuratorate within the stipulated period, the judgments or rulings of the people's court are

APPENDIX IV

SUMMARY OF PRINCIPAL LEGAL AND REGULATORY PROVISIONS

final. Judgments or rulings of the second instance of the intermediate people’s courts, the higher people’s courts and the Supreme People’s Court are final. Judgments or rulings of the first instance of the Supreme People’s Court are also final. However, if the Supreme People’s Court or a people’s court at the next higher level discovers an error in a final and binding judgment or ruling which has taken effect in any people’s court at a lower level, or the presiding judge of a people’s court finds an error in a final and binding judgment or ruling which has taken effect in the court over which he presides, a retrial of the case may be initiated according to the judicial supervision procedures.

The Civil Procedure Law of the PRC (《中華人民共和國民事訴訟法》) adopted on April 9, 1991 and most recently amended on September 1, 2023, which became effective from January 1, 2024, prescribes the conditions for instituting a civil action, the jurisdiction of the people’s courts, the procedures to be followed for conducting a civil action, and the procedures for enforcement of a civil judgment or ruling. All parties to a civil action conducted within the PRC must abide by the Civil Procedure Law of the PRC. Generally, a civil case is initially heard by the court located in the defendant’s place of domicile. The court of jurisdiction in respect of a civil action may also be chosen by explicit agreement among the parties to a contract, provided that the people’s court having jurisdiction should be located at places substantially connected with the disputes, such as the plaintiff’s or the defendant’s place of domicile, the place where the contract is executed or signed or the place where the object of the action is located, provided that the provisions regarding the level of jurisdiction and exclusive jurisdiction regarding the level of.

A foreign individual, a person without nationality, a foreign enterprise or a foreign organization that institute or respond to proceedings in a people’s court is given the same litigation rights and obligations as a citizen or legal person of the PRC. Should a foreign court limit the litigation rights of PRC citizens and enterprises, the PRC court shall apply the same limitations to the citizens and enterprises of such foreign country. A foreign individual, a person without nationality, a foreign enterprise or a foreign organization must engage a PRC lawyer in case he/she or it needs to engage a lawyer for the purpose of initiating actions or defending against litigations at a PRC court. In accordance with the international treaties to which the PRC is a signatory or a participant or according to the principle of reciprocity, a people’s court and a foreign court may request each other to serve documents, conduct investigation, collect evidence and conduct other actions on its behalf. A PRC court shall not accommodate any request made by a foreign court which will result in the violation of sovereignty, security or public interests of the PRC.

All parties to a civil action shall perform legally effective judgments and rulings. If any party to a civil action refuses to abide by a judgment or ruling made by a people’s court or an award made by an arbitration tribunal in the PRC, the other party may apply to the people’s court for the enforcement of the same within two years, subject to application for postponed enforcement or revocation. If a party fails to satisfy within the stipulated period a judgment which the court has granted an enforcement approval, the court may, upon the application of the other party, mandatorily enforce the judgment.

A party seeking to enforce a judgment or ruling of a people’s court against another party who is not or whose property is not within the PRC may apply to a foreign court with jurisdiction over the case for recognition and enforcement of such judgment or ruling. Alternatively, the people’s court may, pursuant to an international treaty concluded or acceded to by the PRC or in accordance with the principle of reciprocity, request the foreign court to recognize and execute the judgment or ruling. Likewise, if the PRC has entered into either a treaty relating to judicial enforcement with the relevant foreign country or according to the principle of reciprocity, a foreign judgment or ruling may also be recognized and enforced in accordance with the PRC enforcement procedures by a PRC court unless the people’s court considers that the recognition or enforcement of such judgment or ruling would violate the basic legal principles of the PRC, its sovereignty or national security, or would not be in the public interest.

APPENDIX IV SUMMARY OF PRINCIPAL LEGAL AND REGULATORY PROVISIONS

The PRC Company Law, Overseas Listing Trial Measures and Guidance for Articles of Association

A joint stock limited company incorporated in the PRC and seeking a listing on the Stock Exchange is mainly subject to the following laws and regulations in the PRC:

- The PRC Company Law (《中華人民共和國公司法》) which was promulgated by the SCNPC on 29 December 2023 and took effect on July 1, 2024;
- The Trial Administrative Measures of Overseas Securities Offering and Listing by Domestic Companies (《境內企業境外發行證券和上市管理試行辦法》) and five relevant guidelines (hereinafter referred to as the “Overseas Listing Trial Measures”), which were promulgated by the CSRC on February 17, 2023 pursuant to the PRC Securities Law and are applicable to the direct and indirect overseas share offering or listing of domestic companies; and
- The Guidelines for the Articles of Association of Listed Companies (《上市公司章程指引》) (the “Guidance for Articles of Association”) which was most recently amended on March 28, 2025 by the CSRC. The Articles of Association is formulated based on the Guidance for Articles of Association on a reference basis, the summary of which is set out in the section entitled “Appendix V—Summary of Articles of Association” to this document.

Set out below is a summary of the major provisions of the currently effective PRC Company Law, the Overseas Listing Trial Measures and the Guidance for Articles of Association which are applicable to the Company.

General

A joint stock limited company refers to a corporate legal person established in China under the PRC Company Law with its registered capital divided into shares. All shares of the company shall be either par value shares or no par value shares in accordance with the company’s articles of association. Where par value shares are adopted, each share shall have equal value. The liability of the company is limited to the total amount of all assets it owns and the liability of its shareholders is limited to the extent of the shares they subscribe for.

A joint stock limited company shall conduct its business in accordance with laws and administrative regulations. It may invest in other limited liability companies and joint stock limited companies and its liabilities with respect to such invested companies are limited to the amount invested. Unless otherwise provided by law, the company may not be a contributor that undertakes joint liabilities for the debts of the invested companies.

Incorporation

A joint stock limited company may be incorporated by promotion or floatation. A joint stock limited company shall be incorporated by a minimum of one but no more than 200 promoters, and at least half of the promoters must be residents within the PRC. Companies incorporated by promotion are companies of which the entire registered capital is subscribed for by the promoters. Shares in the company incorporated by promotion shall not be offered to others unless the registered capital has been fully paid up. If laws, administrative regulations and decisions of the State Council have separate provisions on paid-in registered capital and the minimum registered capital, the company should follow such provisions.

For companies incorporated by way of promotion, the promoters shall subscribe in writing for the shares required to be subscribed for by them and pay up their capital contributions under the articles of association. Procedures relating to the transfer of titles to non-monetary assets shall be duly completed if such assets are to be contributed as capital. Promoters who fail to pay up their capital contributions in accordance with the foregoing provisions shall assume default liabilities in accordance with the covenants set out in the promoters’ agreements. After the promoters have confirmed the capital contribution under the

APPENDIX IV SUMMARY OF PRINCIPAL LEGAL AND REGULATORY PROVISIONS

articles of association, a board of directors and a board of supervisors shall be elected and the board of directors shall apply for registration of incorporation by filing the articles of association with the company registration authority, and other documents as required by laws or administrative regulations.

Where companies are incorporated by floatation, not less than 35% of their total number of shares must be subscribed for by the promoters, unless otherwise provided for by laws or administrative regulations. The promoters shall preside over and convene an inauguration meeting within thirty days from the date of the full payment of subscription capital. The inauguration meeting shall be formed by the promoters and subscribers. Where the shares issued are not fully subscribed for within the offer period stipulated in the share offering document, or where the promoter fails to convene an inauguration meeting within thirty days of the subscription capital for the shares issued being fully paid up, the subscribers may demand that the promoters refund the subscription capital so paid together with the interest calculated at bank rates of a deposit for the same period. Within thirty days of the conclusion of the inauguration meeting, the board of directors shall apply to the registration authority for registration of the establishment of the company. A company is formally established and has the status of a legal person after the registration with the relevant administration for market regulation has been completed and a business license has been issued.

Share Capital

The promoters may make a capital contribution in currencies, or non-monetary assets such as in kind, intellectual property rights or land use rights which can be appraised with monetary value and transferred lawfully, except for assets which are prohibited from being contributed as capital by laws or administrative regulations. If a capital contribution is made in non-monetary assets, a valuation of the assets contributed must be carried out pursuant to the provisions of laws or administrative regulations on valuation without any over-valuation or under-valuation.

There is no limit under the PRC Company Law as to the percentage of shares held by an individual shareholder in a company. The shares of a company are represented by stocks. A stock is a certificate issued by the company to certify the share held by a shareholder. The stock issued by the company shall be in the form of registered stock.

The issuance of shares shall be conducted in a fair and equitable manner. Each share of the same class must carry equal rights. Shares issued at the same time and within the same class must be issued on the same conditions and at the same price. The same price per share shall be paid by any share subscriber (whether an entity or an individual). The share offering price may be equal to or greater than the par value of the share, but may not be less than the par value.

Under the Overseas Listing Trial Measures, if a domestic company offers shares overseas, it may raise funds and dividend distributions in foreign currency or Renminbi.

Under the PRC Company Law, a company issuing registered share certificates shall maintain a shareholder registry which sets forth the following matters:

- (i) the name and domicile of each shareholder;
- (ii) the number of shares held by each shareholder;
- (iii) the serial numbers of shares held by each shareholder; and
- (iv) the date on which each shareholder acquired the shares.

Increase in Share Capital

In light of its operational and development needs and in accordance with laws and regulations, a company may increase its share capital under any of the following methods, subject to the resolutions be passed at a shareholders' meeting: (i) a public offering of shares;

APPENDIX IV SUMMARY OF PRINCIPAL LEGAL AND REGULATORY PROVISIONS

(ii) a private placement of shares; (iii) offering of bonus shares to existing shareholders; (iv) the conversion of reserve funds into shares; and (v) any other methods provided in law and administrative regulations and approved by the CSRC.

Pursuant to the PRC Company Law, a company may, according to its articles of association, issue the following classified shares, which have different rights from those of the common shares: (i) shares with priority or inferior rights to profits or remaining property in distribution; (ii) shares with more or less voting rights per share than those of the common shares; (iii) shares whose transfer is subject to the consent of the company and other restrictions; (iv) other classified shares provided by the State Council. A company making a public offering of shares shall not issue any of the classified shares as prescribed on items (ii) and (iii), except those issued prior to the public offering. Where a company is issuing new shares, resolutions shall be passed at shareholders' meeting in accordance with the articles of association in respect of the class and amount of the new shares, the issue price of the new shares, the commencement and end dates for the issue of the new shares and when the new shares are proposed to be issued to existing shareholders, the class and amount of such new shares.

To offer shares overseas, the domestic company shall report the application documents for offering and listing to the CSRC for record-filing within three business days after submission of the application documents for offering and listing overseas.

Reduction of Share Capital

A company may reduce its registered capital in accordance with the following procedures prescribed by the PRC Company Law:

- (i) the company shall prepare a balance sheet and a list of properties;
- (ii) the reduction of registered capital must be approved by shareholders at the shareholders' meeting;
- (iii) the company shall notify its creditors of the reduction in registered capital within ten days and publish an announcement of the reduction in newspapers or the national enterprise credit information publicity system within thirty days of the resolution approving the reduction being passed;
- (iv) the creditors of the company may within the statutory time limit require the company to repay its debts or provide guarantees for covering the debts; and
- (v) the company must apply to the relevant company registration authority for registration of the change and reduction in registered capital.

Repurchase of Shares

Pursuant to the PRC Company Law, a company shall not purchase its own shares other than in any of the following circumstances:

- (i) reducing its registered capital;
- (ii) merging with another company which holds its shares;
- (iii) utilizing the shares for employee stock ownership plan or stock ownership incentive scheme;
- (iv) acquiring its own shares at the request of its shareholders who vote in a shareholders' meeting against a resolution regarding a merger or separation;
- (v) utilizing the shares for conversion of corporate bonds which are convertible into shares issued by a listed company; and
- (vi) where it is necessary for a listed company to maintain its corporate value and stockholders' equity.

APPENDIX IV SUMMARY OF PRINCIPAL LEGAL AND REGULATORY PROVISIONS

Any company's purchase of its own shares for any reason specified in item (i) and item (ii) of the preceding paragraph shall be subject to a resolution of the shareholders' meeting; any company's purchase of its own shares for any reason specified in item (iii), item (v) and item (vi) of the preceding paragraph may be subject to a resolution of the board meeting with more than two thirds of directors present, according to the provisions of the articles of associations or upon authorization by the shareholders' meeting.

The shares acquired under the circumstance stipulated in item (i) hereof shall be deregistered within ten days from the date of acquisition of shares; the shares shall be assigned or deregistered within six months if the repurchase of shares is made under the circumstances stipulated in either item (ii) or item (iv); and the shares held in total by a company after the repurchase under any of the circumstances stipulated in item (iii), item (v) or item (vi) shall not exceed 10% of the company's total outstanding shares, and shall be assigned or deregistered within three years.

Transfer of Shares

Shares held by shareholders may be transferred in accordance with the relevant laws. Pursuant to the PRC Company Law, a shareholder should effect a transfer of his shares on a stock exchange established in accordance with laws or by any other means as required by the State Council. Registered shares may be transferred after the shareholders endorse the back of the share certificates or in any other manner specified by laws or administrative regulations. Following the transfer, the company shall enter the names and addresses of the transferees into its share register. No changes of registration in the share register described above shall be effected during a period of twenty days prior to convening a shareholders' meeting or five days prior to the record date for the purpose of determining entitlements to dividend distributions, subject to any legal provisions on the registration of changes in the share register of listed companies.

Shares of the company issued prior to the public offering of shares may not be transferred within one year of the date of the company's listing on a stock exchange. Directors, and the senior management of a company shall declare to the company their shareholdings in the company and any changes thereof. During their terms of office, they may transfer no more than 25% of the total number of shares they hold in the company per annum. They shall not transfer the shares they hold within one year of the date of the company's listing on a stock exchange, nor within half a year after they leave their positions in the company. The articles of association may set out other restrictive provisions in respect of the transfer of shares in the company held by its directors and the senior management.

Shareholders

Under the PRC Company Law, the rights of shareholders include the rights:

- (i) to receive a return on assets, participate in significant decision-making and select management personnel;
- (ii) to petition the people's court to revoke any resolution passed on a shareholders' meeting or a meeting of the board of directors that has not been convened in compliance with the laws and regulations or the articles of association or whose voting has violated the laws, administrative regulations or the articles of association of the company, or any resolution the contents of which is in violation of the articles of association, provided that such petition shall be submitted within sixty days of the passing of such resolution;
- (iii) to transfer the shares according to the applicable laws and regulations and the articles of association;
- (iv) to attend or appoint a proxy to attend shareholders' meetings and exercise the voting rights;

APPENDIX IV SUMMARY OF PRINCIPAL LEGAL AND REGULATORY PROVISIONS

- (v) to inspect the articles of association, share register, counterfoil of company debentures, minutes of shareholders' meetings, resolutions of the board of directors and financial and accounting reports, and to make suggestions or inquiries in respect of the company's operations;
- (vi) to receive dividends in respect of the number of shares held;
- (vii) to participate in distribution of residual properties of the company in proportion to their shareholdings upon the liquidation of the company; and
- (viii) any other shareholders' rights provided for in laws, administrative regulations, other normative documents and the articles of association.

The obligations of shareholders include the obligation to abide by the company's articles of association, to pay the subscription capital in respect of the shares subscribed for, to be liable for the company's debts and liabilities to the extent of the amount of subscription capital agreed to be paid in respect of the shares taken up by them and any other shareholder obligation specified in the articles of association.

Shareholders' Meetings

The shareholders' meeting is the organ of authority of the company, which exercises its powers in accordance with the PRC Company Law. The shareholders' meeting may exercise its powers:

- (i) to elect and remove the directors (not being representative(s) of employees) and to decide on the matters relating to the remuneration of directors;
- (ii) to review and approve the reports of the board of directors;
- (iii) to review and approve the company's profit distribution proposals and loss recovery proposals;
- (iv) to decide on any increase or reduction of the company's registered capital;
- (v) to decide on the issue of corporate bonds;
- (vi) to decide on merger, division, dissolution and liquidation of the company or change of its corporate form;
- (vii) to amend the company's articles of association; and
- (viii) to exercise any other authority stipulated in the articles of association.

The shareholders' meeting may authorize the board of directors to make resolutions on the issuance of corporate bonds.

Pursuant to the PRC Company Law, a shareholders' meeting is required to be held once every year. An extraordinary meeting is required to be held within two months of the occurrence of any of the following circumstances:

- (i) the number of directors is less than the number stipulated by the law or less than two thirds of the number specified in the articles of association;
- (ii) the outstanding losses of the company amounted to one-third of the company's total share capital;
- (iii) shareholders individually or in aggregate holding 10% or more of the company's shares request that an extraordinary meeting is convened;
- (iv) the board of directors deems necessary; or
- (v) any other circumstances as provided for in the articles of association.

APPENDIX IV

SUMMARY OF PRINCIPAL LEGAL AND REGULATORY PROVISIONS

A shareholders' meeting shall be convened by the board of directors and presided over by the chairman of the board of directors. In the event that the chairman is incapable of performing or is not performing his duties, the meeting shall be presided over by the vice chairman. In the event that the vice chairman is incapable of performing or is not performing his duties, a director nominated by half or more of the directors shall preside over the meeting. Where the board of directors is incapable of performing or is not performing its duties to convene the shareholders' meeting, the audit committee shall convene and preside over such meeting in a timely manner. If the audit committee fails to convene and preside over such meeting, shareholders individually or in aggregate holding 10% or more of the company's shares for ninety days or more consecutively may unilaterally convene and preside over such meeting. Where shareholders individually or in aggregate holding 10% or more of the company's shares request to convene an extraordinary meeting, the board of directors and the audit committee shall, within ten days after receipt of such request, decide whether to convene the extraordinary meeting and reply to the shareholders in writing.

In accordance with the PRC Company Law, a notice of the shareholders' meeting stating the date and venue of the meeting and the matters to be considered at the meeting shall be given to all shareholders twenty days before the meeting. A notice of extraordinary meeting shall be given to all shareholders fifteen days prior to the meeting.

There is no specific provision in the PRC Company Law regarding the number of shareholders constituting a quorum in a shareholders' meeting.

Pursuant to the PRC Company Law, shareholders (excluding classified shareholders) present at a shareholders' meeting have one vote for each share they hold, save that shares held by the company are not entitled to any voting rights.

An accumulative voting system may be adopted for the election of directors at the shareholders' meeting pursuant to the provisions of the articles of association or a resolution of the shareholders' meeting. Under the accumulative voting system, each share shall be entitled to the number of votes equivalent to the number of directors to be elected at the shareholders' meeting, and shareholders may consolidate their votes for one or more directors when casting a vote.

Pursuant to the PRC Company Law, resolutions of the shareholders' meeting must be passed by more than half of the voting rights held by shareholders present at the meeting, with the exception of resolutions relating to merger, division or dissolution of the company, increase or reduction of registered share capital, change of corporate form or amendments to the articles of association, which in each case must be passed by more than two-thirds of the voting rights held by the shareholders present at the meeting. Where the PRC Company Law and the articles of association provide that the transfer or acquisition of significant assets or the provision of external guarantees by the company must be approved by way of resolution of the shareholders' meeting, the board of directors shall convene a shareholders' meeting promptly to vote on such matters.

A shareholder may entrust a proxy to attend the shareholders' meeting on his/her behalf and the matters, power and time limit of the proxy shall be clarified by such shareholder. The proxy shall present the shareholders' power of attorney to the company and exercise voting rights within the scope of authorization.

Minutes shall be prepared in respect of matters considered at the shareholders' meeting and the chairman and directors attending the meeting shall endorse such minutes by signature. The chairman of the meeting and directors attending the meeting shall sign to endorse such minutes. The minutes shall be kept together with the shareholders' attendance register and the proxy forms.

Board of Directors

A joint stock limited company shall have a board of directors which shall have at least three members. For a company that has three hundred or more employees, the board of directors shall include the staff representative unless the board of supervisors has been established and already included the staff representative supervisor. The term of a director shall be stipulated in the articles of association, provided that no term of office shall last for more

APPENDIX IV SUMMARY OF PRINCIPAL LEGAL AND REGULATORY PROVISIONS

than three years. A director may serve consecutive terms if re-elected. A director shall continue to perform his/her duties as a director in accordance with the laws, administrative regulations and the articles of association until a duly re-elected director takes office, if re-election is not conducted in a timely manner upon the expiry of his/her term of office or if the resignation of directors results in the number of directors being less than the quorum.

Under the PRC Company Law, the board of directors may exercise its powers:

- (i) to convene shareholders' meetings and report on its work to the shareholders' meetings;
- (ii) to implement the resolutions passed by the shareholders at the shareholders' meetings;
- (iii) to decide on the company's operational plans and investment proposals;
- (iv) to formulate the company's profit distribution proposals and loss recovery proposals;
- (v) to formulate proposals for the increase or reduction of the company's registered capital and the issue of corporate bonds;
- (vi) to formulate proposals for the merger, division or dissolution of the company or change of corporate form;
- (vii) to decide on the setup of the company's internal management organs;
- (viii) to appoint or dismiss the company's manager and decide on his/her remuneration and, based on the manager's recommendation, to appoint or dismiss any deputy manager and financial officer of the company and to decide on their remunerations;
- (ix) to formulate the company's basic management system; and
- (x) to exercise any other authority stipulated in the articles of association.

Any restrictions on the powers of the board of directors set out in the articles of association may not be claimed against any bona fide third party.

Meetings of the board of directors shall be convened at least twice each year. Notices of meeting shall be given to all directors ten days before the meeting. Interim board meetings may be proposed to be convened by shareholders representing more than 10% of the voting rights, more than one-third of the directors. The chairman shall convene the meeting within ten days of receiving such proposal, and preside over the meeting. The board of directors may otherwise determine the means and the period of notice for convening an interim board meeting. Meetings of the board of directors shall be held only if more than half of the directors are present. Resolutions of the board of directors shall be passed by more than half of all directors. Each director shall have one vote for a resolution to be approved by the board of directors. Directors shall attend the meetings of the board of directors in person. If a director is unable to attend for any reason, he/she may appoint another director to attend the meeting on his/her behalf by a written power of attorney specifying the scope of authorization. The board of directors shall make minutes of the meeting's decisions on the matters discussed at the meeting, and the directors attending the meeting shall sign the minutes.

If a resolution of the board of directors violates any laws, administrative regulations or the articles of association or resolutions of the shareholders' meeting, and as a result of which the company sustains serious losses, the directors participating in the resolution are liable to compensate the company. However, if it can be proved that a director expressly objected to the resolution when the resolution was voted on, and that such objection was recorded in the minutes of the meeting, such director shall be relieved from that liability.

APPENDIX IV SUMMARY OF PRINCIPAL LEGAL AND REGULATORY PROVISIONS

Under the PRC Company Law, the following person may not serve as a director in a company:

- (i) a person without capacity or restricted capacity to undertake any civil liabilities;
- (ii) a person who has been sentenced to any criminal penalty for corruption, bribery, embezzlement, misappropriation of property or destruction of the socialist economic order, or who has been deprived of his political rights due to his crimes and such sentence has expired for no more than five years, or who is granted probation, if no more than two years have passed since the expiration of the probation period;
- (iii) a person who has been a former director, factory manager or manager of a company or an enterprise that has entered into insolvent liquidation and who was personally liable for the insolvency of such company or enterprise, where no more than three years have elapsed since the date of the completion of the bankruptcy and liquidation of the company or enterprise;
- (iv) a person who has been a legal representative of a company or an enterprise that has had its business license revoked due to violations of the law or has been ordered to close down by law and the person was personally responsible, where less than three years have elapsed since the date of such revocation or the order to close down; or
- (v) a person who is listed as a dishonest person subject to enforcement by the people's court due to failure to pay off a large amount of unliquidated mature debts.

Where a company elects or appoints a director to which any of the above circumstances applies, such election or appointment shall be null and void. A director to which any of the above circumstances applies during his/her term of office shall be released of his/her duties by the company.

Pursuant to the PRC Company Law, the board of directors shall appoint a chairman and may appoint a vice chairman. The chairman and the vice chairman shall be elected with approval of more than half of all the directors. The chairman shall convene and preside over board meetings and review the implementation of board resolutions. The vice chairman shall assist the chairman to perform his/her duties. Where the chairman is incapable of performing or is not performing his/her duties, the duties shall be performed by the vice chairman. Where the vice chairman is incapable of performing or is not performing his/her duties, a director elected by more than half of the directors shall perform his/her duties.

Audit Committee

A joint stock limited company with a smaller scale or fewer shareholders may appoint one supervisor without establishing a supervisory board to exercise the functions and powers prescribed for the supervisory board by the PRC Company Law. A joint stock limited company may, in accordance with its articles of association, instead of having set up a supervisory board or supervisors, establish an audit committee which comprises directors of the board of directors and exercises the functions and powers of the supervisory board as stipulated in the PRC Company Law. The Audit Committee shall be composed of at least 3 members, and more than half of the members shall not assume any position other than the director in the company and shall not have any relationship with the company that may affect their independent and objective judgments.

A resolution made by the audit committee shall be adopted by more than half of the members thereof. For voting on a resolution of the audit committee, each member shall have one vote. The discussion methods and voting procedures of the audit committee shall be prescribed in the articles of association, unless it is otherwise provided for by the PRC Company Law.

Where a public listed company has an audit committee under the board of directors, the following matters shall be approved by more than half of all audit committee members before being approved by the board of directors:

- (i) the accounting firm that hires and dismisses the company that audits the company;

APPENDIX IV SUMMARY OF PRINCIPAL LEGAL AND REGULATORY PROVISIONS

- (ii) appoint and dismiss the person responsible for finance;
- (iii) disclosure of financial accounting reports;
- (iv) other matters stipulated by the securities regulatory authority of the State Council.

Manager and Senior Management

Pursuant to the PRC Company Law, a company shall have a manager who shall be appointed or removed by the board of directors. The manager shall exercise his/her powers in accordance with the company's articles of association or the authorization of the board of directors.

Other provisions in the articles of association on the manager's powers shall also be complied with. The manager shall be present at meetings of the board of directors. However, the manager shall have no voting rights at meetings of the board of directors unless he/she concurrently serves as a director.

Pursuant to the PRC Company Law, senior management refers to the manager, deputy manager, financial officer, secretary to the board of directors of a listed company and other personnel as stipulated in the articles of association.

Duties of Directors, Managers and Other Senior Management

Directors and senior management are required under the PRC Company Law to comply with the relevant laws, regulations and the articles of association, and shall be obliged to be faithful and diligent towards the company. Where the controlling shareholder or actual controller of the company who does not serve as a director but actually attends to the company's affairs, shall comply with the foregoing provisions.

Directors and management personnel are prohibited from abusing their authority in accepting bribes or other unlawful income and from misappropriating the company's property.

Directors and senior management are prohibited from:

- (i) seizing the assets of the company or misappropriating company funds;
- (ii) depositing company funds into accounts under their own names or the names of other individuals;
- (iii) taking advantage of power to accept bribes or other illegal income;
- (iv) accepting commissions paid by a third party for transactions conducted with the company for their own benefit;
- (v) unauthorized divulgence of confidential information of the company; and
- (vi) other acts in violation of their duty of loyalty to the company.

Where directors and senior management directly or indirectly conclude any contract or engage in transactions with the company, they shall report to the board of directors or the shareholders' meeting and seek approval by resolutions of the board of directors or the shareholders' meeting in accordance with the articles of association. The requirement shall also apply to the conclusion of contracts or engagement in transactions by close relatives of the directors and senior management or enterprises directly or indirectly controlled by close relatives of the directors and senior management as well as persons who are otherwise related to the directors and senior management.

APPENDIX IV SUMMARY OF PRINCIPAL LEGAL AND REGULATORY PROVISIONS

Directors and senior management shall not take advantage of duty to seek business opportunities for themselves or others that would have been directed to the company, unless such act has been reported to and approved by the board of directors or the shareholders' meeting in accordance with the articles of association or the company is unable to take the business opportunity in accordance with applicable laws, administrative regulations, and the articles of association.

Directors and senior management shall not engage in the business similar to those of the company for themselves or others, unless such act has been reported to and approved by the board of directors or the shareholders' meeting in accordance with the articles of association.

Income generated by directors or senior management in violation of aforementioned shall be returned to the company.

A director or senior management who contravenes any laws, regulations or the company's articles of association in the performance of his/her duties resulting in any loss to the company shall be liable to the company for compensation.

The Guidance for Articles of Association provides that a company's directors and senior management shall have duties of diligence towards the company, for example, the directors shall be prudent, serious and diligent in exercising the authority conferred by the company to ensure that the business activities of the company comply with state's laws, administrative regulations and various economic policy requirements and that the business activities do not go beyond the scope of business activities specified in the company's business license; the directors shall treat all shareholders equally; the shareholders shall keep abreast of the company's business management status; both the directors and the senior management shall sign written statements confirming periodic reports of the company and ensure that the information disclosed by the company is true, accurate and complete; both the directors and the senior management shall have other diligence duties prescribed by laws, administrative regulations, departmental rules and the company's articles of association.

Finance and Accounting

Pursuant to the PRC Company Law, a company shall establish its own financial and accounting systems according to the laws, administrative regulations and the regulations of the competent financial departments of the State Council. At the end of each financial year, a company shall prepare a financial report which shall be audited by an accounting firm in accordance with the laws. The financial and accounting reports shall be prepared in accordance with the laws, administrative regulations and the regulations of the financial departments of the State Council.

The company's financial reports shall be made available for shareholders' inspection at the company twenty days before the convening of an annual shareholders' meeting. A joint stock limited company that makes public stock offerings shall publish its financial reports.

When distributing each year's profits after taxation, the company shall set aside 10% of its profits after taxation for the company's statutory common reserve fund until the fund has reached more than 50% of the company's registered capital. When the company's statutory common reserve fund is not sufficient to make up for the company's losses for the previous years, the current year's profits shall first be used to make good the losses before any allocation is set aside for the statutory common reserve fund. After the company has made allocations to the statutory common reserve fund from its profits after taxation, it may, upon passing a resolution at a shareholders' meeting, make further allocations from its profits after taxation to the discretionary common reserve fund. After the company has made good its losses and made allocations to the abovementioned reserve fund, the remaining profits after taxation shall be distributed in proportion to the number of shares held by the shareholders, except for those which are not distributed in a proportionate manner as provided by the articles of association.

Profits distributed to shareholders in violation of the requirements described above must be returned to the company. The company shall not be entitled to any distribution of profits in respect of shares held by it.

APPENDIX IV SUMMARY OF PRINCIPAL LEGAL AND REGULATORY PROVISIONS

The premium over the nominal value of the shares of the company on issue and other income as required by relevant government authorities to be treated as the capital reserve fund shall be accounted for as the capital reserve fund. The common reserve fund of a company shall be applied to make good the company's losses, expand its business operations or increase its capital. Where any losses need to be covered with reserve fund of the company, discretionary reserve fund and statutory common reserve fund shall first be used and if still insufficient, capital reserve fund can be used in accordance with applicable provisions. Upon the transfer of the statutory common reserve fund into increasing capital, the balance of the statutory common fund shall not be less than 25% of the registered capital of the company before such transfer.

The company shall have no accounting books other than the statutory books. The company's capital shall not be deposited in any account opened under the name of an individual.

Appointment and Retirement of Auditors

The Guidance for Articles of Association provides that a company shall engage an accounting firm which is qualified with the PRC Securities Law to provide services including the audit of financial statements, the verification of net assets and other relevant consultancy services. The engagement term is one year and may be extended.

Pursuant to the PRC Company Law, the appointment or dismissal of an accounting firm responsible for the company's auditing shall be determined by shareholders at a shareholders' meeting or the board of directors in accordance with the articles of association. The accounting firm should be allowed to make representations when the shareholders' meeting or the board of directors conduct a vote on the dismissal of the accounting firm. The company should provide true and complete accounting evidence, accounting books, financial and accounting reports and other accounting information to the engaged accounting firm without any refusal, withholding or falsification of information. Furthermore, the Guidance for Articles of Association provides that the audit fee for the accounting firm shall also be determined by shareholders at a shareholders' meeting.

Profit Distribution

According to the PRC Company Law, a company shall not distribute profits before losses are covered and the statutory common reserve fund is provided.

Amendments to the Articles of Association

Pursuant to the PRC Company Law, the resolution of a shareholders' meeting regarding any amendment to a company's articles of association requires affirmative votes by more than two-thirds of the votes held by shareholders attending the meeting.

Pursuant to the Guidance for Articles of Association, the company shall amend its articles of association under any of the following circumstances:

- (i) where, after any amendment to the PRC Company Law or any other applicable law or administrative regulation, the provisions of the articles of association conflict with the law and/or administrative regulations amended;
- (ii) where the company's circumstances change to such an extent that they are inconsistent with what is recorded in the articles of association; and
- (iii) where the shareholders' meeting decides to amend the articles of association.

The Guidance for Articles of Association further provides that where any amendment to the articles of association adopted by a shareholders' meeting is subject to approval by the competent authorities, such amendment shall be submitted for approval; where any amendment involves the company's registration items, the company's registration with the authority shall also be amended. In addition, an announcement shall be made in accordance with the applicable provisions provided that the amendment to the articles of association is required to be disclosed by any law or regulation.

APPENDIX IV SUMMARY OF PRINCIPAL LEGAL AND REGULATORY PROVISIONS

Dissolution and Liquidation

Pursuant to the PRC Company Law, a company shall be dissolved for any of the following reasons:

- (i) the term of its operation set out in the articles of association has expired or other events of dissolution specified in the articles of association have occurred;
- (ii) the shareholders have resolved at a shareholders' meeting to dissolve the company;
- (iii) the company is dissolved by reason of its merger or division;
- (iv) the business license of the company is revoked or the company is ordered to close down or to be dissolved in accordance with the laws; or
- (v) the company is dissolved by a people's court in response to the request of shareholders holding shares that represent more than 10% of the voting rights of all shareholders of the company, on the grounds that the operation and management of the company has suffered serious difficulties that cannot be resolved through other means, rendering ongoing existence of the company a cause for significant losses to the shareholders' interests.

On the occurrence of the abovementioned events, the company shall make an announcement on the national enterprise credit information publicity system within ten days.

In the event of paragraphs (i) and (ii) above, the company may carry on its existence by amending its articles of association if no property has been distributed to any shareholder. The amendments to the articles of association in accordance with the provisions described above shall require the approval of more than two-thirds of voting rights of shareholders attending a shareholders' meeting.

Where the company is dissolved under the circumstances set forth in paragraph (i), (ii), (iv) or (v) above, the liquidation procedures shall be conducted and directors shall be the company's liquidation obligor and it should establish a liquidation committee within fifteen days of the date on which the dissolution event occurs. The liquidation committee shall be composed of directors or any other persons determined by a shareholders' meeting. If a liquidation committee is not established within the prescribed period or the liquidation fails to effect after the establishment of a liquidation committee, the interested party may file an application with a people's court, requesting that the court appoint relevant personnel to form a liquidation committee to administer the liquidation. The people's court should accept such application and form a liquidation committee to conduct liquidation in a timely manner.

The liquidation committee may exercise following powers during the liquidation:

- (i) to dispose of the company's assets and to prepare a balance sheet and an inventory of assets;
- (ii) to notify the company's creditors or publish announcements;
- (iii) to deal with and settle any outstanding business related to the liquidation;
- (iv) to pay any outstanding tax together with any tax arising during the liquidation process;
- (v) to settle the company's claims and liabilities;
- (vi) to distribute the company's remaining assets after its debts have been paid off; and
- (vii) to represent the company in any civil procedures.

The liquidation committee shall notify the company's creditors within ten days from its establishment, and publish an announcement in newspapers or on the national enterprise credit information publicity system within sixty days.

APPENDIX IV

SUMMARY OF PRINCIPAL LEGAL AND REGULATORY PROVISIONS

A creditor shall lodge his claim with the liquidation committee within thirty days of receipt of the notification or within forty-five days of the date of the announcement if he has not received any notification.

A creditor shall, in making his claim, state matters relevant to his creditor's rights and furnish relevant evidence. The liquidation committee shall register such creditor's rights. The liquidation committee shall not make any settlement to creditors during the period of the claim.

Upon disposal of the company's property and preparation of the required balance sheet and inventory of assets, the liquidation committee shall draw up a liquidation plan and submit this plan to a shareholders' meeting or a people's court for endorsement. The remaining assets of the company, after payment of liquidation expenses, employee wages, social insurance expenses and statutory compensation, outstanding taxes and the company's debts, shall be distributed to shareholders in proportion to shares held by them. The company shall continue to exist during the liquidation period, although it cannot engage in operating activities that are not related to the liquidation. The company's property shall not be distributed to shareholders before repayments are made in accordance with the requirements described above.

Upon liquidation of the company's property and preparation of the required balance sheet and inventory of assets, if the liquidation committee becomes aware that the company does not have sufficient assets to repay its liabilities, it must apply to a people's court for a declaration of bankruptcy in accordance with the laws. Following such declaration by the people's court, the liquidation committee shall hand over the administration matters to the bankruptcy administrator designated by the people's court.

Upon completion of the liquidation, the liquidation committee shall prepare a liquidation report and submit it to the shareholders' meeting or a people's court for confirmation of its completion, and to the company registration authority to cancel the company's registration, and an announcement of its termination shall be published. Members of the liquidation committee are required to discharge their duties in good faith and in compliance with relevant laws. Members of the liquidation committee shall be prohibited from abusing their authority in accepting bribes or other unlawful income and from misappropriating the company's properties. Members of the liquidation committee are liable to indemnify the company and its creditors in respect of any loss arising from their willful or material default.

Liquidation of a company declared bankrupt according to laws shall be processed in accordance with the laws on corporate bankruptcy.

Overseas Listing

Pursuant to the Overseas Listing Trial Measures, both initial public offerings or listings in overseas markets shall be filed with the CSRC within three business days after the relevant application is submitted overseas. Subsequent securities offerings of an issuer in the same overseas market where it has previously offered and listed securities shall be filed with the CSRC within three business days after the offering is completed. Moreover, where the filing documents are complete and in compliance with stipulated requirements, the CSRC will, within twenty business days after receiving the filing documents, conclude the filing procedure and publish the filing results on the CSRC website. Where the filing documents are incomplete or do not conform to stipulated requirements, the CSRC shall request supplementation and amendment thereto within five business days after receiving the filing documents. The issuer shall then complete supplementation and amendment within thirty business days.

Merger and Division

Merger of companies may be conducted by absorption or consolidation. If companies adopt the method of absorption, the absorbed company shall be dissolved. If companies are incorporated in the form of consolidation, the parties to the merger shall be dissolved.

The parties to the merger shall enter into a merger agreement and prepare a balance sheet and a list of properties. Within ten days of the date on which the resolution on merger is made, the creditors shall be notified by the company and a public announcement shall be in the press or on the national enterprise credit information publicity system within thirty days. The creditors may require the company to repay its debts or provide guarantees for covering the

APPENDIX IV

SUMMARY OF PRINCIPAL LEGAL AND REGULATORY PROVISIONS

debts within thirty days of receipt of the notification or within forty-five days of the date of the announcement if the creditor has not received any notification; and in case of a merger, the credits and debts of the merging parties shall be assumed by the surviving or the new company.

Where a company merges with another company in which the former holds not less than 90% of the shares, the acquired company is not required to obtain approval by resolution of its shareholders' meeting, but shall notify the other shareholders who have the right to request the company to buy its equities or shares at a reasonable price. If the price paid for a company's merger does not exceed 10% of the company's net assets, approval by resolution of its shareholders' meeting may not be required unless otherwise provided by the company's articles of association. Where a company's merger is exempt from approval by resolution of the shareholders' meeting in the previous two cases, it shall be subject to approval by resolution of the board of directors.

In case of a division, the company's assets shall be divided and a balance sheet and an inventory of assets shall be prepared. Within ten days of the date on which the resolution on division is made, the creditors shall be notified by the company and a public announcement shall be made in the press or on the national enterprise credit information publicity system within thirty days. The liabilities of the company which have accrued prior to the division shall be jointly borne by the separated companies, unless otherwise stipulated in the agreement in writing entered into by the company with creditors in respect of the settlement of debts prior to division.

The PRC Securities Law, Regulations and Regulatory Regimes

The PRC has promulgated a series of regulations that relate to the issue and trading of the shares and disclosure of information. In October 1992, the State Council established the Securities Committee and the CSRC. The Securities Committee is responsible for coordinating the drafting of securities regulations, formulating securities-related policies, planning the development of securities markets, directing, coordinating and supervising all securities related institutions in the PRC and administering the CSRC. The CSRC is the regulatory arm of the Securities Committee and is responsible for the drafting of regulatory provisions governing securities markets, supervising securities companies, regulating public offerings of securities by PRC companies in the PRC or overseas, regulating the trading of securities, compiling securities-related statistics and undertaking relevant research and analysis. In April 1998, the State Council consolidated the Securities Committee and the CSRC and reformed the CSRC.

The PRC Securities Law (《中華人民共和國證券法》), which took effect on July 1, 1999, was revised on August 28, 2004, October 27, 2005, June 29, 2013, August 31, 2014 and December 28, 2019, respectively, and came into effect on March 1, 2020, is the first national securities law in China, and the regulatory matters include the issuance and trading of securities, the acquisition of listed companies, information disclosure, obligations and responsibilities of stock exchanges, securities companies and securities regulatory authorities, etc. The PRC Securities Law comprehensively regulates activities in the PRC securities market.

Pursuant to the PRC Securities Law, domestic enterprises issuing securities overseas directly or indirectly or listing and trading their securities overseas shall comply with the relevant provisions of the State Council. At present, the issuance and trading of shares issued overseas is mainly regulated by rules and regulations issued by the State Council and the CSRC.

On November 14, 2019, the CSRC promulgated the Guidelines for the “Full Circulation” Program for Domestic Unlisted Shares of H-share Listed Companies (《H股公司境內未上市股份申請“全流通”業務指引》), which came into effect on the same day and was partly revised on August 10, 2023 according to the Decision on Revising and Abolishing Part of Securities and Futures Policy Documents by the CSRC (《中國證券監督管理委員會關於修改、廢止部分證券期貨制度文件的決定》). This guidance is to regulate the listing and circulation (hereinafter referred to as “Full Circulation”) of unlisted domestic shares of domestic joint-stock limited companies (hereinafter referred to as “H-share Companies”) listed on the Stock Exchange (including unlisted domestic shares held by domestic shareholders before overseas listing, unlisted domestic shares issued in China after overseas listing and unlisted shares held by foreign shareholders).

APPENDIX IV

SUMMARY OF PRINCIPAL LEGAL AND REGULATORY PROVISIONS

H-share Companies applying for “Full Circulation” shall submit the application to the CSRC for filing procedures. H-share companies may submit the application for “Full Circulation” separately or simultaneously when applying for overseas refinancing. Unlisted domestic joint stock limited companies may submit the application for “Full Circulation” simultaneously when applying for overseas initial public offering and listing.

Arbitration and Enforcement of Arbitral Awards

The PRC Arbitration Law (《中華人民共和國仲裁法》) was enacted by the SCNPC on August 31, 1994, came into effect on September 1, 1995, and was most recently amended on September 12, 2025, with such amendment scheduled to take effect on March 1, 2026. The PRC Arbitration Law provides that an arbitration committee may, before the promulgation of arbitration regulations by the PRC Arbitration Association, formulate interim arbitration rules in accordance with the PRC Arbitration Law and the Civil Procedure Law of the PRC. Where the parties have agreed to settle disputes by means of arbitration, a people’s court will refuse to handle a legal proceeding initiated by one of the parties at such people’s court, unless the arbitration agreement is invalid.

Under the PRC Arbitration Law and the Civil Procedure Law of the PRC, an arbitral award shall be final and binding on the parties involved in the arbitration. If any party fails to comply with the arbitral award, the other party to the award may apply to a people’s court for its enforcement.

If the respondent puts forward evidence to prove that the arbitral award is under any of the following circumstances, the award shall not be enforced upon examination and verification by an arbitration tribunal of the people’s court:

- (i) the parties have no arbitration clause in their contract, nor have subsequently reached a written agreement on arbitration;
- (ii) the matter to be ruled does not fall within the scope of the arbitration agreement or the arbitration institution has no right to arbitrate;
- (iii) the composition of the arbitration tribunal or the arbitration procedure violates the legal procedure;
- (iv) the evidence on which the award is based is forged;
- (v) the other party conceals evidence sufficient to influence the impartial award from the arbitration institution;
- (vi) the arbitrators have committed acts of embezzlement, bribery, favoritism and malpractice, or perverting the law in arbitrating the case.

If the people’s court determines that the enforcement of the award violates the public interest, the award shall not be enforced.

Any party seeking to enforce an arbitral award of a foreign affairs arbitration organ of the PRC against a party who or whose property is not located within the PRC may apply to a foreign court with jurisdiction over the case for recognition and enforcement of the award. Likewise, an arbitral award made by a foreign arbitration body may be recognized and enforced by a PRC court in accordance with the principle of reciprocity or any international treaties concluded or acceded to by the PRC.

The PRC acceded to the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (《承認及執行外國仲裁裁決公約》) (the “New York Convention”) adopted on June 10, 1958 pursuant to a resolution of the SCNPC passed on December 2, 1986. The New York Convention provides that all arbitral awards made in a state which is a party to the New York Convention shall be recognized and enforced by other parties thereto subject to their rights to refuse enforcement under certain circumstances, including where the enforcement of the arbitral award is against the public policy of that state. At the time of the PRC’s accession to the convention, the SCNPC declared that (i) the PRC will only apply the New York Convention to the recognition and enforcement of arbitral awards made in the territory of

APPENDIX IV SUMMARY OF PRINCIPAL LEGAL AND REGULATORY PROVISIONS

another contracting state based on the principle of reciprocity; and (ii) the New York Convention will only apply to disputes deemed under PRC law to be arising from contractual or non-contractual mercantile legal relations.

The Arrangements on the Mutual Enforcement of Arbitral Awards between the Mainland and the Hong Kong Special Administrative Region (《最高人民法院關於內地與香港特別行政區相互執行仲裁裁決的安排》) were adopted by the Supreme People’s Court on June 18, 1999, which went into effect on February 1, 2000. The Supplementary Arrangements of Supreme People’s Court on Reciprocal Enforcement of Arbitration Awards between the Mainland and the Hong Kong Special Administrative Region (《最高人民法院關於內地與香港特別行政區相互執行仲裁裁決的補充安排》) were promulgated by the Supreme People’s Court on November 26, 2020. Under these arrangements, if a party fails to perform the arbitral award rendered in the Mainland or the Hong Kong, the other party may apply for enforcement to the relevant court in the place where the respondent is domiciled or where the property is located.

Judicial Judgment and its Enforcement

On January 25, 2024, the Supreme People’s Court adopted the Arrangement on Reciprocal Recognition and Enforcement of Judgments in Civil and Commercial Matters by the Courts of the Mainland and of the Hong Kong Special Administrative Region (《最高人民法院關於內地與香港特別行政區法院相互認可和執行民商事案件判決的安排》), which took effect on 29 January 2024 and seeks to establish a mechanism with greater clarity and certainty for recognition and enforcement of judgments in wider range of civil and commercial matters between Hong Kong and the mainland China. The arrangement discontinued the requirement for a choice of court agreement for bilateral recognition and enforcement. The arrangement further regulates, among others, the scope and particulars of judgments, the procedures and methods of the application for recognition or enforcement, the review of the jurisdiction of the court that issued the original judgment, the circumstances where the recognition and enforcement of judgment shall be refused, and the approaches towards remedies for the reciprocal recognition and enforcement of judgments in civil and commercial matters between the courts in mainland China and those in the Hong Kong. Upon implementation of this Arrangement, the Arrangement between the Mainland and the Hong Kong Special Administrative Region on Reciprocal Recognition and Enforcement of Judgments of Civil and Commercial Matters under Consensual Jurisdiction (《最高人民法院關於內地與香港特別行政區法院相互認可和執行當事人協議管轄的民商事案件判決的安排》) which was adopted by the Supreme People’s Court on June 3, 2006 and took effect on August 1, 2008 has been repealed.

APPENDIX V

SUMMARY OF ARTICLES OF ASSOCIATION

This appendix contains the summary of the principal provisions of the Articles of Association. The main purpose of this appendix is to provide an overview of the Company's Articles of Association for potential investors, so it may not contain all the information that is important to potential investors.

SHARES

Issuance of Shares

The issuance of the Company's shares follows the principles of openness, fairness and impartiality. Each share of the same class enjoys the same rights. For shares of the same class issued at the same time, the issuance conditions and prices for each share are the same. Subscribers shall pay the same amount for each share they subscribe for. The shares issued by the Company are denominated in RMB with equal value per share. The nominal value of each share is RMB0.1.

Increase, Decrease and Repurchase of Shares

The Company may increase capital based on the needs of operation and development and in accordance with the requirements of laws and regulations and resolution on the shareholders' meeting, by any of the following ways:

- (1) issuance of shares to unspecified parties;
- (2) issuance of shares to specified parties;
- (3) distribution of new shares or offering new shares to existing shareholders;
- (4) conversion of capital reserve into share capital;
- (5) other means as required by laws, administrative regulations, the Listing Rules, or as approved by the CSRC.

The Company may reduce its registered capital. The reduction in the registered capital shall be made in accordance with the procedures set out in the Company Law, the Listing Rules and other relevant regulations and the Articles of Association.

The Company shall not repurchase its own shares except in the following circumstances:

- (1) reducing its registered capital;
- (2) merger with another company which holds the shares of the Company;
- (3) use of the shares for employee stock ownership plan or equity incentive;
- (4) request to the Company to acquire the shares from shareholders who vote against any resolution adopted at the shareholders' general meeting on the merger or demerger of the Company;
- (5) conversion of shares into the convertible corporate bonds issued by the Company;
- (6) being necessary for the Company to maintain its value and the equity of shareholders;
- (7) any other circumstances permitted by the laws, administrative regulations, and securities regulatory rules of the place where the Company's shares are listed.

APPENDIX V

SUMMARY OF ARTICLES OF ASSOCIATION

Transfer of Shares

Shares of the Company shall be transferred in accordance with the law. Shares of the Company that were issued prior to a public issue shall not be transferred within one year from the date on which shares of the Company are listed and traded on the stock exchange. Where the Listing Rules or relevant regulations of the listing authority have other provisions governing the transfer of company shares held by shareholders of a listed company, those provisions shall prevail.

Directors and senior management of the Company shall report to the Company their holdings of shares of the Company and the changes thereof. During their term of office confirmed at the assumption of the position, the shares transferred by any of them each year shall not exceed 25% of the total shares of the same class of the Company held by them; the shares of the Company held by the aforesaid persons shall not be transferred within one year from the date on which the shares of the Company are listed and traded. The above personnel shall not transfer the shares of the Company held by them within half a year after they leave the Company.

SHAREHOLDERS AND SHAREHOLDERS' MEETING

Shareholders

The shareholders of the Company shall be entitled to the following rights:

- (1) to receive dividends and other benefit distributions in proportion to the number of shares they held;
- (2) to require, convene, chair, attend or appoint a proxy to attend a shareholders' general meeting and exercise the corresponding voting rights in accordance with the laws;
- (3) to supervise and manage the operations of the Company, and to put forward suggestions or raise enquiries;
- (4) to transfer, bestow or pledge shares held by them in accordance with the laws, administrative regulations, the Listing Rules and the provisions of Articles of Association;
- (5) to inspect and duplicate the Articles of Association, registers of shareholders, the minutes of shareholders' general meetings, resolutions of the Board meetings and the financial accounting reports. Eligible shareholders may inspect the Company's accounting books and vouchers;
- (6) in the event of the termination or liquidation of the Company, the right to participate in the distribution of the remaining assets of the Company in proportion to the number of shares held;
- (7) with respect to shareholders who voted against any resolution adopted at the shareholders' general meeting on the merger or demerger of the Company, the right to demand the Company to acquire the shares held by them;
- (8) any other rights stipulated in the laws, administrative regulations, departmental rules, regulatory rules where the Company's shares are listed or the Articles of Association.

If any resolution of the shareholders' general meetings or the Board violates the laws and administrative regulations, the shareholders have the right to request the people's court to invalidate the resolution. If the convening procedure and voting method of the shareholders' general meetings or the Board meetings violate laws, administrative regulations or the Articles of Association, or the contents of a resolution run counter to the Articles of Association, the shareholders have the right to request the people's court to revoke the resolution within 60 days from the date of the resolution. However, it does not apply if such procedures for shareholder general meetings and meetings of the Board of Directors or the method of voting at such meetings have only minor flaws that have no substantial impact on the resolution. Any

APPENDIX V

SUMMARY OF ARTICLES OF ASSOCIATION

shareholder who fails to be notified to attend the shareholders' general meetings may, within 60 days as of the day when it knows or ought to know that the resolution of the shareholders' general meeting is made, request the people's court to revoke the resolution. If the right of revocation is not exercised within one year as of the date when the resolution is made, it shall be relinquished.

If any director or senior management other than members of the Audit Committee violates the provisions of laws, administrative regulations or the Articles of Association in fulfilling their duties, thereby incurring any loss to the Company, the shareholder(s) severally or jointly holding more than 1% of the Company's shares for more than 180 consecutive days shall have the right to submit a written request to the Audit Committee to institute legal proceedings to the people's court; if the members of the Audit Committee violates the laws, administrative regulations or the Articles of Association in fulfilling their duties, thereby incurring any loss to the Company, the aforementioned shareholders shall have the right to request the Board in writing to institute legal proceedings to the people's court.

Upon receipt of shareholders' written request as stipulated in the preceding paragraph, if the Audit Committee or the Board of Directors refuses to file a lawsuit or fails to file a lawsuit within 30 days from receipt of such request, or in the event of emergency where the interest of the Company will suffer irreparable damages if lawsuit is not filed immediately, the shareholders as stipulated in the preceding paragraph shall have the right to file a lawsuit directly with the people's court in their own name for the interest of the Company. Where the directors, supervisors or senior management of a wholly-owned subsidiary of the Company are involved in any of the circumstances prescribed in the preceding Article, or any other person infringes upon the legitimate rights and interests of a wholly-owned subsidiary of the Company and resulted in damages, the shareholders holding more than 1% of the shares of the Company individually or in aggregate for over 180 consecutive days may, in accordance with the provisions of the preceding three paragraphs of this Article, submit a written request to the supervisory committee or the board of directors of the wholly-owned subsidiary to file a lawsuit with the people's court or directly file a lawsuit with the people's court in their own name.

The shareholders of the Company shall undertake the following obligations:

- (1) to abide by laws, administrative regulations, and the Articles of Association;
- (2) to pay subscription monies according to the number of shares subscribed and the method of subscription;
- (3) not to withdraw from the shares unless otherwise stipulated by the laws and regulations;
- (4) not to abuse shareholders' rights to harm the interests of the Company or other shareholders; and not to abuse the Company's position as an independent legal person and the limited liability of shareholders to harm the interests of the creditors of the Company;
- (5) to undertake other obligations stipulated in the laws, administrative regulations, regulatory rules where the Company's shares are listed and the Articles of Association.

Shareholders of the Company who abuse their shareholder's rights and thereby cause loss on the Company or other shareholders shall be liable for indemnity according to the law; where shareholders of the Company abuse the Company's position as an independent legal person and the limited liability of shareholders for the purposes of evading repayment of debts, thereby materially impairing the interests of the creditors of the Company, such shareholders shall be jointly liable for the debts owed by the Company.

APPENDIX V

SUMMARY OF ARTICLES OF ASSOCIATION

General Provisions of Shareholders' Meeting

The shareholders' meeting is the organ of authority of the Company and shall exercise the following functions and powers in accordance with the law:

- (1) to elect and replace directors and to determine matters relating to the remuneration of the directors;
- (2) to consider and approve the reports of the Board of Directors;
- (3) to consider and approve the Company's profit distribution plan and plan for recovery of losses;
- (4) to make resolutions on increase or reduction of the Company's registered capital;
- (5) to make resolutions on the issuance of corporate bonds;
- (6) to make resolutions on the merger, demerger, dissolution, liquidation or change of corporate form of the Company;
- (7) to amend the Articles of Association;
- (8) to make resolutions on the hiring, dismissal, and not being rehired of the Company's accounting firm;
- (9) to consider and approve the matters of guarantee stipulated in the Articles of Association;
- (10) to consider and approve the matters in relation to purchase or sale of major assets by the Company with the amount exceeding 30% of the Company's latest audited total assets within twelve months;
- (11) to consider equity incentive schemes and employee stock ownership plan;
- (12) to consider and approve the matters relating to the Company's repurchase of its shares that are required by laws, regulations and the Articles of Association to be considered by the shareholders' meeting;
- (13) to consider other matters which, in accordance with the laws, administrative regulations, departmental rules, the Listing Rules or the Articles of Association, shall be approved by the shareholders' general meetings.

The following external guarantees provided by the Company shall be submitted to the shareholders' meeting for review after being considered and approved by the Board:

- (1) any guarantee to be provided after the total amount of external guarantees by the Company and its holding subsidiaries exceeds 50% of the latest audited net assets of the Company;
- (2) any guarantee to be provided after the total amount of external guarantees by the Company and its holding subsidiaries exceeds 30% of the latest audited total assets;
- (3) any guarantee by the Company to others within a consecutive twelve-month period with guaranteed amount in excess of 30% of the latest audited total assets of the Company;
- (4) any guarantee to be provided to a recipient of such security whose debt-to-asset ratio is over 70%;
- (5) any single guarantee with an amount exceeding 10% of the latest audited net assets of the Company;
- (6) any guarantee provided to shareholders and their connected parties;

APPENDIX V

SUMMARY OF ARTICLES OF ASSOCIATION

- (7) any other guarantees to be reviewed by the shareholders' meeting as required by relevant laws, administrative regulations, departmental rules, regulatory rules where the Company's shares are listed or the Articles of Association.

The shareholders' meetings consist of annual general meetings and extraordinary general meetings. Annual general meetings are held once every year and within six months from the previous fiscal year end.

Under any of the following circumstances, the Company shall convene an extraordinary general meeting within two months from the date of occurrence:

- (1) when the number of directors is less than the minimum number stipulated in Company Law or two-thirds of the number specified in the Articles of Association;
- (2) when the unrecovered losses of the Company amount to one third of the total amount of its paid-in share capital;
- (3) when any shareholder holding more than 10% of the Company's shares individually or collectively makes a request;
- (4) when deemed necessary by the Board of Directors;
- (5) when proposed by the Audit Committee;
- (6) any other circumstances stipulated in the laws, administrative regulations, departmental rules, or the Articles of Association.

Convening of Shareholders' General Meetings

For a shareholders' general meeting convened by the Audit Committee or shareholders on its/their own initiative, the Board of Directors shall provide cooperation.

Proposals and Notices of Shareholders' General Meetings

The content of proposals shall fall within the functions and powers of the shareholders' general meetings, have clear subject for discussion and specific matters to be resolved and comply with relevant requirements of the laws, administrative regulations, and the Articles of Association.

Holding of Shareholders' General Meetings

The Company's Board and other conveners shall take necessary measures to ensure the normal order of the shareholders' general meetings. Measures shall also be adopted to stop any acts from interfering with the shareholders' general meeting, creating quarrels and nuisance as well as infringing the lawful interests of the shareholders while timely report of the same shall also be made to the relevant authority for investigation.

All shareholders of the Company or their proxies registered on the equity registration date shall have the right to attend the shareholders' general meeting and exercise their voting rights in accordance with relevant laws, regulations, and the Articles of Association.

A shareholders' meeting shall be chaired by the chairman of the Board of Directors. In the event that the chairman is unable or fails to perform his/her duties, a director jointly nominated by more than half of the directors shall preside over the meeting.

The shareholders may attend shareholders' meetings in person and appoint one or several proxies to attend and vote on their behalf.

The shareholders' meetings shall have minutes, which shall be recorded by the Board of Directors. The minutes of the meeting shall contain the following information:

- (1) the date, venue and agenda of the meeting, and the name of the convener;

APPENDIX V

SUMMARY OF ARTICLES OF ASSOCIATION

- (2) the name of the presider of the meeting, and the directors, the general managers and other senior management personnel attending or present at the meeting;
- (3) the number of shareholders and their proxies attending the meeting, the total number of voting shares held by them and the proportion of these shares to the total number of shares of the Company;
- (4) the consideration process of each proposal, summaries of the speeches and the voting results;
- (5) details of the inquiries or recommendations of the shareholders, and the corresponding responses or explanations;
- (6) the names of the counter and the scrutineer;
- (7) other contents that should be recorded in the minutes as provided in the Articles of Association.

The directors attending the meeting, the convener or representative thereof, and the presider of the meeting shall sign the minutes of the meeting, and shall ensure that the contents of the minutes are true, accurate and complete. The minutes of meeting shall be kept for a term of not less than 10 years together with the book of signatures of the shareholders attending the meeting, the power of attorney of the attending proxies, the valid information on voting by internet and other methods.

Voting and Resolutions of Shareholders' Meetings

Resolutions of shareholders' general meeting shall consist of ordinary resolutions and special resolutions.

Ordinary resolutions of the shareholders' meeting shall be passed by more than half of the voting rights held by the shareholders present at the meeting.

Special resolutions of the shareholders' meeting shall be passed by more than two-thirds of the voting rights held by the shareholders present at the meeting.

The following matters shall be approved by ordinary resolutions at a shareholders' meeting:

- (1) work reports of the Board of Directors;
- (2) plans for profit distribution and recovery of losses formulated by the Board of Directors;
- (3) election, replacement and dismissal of directors and decision on matters relating to the remuneration of the directors;
- (4) any matters other than those required to be approved by special resolution by the laws, administrative regulations, regulatory rules where the Company's shares are listed or the Articles of Association.

The following matters shall be approved by special resolutions at a shareholders' general meeting:

- (1) increase or reduction of the registered capital;
- (2) demerger, merger, changes of corporate form, dissolution and liquidation of the Company;
- (3) amendment to the Articles of Association;

APPENDIX V

SUMMARY OF ARTICLES OF ASSOCIATION

- (4) purchase or disposal of material assets or provision of guarantee by the Company within the consecutive twelve months with the transaction amount exceeding 30% of the Company's latest audited total assets;
- (5) consideration and approval of equity incentive plan and employee stock ownership plan;
- (6) any other matters prescribed by the laws, administrative regulations, or the Articles of Association, and other matters that are confirmed by ordinary resolution at a shareholders' general meeting as having a material impact on the Company and are required to be approved by a special resolution.

Resolutions in respect of the election of directors at a shareholders' meeting may be passed by way of cumulative voting according to the provisions of the Articles of Association or the resolutions of the shareholders' meetings.

The cumulative voting system means that when directors are being elected at a shareholders' meeting, each share has as many voting rights as the candidates for directors, and the shareholders' voting rights may be used in a concentrated manner. The Board of Directors shall disclose to the shareholders the resumes and basic information of the candidates.

Except for the cumulative voting system, the shareholders' meeting shall vote on all proposals one by one. If there are different proposals on the same matter, the voting shall be carried out in the order in which the proposals were submitted.

BOARD OF DIRECTORS

Directors

A director of the Company shall be a natural person. Any person involved in any of the following circumstances shall not serve as director of the Company:

- (1) a person without or with limited capacity for civil conduct;
- (2) a person who has been sentenced to any criminal penalty for corruption, bribery, infringement of property, misappropriation of property or disrupting the economic order of the socialist market, where less than 5 years have elapsed since the completion of the enforcement of the penalty, or who has been deprived of his/her political rights due to criminal offense, where less than 5 years have elapsed since the completion of the enforcement of the penalty, or who has been declared to be under suspension of sentence, where less than 2 years have elapsed since the end of the period of suspension of sentence;
- (3) a person who is a former director, factory manager or manager of a bankrupt and liquidated company or enterprise whereby such person is personally liable for the bankruptcy of such company or enterprise, and where less than 3 years have elapsed since the date of completion of the bankruptcy and liquidation of such company or enterprise;
- (4) a person who is a former legal representative of a company or enterprise, whose business license was revoked or which was ordered to close down due to violation of law and who is personally liable for such violation, where less than 3 years have elapsed since the date of the revocation of business license or the making of the order to close down of such company or enterprise;
- (5) a person who has been listed as a dishonest person by the people's court due to having a relatively large amount of debts which have become overdue;
- (6) a person who is banned from entering the securities market or deemed inappropriate to take the post of director by the CSRC, where the term of punishment or judgment has not yet expired;

APPENDIX V

SUMMARY OF ARTICLES OF ASSOCIATION

- (7) any other circumstances as provided by the laws, administrative regulations, department rules.

Where the election, appointment of directors violates the provisions of the Articles of Association, the election, appointment or engagement shall be invalid. Where directors fall under the circumstances referred to in this Article during his/her tenure, the Company shall terminate his/her appointment.

Directors shall be elected or replaced at the shareholders' general meetings for a term of three years. Upon maturity of the term of office, a director shall be eligible for re-election and re-appointment.

Directors shall owe the following fiduciary duties to the Company:

- (1) not to misappropriate the Company's property or embezzle the Company's funds;
- (2) not to deposit the Company's assets or funds into accounts opened in their own name or in the name of any other individuals;
- (3) not to use their functions and powers to accept bribes or other unlawful income;
- (4) not to directly or indirectly enter into contracts or conduct transactions with the Company if such matter is not reported to the Board or the shareholders' meeting and approved by a resolution of the Board or the shareholders' meeting in accordance with the provisions of the Articles of Association;
- (5) not to use their position to seek business opportunities belonging to the Company for themselves or for others, except where such matter has been reported to the Board or the shareholders' meeting and approved by a resolution of the shareholders' meeting, or where the Company is unable to take advantage of such business opportunities in accordance with laws, administrative regulations or the Articles of Association;
- (6) not to engage in or operate on behalf of others any business of the same kind as that of the Company, unless such activity has been reported to the Board or the shareholders' meeting and has been approved by a resolution of the shareholders' meeting;
- (7) not to accept commissions from transactions between others and the Company for personal gains;
- (8) not to disclose the Company's secrets without authorization;
- (9) not to take advantage of their connected relationship to damage the interests of the Company;
- (10) other fiduciary duties stipulated in laws, administrative regulations, departmental rules, and the Articles of Association.

Any income obtained by a director in violation of the provisions of this Article shall belong to the Company; if such violation causes losses to the Company, the director shall be liable for compensation. The provisions of item (4) of the preceding paragraph shall apply to contracts or transactions between any close relatives of directors or senior management, enterprises directly or indirectly controlled by directors, senior management or their respective close relatives, and connected persons who have other connected relationships with directors or senior management and the Company.

Directors shall comply with laws, administrative regulations and the Articles of Association, owe a duty of diligence to the Company and perform their duties with a reasonable degree of care that a manager should have normally for the best interests of the Company.

APPENDIX V

SUMMARY OF ARTICLES OF ASSOCIATION

Directors shall owe the following diligence duties to the Company:

- (1) to exercise the rights granted by the Company in a prudent, conscientious and diligent manner to ensure that the Company's business activities comply with the national laws, administrative regulations and requirements of national economic policies and that such business activities do not exceed the scope of business as specified in the business license;
- (2) to treat all shareholders fairly;
- (3) to understand the business operation and management of the Company in a timely manner;
- (4) to sign written confirmation opinions on the Company's regular reports;
- (5) to truthfully provide relevant information and materials to the Audit Committee, and not to obstruct the Audit Committee from exercising its powers;
- (6) other diligence duties as stipulated by laws, administrative regulations, departmental rules, and the Articles of Association.

Board of Directors

The Company shall have a Board, which is composed of 7 directors, and shall have one chairman of the Board, who shall be elected by more than half of all directors of the Company, and three independent non-executive directors.

The Board shall exercise the following functions and powers:

- (1) to convene shareholders' meetings, and submit work reports to the shareholders' meeting;
- (2) to implement the resolutions of shareholders' meetings;
- (3) to resolve on the Company's annual and quarterly business plans, investment plans, operating budgets, and strategic plans;
- (4) to formulate the Company's profit distribution plans and loss recovery plans;
- (5) to formulate the Company's plans for increase or reduction of registered capital, issuance of bonds or other securities and listing plans;
- (6) to formulate the Company's plans for significant acquisition, acquisition of the Company's shares or merger, division, dissolution and change in corporate form;
- (7) to decide, within the scope of the authorization delegated by the shareholders' meeting, on the Company's external investments, acquisition and disposal of assets, mortgage of assets, external guarantees, entrusted financial management, connected party transactions and charitable donation etc.;
- (8) to decide on the establishment of the Company's internal management organizations;
- (9) to decide on the appointment or dismissal of the general manager and other senior management members of the Company, and to decide on their remunerations, incentives and penalties; to decide on the appointment or dismissal of senior management members such as chief financial officer of the Company based on the nominations by the general manager, and to decide on their remunerations, incentives and penalties;
- (10) to formulate the basic management system of the Company;
- (11) to formulate the proposals for amendments to the Articles of Association;

APPENDIX V

SUMMARY OF ARTICLES OF ASSOCIATION

- (12) to make a material change to accounting methods or policies, or appoint or replace the Company's auditor (referring to a certified public accounting firm registered in China and approved by the board of directors);
- (13) to listen to work reports of the general manager of the Company and inspect his/her work;
- (14) other functions and powers granted by laws, administrative regulations, departmental rules, regulatory rules where the Company's shares are listed or the Articles of Association.

The chairman of the Board shall exercise the following functions and powers:

- (1) to preside over shareholders' meetings and convene and preside over meetings of the Board;
- (2) to supervise and inspect the implementation of the resolutions of the Board;
- (3) other functions and powers granted by the Board, laws, administrative regulations, or regulatory rules where the Company's shares are listed.

Board meetings consist of regular meetings and *ad hoc* meetings. The Board shall hold at least two meetings each year, convened by the chairman of the Board. Regular Board meetings shall be notified to all directors in writing 10 days prior to the meeting. For *ad hoc* meetings convened by the Board, written notice shall be given to all directors 3 days prior to the meeting.

Shareholders representing more than one-tenth of the voting rights, more than one-third of the directors or the Audit Committee may propose to convene an *ad hoc* meeting of the Board. The chairman of the Board shall convene and preside over the Board meeting within 10 days after receipt of the proposal.

A Board meeting shall be held only when more than half of the directors are present. Resolutions of the Board shall be passed by a majority vote of all directors. Each director shall have one vote on Board resolutions.

If directors are connected to the enterprises involved in the matters resolved at the Board meeting, such directors shall promptly report in writing to the Board. The directors with connected relationship shall not exercise voting rights on the resolution, nor shall they exercise voting rights on behalf of other directors. The Board meeting may be held if more than half of the directors with no connected relationship are present, and resolutions made at the Board meeting shall be passed by more than half of the directors with no connected relationship. If the number of directors with no connected relationship present at the Board meeting is less than 3, the matter shall be submitted to the shareholders' meeting for review.

Special Committees of the Board

The Board of the Company shall establish an Audit Committee to exercise the functions and powers of the board of supervisors as stipulated in the Company Law.

The Audit Committee consists of three members, including independent non-executive directors who are not senior management members of the Company, among whom there are two independent non-executive directors. The chairman of the Audit Committee shall be an accounting professional among the independent non-executive directors.

APPENDIX V

SUMMARY OF ARTICLES OF ASSOCIATION

The Audit Committee shall be responsible for reviewing the financial information and disclosure of the Company, supervising and evaluating internal and external audit work and internal controls. The following matters shall be submitted to the Board for review after being approved by more than half of all members of the Audit Committee:

- (1) to disclose financial information in financial accounting reports and periodical reports and internal control evaluation reports;
- (2) to engage or dismiss accounting firms which provide audit services to the Company;
- (3) to appoint or dismiss the chief financial officer of the Company;
- (4) to make changes in accounting policies and accounting estimates or corrections of major accounting errors due to reasons other than changes in accounting standards;
- (5) other matters stipulated by laws, administrative regulations, the Listing Rules and the Articles of Association.

The Audit Committee shall convene a meeting at least once every quarter, and may convene an extraordinary meeting when two or more members propose to convene the meeting or the chairman deems it necessary. A meeting of the Audit Committee shall be held only when more than two-thirds of the members of the Audit Committee are present.

Resolutions of the Audit Committee shall be passed by a majority vote of the members of the Audit Committee. Any voting on resolutions of the Audit Committee shall be conducted on a one-person-one-vote basis. Any minutes of the meeting for the resolutions of the Audit Committee shall be prepared in accordance with regulations, and the members of the Audit Committee present at the meeting shall sign the minutes of the meeting. Any working procedures of the Audit Committee shall be formulated by the Board.

General Manager and Other Senior Management Members

The Company shall appoint one general manager and one chief financial officer. The general manager, chief financial officer, chief medical officer, chief technology officer, and other managerial personnel confirmed by the board of directors through deliberation constitute the company's senior management Members.

The general manager shall serve for a term of three years, and may be re-elected and re-appointed upon the expiration of his/her term of office.

FINANCIAL ACCOUNTING SYSTEM, PROFIT DISTRIBUTION AND AUDIT

Financial Accounting System

The Company shall formulate its financial accounting system in accordance with laws, administrative regulations, and regulations of relevant national departments.

The Company shall not set up separate accounting books other than its statutory accounting books. No assets of the Company shall be deposited into any account opened in the name of any individual.

Profit Distribution

When distributing the current year's after-tax profits, the Company shall set aside 10% of its profits for the Company's statutory common reserve fund. Where the cumulative amount of the statutory common reserve fund of the Company has reached not less than 50% of the Company's registered capital, it may no longer be allocated. When the Company's statutory common reserve fund is not sufficient to make up for the Company's losses for the previous years, the current year's profits shall first be used to make up for the losses before any allocation is set aside for the statutory common reserve fund in accordance with the preceding paragraph.

APPENDIX V

SUMMARY OF ARTICLES OF ASSOCIATION

After the Company has made allocations to the statutory common reserve fund from its after-tax profits, it may, upon passing a resolution at a shareholders' meeting, make further allocations from its after-tax profits to the discretionary common reserve fund.

After the Company has made up for its losses and made allocations to its common reserve fund, the remaining after-tax profits shall be distributed in accordance with the profit distribution plan considered and approved at the shareholders' meeting.

Where the shareholders' meeting distributes profits to shareholders in violation of the provisions of the Company Law and the Articles of Association, shareholders shall refund to the Company the profits distributed in violation of the provisions; if any losses are caused to the Company, shareholders and responsible directors and senior management shall be liable for compensation.

No profits shall be distributed in respect of the shares of the Company which are held by the Company.

Appointment of Accounting Firm

The Company shall engage an accounting firm that complies with securities law to perform services such as the audit of financial statements, verification of net assets and other related consulting services. The engagement term is one year and may be renewed.

The appointment or dismissal of the accounting firm shall be decided by the shareholders' meeting. The Board shall not appoint an accounting firm before the shareholders' meeting makes a decision.

The Company shall guarantee that any accounting vouchers, accounting books, financial accounting reports and other accounting information provided to the accounting firm engaged are true and complete, and that it shall not refuse or withhold any such information or provide any false information.

Any audit fees of the accounting firm shall be determined by the shareholders' meeting. The Company shall notify the accounting firm 15 days in advance when dismissing or ceasing to renew the appointment of the accounting firm. The accounting firm shall be allowed to state its opinions when the shareholders' meeting of the Company votes on dismissing the accounting firm. Where the accounting firm proposes to resign, it shall explain to the shareholders' meeting whether there are any irregularities in the Company.

MERGER, DIVISION, CAPITAL INCREASE, CAPITAL REDUCTION, DISSOLUTION AND LIQUIDATION

Merger, Division, Capital Increase and Capital Reduction

Merger of the Company may take the form of absorption or establishment of a new company. In the case of merger by absorption, a company absorbs any other company and the absorbed company is dissolved. In the case of merger by establishment of a new company, two or more companies merge into a new one and the parties to the merger are dissolved.

Where the Company is involved in a merger, the parties to the merger shall enter into a merger agreement, and a balance sheet and an inventory of assets shall be prepared.

When the Company is merged, the claims and debts of each party to the merger shall be inherited by the surviving company or the newly established company after the merger. Where there is a division of the Company, its assets shall be divided accordingly.

Where the Company needs to reduce its registered capital, a balance sheet and an inventory of assets shall be prepared.

When the Company reduces its registered capital, it shall correspondingly reduce its capital contributions or shares based on the capital reduction plan made in accordance with the resolution of the shareholders' meeting.

APPENDIX V

SUMMARY OF ARTICLES OF ASSOCIATION

Where a merger or division of the Company results in any changes in the registered items, such changes shall be registered with the company registration authority in accordance with the law. Where the Company is dissolved, cancelation of the Company's registration shall be applied for in accordance with the law. Where a new company is established, the registration of such company's establishment shall be applied for in accordance with the law. Where the Company increases or reduces its registered capital, it shall apply for the registration of change with the company registration authority in accordance with the law.

Dissolution And Liquidation

In any of the following circumstances, the Company shall be dissolved and liquidated in accordance with the law:

- (1) the business term stipulated in the Articles of Association expires, or any other cause for dissolution prescribed herein arises;
- (2) the shareholders' meeting resolves to dissolve the Company;
- (3) dissolution is necessary due to merger or division of the Company;
- (4) the Company has had its business license revoked or has been ordered to close down or canceled in accordance with the law;
- (5) where the Company encounters serious difficulties in its operations or management that will lead to significant losses to the benefits of shareholders if the Company continues its existence and the situation cannot be resolved by other means, the Company is dissolved by a people's court in response to the request of shareholders who hold 10% or more of the voting rights of the Company.

If any of the circumstances where the Company is dissolved as stipulated in the preceding paragraph occurs, the circumstance leading to the liquidation shall be announced through the National Enterprise Credit Information Publicity System within 10 days. If the Company is dissolved due to the provisions of items (1), (2), (4) and (5) of the preceding paragraph, a liquidation group shall be established within 15 days from the date of occurrence of the circumstance leading to the liquidation to commence liquidation.

The liquidation group shall notify creditors within 10 days after its establishment, and shall, within 60 days, publish an announcement on a newspaper or the National Enterprise Credit Information Publicity System. Creditors shall, within 30 days from the receipt of the notice or, if they do not receive the notice, within 45 days from the date of the announcement, declare their claims to the liquidation group.

After sorting out the assets of the Company and preparing a balance sheet and an inventory of assets, if the liquidation group discovers that the assets of the Company are insufficient to repay its debts, it shall apply to the people's court for bankruptcy and liquidation in accordance with the law. After the people's court accepts the bankruptcy application, the liquidation group shall hand over the liquidation affairs to the bankruptcy administrator designated by the people's court.

Where the Company is declared bankrupt according to law, bankruptcy liquidation shall be carried out in accordance with relevant laws concerning enterprise bankruptcy.

AMENDMENTS TO THE ARTICLES OF ASSOCIATION

In any of the following circumstances, the Company shall amend the Articles of Association:

- (1) after amendments have been made to the Company Law or relevant laws, administrative regulations, and other regulatory rules of the place where the shares of the Company are listed, the provisions of the Articles of Association conflict with the provisions of the amended laws, administrative regulations;

APPENDIX V

SUMMARY OF ARTICLES OF ASSOCIATION

- (2) there is a change in the situation of the Company, which is inconsistent with the matters recorded in the Articles of Association;
- (3) the shareholders' meeting decides to amend the Articles of Association.

Any amendments to the Articles of Association approved by the resolution of the shareholders' meeting shall be submitted to the competent authorities for approval if they are subject to approval by the competent authorities. If such amendments involve the registered items of the Company, an application shall be made for the registration of change in accordance with the law.

APPENDIX VI

STATUTORY AND GENERAL INFORMATION

A. FURTHER INFORMATION ABOUT OUR GROUP

1. Establishment of Our Company

Our Company was established as a limited liability company in the PRC on September 22, 2016 and was converted to a joint stock company with limited liability under the laws of the PRC with effect from January 30, 2026. As of the Latest Practicable Date, the registered capital of our Company was RMB28,824,452 divided into 288,244,520 Unlisted Shares with a nominal value of RMB0.10 each.

Our Company has established a principal place of business at 46/F, Hopewell Centre, 183 Queen’s Road East, Wan Chai, Hong Kong and [has been] registered with the Registrar of Companies in Hong Kong as a non-Hong Kong company in Hong Kong under Part 16 of the Companies Ordinance on [●]. Ms. Chan Ching Nga (陳靜雅), one of our joint company secretaries, has been appointed as the authorized representative of our Company for the acceptance of service of process and notices on behalf of our Company in Hong Kong.

As our Company was established in the PRC, our corporate structure and Articles of Association are subject to the relevant laws and regulations of the PRC. A summary of the relevant provisions of our Articles of Association is set out in “Appendix V—Summary of Articles of Association” to this document.

APPENDIX VI

STATUTORY AND GENERAL INFORMATION

C. FURTHER INFORMATION ABOUT DIRECTORS AND SUBSTANTIAL SHAREHOLDERS

1. Disclosure of Interests

(a) Directors and the chief executive of our Company

As of the Latest Practicable Date, so far as our Directors are aware, Jiangxi Shining Weimou Pharmaceutical Co., Ltd. (江西閃亮維眸醫藥有限公司) is held as to 25.00% by our Company and approximately 15.00% by Shanghai Zhitong Jiurui Enterprise Management Partnership (Limited Partnership) (上海致同久瑞企業管理合夥企業(有限合夥)), which is held as to 40% by Dr. Xia Erning, our executive Director and chief technology officer, as its limited partner.

Save as disclosed above and in the section headed “Substantial Shareholders” in this document, immediately following the completion of the [REDACTED] and conversion of Unlisted Shares into H Shares, so far as our Directors are aware, none of our Directors or chief executive of our Company as any interests or short positions in the Shares, underlying Shares and debentures of our Company or its associated corporations (within the meaning of Part XV of the SFO) which will be required to be notified to our Company and the Stock Exchange pursuant to Divisions 7 and 8 of Part XV of the SFO (including interests or short positions which they were taken or deemed to have under such provisions of the SFO) or which will be required, under section 352 of the SFO, to be entered in the register referred to in that section, or which will be required, under the Model Code for Securities Transactions by Directors of Listed Issuers as set out in Appendix 10 to the Listing Rules (the “Model Code”), to be notified to our Company and the Stock Exchange once the H Shares are listed.

(b) Substantial Shareholders

For the information on the persons who will, immediately following the completion of the [REDACTED], have interests or short positions in our Shares or underlying Shares which would be required to be disclosed to our Company and the Hong Kong Stock Exchange under the provisions of Divisions 2 and 3 of Part XV of the SFO, or directly or indirectly be interested in 10% or more of the nominal value of any class of share capital carrying voting rights in all circumstances at general meetings of our Company, see “Substantial Shareholders” for details.

Save as disclosed in the section headed “Substantial Shareholders” in this document, our Directors are not aware of any persons (other than our Directors and chief executive) who will, immediately following the completion of the [REDACTED], have or be deemed or taken to have interests and/or short position in our Shares or underlying Shares which would be required to be disclosed under the provisions of Divisions 2 and 3 of Part XV of the SFO, or who is, directly or indirectly, interested in 10% or more of the nominal value of any types of the issued voting shares of any member of our Group.

2. Service Contracts

Each of our Directors [has entered] into a service contract or a letter of appointment with our Company.

Save as disclosed above, we have not entered, and do not propose to enter, into any service contracts with any of our Directors in their respective capacities as Directors (other than contracts expiring or determinable by the employer within one year without any payment of compensation (other than statutory compensation)).

3. Directors’ Remuneration

Save as disclosed in “Directors and Senior Management” and Note 8 to “Appendix I—Accountants’ Report” for the financial year ended December 31, 2024 and nine months ended September 30, 2025, none of our Directors received other remunerations of benefits in kind from us.

APPENDIX VI

STATUTORY AND GENERAL INFORMATION

4. Disclaimers

Save as disclosed in this document:

- (a) none of our Directors or any of the parties listed in “—E. Other Information—4. Qualification and Consents of Experts” of this Appendix is:
 - (i) interested in our promotion, or in any assets which, within the two years immediately preceding the date of this document, have been acquired or disposed of by or leased to us, or are proposed to be acquired or disposed of by or leased to our Company; or
 - (ii) materially interested in any contract or arrangement subsisting at the date of this document which is significant in relation to our business;
- (b) save in connection with the [REDACTED] and the [REDACTED], none of our Directors or any of the parties listed in “—E. Other Information—4. Qualification and Consents of Experts” of this Appendix:
 - (i) is interested legally or beneficially in any shares in any member of our Group; or
 - (ii) has any right (whether legally enforceable or not) to subscribe for or to nominate persons to subscribe for any securities in any member of our Group;
- (c) none of our Directors or their close associates or any shareholders of our Company who to the knowledge of our Directors owns more than 5% of our issued share capital has any interest in our top five customers or suppliers; and
- (d) none of our Directors is a director or employee of a company that has an interest in the share capital of our Company which, once the H Shares are listed on the Hong Kong Stock Exchange, would have to be disclosed pursuant to Divisions 2 and 3 of Part XV of the SFO.

D. EMPLOYEE INCENTIVE SCHEME

To attract, incentivize and retain our employees and other eligible participants, and maintain the stability of our management team and talents, we established Huzhou Xiulai as our Employee Ownership Platform. See “History, Development and Corporate Structure—Employee Ownership Platform” for further details.

The following is a summary of the principal terms of the Employee Incentive Scheme. Under the Employee Incentive Scheme, Eligible Participants (as defined below) were granted partnership interests in the Employee Ownership Platform (“Awards”).

The Employee Incentive Scheme is not subject to the provisions of Chapter 17 of the Listing Rules as it does not involve any grant of share options or awards or any issuance of new Shares by our Company after Listing. Given the Shares under the Employee Incentive Scheme have already been issued to the Employee Ownership Platform as of the Latest Practicable Date, there will not be any dilutive effect to the issued Shares as a result of the operation of the Employee Incentive Scheme.

(a) Purposes

The purposes of the Employee Incentive Scheme is to incentivize our employees and other eligible participants to promote the further development of our Company.

APPENDIX VI

STATUTORY AND GENERAL INFORMATION

(b) Eligible Participants

Eligible participants of the Employee Incentive Scheme (“Eligible Participants”) include Directors, mid-level management, core personnel and other employees of our Group, as well as external consultants and other personnel who are recognized by the Board as having made significant contributions to the Company. The list of Eligible Participants may be adjusted by Huzhou Xiulai from time to time.

(c) Administration

Huzhou Xiulai is responsible for administering the Employee Incentive Scheme, including but not limited to (i) determining and adjusting the list of Eligible Participants who are granted with Awards (the “Grantees”); (ii) determining the number and price of Awards to be granted; (iii) determining the repurchase arrangements of the Awards; (iv) amending the terms and conditions of the Awards; and (v) making all other decisions and determinations in relation to the Awards as deems necessary or advisable for the administration of the Employee Incentive Scheme.

(d) Shares under the Employee Incentive Scheme

As of the Latest Practicable Date, Huzhou Xiulai held [26,561,870] underlying Shares, representing approximately [9.22]% of the issued share capital of our Company. Immediately upon completion of the [REDACTED] (assuming the [REDACTED] is not exercised), the Employee Ownership Platform will be interested in approximately [REDACTED]% of the total issued share capital of our Company.

As of date of this document, Huzhou Xiulai has [48] limited partners, among whom Dr. Xia Erning (夏爾寧) (our executive Director and chief technology officer) held approximately [12.96]% partnership interests as a limited partner therein. None of the limited partners of Huzhou Xiulai holds more than 30% of the partnership interests therein. The general partner of Huzhou Xiulai is Ms. Wu Ye (吳燁), the deputy director of human resources and administration of the Company.

No further Awards will be granted after the date of this document and the Employee Incentive Scheme will not cause any dilution of the shareholding of our Shareholders after the Listing.

(e) Lock-up, Repurchase and Transferability of Partnership Interests

The partnership interests held by the Grantees in the Employee Ownership Platform, which represent the Awards granted to the Grantees, are subject to lock-up restrictions: (i) for Grantees who are employees, the Awards are subject to a lock-up period of four years from the employment commencement date or such other date as specified in the relevant grant notice, with one-fourth being unlocked each year provided that the Grantee maintains a full-time employment relationship or service relationship with our Group; and (ii) for Grantees who are not employees, the Awards shall be unlocked upon the achievement of performance targets as specified in the relevant grant notice.

During the lock-up period, the Awards may be purchased by the general partner of Huzhou Xiulai or its designated entity in the event of, including but not limited to: (i) termination of the Grantee’s employment or service relationship with our Group without cause, in which case the locked award shall be transferred at the original subscription price, and the unlocked award shall, upon request by Huzhou Xiulai, be transferred at 50% of the net asset value per share based on the most recent financial statements submitted to the tax authorities at the time of repurchase; (ii) termination of the Grantee’s employment or service relationship with our Company for cause, in which case all partnership interests held by such Participant shall be transferred at the original subscription price; and (iii) death, serious illness, or loss of working capacity due to work-related injury of the Grantee, in which case the lawful heirs of such Participant shall be permitted to continue to hold the unlocked partnership interests directly or indirectly.

APPENDIX VI

STATUTORY AND GENERAL INFORMATION

After the [REDACTED], in addition to the restrictions under the Employee Incentive Scheme, the transfer or sale by the Grantees shall be subject to the lock-up requirements under the relevant laws and regulations and the rules of the Stock Exchange, or the respective agreements entered into between the Company and the relevant Grantees pursuant to the terms of the Employee Incentive Scheme (if applicable).

E. OTHER INFORMATION

1. Estate Duty

Our Directors have been advised that no material liability for estate duty is likely to impose on our Company or our subsidiaries.

2. Litigation

Save as disclosed in this document, to the knowledge of our Directors, no member of our Group has significant litigation or claims pending or threatened against any member of our Group.

3. Sole Sponsor

The Sole Sponsor satisfies the independence criteria applicable to sponsor as set out in Rule 3A.07 of the Listing Rules.

The Sole Sponsor has made an application on behalf of our Company to the Stock Exchange for the listing of, and permission to deal in, the H Shares to be converted from Unlisted Shares and the H Shares to be issued pursuant to the [REDACTED]. The Sole Sponsor will receive a fee of US\$[700,000] for acting as the sponsor for the Listing.

4. Qualification and Consents of Experts

The qualifications of the experts who have given opinions or advice in this document are as follows:

Name	Qualification
China International Capital Corporation Hong Kong Securities Limited	Licensed to conduct Type 1 (dealing in securities), Type 2 (dealing in futures contracts), Type 4 (advising on securities), Type 5 (advising on futures contracts) and Type 6 (advising on corporate finance) regulated activities under the SFO
Ernst & Young	Certified Public Accountants under Professional Accountant Ordinance (Chapter 50 of the Laws of Hong Kong) Registered Public Interest Entity Auditors under the Accounting and Financial Reporting Council Ordinance (Chapter 588 of the Laws of Hong Kong)
Global Law Office.	Legal advisers to our Company as to the PRC law
Frost & Sullivan (Beijing) Inc., Shanghai Branch Co. . .	Independent industry consultant

Each of the experts has given and has not withdrawn its written consents to the issue of this document with the inclusion of its reports, letters, opinions or summaries of opinions (as the case may be) and the references to its names and logos included herein in the form and context in which it is respectively included.

APPENDIX VI

STATUTORY AND GENERAL INFORMATION

As of the Latest Practicable Date, none of the experts named above has any of our shareholding interests in any member of our Group or rights (whether legally enforceable or not) to subscribe for or to nominate persons to subscribe for our securities in any member of our Group.

5. Compliance Adviser

Our Company has appointed Somerley Capital Limited as its Compliance Adviser in compliance with Rule 3A.19 of the Listing Rules.

6. Taxation of Holders of H Shares

Hong Kong stamp duty, currently charged at the ad valorem rate of 0.10% on the higher of the consideration for or the market value of the H Shares, will be payable by the purchaser on every purchase and by the seller on every sale of any Hong Kong securities, including H Shares (in other words, a total of 0.20% is currently payable on a typical sale and purchase transaction involving H Shares). In addition, a fixed stamp duty of HK\$5.00 is currently payable on any instrument of transfer of H Shares. Where one of the parties is a resident outside Hong Kong and does not pay the ad valorem duty due by it, the duty not paid will be assessed on the instrument of transfer (if any) and will be payable by the transferee. If no stamp duty is paid on or before the due date, a penalty of up to ten times the duty payable may be imposed.

7. Binding Effect

This document shall have the effect, if any application is made pursuant hereto, of rendering all persons concerned bound by all the provisions (other than the penal provisions) of sections 44A and 44B of the Companies (Winding Up and Miscellaneous Provisions) Ordinance so far as applicable.

8. Bilingual Document

The English language and Chinese language versions of this document are being published separately, in reliance upon the exemption provided by section 4 of the Companies (Exemption of Companies and Prospectuses from Compliance with Provisions) Notice (Chapter 32L of the Laws of Hong Kong).

9. Promoters

The promoters of our Company comprised all of the 37 then shareholders of our Company before our conversion into a joint stock company with limited liability. Save as disclosed in this document, within the two years immediately preceding the date of this document, no cash, securities or benefits have been paid, allotted or given, or are proposed to be paid, allotted or given to the promoters named above in connection with the [REDACTED] or the related transactions described in this document.

10. Preliminary Expenses

Our Company did not incur any material preliminary expenses.

11. No Material Adverse Change

Our Directors confirm that, as of the date of this document, there has been no material adverse change in our financial or trading position or prospects since September 30, 2025 (being the date to which the latest audited consolidated financial statements of our Group were prepared).

APPENDIX VI

STATUTORY AND GENERAL INFORMATION

12. Miscellaneous

- (a) within the two years immediately preceding the date of this document:
 - (i) save as disclosed in “History, Development and Corporate Structure” in this document, no share or loan capital of our Company or our subsidiaries had been issued or agreed to be issued or proposed to be fully or partly paid either for cash or for a consideration other than cash;
 - (ii) no share or loan capital of our Company or our subsidiaries is under option or is agreed conditionally or unconditionally to be put under option;
 - (iii) save as disclosed in “[REDACTED]” in this document, no commissions, discounts, brokerages or other special terms have been granted or agreed to be granted in connection with the issue or sale of any share or loan capital of our Company or our subsidiaries; and
 - (iv) save as disclosed in “[REDACTED]” in this document, no commission has been paid or is payable for subscription, agreeing to subscribe, procuring subscription or agreeing to procure subscription of any share in our Company or our subsidiaries;
- (b) there are no founder, management or deferred shares nor any debentures in our Company or our subsidiaries;
- (c) there has not been any interruption in the business of our Group which may have or has had a significant effect on the financial position of our Group in the 12 months preceding the date of this document;
- (d) no company within our Group is presently listed on any stock exchange or traded on any trading system;
- (e) all necessary arrangements have been made to enable our H Shares to be admitted into CCASS for clearing and settlement;
- (f) our Company has no outstanding convertible debt securities or debentures;
- (g) there is no arrangement under which future dividends are waived or agreed to be waived, and there is no restriction affecting the remittance of profits or repatriation of capital by us into Hong Kong from outside Hong Kong; and
- (h) none of the equity and debt securities of our Company, if any, is listed or dealt with in any other stock exchange nor is any listing or permission to deal being or proposed to be sought.

APPENDIX VII DOCUMENTS DELIVERED TO THE REGISTRAR OF COMPANIES AND DOCUMENTS ON DISPLAY

A. DOCUMENTS DELIVERED TO THE REGISTRAR OF COMPANIES

The documents attached to the copy of this document delivered to the Registrar of Companies in Hong Kong for registration were:

- (a) the written consents referred to in “Appendix VI—Statutory and General Information—E. Other Information—4. Qualification and Consents of Experts” to this document; and
- (b) a copy of each of the material contracts referred to in “Appendix VI—Statutory and General Information—B. Further Information about Our Business—1. Summary of Material Contracts” to this document.

B. DOCUMENTS ON DISPLAY

Copies of the following documents will be published on the websites of the Stock Exchange (www.hkexnews.hk) and our Company (www.vivavisionbio.com) up to and including the date which is 14 days from the date of this document:
