## ACCOUNTANTS' REPORT ON HISTORICAL FINANCIAL INFORMATION TO THE DIRECTORS OF SHENZHEN FORMS SYNTRON INFORMATION CO., LTD., CMB INTERNATIONAL CAPITAL LIMITED AND GUOSEN SECURITIES (HK) CAPITAL COMPANY LIMITED

### Introduction

We report on the historical financial information of Shenzhen Forms Syntron Information Co., Ltd. (the "**Company**") and its subsidiaries (together, the "**Group**") set out on pages I-4 to I-75, which comprises the consolidated statements of financial position of the Group and the statements of financial position of the Company as at 31 December 2023, 2024 and 2025 and 31 March 2026 and the consolidated statements of profit or loss and other comprehensive income, the consolidated statements of changes in equity and the consolidated statements of cash flows of the Group for each of the years ended 31 December 2023, 2024 and 2025 and the three months ended 31 March 2026 (the "**Track Record Period**") including material accounting policy information and other explanatory information (together, the "**Historical Financial Information**"). The Historical Financial Information set out on pages I-4 to I-75 forms an integral part of this report, which has been prepared for inclusion in the Document of the Company dated [•] (the "**Document**") in connection with the **[REDACTED]** of the shares of the Company on the **[REDACTED]** of The Stock Exchange of Hong Kong Limited.

### Directors' responsibility for the Historical Financial Information

The directors of the Company are responsible for the preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of preparation and presentation set out in Note 2 to the Historical Financial Information, and for such internal control as the directors of the Company determine is necessary to enable the preparation of the Historical Financial Information that is free from material misstatement, whether due to fraud or error.

### Reporting accountants' responsibility

Our responsibility is to express an opinion on the Historical Financial Information and to report our opinion to you. We conducted our work in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 200 "*Accountants' Report on Historical Financial Information in Investment Circulars*" issued by the Hong Kong Institute of Certified Public Accountants (the "**HKICPA**"). This standard requires that we comply with ethical standards and plan and perform our work to obtain reasonable assurance about whether the Historical Financial Information is free from material misstatement.

Our work involved performing procedures to obtain evidence about the amounts and disclosures in the Historical Financial Information. The procedures selected depend on the reporting accountants' judgment, including the assessment of risks of material misstatement of the Historical Financial Information, whether due to fraud or error. In making those risk assessments, the reporting accountants consider internal control relevant to the entity's preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in Note 2 to the Historical Financial Information in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Our work

also included evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors of the Company, as well as evaluating the overall presentation of the Historical Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

**Opinion**

In our opinion the Historical Financial Information gives, for the purposes of the accountants' report, a true and fair view of the Company's and the Group's financial position as at 31 December 2023, 2024 and 2025 and 31 March 2026 and of the Group's financial performance and cash flows for the Track Record Period in accordance with the basis of preparation set out in Note 2 to the Historical Financial Information.

**Review of Stub Period Comparative Financial Information**

We have reviewed the stub period comparative financial information of the Group which comprises the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the three months ended 31 March 2025 and other explanatory information (the "**Stub Period Comparative Financial Information**"). The directors of the Company are responsible for the preparation and presentation of the Stub Period Comparative Financial Information in accordance with the basis of preparation set out in Note 2 to the Historical Financial Information.

Our responsibility is to express a conclusion on the Stub Period Comparative Financial Information based on our review. We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the HKICPA.

A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion. Based on our review, nothing has come to our attention that causes us to believe that the Stub Period Comparative Financial Information, for the purposes of the accountants' report, is not prepared, in all material respects, in accordance with the basis of preparation set out in Note 2 to the Historical Financial Information.

**Report on matters under the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited and the Companies (Winding Up and Miscellaneous Provisions) Ordinance**

**Adjustments**

In preparing the Historical Financial Information, no adjustments to the Underlying Financial Statements as defined on page I-4 have been made.

**Dividends**

We refer to note 13 to the Historical Financial Information which contains information about the dividends declared and paid by the Company in respect of the Track Record Period.

## NOTES TO THE HISTORICAL FINANCIAL INFORMATION

### 1. CORPORATE INFORMATION

Shenzhen Forms Syntron Information Co., Ltd. (the "**Company**") was established in the People's Republic of China (the "**PRC**") as a joint stock company with limited liability. The Company's A shares have been listed on Shenzhen Stock Exchange since 27 May 2015. The addresses of the registered office of the Company and principal places of business of the Company are the same as the registered office in the PRC and the headquarters in the PRC as stated in the section headed "Corporate Information" of the Document. In the opinion of the directors, during the Track Record Period and up to the date of this report, the Company is ultimately controlled by Mr. Chow Chi Kwan.

The Company and its subsidiaries are principally engaged in provision of fintech software development services, consultation services and system integration services.

The Company's major subsidiary is as follows:

| Name | Place and date of incorporation/ establishment | Paid up issued share capital | Proportion of ownership interest attributable to the Company | | | | | Principal activities |
|---|---|---|---|---|---|---|---|---|
| | | | As at 31 December | | | As at 31 March | As at the date of this report | |

The above table lists the subsidiary of the Company which, in the opinion of the directors, principally affected the results for the year or formed a substantial portion of the net assets of the Group. To give details of other subsidiaries would, in the opinion of the directors, result in particulars of excessive length.

*Note:*

(a) The statutory financial statements of this company during the years ended 31 December 2023 and 2024 prepared under Hong Kong Generally Accepted Accounting Principles were audited by Kaizen CPA Limited registered in the Hong Kong. No audited statutory report has been issued for the year ended 31 December 2025.

## 2. BASIS OF PREPARATION

The Historical Financial Information has been prepared in accordance with IFRS Accounting Standards, which include all applicable individual IFRS Accounting Standards and Interpretations approved by the International Accounting Standards Board ("**IASB**"). All IFRS Accounting Standards that are effective for the accounting period beginning on 1 January 2026, together with the relevant transitional provisions, have been early adopted by the Group in the preparation of the Historical Financial Information throughout the Track Record Period.

The material accounting policies that have been used in the preparation of this Historical Financial Information are summarised in note 4. These policies have been consistently applied to all the reporting periods presented in the Historical Financial Information, unless otherwise stated.

## 3. APPLICATION OF NEW AND AMENDMENTS TO IFRS ACCOUNTING STANDARDS

### New and amendments to IFRS Accounting Standards in issue but not yet effective

The Group has not applied the following new and revised IFRS Accounting Standards, that have been issued but are not yet effective, in the Historical Financial Information. The Group intends to apply these new and revised IFRS Accounting Standards, if applicable, when they become effective:

| | |
|---|---|
| IFRS 18 | *Presentation and Disclosure in Financial Statements*[1] |
| IFRS 19 | *Subsidiaries without Public Accountability: Disclosure*[1] |
| IFRS 20 | *Regulatory Assets and Regulatory Liabilities*[2] |
| Amendments to IFRS 10 and IAS 28 | *Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*[3] |
| Amendments to IAS 21 | *Translation to a Hyperinflationary Presentation Currency*[1] |

[1] Effective for annual periods beginning on or after 1 January 2027
[2] Effective for annual periods beginning on or after 1 January 2029
[3] Effective for annual periods beginning on or after a date to be determined

The Group is in the process of making an assessment of the impact of the above new and revised IFRS Accounting Standards upon initial application. So far, it has concluded that, except as described below, the adoption of other new and revised IFRS Accounting Standards will not have a material impact on the Group's financial position and financial performance in the foreseeable future.

### IFRS 18 — Presentation and Disclosure in Financial Statements

IFRS 18 sets out requirements on presentation and disclosures in financial statements and will replace IAS 1 Presentation of Financial Statements. IFRS 18 introduces new requirements to present specified categories and defined subtotals in the statement of profit or loss; provide disclosures on management-defined performance measures in the notes to the financial statements and improve aggregation and disaggregation of information to be disclosed in the financial statements. Minor amendments to IAS 7 Statement of Cash Flows and IAS 33 Earnings per Share are also made.

IFRS 18, and the consequential amendments to other IFRS Accounting Standards, will be effective for annual periods beginning on or after 1 January 2027, with early application permitted.

The application of IFRS 18 is not expected to have material impact on the financial position of the Group but is expected to affect the presentation of the consolidated statement of profit or loss and other comprehensive income and consolidated statement of cash flows and disclosures in the future financial statements.

The directors are currently assessing the detailed implications of applying the new standard on the Group's consolidated financial statements. From the high-level preliminary assessment performed, the following potential impacts have been identified:

- Although the adoption of IFRS 18 will have no impact on the Group's net profit, the Group expects that grouping items of income and expenses in the consolidated statement of profit or loss into the new categories will impact how operating profit is calculated and reported.

- The Group does not expect there to be a significant change in the information that is currently disclosed in the notes because the requirement to disclose material information remains unchanged; however, the way in which the information is grouped might change as a result of the aggregation/disaggregation principles. In addition, there will be significant new disclosures required for:

  — management-defined performance measures;

  — a breakdown of the nature of expenses for line items presented by function in the operating category of the consolidated statement of profit or loss — this breakdown is only required for certain nature expenses; and

  — for the first annual period of application of IFRS 18, a reconciliation for each line item in the consolidated statement of profit or loss between the restated amounts presented by applying IFRS 18 and the amounts previously presented applying IAS 1.

- From a consolidated statement of cash flow perspective, there will be changes to how interest received and interest paid are presented. Interest paid will be presented as financing cash flows and interest received as investing cash flows, which is a change from current presentation as part of operating cash flows.

## 4. MATERIAL ACCOUNTING POLICY INFORMATION

The Historical Financial Information has been prepared on the historical cost basis except for equity instruments designated at FVTOCI that is measured at fair values at the end of each reporting period. Historical cost is generally based on the fair value of the consideration given in exchange for goods and services.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date, regardless of whether that price is directly observable or estimated using another valuation technique. Details of fair value measurement are explained in the accounting policies set out below.

The material accounting policies are set out below.

**Basis of consolidation**

The Historical Financial Information incorporate the financial statements of the Company and entities controlled by the Company and its subsidiaries. Control is achieved where the Group has: (i) the power over the investee; (ii) exposure, or rights, to variable returns from its involvement with the investee; and (iii) the ability to use its power over the investee to affect the amount of the Group's returns.

The Group reassesses whether it controls an investee if facts and circumstances indicate that there are changes to one or more of these elements of control listed above.

Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and cease when the Group loses control of the subsidiary.

Income and expenses of subsidiaries are included in the consolidated statements of profit or loss and other comprehensive income from the date the Group gains control until the date when the Group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income of subsidiaries are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between entities of the Group are eliminated in full on consolidation.

**Revenue from contracts with customers**

Revenue is recognised to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. Specifically, the Group uses a 5-step approach to revenue recognition:

- Step 1: Identify the contract(s) with a customer
- Step 2: Identify the performance obligations in the contract
- Step 3: Determine the transaction price
- Step 4: Allocate the transaction price to the performance obligations in the contract
- Step 5: Recognise revenue when (or as) the entity satisfies a performance obligation.

The Group recognised revenue when (or as) a performance obligation is satisfied, i.e. when "control" of the goods or services underlying the particular performance obligation is transferred to customers.

A performance obligation represents a good or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same.

Control is transferred over time and revenue is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation if one of the following criteria is met:

- The customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs;
- The Group's performance creates or enhances an asset that the customer controls as the asset is created or enhanced; or
- The Group's performance does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date.

Otherwise, revenue is recognised at a point in time when the customer obtains control of the distinct goods or service.

Revenue is measured based on the consideration to which the Group expects to be entitled in a contract with a customer, excludes amounts collected on behalf of third parties, discounts and sales related taxes.

***Contract assets and contract liabilities***

A contract asset represents the Group's right to consideration in exchange for goods or services that the Group has transferred to a customer that is not yet unconditional. It is assessed for impairment in accordance with IFRS 9 Financial Instruments. In contrast, a receivable represents the Group's unconditional right to consideration, i.e. only the passage of time is required before payment of that consideration is due.

A contract liability represents the Group's obligation to transfer goods or services to a customer for which the Group has received consideration from the customer. A contract liability would also be recognised if the Group has an unconditional right to receive consideration before the Group recognises the related revenue. In such cases, a corresponding receivable would also be recognised.

The Group recognised revenue from the following major sources:

- Fintech software development services
- Consultation services
- System integration services

***Fintech software development services***

Revenue generated from customised fintech software development services which contains software development and maintenance on banking technology services (including banking products portfolio, digital banking channel solutions and banking operations and data services) and financial infrastructure and fintech innovation services according to the requirements of customers, which is recognised i) at the point in time when control of the development achievement created from the customised fintech software development services is transferred to the customer, generally upon the customer's acceptance of the development achievement without unfulfilled obligation that will affect the customer's acceptance or ii) over time when the customer simultaneously receives and benefits from the service, which is to recognise revenue on the basis of monthly usage on our records, which are

further adjusted by the usage agreed by customers or based on the maintenance service period. Intellectual property rights arising from customised fintech software development services belong to the customers.

***Consultation services***

The Group provides consultation services to its customers. The revenue generated from consultation services is recognised i) at the point in time when the performance obligation under the terms of a contract with the customer is satisfied, generally upon the acceptance of the service or ii) over time when the customer simultaneously receives and benefits from the service on the basis of monthly usage on our records, which are further adjusted by the usage agreed by customers or based on the consultation services period.

***System integration services***

Revenue generated from the system integration services is recognised at the point in time when the performance obligation under the terms of a contract with the customer is satisfied, generally upon the acceptance of the products.

***Other income***

Interest income is recognised on an accrual basis using the effective interest method by applying the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, when appropriate, to the net carrying amount of the financial asset.

**Principal versus agent**

When another party is involved in providing goods or services to a customer, the Group determines whether the nature of its promise is a performance obligation to provide the specified goods or services itself (i.e. the Group is a principal) or to arrange for those goods or services to be provided by the other party (i.e. the Group is an agent).

The Group is a principal if it controls the specified good or service before that good or service is transferred to a customer.

The Group is an agent if its performance obligation is to arrange for the provision of the specified good or service by another party. In this case, the Group does not control the specified good or service provided by another party before that good or service is transferred to the customer. When the Group acts as an agent, it recognises revenue in the amount of any fee or commission to which it expects to be entitled in exchange for arranging for the specified goods or services to be provided by the other party.

**Contract costs**

The Group incurs costs (including labour costs, software development and maintenance consumables and others) to fulfil a contract in its services contracts. The Group first assesses whether these costs qualify for recognition as an asset in terms of other relevant standards, failing which it recognised an asset for these costs only if they meet all of the following criteria:

- the costs relate directly to a contract or to an anticipated contract that the Group can specifically identify;

- the costs generate or enhance resources of the Group that will be used in satisfying (or in continuing to satisfy) performance obligations in the future; and

- the costs are expected to be recovered

The asset so recognised is subsequently amortised to profit or loss on a systematic basis that is consistent with the transfer to the customer of the goods or services to which the assets relate.

Capitalised contract costs are stated at cost less accumulated amortisation and impairment losses. Impairment losses are recognised to the extent that the carrying amount of the contract cost asset exceeds the net of (i) remaining amount of consideration that the Group expects to receive in exchange for the goods or services to which the asset relates, less (ii) any costs that relate directly to providing those goods or services that have not yet been recognised as expenses.

**Leasing**

***Definition of a lease***

A contract is, or contains, a lease if the contract conveys a right to control the use of an identified asset for a period of time in exchange for consideration.

***The Group as lessee***

The Group assesses whether a contract is or contains a lease, at inception of the contract. The Group recognises a right-of-use asset and a corresponding lease liability with respect to all lease arrangements in which it is the lessee, except for short-term leases (defined as leases with a lease term of 12 months or less from the commencement date and do not contain a purchase option) and leases of low value assets. For these leases, the Group recognises the lease payments as an operating expense on a straight-line basis over the term of the lease unless another systematic basis is more representative of the time pattern in which economic benefits from the leased assets are consumed.

***Lease liabilities***

At the commencement date, the Group measures lease liability at the present value of the lease payments that are not paid at that date. The lease payments are discounted by using the interest rate implicit in the lease. If this rate cannot be readily determined, the Group uses its incremental borrowing rate.

Lease payments included in the measurement of the lease liability comprise:

- fixed lease payments (including in-substance fixed payments), less any lease incentives receivable;
- variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date;
- the amount expected to be payable by the lessee under residual value guarantees;
- the exercise price of purchase options if the lessee is reasonably certain to exercise the options; and
- payments of penalties for terminating the lease, if the lease term reflects the Group exercising an option to terminate the lease.

The lease liabilities are presented as a separate line in the consolidated statements of financial position.

The lease liabilities are subsequently measured by increasing the carrying amount to reflect interest on the lease liabilities (using the effective interest method) and by reducing the carrying amount to reflect the lease payments made.

***Right-of-use assets***

The right-of-use assets comprise the initial measurement of the corresponding lease liability, lease payments made at or before the commencement date and any initial direct costs, less lease incentives received.

Right-of-use assets are subsequently measured at cost less accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. They are depreciated over the shorter period of lease term and useful life of the underlying asset. The depreciation starts at the commencement date of the lease.

The Group presents right-of-use assets as a separate line in the consolidated statements of financial position.

The Group applies IAS 36 to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss.

***The Group as lessor***

The Group enters into lease agreements as a lessor with respect to its investment properties. Leases for which the Group is a lessor are classified as finance or operating leases. Whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee, the contract is classified as a finance lease. All other leases are classified as operating leases.

Rental income from operating leases is recognised on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised on a straight-line basis over the lease term.

Amounts due from lessees under finance leases are recognised as receivables at the amount of the Group's net investment in the leases. Finance lease income is allocated to accounting periods so as to reflect a constant periodic rate of return on the Group's net investment outstanding in respect of the leases.

**Foreign currencies**

In preparing the financial statements of each individual group entity, transactions in currencies other than the functional currency of that entity (foreign currencies) are recorded in the respective functional currency (i.e. the currency of the primary economic environment in which the entity operates) at the rates of exchanges prevailing on the dates of the transactions. At the end of the reporting period, monetary items denominated in foreign currencies are retranslated at the rates prevailing at that date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of monetary items, and on the retranslation of monetary items, are recognised in profit or loss in the period in which they arise.

For the purposes of presenting the Historical Financial Information, the assets and liabilities of the Group's foreign operations are translated into the presentation currency of the Group (i.e. RMB) using exchange rates prevailing at the end of each reporting period. Income and expenses items are translated at the average exchange rates for the year, unless exchange rates fluctuate significantly during that period, in which case, the exchange rates prevailing at the date of transactions are used. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity under the heading of translation reserve (attributed to non-controlling interests as appropriate).

**Borrowing costs**

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets until such time as the assets are substantially ready for their intended use or sale.

All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

**Government grants**

Government grants are not recognised until there is reasonable assurance that the Group will comply with the conditions attaching to them and that the grants will be received.

Government grants are recognised in profit or loss on a systematic basis over the periods in which the Group recognises as expenses the related costs for which the grants are intended to compensate. Specifically, government grants whose primary condition is that the Group should purchase, construct or otherwise acquire non-current assets are recognised as deferred income in the consolidated statement of financial position and transferred to profit or loss on a systematic and rational basis over the useful lives of the related assets.

**Retirement benefits costs and termination benefits**

Payments to defined contribution plans, state-managed retirement benefit schemes and Mandatory Provident Fund Scheme are recognised as an expense when employees have rendered service entitling them to the contributions.

**Short-term employee benefits**

A liability is recognised for benefits accruing to employees in respect of wages and salaries, annual leave and sick leave in the period the related service is rendered at the undiscounted amount of the benefits expected to be paid in exchange for that service.

Liabilities recognised in respect of short-term employee benefits are measured at the undiscounted amount of the benefits expected to be paid in exchange for the related service.

**Taxation**

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit before tax as reported in the consolidated statements of profit or loss and other comprehensive income because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible. The Group's liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Deferred tax is recognised on temporary differences between the carrying amounts of assets and liabilities in the Historical Financial Information and the corresponding tax bases used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from goodwill or from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit and at the time of the transaction does not give rise to equal taxable and deductible temporary differences.

Deferred tax liabilities are recognised for taxable temporary differences associated with investments in subsidiaries, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future. Deferred tax assets arising from deductible temporary differences associated with such investments and interests are only recognised to the extent that it is probable that there will be sufficient taxable profits against which to utilise the benefits of the temporary differences and they are expected to reverse in the foreseeable future.

The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period in which the liability is settled or the asset is realised, based on tax rate (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority.

For leasing transactions in which the tax deductions are attributable to the lease liabilities, the Group applies IAS 12 requirements to the lease liabilities and the related assets separately. The Group recognises a deferred tax asset related to lease liabilities to the extent that it is probable that taxable profit will be available against which the deductible temporary difference can be utilised and a deferred tax liability for all taxable temporary differences.

Current and deferred tax are recognised in profit or loss. Where current tax or deferred tax arises from the initial accounting for a business combination, the tax effect is included in the accounting for the business combination.

**Property, plant and equipment**

Property, plant and equipment other than construction in progress are stated in the consolidated statements of financial position at cost less subsequent accumulated depreciation and subsequent accumulated impairment losses, if any.

***Ownership interests in leasehold land and buildings***

When the Group makes payments for ownership interests of properties which include both leasehold land and building elements, the entire consideration is allocated between the leasehold land and the building elements in proportion to the relative fair values at initial recognition. To the extent the allocation of the relevant payments can be made reliably, interest in leasehold land is presented as "right-of-use assets" in the consolidated statements of financial position. When the consideration cannot be allocated reliably between non-lease building element and undivided interest in the underlying leasehold land, the entire properties are classified as property, plant and equipment.

Depreciation is recognised so as to allocate the cost of items of property, plant and equipment (other than construction in progress) less their residual values over their estimated useful lives, using the straight-line method. The estimated useful lives, residual values and depreciation method are reviewed at the end of each reporting period, with the effect of any changes in estimate accounted for on a prospective basis.

Properties in the course of construction for production, supply or administrative purposes are carried at cost, less any recognised impairment loss. Costs include any costs directly attributable to bringing the asset to the location and condition necessary for it to be capable of operating in the manner intended by management, including cost of testing whether the related assets are functioning properly and, for qualifying assets, borrowing costs capitalised in accordance with the Group's accounting policy. Such properties are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use. Depreciation of these assets, on the same basis as other property assets, commences when the assets are ready for their intended use.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected to arise from the continued use of the asset. Any gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying amount of the asset and is recognised in profit or loss.

**Intangible assets**

***Intangible assets acquired separately***

Intangible assets with finite useful lives that are acquired separately are carried at costs less accumulated amortisation and any accumulated impairment losses. Amortisation for intangible assets with finite useful lives is recognised on a straight-line basis over their estimated useful lives. The estimated useful life and amortisation method are reviewed at the end of each reporting period, with the effect of any changes in estimate being accounted for on a prospective basis.

Intangible assets with indefinite useful lives that are acquired separately are carried at cost less any subsequent accumulated impairment losses.

An intangible asset is derecognised on disposal, or when no future economic benefits are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset are measured at the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in profit or loss in the period when the asset is derecognised.

**Internally-generated intangible assets — research and development expenditure**

An internally-generated intangible asset arising from development activities (or from the development phase of an internal project) is recognised if, and only if, all of the following have been demonstrated:

- the technical feasibility of completing the intangible asset so that it will be available for use or sale;
- the intention to complete the intangible asset and use or sell it;
- the ability to use or sell the intangible asset;
- how the intangible asset will generate probable future economic benefits;
- the availability of adequate technical, financial and other resources to complete the development and to use or sell the intangible asset; and
- the ability to measure reliably the expenditure attributable to the intangible asset during its development.

The amount initially recognised for internally-generated intangible asset is the sum of the expenditure incurred from the date when the intangible asset first meets the recognition criteria listed above. Where no internally-generated intangible asset can be recognised, development expenditure is recognised in profit or loss in the period in which it is incurred.

Subsequent to initial recognition, internally-generated intangible asset is reported at cost less accumulated amortisation and accumulated impairment losses, on the same basis as intangible assets acquired separately.

Expenditure on research activities is recognised as an expense in the period in which it is incurred.

**Impairment on property, plant and equipment, right-of-use assets and intangible assets**

At the end of each reporting period, the Group reviews the carrying amounts of its plant and equipment, right-of-use assets and intangible assets with finite useful lives to determine whether there is any indication that those assets have suffered an impairment loss. If any such indication exists, the recoverable amount of the relevant asset is estimated in order to determine the extent of the impairment loss (if any).

The recoverable amount of plant and equipment, right-of-use assets and intangible assets are estimated individually. When it is not possible to estimate the recoverable amount of an asset individually, the Group estimates the recoverable amount of the cash-generating unit to which the asset belongs. When a reasonable and consistent basis of allocation can be identified, corporate assets are also allocated to individual cash-generating unit, or otherwise they are allocated to the smallest group of cash-generating units for which a reasonable and consistent allocation basis can be identified.

Recoverable amount is the higher of fair value less costs of disposal and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or a cash-generating unit) for which the estimates of future cash flows have not been adjusted.

If the recoverable amount of an asset (or a cash-generating unit) is estimated to be less than its carrying amount, the carrying amount of the asset (or a cash-generating unit) is reduced to its recoverable amount. For corporate assets or portion of corporate assets which cannot be allocated on a reasonable and consistent basis to a cash-generating unit, the Group compares the carrying amount of a group of cash-generating units, including the carrying amounts of the corporate assets or portion of corporate assets allocated to that group of cash-generating units, with the recoverable amount of the group of cash-generating units. In allocating the impairment loss, the impairment loss is allocated first to reduce the carrying amount of any goodwill (if applicable) and then to the other assets on a pro-rata basis based on the carrying amount of each asset in the unit or the group of cash-generating units. The carrying amount of an asset is not reduced below the highest of its fair value less costs of disposal (if measurable), its value in use (if determinable) and zero. The amount of the impairment loss that would otherwise have been allocated to the asset is allocated pro rata to the other assets of the unit or the group of cash-generating units. An impairment loss is recognised immediately in profit or loss.

Where an impairment loss subsequently reverses, the carrying amount of the asset (or cash-generating unit) is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset (or the cash-generating unit) in prior years. A reversal of an impairment loss is recognised as income immediately in profit or loss.

**Cash and cash equivalents**

In the consolidated statements of financial position, bank balances and cash comprise cash (i.e. cash on hand and demand deposits) and cash equivalents. Cash equivalents are short-term (generally with original maturity of three months or less), highly liquid investments that are readily convertible to a known amount of cash and which are subject to an insignificant risk of changes in value. Cash equivalents are held for the purpose of meeting short-term cash commitments rather for investment or other purposes.

For the purpose of the consolidated statements of cash flows, cash and cash equivalents consist of cash and cash equivalents, as defined above.

**Investments in subsidiaries**

Investments in subsidiaries are stated at cost less accumulated impairment loss in the statement of financial position of the Company.

**Financial instruments**

Financial assets and financial liabilities are recognised in the consolidated statements of financial position when a group entity becomes a party to the contractual provisions of the instrument.

Financial assets and financial liabilities are initially measured at fair value, except for trade receivables arising from contracts with customers which are initially measured in accordance with IFRS 15 Revenue from Contracts with Customers. Transaction costs that are directly attributable to the acquisition or issue of financial assets and financial liabilities are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition. Transaction costs directly attributable to the acquisition of financial assets or financial liabilities at fair value through profit or loss are recognised immediately in profit or loss.

**Financial assets**

All regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. Regular way purchases or sales are purchases or sales of financial assets that require delivery of assets within the time frame established by regulation or convention in the marketplace.

All recognised financial assets are subsequently measured in their entirety at either amortised cost or fair value, depending on the classification of the financial assets. Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, FVTOCI and fair value through profit or loss ("**FVTPL**").

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them.

***Financial assets at amortised cost (debt instruments)***

The Group measures financial assets subsequently at amortised cost if both of the following conditions are met:

- the financial asset is held within a business model whose objective is to hold financial assets in order to collect contractual cash flows; and

- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets at amortised cost are subsequently measured using the effective interest method and are subject to impairment.

The effective interest method is a method of calculating the amortised cost of a debt instrument and of allocating interest income over the relevant period.

For financial assets other than purchased or originated credit-impaired financial assets (i.e. assets that are credit-impaired on initial recognition), the effective interest rate is the rate that exactly discounts estimated future cash receipts (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) excluding the expected credit losses ("**ECL**"), through the expected life of the debt instrument, or, where appropriate, a shorter period, to the gross carrying amount of the debt instrument on initial recognition.

The amortised cost of a financial asset is the amount at which the financial asset is measured at initial recognition minus the principal repayments, plus the cumulative amortisation using the effective interest method of any difference between that initial amount and the maturity amount, adjusted for any loss allowance. The gross carrying amount of a financial asset is the amortised cost of a financial asset before adjusting for any loss allowance.

Interest income is recognised using the effective interest method for debt instruments measured subsequently at amortised cost. For financial assets other than purchased or originated credit-impaired financial assets, interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired (see below). For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset. If, in subsequent reporting periods, the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset.

The Group's debt instruments are classified and measured subsequently at FVTOCI if both of the following conditions are met:

- the financial asset is held within a business model whose objective is achieved by both collecting contractual cash flows and selling the financial assets; and

- the contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

***Equity instruments designated as at FVTOCI***

On initial recognition, the Group may make an irrevocable election (on an instrument-by-instrument basis) to designate investments in equity instruments as at FVTOCI. Designation at FVTOCI is not permitted if the equity investment is held for trading or if it is contingent consideration recognised by an acquirer in a business combination.

Investments in equity instruments at FVTOCI are initially measured at fair value plus transaction costs. Subsequently, they are measured at fair value with gains and losses arising from changes in fair value recognised in other comprehensive income and accumulated in the fair value reserve (non-recycling). The cumulative gain or loss will not be reclassified to profit or loss on disposal of the equity investments, instead, they will be transferred to retained earnings.

Dividends from investments in equity instruments are recognised in profit or loss when the Group's right to receive the dividends is established, unless the dividends clearly represent a recovery of part of the cost of the investment. Dividends are included in the 'other income, gains and losses, net' line item in profit or loss.

**Impairment of financial assets and other items subject to impairment assessment under IFRS 9 Financial Instruments**

The Group always recognises lifetime ECL for trade receivables and contract assets. The expected credit losses on these financial assets and other items are estimated using a provision matrix based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current as well as the forecast direction of conditions at the reporting date, including time value of money where appropriate.

For all other financial instruments, the Group measures the loss allowance equal to 12-month ECL, unless there has been a significant increase in credit risk since initial recognition, in which case the Group recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increase in the likelihood or risk of a default occurring since initial recognition.

***Significant increase in credit risk***

In assessing whether the credit risk on a financial instrument has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

In particular, the following information is taken in to account when assessing whether credit risk has increased significantly since initial recognition:

- an actual or expected significant deterioration in the financial instrument's external (if available) or internal credit rating;
- significant deterioration in external market indicators of credit risk for a particular debtor, e.g. a significant increase in the credit spread, the credit default swap prices for the debtor, or the length of time or the extent to which the fair value of a financial asset has been less than its amortised cost;
- existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations;
- an actual or expected significant deterioration in the operating results of the debtor;
- significant increases in credit risk on other financial instruments of the same debtor;
- an actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations.

Irrespective of the outcome of the above assessment, the Group presumes that the credit risk on a financial asset has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Group has reasonable and supportable information that demonstrates otherwise.

Despite the foregoing, the Group assumes that the credit risk on a debt instrument has not increased significantly since initial recognition if the debt instrument is determined to have low credit risk at the reporting date. A debt instrument is determined to have low credit risk if i) the debt instrument has a low risk of default, ii) the debtor has a strong capacity to meet its contractual cash flow obligations in the near term, and iii) adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations. The Group considers a debt instrument to have low credit risk when the asset has external credit rating of 'investment grade' in accordance with the globally understood definition or if an external rating is not available, the asset has an internal rating of 'performing'. Performing means that the counterparty has a strong financial position and there is no past due amounts.

The Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

***Definition of default***

The Group considers the following as constituting an event of default for internal credit risk management purposes as historical experience indicates that receivables that meet either of the following criteria are generally not recoverable:

- when there is a breach of financial covenants by the debtor; or
- information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Group, in full (without taking into account any collaterals held by the Group).

Irrespective of the above, the Group considers that default has occurred when a financial asset is more than 90 days past due unless the Group has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

***Credit-impaired financial assets***

A financial asset is credit-impaired when one or more events that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

- significant financial difficulty of the issuer or the borrower;
- a breach of contract, such as a default or past due event;
- the lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession(s) that the lender(s) would not otherwise consider;
- it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation; or
- the disappearance of an active market for that financial asset because of financial difficulties.

***Write-off policy***

The Group writes off a financial asset when there is information indicating that the debtor is in severe financial difficulty and there is no realistic prospect of recovery, e.g. when the counterparty has been placed under liquidation or has entered into bankruptcy proceedings. Financial assets written off may still be subject to enforcement activities under the Group's recovery procedures, taking into account legal advice where appropriate. Any recoveries made are recognised in profit or loss.

***Measurement and recognition of expected credit losses***

The measurement of expected credit losses is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information. As for the exposure at default, for financial assets, this is represented by the assets' gross carrying amount at the reporting date.

For financial assets, the expected credit loss is estimated as the difference between all contractual cash flows that are due to the Group in accordance with the contract and all the cash flows that the Group expects to receive, discounted at the original effective interest rate.

If the Group has measured the loss allowance for a financial instrument at an amount equal to lifetime ECL in the previous reporting period, but determines at the current reporting date that the conditions for lifetime ECL are no longer met, the Group measures the loss allowance at an amount equal to 12-month ECL at the current reporting date, except for assets for which simplified approach was used.

The Group recognises an impairment gain or loss in profit or loss for all financial instruments with a corresponding adjustment to their carrying amount through a loss allowance account.

**Derecognition of financial assets**

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire, or when it transfers the financial asset and substantially all the risks and rewards of ownership of the asset to another party. If the Group neither transfers nor retains substantially all the risks and rewards of ownership and continues to control the transferred asset, the Group recognises its retained interest in the asset and an associated liability for amounts it may have to pay. If the Group retains substantially all the risks and rewards of ownership of a transferred financial asset, the Group continues to recognise the financial asset and also recognises a collateralised borrowing for the proceeds received.

On derecognition of a financial asset measured at amortised cost, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss.

**Financial liabilities and equity instruments**

***Classification as debt or equity***

Debt and equity instruments issued by a group entity are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

***Equity instruments***

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the group entities are recognised at the proceeds received, net of direct **[REDACTED]**.

***Financial liabilities***

All financial liabilities are subsequently measured at amortised cost using the effective interest method or at FVTPL.

Financial liabilities that arise when a transfer of a financial asset does not qualify for derecognition or when the continuing involvement approach applies, are measured in accordance with the specific accounting policies set out below.

***Financial liabilities subsequently measured at amortised cost***

Financial liabilities that are not 1) contingent consideration of an acquirer in a business combination, 2) held-for-trading, or 3) designated as at FVTPL, are subsequently measured at amortised cost using the effective interest method.

The effective interest method is a method of calculating the amortised cost of a financial liability and of allocating interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial liability, or (where appropriate) a shorter period, to the amortised cost of a financial liability.

***Derecognition of financial liabilities***

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

**Fair value measurement**

When measuring fair value except for the Group's leasing transactions, net realisable value of inventories and value in use of property, plant and equipment, right-of-use assets, and intangible assets for the purpose of impairment assessment, the Group takes into account the characteristics of the asset or liability if market participants would take those characteristics into account when pricing the asset or liability at the measurement date.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs. Specifically, the Group categorised the fair value measurements into three levels, based on the characteristics of inputs, as follow:

Level 1 — Fair value measurements are those derived from quoted (unadjusted) market prices in active markets for identical assets or liabilities.

Level 2 — Fair value measurements are those derived from inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).

Level 3 — Fair value measurements are those derived from valuation techniques that include inputs for the asset or liability that are not based on observable market data (unobservable inputs).

At the end of the reporting period, the Group determines whether transfer occur between levels of the fair value hierarchy for assets and liabilities which are measured at fair value on recurring basis by reviewing their respective fair value measurement.

## 5. KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group's accounting policies, which are described in note 4, the directors of the Company are required to make estimates about the amounts of assets, liabilities, revenue and expenses reported and disclosures made in the Historical Financial Information. The estimates are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

**Key sources of estimation uncertainty**

The following are the key assumptions concerning the future, and other key sources of estimation uncertainty at the end of the reporting period, that have a significant risk of resulting in a material adjustment to the carrying amounts of assets and liabilities within the next financial year.

**Provision of ECL for financial assets at amortised cost and contract assets**

The Group calculates ECL for trade receivables, contract assets, other receivables and deposits, restricted bank balances and cash and cash equivalent under IFRS 9. The provision rates are based on the Group's historical default rates taking into consideration forward-looking information that is reasonable and supportable available without undue costs or effort. At every reporting date, the historical observed default rates are reassessed and changes in the forward-looking information are considered.

The provision of ECL is sensitive to changes in estimates. Details of the key assumptions and inputs used are set out in Note 29(b). Changes in these assumptions and estimation could materially affect the assessment and it may be necessary to make additional loss allowance in future periods.

**Impairment assessment of non-financial assets and contract costs**

Non-financial assets and contract costs are reviewed for impairment, whenever events or changes in circumstances that may cause the carrying amounts of the assets to exceed their recoverable amounts. The recoverable amount of an asset or a cash generating unit is determined as the higher of their unit's fair value less cost of disposal and its value-in-use which requires the use of assumptions and estimates.

## 6. REVENUE

An analysis of the Group's revenue for the year is as follows:

| | Year ended 31 December | | | Three months ended 31 March | |
|---|---|---|---|---|---|
| | 2023 | 2024 | 2025 | 2025 | 2026 |

## 7. SEGMENT INFORMATION

The directors of the Company, being the chief operating decision makers, review the Group's internal reporting in order to assess performance and allocate resource. The Group is principally engaged in the provision of fintech software development services, consultation services and system integration services. Information reported to the chief operating decision makers, for the purpose of resources allocation and performance assessment, focuses on the operating results of the Group as a whole as the Group's resources are integrated and no discrete operating segment financial information is available.

**Geographical information**

The Group's operations and location of non-current assets are in Chinese Mainland and overseas. Information about the Group's revenue from external customers is presented based on location of the customers. Information about the Group's non-current assets is presented based on the geographical location of the assets.

Revenue from the external customers, based on the location of its customers, are as follows:

| | Year ended 31 December | | | Three months ended 31 March | |
|---|---|---|---|---|---|
| | 2023 | 2024 | 2025 | 2025 | 2026 |
| | RMB'000 | RMB'000 | RMB'000 | RMB'000 (Unaudited) | RMB'000 |
| *Geographical region* | | | | | |

| Total | 395,879 | 383,217 | 381,965 | 378,017 |

*Note:* Non-current assets excluded financial instruments and deferred tax assets.

**Information about major customers**

Revenue from customers contributing over 10% of the total revenue of the Group during the Track Record Period are as follows:

| | Year ended 31 December | | | Three months ended 31 March | |
|---|---|---|---|---|---|
| | 2023 | 2024 | 2025 | 2025 | 2026 |

### The PRC

The income tax provision of certain PRC entities of the Group has been calculated at the statutory tax rate of 25% on the estimated assessable profits during the Track Record Period, based on the existing legislation, interpretations and practices in respect thereof.

The Company was eligible for a preferential income tax rate of 15% for a qualification of "High and New Technology Enterprise" during the Track Record Period and the three months ended 31 March 2025.

According to the relevant laws and regulations promulgated by the State Council of the People's Republic of China that was effective from 2008 onwards, enterprises engaging in research and development activities were entitled to claim 150% of their research and development expenses so incurred as tax deductible expenses when determining their assessable profits for that year. The State Taxation Administration of The People's Republic of China ("**STA**") further announced in March 2021 that manufacturing enterprises engaging in research and development activities would entitle to claim 200% of their research and development expenses as Additional Deduction since 1 January 2021. The STA further announced in March 2023 that eligible enterprises would entitle to claim 200% of their research and development expenses as Additional Deduction since 1 January 2023. The Group has made its best estimate for the Additional Deduction to be claimed for the Group's entities in ascertaining their assessable profits during the Track Record Period and the three months ended 31 March 2025.

### Hong Kong and other jurisdictions

For subsidiaries incorporated in Hong Kong, under the two-tiered profits tax rates regime, the first HK$2 million of profits of qualifying corporation will be taxed at 8.25%, and profits above HK$2 million will be taxed at 16.5%. For the Track Record Period, Hong Kong profits tax of the qualified

entity of the Group is calculated in accordance with the two-tiered profits tax rates regime. The profits of other entities of the Group in Hong Kong not qualifying for the two-tiered profits tax rates regime will continue to be taxed at the flat rate of 16.5%.

Taxation arising in other jurisdictions is calculated at the rates prevailing in the relevant jurisdictions.

The income tax expense for the Track Record Period and the three months ended 31 March 2025 can be reconciled to the profit before tax per the consolidated statements of profit or loss and other comprehensive income as follows:

| | Year ended 31 December | | | Three months ended 31 March | |

## 14. EARNINGS PER SHARE

The calculations of the basic and diluted earnings per share are based on:

| | Year ended 31 December | | | Three months ended 31 March | |
|---|---|---|---|---|---|
| | 2023 | 2024 | 2025 | 2025 | 2026 |
| | RMB'000 | RMB'000 | RMB'000 | RMB'000 (Unaudited) | RMB'000 |
| **Earnings** | | | | | |
| Profit for the year/period attributable to owners of the Company for the purpose of basic and diluted earnings per share | 47,380 | 67,364 | 74,301 | 12,897 | 10,606 |
| **Number of shares** | '000 | '000 | '000 | '000 | '000 |
| Weighted average number of ordinary shares for the purposes of basic and diluted earnings per share | 530,649 | 530,649 | 530,649 | 530,649 | 530,649 |

Basic earnings per share is calculated by dividing the profit for the year/period attributable to owners of the Company by the weighted average number of ordinary shares in issue during the Track Record Period and the three months ended 31 March 2025.

The diluted earnings per share is equivalent to the basic earnings per share as there were no dilutive potential ordinary shares outstanding for the Track Record Period and the three months ended 31 March 2025.

Equity instruments designated at FVTOCI represent the Group's equity interest in unlisted entities established in the PRC. The management of the Company have elected to designate these investments in equity instruments as at FVTOCI as they believe that recognising short-term fluctuations in these investments fair value in profit or loss would not be consistent with the Group's strategy of holding these investments for long-term purposes and realising their performance potential in the long run. For the details of fair value measurement of the above equity instruments, please refer to note 29(c).

The Group measures the loss allowance for trade receivables at an amount equal to lifetime ECL. The expected credit losses on trade receivables are estimated using a provision matrix by reference to past default experience of the debtor and an analysis of the debtor's current financial position, adjusted for factors that are specific to the debtors, general economic conditions of the industry in which the debtors operate and an assessment of both the current as well as the forecast direction of conditions at the reporting date. There has been no change in the estimation techniques or significant assumptions made during the Track Record Period.

**The Group**

The Group recognised lifetime ECL for trade receivables based on individually significant customer or the ageing of customers collectively that are not individually significant as follows:

## 21. CONTRACT COSTS, CONTRACT ASSETS AND CONTRACT LIABILITIES

### (a) Contract costs

***The Group***

| | As at 31 December | | | As at 31 March |
|---|---|---|---|---|
| | 2023 | 2024 | 2025 | 2026 |
| | RMB'000 | RMB'000 | RMB'000 | RMB'000 |
| Cost to fulfil contract | 55,932 | 28,178 | 45,852 | 48,949 |

During the years ended 31 December 2023, 2024 and 2025 and three months ended 31 March 2025 and 2026, contract costs of approximately RMB65,887,000, RMB44,518,000, RMB18,884,000, RMB4,722,000 and RMB16,473,000 respectively are recognised in profit or loss. During the years ended 31 December 2023, 2024 and 2025 and three months ended 31 March 2025, impairment losses on contract costs of approximately nil, RMB9,166,000, RMB12,347,000 and RMB3,389,000 respectively are recognised and charged to profit or loss. During the three months ended 31 March 2026, reversals of impairment losses of contract assets of approximately RMB1,709,000 were recognised.

At the end of each reporting period, an impairment loss of contract costs is recognized when the carrying amount of the related contract costs exceeds the net amount of: (i) the remaining consideration expected to be received for the related goods or services, less (ii) any directly related costs that have not yet been recognized as expenses.

The impairment losses of contract costs during the Track Record Period were primarily due to: (i) cost overruns caused by factors such as scope changes or underestimation of project costs. Such underestimation may result from information gaps at the time of bidding, the complexity of project requirements, changes in labour costs, or project delays and the additional resources required due to external uncertainties; and (ii) strategic considerations, including projects pursued to maintain existing customer relationships or to explore new business opportunities where short-term profitability was intentionally subordinated to longer-term commercial objectives.

| — System integration services | 6 | — | — | — |
| | 2,657 | 2,368 | 3,075 | 2,928 |

The Group's contracts include payment schedules which require stage payments over the project period once milestones are reached. The Group typically agrees to one year retention period for 10% of the contract value. This amount is included in contract assets until the end of the retention period as the Group's entitlement to this final payment is conditional on the Group's work satisfactorily passing inspection. As at 31 December 2023, 2024 and 2025 and 31 March 2026, included in contract assets of RMB381,000, RMB288,000, RMB472,000 and RMB472,000, respectively, were expected to be recovered after more than one year.

During the year ended 31 December 2025, an impairment loss on contract assets of approximately RMB7,000 was recognised. During the years ended 31 December 2023 and 2024 and the three months ended 31 March 2025 and 2026, reversals of impairment losses of contract assets of approximately RMB16,000, RMB3,000, RMB1,000 and RMB1,000, respectively, were recognised.

The RMB is not freely convertible into other currencies, however, under the PRC's Foreign Exchange Control Regulations and Administration of Settlement, and Sale and Payment of Foreign Exchange Regulations, the Group is permitted to exchange RMB for other currencies through banks authorised to conduct foreign exchange business.

Cash at banks earns interest at floating rates based on daily bank deposit rates. The bank balances are deposited with creditworthy banks with no recent history of default. The carrying amounts of the cash and cash equivalents approximate to their fair values.

As at the end of each of the Track Record Period, the internal credit rating of restricted deposits and cash and cash equivalents was regarded as the grade of performing. The Group has assessed that the credit risk of the restricted deposits and cash and cash equivalents and considered its credit risks have not increased significantly since initial recognition. The Group has measured the impairment based on the 12-month ECL, and has assessed that the expected credit losses are immaterial.

| | 94,213 | 106,511 | 89,524 | 98,643 |

*Note:* Amounts due to subsidiaries were unsecured, interest-free and repayable on demand.

The trade payables are non-interest-bearing and are normally settled within 1 year. The fair value of trade payables approximates to their carrying amount.

The following is an aged analysis of trade payables presented based on the date of service provided and date of goods acceptance at the end of each reporting period.

The holders of shares are entitled to receive dividends as declared from time to time and are entitled to one vote per share at shareholders' meetings of the Company. All ordinary shares rank equally with regard to the Company's residual net assets.

## 27. RESERVES

The amounts of the Group's reserves and the movements therein during the Track Record Period are presented in the consolidated statements of changes in equity.

### (a) Capital reserve

Capital reserve mainly represents the difference between the cost of acquisition and the non-controlling interests acquired in the case of acquisition of additional non-controlling interests of subsidiaries, or the difference between the proceeds from disposal and the non-controlling interests disposed of in the case of disposal of partial equity interests in subsidiaries to non-controlling shareholders without loss of control. Details of the movements in the capital reserve are set out in the consolidated statements of changes in equity.

### (b) Translation reserve

Translation reserve comprises all foreign exchange differences arising from the translation of the financial statements of foreign operations.

**(c) Statutory reserve**

In accordance with the PRC Company Law and the articles of association of the subsidiaries established in the PRC, the Group is required to appropriate 10% of its net profit after tax, as determined under the Chinese Accounting Standards, to the statutory surplus reserve until the reserve balance reaches 50% of its registered capital. Subject to certain restrictions set out in the relevant PRC regulations and in the articles of association of the subsidiaries established in the PRC, the statutory surplus reserve may be used either to offset losses, or to be converted to share capital provided that the balance after such conversion is not less than 25% of the registered capital of the Group. The reserve cannot be used for purposes other than those for which it is created and is not distributable as cash dividends.

## 28. CAPITAL RISK MANAGEMENT

The Group manages its capital to ensure that entities in the Group will be able to continue as a going concern while maximising the return to shareholders through the optimisation of the debt and equity balance. The Group's overall strategy remains unchanged from prior year.

The capital structure of the Group consists of net debts, net of cash and cash equivalents and restricted bank deposits, and equity attributable to owners of the Company, comprising share capital and reserves.

The management of the Group reviews the capital structure periodically. As part of this review, the management of the Group considers the cost of capital and the risks associated with each class of capital and balance its overall capital structure through the payment of dividends, new share issues and share buy-back as well as the issue of new debts or the redemption of existing debts.

The asset-liability ratios at the end of each of the Relevant Periods are as follows:

| | As at 31 December | | | As at 31 March |
|---|---|---|---|---|
| | 2023 | 2024 | 2025 | 2026 |

**(b) Financial risk management objectives and policies**

The Group's and the Company's major financial instruments include equity instruments designated at FVTOCI, trade receivables, other receivables and deposits, restricted bank deposits, bank balances and cash and trade and other payables. Details of these financial instruments are disclosed in respective notes. The risks associated with these financial instruments include market risk (interest rate risk and foreign currency risk), credit risk and liquidity risk. The policies on how to mitigate these risks are set out below.

The management manages and monitors these exposures to ensure appropriate measures are implemented on a timely and effective manner.

***Market risk***

*(i) Interest rate risk*

The Group and the Company are exposed to cash flow interest rate risk related primarily to its variable-rate restricted bank deposits and bank balances.

Sensitivity analysis

The Group and the Company currently do not have an interest rate hedging policy. However, the management monitors interest rate exposure and will consider other necessary actions when significant interest rate exposure is anticipated. It is the Group's and the Company's policy to keep its deposits at floating rate of interests so as to minimise the fair value interest rate risk. The management of the Group and the Company considered that the exposure to cash flow in interest rate risk in relation to restricted bank deposits and bank balances are minimal and no sensitivity analysis is presented accordingly.

*(ii) Foreign currency risk*

The Group and the Company currently do not have a foreign exchange hedging policy. However, the management of the Group monitors foreign exchange exposure and will consider hedging significant foreign exchange exposure should the need arise.

***Credit risk and impairment assessment***

In order to minimise the credit risk of trade receivables and contract assets, the management of the Group and the Company has delegated a team responsible for determination of credit limits, credit approvals and other monitoring procedures to ensure that follow-up action is taken to recover overdue debts. In addition, the Group and the Company review the expected credit losses on these balances individually and/or collectively at the end of the reporting period to ensure that adequate impairment losses are made for ECL. In addition, the Group and the Company perform impairment assessment under ECL model in accordance with IFRS 9 on trade balances individually or based on provision matrix. For trade receivables and contract assets, the Group has applied the simplified approach under IFRS 9 to measure the loss allowance at lifetime ECL. The Group's lifetime ECL provided for trade receivables and contract assets are in aggregate of approximately RMB1,573,000, RMB1,443,000 and RMB1,023,000 (life-time not credit-impaired) for the years ended 31 December 2023 and 2025 and the three months ended 31 March 2025, respectively, and the Group's lifetime ECL reversed for trade receivables and contract assets are in aggregate of approximately RMB398,000 and RMB1,137,000 for the year ended 31 December 2024 and the three months ended 31 March 2026, respectively, based on historical credit loss experience adjusted by forward-looking estimates without undue cost or effort.

The credit risk of other receivables and deposits are managed through an internal process. The credit quality of each counterparty is investigated before an advance is made. The Group and the Company also actively monitor the outstanding amounts owed by each debtor and identifies any credit risks in a timely manner in order to reduce the risk of a credit related loss. The Group and the Company perform impairment assessment under ECL model in accordance with IFRS 9 on these outstanding balances.

For other receivables and deposits, the Group and the Company measure the loss allowance at 12m ECL, unless when there has been a significant increase in credit risk since initial recognition, in which case the Group and the Company recognise lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increase in likelihood or risk of a default occurring since initial recognition. Certain other receivables and deposits had significant increase in credit risk since initial recognition. The balances are monitored on an ongoing basis and the Group's and the Company's exposure to credit risk is not significant since the Group and the Company only trade with creditworthy third parties, and the Group and the Company do not require any collateral from other debtors.

The 12m ECL on the other receivables and deposits are considered as insignificant during the years ended 31 December 2023, 2024 and 2025 and the three months ended 31 March 2025 and 2026 as the counterparties involved are considered with limited credit risk and the ECL involved is not material. For details of provision for ECL on other receivables and deposits, please refer to Note 22.

The credit risk on liquid funds is low because the counterparties are banks with high credit ratings assigned by international credit-rating agencies or state-owned banks in the PRC. The management of the Company consider the probability of default is negligible on the basis of high credit-rating issuers during the Track Record Period and the three months ended 31 March 2025.

There has been no significant changes to estimation techniques or assumptions made during the Track Record Period and the three months ended 31 March 2025..

The concentration of credit risk in respect of trade receivables is minimal, as the Group has a large number of customers. The management of the Company continue to monitor and assess the financial status of the counterparties, and they believe the exposure to credit risk on these balances is not significant as the counterparties are of good financial position.

***Liquidity risk***

In the management of the liquidity risk, the Group and the Company monitor and maintain a level of bank balance and cash deemed adequate by the management to finance the Group's and the Company's operations and mitigate the effects of fluctuations in cash flows.

The following tables detail the Group's and the Company's remaining contractual maturity for its non-derivative financial liabilities and lease liabilities. For non-derivative financial liabilities and lease liabilities, the tables have been drawn up based on the undiscounted cash flows of financial liabilities and lease liabilities based on the earliest date on which the Group and the Company can be required to pay. The tables include both interest and principal cash flows. To the extent that interest flows are floating rate, the undiscounted amount is derived from interest rate at the end of the reporting period.

### (c) Fair value measurement of financial instruments

***The Group and the Company***

Some of the Group's and the Company's financial assets are measured at fair value at the end of each reporting period. The following table gives information about how the fair values of these financial assets are determined (in particular, the valuation(s) and inputs used), as well as the level of the fair value hierarchy into which the fair value measurements are categorised (level 1 to 3) based on the degree to which the inputs to the fair value measurements is observable.

| | | | | | | | Range | | | |
|---|---|---|---|---|---|---|---|---|---|---|
| | As at 31 December | | | As at 31 March | | | As at 31 December | | | As at 31 March |
| Financial instruments | 2023 | 2024 | 2025 | 2026 | Fair value hierarchy | Valuation techniques and key inputs | 2023 | 2024 | 2025 | 2026 |
| | RMB'000 | RMB'000 | RMB'000 | RMB'000 | | | | | | |
| Equity instruments designated at FVTOCI — unlisted equity investments | 31,213 | 27,198 | 10,456 | 10,115 | Level 3 | Market comparable companies — Price-to-book ratio *(note (i) and (ii))* | From 0.47 to 4.30 times | From 0.56 to 5.22 times | From 0.56 to 8.56 times | From 0.56 to 8.56 times |

*Notes:*

(i) The higher the price-to-book ratio, the higher the fair value.

(ii) Should the price-to-book be increased/decreased by 10% the fair value of unlisted equity investment would be increased/decreased by approximately RMB3,121,000, RMB2,720,000, RMB1,046,000 and RMB1,012,000 as at 31 December 2023, 2024 and 2025 and 31 March 2026, respectively.

***The Group and the Company***

The following table presents the reconciliation of Level 3 measurements of financial assets throughout the Track Record Period:

| | Equity instruments designated at FVTOCI-unlisted equity investments |
|---|---|
| | RMB'000 |
| At 1 January 2023 | 35,119 |
| Fair value loss during the year | (3,906) |
| At 31 December 2023 | 31,213 |
| Fair value loss during the year | (4,015) |
| At 31 December 2024 | 27,198 |
| Fair value loss during the year | (16,742) |
| At 31 December 2025 | 10,456 |
| Fair value loss during the period | (341) |
| At 31 March 2026 | 10,115 |

Except for equity instruments designated at FVTOCI, the management of the Group considers that the carrying amounts of the other financial assets and financial liabilities of the Group and the Company recorded at amortised costs in the financial statements approximate their fair values at the end of each reporting period.

The fair values of financial assets and financial liabilities (other than equity instruments designated at FVTOCI) of the Group and the Company are determined in accordance with generally accepted pricing models based on discounted cash flow analysis.

## 30. NOTES TO THE CONSOLIDATED STATEMENTS OF CASH FLOWS

## 31. CONTINGENT LIABILITIES

At the end of each of the Track Record Period, the Group and the Company did not have any significant contingent liabilities.

## 32. RETIREMENT BENEFITS PLANS

According to the relevant laws and regulations in the PRC, the Company's PRC subsidiaries are required to participate in a defined contribution retirement scheme administrated by the local municipal government. The Group's PRC subsidiaries contribute funds which are calculated on certain percentage of the average employee salary as agreed by local municipal government to the scheme to fund the retirement benefits of the employees. The principal obligation of the Group with respect to the retirement benefits scheme is to make the required contributions under the scheme.

The Group also operates a Mandatory Provident Fund Scheme for all qualified employees in Hong Kong. The assets of the scheme are held separately from those of the Group, in funds under the control of trustee. The Group contributes 5% of relevant payroll costs, capped at HK$1,500 per month, to the MPF Scheme, in which the contribution is matched with that made by the employee.

The Group also operates a number of defined contribution schemes in other overseas jurisdictions. Arrangements for these staff retirement benefits vary from country to country and are made in accordance with local regulations and custom.

The Group recognised the retirement benefit contributions of approximately RMB51,105,000, RMB50,542,000, RMB54,924,000, RMB8,733,000 and RMB14,826,000 for the years ended 31 December 2023, 2024 and 2025 and the three months ended 31 March 2025 and 2026, respectively.
