The Stock Exchange of Hong Kong Limited and the Securities and Futures Commission of Hong Kong take no responsibility for the contents of this Application Proof, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this Application Proof.

Application Proof of

Standard Robots (Wuxi) Co., Ltd.
斯坦德機器人(無錫)股份有限公司

(the "**Company**")

(A joint stock company incorporated in the People's Republic of China with limited liability)

WARNING

The publication of this Application Proof is required by The Stock Exchange of Hong Kong Limited (the "**Exchange**") and the Securities and Futures Commission of Hong Kong (the "**Commission**") solely for the purpose of providing information to the public in Hong Kong.

This Application Proof is in draft form. The information contained in it is incomplete and is subject to change which can be material. By viewing this document, you acknowledge, accept and agree with the Company, its joint sponsors, sponsor-overall coordinators, overall coordinators, advisors or member of the underwriting syndicate that:

(a) this document is only for the purpose of providing information about the Company to the public in Hong Kong and not for any other purposes. No investment decision should be based on the information contained in this document;

(b) the publication of this document or supplemental, revised or replacement pages on the Exchange's website does not give rise to any obligation of the Company, its joint sponsors, sponsor-overall coordinators, overall coordinators, advisors or members of the underwriting syndicate to proceed with an offering in Hong Kong or any other jurisdiction. There is no assurance that the Company will proceed with the offering;

(c) the contents of this document or supplemental, revised or replacement pages may or may not be replicated in full or in part in the actual final listing document;

(d) the Application Proof is not the final listing document and may be updated or revised by the Company from time to time in accordance with the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited;

(e) this document does not constitute a prospectus, offering circular, notice, circular, brochure or advertisement offering to sell any securities to the public in any jurisdiction, nor is it an invitation to the public to make offers to subscribe for or purchase any securities, nor is it calculated to invite offers by the public to subscribe for or purchase any securities;

(f) this document must not be regarded as an inducement to subscribe for or purchase any securities, and no such inducement is intended;

(g) neither the Company nor any of its affiliates, advisors or underwriters is offering, or is soliciting offers to buy, any securities in any jurisdiction through the publication of this document;

(h) no application for the securities mentioned in this document should be made by any person nor would such application be accepted;

(i) the Company has not and will not register the securities referred to in this document under the United States Securities Act of 1933, as amended, or any state securities laws of the United States;

(j) as there may be legal restrictions on the distribution of this document or dissemination of any information contained in this document, you agree to inform yourself about and observe any such restrictions applicable to you; and

(k) the application to which this document relates has not been approved for listing and the Exchange and the Commission may accept, return or reject the application for the subject public offering and/or listing.

If an offer or an invitation is made to the public in Hong Kong in due course, prospective investors are reminded to make their investment decisions solely based on the Company's prospectus registered with the Registrar of Companies in Hong Kong, copies of which will be distributed to the public during the offer period.

IMPORTANT

IMPORTANT: If you are in any doubt about any of the contents of this document, you should obtain independent professional advice.

Hong Kong Exchanges and Clearing Limited, The Stock Exchange of Hong Kong Limited and Hong Kong Securities Clearing Company Limited take no responsibility for the contents of this document, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this document.

A copy of this document, having attached thereto the documents specified in "Documents Delivered to the Registrar of Companies in Hong Kong and Available on Display" in Appendix VII to this document, has been registered by the Registrar of Companies in Hong Kong as required by section 342C of the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Chapter 32 of the Laws of Hong Kong). The Securities and Futures Commission of Hong Kong and the Registrar of Companies in Hong Kong take no responsibility for the contents of this document or any of the other documents referred to above. The **[REDACTED]** is expected to be fixed by agreement between the **[REDACTED]**, on behalf of the **[REDACTED]**, and our Company on or before **[REDACTED]** or such later time as may be agreed between the parties, but in any event, no later than 12:00 noon on **[REDACTED]**. If, for any reason, the **[REDACTED]**, on behalf of the **[REDACTED]**, and our Company are unable to reach an agreement on the **[REDACTED]** by 12:00 noon on **[REDACTED]**, the **[REDACTED]** will not become unconditional and will lapse immediately.

The [REDACTED], on behalf of the [REDACTED], may, with the consent of our Company, reduce the indicative [REDACTED] range below that stated in this document (being HK$[REDACTED] per H Share to HK$[REDACTED] per H Share) at any time on or prior to the morning of the last date for lodging applications under the [REDACTED]. In such a case, notices of the reduction in the number of [REDACTED] and/or the indicative [REDACTED] range will be published on the websites of the Stock Exchange at www.hkexnews.hk and our Company at www.standard-robots.com (with respect to English version) as soon as practicable but in any event not later than the morning of the day which is the last day for lodging applications under the [REDACTED]. For further information, see the sections headed "Structure of the [REDACTED]" and "How to Apply for [REDACTED]" in this document.

Pursuant to the termination provisions contained in the **[REDACTED]** in respect of the **[REDACTED]**, the **[REDACTED]** on behalf of the **[REDACTED]**, have the right in certain circumstances, in their absolute discretion, to terminate the obligation of the **[REDACTED]** pursuant to the **[REDACTED]** at any time prior to 8:00 a.m. on the **[REDACTED]**. Further details of the terms of the termination provisions are set out in the section headed "**[REDACTED]**." It is important that you refer to that section for further details.

The [REDACTED] have not been and will not be registered under the U.S. Securities Act or any state securities laws in the United States, and may not be [REDACTED], sold, pledged or transferred, except pursuant to an exemption from, or in a transaction not subject to, the registration requirements of the U.S. Securities Act and in accordance with any applicable U.S. state securities laws. The [REDACTED] are being [REDACTED] and sold only outside of the United States in offshore transactions in reliance on Regulation S.

Our Company is a Specialist Technology Company (as defined in Chapter 18C of the Listing Rules). The securities of Specialist Technology Companies carry high investment risks including risks of share price volatility and inflated valuation due to the difficulty in valuing such companies. Investors should fully understand the investment risks of a Specialist Technology Company and the risks disclosed by our Company before making their investment decisions.

SUMMARY

This summary aims to give you an overview of the information contained in this document. As it is a summary, it does not contain all the information that may be important to you. You should read the whole document before you decide to invest in the **[REDACTED]**. *In particular, we are a specialist technology company seeking to* **[REDACTED]** *on the Main Board of the Hong Kong Stock Exchange under Chapter 18C of the Listing Rules because we are unable to meet the requirements under Rule 8.05(1), (2) or (3) of the Listing Rules. There are unique challenges, risks and uncertainties associated with investing in companies such as ours. Your investment decision should be made in light of these considerations.*

There are risks associated with any investment. Some of the particular risks in investing in the **[REDACTED]** *are set out in the section headed "Risk Factors" in this document. You should read that section carefully in full before you decide to invest in the* **[REDACTED]**.

OVERVIEW

We are a leader in industrial intelligent mobile robotic solutions, dedicated to empowering smart factories across a wide range of industrial scenarios. We are also an early mover in industrial embodied intelligence robotic solutions. Our tailored one-stop robotic solutions integrate our technology platform, intelligent robots and intelligent collaborative system. We were the fourth largest provider of the industrial intelligent mobile robotic solutions in China by sales volume in 2025, with a market share of 4.0%, according to CIC. As of the Latest Practicable Date, our solutions had been recognized and adopted by over 400 customers worldwide, many of which are leaders in their respective sectors. Globally, we are one of the largest industrial intelligent mobile robotic solutions providers in several high-tech sectors as measured by shipment in 2025: second largest in the computer, communication and consumer electronics (3C) sector, with a market share of 4.1%, third largest in the automotive sector, with a market share of 4.1% and fifth largest in the semiconductor sector, with a market share of 0.9%, according to CIC.

According to CIC, we are one of the few enterprises in the industry with self-developed full-stack technologies. We started as an early innovator of industrial intelligent robotic systems engineering and a proprietary robotic operating system in China. We were among the first companies to launch SLAM technology, according to CIC. Our leadership in localization, navigation, control, and perception and manipulation technologies equip our robots with intelligence, efficiency, and reliability and safety. Powered by world modeling and multi-robot coordination technologies, our robots possess collaborative intelligence. We were among the first in China to have achieved world modeling and collaborative intelligence in industrial robotic systems, according to CIC.

OUR BUSINESS MODEL

We primarily offer tailored one-stop robotic solutions to our customers, empowering their smart manufacturing. Depending on customer needs, we also provide our customers with robots sold individually and related accessories, software and services. Our robots, sharing the same core technology platform, are sold either integrated in our robotic solutions under robotic solutions segments or individually under robots and others segments.

We provide industrial intelligent robotic solutions to empower smart manufacturing. The philosophy of our robotic solutions is "1 + N + S = ∞." Our tailored one-stop robotic solutions comprise our core robotic technology platform ("**1**"), our industrial intelligent multi-functional robotic

products ("**N**") and our one-stop intelligent collaborative system, the RoboVerse system ("**S**"). Our goal is to provide infinite possibilities for smart manufacturing ("∞"). Our core robotic technology, robotic products and the RoboVerse system are self-developed.

- Our core robotic technology platform consists of our core controller, our proprietary operating system SROS and algorithms.

- Our robotic products, including standard robots, functional robots and embodied robots, are built upon our core robotic technology platform by adding modules serving different functions. Standard robots can be seamlessly deployed in new scenarios without requiring any modifications to the specific scenario. Functional robots include lifting robots, transport robots, forklift robots and tugger robots. By incorporating additional modules into the core robotic technology platform, these robots are equipped with advanced capabilities tailored to specific functional requirements. Embodied robots, including LINK, our classic industrial embodied robots, and DARWIN, our advanced embodied robots, enhance flexibility through increased degrees of freedom (DoF) and enable more general capabilities through artificial general intelligence (AGI).

- Our RoboVerse System is a one-stop intelligent collaborative system. It comprises three constituent sub-systems, Robo-World, Robo-Set, and Robo-Team. Robo-World is a platform that digitally reconstructs factory scenarios using world modeling technology, enabling precise simulation of operations and providing data-driven insights to optimize smart manufacturing solutions. Robo-Set is an intelligent task engine that simplifies the creation and management of manufacturing tasks through a no-code approach, leveraging built-in templates and intelligent agents to enhance operational efficiency and adaptability. Robo-Team is a collaborative system that unifies diverse robots into a cohesive workforce by employing algorithms for efficient resource management, real-time path planning, and dynamic task allocation.

We have adopted a transaction-based model for the sales (i) robotic solutions and (ii) individual robots and related accessories. Factors considered by us in pricing our robotic solutions include the types of robots to be used, technical specifications, project size, after-sales commitment, sales channel and product competitiveness. For pricing our robots sold individually, we take into account the product type, technical specifications, after-sales commitment, sales channel, and product competitiveness. Additionally, for sales in markets outside mainland China, we consider the region and required certifications. We do not generate recurring revenue through ongoing upgrades or enhancements to our robotic solutions or robots sold individually under our sales arrangements with customers.

The table below sets forth the main functions, key features and price range of our robots and features of the robotic solutions that primarily deploy the relevant types of robots.

Functions and Key Features	Features of Solutions	Price Range*
Standard Robots (DoF: 3)		
Main Function: Mobility Key Feature: Standard robots provide mobility for a variety of complex scenarios, driven by proprietary algorithms. They can move omnidirectionally, providing precise navigation and positioning.	Our one-stop tailored robotic solutions that primarily deploy standard robots mainly serve integrators for developing automation solutions.	RMB60,000–350,000 per unit
Functional Robots (DoF: 4 ~ 8)		
Main Function: Mobility plus additional functions (e.g. lifting, transport, stacking and towing) Key Feature: Functional robots integrate additional modules into the core robotics technology platform. In addition to mobility, they can perform advanced capabilities tailored to specific functional requirements.	Our one-stop tailored robotic solutions that primarily deploy functional robots serve customers in a wide range of industries.	RMB100,000–550,000 per unit
Embodied Robots (DoF: 9+)		
Main Function: General purpose functions to perform complex tasks Key Feature: Embodied robots are equipped with enhanced flexibility through increased freedom and achieving more general-purpose functions through AGI. They can perform complex tasks across multiple industrial scenarios, enabling humans and machines to collaborate seamlessly and safely.	Our one-stop tailored robotic solutions that primarily deploy embodied robots primarily serve customers in high-end manufacturing industries such as semiconductor business.	RMB450,000–1,111,000 per unit

Note:

* Represents the price range of each category of robots when sold individually. The pricing of robotic solutions vary widely by projects.

The table below sets forth the sales volume of our robots by category during the Track Record Period, which include both robots sold individually and integrated in our solutions.

	Year ended December 31,			Four months ended April 30,	
	2023	2024	2025	2025	2026
Standard Robots	237	388	501	41	119
Functional Robots	949	1,525	1,715	294	410
Embodied Robots	26	19	68	18	27
Total	**1,212**	**1,932**	**2,284**	**353**	**556**

OUR CORE TECHNOLOGIES

We have successfully developed robotic technologies featuring intelligence, efficiency, and reliability and safety. We believe we possess core technologies in the following areas: (i) core controller, (ii) robot operating system, (iii) localization, navigation and control algorithms, (iv) perception and manipulation, (v) robotic systems engineering, (vi) industrial scene-oriented world modeling technology, and (vii) mass scale multi-robot coordination technology.

Our core robotic technology platform consists of core controller, operating system SROS, and algorithms, which empowers our robots with individual intelligence. Our self-developed operating system SROS is a universal robot operating system suitable for various robot forms. Its key features include efficient communication mechanism, heterogeneous processor task scheduling, high real-time performance and continuously evolving AI architecture. Our self-developed algorithms include (i) algorithms for localization, navigation and control, which is a high-precision, adaptive and self-updating multi-sensor information fusion localization system, and (ii) algorithms for perception and manipulation, which have achieved closed-loop intelligence from command understanding to action execution. Our technologies infuse individual intelligence into our robots, enabling them to think, adapt and perform tasks with autonomy. Drawing on years of experience in R&D, and delivery of industrial intelligent robotic solutions, we have established full-stack robotic systems engineering capabilities, which enable us to design our robots in a modular, cost-effective, and efficient manner. Our RoboVerse system is based on self-developed industrial scene-oriented world modeling and mass scale multi-robot coordination technologies. The industrial scene-oriented world modeling technology integrates AI-driven modeling and prediction capabilities to enhance robots' environmental perception and decision-making. The mass scale multi-robot coordination technology enables efficient collaboration among robots, addressing efficiency bottlenecks and complex task distribution. Powered by these technologies, our robots possess collaborative intelligence and can seamlessly adapt to a wide range of industrial scenarios without modifications. See "Business — Our Core Technologies" for details.

OUR COMPETITIVE STRENGTHS

We believe the following competitive strengths have contributed to our success and differentiated us from our competitors: (i) market leadership in industrial intelligent mobile robotic solutions and industrial embodied intelligence robotic solutions; (ii) self-developed robotic technologies featuring intelligence, efficiency, and reliability and safety; (iii) premier solutions for smart manufacturing across a wide range of industrial scenarios; (iv) extensive deployment by leading enterprises; and (v) visionary management team with technical expertise and strategic insight and strong support from reputable investors.

OUR STRATEGIES

We intend to pursue the following strategies to further grow our business: (i) increasing investment in the R&D of industrial embodied intelligence technologies; (ii) deepening our expertise in industrial intelligent robotic solutions, particularly in industrial embodied intelligence robotic solutions; (iii) enhancing in-house manufacturing capabilities to support sustained growth; and (iv) expanding our influence among current and future customers, domestically and internationally.

OUR MARKET OPPORTUNITIES AND COMPETITION

Driven by the demand for smart manufacturing system upgrades, rising labor costs, maturing supply chain and favorable policies, the global market size of industrial intelligent mobile robotic solutions increased from RMB6.6 billion in 2021 to RMB21.1 billion in 2025, with a CAGR of 33.8%, and is expected to further increase to RMB80.8 billion in 2030, with a CAGR of 29.6% from 2026 to 2030, according to CIC. Against the backdrop of AGI's rapid advancement, industrial embodied intelligence robots with collaborative arms and based on wheeled mobile platforms are poised to become the advanced intelligent form catering to complex and dynamic multi-scenario manufacturing demands. According to CIC, the global market size for industrial embodied intelligence robotic solutions surged from RMB0.6 billion in 2021 to RMB2.0 billion in 2025, representing a CAGR of 35.0%, and is projected to increase to RMB15.7 billion in 2030 at a CAGR of 43.7% from 2026 to 2030.

The global industrial intelligent mobile robotic solution industry is relatively fragmented. In terms of relevant robot units sold of global industrial intelligent mobile robotic solutions in 2025, the top five participants collectively account for 35.6% of the market share. In this highly competitive sector, we were the fourth largest provider of industrial intelligent mobile robotic solutions in China by sales volume in 2025, according to CIC. The global industrial embodied intelligence robotic solution industry is very fragmented. Benefitting from the growth potential of industrial intelligent robotic solution market, we believe our full-stack proprietary and open compatible software architecture, continuous product innovation and modular development capabilities, in-depth understanding of manufacturing scenarios and industry expertise will enable us to grasp the market potential and achieve continuous growth.

OUR CUSTOMERS AND SUPPLIERS

We have a diversified customer base across various industries, particularly high-tech sectors such as 3C, automotive, and semiconductor. Our customers are mainly manufacturers that apply our robotic solutions directly in their factories. Our customers also include system integrators that incorporate our robotic products into broader automation solutions. System integrators, with their expertise in system integration and understanding of the specific application needs of downstream industries, combine robots, supporting systems, and peripheral automation equipment from various manufacturers to deliver comprehensive robotic solutions to their customers. See "Business — Our Customers" for more details. For the years ended December 31, 2023, 2024 and 2025 and the four months ended April 30, 2026, our top five customers collectively accounted for 36.8%, 41.3% and 35.1% and 68.0%, respectively, of our total revenue.

We source a diverse range of raw materials essential for the production of our robots from our suppliers, such as power batteries, motors, LiDAR, structural components, forklifts and charging pile. For the years ended December 31, 2023, 2024 and 2025 and the four months ended April 30, 2026, our purchases from our five largest suppliers accounted for 27.7%, 37.7% and 34.8% and 49.4% of our total procurement amount, respectively.

OUR CONTROLLING SHAREHOLDERS

As of the Latest Practicable Date, (a) Mr. Wang was able to exercise 27.10% of voting rights in our Company through (i) 2,829,456 Shares owned by him directly; and (ii) 3,161,295 Shares owned through Standard Automation, which is controlled by Mr. Wang as general partner, and (b) Mr. Li was able to exercise 3.80% of voting rights in our Company through 841,082 Shares owned by him directly. By virtue of the Acting-in-Concert Agreement, Mr. Wang (by himself and through Standard Automation) and Mr. Li will together be interested in and control 30.90% of voting rights in our Company. Further, pursuant to the Voting Proxy Agreements, Mr. Wang is entitled to the voting rights of 6,516,020, 1,547,370 and 2,000,000 Shares (taking into account the Share Subdivision) held by Golden Summer Holding Limited, Shenzhen Hongze Intelligent Manufacturing Investment Partnership (Limited Partnership) (深圳鴻澤智造投資合夥企業(有限合夥)) and Zhuhai Shengyinjing Investment Enterprise (Limited Partnership) (珠海盛銀璟投資合夥企業(有限合夥)) in our Company, representing **[REDACTED]**%, **[REDACTED]**% and **[REDACTED]**% of the voting rights in our Company, respectively upon **[REDACTED]**. For details, see "History and Corporate Structure — Voting Proxy Arrangement".

Immediately upon completion of the **[REDACTED]** (assuming the **[REDACTED]** is not exercised), and taking into account the Voting Proxy Agreements, Mr. Wang (by himself and through Standard Automation) and Mr. Li will together be entitled to exercise approximately **[REDACTED]** of the voting rights in our Company and are therefore considered as our Controlling Shareholders under the Listing Rules.

Standard Automation is a share incentive platform of our Company. For further details, see "History and Corporate Structure" and "Relationship with Our Controlling Shareholders".

PRE-[REDACTED] INVESTMENTS

To fund our strategic growth and broaden our shareholder base, we have conducted several rounds of pre-**[REDACTED]** Investments since the incorporation of our Company. See "History and Corporate Structure — Pre-**[REDACTED]** Investments" for details of the principal terms of our pre-**[REDACTED]** investments and the identity and background of our Pre-**[REDACTED]** Investors.

Pursuant to the shareholders agreements entered into between us and our shareholders (collectively the "**Agreements**"), we issued 12,697,000 ordinary shares (representing the number of shares after conversion into a joint stock company) to certain shareholders (collectively the "**Pre-[REDACTED] Investors**") for a total net cash proceed of approximately RMB540,854,000 (collectively the "**Pre-[REDACTED] Investments**"). Pursuant to the Agreements, the Pre-**[REDACTED]** Investors were granted by us with special rights ("**Special Rights**") which included redemption rights, liquidation preferences and anti-dilution rights. There was no exercise of such Special Rights during the Track Record Periods.

In June 2025, we and the Pre-**[REDACTED]** Investors subsequently entered into supplemental agreements, agreeing that certain of the Special Rights, including redemption rights, liquidation preferences and anti-dilution rights, have been irrecoverably terminated and shall be *void ab initio*. Taking into account the applicable legal and regulatory framework and the governing law of the supplemental agreements, our Directors considered that it is appropriate to present the Pre-**[REDACTED]** Investments as equity throughout the Track Record Periods.

Had the Special Rights been accounted for as financial liabilities measured at present value of the redemption amount prior to entering into the supplemental agreements, the redemption financial liabilities, total current liabilities and net deficits would have been:

	As of December 31,	
	2023	2024
	(RMB in thousands)	
Redemption financial liabilities	563,192	720,678
Total current liabilities	704,396	880,181
Net deficits	(477,520)	(580,211)

The finance costs associated with the redemption financial liabilities, the total net losses, basic and dilutive loss per share would have been:

	Year ended December 31,			Four months ended April 30,
	2023	2024	2025	2025
	(RMB in thousands)			
Finance costs associated with the redemption financial liabilities	48,037	62,598	29,376	20,580
Total net losses	(148,385)	(107,742)	(231,397)	(76,666)
Basic and dilutive loss per share (RMB per share)	(0.87)	(0.60)	(1.11)	(0.40)

SUMMARY OF HISTORICAL FINANCIAL INFORMATION

The following tables set forth summary financial data from our consolidated financial information for the Track Record Period, extracted from the Accountant's Report set out in Appendix I to this document. The summary consolidated financial data set forth below should be read together with, and is qualified in its entirety by reference to, our consolidated financial statements in this document, including the related notes. Our consolidated financial information was prepared in accordance with HKFRSs.

Summary of Consolidated Statements of Profit or Loss

The following table sets forth a summary of our consolidated statements of profit or loss for the periods indicated.

	Year ended December 31,			Four months ended April 30,	
	2023	2024	2025	2025	2026
			(RMB in thousands)		
				(unaudited)	
Revenue	162,166	250,522	301,493	44,747	106,940
Cost of sales	(110,997)	(153,364)	(179,250)	(24,751)	(59,384)
Gross profit	**51,169**	**97,158**	**122,243**	**19,996**	**47,556**
Other income and gains	7,080	7,920	3,324	751	2,819
Selling and marketing expenses	(57,358)	(64,595)	(114,203)	(20,217)	(41,985)
Administrative expenses	(25,466)	(23,575)	(114,695)	(32,551)	(28,496)
R&D expenses	(56,098)	(36,611)	(76,729)	(13,527)	(29,129)
Impairment losses on financial assets and contract assets	(14,709)	(22,853)	(18,371)	(10,112)	(10,408)
Other expenses	(2,634)	(1,208)	(2,506)	(5)	(2,089)
Finance costs	(2,332)	(1,380)	(1,084)	(421)	(103)
Loss before tax	**(100,348)**	**(45,144)**	**(202,021)**	**(56,086)**	**(61,835)**
Income tax expense	—	—	—	—	—
Loss for the year/period	**(100,348)**	**(45,144)**	**(202,021)**	**(56,086)**	**(61,835)**

Non-HKFRS Measures

To supplement our consolidated financial statements, which are presented in accordance with HKFRSs, we also use adjusted net loss (non-HKFRS measure) as additional financial measure, which is not required by, or presented in accordance with HKFRSs. We believe this non-HKFRS measure facilitates comparisons of operating performance from year to year and company to company by eliminating potential impacts of certain items. We believe this measure provides useful information to investors and others in understanding and evaluating our combined results of operations in the same manner as they help our management. However, such non-HKFRS financial measure we presented may not be directly comparable to similar measures presented by other companies. The use of this non-HKFRS measure should not be considered as substitute for analysis of, our results of operations or financial condition as reported under HKFRSs.

We define adjusted net loss (non-HKFRS measure) as loss for the year/period adjusted by adding back equity-settled share-based payment expenses and **[REDACTED]** expenses. The following table reconciles our adjusted net loss (non-HKFRS measure) for the years/periods to loss for the years/periods, which is presented in accordance with HKFRSs.

	Year ended December 31,			Four months ended April 30,	
	2023	2024	2025	2025	2026
	(RMB in thousands, except for percentage)				
				(unaudited)	
Loss for the year/period	(100,348)	(45,144)	(202,021)	(56,086)	(61,835)
Add:					
— Equity-settled share-based payment expenses[(1)]	5,417	5,806	146,910	28,942	35,905
— **[REDACTED]** expenses	—	—	20,155	—	2,085
Adjusted net loss *(non-HKFRS measure)*	**(94,931)**	**(39,338)**	**(34,956)**	**(27,144)**	**(23,845)**
Adjusted net loss margin (non-HKFRS measure)	**(58.5)%**	**(15.7)%**	**(11.6)%**	**(60.7)%**	**(22.3)%**

Note:

(1) Equity-settled share-based payment expenses are non-cash in nature and represent the arrangement under which we receive services from employees as consideration for our equity instruments. Equity-settled share-based payment expenses are not expected to result in future cash payments.

Our net loss decreased from 2023 to 2024, primarily due to the increases in our revenue, the decreases in our R&D expenses and administrative expenses, as well as the relatively slower growth of cost of sales and selling and marketing expenses. Our net loss increased from the 2024 to 2025, primarily due to the significant increase in our operating expenses, arising from the share-based payment to our employees and the incurring of **[REDACTED]** expenses. Our net loss increased slightly from the four months ended April 30, 2025 to the same period of 2026, primarily due to the increases in our selling and marketing expenses, R&D expenses and foreign exchange losses.

Revenue

The following table sets forth our revenue breakdown by product type in absolute amount and as a percentage of our total revenue for the periods indicated:

	Year ended December 31,						Four months ended April 30,

Notes:

(1) Robotic solutions are categorized based on the primary type of robot used in a contract. The entire contract amount will be classified as the type of robot that holds a simple majority in that contract.

(2) Include the revenue derived from the sales of related accessories, software and services, including the RoboVerse system software, technical support services and other parts, components and accessories which are required or essential for the functioning and/or enhancing the performance of our robots and robotic solutions.

Our revenue increased by 54.5% from RMB162.2 million in 2023 to RMB250.5 million in 2024 and continued to increase by 20.0% to RMB301.5 million in 2025 and increased by 139.1% from RMB44.7 million in the four months ended April 30, 2025 to RMB106.9 million in the same period of 2026, primarily driven by increased customer demand and enhanced acceptance of our products, resulting in higher sales volume of robots, which increased from 1,212 robots in 2023 to 1,932 robots in 2024, and further increased to 2,284 units in 2025 and from 353 units in the four months ended April 30, 2025 to 556 units in the same period of 2026.

Revenue by Geographic Location

Notes:

(1) Includes domestic sales subject to standard Chinese VAT invoicing and local delivery processes.

(2) Primarily consists of other Asia countries and regions such as Taiwan China, Vietnam and Thailand. In addition, sales to bonded warehouse and free trade zone located in Chinese mainland are also included in sales to other countries and regions as these transactions (i) require customs clearance procedures (similar to cross-border exports); and (ii) are exempt from PRC VAT invoicing, aligning them operationally with overseas sales, notwithstanding the relevant customers may still based within the geographical regions of the PRC.

Revenue by Served Industry

The following table sets out a breakdown of our revenue by served industry, in an absolute amount and as a percentage of our total revenue, for the periods indicated.

	Year ended December 31,						Four months ended April 30,			
	2023		2024		2025		2025		2026

Total	**51,169**	**31.6**	**97,158**	**38.8**	**122,243**	**40.5**	**19,996**	**44.7**	**47,556**	**44.5**

Notes:

(1) Includes domestic sales subject to standard Chinese VAT invoicing and local delivery processes.

(2) Primarily consists of (i) Japan, (ii) Taiwan, China, (iii) Hong Kong, China and (iv) certain Southeast Asia countries such as Vietnam and Thailand. In addition, sales to bonded warehouse and free trade zone located in Chinese mainland are also included in sales to other countries and regions.

Summary of Consolidated Statements of Financial Positions

The following table sets forth selected information from our summary consolidated balance sheet as of the dates indicated:

	As of December 31,			As of April 30,
	2023	2024	2025	2026
	(RMB in thousands)			
Total current assets	216,331	277,442	430,025	440,160
Total non-current assets	18,545	28,337	22,123	32,607
Total assets	**234,876**	**305,779**	**452,148**	**472,767**
Total current liabilities	141,204	159,503	158,474	199,093
Total non-current liabilities	8,000	5,809	4,126	8,318
Total liabilities	**149,204**	**165,312**	**162,600**	**207,411**
Net current assets	**75,127**	**117,939**	**271,551**	**241,067**
Net assets	**85,672**	**140,467**	**289,548**	**265,356**

For details on the accounting treatment of redemption rights of pre-**[REDACTED]** investments, see "— Pre-**[REDACTED]** Investments" and note 31 to the Accountants' Report set out in Appendix I to this document.

During the Track Record Period, our net assets continued to increase. Our net assets increased from RMB85.7 million as of December 31, 2023 to RMB140.5 million as of December 31, 2024, attributable to capital contribution by shareholders of RMB94.9 million and share-based payment reserve of RMB5.1 million, partially offset by loss for the year of RMB45.1 million. Our net assets continued to increase to RMB289.5 million as of December 31, 2025, primarily attributable to the

consideration for issue of shares of RMB200.0 million and the increase in share-based payment reserve of RMB123.2 million, partially offset by loss for the period of RMB202.0 million. Our net assets decreased to RMB265.4 million as of April 30, 2026, primarily attributable to loss for the period of RMB61.8 million, partially offset by the increase in share-based payment reserve of RMB35.9 million and increase in capital reserve of RMB1.7 million. For details of the fluctuation in key items of our consolidated statements of financial position during the Track Record Period, see "Financial Information — Discussion on Key Items of Consolidated Statements of Financial Position."

Our net current assets increased from RMB75.1 million as of December 31, 2023 to RMB117.9 million as of December 31, 2024, primarily due to (i) an increase in trade and bills receivables of RMB41.6 million, (ii) an increase in financial assets at fair value through profit or loss of RMB17.0 million, (iii) an increase in cash and cash equivalents of RMB49.9 million, (iv) a decrease in contract liabilities of RMB17.9 million, partially offset by (i) a decrease in inventories of RMB51.0 million and (ii) an increase in interest-bearing bank and other borrowings of RMB17.9 million. Our net current assets continued to increase to RMB271.6 million as of December 31, 2025, primarily due to (i) an increase in financial assets at fair value through profit or loss of RMB63.6 million, (ii) an increase in Trade and bills receivables of RMB69.3 million and (iii) a decrease in interest-bearing bank and other borrowings of RMB42.9 million, partially offset by an increase in trade payables of RMB28.3 million. Our net current assets decreased to RMB241.1 million as of April 30, 2026, primarily due to (i) an increase in trade payables of RMB54.5 million, (ii) a decrease in financial assets at fair value through profit or loss of RMB39.8 million and (iii) a decrease in cash and cash equivalents of RMB27.4 million, partially offset by (i) an increase in inventories of RMB58.9 million, (ii) an increase in prepayments, other receivables and other assets of RMB10.1 million and (iii) a decrease in contract liabilities of RMB14.6 million.

Our inventory turnover days were 459.4 days, 261.2 days, 167.2 days and 235.8 days in 2023, 2024, 2025 and the four months ended April 30, 2026. Our relatively long inventory turnover days are primarily a reflection of the nature of our project-based business model and the delivery cycle of our robotic solutions. Our trade and bill receivables turnover days were 144.2 days, 163.2 days, 229.1 days and 272.5 days in 2023, 2024, 2025 and the four months ended April 30, 2026. Our trade receivables turnover days during the Track Record Period were longer than the standard credit period that we offered to our customers, primarily due to as a company in a rapid growth stage, we have strategically focused more resources on business expansion and new orders acquisition rather than receivables collections, and given our high-quality customer base and high customer retention rate and net dollar retention rate, we believe the risks associated with receivables recoverability are low. Therefore, we historically adopted a more lenient approach to receivables collection. Our inventory turnover days and trade receivable turnover days have been significantly longer than our trade payable turnover days, which could result in delays in converting revenue into cash. See "Risk Factor — We may be exposed to liquidity risk due to a mismatch in our cash flow cycle and a long cash conversion cycle."

Summary of Consolidated Statements of Cash Flows

The following table sets forth a summary of our cash flows for the periods indicated:

	Year ended December 31,			Four months ended April 30,	
	2023	2024	2025	2025	2026
			(RMB in thousands)		
				(unaudited)	
Net cash flows used in operating activities	(120,123)	(27,184)	(86,656)	(2,781)	(64,531)
Net cash flows (used in)/from investing activities	(2,980)	(28,038)	(63,203)	(13,453)	38,200
Net cash flows from/(used in) financing activities	126,415	105,094	144,132	(11,471)	(517)
Net increase/(decrease) in cash and cash equivalents	**3,312**	**49,872**	**(5,727)**	**(27,705)**	**(26,848)**
Cash and cash equivalents at beginning of year	30,129	33,454	83,358	83,358	77,140
Effect of foreign exchange rate changes, net	13	32	(491)	5	(606)
Cash and cash equivalents at end of year	**33,454**	**83,358**	**77,140**	**55,658**	**49,686**

During the Track Record Period, we consistently recorded net cash outflows from operations with fluctuations, which was generally in line with our loss before tax position and changes in working capital items that negatively affected our operating cash flows. More specifically, these items primarily include (i) increases in inventories and trade and bills receivables, and decreases in trade payables in 2023, (ii) increase in trade and bills receivables in 2024, (iii) increase in inventories, trade and bills receivables, and restricted cash in 2025 and (iv) increases in inventories and prepayments, other receivables and other assets, and decrease in contract liabilities in the four months ended April 30, 2026. Additionally, significant factors included adjustments for non-cash and non-operating items such as write-down of inventories to net realizable value, depreciation and amortization, and share-based payment expenses also contributed to our recurring net operating cash outflow positions during the Track Record Period. We believe it is common for robotics companies like us to report net operating cash outflows during our early commercialization phase, which is fundamentally characteristic of a high-growth startup environment, where initial sales revenue and the corresponding cash collections are not yet sufficient to offset the substantial cash requirements for core operations include significant upfront payments to suppliers for raw materials and components, payroll for R&D and other employees, and other operating expenses essential for market expansion, such as sales and marketing activities, resulting in a temporary negative operating cash flow position. We believe this phase is transitional until we achieve greater scale, operational efficiency and market penetration.

Burn Rate

Our cash burn rate refers to the average monthly aggregate amount of (i) net cash used in operating activities, (ii) purchase of property, plant and equipment and purchase of intangible assets, and (iii) lease payment and lease interests. Our historical cash burn rate was RMB11.2 million, RMB2.8 million, RMB7.8 million and RMB17.1 million in 2023, 2024, 2025 and the four months ended April 30, 2026, respectively. Our cash burn rate decreased significantly from RMB11.2 million in 2023 to RMB2.8 million in 2024, primarily attributable to (i) the delayed benefits of prior cost-saving measures materializing through leaner operations, such as downsizing our workforce which lowered our monthly payroll outflows and refined procurement management which reduced our overall payments to suppliers compared with prior years, and (ii) strategic business mix optimization, with increased share of high-margin orders from customers with strong payment performance, which facilitate faster cash conversion and reduce our net operating cash outflows. Our cash burn rate then increased to RMB7.8 million for 2025, primarily driven by our continued business scale-up, we incurred (i) increased payments to suppliers due to the increased procurement, (ii) increased payroll and related personnel costs as our headcount grown, and (iii) higher travel and other international operating expenses as our overseas operations expanded. In addition, the outpace of our payments to suppliers over the collection of trade and bill receivables also resulted in an increase in our net operating cash outflows. Our cash burn in the four months ended April 30, 2026 is relatively high because we incurred substantial expenses for overseas business expansion, which is not representative of the full-year operating profile.

We had cash and cash equivalents, and financial assets at FVTPL of RMB102.4 million in aggregate as of May 31, 2026. We estimate that we will receive net **[REDACTED]** of approximately HK$**[REDACTED]** after deducting the estimated **[REDACTED]** and other fees and **[REDACTED]** paid and payable by us in connection with the **[REDACTED]**, assuming no **[REDACTED]** is exercised and assuming an **[REDACTED]** of HK$**[REDACTED]** per **[REDACTED]**, being the low-end of the indicative **[REDACTED]** range as set out in this document. Assuming that the average cash burn rate going forward will be RMB7.8 million, similar to the cash burn rate level in 2025, based on the underlying assumptions that (i) it represents the most recent and operationally relevant data, reflecting our latest business operations; (ii) our workforce growth will generally align with our business expansion, and (iii) prior to the completion of the **[REDACTED]**, no substantial capital investment or significant acquisition of fixed assets are expected, although such assumptions are subject to change due to various factors including but not limited to the business development, industry trend and customers' requirement, we estimate that our cash and cash equivalents, and financial assets at FVTPL as of May 31, 2026 will be able to maintain our financial viability for approximately 13.2 months or, if we take into account 10% of the estimated net **[REDACTED]** from the **[REDACTED]** (namely, the portion allocated for our working capital and other general corporate purposes), approximately **[REDACTED]** months or, if we take into account 100% of the estimated net **[REDACTED]** from the **[REDACTED]**, approximately **[REDACTED]** months.

Key Financial Ratios

The following table sets forth our key financial ratios for the periods indicated:

	As of/For the year ended December 31,			As of/For the four months ended April 30,	
	2023	2024	2025	2025	2026
				(unaudited)	
Gross profit margin[(1)]	31.6%	38.8%	40.5%	44.7%	44.5%
Net loss margin[(2)]	(61.9)%	(18.0)%	(67.0)%	(125.3)%	(57.8)%
Current ratio[(3)]	1.5	1.7	2.7	1.6	2.2
Quick ratio[(4)]	0.7	1.4	2.3	1.1	1.6

Notes:

(1) Calculated by dividing gross profit by revenue for the period multiplied by 100%.

(2) Calculated by dividing net loss by revenue for the period multiplied by 100%.

(3) Calculated by dividing total current assets by total current liabilities as of the end of the period.

(4) Calculated by dividing total current assets minus inventory by total current liabilities as of the end of the period.

The tables below set forth information about our customers and transactions during the Track Record Period.

	Year ended December 31,			Four months ended April 30,
	2023	2024	2025	2026
Total revenue (RMB in thousands)	162,166	250,522	301,493	106,940
Number of customers	171	208	242	123
Number of new customers[(1)]	87	83	112	25
Average customer value[(2)] (RMB in thousands)	948	1,204	1,246	869
Number of transactions with customers	461	780	544	377
Average transaction value of customers[(3)] (RMB in thousands)	352	321	554	284
Customer retention rate[(4)]	42.2%	52.6%	55.3%	35.9%
Net dollar retention rate[(5)]	168%	114%	102%	31%
Customer acquisition cost[(6)] (RMB in thousands)	659.3	778.3	1,020.6	1,369.8

Notes:

(1) Refers to customers who do not purchase products or solutions from us for the previous year.

(2) Calculated by dividing the revenue generated in a given year/period by the number of customers in the same year/period.

(3) Calculated by dividing the revenue generated in a given year/period by the number of transactions in the same year/period.

(4) Calculated by dividing the difference between the number of customers in the respective year/period and the number of new customers in the respective year/period by the number of customers in the immediately preceding year/period, multiplied by 100%.

(5) Calculated by dividing the revenue contribution of a customer in the immediately preceding year/period by the revenue contribution of the same customer for the current year/period.

(6) Calculated by dividing the total sales and marketing expenses for the relevant year/period by the number of new customers acquired in that same year/period.

Path to Profitability

Our recurring net losses and adjusted net losses (non-HKFRS measure) during the Track Record Period were primarily due to: (i) relatively high cost of sales as we were still in the early stage of development and our business scale has not yet reached a volume high enough to fully enjoy cost advantages from economies of scale; (ii) we incurred substantial R&D expenses to develop proprietary core technologies, product development and upgrades, as well as acquire and retain R&D talents, given the highly R&D-intensive nature of the robotics industry; and (iii) we incurred substantial sales and marketing expenses to educate potential customers about the value and functionality of our products, establish a robust sale network and acquire customers.

We believe that our proprietary core technologies, product development capabilities, industry expertise and high-quality customer base provide a solid foundation for our sustainable long-term growth. Going forward, we plan to maintain sustainability and achieve profitability by (i) driving sustainable revenue growth and business scale, more specifically, to (a) strengthen our industry leading position in industrial intelligent robotic solution sector; (b) upgrade and optimize our robotic solutions; (c) strengthen collaborations with existing customers and attract new customers; and (d) further expand overseas markets; and (ii) continually improving profitability by (a) enhancing product competitiveness; (b) increasing modular and configurable designs of our robotic products, (c) optimizing product costs, and (d) reducing robotic solution deployment costs. See "Business — Path to Profitability."

INTELLECTUAL PROPERTY

We believe that we have significant capabilities in development and commercialization of industrial intelligent robotics. We regard our patents, trademarks, copyrights, know-how, proprietary technologies, domain names, and similar intellectual property as critical to our continued success.

As of the Latest Practicable Date, we had 155 issued patents and 57 pending patent applications in the PRC. As of the Latest Practicable Date, we had 11 copyrights and 19 registered trademarks in use in the PRC, one registered trademark in Hong Kong, and four international domain. Our Directors confirm that during the Track Record Period and up to the Latest Practicable Date, we had not been subject to any material disputes or claims for infringement upon third parties' intellectual property rights. Based on the Joint Sponsors' due diligence, the Joint Sponsors are not aware of any circumstances suggesting the contrary to the above. See the section headed "Appendix VI — Statutory and General Information — 2. Further Information about Our Business — 2.2. Our Intellectual Property Rights" in this document for more information of intellectual property rights that are material to our business and the sections headed Risk Factors — Risks Related to Our Business and Industry — If third parties claim that we infringe upon their intellectual property rights, we may incur liabilities and financial penalties and may have to redesign or discontinue selling relevant products or solutions" in this document for more information of risks related to third-party intellectual property disputes.

RISKS AND CHALLENGES

We are a Specialist Technology Company seeking to **[REDACTED]** on the Main Board of the Stock Exchange under Chapter 18C of the Listing Rules. We are at a relatively early stage of commercialization of our robotic solutions, robots and other related products, as we only met the revenue requirement as set out in Rule 18C.03(4) of the Listing Rules in 2024 following our revenue growth during the Track Record Period. In addition, we recorded net losses during the Track Record Period. We believe there are certain risks and uncertainties involved in our operations, some of which are beyond our control.

Our operations and the **[REDACTED]** involve certain risks and uncertainties, including (i) risks related to our business and industry, (ii) risks related to doing business in China, and (iii) risks relating to the **[REDACTED]** and our Shares, which are set out in the section headed "Risk Factors" in this document. You should read that section in its entirety carefully before you decide to invest in the **[REDACTED]**. Some of the major risks we face include, but are not limited to: (i) we operate in an emerging market, which involves significant risks and uncertainties. The full potential of the industrial intelligent robotics market is yet to be fully realized; (ii) we cannot ensure that there will be sufficient future market adoption of our industrial intelligent robotic solutions, nor can we ensure that the industry will develop in our favor; (iii) our limited operating history; (iv) we may not be able to sustain our historical growth rates; (v) we have incurred net loss during the Track Record Period; (vi) we had net cash outflows from operating activities during the Track Record Period; (vii) we cannot guarantee that our business development strategies will be successfully implemented or bring about outcomes as we expected; (viii) if we fail to acquire new customers or retain existing customers, our business, financial conditions and results of operations may be materially and adversely affected; (ix) we operate in a competitive market subject to an evolving landscape, our business is characterized by rapid changes as well as new and disruptive technologies; (x) we have been and intend to continue investing heavily in our R&D and such investments may not yield the results we expect.

RECENT DEVELOPMENTS

For the six months ended June 30, 2026, the shipment volume of our robots have reached 1,845 units, compared to 1,032 units for the same period of 2025, and the shipment volume of robots sold under robotic solutions have reached 1,613 units, compared to 905 units for the same period of 2025. Such increases were primarily due to the overall growth in our business scale.

Our Directors have confirmed that as of the date of this document there has been no material adverse change in our financial, operational or **[REDACTED]** position, indebtedness, contingent liabilities or prospects since December 31, 2025, being the end date of our latest audited financial statements, and there has been no event since December 31, 2025 that would materially affect the information shown in the Accountants' Report set out in Appendix I to this document.

[REDACTED]

[REDACTED]

FUTURE PLANS AND USE OF [REDACTED]

Assuming an **[REDACTED]** of HK$**[REDACTED]** per **[REDACTED]** (being the mid-point of the stated range of the **[REDACTED]** of between HK$**[REDACTED]** and HK$**[REDACTED]** per **[REDACTED]**), we estimate that we will receive net **[REDACTED]** of approximately HK$**[REDACTED]** from the **[REDACTED]** after deducting the **[REDACTED]**, fees and other estimated expenses payable by us in connection with the **[REDACTED]**, assuming **[REDACTED]** is not exercised.

We intend to use the net **[REDACTED]** from the **[REDACTED]** for the following purposes and in the amounts set out below, subject to changes in light of our evolving business needs and changing market conditions:

(a) Research and Development: approximately **[REDACTED]**%, or HK$**[REDACTED]**, is expected to be used to advance our core robotic technology platform, robotic products and the RoboVerse system and develop relevant proprietary robotics technologies;

(b) Sales and Service Network Expansion and Brand Promotion: approximately **[REDACTED]**%, or HK$**[REDACTED]**, is expected to be used to establish and fortify our sales and service networks both domestically and internationally, while also enhance our robotic solution deployment capabilities, and promote our brand;

(c) Development of Manufacturing Capabilities and New Production Lines: approximately **[REDACTED]**%, or HK$**[REDACTED]**, is expected to be used for the development of manufacturing capabilities and new production lines;

(d) General Corporate Purposes and Working Capital: approximately **[REDACTED]**%, or HK$**[REDACTED]**, is expected to be used for working capital and other general corporate purposes to support our business operation and growth.

The above allocation of the net **[REDACTED]** will be adjusted on a pro rata basis in the event that the **[REDACTED]** is fixed at a higher or lower level compared to the mid-point of the estimated **[REDACTED]** range. To the event that our net **[REDACTED]** are either more or less than expected, we will increase or decrease the allocation of the net **[REDACTED]** to the above purposes on a pro rata basis. For further details, please refer to the section headed "Future Plans and Use of **[REDACTED]**" in this Document.

APPLICATION FOR [REDACTED] ON THE STOCK EXCHANGE

We have applied to the **[REDACTED]** for the granting of the **[REDACTED]** of, and permission to deal in, the Shares in issue and to be issued pursuant to (1) the **[REDACTED]**, (2) the exercise of the **[REDACTED]** and (3) the Conversion of Domestic Shares into H Shares on the basis that, among other things, we satisfy the requirement under Rule 18C.03 of the Listing Rules as a Commercial Company (as defined in the Listing Rules) with reference to our expected market capitalization at the time of **[REDACTED]**, which, based on the **[REDACTED]**, exceeds HK$4 billion.

[REDACTED] EXPENSES

Our **[REDACTED]** expenses mainly include (i) **[REDACTED]** expenses, such as **[REDACTED]**, and (ii) **[REDACTED]** expenses, comprising professional fees paid to our legal advisors and Reporting Accountants for their services rendered in relation to the **[REDACTED]** and the **[REDACTED]**, and other fees and expenses. Assuming full payment of the discretionary incentive fee, the estimated total **[REDACTED]** expenses (based on the mid-point of the **[REDACTED]** Range and assuming that the **[REDACTED]** is not exercised) for the **[REDACTED]** are approximately HK$**[REDACTED]** million, accounting for approximately of **[REDACTED]**% of our gross **[REDACTED]**. Among such estimated total **[REDACTED]** expenses, we expect to pay **[REDACTED]** expenses of HK$**[REDACTED]** million, professional fees for our legal advisors and Reporting Accountants of HK$**[REDACTED]** million and other fees and expenses of HK$**[REDACTED]** million. During the Track Record Period, an amount of HK$**[REDACTED]** million and HK$**[REDACTED]** million for the **[REDACTED]** expenses has been expensed through the statement of profit or loss for the year ended December 31, 2025 and the four months ended April 30, 2026, respectively, and no **[REDACTED]** expenses has been incurred for the two years ended December 31, 2024. The remaining estimated amount of HK$**[REDACTED]** million for our **[REDACTED]** expenses, accounting for approximately **[REDACTED]**% of our gross **[REDACTED]**, is expected to be expensed through the statement of profit or loss and HK$**[REDACTED]** million is expected to be recognized directly as a deduction from equity upon the **[REDACTED]**.

DIVIDENDS AND DIVIDEND POLICY

During the Track Record Period, no dividend has been paid or declared by our Company. Any declaration and payment, as well as the amount of dividends, will be subject to our Articles of Association and the relevant PRC laws. We currently do not have any dividend policy or fixed dividend pay-out ratio. As confirmed by the PRC Legal Advisor, according to relevant PRC laws, when a company distributes its after-tax profit for the current year, 10% of the profit shall be accrued and included in the company's statutory reserve. Such accrual is no longer required when the accumulated amount of the company's statutory reserve is 50% or more of the company's registered capital. Where the accumulative amount of the company's statutory reserve is not enough to make up for the losses of the previous year, the current year's profits shall first be used to make up for the losses before the statutory reserve is accrued. We will, therefore, only be able to declare dividends after: (i) all our historically accumulated losses have been made up for; and (ii) we have allocated sufficient net profit to our statutory common reserve fund as described above.

In this document, unless the context otherwise requires, the following terms and expressions have the meanings set forth below.

"Acting-in-Concert Agreement"	the acting in concert agreement entered into between Mr. Wang and Mr. Li on September 26, 2018 which has been subsequently replaced by the acting-in-concert agreement on April 1, 2025. For details, see "History and Corporate Structure — Acting-in-Concert Arrangement"
"affiliate"	any other person, directly or indirectly, controlling or controlled by or under direct or indirect common control with such specified person
"AFRC"	Accounting and Financial Reporting Council
"Articles of Association" or "Articles"	the articles of association of our Company, as amended, which shall become effective on the **[REDACTED]**, a summary of which is set out in Appendix V to this document
"Audit Committee"	audit committee of the Board
"Board" or "Board of Directors"	the Board of Directors of our Company
"Business Day" or "business day"	any day (other than a Saturday, Sunday or public holiday) on which banks in Hong Kong are generally open for normal banking business to the public
"**[REDACTED]**" or "**[REDACTED]**" or "**[REDACTED]**"	the **[REDACTED]** identified in "Directors and Parties Involved in The **[REDACTED]**"

[REDACTED]

"China" or "PRC"	the People's Republic of China, excluding, for the purpose of this document only, Hong Kong, Macau and Taiwan
"CIC" or "Industry Consultant"	China Insights Industry Consultancy Limited (灼識企業管理諮詢(上海)有限公司)), our industry consultant, an independent market research and consulting company
"CIC Report"	the independent industry report commissioned by our Company and prepared by CIC
"Companies Ordinance"	the Companies Ordinance (Chapter 622 of the Laws of Hong Kong), as amended, supplemented or otherwise modified from time to time

"Companies (Winding Up and Miscellaneous Provisions) Ordinance"	the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Chapter 32 of the Laws of Hong Kong), as amended, supplemented or otherwise modified from time to time
"Company" or "our Company"	Standard Robots (Wuxi) Co., Ltd (斯坦德機器人(無錫)股份有限公司), incorporated under the PRC laws on June 14, 2016 as a limited liability company and converted into a joint stock company under the PRC laws on May 29, 2025
"Company Law" or "PRC Company Law"	Company Law of the People's Republic of China (中華人民共和國公司法) as amended, supplemented or otherwise modified from time to time, which was last amended on December 29, 2023 to take effect on July 1, 2024
"Controlling Shareholders"	refers to Mr. Wang, Mr. Li and Standard Automation

[REDACTED]

"CSDC"	China Securities Depository and Clearing Corporation Limited (中國證券登記結算有限責任公司)
"CSRC"	the China Securities Regulatory Commission (中國證券監督管理委員會)
"Director(s)"	the director(s) of our Company
"Domestic Shares"	ordinary Shares in the share capital of our Company with a nominal value of RMB0.10 each (taking into account the Share Subdivision), which are subscribed for and paid up in RMB and are unlisted Shares not currently **[REDACTED]** or **[REDACTED]** on any stock exchange
"ECCN"	the export control classification code
"Entity List"	the trade restriction list published by the BIS appearing as Supplement No. 4 to Part 744 of the EAR, as amended from time to time, which identifies persons or addresses of persons reasonably believed to be involved, or to pose a significant risk of being or becoming involved, in activities contrary to the national security or foreign policy interests of the United States
"European Union"	a political and economic union of 27 member countries located primarily in Europe

"Exchange Participant(s)"	a person: (a) who, in accordance with the Listing Rules, may trade on or through the Stock Exchange; and (b) whose name is entered in a list, register or roll kept by the Stock Exchange as a person who may trade on or through the Stock Exchange
"Extreme Conditions"	Extreme conditions caused by a super typhoon as announced by the government of Hong Kong

[REDACTED]

"Group," "our Group," "we" or "us"	our Company and its subsidiaries (or our Company and any one or more of its subsidiaries, as the context may require)
"Guide"	Guide for New Listing Applicants issued by the Stock Exchange in December 2023, as amended from time to time
"H Share(s)"	overseas-**[REDACTED]** foreign shares in the share capital of our Company with nominal value of RMB0.10 each (taking into account the Share Subdivision), which are to be subscribed for and traded in HK dollars and are to be **[REDACTED]** on the Stock Exchange

[REDACTED]

"HK$" or "HK dollars"	Hong Kong dollars, the lawful currency of Hong Kong
"HKFRS(s)" or "HKFRS Accounting Standards"	Hong Kong Financial Reporting Standards and Hong Kong Accounting Standards and Interpretations, issued by the Hong Kong Institute of Certified Public Accountants

[REDACTED]

[REDACTED]

"Hong Kong" or "HK"	the Hong Kong Special Administrative Region of the PRC

[REDACTED]

"independent third party(ies)"	person(s) or company(ies), who/which, to the best of our Directors' knowledge, information and belief, having made all reasonable enquiries, is/are not connected person(s) of our Company within the meaning ascribed thereto under the Listing Rules

[REDACTED]

"International Sanctions Legal Advisor"	Han Kun Law Offices LLP, our legal advisor as to U.S. outbound investment rules, sanctions and export control laws in connection with the **[REDACTED]**

[REDACTED]

"Joint Sponsors"	CITIC Securities (Hong Kong) Limited and Guotai Junan Capital Limited

[REDACTED]

"Latest Practicable Date"	July 23, 2026, being the latest practicable date for the purpose of ascertaining certain information contained in this document prior to its publication

[REDACTED]

"Listing Committee"	the Listing Committee of the Stock Exchange

[REDACTED]

"Listing Rules"	the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited (as amended from time to time)
"Main Board"	the stock market (excluding the option market) operated by the Stock Exchange which is independent from and operated in parallel with the GEM of the Stock Exchange
"Mr. Li"	Mr. Li Hongxiang (李洪祥), our co-founder, a member of our Controlling Shareholders, executive Director and Chief Technology Officer
"Mr. Wang"	Mr. Wang Yongkun (王永錕), our founder, a member of our Controlling Shareholders, chairman of our Board, executive Director and Chief Executive Officer
"Nomination Committee"	the nomination committee of our Board

[REDACTED]

"Pathfinder SII(s)"	has the meaning ascribed to it in Chapter 2.5 of the Guide

"PRC GAAP"	generally accepted accounting principles in the PRC
"PRC Legal Advisor"	Han Kun Law Offices, being the legal advisor of our Company as to the PRC laws
"Pre-**[REDACTED]** Investor(s)"	the investor(s) from whom our Company obtained several rounds of investments, details of which are set out in the section headed "History and Corporate Structure — Pre-**[REDACTED]** Investments" in this document

[REDACTED]

"Regulation S"	Regulation S under the U.S. Securities Act
"Remuneration Committee"	the remuneration committee of our Board
"Reporting Accountants"	Ernst & Young
"RMB" or "Renminbi"	Renminbi, the lawful currency of the PRC
"SFC"	the Securities and Futures Commission of Hong Kong
"SFO"	the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong), as amended, supplemented or otherwise modified from time to time
"Share(s)"	ordinary shares in the capital of our Company with a nominal value of RMB0.10 each, upon the completion of the Share Subdivision; before the completion of the Share Subdivision, ordinary share(s) in the share capital of our Company with a nominal value of RMB1.00 each
"Share Subdivision"	the sub-division of the Shares by our Company where our Company subdivided its Share from one Share of RMB1.0 each into ten Shares of RMB0.10 each, which will become effective immediately prior to **[REDACTED]**
"Shareholder(s)"	holder(s) of the Share(s)
"Sophisticated Independent Investor(s)"	has the meaning ascribed thereto under the Listing Rules

[REDACTED]

"Standard Automation"	Standard Automation (Shenzhen) Studio (Limited Partnership) (斯坦德自動化(深圳)工作室(有限合夥)), a limited liability partnership established in the PRC on April 10, 2017 as a share incentive platform, of which Mr. Wang is the general partner and a member of our Controlling Shareholder
"Standard Robots (Kunshan)"	Standard Robots (Kunshan) Co., Ltd. (斯坦德機器人(昆山)有限公司), a limited liability company established in the PRC on March 8, 2021, a direct wholly-owned subsidiary of our Company
"Standard Robots Intelligence (Shenzhen)"	Standard Robots Intelligence (Shenzhen) Co., Ltd. (斯坦德機器人智能(深圳)有限公司), a limited liability company established in the PRC on April 10, 2025, a direct wholly-owned subsidiary of our Company
"Standard Technology (Wuxi)"	Standard Technology (Wuxi) Co., Ltd. (斯坦德科技(無錫)有限公司), a limited liability company established in the PRC on July 22, 2024, a direct wholly-owned subsidiary of our Company
"Stock Exchange"	The Stock Exchange of Hong Kong Limited, a wholly-owned subsidiary of Hong Kong Exchanges and Clearing Limited
"Standard Shengji (Shenzhen)"	Standard Shengji (Shenzhen) Intelligent Robots Co., Ltd. (斯坦德盛基(深圳)智能機器人有限公司), a limited liability company established in the PRC on April 8, 2026 in which our Company holds 60% of the equity interests
"Takeovers Code"	the Codes on Takeovers and Mergers and Share Buy-backs issued by the SFC, as amended, supplemented or otherwise modified from time to time
"Track Record Period"	the three years ended December 31, 2025 and the four months ended April 30, 2026

[REDACTED]

"United Kingdom"	The United Kingdom of Great Britain and Northern Ireland
"U.S." or "United States"	the United States of America, its territories, its possessions and all areas subject to its jurisdiction

"U.S. Persons"	means (i) any individual who is a U.S. citizen or legal permanent resident of the United States, including dual citizens, regardless of his or her current location in the world; (ii) any individual, regardless of his or her nationality, while physically located in the U.S.; (iii) any corporation, partnership, association, or other organisation organised under the laws of the United States or of any state, territory, possession, or district of the United States; and (iv) the foreign branches of any U.S. corporation, partnership, association or other organisation organised under the laws of the United States or of any state, territory, possession or district of the United States
"U.S. Securities Act"	the United States Securities Act of 1933, as amended, and the rules and regulations promulgated thereunder
"US$," "USD" or "U.S. dollars"	United States dollars, the lawful currency of the United States

[REDACTED]

"%"	percent

In this document, the terms "associate," "close associate," "connected person," "core connected person," "connected transaction," "subsidiaries" and "substantial shareholder" shall have the meanings given to such terms in the Listing Rules, unless the context otherwise requires.

Certain amounts and percentage figures included in this document have been subject to rounding. Accordingly, figures shown as totals in certain tables may not be an arithmetic aggregation of the figures preceding them. Any discrepancies in any table or chart between the total shown and the sum of the amounts listed are due to rounding.

For ease of reference, the names of the PRC established companies or entities, laws or regulations have been included in this document in both the Chinese and English languages; in the event of any inconsistency, the Chinese versions shall prevail.

GLOSSARY

This glossary contains certain technical terms used in this document in connection with us and our business. Such terms and their meaning may not correspond to standard industry definitions or usage.

"AGI"	artificial general intelligence, a type of AI that possesses the ability to understand, learn, and apply knowledge across a wide range of tasks at a level comparable to that of a human being
"AGV"	automated guided vehicles, portable robots move along a specific, defined paths with markers
"AI"	artificial intelligence
"algorithm"	a step-by-step procedure or set of rules, often implemented in computer code, designed to perform a specific task or solve a particular problem
"AMR"	autonomous mobile robots, which are robots designed to independently navigate environments without human intervention, utilizing sensors and algorithms to perceive their surroundings, make decisions and move
"CAGR"	compound annual growth rate
"Tonne CO_2e"	tonnes of carbon dioxide equivalent
"CPU"	a central processing unit
"GPU"	a graphics processing unit
"IL"	imitation learning, a machine learning approach where an agent learns to perform tasks by observing and mimicking expert demonstrations, aiming to replicate human-like decision-making and behavior
"IT"	information technology
"IPQC"	in-process quality control, which refers to the procedures and measures implemented during the manufacturing process to ensure that products meet specified quality standards before they reach the final stage of production
"kWh"	kilowatt-hour
"LiDAR"	Light Detection and Ranging, a remote sensing technology that measures distances by illuminating the target with laser light and analyzing the reflected light

GLOSSARY

"LLM"	large language models, a category of foundation models trained on immense amounts of data making them capable of understanding and generating natural language and other types of content to perform a wide range of tasks
"MCU"	a microcontroller unit
"R&D"	research and development
"RL"	reinforcement learning, a machine learning approach where an agent learns to make decisions by interacting with an environment, aiming to maximize cumulative rewards through trial and error
"S&OP"	sales and operations planning
"single-piece flow"	a manufacturing process where products are produced and moved through each step of the production process one at a time, rather than in batches
"SLAM"	simultaneous localization and map, a computational technology used by robots to build a map of an environment while simultaneously determining their location for navigation and spatial awareness
"VLA"	vision language action, a type of AI model that integrates computer vision, language, and action-based system to understand and interpret visual data, process and generate human language, and perform specific actions
"1+N+S = ∞"	the philosophy of our robotic solutions description in "Business" in this document
"3C"	computer, communication and consumer electronics

FORWARD-LOOKING STATEMENTS

We have included in this document forward-looking statements. Statements that are not historical facts, including statements about our intentions, beliefs, expectations or predictions for the future, are forward-looking statements.

This document contains forward-looking statements that are, by their nature, subject to significant risks and uncertainties, including the risk factors described in this document. Forward-looking statements can be identified by words such as "may," "will," "should," "would," "could," "believe," "expect," "anticipate," "intend," "plan," "continue," "seek," "estimate," or the negative of these terms or other comparable terminology. Examples of forward-looking statements include, but are not limited to, statements we make regarding our projections, business strategy and development activities as well as other capital spending, financing sources, the effects of regulation, expectations concerning future operations, margins, profitability and competition. The foregoing is not an exclusive list of all forward-looking statements we make.

Forward-looking statements are based on our current expectations and assumptions regarding our business, the economy and other future conditions. We give no assurance that these expectations and assumptions will prove to have been correct. Because forward-looking statements relate to the future, they are subject to inherent uncertainties, risks and changes in circumstances that are difficult to predict. Our results may differ materially from those contemplated by the forward-looking statements. They are neither statements of historical fact nor guarantees or assurances of future performance. We caution you therefore against placing undue reliance on any of these forward-looking statements. Important factors that could cause actual results to differ materially from those in the forward-looking statements include regional, national or global political, economic, business, competitive, market and regulatory conditions and (i) our business prospects; (ii) our business strategies and plans to achieve these strategies; (iii) future developments, trends and conditions in and competitive environment for the industries and markets in which we operate; (iv) general economic, political and business conditions in locations where we operate; (v) our financial condition and performance; (vi) our capital expenditure plans; (vii) our dividend policy; (viii) changes to the regulatory environment, policies, operating conditions of and general outlook in the industries and markets in which we operate; (ix) our expectations with respect to our ability to acquire and maintain regulatory licenses or permits; (x) the extent and nature of, and potential for, future development of our business; (xi) the actions of and developments affecting our competitors; (xii) the actions of and developments affecting our major customers and suppliers; and (xiii) certain statements in the sections headed "Risk Factors," "Industry Overview," "Regulatory Overview," "Business," "Financial Information," "Relationship with our Controlling Shareholders" and "Future Plans and Use of **[REDACTED]**" with respect to trends in interest rates, foreign exchange rates, prices, volumes, operations, margins, risk management and overall market trends.

Any forward-looking statement made by us in this document speaks only as of the date on which it is made. Factors or events that could cause our actual results to differ may emerge from time to time, and it is not possible for us to predict all of them. Subject to the requirements of applicable laws, rules and regulations, we undertake no obligation to update any forward-looking statement, whether as a result of new information, future developments or otherwise. All forward-looking statements contained in this document are qualified by reference to this cautionary statement.

An investment in our H Shares involves a high degree of risk. You should carefully consider the following information about risks, together with the other information contained in this document, including our consolidated financial statements and related notes, before you decide to buy our H Shares. If any of the circumstances or events described below actually arises or occurs, our results of operations, financial performance and business prospects may suffer. In any such case, the market price of our H Shares could decline and you may lose all or part of your investment. This document also contains forward-looking information that involves risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of many factors, including the risks described below.

RISKS RELATED TO OUR BUSINESS AND INDUSTRY

We operate in an emerging market, which involves significant risks and uncertainties. The full potential of the industrial intelligent robotics market is yet to be fully realized.

The industrial intelligent robotics market is relatively new, highly dynamic and constantly evolving, and we operate in an emerging space within these markets. The industrial intelligent robotics technologies are still at a preliminary stage of development. The market may not develop as expected. Market acceptance of our solutions remains uncertain. Our customers may not fully understand the value of our solutions, and potential customers may have difficulty distinguishing our services from those of our competitors.

In addition, similar to other frontier innovations, industrial intelligent robotics technologies present risks and challenges that could affect market perception and public opinion. Any inappropriate, abusive or premature usage of industrial intelligent robotics technologies may dissuade prospective customers from adopting industrial intelligent robotics technologies, may impair the market acceptance of industrial intelligent robotic solutions, attract negative publicity and adversely impact our reputation. It may even subject us to pressures from activists and/or other organizations and heightened scrutiny by regulators. Each of the foregoing events may in turn materially and adversely affect our business, financial condition and results of operations.

We cannot ensure that there will be sufficient future market adoption of our industrial intelligent robotic solutions, nor can we ensure that industry developments as well as market acceptance of industrial intelligent robotic solutions will develop in our favor.

The global industrial intelligent mobile robotic solution market expanded from RMB6.6 billion in 2021 to RMB21.1 billion in 2025, representing a CAGR of 33.8%. The global market size for industrial embodied intelligence robotic solutions surged from RMB0.6 billion in 2021 to RMB2.0 billion in 2025, representing a CAGR of 35.0% from 2021 to 2025. However, there is considerable uncertainty over the future market sizes and the rate at which these markets will grow. The demand for our industrial intelligence robotic solutions is dependent on the trend toward the industrial intelligent robotic solutions as key component of the automation industry. Therefore, our growth is highly dependent upon the worldwide adoption by industrial manufacturers of intelligent robotic solutions.

Should there be a deceleration in the market interest in the industrial intelligent robotic solutions, or if organizations delay the adoption of robotic solutions, the growth of our business may be constrained. Additionally, should regulatory frameworks for industrial intelligent robotic solutions become overly stringent, creating barriers to operational hurdles, customers may be reluctant to invest in robotics technologies under such stringent regulatory conditions and there may be a decrease in the

adoption of industrial intelligent robotic solutions. This could negatively affect the demand for our industrial intelligent robotic solutions. In addition, broader economic or industry trends, including shifts in automation adoption or downturns in the global industrial intelligent robotic solutions industry, could adversely impact our business, results of operations and financial condition.

Our limited operating history makes it difficult to evaluate our future prospects and the risks and challenges we may encounter.

We were founded in 2016. Our relatively limited operating history makes it difficult to evaluate our current business and prospects, and to plan for our anticipated future growth. Our historical revenue growth should not be considered indicative of our future performance. Rather than relying on our historical operating and financial results to evaluate us, you should consider our business prospects in light of the risks and difficulties we may encounter as an early-stage company expanding globally. We may encounter risks and difficulties as we compete in a novel industry, including, among other things, with respect to our ability to: (i) navigate an evolving and complex regulatory environment; (ii) design, outfit, and produce intelligent, reliable and safe and efficient industrial intelligent robotic solutions on an ongoing basis; (iii) improve and enhance our software and autonomous technology; (iv) establish and expand our customer base; (v) successfully market and properly price our robotic solutions; (vi) improve and maintain our operational efficiency; (vii) attract, retain and motivate talents; (viii) anticipate and adapt to changing market conditions, including technological developments and changes in competitive landscape; and (ix) build a well-recognized and respected brand.

We may not be able to sustain our historical growth rates, and our historical growth may not be indicative of our future growth or financial results.

We have achieved rapid growth in our revenue and gross profit during the Track Record Period. There is no assurance that we will be able to maintain our historical growth rates in the future. Our growth rates may decline for a number of reasons, including but not limited to the overall economic growth of China and globally, technology development of the industrial intelligent robotics industry, acceptance of industrial intelligent robotics, our ability to attract and retain our customers, to compete successfully and to manage our costs and enhance operating leverage.

We cannot assure you that we will be able to effectively manage our growth or implement our business strategies. The management of our growth may place significant demands on our managerial, administrative, operational, financial and other resources. Moreover, growth could strain our ability to maintain or increase our manufacturing capacity and reliable service levels for our customers. Our efforts to grow our business may be more costly than we expect, and we may not be able to increase our revenue enough to offset our increased costs and operating expenses.

We have incurred net loss during the Track Record Period, and may not be able to achieve or subsequently maintain profitability in the future.

In 2023, 2024, 2025 and the four months ended April 30, 2025 and 2026, we incurred net losses of RMB100.3 million, RMB45.1 million, RMB202.0 million, RMB56.1 million and RMB61.8 million, respectively. We may continue to incur net loss in the future, as we are in the stage of expanding our business and operations in the rapidly growing industrial intelligent robotics market and are continuously investing in R&D. We believe that our future revenue ability to achieve or subsequently maintain profitability will depend on, among other factors, our ability to drive sustainable revenue growth and business scale, optimize product costs and reduce robotic solution deployment costs. We also expect our costs and expenses to increase in future periods as we continue to expand our business

and operations and invest in R&D. In addition, we expect to incur substantial costs and expenses as a result of being a public company. If we are unable to generate adequate revenues and manage our costs and expenses, we may continue to incur significant losses in the future and may not be able to achieve or subsequently maintain profitability.

We had net cash outflows from operating activities during the Track Record Period. We may not be able obtain sufficient capital on acceptable terms and on a continuous basis in the future.

We recorded net cash used in operating activities of RMB120.1 million, RMB27.2 million, RMB86.7 million, RMB2.8 million and RMB64.5 million in 2023, 2024, 2025 and the four months ended April 30, 2025 and 2026, respectively. See "Financial Information — Liquidity and Capital Resources" for details. We cannot assure you that we will be able to generate positive cash flows from operating activities in the future. If we continue to record net operating cash outflows in the future, our working capital may be constrained, which may adversely affect our financial condition. Our future liquidity primarily depends on our ability to maintain adequate cash inflows from our operating activities and adequate external financing, such as offering and issuing securities, and/or other sources such as external debt, which may not be available on terms favorable or commercially reasonable to us or at all. If we fail to obtain sufficient funding in a timely manner and on reasonable terms, or at all, we will be in default of our payment obligations and may not be able to expand our business. As a result, our business, results of operations and financial condition may be adversely affected.

We cannot guarantee that our business development strategies will be successfully implemented or bring about outcomes as we expected.

We continue to execute a number of strategies to expand our business. However, expanding our business involves risks and challenges. These business initiatives are new and evolving, some of which may prove unsuccessful. It may also take a longer time than expected for us to develop the technologies and build market acceptance of our solutions, and we may not have sufficient experience in executing these new business initiatives effectively. We cannot assure you that any of these new business initiatives will achieve our expected market acceptance and generate desired outcome. If our efforts fail to enhance our monetization abilities, we may not be able to maintain or increase our revenues or recover any associated costs, and our business, results of operations and financial condition may be materially and adversely affected.

If we fail to acquire new customers or retain existing customers, our business, financial conditions and results of operations may be materially and adversely affected.

Our ability to acquire new customers in a cost-effective manner and retain existing customers is critical to the growth of our business and our profitability. There is no guarantee that we will maintain good relationship with customers or new customers will stick with us or that the net profits from new customers will outweigh the expense of acquiring them.

During the Track Record Period, our revenue was primarily generated from providing robotic solutions to enterprise customers in the 3C, automotive, semiconductor, new energy and biopharmaceutical industries. Our results of operations are highly dependent on the development and performance of these underlying industries of our customers. In addition, revenue from our existing customers may decline materially or fluctuate as a result of many factors, including, among other things, dissatisfaction with the operation of our robotic solutions, the price and quality of services and

maintenance, negative publicity related to our brand, or alternative services offered by our competitors. If we are unable to retain our existing customers or to acquire new customers in a cost-effective manner, our business, financial conditions and results of operations may be adversely affected.

In 2023, 2024, 2025 and the four months ended April 30, 2026, revenue generated from our top five largest customers accounted for 36.8%, 41.3%, 35.1% and 68.0% of our total revenues for the same periods, respectively. In the same periods, revenue generated from our largest customer accounted for 9.2%, 12.5%, 8.5% and 32.1% of our total revenues, respectively. We cannot be certain that customers that have accounted for significant revenues in past periods, individually or as a group, will continue to place large orders with us in any future period. We may lose customers due to various factors, including but not limited to increased competition, material changes in such customers' operations and any deterioration in our relationship with such customers. The loss or reduction in revenues generated from customers, any reduction, delay or cancellation of orders from our customers, or a decision by customers to select solutions provided by a competitor, would significantly and negatively impact our business, results of operations, financial condition and prospects.

We operate in a competitive market subject to an evolving landscape. Our business is characterized by rapid changes as well as new and disruptive technologies. If we fail to meet evolving customer needs or the pace of industry innovation or stay competitive, our business, results of operations and financial condition may be materially adversely affected.

We primarily compete in the industrial intelligent robotic solutions market, which are characterized by high competition and constant changes, including rapid technological evolution, frequent introductions of new solutions, continual shifts in customer demands and periodic emergence of new industry standards and practices. We are also expanding our global presence in regions such as Asia-Pacific, North America and Europe. The competitive landscape of these markets is subject to ongoing evolution as it is heavily affected by the general economic, political, regulatory and social conditions of such market. There will be evolving uncertainties over the competitive nature of these markets as new entrants may establish themselves.

We have experienced intense competition in recent years, including with respect to pricing. We may experience further pricing pressures in our business in the future as some of our competitors may seek to obtain increased market share by price reduction. The growing competition among established players and new market entrants in the industry further exacerbates the pricing pressures we face. In addition, many of our customers who are large corporations with substantial negotiating power, stringent product standards and potential competitive internal solutions, possess strong leverage over their suppliers, including us. If we are unable to sell our solutions at desirable prices, our business, results of operations and financial condition will be adversely affected. We also face fierce competition from other technologically advanced industrial intelligent robotic solutions providers. Our future success will depend on our ability to develop superior solutions and to maintain our leading competitive position with respect to our technological advances. There are significant challenges to stay competitive and we face competition from other competitors, some of which have greater resources than we do.

The market opportunities that we are pursuing are at an early stage of development, and it is difficult to predict customer demand or penetration rates for our solutions. Our technology targeting industrial intelligent robotic solutions requires significant investment and considerable time-to-market, and may not be commercially successful on a large scale in the short term, or at all. The future growth of our business depends in part on the overall development trend of the industrial intelligent robotic solutions and the down stream industry acceptance of our technology. Our business is characterized by rapid changes as well as new and disruptive technologies. Competitors might introduce innovative

solutions or adopt disruptive technologies that could further increase competition. The rapid pace of technological innovation poses a significant risk to our business. As disruptive technologies continue to emerge, they have the potential to reshape customer behaviors and preferences. This evolution may render our existing technology solutions obsolete, potentially diminishing our competitive edge. If we fail to adapt to these changes or invest in the necessary R&D to keep up with industry advancements, we may lose market share and face challenges in meeting customer expectations. Consequently, our financial performance and growth prospects could be adversely affected.

We have been and intend to continue investing heavily in our R&D and such investments may not yield the results we expect, and we may fail to continue to research and develop or effectively respond to the evolving technology and market dynamics of the industrial intelligent robotic solutions industry.

Our future growth depends on penetrating new markets, adapting existing solutions to new applications and customer requirements, and introducing new solutions that achieve market acceptance. We have been and intend to continue investing heavily in, and potentially increasing, R&D as part of our efforts to design, develop, manufacture and commercialize new robotic solutions and enhance existing robotic solutions. Our R&D expenses were RMB56.1 million, RMB36.6 million, RMB76.7 million, RMB13.5 million and RMB29.1 million in 2023, 2024, 2025 and the four months ended April 30, 2025 and 2026, respectively.

The industrial intelligent robotic solutions industry is experiencing rapid technological changes, and we need to invest significant resources in R&D to advance our technologies such as AI technologies to remain competitive in the market. Therefore, we expect that our R&D expenses will continue to be significant. Furthermore, R&D activities are inherently uncertain, and there can be no assurance that we will continue to achieve technological breakthroughs and successfully commercialize such breakthroughs. As a result, our significant expenditure on R&D may not generate corresponding benefits. If our R&D efforts fail to keep up with the latest technological developments, our established position in the global industrial intelligent robotic solution market could be damaged, which in turn would materially and adversely affect our business, financial condition, results of operations and prospects and we will suffer a decline in our competitive position. Any delay or setbacks in our efforts to improve industrial intelligent robotics capabilities could materially and adversely affect our business, reputation, results of operations and prospects.

We rely on third-party suppliers and service providers and expect to continue to do so for the foreseeable future.

We rely on third-party suppliers and service providers for raw materials, core components of our robots, transportation and other services. While these arrangements allow us to focus on our main business, there is no assurance that (i) these suppliers and service providers would operate in accordance with our instructions, policies and business guidelines, or that their service quality will not materially deteriorate, (ii) we can maintain good relationships with our suppliers and third-party service providers, (iii) they will not unilaterally increase their service prices, or (iv) there will not be any wrongdoing or misconduct by their employees or by them which would materially and adversely affect their services, or even us. There is no assurance that we can find reliable service providers who can meet our standards at scale as we continue to expand globally. Decreased availability or increased costs of logistics, transportation and supply chain service and equipment provided by third parties could impact our cost of operations and our profitability.

The purchases from our top five suppliers in each period during the Track Record Period was RMB24.2 million, RMB32.1 million, RMB54.5 million and RMB54.7 million, respectively, accounting for 27.7%, 37.7%, 34.8% and 49.4% of our total procurement amount in the same periods, respectively. The purchases from our largest supplier in each year/period during the Track Record Period accounted for 9.1%, 18.5%, 14.5% and 27.9% of our total procurement amount in the same years/periods, respectively. The stability of operations and business strategies of our suppliers are beyond our control, and we cannot assure you that we will be able to secure a stable relationship with such suppliers. Identifying and qualifying alternative or additional suppliers and vendors is often a lengthy process and can lead to production delays, interruptions to our production and additional costs, and such alternatives are sometimes not available on commercially reasonable terms, or at all. The inability of suppliers or vendors to deliver necessary production parts, components, equipment or services can disrupt the production processes of our robots and make it more difficult for us to implement our business strategy.

Our solutions may contain defects and fail to meet customer expectations, and our business, results of operations and reputation would be materially and adversely affected.

Our solutions may contain defects in design or manufacturing, and they may not perform as expected or require repair. The quality of our robots depends on the effectiveness of our quality control and quality assurance, which in turn depends on factors such as the quality and reliability of parts and components used, the quality of our staff and relevant training programs and our ability to ensure that our employees adhere to our quality control and quality assurance protocols. However, we cannot assure you that our quality control and quality assurance procedures will be effective in consistently preventing and resolving deviations from our quality standards. Additionally, we cannot assure you that the parts and components we procure from suppliers are safe and free of defects or can meet the relevant quality standards. In the event of any quality issues, we could be subject to complaints and product liability claims and we may not be able to seek indemnification from our suppliers. If we engage in legal proceedings against our suppliers, such proceedings may be time-consuming and costly regardless of the outcomes. Our efforts to resolve any issues in our solutions may not be timely or may not be to the satisfaction of our customers. Furthermore, we cannot assure that the robustness of our solutions at all times. We cannot assure you that our solutions are free of defects, which may manifest over time. Undetected errors, defects or security vulnerabilities, could result in unpleasant customer experience or, in worse cases, personal injury to our customers. Defects, delays or other failures of our solutions to perform as expected could damage our reputation and result in product recalls, product liability claims and/or significant warranty and other expenses and could have a material adverse impact on our business, financial condition, operating results and prospects.

We may not be able to effectively maintain and optimize our sales network, which could adversely affect our brand, results of operations and financial condition.

In 2023, 2024, 2025 and the four months ended April 30, 2025 and 2026, our selling and marketing expenses amounted to RMB57.4 million, RMB64.6 million, RMB114.2 million, RMB20.2 million and RMB42.0 million, accounting for 35.4%, 25.8%, 37.9%, 45.2% and 39.3% of our revenue for the same periods. Our success depends on our ability to effectively maintain and optimize our sales network to establish and deepen our presence across China and overseas markets, which is subject to a number of factors, certain of which are beyond our control. For example, if we fail to maintain stable relationships with our existing customers, have disputes with them, or fail to establish partnerships with new customers on favorable terms, we may not be able to maintain our market position across a number of regions and sectors. If we fail to successfully implement our development and growth plan and provide adequate resource and operational support to our sales network, our profitability and prospects may be materially and adversely affected.

If we are unable to manage our inventory risks efficiently or if the proportions and amounts of our provision for inventories further increase, our financial and results of operations may be adversely affected.

We may not be able to accurately forecast market demand, produce the correct amounts of products or fully utilize purchase commitments. We had inventories of RMB110.5 million, RMB59.4 million, RMB63.6 million and RMB122.5 million as of December 31, 2023, 2024, 2025 and April 30, 2026, respectively. Our average inventory turnover days were recorded at 459.4 days, 261.2 days, 167.2 days, and 235.8 days in 2023, 2024, 2025 and in the four months ended April 30, 2026, respectively. If we were unsuccessful in accurately quantifying appropriate levels of inventory, our business, financial condition and results of operation may be materially and adversely affected.

Our inventories consist of raw materials, work in progress and finished goods and contract fulfillment costs. Contract fulfillment costs include on-site materials such as robotic products and accessories, delivery personnel salaries and other delivery expenses. We cannot assure you that our inventories will not be damaged or impaired, as our storage may encounter unforeseeable events. As of December 31, 2023, 2024 and 2025 and April 30, 2026, we had inventory write-down of RMB30.0 million, RMB19.6 million, RMB21.6 million and RMB25.7 million, respectively. During the Track Record Period, our inventory write-down was primarily attributable to the decrease in the selling price of our older version of robots following the launch of new series of robots. See "Financial Information — Period-to-Period Comparison of Results of Operations — Year Ended December 31, 2024 Compared with Year Ended December 31, 2023 — Gross Profit and Gross Profit Margin" and "Financial Information — Discussion on Key Items of Consolidated Statements of Financial Position — Current Assets and Liabilities — Inventories" for details. Failure to manage our inventories effectively may adversely affect our financial condition and results of operations. With the aging of inventory balance, we may be required to write down inventories, which, if significant, may have a material and adverse impact on our financial condition and results of operations.

We are exposed to credit risk of our customers and failure to collect our trade and bills receivables in a timely manner may affect our financial condition and results of operations.

As of December 31, 2023, 2024 and 2025 and April 30, 2026, our trade and bills receivables amounted to RMB51.8 million, RMB93.4 million, RMB162.7 million and RMB172.4 million, respectively. Our trade and bills receivables turnover days were 144.2 days, 163.2 days, 229.1 days and 272.5 days for the year ended December 31, 2023, 2024 and 2025 and the four months ended April 30, 2026, respectively. Should the creditworthiness of our customers deteriorate or should a significant number of our customers fail to settle their accounts receivables in full for any reason, we may incur impairment losses and our results of operations and financial position could be materially and adversely affected. In addition, there may be a risk of delay in payment by our customers beyond their respective credit period, which in turn may also result in an impairment loss provision. In the event that settlements from customers are not made on a timely manner, or at all, our financial position and results of operations may be materially and adversely affected.

We may be exposed to liquidity risk due to a mismatch in our cash flow cycle and a long cash conversion cycle.

Our inventory turnover days and trade receivable turnover days have been significantly longer than our trade payable turnover days, which could result in delays in converting revenue into cash. The disparity in turnover days may lead to periods where our cash flow is constrained, requiring us to rely more heavily on working capital or external financing to support our operations and growth. There can be no assurance that our efforts will fully mitigate the risk.

In addition, our cash conversion cycle — a metric to measure how efficiently we manage its working capital by tracking the number of days it takes to convert our investments in inventory and other resources into cash flows from sales — was 422.8 days, 307.7 days, 261.0 days and 290.4 days for the year ended December 31, 2023, 2024 and 2025 and the four months ended April 30, 2026, respectively. The cash conversion cycle is calculated by adding inventory turnover days and trade and bills receivables turnover days, then subtracting accounts payable turnover days. A long cash conversion cycle may increase our reliance on working capital or external financing to support our operations and growth. Potential fluctuations in customer payment patterns, supply chain disruptions, and broader macroeconomic conditions could further exacerbate the cash flow mismatch and prolong the cash conversion cycle. If we are unable to manage our inventory and receivables efficiently or secure adequate financing on favorable terms, our liquidity position, financial condition, and results of operations could be materially and adversely affected.

Any failure to provide high-quality maintenance and support services for our customers may damage our relationships with them and, consequently, our business.

We believe that the accessibility of high-quality after-sale services is an important consideration behind a customer's purchase decision. As our operation and customer base continue to grow, we need to maintain our customer support that meets our customers' needs at scale. However, we cannot assure you that we may be able to respond quickly enough to accommodate short-term increases in customer demand for technical support or maintenance assistance. We may also fail to refine the future scope and delivery of our maintenance services and technical support to compete with changes in the after-sale services provided by our competitors.

If we fail to obtain or maintain the requisite licenses, permits, certificates, approvals, filings or registrations required for our business, our business, financial condition and results of operations may be materially and adversely affected.

We are required to obtain a series of license, permits, certificates and approvals, make filings or complete registrations according to relevant PRC laws and regulations. During the Track Record Period and up to the Latest Practicable Date, we had obtained or completed all requisite licenses, permits, certificates, approvals and registrations and filings for our current business operations in China from the relevant government authorities. However, we may become subject to additional license, approval and other requirements as we develop and expand our business scope and engage in different business activities.

We cannot assure you that local authorities will not adopt different enforcement practices or will not issue more explicit interpretations and rules or promulgate new laws and regulations from time to time to further regulate the business we operate, which may subject us to additional licensing

requirements. We may also be required to apply for and obtain additional licenses or permits for our operations in China as the interpretation and implementation of current PRC laws and regulations continue to evolve.

The interpretation or implementation of existing laws and regulations are subject to changes from time to time, and the implementation of new laws and regulations is evolving. If government authorities determine that our operations fall within the scope of business operations that require additional licenses, permits or approvals, we may not be able to obtain such licenses, permits or approvals in a timely manner or on commercially reasonable terms or at all, and failure to obtain such licenses, permits or approvals may subject us to fines, legal sanctions or an order to suspend our related operations. Moreover, we may fail to renew or update any of our existing licenses and permits in a timely manner and on commercially reasonable terms, or at all, which could materially and adversely affect our business, results of operations and financial condition.

Our business depends on the continuing efforts of our management team and our ability to attract, train, and retain competent talent, especially talent on R&D.

Our business depends on the continuing efforts of our management team to oversee and execute our business plans and identify and pursue new opportunities and product innovations. Any loss of service of our management can significantly delay or prevent us from achieving our strategic business objectives, and adversely affect our business, financial condition and operating results. From time to time, there may be changes in our management team, resulting from the hiring or departure of executives, which could also disrupt our business. Hiring suitable replacements and integrating them into our existing teams also require a significant amount of time, training and resources, and may impact our existing corporate culture.

Additionally, our future success also depends on our ability to attract, recruit and train qualified employees and retain existing key personnel. In particular, we rely on our in-house R&D team to develop our core technologies, solutions, and our experienced sales and marketing personnel to maintain relationships with our customers. In order to compete for talents, we may need to offer higher compensation, better training and more attractive career opportunities, employees share incentives schemes and other benefits to our employees, which may be costly. We cannot assure you that we will be able to attract or retain a qualified workforce necessary to support our future growth. In addition, our ability to train and integrate new employees into our operations may not meet the demands of our growing business. Any of the foregoing issues related to our workforce may materially and adversely affect our operations and future growth.

Our sales are subject to seasonal fluctuations.

Typically, we record higher revenue during the fourth quarter. Due to industry conditions and other factors, the degree of seasonality may vary each year, making it difficult for us to accurately project demand levels. If seasonal demand exceeds our expectations, we may not have sufficient inventory or may be unable to arrange production and delivery in a timely manner. If seasonal demand is lower than expected, we may face risks of excess inventory, increased working capital and liquidity needs and inventory impairment losses. Furthermore, our operating and financial results for an interim period may not be representative of our overall performance for a year. We expect to continue to experience seasonal fluctuations in our revenue, results of operations and financial condition, which could result in volatility and adversely affect the price of our H Shares.

The discontinuation of any government subsidies currently available to us could adversely affect our business, financial condition, results of operations, and prospects.

We recognized government grants of RMB4.2 million, RMB6.1 million, RMB1.1 million, RMB0.4 million and RMB0.8 million as other income and gains in 2023, 2024, 2025 and the four months ended April 30, 2025 and 2026, respectively. However, the timing, amount and conditions of government economic incentives are within the sole discretion of governmental authorities. In addition, governmental authorities may require us to perform certain contractual obligations or satisfy other requirements. However, there can be no assurance that we could fully satisfy these conditions or perform such obligations, and it is possible that such governmental authorities may stop subsidizing us or require us to return certain subsidize. Any reduction, elimination, repayment or other negative trend in economic incentives resulting from our failure to perform such obligations could adversely affect our business, financial condition, results of operations and prospects.

Damage to our brand image and corporate reputation could materially and adversely impact our business.

We believe our brand image and corporate reputation will play an increasingly important role in enhancing our competitiveness and maintaining our growth. Many factors, some of which are beyond our control, may negatively impact our brand image and corporate reputation if not properly managed. These factors include our ability to provide superior solutions and satisfactory services to our customers, successfully conduct marketing and promotional activities, manage relationships with and among business partners, manage complaints and negative publicity, and maintain a positive perception of our Company, our peers and our solutions in general. Any actual or perceived deterioration in the quality of our solutions, which is based on an array of factors including customer satisfaction, number of complaints as well as number of accidents, may subject us to damages, including the loss of important customers. Any negative publicity against us or our peers may harm our corporate reputation and may result in changes to government policies and the regulatory environment. If we are unable to promote our brand image and protect our corporate reputation, we may not be able to maintain and grow our customer base and our business and our growth prospects may be adversely affected.

Any unexpected disruption at our production facilities could materially and adversely affect our business, results of operations and financial condition.

Our ability to meet the demand of our customers and grow our business relies on the efficient, proper and uninterrupted operation of our production plan and a constant and sufficient supply of utilities. In the event of earthquake, fire, drought, flood or other natural disaster, political instability, riot or civil unrest, extended outage of critical utilities or transportation systems, terrorist attack or other events that limit or disrupt our ability to operate our production facilities, we may experience substantial losses, including loss of revenue from disrupted production. We may also need to incur substantial additional expenses, exceeding our insurance coverage to repair or replace any damaged equipment or facility. In addition, our ability to manufacture and supply products and our ability to meet our delivery obligations to our customers would be significantly disrupted and our relationships with our customers could be damaged, which could have a material and adverse effect on our business, results of operations and financial condition.

We may face cybersecurity risks with respect to, and our business operations could be harmed by real or perceived material defects or errors in, operational systems, infrastructure, and integrated software in our robotic solutions.

We may face various cybersecurity threats, including threats to our technology system and infrastructure, including attempts to compromise proprietary information, and ransomware attacks. While the cyber threat landscape is ever-changing, the current risks may be heightened by ongoing tensions with various nation state threat actors. Threats to our information technology assets, network, and data stored therein, are increasingly diverse and sophisticated. The commercial products we use, our servers, and other assets, along with those of our third-party service providers, are vulnerable to cybersecurity threats, including zero-day attacks, malware, phishing and spoofing exploits, denial-of-service attacks, compromise of physical assets, insider theft or misuse or mistake, and similar disruptions. We may not be able to successfully guard against every threat or mitigate the resulting risks. A successful cyber-attack could lead to interruptions, delays, loss of critical data and require large expenditure to investigate and remediate. This could, in turn, adversely affect our business, our financial condition, and damage our reputation.

The technologies underlying our operational systems, infrastructure, and integrated software in our robotic solutions are inherently complex and may contain defects or errors, particularly when new features or functionalities are released. There can be no assurance that our existing solutions will not contain defects or errors. Any real or perceived errors, failures, vulnerabilities, or bugs in our services or products could result in negative publicity or lead to performance issues, all of which could harm our business.

We may be subject to product liability or warranty claims that could result in significant direct or indirect costs, which could adversely affect our business and operating results, and our exchange, return, and warranty policies may adversely affect our results of operations.

We may be subject to claims if our robotic products are involved in accidents. Similarly, our customers could be subject to claims as a result of such accidents and bring legal claims against us. In addition, if lawmakers or governmental agencies were to determine that the use of our robotic products increased the risk of injury to all or a subset of our customers, they may pass laws or adopt regulations that limit the use of our products or increase our liability associated with the use of our products or that regulate the use of or delay the deployment of robotic technologies in manufacturing. Any of these events could adversely affect our brand, relationships with customers, operating results or financial condition.

Our policy generally allows products with defects to be returned and exchanged by our customers, and we typically offer a standard one-year warranty on our robots. In addition, we could incur significant costs to correct any defects, warranty claims or other problems, including costs related to product recalls. Any negative publicity related to the perceived quality of our products could affect our brand image, partner and customer demand, and adversely affect our operating results and financial condition. Also, warranty, recall and product liability claims may result in litigation, including class actions, the occurrence of which could be costly, lengthy and distracting and adversely affect our business and operating results. We may be required by law to adopt new or amend existing return, exchange and warranty policies from time to time. While these policies improve the customer experience of our solutions and help retain and acquire customers, we may be subject to additional costs and expenses which we may not recoup. We cannot assure you that our return, exchange and warranty policies will not be misused by our customers, which may significantly increase our costs and may adversely impact our business and result of operations.

Disruptions and delays in local and global supply chains and logistics could have a material and adverse impact on our business operations.

We rely on the timely supply of robotic components and other parts to carry out our manufacturing plans as scheduled. Any delays or disruptions in supplies from our suppliers, may have a material and adverse impact on our ability to meet the market demands and our marketing and sale of our solutions. In addition, any disasters or unanticipated catastrophic events could disrupt our transportation channels and impair the operations of our suppliers, and impede our ability to manufacture and deliver our products to customers in a timely manner. Any disruption or delay in our production and product and services delivery in the future could have an adverse impact on our ability to produce sufficient quantities of products and our ability to meet the needs of our customers. In such cases, our business, financial condition, results of operations and prospects could be materially and adversely affected.

We face risks associated with conducting business internationally and will continue to be subject to such risks as we expand our business overseas.

Sales to our customers outside of Chinese mainland, such as Japan, Vietnam, Thailand, Taiwan, China and Hong Kong, China, accounted for 12.5%, 24.1%, 25.3%, 18.3% and 67.9% of our total revenue in 2023, 2024, 2025 and the four months ended April 30, 2025 and 2026, respectively. Expanding our global footprint and growing overseas sales is an important part of our future growth, but these efforts may not be successful. Overseas operations are subject to a number of risks, including but not limited to: foreign exchange control and exchange rate fluctuation; political and economic instability, and international terrorism; global or regional health crises, such as health epidemics and outbreaks; potential for violations of anti-corruption laws and regulations, such as those related to bribery and fraud; laws and business practices favoring local competition; increased risk in managing inventory; increased risk in collecting trade receivable; less effective protection of intellectual property; difficulties and costs of staffing and managing foreign operation; and changes in local tax, import and export laws and tariffs and customs duty laws in the enforcement, application or interpretation of such laws.

The occurrence of any of these risks could materially and adversely impact our overseas expansion and consequently our business, operating results and financial condition. We expect we will continue to be subject to those risks as conducting our business internationally.

We are subject to anti-corruption, anti-bribery, governmental economic sanctions, and other laws and regulations.

We are subject to anti-corruption, anti-bribery, economic and trade sanctions laws and other relevant laws and regulations in various jurisdictions. For example, U.S. economic sanctions prohibit the provision of certain products to countries, governments, and persons targeted by U.S. sanctions. United Kingdom financial sanctions and European Union sanctions also have similar regime to prohibit the provision of certain products to countries, governments and persons on their respective target list. We may be subject to investigations and proceedings by governmental authorities for alleged infringements of these laws and regulations if our processes or systems are not conducted or are not operating properly. These proceedings may result in fines or other liabilities and could have a material and adverse effect on our reputation, business, financial condition, results of operations and prospects. If any of our subsidiaries, employees or other persons engage in fraudulent, corrupt or other unfair business practices or otherwise violate applicable laws, regulations or internal controls, we could become subject to one or more enforcement actions or otherwise be found to be in violation of such

laws and regulations, which may result in adverse media coverage, investigations, severe administrative, civil and possibly criminal sanctions, penalties, fines and sanctions and in turn adversely affect our reputation, business, financial condition, results of operations and prospects.

Geopolitical tensions could negatively affect our business operations and results of operations.

Our business and operations may be affected by geopolitical tensions and the resulting unfavorable government policies on international trade, including export control, increased tariffs, retaliatory measures, investment restrictions, or capital controls. These may reduce demand for our solutions, impair our competitive position, or prevent us from marketing our solutions in certain jurisdictions. In recent years, there has been a deterioration in the relationship between China and the United States which has resulted in intense potential conflicts between the two countries in trade, technology and other areas, and this has led to greater uncertainties in the geopolitical situations in other parts of the world affecting China and Chinese companies. Export controls, economic and trade sanctions have been threatened and/or imposed by the U.S. government on a number of Chinese technology companies, a few number of which are existing or potential customers and/or suppliers to us. The United States has also threatened to impose further export controls, sanctions, trade embargoes, and other heightened regulatory requirements on China and Chinese companies. These have raised concerns that there may be increasing regulatory challenges faced by or enhanced restrictions on China and other Chinese technology companies, including us, in a wide range of areas such as chips, data security, emerging technologies, "dual-use" commercial technologies and applications that could be deployed for surveillance or military purposes, import/export of technology or other business activities.

In addition, trade tensions between China and the United States intensified in 2025, resulting in a series of reciprocal tariff measures and heightened uncertainty in bilateral trade. Early in 2025, the United States announced a series of tariff increases on imports from China. In response, China also raised tariffs on U.S. goods including energy, agricultural, and industrial products. At the peak of escalation, tariff rates reached historically high levels, significantly increasing the cost of cross-border trade. While discussions and negotiations on tariffs between the United States and China are ongoing, there is no guarantee both sides can reach an agreement, which has resulted in great uncertainties on exports to and trades with the United States. These developments have created volatility in global supply chains, disrupted pricing stability, and contributed to broader economic uncertainty. We derived less than 1% of revenue from products sold to the United States during 2024 and less than 3% in 2025 and for the four months ended April 30, and nil revenue from products sold to the United States in 2023. If any new tariffs, legislation and/or regulations are implemented, or if existing trade agreements are renegotiated or terminated, such changes could materially and adversely affect our ability to access the U.S. market. For example, higher tariffs could raise our effective cost of exporting products to the United States, reducing margins or requiring us to absorb additional expenses. Higher tariffs may also force us to increase prices, which could make our products and solutions less competitive compared to local or non-Chinese suppliers to customers in the United States. Any of these occurrences could have an adverse effect on our business, financial condition and results of operations. In addition, future actions or escalations by either the United States or China that affect trade relations may cause global economic turmoil and potentially have a negative impact on our business.

We could be adversely affected as a result of our operations and sales to customers who are on the Entity List as administered by the U.S.

We may face export controls-related or sanctions-related or other trade-related restrictions on transactions with certain customers, business partners and other persons. In recent years, the United States has increased export controls restrictions on China through the Export Administration

Regulations (the "**EAR**"), administered by the Bureau of Industry and Security of the U.S. Department of Commerce ("**BIS**"). In particular, the Entity List maintained by the BIS identifies foreign parties that are restricted from receiving, through export, reexport or in-country transfer, certain items subject to the EAR unless a license is obtained from BIS. Licenses and exceptions to the license requirement are rarely granted to exporters where export, re-export or in-country transfer to foreign parties on Entity List are involved. Exporting, re-exporting or transferring items subject to these export administration regulations without satisfying the licensing requirements could result in criminal and/or civil penalties.

During the Track Record Period, our Group either sold products or provided services to a total of 13 customers who are on the Entity List. The revenue recorded from such sales of products and provision of services from customers on the Entity List represented 1.68% of our total revenue in 2023, 3.02% in 2024, 6.20% in 2025 and 0.82% in the four months ended April 30, 2026. In particular, the increase in sales to Entity List customers for 2025 was primarily driven by the increased sales to Customer J, one of our existing customers. Revenue recorded from sales to Customer J for 2025 represented 5.5% of the total sales for the period. We have also sourced certain components from three suppliers who are on the Entity List and the amounts of purchases are of negligible amount. For further details of the transactions with customers and suppliers on the Entity List, please refer to "Business — Impact of International Trade, Outbound Investment and Other Trade Policies — Impact of U.S. Export Controls Laws and Regulations". If our products become subject to the EAR in the future due to incorporation of U.S. controlled goods in the products or otherwise, we would be required to obtain the necessary export licenses to sell our products or provide our services to customers on the Entity List. However, there is a presumption of denial for such license application, and without the necessary licenses, we would not be able to continue to sell products and provide services to these customers. Further, given our significant sales to Customer J in 2025, a customer included on the BIS's Entity List, our business is subject to heightened regulatory and commercial risks. If additional or more restrictive export control measures are imposed on Customer J, we may be prohibited from, or materially limited in, continuing to sell our products to Customer J. Such restrictions could result in a substantial reduction in our revenue from Customer J and there is no assurance that we may be able to identify and onboard alternative customers of comparable scale and demand in a timely manner. As a result, our business, operations and financial conditions may be adversely impacted.

In addition, export controls restrictions and similar or more expansive restrictions or sanctions that may be imposed by the United States or other jurisdictions in the future may adversely affect our ability to work with certain existing and future customers and business partners, which would adversely impact our business. Furthermore, our association with customers or business partners that are or become subject to U.S. regulatory scrutiny or export controls- or sanctions-related restrictions could subject us to actual or perceived reputational harm among current or prospective investors, suppliers or customers, other parties doing business with us, or the general public. Any such reputational harm could result in the loss of investors, suppliers or customers, which could adversely impact our business, financial condition or prospects.

Any further escalation in trade or other tensions between the United States and China or news and rumors of any escalation, could introduce uncertainties to China's economy and any severe or prolonged slowdown in the global economy may materially and adversely affect our business, results of operations and financial condition.

The U.S. government's new China-focused Outbound Investment Program may adversely affect our business, financial condition, and results of operations.

On August 9, 2023, the Biden administration released an executive order and an advanced notice of proposed rule-making (the "**ANPRM**") providing a conceptual framework for outbound investment controls focused on China, including Hong Kong and Macau. Further to this ANPRM, on June 21, 2024, the U.S. Department of the Treasury issued a proposed rule on outbound U.S. investments involving China that generally follows the ANPRM. On October 28, 2024, the U.S. Department of the Treasury issued a final rule to implement the executive order of August 9, 2023 (the "**Final Rule**"). The Final Rule became effective on January 2, 2025. On December 18, 2025, the Comprehensive Outbound Investment National Security Act of 2025 (the "**COINS Act**") was passed by the U.S. congress and became law. The COINS Act directs the U.S. Secretary of the Treasury to issue regulations restricting United States outbound investments in countries of concern involving certain technologies and will supersede the Final Rule. It was instructed that the regulations implementing the relevant provisions of the new law will be issued within 450 days of its enactment (i.e., before March 2027). The Final Rule remains in effect until the regulations implementing the COINS Act are issued.

The Final Rule imposes investment prohibition and notification requirements on U.S. Persons for a wide range of investments in entities associated with China (including Hong Kong and Macau) that are engaged in activities relating to three sectors: (i) semiconductor and microelectronics, (ii) quantum information technologies, and (iii) AI systems, collectively defined as "covered foreign persons." U.S. Persons subject to the Final Rule are prohibited from making, or required to report, certain investments in Covered Foreign Persons, which are defined as "covered transactions," and include acquisitions of equity interests that are not yet publicly traded, certain debt financing, joint ventures, and certain investments as a limited partner in a non-U.S. person pooled investment fund. The Final Rule excludes some investments from the scope of covered transactions, including those in publicly traded securities. The Final Rule is aimed at exerting greater U.S. government oversight over U.S. direct and indirect investments involving China, and may introduce new hurdles and uncertainties for cross-border collaborations, investments, and funding opportunities of China-based issuers including us.

As we are a joint stock company established in the PRC, we are considered "a person of a country of concern" under the Final Rule. In addition, because our business involves developing AI systems that are intended by us to be used for the control of robotic systems (which is an activity described in the definition of "notifiable transaction"), we are likely to be deemed a "covered foreign person" under the Final Rule. Please refer to "Business — Impact of International Trade, Outbound Investment and Other Trade Policies — Impact of Outbound Investment" for further details. U.S. persons who engage in a "covered transaction" (each as defined under the Final Rule) that involves the acquisition of our equity interests may need to make notifications pursuant to the Final Rule, but the acquisition of publicly traded securities (such as our publicly traded H Shares) is currently exempted from the scope of covered transactions under the Final Rule if the requirements for the exemption are met. After this **[REDACTED]**, the Final Rule could limit our ability to raise capital from U.S. investors through issuances of equity or contingent equity interests that are not "publicly traded securities." In addition, relevant laws, regulations and policies continue to evolve, and there is substantial uncertainty as to how the COINS Act will be implemented, including whether the regulations to be issued under the COINS Act will continue to make the current exemptions available. Any potential amendments to the Final Rule or the introduction of similar regulations, including regulations implementing the COINS Act, may further restrict our ability to raise capital. A material and adverse impact on our ability to raise capital could be detrimental to our business, financial condition and prospects. In such case, the value of our H

Shares may significantly decline, or in extreme cases, become worthless. Potential U.S. investors shall consult their own counsel with respect to their participation in this **[REDACTED]** and their obligations under applicable rules and regulations at the time of investment.

Fluctuations in changes in fair value of financial assets measured at fair value through profit or loss may adversely affect our financial results.

We recorded financial assets at fair value through profit or loss ("**FVTPL**") of RMB17.0 million, RMB80.6 million and RMB40.8 million as of December 31, 2024 and 2025 and April 30, 2026, respectively. Our FVTPL mainly consist of wealth management products issued by commercial banks in the PRC with variable interest rates. For details, please see "Financial Information — Discussion of Key Items of Consolidated Statements of Financial Position — Current Assets and Liabilities — Financial Assets Measured at FVTPL". The fair value change of financial assets measured at FVTPL may significantly affect our financial position and results of operations. The determination of the fair value of such financial assets requires us to make significant estimates, which may be subject to material changes, and therefore inherently involves a certain degree of uncertainty. Factors beyond our control can significantly influence and cause adverse changes to the estimates we use and thereby affect the fair value of such financial assets. These factors include, but are not limited to, general economic condition, changes in market interest rates and the stability of capital markets. Any of these factors, as well as others, could cause our estimates to vary from actual results, which could materially and adversely affect our results of operations and financial condition.

The cybersecurity and data security laws and regulations are subject to rapid and evolving changes, any failure or perceived failure to comply with such laws and regulations could materially and adversely affect our business, financial condition, reputation and results of operations.

Pursuant to the Measures for Cybersecurity Review (網絡安全審查辦法) (the "**Cybersecurity Review Measures**"), which became effective in February 2022, critical information infrastructure operators that purchase network products and network platform operators engaging in data processing activities that affect or may affect national security must be subject to the cybersecurity review. In addition, network platform operators holding personal information of over one million users shall also apply for a cybersecurity review before listing in a foreign country. Given that the expression used in the Cybersecurity Review Measures is "listing in a foreign country" rather than "offshore listing" and that Hong Kong is likely to be considered as "offshore" rather than "foreign country," it is not likely that a listing in Hong Kong will be considered as "listing in a foreign country." Furthermore, the governmental authorities have discretion to initiate a cybersecurity review on any data processing activity if they deem such activity affects or may affect national security.

Since we are subject to local and overseas laws relating to cybersecurity and data privacy, including the collection, use, retention, security and transfer of personal information, if we cannot meet relevant requirements under the evolving applicable laws or regulations relating to data privacy, data protection or information security or any additional tax related requirements relating to data, or any compromise of security that results in unauthorized access, use or leakage of our customers' personal information, we could face damage in our reputation or other negative consequences, such as investigations, fines, or suspension of our business, any of which could materially and adversely affect our business, financial condition and results of operations. In addition, complying with various laws and regulations on cybersecurity and data security could cause us to incur additional costs or require us to change our business practices, including our data practices, which may significantly distract our management's attention and adversely affect our business.

If we fail to comply with various environmental and fire safety-related laws and regulations, we may be subject to fines and penalties.

We are subject to national and local environmental protection and fire safety related laws and regulations applicable to us in China.

During the Track Record Period, we have not fully obtained construction permits, completed as-built acceptance filings, or fire protection filings for certain of our construction projects due to the historical legacy of the relevant lands or properties, which could subject us to administrative penalties including orders of correction and fines. We have not received regulatory inquiries and administrative penalties imposed on us during the Track Record Period and up to the Latest Practicable Date. We have conducted inquiries and interviews with the competent governmental authorities which confirmed that, in general, the failure to do so will not result in penalties against us. Based on such interviews, PRC Legal Advisor is of the view that, failure to fully obtain such permits would not have a material adverse impact on our continued use of such construction projects. If any penalties are imposed on us, our operations could be materially and adversely affected and we will incur significant costs which will negatively impact our financial performance. We cannot assure you that we will be able to obtain all the regulatory approvals for our production lines and factories construction projects in a timely manner, or at all. Delays or failures in obtaining all the requisite regulatory approvals of such facilities may affect our abilities to develop, manufacture and commercialize our products and solutions as we plan.

We may incur additional costs to mitigate any ESG risks, which may materially and adversely affect our financial performance. To identify, manage, and mitigate ESG risks, we may incur additional costs and expenses which could impact our financial performance.

Given the nature of our business, we do not produce any material generation of emissions and wastes and no heavy pollution. We monitor a wide range of indicators to manage our environmental and climate-related risks arising from our operations and are committed to providing adequate support to our employees to nurture a friendly and inspirational corporate culture. This commitment may entail incurring substantial additional costs and would potentially impact our profitability.

In addition, the increasing ESG-related regulatory requirements, including various ESG disclosure mandates in the jurisdictions where we operate, may lead to rising compliance costs and cost of sales may rise. Failure to adapt to new regulations or meet evolving industry expectations and standards could result in consumers choosing products from other companies, which may materially and adversely affect our results of operations and financial conditions.

Our risk management and internal control systems may not be adequate or effective.

We seek to improve and update our risk management and internal control systems on a regular basis. See "Business — Risk Management and Internal Control" for details. However, there is no assurance that they will be effective in safeguarding our risk management and internal control functions and fulfilling their purposes by ensuring, among other things, accurate reporting of our financial results and the prevention of fraud. Since our risk management and internal control systems depend on effective implementation by our employees, and even though we provide relevant internal trainings in this regard, we cannot assure you that our employees are sufficiently or fully trained to implement these systems, or that their implementation will be free from error or mistakes. If we fail to timely update, implement, and modify, or fail to deploy sufficient human resources to maintain our risk management policies and internal control procedures, our business, financial condition, results of operations and prospects could be materially and adversely affected.

Further, there can be no assurance that our employees or business partners will not engage in misconducts or omissions that could materially and adversely affect our business, financial condition and results of operations.

We may be involved in administrative and legal proceedings and commercial disputes, which could materially affect our business, financial condition and results of operations.

We may be subject to administrative or legal proceedings or commercial disputes from time to time in the ordinary course of our business, which could have a material adverse effect on our business, results of operations, and financial condition. Claims arising out of actual or alleged violations of law could be asserted against us by our customers, our competitors, governmental entities in civil or criminal investigations and proceedings, or other entities. These claims could be asserted under a variety of laws, including but not limited to product liability laws, intellectual property laws, labor and employment laws, securities laws, tort laws, contract laws, property laws, and employee benefit laws. There is no guarantee that we will be successful in defending ourselves in legal and administrative actions or in asserting our rights under various laws. Even if we are successful in our attempt to defend ourselves in legal and administrative actions or to assert our rights under various laws, enforcing our rights against the various parties involved may be expensive, time-consuming, and ultimately futile. These actions could expose us to negative publicity and to substantial monetary damages and legal defense costs, injunctive relief, and criminal, civil, and administrative fines and penalties.

Higher labor costs and inflation may adversely affect our business, results of operations, financial condition and prospects.

Rising inflation may be reflected in the prices of raw materials from our suppliers. Factors such as changes in minimum wage laws, labor market dynamics, or increased competition for skilled labor in the industry may lead to higher labor expenses. Such increases could exert upward pressure on the amounts that we paid to our employees or other third-party service providers. Our ability to manage and mitigate the impact of rising labor costs through operational efficiencies, process improvements, or technological innovations will also significantly influence our competitiveness and financial performance. However, there is no guarantee that we will succeed in effectively managing the impact of rising labor costs. Moreover, higher cost for labor and raw materials might necessitate adjustments in our pricing, potentially making our solutions less competitive in the market. Attempts to pass on increased labor costs to customers could result in reduced demand or market share loss.

We may be subject to fines and penalties as a result of non-compliance with certain PRC laws and regulations regarding social insurance and the housing provident fund during the Track Record Period.

Companies operating in China are required to participate in various employee benefit plans, including certain social insurance, housing funds, unemployment insurance, health insurance plans and other welfare-oriented payment obligations, and contribute to the plans in amounts equal to certain percentages of salaries, including bonuses and allowances, of our employees up a maximum amount specified by the local government from time to time at locations where we operate our businesses. The requirement of employee benefit plans has not been implemented consistently by the local governments in China given the different levels of economic development in different locations. During the Track Record Period, our PRC subsidiaries engaged third-party human resources agencies to pay social insurance premiums and housing provident funds for several employees per their request, and we did not make full social insurance and housing provident fund contribution for certain employees in strict compliance with relevant laws and regulations. We estimate that the shortfall amount that we may be

required to contribute to social insurance and housing provident fund for these employees would be approximately RMB7.5 million, RMB9.5 million, RMB11.3 million and RMB5.3 million in 2023, 2024, 2025 and in the four months ended April 30, 2026, respectively. As advised by our PRC Legal Advisor, an employer that has not made social insurance contributions at such rate and based on such amount as prescribed by the law may be ordered to rectify the non-compliance and pay the required contributions within a stipulated timeframe and we may be liable for additional late payment penalty at a daily rate of 0.05% of the shortfalls. We estimate that in the event that we were ordered by the relevant authorities to make up for the shortfalls of social insurance contributions during the Track Record Period, the maximum late payment penalties would be approximately RMB16.6 million as of April 30, 2026. Failure to fulfill the outstanding contributions and payments within the stipulated timeframe may result in fines ranging from one to three times of the amount in arrears. Our PRC Legal Advisor has also advised us that, in the event that we fail to pay the housing provident fund in full amount, the housing provident fund administrative center will order us to pay the amount within a prescribed time limit. If we fail to do so upon the expiration of the above-mentioned time limit, further application will be made to the court for compulsory enforcement. However, no late payment fees are provided in relevant regulations for housing provident fund contributions. As of the Latest Practicable Date, we had not received any notice for payment of penalties of social insurance premium and housing provident funds from the competent authorities, nor any administrative penalty or labor arbitration application from employees for the agency arrangement with third-party human resources agencies. However, there is no assurance that the competent government authorities will not require us to settle the outstanding amount within the specified time limit or impose late payment penalties on us, or any of our employees would not make complaints or demand for payment for any outstanding contribution.

Furthermore, according to the Interpretation II of the Supreme People's Court of Issues Concerning the Application of Law in the Trial of Labor Dispute Cases (《最高人民法院關於審理勞動爭議案件適用法律問題的解釋(二)》), (i) the absence of prior agreements excluding social insurance payments; (ii) our PRC Legal Advisor's opinion that the interpretation does not expand penalty exposure or repeal existing laws, our Directors believe the aforementioned judicial interpretation would not have a material adverse effect on our business or financial results. For more information, please refer to "Business — Legal Proceedings and Compliance — Compliance" and "Regulatory Overview — Regulations Relating to Labor Contract, Social Insurance and Housing Provident Fund".

We may need to raise additional capital in the future to execute our business plan, which may not be available on acceptable terms, or at all.

We may need additional capital in the future to fund our continued operations, and we may be unable to raise additional funds, whether through equity or debt financing, when needed on favorable terms or at all. If we do raise additional capital through public or private equity offerings, the ownership interest of our existing Shareholders, including investors in this **[REDACTED]**, will be diluted, and the terms of these securities may include liquidation that adversely affect our Shareholders' rights. If we raise additional capital through debt financing, we may be subject to covenants limiting or restricting our ability to take specific actions, such as incurring additional debt, making capital expenditures or declaring dividends. Any failure to raise capital as and when needed could have a negative impact on our financial condition and on our ability to pursue our business plans and strategies.

Our leased property interests may be defective, and our right to lease the properties could be challenged due to such defects. Additionally, failure to renew our current leases or locate desirable alternatives could materially and adversely affect our business.

We lease properties for our offices and manufacturing facilities. As of the Latest Practicable Date, certain lessors have not provided the ownership certificates for our leased properties or other proof of authorizations from the property owners to sublease the properties to us, hence we cannot ensure that they have the rights or authorizations to lease such properties to us. If our lessors are not the owners of the properties and they have not obtained consents from the owners or their lessors or permits from the relevant government authorities, we may not confirm whether the actual usage of our leased properties was inconsistent with the usage set out in such title certificate or relevant authorization documents or not, and the relevant lease agreements might be deemed unenforceable in accordance with the relevant laws and regulations. In such cases, we may not be able to continue leasing such property, and we may become involved in disputes with the property owners or third parties who otherwise have rights to or interests in our leased properties and we might incur additional costs and resources to relocate relevant properties into new locations. Our Directors believe that our use of the property will not individually or collectively have a material adverse effect on our business, financial condition or results of operations. Even if we are required to vacate the property, we believe we will be able to readily find comparable property in which to relocate, and the costs and expenses we may incur for relocation will be immaterial.

Additionally, we have not registered all of our lease agreements with the relevant governmental authorities as of the Latest Practicable Date. Under the relevant PRC laws and regulations, we may be required to register and file with the relevant governmental authority executed leases and may be subject to fines. For more information, please refer to "Regulatory Overview — Regulations Relating to Lease of Property".

There is no assurance that we will be able to extend or renew our leases upon expiration of the current term on commercially reasonable terms or at all, and our rights to use these leased properties may be negatively affected by prior encumbrances on these properties. In any such events, we may be forced to relocate our affected operations. This could disrupt our operations and result in significant relocation expenses. In addition, we compete with other businesses for premises at certain locations or of desirable sizes. As a result, even though we could extend or renew our leases, rental payments may significantly increase as a result of the high demand for the leased properties. In addition, we may not be able to locate desirable alternative sites for our current leased properties as our business continues to grow and failure in relocating our affected operations could adversely affect our business and operations.

We have limited insurance coverage, and any claims beyond our coverage may result in substantial costs and a diversion of resources.

We face various risks in connection with our business and may lack adequate insurance coverage or have no relevant insurance coverage. As of the Latest Practicable Date, we had not obtained any business liability, property insurance or disruption insurance to cover our operations. We also do not maintain key-man life insurance or insurance policies covering damages to our IT infrastructure or information technology systems. We have determined that the costs of insuring against these risks and the difficulties associated with acquiring such insurances on commercially reasonable terms render these insurances impractical for our business. However, any uninsured business disruptions may result in our incurring substantial costs and the diversion of resources, which could have an adverse effect on our business and results of operations.

We face risks related to natural disasters, health epidemics, and other outbreaks of contagious diseases.

Our business could be adversely affected by natural disasters or outbreaks of epidemics. These natural disasters, outbreaks of contagious diseases and other adverse public health developments in any market where we operate could severely disrupt our business operations by damaging our technology infrastructure or information technology system or impacting the productivity of our workforce, which may adversely affect our financial condition and results of operations.

We may not be able to obtain or maintain adequate intellectual property rights protection for our products or solutions, or the scope of such protection may not be sufficiently broad.

Our success depends in a large part on our ability to protect our proprietary technologies as well as our solutions from competition by obtaining, maintaining and enforcing our intellectual property rights. We have been protecting the proprietary technologies that we consider commercially important by, among others, filing patent applications. The patent application process may be expensive and time-consuming, and we may not be able to file and prosecute all necessary or desirable patent applications at a reasonable cost or in a timely manner, if at all. In addition, we may fail to identify patentable aspects of our R&D outputs before it is too late to obtain patent protection. As a result, we may not be able to prevent competitors from developing and commercializing competitive products or solutions in all such fields.

Patents may be invalidated, and patent applications may not be granted for several reasons, including known or unknown prior deficiencies in the patent application or the lack of novelty of the underlying invention or technology. Even if our patent applications are successfully granted, such grant may not be in a form that can provide us with meaningful protection, prevent competitors from competing with us, or otherwise provide us with any competitive advantage. Our competitors may be able to circumvent our patents by developing similar or alternative technologies, products or solutions in a non-infringing manner. Therefore, the grant of a patent application is not conclusive as to its inventor, scope, validity or enforceability, and our patents may be challenged in the courts or patent offices in China. Further, the life of a patent and the protection it affords are limited. For example, from the date of application, invention patents are valid for 20 years, utility model patents are valid for 10 years, and design patents filed since June 1, 2021 are valid for 15 years. We may face competition for any approved products even if we successfully obtain patent protection once the patent life expires for such products. Any of the foregoing could materially and adversely affect our business, results of operations, financial condition and competitive position.

If third parties claim that we infringe upon their intellectual property rights, we may incur liabilities and financial penalties and may have to redesign or discontinue selling relevant products or solutions.

Some of our competitors have large patent portfolios and may claim that the commercial use of our products or solutions has infringed upon their patents. It might be alleged that certain features of our products or solutions fall within the claims of their patents. Our competitors may initiate legal proceedings alleging that we are infringing upon, misappropriating or otherwise violating their intellectual property rights. We cannot assure you that we or our products or solutions will not infringe any intellectual property rights held by third parties in the future. We may face claims of infringement of third parties' proprietary rights or claims for indemnification resulting from infringement arising from our operations or the design, development and sales of our products or solutions. In addition, we may be unaware of intellectual property registrations or applications relating to our products or

solutions or business operations that may give rise to potential infringement claims against us. There may also be technologies licensed to and relied on by us that are subject to infringement or other corresponding allegations or claims by third parties.

Companies in the robot industry may use intellectual property litigation to gain a competitive advantage. Whether a product or solution infringes upon a patent involves an analysis of complex legal and factual issues, the determination of which is often uncertain. We may hire employees who have previously worked for our competitors or other companies in relevant industries. There can be no assurance that such employees will not use their previous employers' proprietary know-how or trade secrets in their work for us, which could result in litigation against us. Our competitors may also have filed for patent protection which is not as yet a matter of public knowledge or claim trademark rights that have not been revealed through our searches of relevant public records. Our efforts to identify and avoid infringing upon third parties' intellectual property rights may not always be successful. Any claims of patent or other intellectual property infringement, regardless of their merit, could: be expensive and time-consuming to defend; cause us to pay substantial damages to third parties; forbid us from making or selling products that incorporate the challenged intellectual property; cause us to enter into royalty or licensing agreements in order to obtain the right to use a third party's intellectual property, which agreements may not be available on terms acceptable to us or at all; or result in customers terminating, deferring or limiting their purchase of the affected products until resolution of the litigation.

Any of the foregoing results could have a material adverse effect on our business, financial condition and results of operations.

RISKS RELATED TO DOING BUSINESS IN CHINA

Changes in China's economic, political or social conditions or government policies as well as the global economy and political environment could have a material adverse effect on our business and operations.

Our performance has been and will continue to be affected by China's economy, which in turn is influenced by the global economy. The uncertainties relating to the global economy as well as the political environment in various regions of the world will continue to impact China's economic growth. The global macroeconomic environment is facing challenges. There have also been concerns over unrest and terrorist threats. There have been concerns on the relationship between the PRC and other countries, including the surrounding Asian countries, which may potentially have adverse economic effects. The ongoing trade tensions between the United States and the PRC may have tremendous negative impact on the economies of not merely the two countries concerned, but the global economy as a whole. The uncertainty surrounding Trump Administration's tariff policy on China's economy has created significant apprehension among global markets, as the potential for retaliatory measures and disrupted trade flows could have far-reaching economic consequences. It is unclear whether these challenges and uncertainties will be contained or resolved, and what effects they may have on the global political and economic conditions in the long term. While China's economy has experienced significant growth in the past few decades, growth has been uneven across different regions and economic sectors and it has shown slower growth since 2012 compared to the previous decade and the trend may continue. Any severe or prolonged slowdown in the global or China's economy may materially and adversely affect our business, results of operations and financial condition. Additionally, continued turbulence in the international markets may adversely affect our ability to access the capital markets to meet liquidity needs.

We are unable to predict all the risks and uncertainties that we face as a result of current economic, political, social, and regulatory developments and many of these risks are beyond our control. All such factors may materially and adversely affect our business and operations as well as our financial performance.

You should assess the legal protections you are entitled to under legal system in China.

The legal system in China is a civil law system based on written statutes. Unlike common law systems, it is a system in which decided legal cases have limited precedential value. The laws and regulations in China are subject to further revisions or interpretations from time to time. New laws, regulations, guidelines and interpretations that are promulgated in the future may affect the rights and obligations of the parties involved. Therefore, you should assess the legal protections you are entitled to under legal system in China.

We may be subject to additional regulatory requirements relating to new laws and regulations in connection with overseas listings issued by PRC government authorities.

On February 17, 2023, the CSRC issued the Trial Administrative Measures of Overseas Securities Offering and Listing by Domestic Companies (《境內企業境外發行證券和上市管理試行辦法》) (which came into effect on March 31, 2023) and relevant supporting guidelines (the "**Overseas Listing Trial Measures**"). The Overseas Listing Trial Measures are applicable to overseas securities offering and listing conducted by issuers who are (i) companies incorporated in the PRC ("**PRC domestic companies**") and (ii) companies incorporated overseas with substantial operations in the PRC. The Overseas Listing Trial Measures lay out the arrangements for regulatory filings for both direct and indirect overseas offerings, and clarify the determination criteria for indirect overseas offerings in overseas markets. The Overseas Listing Trial Measures stipulate that such issuer shall fulfill the filing procedures within three working days after it makes an application for **[REDACTED]** and **[REDACTED]** in an overseas stock market.

According to the Overseas Listing Trial Measures, we, as a PRC domestic company seeking to issue and list securities in overseas markets, are required to fulfill the filing procedure with the CSRC within three working days after submitting the application documents to the overseas supervisory authorities and report relevant information. For details, see "Regulatory Overview — Regulations Relating to Overseas Securities Offering" in this document.

The Overseas Listing Trial Measures may subject us to additional compliance requirements in the future, and we cannot assure you that we will be able to get clearance of our filing procedures under the Overseas Listing Trial Measures on a timely basis, or at all. Any failure on our part to fully comply with the new regulatory requirements may significantly limit or completely hinder our ability to continue to sell our securities to investors, cause significant disruption to our business operations, and severely damage our reputation, which could affect our financial condition and results of operations and cause our securities to decline in value or become worthless.

We may be subject to the approval, filing or other requirements of the CSRC or other PRC governmental authorities in connection with future capital raising activities.

We cannot assure you that any new rules or regulations promulgated in the future will not impose additional requirements or restrictions on us or our financing activities. If it is determined in the future that approval from or filing with the CSRC or other regulatory authorities or other procedures are required, we may fail to obtain such approval, perform such filing procedures or meet such other

requirements in a timely manner or at all. We may face sanctions by the CSRC or other PRC regulatory authorities for failure to seek CSRC approval or other government authorization, or perform filing procedures, for this **[REDACTED]** or our future financing activities, and these regulatory authorities may impose fines and penalties on us, limit our operating activities in the PRC, limit our ability to pay dividends outside the PRC, delay or restrict the repatriation of the **[REDACTED]** from the **[REDACTED]** into the PRC or take other actions to restrict our financing activities, which could have a material adverse effect on our business.

You may experience difficulties in effecting service of legal process and enforcing judgments against us and our Directors and management.

We are a company incorporated under the laws of the PRC and our assets and subsidiaries are located in the PRC. Most of our Directors and senior management reside within the PRC. The assets of these Directors and senior management are also mostly located within the PRC. As a result, it may be difficult and time-consuming to effect service of process upon most of our Directors and senior management outside the PRC. In addition, you may also experience difficulties in enforcing judgments due to lack of reciprocal recognition and enforcement of judicial rulings and awards of other jurisdictions.

Additionally, the holders of H Shares will not be able to bring actions on the basis of violations of the Listing Rules and must rely on the Stock Exchange to enforce its rules. The Listing Rules and the Takeovers Code do not have the force of law in Hong Kong.

We are subject to the currency exchange regulatory system.

The conversion of Renminbi is subject to applicable laws and regulations in the PRC. It cannot be guaranteed that under a certain exchange rate, we will have sufficient foreign exchange to meet our foreign exchange requirements. Under the current PRC foreign exchange regulatory system, foreign exchange transactions under the current account conducted by us, including the payment of dividends, do not require advance approval from the the State Administration of Foreign Exchange of the PRC (中華人民共和國國家外匯管理局) ("**SAFE**"), but we are required to present documentary evidence of such transactions and conduct such transactions at designated foreign exchange banks within China that have the licenses to carry out foreign exchange business.

Under existing foreign exchange regulations, following the completion of the **[REDACTED]**, we will be able to pay dividends in foreign currencies without prior approval from the SAFE by complying with certain procedural requirements. However, there is no assurance that these foreign exchange policies regarding payment of dividends in foreign currencies will continue in the future. In addition, any insufficiency of foreign exchange may restrict our ability to pay dividend to Shareholders or to satisfy any other foreign exchange requirements, capitalize our capital expenditure plans, and even our results of operations, financial performance and business prospects may be affected.

We could be subject to changes in our tax rates, the adoption of new local or overseas tax legislation or exposure to additional tax liabilities.

The PRC Enterprise Income Tax ("**EIT**") Law imposes a tax rate of 25% on PRC resident business enterprises. We were entitled to preferential corporate income tax rate of 15% during the Track Record Period, as we were approved as high-tech enterprises. To the extent there are any changes in the laws and regulations governing preferential tax treatment, or increases in our effective tax rate due to any other reasons, our tax liability would increase correspondingly. In addition, the PRC authorities

may amend or restate regulations on income, withholding, value-added, and other taxes. Non-compliance with Chinese mainland tax laws and regulations may also result in penalties or fines imposed by relevant tax authorities. Adjustments or changes to Chinese mainland tax laws and regulations and tax penalties or fines could affect our businesses, financial condition and results of operations.

We also operate in countries and regions overseas and are subject to various taxes. Due to the fact that the tax environment and legal framework can vary significantly across jurisdictions and that regulations regarding various taxes, including but not limited to corporate income tax and import duties, are highly complex, our overseas operations and expansion may expose us to risks associated with overseas tax laws, regulations and policies. Additionally, as we sell our robotic solutions to various non-domestic markets, the intricacies of import duty regulations can lead to disputes when exporting products, as interpretations and applications of such rules may differ between countries. In such cases, we will be subject to fines or other penalties, which may not always have merit. Due to economic and political conditions, tax rates in various jurisdictions may be subject to significant change. Our effective tax rates could be affected by changes in the mix of earnings in countries with differing statutory tax rates, changes in the valuation of deferred tax assets and liabilities, or changes in tax laws or their interpretation. Dealing with such regulatory complexities and changes may require us to divert more managerial and financial resources, which in turn could affect our results of operations.

We are also subject to the examination of our tax returns and other tax matters by local and overseas tax authorities and governmental bodies. We regularly assess the likelihood of an adverse outcome resulting from these examinations to determine the adequacy of our provision for taxes. There can be no assurance as to the outcome of these examinations. If our effective tax rates were to increase, or if the ultimate determination of our taxes owed is for an amount in excess of amounts previously accrued, our financial condition, operating results and cash flows could be adversely affected.

We are a PRC enterprise and we are subject to PRC tax on our global income, and any gains on the sales of our H Shares by investors and dividends paid to investors on our H Shares may be subject to PRC tax.

Under the current PRC tax laws and regulations, non-PRC resident individuals and non-PRC resident enterprises are subject to different tax obligations with respect to the dividends paid to them by us and the gains realized upon the sale or other disposition of H Shares.

Non-PRC resident individuals are required to pay PRC individual income tax at a 20% rate for the income derived in China under the Individual Income Tax Law of the PRC (《中華人民共和國個人所得税法》 and its implementation guidelines. Accordingly, we are required to withhold such tax from dividend payments, unless applicable tax treaties between China and the jurisdiction in which the foreign individual resides reduce or provide an exemption for the relevant tax obligations. However, pursuant to the Circular on Certain Policy Questions Concerning Individual Income Tax (《財政部、國家税務總局關於個人所得税若干政策問題的通知》) (Cai Shui Zi [1994] No. 020) issued by the Ministry of Finance of the PRC (中華人民共和國財政部) (the "**MOF**") and the State Taxation Administration of the PRC (中華人民共和國國家税務總局) (the "**SAT**") on May 13, 1994, the income gained by individual foreigners from dividends and bonuses of enterprises with foreign investment are exempted from individual income tax for the time being. In addition, under the Individual Income Tax Law of the PRC and its implementation regulations, non-PRC resident individual holders of H Shares are subject to individual income tax at a rate of 20% on gains realized upon the sale or other disposition of H Shares. However, pursuant to the Circular of Declaring that Individual Income Tax Continues to be Exempted over Income of Individuals from the Transfer of Shares (《關於個人轉讓股票

所得繼續暫免徵收個人所得税的通知》)(Cai Shui Zi [1998] No. 61) issued by the MOF and the SAT on March 30, 1998, from January 1, 1997, the income of individuals from the transfer of the shares of listed enterprises continues to be exempted from individual income tax.

As of the Latest Practicable Date, no aforesaid provisions have expressly provided that individual income tax shall be levied on non-PRC resident individual holders on the transfer of shares in PRC resident enterprises listed on overseas stock exchanges, and to our knowledge, no such individual income tax was levied by PRC tax authorities in practice. However, there is no assurance that the PRC tax authorities will not change these practices which could result in levying income tax on non-PRC resident individual holders on gains from the sale of H Shares.

For non-PRC resident enterprises that do not have establishments or premises in China, and for those that have establishments or premises in China but whose income is not related to such establishments or premises, under the PRC EIT Law and its implementation regulations, dividends paid by us and gains realized by such foreign enterprises upon the sale or other disposition of H Shares are subject to PRC EIT at a 10% rate. In accordance with the Circular on Issues Relating to Withholding of Enterprise Income Tax by PRC Resident Enterprises on Dividends Paid to Overseas Non-PRC Resident Enterprise Shareholders of H Shares (《關於中國居民企業向境外H股非居民企業股東派發股息代扣代繳企業所得税有關問題的通知》) (Guo Shui Han [2008] No. 897) issued by SAT on November 6, 2008, the withholding tax rate for dividends payable to non-PRC resident enterprise holders of H Shares will be 10% and we intend to withhold tax at a rate of 10% from dividends paid to non-PRC resident enterprise holders of our H Shares (including **[REDACTED]**). Non-PRC resident enterprises that are entitled to be taxed at a reduced rate under an applicable income tax treaty or arrangement will be required to apply to the PRC tax authorities for a refund of any amount withheld in excess of the applicable treaty rate, and payment of such refund will be subject to the PRC tax authorities' approval.

The applicable PRC tax laws and regulations, as well as the interpretation and application of existing applicable PRC tax laws and regulations may be evolving and subject to change. New taxes may be imposed which may materially and adversely affect the value of your investment in our H Shares.

Payment of dividends is subject to restrictions under PRC law.

Under PRC law, dividends may be paid only out of distributable profit, for which the PRC laws do not specify the applicable accounting principles. Distributable profit is our profit as determined under PRC GAAP or HKFRS Accounting Standards, less any recovery of accumulated losses and appropriations to statutory and other reserves that we are required to make. We may not have sufficient or any distributable profit to enable us to make dividend distributions to our Shareholders, including in years in which we are profitable. Any distributable profit not distributed in a given year is retained and available for distribution in subsequent years. According to the Company Law of the PRC, after making up losses and appropriation of statutory reserves, we may distribute after-tax profits.

In addition, we are required to comply with the dividend distribution rules prescribed by the PRC regulatory authorities when determining our dividend payout ratios. The PRC regulatory authorities may further amend the dividend distribution rules for listed companies in the future, which may significantly affect the amount of capital available to support the development and growth of our business.

Moreover, as the calculation of distributable profits under PRC GAAP is different from the calculation under HKFRS Accounting Standards in certain respects, our subsidiaries may not have distributable profits as determined under PRC GAAP, even if they have profits for that year as

determined under HKFRS Accounting Standards, or vice versa. Accordingly, we may not receive sufficient distributions from our subsidiaries. Failure by our subsidiaries to pay dividends to us could have a negative impact on our cash flows and our ability to make dividend distributions to our Shareholders in the future, including those periods in which our financial statements indicate that our operations have been profitable.

RISKS RELATING TO THE [REDACTED] AND OUR SHARES

There has been no prior public market for our H Shares and the liquidity and market price of our H Shares may be volatile.

Prior to the completion of the **[REDACTED]**, there has been no public market for our H Shares. There can be no guarantee that an active **[REDACTED]** market for our H Shares will develop or be sustained after the completion of the **[REDACTED]**. The **[REDACTED]** may not be indicative of the price at which our Shares will be traded following the completion of the **[REDACTED]**. The market price of our Shares may drop below the **[REDACTED]** at any time after completion of the **[REDACTED]**.

The [REDACTED] of our H Shares may be volatile, which could result in substantial losses to you.

The **[REDACTED]** of our H Shares may be volatile and could fluctuate widely in response to factors beyond our control. In particular, the performance and fluctuation of the market prices of other companies with business operations located mainly in Chinese mainland that have listed their securities in Hong Kong may affect the volatility in the price of and **[REDACTED]** volumes for our H Shares. A number of Chinese mainland-based companies have listed their securities, and some are in the process of preparing for listing their securities, in Hong Kong. The share price of some of these companies have experienced significant volatility, including significant price declines after their initial public offerings. The trading performances of the securities of these companies at the time of or after their offerings may affect the overall investor sentiment towards Chinese mainland-based companies listed in Hong Kong and consequently may impact the trading performance of our H Shares. Pursuant to the applicable PRC law, within one year following the **[REDACTED]**, all existing Shareholders (including the Pre-**[REDACTED]** Investors) could not dispose of any of the Shares held by them. Due to such lock-up requirement, the liquidity and trading volume of the H Shares in the short-term following the **[REDACTED]** may be significantly affected. These factors may significantly affect the market price and volatility of our H Shares, regardless of our actual operating performance.

Future sales or perceived sales of substantial amounts of our H Shares in the public market could have a material and adverse effect on the price of our H Shares and our ability to raise additional capital in the future.

The market price of our H Shares could decline as a result of future sales of a substantial number of our H Shares or other securities relating to our H Shares in the public market, the issuance of new shares or other securities, or the perception that such sales or issuances may occur. Future sales, or perceived sales, of substantial amounts of our securities, including any future offerings, could also materially and adversely affect our ability to raise capital at a specific time and on terms favorable to us. In addition, our Shareholders may experience dilution in their holdings if we issue more securities in the future. New shares or shares-linked securities issued by us may also confer rights and privileges that take priority over those conferred by the H Shares.

You will incur immediate and substantial dilution and may experience further dilution if we issue additional Shares in the future.

The **[REDACTED]** of our H Shares is higher than the net tangible asset value per Share immediately prior to the **[REDACTED]**. Therefore, purchasers of our H Shares in the **[REDACTED]** will experience an immediate dilution in **[REDACTED]** consolidated net tangible asset value. To expand our business, we may consider **[REDACTED]** and **[REDACTED]** additional shares in the future. Purchasers of the **[REDACTED]** may experience dilution in the net tangible asset value per Share of their Shares if we issue additional shares in the future at a price that is lower than the net tangible asset value per Share at that time.

There can be no assurance that we will declare and distribute any dividends in the future.

As a holding company, our ability to declare future dividends will depend on the availability of dividends, if any, received from us and our subsidiaries. Under PRC law and the constitutional documents of our PRC operating subsidiaries, dividends may be paid only out of distributable profits, which refer to after-tax profits as determined under PRC GAAP less any recovery of accumulated losses and required allocations to statutory capital reserve funds. Any distributable profits that are not distributed in a given year are retained and become available for distribution in subsequent years. The calculation of our distributable profits under PRC GAAP differs in many aspects from the calculation under HKFRSs. In addition, as stipulated by our Articles, distributable profits are recognized as our after-tax profit determined under PRC GAAP or HKFRSs, whichever is lower, less any recovery of accumulated losses and appropriations to statutory and other reserves that we are required to make. As a result, our Company and our subsidiaries may not be able to pay a dividend in a given year if our Company or our subsidiaries do not have distributable profits as determined under PRC GAAP even if they have profits as determined under HKFRSs. See "Financial Information — Dividends" for details of our dividend policy.

There can be no assurance that we will declare and distribute any dividends in the future. The declaration, payment and amount of any future dividends are subject to the discretion of our Directors, after taking into account our results of operations, financial conditions, cash requirements and availability, and other factors as they may deem relevant, and subject to the approval at a Shareholders' meeting. We may not have sufficient or any profits to enable us to distribute dividends to our Shareholders in the future, even if our financial statements indicate that our operations have been profitable.

Our Controlling Shareholders have significant influence over us and their interests may not always be aligned with the interest of our other Shareholders.

Immediately upon the completion of the **[REDACTED]**, our Controlling Shareholders will continue to have significant influence over our business and affairs, including decisions of mergers and acquisition, disposition of assets, issuance of additional Shares or other equity securities, timing and amount of dividend payments, and our management. There may be a conflict between the Controlling Shareholders, interests and your interests. In addition, without the approval of the Controlling Shareholders, we could be prevented from entering into transactions that could be beneficial to us. This concentration of ownership may also discourage, delay or prevent a change in control of our Company, which could deprive our Shareholders of an opportunity to receive a premium for the Shares as part of a sale of our Company and may significantly reduce the price of our H Shares.

Certain statistics contained in this document are derived from a third-party report and publicly available official sources, and information and statistics from official governments have not been independently verified.

This document, particularly the section headed "Industry Overview", contains information and statistics in China and internationally. Such information and statistics have been derived from various official governments and other publications and from a third-party report commissioned by us. We believe that the sources of such information are appropriate and we have taken reasonable care in extracting and reproducing such information. The information and statistics from official governments have not been independently verified by us, the Joint Sponsors, the **[REDACTED]**, the **[REDACTED]**, the **[REDACTED]**, any of our or their respective directors, officers or representatives or any other persons or parties involved in the **[REDACTED]**, and no representation is given as to their accuracy. You should therefore not place undue reliance on such information. In any event, you should consider carefully the importance placed on such information or statistics.

You should read the entire document carefully and should not rely on any information contained in press articles or other media regarding us and the [REDACTED].

We strongly caution you not to rely on any information contained in press articles or other media regarding us and the **[REDACTED]**. Prior to the publication of this document, there has been press and media coverage regarding us, our business, our industry and the **[REDACTED]**. There may be additional press and media coverage regarding us, our business, our industry and the **[REDACTED]** subsequent to the date of this document but prior to the completion of the **[REDACTED]**. Such press and media coverage may include references to certain information that does not appear in this document, including certain operating and financial information and projections, valuations and other information. None of us or any other person involved in the **[REDACTED]** has authorized the disclosure of any such information in the press or media coverage and none of us accepts any responsibility for any such press or media coverage or the accuracy or completeness of any such information or publication. We make no representation as to the appropriateness, accuracy, completeness or reliability of any such information or publication. To the extent that any such information is inconsistent or conflicts with the information contained in this document, we disclaim responsibility for it, and you should not rely on such information.

In preparation for the **[REDACTED]**, we have applied to the Stock Exchange for the following waivers from strict compliance with the relevant provisions of the Listing Rules.

WAIVER IN RESPECT OF MANAGEMENT PRESENCE IN HONG KONG

According to Rule 8.12 of the Listing Rules, all applicants applying for a primary listing on the Stock Exchange must have sufficient management presence in Hong Kong. This would normally mean that at least two of the applicant's executive directors must be ordinarily resident in Hong Kong.

Our Company's business operations and assets are primarily located outside Hong Kong. Our Company's executive Directors are based in the PRC as our Board believes it is more effective and efficient for our executive Directors to be based in a location where our substantial operations are located. Our Company therefore does not, and in the near future will not, maintain management presence in Hong Kong.

Accordingly, pursuant to Rule 19A.15 of the Listing Rules, we have applied to the Stock Exchange for, and the Stock Exchange has granted us, a waiver from strict compliance with the requirements under Rule 8.12 of the Listing Rules, provided that our Company implements the following arrangements:

(1) We have appointed Mr. Wang, our executive Director, and Ms. Ling Qian ("**Ms. Ling**"), our joint company secretary as our authorized representatives for the purpose of Rule 3.05 of the Listing Rules. They will serve as the principal channel of communication with the Stock Exchange and make themselves readily available to communicate with the Stock Exchange. Each of Mr. Wang and Ms. Ling can be readily contactable by phone and email to deal promptly with enquiries from the Stock Exchange, and will also be available to meet with the Stock Exchange to discuss any matters within a reasonable period of time upon the request of the Stock Exchange. The contact details of our authorized representatives have been provided to the Stock Exchange.

(2) All Directors who are not ordinarily resident in Hong Kong possess or can apply for valid travel documents to visit Hong Kong and can meet with the Stock Exchange within a reasonable period. In addition, each Director has provided his/her contact details, including phone numbers and email addresses, to our authorized representatives and to the Stock Exchange. In the event that a Director expects to be traveling or otherwise be out of office, he/she will provide the phone number of the place of his/her accommodation or other contact information to our authorized representatives to ensure that each of our authorized representatives will be able to contact all our Directors promptly at all times if and when the Stock Exchange wishes to contact our Directors.

(3) We have appointed Somerley Capital Limited as our compliance advisor in accordance with Rule 3A.19 of the Listing Rules, which will serve as an additional and alternative channel of communication with the Stock Exchange in addition to our authorized representatives. The compliance advisor will have reasonable access, at all times during the term of their appointment, to our authorized representatives, Directors and other officers of our Company, participate in the communication between the Stock Exchange and our Company and answer inquiries from the Stock Exchange.

(4) Any meeting between the Stock Exchange and our Directors will be arranged through our authorized representatives or our compliance advisor or directly with our Directors within a reasonable time frame. We will inform the Stock Exchange promptly in respect of any changes in our authorized representatives and our compliance advisor.

(5) We intend to retain our Hong Kong legal advisors on on-going compliance requirements, any amendment or supplement to and other issues arising under the Listing Rules and other applicable laws and regulations in Hong Kong after the **[REDACTED]**.

WAIVER IN RESPECT OF JOINT COMPANY SECRETARIES

Pursuant to Rules 3.28 and 8.17 of the Listing Rules, we must appoint a company secretary who possesses the necessary academic or professional qualifications or relevant experience, and is therefore capable to discharge the functions of the company secretary. Note 1 to Rule 3.28 of the Listing Rules provides that the Stock Exchange considers the following academic or professional qualifications to be acceptable:

(1) a member of The Hong Kong Chartered Governance Institute;

(2) a solicitor or a barrister as defined in the Legal Practitioners Ordinance (Chapter 159 of the Laws of Hong Kong); and

(3) a certified public accountant as defined in the Professional Accountants Ordinance (Chapter 50 of the Laws of Hong Kong).

Note 2 to Rule 3.28 of the Listing Rules further sets out the factors that the Stock Exchange will consider in assessing an individual's "relevant experience":

(1) length of employment with the issuer and other issuers and the roles he/she has undertaken;

(2) familiarity with the Listing Rules and other relevant laws and regulations including the SFO, the Companies Ordinance, the Companies (Winding Up and Miscellaneous Provisions) Ordinance and the Takeovers Code;

(3) relevant training taken and/or to be taken in addition to the minimum requirement under Rule 3.29 of the Listing Rules; and

(4) professional qualifications in other jurisdictions.

Our Company has appointed Ms. Ling as one of our joint company secretaries. Ms. Ling joined our Group in June 2025 and possesses relevant understanding and knowledge relating to the business operations and corporate culture of our Group. In her capacity as the vice president and Board secretary, Ms. Ling has actively participated in the preparation of the application for the **[REDACTED]** and possesses experience in matters relating to our Board and corporate governance of our Company. Having considered Ms. Ling's expertise and backgrounds, our Directors consider that Ms. Ling is capable of discharging the functions of a company secretary and is suitable to perform such role.

As Ms. Ling currently does not possess the qualifications under Rule 3.28 of the Listing Rules, and may not be able to fulfill the requirements of the Listing Rules on her own, we have appointed Ms. Li Ching Yi (李菁怡) (ACIS, ACS) ("**Ms. Li**"), a Chartered Secretary, a Chartered Governance Professional and a member of both The Hong Kong Chartered Governance Institute and The Chartered Governance Institute in the United Kingdom, who is qualified under Rule 3.28 of the Listing Rules to act as the other company secretary and to work closely with and provide assistance to Ms. Ling for an initial period of three years commencing from the **[REDACTED]**.

The following arrangements have been, or will be, put in place to assist Ms. Ling in acquiring the qualifications and experience as the joint company secretaries of our Company required under Rules 3.28 and 8.17 of the Listing Rules:

(1) In the course of the preparation of the application for the **[REDACTED]**, Ms. Ling has been provided with a memorandum and has attended a training seminar on the respective obligations of our Directors and senior management and our Company under the relevant Hong Kong laws and the Listing Rules provided by our Hong Kong legal advisors.

(2) In addition to the minimum training requirements under Rule 3.29 of the Listing Rules, our Company will ensure that Ms. Ling continues to have access to relevant training and support to familiarize herself with the Listing Rules and the duties of a company secretary of an issuer **[REDACTED]** on the Stock Exchange, and to receive updates on the latest changes to the applicable Hong Kong laws, regulations and the Listing Rules. Furthermore, our Company will ensure that Ms. Ling and Ms. Li will seek and have access to the advice from our Hong Kong legal advisors and other professional advisors as and when required.

(3) Ms. Li will assist Ms. Ling to acquire the "relevant experience" as required under Note 2 to Rule 3.28 of the Listing Rules and to discharge their duties as company secretaries. Ms. Ling will be assisted by Ms. Li for an initial period of three years commencing from the **[REDACTED]**. As part of the arrangement, Ms. Li will act as one of the joint company secretaries and communicate regularly with Ms. Ling on matters relating to corporate governance, the Listing Rules as well as other laws and regulations which are relevant to our Company. She will also assist Ms. Ling in organizing Board meetings and Shareholders' meetings as well as other matters of our Company which are incidental to the duties of a company secretary.

(4) Our Company has appointed the compliance advisor pursuant to Rule 3A.19 of the Listing Rules, which will act as our additional channel of communication with the Stock Exchange and provide professional guidance and advice to us and our joint company secretaries as to compliance with the Listing Rules and all other applicable laws and regulations.

We have applied to the Stock Exchange for, and the Stock Exchange has granted us, a waiver from strict compliance with the requirements of Rules 3.28 and 8.17 of the Listing Rules. Such waiver will be revoked immediately if and when Ms. Li ceases to provide such assistance to Ms. Ling as the joint company secretary or ceases to meet the requirements under Rule 3.28 of the Listing Rules, or if there are material breaches of the Listing Rules by our Company during the three-year period from the **[REDACTED]**. Before the end of the three-year period, we will demonstrate and seek the Stock Exchange's confirmation that Ms. Ling, having had the benefit of Ms. Li's assistance for three years, has acquired the relevant experience within the meaning of Rule 3.28 of the Listing Rules so that a further waiver will not be necessary.

See "Directors and Senior Management" for the biographical details of Ms. Ling and Ms. Li.

OVERVIEW OF GLOBAL INDUSTRIAL INTELLIGENT MOBILE ROBOTIC SOLUTION MARKET

Industrial Automation

As the cornerstone of modern industrialization, industrial automation has undergone several critical stages: from the initial mechanical collaboration between manual labor and basic machinery, to the technological foundation laid by electrified automatic control, to the transformational innovation of digitalized flexible production, and finally to the paradigm breakthrough driven by AI in smart manufacturing today. Each technological leap has been accompanied by exponential growth in productivity.

Currently, with the deep integration and application of cutting-edge technologies such as AI, big data, edge computing, and digital twins, factory production systems are now capable of self-learning and optimizing both production processes and resource allocation. Breakthroughs in embodied intelligence have accelerated the large-scale deployment of industrial robots, transitioning automation from fixed workflows to flexible collaboration that can adapt to varied product demands and eventually distill into industry-grade general solutions. The increasingly interconnected end-to-end value chain is driving the pivotal shift from traditional manufacturing to smart manufacturing.

The modern factory production system is a tightly integrated network spanning raw material supply, production, storage, and distribution. Its efficient operation is essential for enterprise growth, ensuring production continuity and providing a foundation for competitiveness and sustainable development. However, managing such a complex system through automation is challenging due to its complexity, variability, time constraints, and interoperability requirements. Traditional models reveal inefficiencies, low reliability, and high labor costs, hindering industrial upgrading:

- **Low production efficiency and high hidden costs due to labor dependence**: Approximately 80% of manufacturing defects are caused by human error, and around 20% of unplanned downtime is also attributable to such errors. Issues like material mismatches and production line interruptions incur significant hidden costs, directly undermining the competitiveness.

- **Complex production environments**: Factory operations involve the handling, storage, and management of various materials that exhibit distinct physical properties and storage requirements, compounded by rapid production cycles and changing material demands. Additionally, factory layouts are often compact, necessitating efficient material handling and storage within limited spaces.

- **Frequent changes in production plans**: Production plans often need to be adjusted due to fluctuations in market demand, order changes, or equipment failures, requiring the production system to respond quickly and adjust flexibly in real time.

- **High time-sensitivity of material supply**: The production process imposes extremely strict time requirements on material supply, with delays in any segment risking production line stoppages, making on-time delivery critical.

- **Poor compatibility among different types of automation equipment**: This stems from factors such as inconsistent technical standards, rapid equipment iteration, limited collaboration among manufacturers, and incompatible software systems. As a result, building integrated automation systems is often difficult, leading to suboptimal system performance, higher operational costs, and increased maintenance complexity.

- **High demands for cross-departmental collaboration**: Factory operations are closely linked to multiple functions such as production, procurement and sales, necessitating close collaboration among departments to achieve real-time information sharing and seamless process integration.

Industrial Intelligent Mobile Robotic Solution

An intelligent robot refers to a robot that exhibits intelligent behavior by using technologies such as AI, machine learning and computer vision to simulate human cognition and physical coordination, as defined in the 2023 White Paper on Intelligent Robot Technology and Industry Development. In terms of sales revenue, the size of the global intelligent robotic solution market increased from RMB130.2 billion in 2021 to RMB307.4 billion in 2025, representing a CAGR of 24.0% from 2021 to 2025, and is projected to reach RMB850.0 billion by 2030, representing a CAGR of 24.6% from 2026 to 2030. Industrial intelligent robots, primarily intelligent mobile robots and intelligent collaborative robots, are increasingly deployed in manufacturing environments to execute tasks autonomously. Based on the market positioning and technical characteristics, industrial intelligent robots differ fundamentally from other intelligent robot categories such as commercial service robots, warehousing and logistics robots and educational robots, in both application scenarios and product design. Therefore, industrial intelligent robots and the others are mutually exclusive from each other. Primarily deployed in manufacturing processes, the core value of industrial intelligent robotic solutions delivering high precision and reliability. In terms of sales revenue, the size of the global industrial intelligent robotic solution market increased from RMB10.0 billion in 2021 to RMB28.6 billion in 2025, representing a CAGR of 29.9% from 2021 to 2025, and is projected to reach RMB198.5 billion by 2030, representing a CAGR of 48.6% from 2026 to 2030.

Driven by the dual imperatives of industrial automation upgrades and logistics complexity, industrial intelligent mobile robots have emerged as a transformative force. Industrial intelligent mobile robots refer to intelligent robots equipped with autonomous navigation and mobility capabilities in industrial settings, capable of independently performing tasks such as path planning, obstacle avoidance, and material handling. Leveraging their capabilities in autonomous navigation, flexible deployment, and intelligent operation, industrial intelligent mobile robots precisely address the pressing needs of factories for efficiency enhancement, flexible production, product quality assurance, and digital-intelligent management. Through a closed-loop capability of "autonomous perception-real-time decision-making-flexible execution," industrial intelligent mobile robots not only overcome the rigid bottlenecks of traditional production management but also integrate with technologies such as AGI, digital twins, and 5G to propel industrial intelligent applications from "device automation" to "system intelligence." Looking ahead, with further breakthroughs in embodied intelligence and other technologies, industrial intelligent mobile robots are poised to become the core infrastructure of future industry.

The industrial intelligent robotics industry chain encompasses a complete closed loop from component manufacturing to system integration and end-use application deployment, characterized by high technological intensity and system complexity. There are key players and stakeholders at each level of the industry chain in the industrial intelligent mobile robotic solution industry. At the upstream level, component suppliers provide hardware and other raw materials. In the midstream, industrial intelligent mobile robotic solution providers and integrators emerge as key players, collaboratively addressing industrial automation needs. In the downstream, manufacturers across various industries are adopting industrial intelligent mobile robotic solutions. In particular, industrial intelligent mobile robotic solution providers focus on robot R&D, manufacturing, and critical software development, efficiently integrating resources from both ends of the supply chain while driving technological innovation, whereas integrators do not manufacture robots directly. Located in the midstream of the industrial intelligent robotics industry as industrial intelligent mobile robotic solution provider, we leverage our capabilities in the design, research and development, and manufacturing of industrial intelligent mobile robots to achieve a closed loop from key technologies to large-scale implementation. We deliver industrial intelligent mobile robotic products and solutions to major industrial clients in sectors such as 3C, automotive, and semiconductor industries.

Downstream Demand and Application Scenarios

The industrial intelligent mobile robotic solution, defined based on industry-accepted standards according to CIC, is an automated solution that centers around industrial intelligent mobile robots and integrates software systems, algorithms and supporting facilities, targeting the needs of material handling, task execution and other tasks in industrial scenarios. It is centered around industrial intelligent mobile robots and integrates robotic systems, task scheduling management systems, relevant software algorithms, and supporting facilities. Industrial intelligent mobile robotic solutions are widely used in core industrial fields such as 3C, automotive, and semiconductor. Discrete high-end manufacturing requires automation systems to handle diverse products, short life cycles, and complex processes, demanding dynamic reconfiguration. Traditional rigid production systems struggle to support such high-frequency changes, whereas industrial intelligent mobile robots, through digital twin map and real-time scheduling algorithms, enable rapid logistical path switching to ensure synchronization between production and material supply.

- **3C**: In 2025, the global sales volume of 3C electronic products, which encompass mobile phones, tablets, computers, XR devices and other wearables, exceeded 2.5 billion units. This significant figure unequivocally highlights the central role that consumer electronics play in both global daily life and industrial production. Propelled by a fresh wave of technological advancements that are stimulating replacement cycles among consumers, coupled with the continuous emergence of new product categories such as XR devices, sales are forecasted to climb further, reaching around 20 million units by 2030, with a CAGR of around 20% from 2026 to 2030. Meanwhile, as the scale of AI applications is expanding rapidly, global AI chip shipments increased from over 1 million units in 2020 to more than 14 million units in 2025, achieving a CAGR of approximately 50% during this period, and is expected to exceed 43 million units by 2030, thereby fueling the robust growth of AI servers. Consumer electronics manufacturing demands high flexibility and rapid line changes for precision components and fast iterations. Industrial intelligent mobile robots ensure timely material supply by dynamically adjusting handling routes and procedures, efficiently supporting production and assembly.

- **Automotive**: In 2025, the global production volume of automobiles, including both passenger vehicles and commercial vehicles, attained 99 million units. Benefiting from the ongoing transition towards new energy vehicles, the increasing integration of autonomous driving technologies, and the expanding market demand in emerging markets, automobile production is expected to continue its upward trajectory, reaching 111 million units by 2030, with a CAGR of 2.5% from 2026 to 2030. Despite its massive scale, the automotive industry is characterized by rapid model iterations and numerous heavy-load process requirements, with significant variations in component specifications, dimensions, and weights across different models. Despite its scale, the automotive industry features rapid model iterations and diverse component specifications. Mixed-model production lines are widely adopted, requiring robots with strong payload capacity and flexible, high-frequency scheduling. Industrial intelligent mobile robots enable precise and timely delivery of components to designated workstations in accordance with production plans for different vehicle models, ensuring stable line operations and enhancing overall production efficiency.

- **Semiconductor**: From cloud computing to edge devices, the surge in AI computing power demand is driving the development of high-performance chips and promoting the strong expansion of global semiconductor manufacturing capacity. In 2025, the global production volume of integrated circuits surpassed 1,500 billion units. As a cornerstone technology underpinning smart devices, automotive electronics and AI computing capabilities, the semiconductor industry is witnessing robust demand growth. Production is projected to escalate significantly, approaching 2,700 billion units by 2030 with a CAGR of 11.4% from 2026 to 2030. Amid this growth trajectory, automation solutions are increasingly being integrated into more application segments within the semiconductor manufacturing process, notably including advanced packaging upgrades. Semiconductor manufacturing is a typical industry with high-precision and high-cleanliness requirements. Processes such as wafer handling and photolithography impose strict requirements on the accuracy, safety and timeliness of material transfer. Wafers are highly fragile and vibration-sensitive, and minor disturbances may result in defects, yield loss and reduced profitability. Industrial intelligent mobile robots, equipped with high-precision sensors, advanced motion control and cleanroom-compatible designs, enable accurate and stable material handling, ensuring safe inter-process transfers and reliable production continuity.

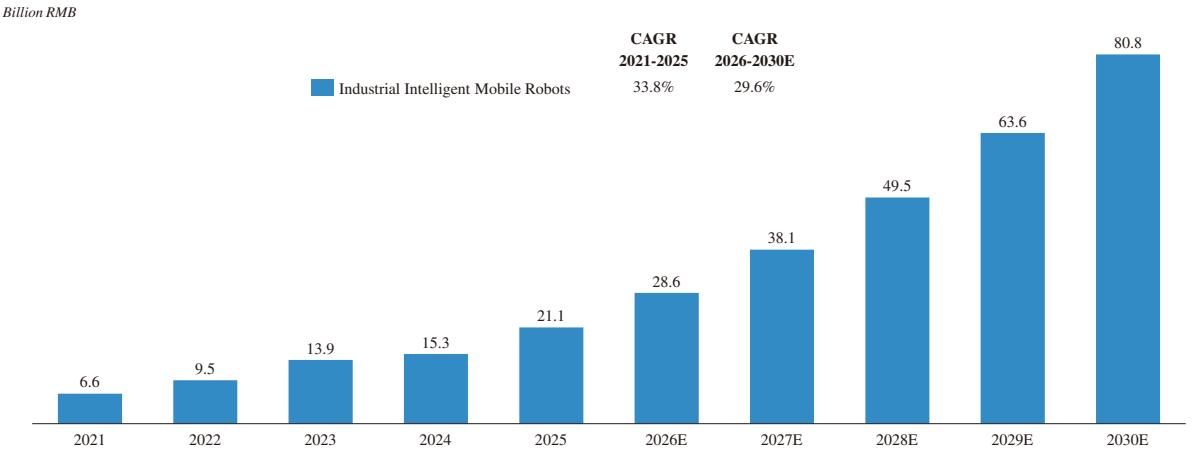

Market Size of Global Industrial Intelligent Mobile Robotic Solution

As technological advancements accelerate and industrial applications expand, industrial intelligent mobile robots are evolving toward higher intelligence, more flexible deployment, and broader scalability. In terms of sales volume[1], the global market size of the industrial intelligent mobile robotic solutions grew from 22.7 thousand units in 2021 to 87.0 thousand units in 2025, representing a CAGR of 39.9% from 2021 to 2025. The market is projected to expand further to reach 372.6 thousand units by 2030, representing a CAGR of 32.2% from 2026 to 2030.

The global market for industrial intelligent mobile robotic solutions expanded from RMB6.6 billion in 2021 to RMB21.1 billion in 2025, reflecting a CAGR of 33.8%. Industrial intelligent robotic solutions are becoming a critical driver for enterprise transformation and upgrading, while technological progress acts as a powerful catalyst for continuous innovation. As adoption accelerates, the global market for industrial intelligent mobile robotic solutions is projected to reach RMB80.8 billion by 2030, with a CAGR of 29.6% from 2026 to 2030.

1. Sales volume refers to robotic units sold of global industrial intelligent mobile robotic solutions.

Global industrial intelligent mobile robotic solution market size, in terms of sales revenue, 2021-2030E

Source: Mobile Robot and AGV/AMR Industry Alliance, CIC

China, together with the broader Asia-Pacific region, represents a critical hub for global industrial development and constitutes one of the principal application markets for industrial intelligent mobile robotic solutions. The Chinese market size of the industrial intelligent mobile robotic solutions grew from 12.4 thousand units in 2021 to 50.7 thousand units in 2025, representing a CAGR of 42.2% from 2021 to 2025. In terms of sales volume of industrial intelligent mobile robotic solutions, China accounted for around 60% of the global industrial intelligent mobile robotic solution market in 2025. The market is projected to expand further to reach 178.2 thousand units by 2030, representing a CAGR of 28.3% from 2026 to 2030.

Market Drivers

The following are the key market drivers:

- **Smart manufacturing system upgrades**: Industrial intelligent mobile robots drive the transformation of smart manufacturing through synergistic advancements in hardware and software, emerging as a core force in industrial upgrading.

- **Global industrial growth, accelerated supply chain restructuring, and robust downstream demand**: Industries such as 3C, automotive, and semiconductor, driven by demands for flexible, stable, and high-quality production, are propelling intelligent mobile robots as a critical tool for industrial advancement. Meanwhile, global supply chains are restructuring, with enterprises diversifying production and supplier networks to enhance resilience. This drives demand for digital transformation and wider adoption of industrial intelligent mobile robots.

- **Rising Labor Costs**: With aging populations and evolving economic landscapes, labor costs continue to raise up. For instance, in China, a major manufacturing hub, hourly labor costs in the manufacturing sector have surged more than tenfold since the early 2000s. Against this backdrop, manufacturers urgently need to explore innovative production solutions to adapt to demographic shifts and cost pressures, ensuring production stability and competitiveness.

- **Maturing supply chain and evolving robotic ecosystem**: Accelerated localization of key components has effectively reduced production costs, while standardized interfaces and protocols have improved system integration and collaboration, supporting large-scale deployment of industrial intelligent mobile robots. In 2025, global spending on industrial robotics reached approximately RMB160.0 billion, reflecting a substantial and expanding addressable market.

- **Strengthened policy support**: Chinese government has introduced a series of targeted initiatives to strengthen R&D, production, and application in the smart manufacturing and robotics sectors. For instance, the "14th Five-Year Plan" for the Development of Smart Manufacturing (《"十四五"智能製造發展規劃》), jointly issued by eight ministries including the Ministry of Industry and Information Technology ("**MIIT**"), calls for accelerating innovation and achieving technological breakthroughs in industrial robots, CNC machine tools, and other smart equipment, with an emphasis on enhancing core component capabilities and promoting industrial digital transformation. The core objective of these policies is to steer industrial sectors toward intelligent transformation. By vigorously advancing the development of new digital infrastructure such as 5G, the Industrial Internet, and cloud computing, a solid foundation has been laid for the large-scale deployment and efficient, collaborative operation of industrial intelligent mobile robots. These policies encourage enterprises to adopt integrated digital and intelligent solutions centered on robotics, aiming to fully enhance the innovation capability and competitiveness of the industrial production system through the deep integration of robotic technology with industrial scenarios. Similarly, the "14th Five-Year Plan" for the Development of the Robot Industry (《"十四五"機器人產業發展規劃》), jointly released by the Ministry of Industry and Information Technology and the National Development and Reform Commission of the PRC (中華人民共和國國家發展和改革委員會) (the "**NDRC**") and other departments, proposed to double the density of robots in China's manufacturing industry by 2025, and to develop a number of leading enterprises with international competitiveness. Meanwhile, the State Council of China released its Opinions on Deeply Implementing the "Artificial Intelligence Plus" Action, promoting the broad and deep integration of AI with all sectors and domains of the economy and society, and fostering a revolutionary leap in productivity and profound changes in production relations.

Market Trends

The following are the market trends:

- **Embodied intelligence robots expanding operational boundaries**: The deep integration of autonomous mobile chassis with manipulators forms a unified mobile-manipulation architecture, breaking the physical isolation of traditional automated equipment and enabling "one-stop" operations from material handling to assembly and processing. Leveraging integrated control technology, robots can adapt seamlessly to diverse production scenarios and task requirements through software upgrades, hardware module expansions, executing more complex and varied tasks with ease.

- **Swarm intelligence technology driving production model transformation and collaborative operations**: Industrial intelligent mobile robots of different types, brands, and generations achieve dynamic task allocation and resource coordination, significantly enhancing overall production efficiency and collaboration. As industry applications deepen, swarm intelligence systems continuously learn and evolve, integrating with more production equipment and systems to enable full-process intelligentization of manufacturing workflows.

- **Software & algorithms as core competencies**: Cutting-edge technologies such as VLA models, RL, and multimodal perception empower robots with autonomous decision-making capabilities. The widespread adoption of cloud-native architectures supports remote software iteration and online AI model training, propelling robots from "standalone intelligence" to "swarm intelligence." Integration with digital twin technology enables real-time mapping between the physical and digital worlds, optimizing task scheduling and fault prediction.

- **A new paradigm of industrial intelligence driven by massive data and scalable deployment of Industry-grade solutions**: Maturing dynamic factory simulation technologies create a synergistic loop between data and simulation, enabling robots to seamlessly integrate into production systems and support decision-making and optimization. Deep understanding and continuous learning of diverse production scenarios accelerate the emergence of industry-grade applications. Integrated software-hardware solutions fuse advanced algorithms with high-performance hardware, forming a highly integrated, stable, and reliable automated production system.

OVERVIEW OF GLOBAL INDUSTRIAL EMBODIED INTELLIGENCE ROBOTIC SOLUTION MARKET

Industrial Embodied Intelligence Robotic Solution

Under the empowerment of AGI, robots can autonomously comprehend tasks, plan paths, and collaborate across systems to execute operations. Compared to service or household environments, industrial settings offer clear process protocols, standardized data interfaces, and predictable physical constraints, reducing the complexity of AGI deployment. Additionally, industrial scenarios have accumulated vast operational data, enabling rapid algorithm iteration and safety validation, thereby accelerating the realization of AGI's "generalized intelligence" capabilities.

As industrial production demands increasingly diverse robot functionalities and scenario adaptability, single-structure robots are struggling to meet practical needs. Composite architectures integrate functional modules from different robot types, achieving optimized functionality. Building on industrial intelligent mobile robots, industrial embodied intelligence robots integrate collaborative arms to form a unified "mobility + manipulation" architecture, precisely addressing complex and dynamic operational demands and achieving comprehensive upgrades in scenario adaptability, entering an era of dynamic operations across multi-scenario and multi-station workflows.

Industrial embodied intelligence robots offer strong adaptability, mature technology, and cost-effectiveness. Prioritizing functionality over humanoid form, they autonomously handle tasks such as grasping, assembly, and inspection. Leveraging proven localization, navigation, and motion control technologies, they deliver precise, flexible operations. Compared with humanoid robots, their lower R&D complexity and mature supply chains enable faster commercialization, higher productivity, and reduced labor costs.

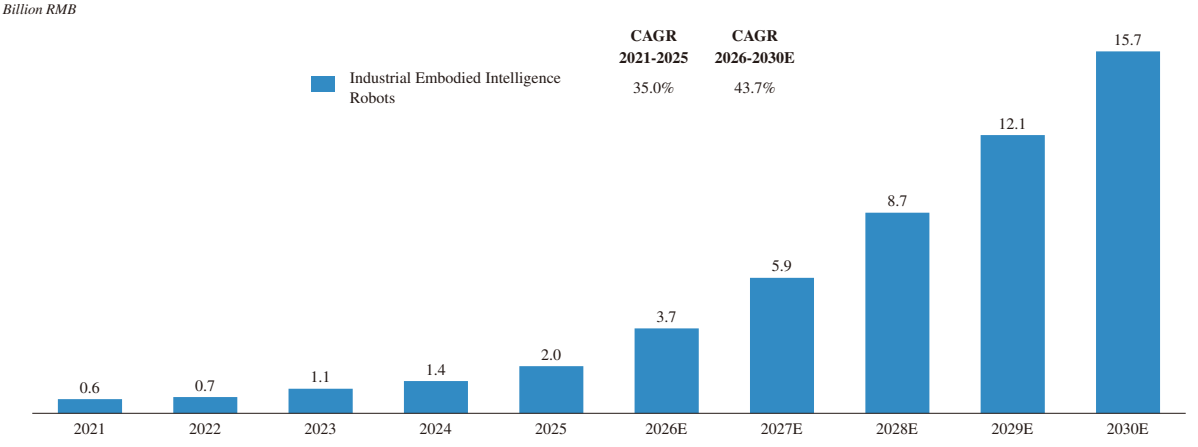

Industrial embodied intelligence robots, a subset of industrial intelligent mobile robots, comprise mobile platforms, manipulators (primarily collaborative arms), vision modules, and end-effectors. They combine the flexibility and autonomy of industrial intelligent mobile robots with the high-precision manipulation capabilities of collaborative robots. By leveraging multimodal perception fusion, end-to-end navigation, and large-scale models, these robots exhibit enhanced environmental interaction, balanced motion capabilities, and autonomous decision-making to improve generalization in industrial scenarios.

Market Size of Global Industrial Embodied Intelligence Robotic Solution

Industrial embodied intelligence robotic solutions, a subset of industrial intelligent mobile robotic solution and is defined based on industry-accepted standards according to CIC, refer to automated solution combining both "mobility" and "manipulation" capabilities, which centers around industrial embodied intelligence robots and integrates software systems, algorithms, and supporting facilities. Driven by continuous advancements in the hardware and software technologies of industrial embodied intelligence robots and expanding applications across industrial scenarios, the global market size of the industrial embodied intelligence robotic solutions grew from 1.3 thousand units in 2021 to 6.3 thousand units in 2025 in terms of sales volume, representing a CAGR of 49.2% from 2021 to 2025. By 2030, sales are expected to reach 54.7 thousand units, representing a CAGR of 48.0% from 2026 to 2030.

In terms of sales value, the global market size for industrial embodied intelligence robotic solutions surged from RMB0.6 billion in 2021 to RMB2.0 billion in 2025, representing a CAGR of 35.0% from 2021 to 2025. The maturation of robot hardware and software technologies, coupled with breakthroughs in swarm intelligence and collaborative scheduling, has accelerated the large-scale deployment of industrial embodied intelligence robots. The global market for these solutions is poised for rapid expansion, with projections indicating a further increase to RMB15.7 billion by 2030, representing a CAGR of 43.7% from 2026 to 2030.

Global Industrial Embodied Intelligence Robotic Solution Market Size, in terms of sales revenue, 2021-2030E

Source: Mobile Robot and AGV/AMR Industry Alliance, CIC

Market Drivers

The following are the key market drivers:

- **Core technology maturation**: The gradual refinement of technologies such as robotic mobile chassis, collaborative arms, navigation systems, and integrated control lays the foundation for large-scale deployment of industrial embodied intelligence robots. Continued advancements in large model technologies empower these robots with robust data processing and learning capabilities, enabling them to analyze complex environments with precision and efficiently respond to diverse task requirements.
- **Manufacturing flexibility demand**: By integrating both "mobility" and "manipulation" capabilities, industrial embodied intelligence robots can adapt seamlessly to dynamic factory layouts and evolving production processes, meeting the demands of multi-product, small-batch, and rapid production switching.

Market Trends

The following are the key market trends:

- **AGI-driven enhancement of generalization capabilities**: The integration of AI algorithms with multimodal perception technologies empowers industrial embodied intelligence robots to better adapt to unstructured industrial environments. Benefiting from the accumulation of real-world data across diverse scenarios and the efficient transfer of simulation-trained models to real-world tasks, VLA have matured and achieved practical deployment. Industrial embodied intelligence robots can not only interpret natural language commands and visual information to directly generate actionable instructions but also transfer learned knowledge and skills to new tasks or environments, significantly enhancing their versatility and application value.

- **Accelerated development efficiency for broader industrial penetration**: Leveraging AGI and the accumulation of multi-type datasets, extensive knowledge bases and algorithmic models have been constructed. Robot developers can utilize these pre-trained models for rapid secondary development and customized adjustments, substantially shortening development cycles. Meanwhile, by combining cloud-based training with on-premises deployment, robots can quickly adapt to the individualized needs of different factories, achieving precise "factory-specific" industrial application matching.

- **Large-scale deployment of industry-grade solutions driving industrial transformation**: Leading manufacturers, leveraging their deep expertise in industrial scenarios and hardware-software integration, have developed industry-grade integrated solutions that span the entire production ecosystem, from raw material handling, component processing, and product assembly to finished goods warehousing.

Competitive Landscape of Global Industrial Intelligent Mobile Robotic Solution Market

The global industrial intelligent mobile robotic solution industry is relatively fragmented. In terms of relevant robot units sold of global industrial intelligent mobile robotic solutions in 2025, the top five participants collectively account for 35.6% of the market share. In this highly competitive sector, our Company ranks among the global top five providers of industrial intelligent mobile robotic solutions by units sold in 2025, with a market share of 2.6%. Below is a summary of the leading five players in the global industrial intelligent mobile robotic solution market in terms of sales volume of global industrial intelligent mobile robotic solutions and market share in 2025:

Rank	Company	Sales volume	Market share
		(In thousand units)	
1	Company A[(1)]	15.0	17.3%
2	Company B[(2)]	7.4	8.5%
3	Company C[(3)]	3.8	4.3%
4	Company D[(4)]	2.5	2.8%
5	The Company	2.3	2.6%

Source: CIC

Notes:

(1) Company A, founded in 2016 and headquartered in Chinese mainland, is a subsidiary of a company listed on the Shenzhen Stock Exchange. It is a global leader in machine vision and mobile robotic solutions, primarily serving industrial applications, with business operations worldwide.

(2) Company B, founded in 2017 and headquartered in Chinese mainland, is a privately held company and a global leader in industrial mobile robotic solutions, focusing on intelligent mobile robots and laser radar in the photovoltaic sector, with operations across Asia, Europe, and the United States.

(3) Company C, founded in 2020 and headquartered in Chinese mainland, is a company listed on the Hong Kong Stock Exchange and a global leader in mobile robotic solutions and robotic controllers, primarily serving industrial applications, with business operations worldwide.

(4) Company D, founded in 2013 and headquartered in Denmark, is a subsidiary of a company listed on the New York Stock Exchange. It is a global leader in AMR, used across a wide range of industries, with operations primarily in Europe and North America.

The table below sets forth the top five robotic solution providers in the China's industrial intelligent robot industry, ranked by the sales volume of industrial intelligent mobile robotic solutions in China in 2025, according to CIC.

Rank	Company	Sales volume	Market share, %
		(In thousand units)	
1	Company A	13.5	26.6%
2	Company B	7.2	14.3%
3	Company C	3.3	6.5%
4	The Company	2.0	4.0%
5	Company E[(1)]	2.0	3.9%

Note:

(1) Company E, founded in 2016 and headquartered in Chinese mainland, is a privately held company specializing in 3D vision perception and industrial mobile robotic solutions, providing intelligent automation solutions across various industries.

The following table illustrates the key performance metrics of top five players globally.

Company	Market positioning	Price range, RMB thousand	Maximum number of robots that can be scheduled in a single scenario, Unit	First sale of robot controllers	First commercial implementation SLAM navigation	First humanoid embodied intelligence robot
The Company	Global leader in industrial intelligent mobile robotic solutions, currently primarily focused on 3C, semiconductors, and automotive industries.	60–1,111	~2,000	2016	2017	2025
Company A	Global leader in machine vision and mobile robotic solutions, currently primarily focused on 3C, new energy, semiconductors, construction machinery, automotive and etc.	50–400	~2,000	Not launched	2017	2026
Company B	Global leader in industrial mobile robotic solutions, currently primarily focused on Photovoltaic.	100–400	~500	Not launched	2018	Not launched
Company C	Global leader in mobile robotic solutions and robotic controllers, currently primarily focused on 3C, automotive, automation equipment, new energy, semiconductors, construction machinery and etc.	50–300	Not available	2020	2021	2025
Company D	Global leader in AMR, currently primarily focused on automotive, 3C and etc.	200–700	~100	Not launched	Not available[(1)]	Not launched

Note:

(1) Not available as such information is not publicly available.

Entry Barriers and Key Success Factors

The following are the entry barriers and key success factors:

- **Continuous product innovation and modular development capabilities**: Solution providers of industrial intelligent mobile robots must continuously invest in R&D to break traditional design limitations and develop robots with higher load capacity and flexibility suited to complex industrial environments. Through modular development, providers can achieve rapid customization and flexible configuration, enabling quick response to market demands and deployment of robots tailored to diverse application scenarios.

- **Advanced unit intelligence for precise control and intelligent decision-making**: The intelligence level of individual robots is key to achieving efficient operations in real industrial settings. In terms of motion control, solution providers with in-house controller development capabilities can tailor motion strategies to specific robot features and application needs, adjusting in real-time to environmental changes for high-precision and responsive control. On the decision-making front, providers need to gather task instructions, operational feedback, and environmental data from real-world scenarios. Training intelligent systems with task generalization and cross-scenario adaptation capabilities enables robots to evolve from single-point applications to efficient deployment across diverse scenarios, meeting complex industrial demands.

- **Full-stack proprietary and open compatible software architecture**: A full-stack self-developed software system, covering robot operating system, motion control, and task scheduling, ensures deep integration and optimization between software and hardware, enhancing system stability and security. Meanwhile, open operating system offers better compatibility and scalability, supporting cluster scheduling and management of different types and brands of robots.

- **In depth application experience and scalable industry-grade solutions through swarm intelligence**: Providers must possess deep understanding of various industry processes and needs to develop standardized, scenario-based solutions. By integrating swarm intelligence and multi-robot coordination, providers can deliver comprehensive solutions that cover all aspects of the production system, achieving continuous and efficient operations. Through commercial deployment, a positive feedback loop of "data collection–model iteration–performance improvement" can be established, continuously enhancing solution performance and reliability to meet growing customer demands.

- **Supply chain management and cost control capabilities**: Proprietary core technologies are essential for building a secure and controllable supply chain. In-house R&D and manufacturing ensure component quality and supply stability. Additionally, by scaling up production, providers can reduce unit costs, enhance product competitiveness, and achieve both large-scale application and economic benefits.

- **Global service capability and localized operational support**: To meet the needs of global expansion, providers must build comprehensive global service networks that offer timely and efficient support across pre-sales consulting, project deployment, remote maintenance, and spare parts. Enterprises with integrated hardware-software delivery capabilities and localized technical support are key to winning global customer trust and fostering long-term partnerships.

Cost Analysis of Key Components for Industrial Intelligent Mobile Robots

The functionality of industrial intelligent mobile robots heavily relies on critical components such as controllers, power batteries, motors, LiDAR, and structural components. The performance of these components directly influences the robot's intelligence level, operational efficiency, endurance, and functional safety. Among these, expenditures related to power batteries and LiDAR are relatively high. The power batteries are crucial for enabling efficient industrial intelligent mobile robot operation, impacting endurance, and efficiency. LiDAR enables real-time obstacle detection and distance measurement through high-precision environmental perception.

Advancements in component technologies and strengthened industry collaborations have significantly enhanced the industrial intelligent mobile robot supply chain. Costs for key components such as power batteries and LiDAR are gradually declining, driven by the rise of domestic suppliers and efforts toward standardization. Taking LiDAR as an example, the cost of LiDAR used in industrial intelligent mobile robots generally exceeded RMB10.6 thousand in 2021. Currently, the price range has dropped significantly to between RMB1.5 thousand and RMB10 thousand, with an average price of around RMB5.7 thousand. Furthermore, as the market matures and production scales expand, these costs are expected to decrease further, with LiDAR expected to fall to around RMB3.8 thousand by 2030, accelerating the adoption of industrial intelligent mobile robots across broader industries. Additionally, continuous innovation in power battery technology is a critical factor in enhancing robot performance. For instance, optimizations in lithium-ion batteries and power management units extend robot runtime, while battery management systems monitor battery status to ensure safe and efficient operation. The synergy between cost reduction and performance improvement will propel the expansion of industrial intelligent mobile robotic applications, fostering sustained industry upgrades.

SOURCE OF THE INDUSTRY INFORMATION

CIC was commissioned to conduct an analysis of, and to report on the global industrial intelligent robotic solution industry at a fee of approximately RMB765,200. The commissioned report has been prepared by CIC, independent of the influence of the Company and other interested parties.

CIC's services include, among others, industry consulting, commercial due diligence and strategic consulting. CIC conducted both primary and secondary research using a variety of resources. Primary research involved consumer surveys and interviewing key industry experts and leading industry participants. Secondary research involved analyzing data from various publicly available data sources, such as the National Bureau of Statistics of China, information released by other Chinese government authorities, annual reports published by industry participants, industry organizations, as well as CIC's internal database.

The market projections in the commissioned report are based on the following key assumptions: (i) that the overall global social, economic and political environment is expected to maintain a stable trend over the next decade; (ii) that related key industry drivers are likely to continue driving growth in the industry during the forecast period; and (iii) that there is no extreme force majeure or set of industry regulations in which the market situation may be affected either dramatically or fundamentally.

Our Directors confirm that, after making reasonable enquiries, there is no material adverse change in the market information since the date of the CIC Report which may qualify, contradict or have an impact on the information in this section.

This section sets out a summary of certain aspects of the laws and regulations which are relevant to the business and operations of our Group. The principal objective of this summary is to provide potential investors with an overview of the key laws and regulations applicable to us. This summary does not purport to be a comprehensive description of all the laws and regulations applicable to our business and operations and/or which may be important to potential investors. Investors should note that the following summary is based on laws and regulations in force as at the date of this document, which may be subject to change.

LAWS AND REGULATIONS IN THE PRC

This section sets out a summary of certain aspects of laws and regulations of the PRC, which are relevant to the business and operations of our Group.

Principal Regulatory Authorities

In addition to the supervision and management by authorities that perform general regulations on companies in the PRC, the Company's operations in the PRC are mainly subject to supervision and management under the following authorities:

MIIT

The main responsibilities of the MIIT include, among others: proposing strategies and policies in relation to industrial development, drafting and organizing the implementation of industrial plans and industrial policies, drafting and promulgating industrial regulations and technical specifications, formulating and implementing standards and policies for high-tech industries, promoting the development of emerging industries, and guiding relevant industries in strengthening safety production management.

NDRC

The main responsibilities of the NDRC include, among others: organizing the formulation of a comprehensive industrial policy, regulating and managing fixed-asset investment projects, proposing strategies and policies for the utilization of inbound and outbound investment, and proposing a negative list for foreign investment access.

MINISTRY OF COMMERCE OF THE PRC (中華人民共和國商務部) (THE "MOFCOM")

The main responsibilities of the MOFCOM include, among others: supervising and regulating the foreign investment activities nationwide, formulating foreign investment policies and organizing their implementation, promoting the popularization of structural adjustment of industries, guiding the popularization of corporate reform, and to develop the commercial service industry and community commerce, formulating administrative measures and specific policies for outbound investment, and authorizing, in accordance with the applicable laws, outbound investment by domestic enterprises.

Company Law

According to the PRC Company Law (《中華人民共和國公司法》) implemented by the Standing Committee of the National People's Congress of the PRC (中華人民共和國全國人民代表大會常務委員會) (the "**SCNPC**") on December 29, 1993 and most recently amended on December 29, 2023 and

implemented on July 1, 2024, both limited liability companies and joint stock limited companies established in the PRC have the status of legal persons. The liability of shareholders of a limited liability company and a joint stock limited company is limited to the amount of capital they have contributed or shares they have subscribed for. The PRC Company Law shall also apply to foreign-invested companies unless laws on foreign investment have stipulated otherwise.

Regulations Relating to Foreign Investment

The NPC promulgated the PRC Foreign Investment Law (《中華人民共和國外商投資法》) on March 15, 2019, which became effective on January 1, 2020, and sets out the definition of foreign investment and the framework for the promotion, protection and administration of foreign investment activities.

On December 30, 2019, the MOFCOM and the State Administration for Market Regulation jointly promulgated the Measures for Reporting of Information on Foreign Investment (《外商投資信息報告辦法》), which became effective on January 1, 2020. According to those measures, the relevant participants in the establishment of foreign invested enterprises, in the process of purchasing of the equities of a domestic enterprise by a foreign investor and in the process of the subscription of the increased registered capital of a domestic enterprise by a foreign investor are required to submit an initial report in a dedicated registration system. In addition, the relevant participant in the subsequent changes to important matters of the aforementioned enterprises, such as their shareholding structures, are required to submit a change report through the same registration system. Investment activities in the PRC by foreign investors are principally governed by the Special Administrative Measures (Negative List) for Access of Foreign Investment (2024 Version) (《外商投資准入特別管理措施(負面清單)(2024年版)》), or the Negative List. The Negative List, which became effective on November 1, 2024, sets out special administrative measures in respect of the access of foreign investments in a centralized manner. Foreign investors shall not invest in any field prohibited by the Negative List and shall meet the investment conditions stipulated for any field restricted by the Negative List, while for foreign investments outside the Negative List, it shall be administered under the principle of equal treatment to domestic and foreign investment.

The Company's principal business is the provision of industrial intelligent mobile robotic solutions and industrial embodied intelligence robotic solutions. The operations of the Group do not involve any areas prohibited or restricted for foreign investment as specified in the Negative List.

Regulations Relating to Robot Industry

On July 8, 2017, the State Council issued *the "Development Plan for the New Generation of Artificial Intelligence"* (《新一代人工智能發展規劃》), which promotes the accelerated application of AI technologies, integration with business models, innovation in key sectors, and the cultivation of emerging AI industries to build internationally competitive AI industrial clusters.

On December 21, 2021, the MIIT, the NDRC and other 13 departments, jointly issued the 14th Five Year Plan for the Development of China's Robot Industry (《「十四五」機器人產業發展規劃》), which seeks to promote breakthroughs in core robot technologies and high-end products. The plan raised that, by 2025, China will become a global hub for robotics innovation, a cluster for high-end manufacturing, and a new frontier for integrated applications.

On January 18, 2023, the MIIT and other 16 departments jointly issued the Implementation Plan for "Robot+" Application Action (《「機器人+」應用行動實施方案》), which sets a target to double the robot density in manufacturing by 2025 compared to 2020, while significantly enhancing the depth and breadth of applications for service robots and special-purpose robots across industries.

Regulations Relating to Product Quality

The PRC Product Quality Law (《中華人民共和國產品質量法》) promulgated by the SCNPC on February 22, 1993 and most recently amended on December 29, 2018 is the principal governing law related to the supervision and administration of product quality. According to the PRC Product Quality Law, manufacturers shall be liable for the quality of products produced by them and sellers shall take measures to ensure the quality of the products sold by them. A manufacturer shall be liable to compensate for any physical injuries or damage to property other than the defective product itself resulting from the defects in the product, unless the manufacturer is able to prove that: (i) the product has not been put into circulation; (ii) the defects causing injuries or damage did not exist at the time when the product was put into circulation; or (iii) the science and technology at the time when the product was put into circulation were at a level incapable of detecting the existence of the defect. A seller shall be liable to compensate for any physical injuries or damage to property of others caused by the defects in the product. Where a product is defective due to a mistake made by the seller and such defect causes physical injury or damage to the property of others, the seller shall bear liability for compensation. Where a seller cannot specify the producer of a defective product nor the supplier of such defective product, the seller shall be liable for compensation. Where a defect in a product causes physical injuries to others or damages to the property of others, the victim may claim compensation from the producer of the product or from the seller of the product.

Pursuant to the PRC Civil Code (《中華人民共和國民法典》) promulgated by the NPC on May 28, 2020 and becoming effective on January 1, 2021, in the event of damages caused to others due to the defects in a product, the infringed party may seek compensation from the manufacturer or the seller of such product and shall have the right to request the manufacturer and the seller to bear tortious liabilities, such as cessation of infringement, removal of obstruction, elimination of danger, etc.

Regulations Relating to Lease of Property

According to the Administrative Measures for Commodity House Leasing (商品房屋租賃管理辦法) which was promulgated by the Ministry of Housing and Urban-Rural Development on December 1, 2010 and came into effect on February 1, 2011, the parties to a commodity house lease shall complete the lease registration with the competent construction (real estate) departments of the municipalities directly under the Central Government, cities and counties where the leased property is located within 30 days after the lease is executed. The competent construction (real estate) departments of the municipalities directly under the Central Government, cities and counties shall urge those who do not register on time hereof to make rectification within a specified time limit, and shall impose a fine below RMB1,000 on individuals who fail to rectify within the specified time limit, and a fine between RMB1,000 and RMB10,000 on institutions which fail to rectify within the specified time limit.

According to the PRC Civil Code, if the parties to a lease contract fail to go through the formalities of registration of such contract in accordance with the provisions of laws and administrative regulations, the validity of the contract shall not be affected.

Regulations Relating to Importation and Exportation of Goods

The PRC Foreign Trade Law (《中華人民共和國對外貿易法》) promulgated by the SCNPC on May 12, 1994 which came into effect on July 1, 1994 and most recently amended on December 27, 2025 and the PRC Regulations on the Administration of Import and Export of Goods (《中華人民共和國貨物進出口管理條例》) promulgated by the State Council on December 10, 2001, most recently amended on March 10, 2024, and came into effect on May 1, 2024, both stipulated that the import and export of goods and technologies to and from the PRC are free, unless otherwise in relevant laws or administrative regulations, and all entities engaging in the business of importation and exportation of goods shall comply with applicable laws and regulations. The PRC Customs Law (《中華人民共和國海關法》) promulgated on January 22, 1987, as most recently amended on April 29, 2021, stipulates that, among other things, the consignee or consignor of import or export goods or a customs agent shall file for record with relevant customs authority before going through any customs declaration procedures. Provisions on the Administration of Recordation of Customs Declaration Entities of the PRC (《中華人民共和國海關報關單位備案管理規定》) promulgated by the General Administration of Customs of the PRC on November 19, 2021, and effective from January 1, 2022, further gives detailed requirement on the documents needed for the filing and the requirement on reporting certain changes of the filed information to the relevant customs authority.

Regulations Relating to Work Safety

The PRC Work Safety Law (《中華人民共和國安全生產法》) was promulgated by the SCNPC on June 29, 2002, most recently amended on June 10, 2021 and became effective on September 1, 2021. The Work Safety Law applies to all entities engaging in production and business activities in the PRC. Such entities shall, according to the PRC Work Safety Law, strengthen work safety management, establish a dual prevention mechanism of graded management and control of safety risks and the screening and handling of hidden dangers, improve the risk prevention and resolution mechanism so as to ensure work safety. Violations of the PRC Work Safety Law may result in administrative penalties such as fine, suspension of operation and revocation of license.

Regulations Relating to Cybersecurity, Privacy and Data Security

The Provisions on Technical Measures for Internet Security Protection (《互聯網安全保護技術措施規定》), as promulgated on December 13, 2005 by the Ministry of Public Security of the PRC, or the MPS, require internet service providers and entity users of the internet to implement technical measures for internet security.

The Administrative Measures for the Graded Protection of Information Security (《信息安全等級保護管理辦法》) promulgated by the MPS, the National Administration of State Secrets Protection, the State Cipher Code Administration and the Information Office of the State Council (now abolished) on June 22, 2007, divide the security protection of information systems into five grades based on the degree of harm caused by the destruction of such information system to the legitimate rights and interests of citizens, legal entities and other organizations, public order of the society, other public interests and national security.

On July 1, 2015, the SCNPC promulgated the PRC National Security Law (《中華人民共和國國家安全法》), which became effective on the same day. It provides that the state shall build an internet and information security protection system and improve internet and information security protection capability to realize the controllable security of internet information key technologies, critical infrastructure and the information systems and data in important fields.

On November 7, 2016, the SCNPC promulgated the PRC Cybersecurity Law (《中華人民共和國網絡安全法》), which most recently amended on October 28, 2025 and became effective on January 1, 2026. It defines "networks" as systems that are composed of computers or other information terminals and relevant facilities used for the purpose of information collecting, storing, transmitting, exchanging and processing in accordance with certain rules and procedures, and "network operators" as owners or administrators of networks or the providers of network services. Network operators are subject to various security protection-related obligations. Network operators who do not comply with the PRC Cybersecurity Law may be subject to corrective orders, warnings, fines, suspension of their businesses, shutdown of their websites, and/or revocation of their business licenses.

On June 10, 2021, the SCNPC promulgated the PRC Data Security Law (《中華人民共和國數據安全法》), which took effect on September 1, 2021. The PRC Data Security Law stipulates the obligations in relation to data security and privacy for entities and individuals carrying out data processing activities. The appropriate level of protection measures is required to be taken respectively for each category of data. Violation of the PRC Data Security Law may be subject to an order to cease illegal activities, warnings, fines, suspension of business, and revocation of business licenses and/or operating permits, and the persons in charge or other directly responsible persons may be imposed with fines.

The Administrative Provisions on Security Vulnerabilities of Network Products (《網絡產品安全漏洞管理規定》) were jointly promulgated by the MIIT, the Cyberspace Administration of China, or the CAC, and the MPS on July 12, 2021 and took effect on September 1, 2021, which stipulate that, providers of cyber products (including hardware and software), network operators, organizations or individuals engaged in activities relating to the discovering, collecting and releasing security vulnerabilities of cyber products are subject to these provisions. According to these provisions, violations thereunder may result in administrative penalties as stipulated in the PRC Cybersecurity Law.

On July 30, 2021, the State Council promulgated the Security Protection Regulations for Critical Information Infrastructure (《關鍵信息基礎設施安全保護條例》), which became effective on September 1, 2021. The regulations supplement and specify the provisions on the security of critical information infrastructure as stated in the PRC Cybersecurity Law.

On December 28, 2021, the Cybersecurity Review Measures (《網絡安全審查辦法》) were promulgated by the CAC together with other 12 PRC governmental authorities, which took effect from February 15, 2022. Pursuant to these measures, the purchase of network products and services by a critical information infrastructure operator or the data processing activities of a network platform operator that affect or may affect national security will be subject to a cybersecurity review. In addition, network platform operators holding personal information of over one million users shall also apply for a cybersecurity review before listing abroad. The competent governmental authorities may also initiate a cybersecurity review against the operators if the authorities believe that the network product or service or data processing activities of such operators affect or may affect national security.

On August 20, 2021, the SCNPC promulgated the PRC Personal Information Protection Law (《中華人民共和國個人信息保護法》) which became effective on November 1, 2021. The PRC Personal Information Protection Law stipulates the scope of personal information, sets out the rules for processing personal information and the rules for cross-border transfer of personal information, as well as clarifies the individual's rights and the personal information processor's obligations in the process of personal information processing.

On March 22, 2024, the CAC issued the Provisions on the Promotion and Regulation of Cross-border Data Flows (《促進和規範數據跨境流動規定》). According to these provisions, the transfer of data collected and generated during specific activities such as international trade, cross-border transport, transnational manufacturing, and marketing, which do not involve personal information or important data, is exempted from the requirements to undergo data export security assessment, the need to enter into standard contracts for the transfer of personal information abroad, or obtaining personal information protection certification.

On September 24, 2024, the State Council promulgated the Regulations on the Security Management of Network Data (《網絡數據安全管理條例》), or the Network Data Regulations, which came into effect on January 1, 2025. The Network Data Regulations provide detailed implementing rules and guidance on various aspects of data compliance requirements under the existing data protection framework pillars of the PRC Cybersecurity Law, the PRC Data Security Law and the PRC Personal Information Protection Law.

Furthermore, on December 8, 2022, the MIIT promulgated the Administrative Measures for Data Security in Industry and Information Technology Sectors (for Trial Implementation) (《工業和信息化領域數據安全管理辦法(試行)》), or the Data Security Measures, which became effective on January 1, 2023. The measures apply to data in the industry and information technology sectors, including industrial data, telecom data and radio data, or the Industry and IT Data. The Industry and IT Data processors are required by the Data Security Measures to establish a full life-circle data security management systems, designate data security management personnel, reasonably manage operation authorization and formulate responses plan and conduct emergency drills and relevant trainings.

Regulations Relating to Labor Contract, Social Insurance and Housing Provident Fund

Labor Contract

According to (i) the Labor Law of the PRC (《中華人民共和國勞動法》) promulgated by the SCNPC on July 5, 1994, and most recently amended on December 29, 2018, (ii) the Labor Contract Law of the PRC (《中華人民共和國勞動合同法》) promulgated by the SCNPC on June 29, 2007, most recently amended on December 28, 2012 and became effective on July 1, 2013, and (iii) the Implementation Regulations for the Labor Contract Law of the PRC (《中華人民共和國勞動合同法實施條例》) promulgated by the State Council on September 18, 2008, the employment relationship between employers and employees must be executed in written form. In addition, employers must establish a sound labor safety and hygiene system, and the labor safety and hygiene facilities must meet the standards stipulated by relevant authorities.

Social Insurance and Housing Provident Fund

According to the Social Insurance Law of the PRC (《中華人民共和國社會保險法》) promulgated by the SCNPC on October 28, 2010 and most recently amended on December 29, 2018, the Administrative Regulations on Housing Provident Fund (《住房公積金管理條例》) promulgated by the State Council on April 3, 1994 and most recently amended on March 24, 2019, and the Interim Regulations on the Collection and Payment of Social Insurance Premiums (《社會保險費徵繳暫行條例》) promulgated by the State Council and most recently amended on March 24, 2019, an enterprise established within the PRC shall pay premium for basic pension insurance, unemployment insurance, maternity insurance, work injury insurance, basic medical insurance and contribute to the housing provident fund for its employees at a rate stipulated by the relevant authorities.

Employers that fail to promptly pay social insurance premiums in full amount will be ordered by the social insurance premium collection agency to make or supplement contributions within a stipulated period, and shall be subject to a penalty for late payment from the due date at the rate of 0.05% per day. If such payment is still not made within the stipulated period, a fine ranging from one to three times of the amount in arrears will be imposed. Employers that fail to contribute to the housing provident fund in due time or contribute under the minimum amount will be ordered by the relevant housing provident fund management center to make the contribution within a stipulated period. If such contribution is still not made within the stipulated period, the relevant housing provident fund management center can file application with a people's court for compulsory enforcement.

On July 31, 2025, the Supreme People's Court promulgated the Interpretation II of the Supreme People's Court of Issues Concerning the Application of Law in the Trial of Labor Dispute Cases (《最高人民法院關於審理勞動爭議案件適用法律問題的解釋(二)》), which took effect on September 1, 2025. Article 19(1) thereof stipulates that if an employer and an employee agree or the employee undertakes that social insurance contributions need not be paid, the People's Court shall deem such agreement or undertaking invalid. Furthermore, where an employer fails to pay social insurance contributions in accordance with the law, and the employee seeks to terminate the labor contract and claims economic compensation from the employer pursuant to Article 38(3) of the Labor Contract Law of the PRC, the People's Court shall support such claims in accordance with the law, which clarifies that employees are entitled to request termination of their labor contracts and receive corresponding economic compensation under the Labor Contract Law of the PRC if the employer fails to make social insurance contributions in accordance with the law.

Regulations Relating to Intellectual Property

Patent

According to the Patent Law of the PRC (《中華人民共和國專利法》) promulgated by the SCNPC on March 12, 1984, and most recently amended on October 17, 2020 which became effective on June 1, 2021 as well as the Implementation Rules for the Patent Law of the PRC (《中華人民共和國專利法實施細則》) promulgated by the State Council on June 15, 2001, most recently amended on December 11, 2023 and became effective on January 20, 2024, invention creations that are eligible for the application of a patent shall include inventions, utility models and designs.

Trademark

The Trademark Law of the PRC (《中華人民共和國商標法》) promulgated by the SCNPC on August 23, 1982, and most recently amended on April 23, 2019 which became effective on November 1, 2019, and the Implementation Regulations of the Trademark Law of the PRC (《中華人民共和國商標法實施條例》) promulgated by the State Council on August 3, 2002 and most recently amended on April 29, 2014 which became effective on May 1, 2014, prescribe the process of registration, de-registration, renewal, alteration, transfer and invalidation of a trademark. According to the aforesaid legislations, the registration of a trademark shall be valid for ten years from the date of approval. If there is a continuous need for the use of trademark, a renewal process shall be initiated within 12 months before the expiry of the registration.

Copyright

According to the Copyright Law of the PRC (《中華人民共和國著作權法》) promulgated by the SCNPC on September 7, 1990, and most recently amended on November 11, 2020 which became effective on June 1, 2021, the works protected by copyright refer to original intellectual achievements in the fields of literature, art and science which can be expressed in a certain form. Copyright is a collection of personal and property rights, which, among others, includes the right of publication, the right of authorship, the right of modification, the right of distribution, the right of reproduction, and the right of internet information transmission.

According to the Measures for the Registration of Computer Software Copyright (《計算機軟件著作權登記辦法》) promulgated by the National Copyright Administration of the PRC on February 20, 2002 and became effective on the same date, and the Regulations on Computers Software Protection (《計算機軟件保護條例》) promulgated by the State Council on December 20, 2001, and most recently amended on January 30, 2013 which became effective on March 1, 2013, the National Copyright Administration of the PRC shall be the competent authority for the nationwide administration of software copyright registration, and the Copyright Protection Centre of China is designated as the authority responsible for the whole registration process of computer software.

Domain Name

According to the Administrative Measures on Internet Domain Names (《互聯網域名管理辦法》) promulgated by the MIIT on August 24, 2017 and became effective on November 1, 2017, prior to the establishment of domain name root servers, domain name root server operation institutions, domain name registration management institutions and domain name registration service institutions within the PRC, the corresponding permits shall be obtained from the MIIT or its local counterparts.

Regulations Relating to PRC Tax

Income Tax Law

According to the PRC Enterprise Income Tax Law (《中華人民共和國企業所得税法》) or the EIT Law promulgated by the National People's Congress on March 16, 2007, and most recently amended on December 29, 2018 and effective from the same date and the Enterprise Income Tax Implementation Regulations (《中華人民共和國企業所得税法實施條例》) or the EIT Implementation Regulations promulgated by the State Council on December 6, 2007, and most recently amended on December 6, 2024 and effective on January 20, 2025, enterprises are divided into resident enterprises and non-resident enterprises. Resident enterprises are subject to a uniform 25% enterprise income tax rate on their worldwide income. The enterprise income tax rate is reduced by 20% for qualifying small low-profit enterprises. The high-tech enterprises that need full support from the PRC's government will enjoy a 15% tax rate reduction for Enterprise Income Tax.

According to the Administrative Measures for Accreditation of High-tech Enterprises (《高新技術企業認定管理辦法》) jointly promulgated by Ministry of Science and Technology, Ministry of Finance and the SAT on April 14, 2008, amended on January 29, 2016 and effective on January 1, 2016, enterprises which recognized as high-tech enterprises are entitled to enjoy the preferential enterprise income tax rate of 15%. The validity period of the high-tech enterprise qualification shall be three years from the date of issuance of the certificate of high-tech enterprise. After the certificate expires, the enterprise can re-apply for such recognition as a high-tech enterprise.

Income Tax Relating to Dividend Distribution

Pursuant to the Arrangement Between the Mainland of China and the Hong Kong Special Administrative Region for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes on Income (《內地和香港特別行政區關於對所得避免雙重徵税和防止偷漏税的安排》) and relevant protocols, which were promulgated by the SAT on August 21, 2006, came into effect on December 8, 2006, the withholding tax rate 5% applies to dividends paid by a PRC company to a Hong Kong company if such Hong Kong company directly holds at least 25% of the equity interests in a PRC company, otherwise the 10% withholding tax rate applies.

Pursuant to the Administrative Measures on Entitlement of Non-resident Taxpayers to Preferential Treatment under Tax Treaties (《非居民納税人享受協定待遇管理辦法》), which was promulgated by the SAT on October 14, 2019, came into effect on January 1, 2020, nonresident taxpayers are entitled to preferential treatment under tax treaties through self-determination, self-declaration and keeping and documenting relevant information for inspection.

According to the PRC Individual Income Tax Law (《中華人民共和國個人所得税法》) promulgated on September 10, 1980, last amended on August 31, 2018 and effective on January 1, 2019, and the Regulations for the Implementation of the Individual Income Tax Law of the PRC (《中華人民共和國個人所得税法實施條例》) or the Implementing Rules of the Individual Income Tax Law last amended on December 18, 2018 and effective on January 1, 2019, income from interest, dividends, bonuses, property leasing, property transfer and incidental income shall be subject to a proportional tax rate of 20%.

In accordance with the EIT Law and the EIT Implementation Regulations, the rate of enterprise income tax shall be 25%. A non-resident enterprise income tax should be levied at a reduced rate of 10% on income originating from within China if such non-resident enterprise does not have an establishment or premise in the PRC or has an establishment or premise in the PRC but the PRC-sourced income is not connected to such establishment or premise in the PRC. Such withholding tax for non-resident enterprises are deducted at source and the payer shall be the withholding agent.

The Circular of the SAT on Issues Relating to the Withholding of Enterprise Income Tax on Dividends Paid by Chinese Resident Enterprises to H Share Shareholders of Overseas Non-Resident Enterprise (《國家税務總局關於中國居民企業向境外H股非居民企業股東派發股息代扣代繳企業所得税有關問題的通知》), which was issued by the SAT on November 6, 2008, further clarified that a PRC-resident enterprise unified withhold enterprise income tax at a rate of 10% on dividends paid to H Share shareholders of overseas non-resident enterprise for 2008 and subsequent years.

Value-added Tax

According to the Announcement on Relevant Policies for Deepening Value-Added Tax Reform (Announcement of the MOF, the SAT and the General Administration of Customs of the PRC [2019] No. 39) (《關於深化增值税改革有關政策的公告》(財政部、税務總局、海關總署公告2019年第39號)) announced by the Ministry of Finance, the SAT, and the General Administration of Customs on March 20, 2019 and effective from April 1, 2019, with respect to VAT taxable sales or imported goods of a VAT general taxpayer, the originally applicable VAT rate of 16% shall be adjusted to 13%; the originally applicable VAT rate of 10% shall be adjusted to 9%.

On December 25, 2024, the NPCSC promulgated the Value-added Tax Law of the PRC (《中華人民共和國增值税法》), or the VAT Law, which came into effect on January 1, 2026. Under the VAT Law, the VAT rate, for selling goods, providing processing, repair and replacement services and tangible movables leasing services or importing goods will be 13%, for selling transport services, postal services, basic telecommunications, buildings, real property, or real property leasing services, transferring land use rights, or selling or importing certain goods specified in the VAT Law will be 9%, for selling services or intangible assets will be 6%, and for exporting goods will be 0%, and the levy rate of VAT to which the simple tax computation method applies is 3%.

Regulations Relating to Environmental Protection

Environment Protection

The Environmental Protection Law of the PRC (《中華人民共和國環境保護法》), which was promulgated by the SCNPC on December 26, 1989, most recently amended on April 24, 2014 and came into effect on January 1, 2015, outlines the authorities and duties of various environmental protection regulatory agencies. The Ministry of Ecology and Environment of the PRC, or the MEE, is authorized to issue national standards for environmental quality and discharge of pollutants, and to monitor the environmental protection scheme of the PRC. Meanwhile, local environment protection authorities may formulate local standards for discharge of pollutants which are more rigorous than the national standards, in which case, the concerned enterprises must comply with both the national standards and the local standards.

Environmental Impact Appraisal

According to the Administration Rules on Environmental Protection of Construction Projects (《建設項目環境保護管理條例》), which was promulgated by the State Council on November 29, 1998 and most recently amended on July 16, 2017, depending on the impact of the construction project on the environment, an construction proprietor shall submit an environmental impact report or an environmental impact statement, or file a registration form. As to a construction project, for which an environmental impact report or the environmental impact statement is required, the construction proprietor shall, before the commencement of construction, submit the environmental impact report or the environmental impact statement to the relevant authority at the environmental protection administrative department for approval. If the environmental impact assessment documents of the construction project have not been examined or approved upon examination by the approval authority in accordance with the law, the construction proprietor shall not commence the construction.

According to the Environmental Impact Appraisal Law of PRC (《中華人民共和國環境影響評價法》), which was promulgated by the SCNPC on October 28, 2002 and most recently amended on December 29, 2018, for any construction projects that have an impact on the environment, the construction proprietor is required to prepare an environmental impact report or an environmental impact statement, or file a registration form depending on the seriousness of effect that may be exerted on the environment.

Pollutant Discharge

Pursuant to the Administrative Measures for Pollutant Discharge Permit (《排污許可管理辦法》) promulgated on April 1, 2024 by the MEE and became effective on July 1, 2024, enterprises and public institutions as well as other entities engaging in production and business operations included in a certain designated catalogue for pollutant discharge management shall apply for and obtain a pollutant discharge permit or complete the registration as a stationary pollution source within a prescribed time limit.

Regulations Relating to Fire Prevention

The PRC Fire Prevention Law (《中華人民共和國消防法》) was promulgated by the SCNPC on April 29, 1998, and was most recently amended and became effective on April 29, 2021. According to the PRC Fire Prevention Law, enterprises are required to perform duties in relation to fire prevention. Failure to perform relevant duties and other violations of the PRC Fire Prevention Law may result in a fine or an order of suspension of business.

Regulations Relating to Foreign Exchange

The principal regulation governing foreign currency exchange in the PRC is the Regulations on Foreign Exchange Administration of the PRC (《中華人民共和國外匯管理條例》) promulgated on January 29, 1996 and most recently amended on August 5, 2008. According to these regulations, foreign currency transactions under capital account, such as transactions incurred under direct investment or capital contribution, will be subject to restrictions and require approvals from, or registration with, the foreign exchange administrative authorities, i.e. the SAFE or its local counterparts.

On February 13, 2015, SAFE promulgated the Notice on Further Simplifying and Improving Foreign Exchange Administration Policy on Direct Investment (《關於進一步簡化和改進直接投資外匯管理政策的通知》) or the SAFE Circular 13, which took effect on June 1, 2015 and was most recently amended on December 30, 2019.

According to the SAFE Circular 16, and the Notice of the SAFE on Further Deepening Reform to Promote Cross-border Trade and Investment Facilitation (《國家外匯管理局關於進一步深化改革促進跨境貿易投資便利化的通知》) announced and effective on December 4, 2023, the foreign exchange receipts under capital accounts of domestic institutions are subject to discretionary settlement policies. The foreign exchange receipts under capital accounts (including foreign exchange capital, foreign debts, and repatriated funds raised through overseas listing) subject to discretionary settlement as expressly prescribed in the relevant policies may be settled with banks according to the actual need of the domestic institutions for business operation. Domestic institutions' foreign exchange receipts under the capital account and the Renminbi funds obtained from the settlement thereof shall not, directly or indirectly, be used for expenditure beyond the enterprise's business scope or expenditure prohibited by laws and regulations of the state.

Regulations Relating to Overseas Securities Offering

Overseas Securities Offering

The Trial Administrative Measures of Overseas Securities Offering and Listing by Domestic Companies (《境內企業境外發行證券和上市管理試行辦法》) were promulgated by the CSRC on February 17, 2023, and implemented on March 31, 2023. According to these trial measures, issuers seeking an overseas initial public offering or listing must file with the CSRC within three working days following the submission of their application documents for issuance and listing abroad. Issuers are also prohibited from overseas offering and listing if they fall under one of the following circumstances: (i) where such securities offering and listing is explicitly prohibited by provisions in laws, administrative regulations and relevant state rules; (ii) where the intended securities offering and listing may endanger national security as reviewed and determined by competent authorities under the State Council in accordance with applicable laws; (iii) where the domestic company intending to make the securities offering and listing, or its controlling shareholders and the actual controller, have committed crimes such as corruption, bribery, embezzlement, misappropriation of property or undermining the order of the socialist market economy during the latest three years; (iv) where the domestic company intending to make the securities offering and listing is suspected of committing crimes or major violations of laws and regulations, and is under investigation according to law, and no conclusion has yet been made thereof; (v) where there are material ownership disputes over equity held by the domestic company's controlling shareholder or by other shareholders that are controlled by the controlling shareholder and/or actual controller. Where a domestic company seeks to directly offer and list securities in non-domestic markets, the issuer shall file with the CSRC, submit a filing report, legal opinion, and other relevant materials and undertake that the submitted materials are all truthful, accurate and complete.

On February 24, 2023, the CSRC, the MOF, the National Administration of State Secrets Protection of the PRC, and the National Archives Administration of China published the Provisions on Strengthening Confidentiality and Archive Management of Overseas Securities Offering and Listing by Domestic Companies (《關於加強境內企業境外發行證券和上市相關保密和檔案管理工作的規定》) which came into force on March 31, 2023. These provisions require that, in relation to the direct and indirect overseas securities offering and listing activities of domestic companies, such domestic company, as well as securities companies and securities service institutions providing securities services, are required to strictly comply with relevant requirements on confidentiality and archives management, establish a sound confidentiality and archives system, and take necessary measures to fulfill their confidentiality and archives management duties. According to these provisions, during an overseas offering and listing, if a domestic company needs to provide or publicly disclose to securities companies, securities service providers and/or overseas regulators any materials that may contain state secrets or have an adverse impact on the national security or public interests of the PRC, the domestic company should complete the relevant approval/filing and other regulatory procedures as required.

On December 24, 2025, The PBOC and the State Administration of Foreign Exchange jointly issued the Notice on Issues Concerning the Fund Management for Overseas Listings of Domestic Enterprises (《關於境內企業境外上市資金管理有關問題的通知》), which took effect on April 1, 2026, to further facilitate domestic enterprises in efficiently raising funds in overseas financial markets.

Full Circulation of H Shares

"Full circulation" represents listing and circulating on the Stock Exchange of the domestic unlisted shares of a domestic H-share listed company, including unlisted domestic shares held by domestic shareholders prior to overseas listing, unlisted domestic shares additionally issued after overseas listing, and unlisted shares held by foreign shareholders. On August 10, 2023, CSRC announced the Guidelines for the "Full Circulation" Program for Domestic Unlisted Shares of H-share Listed Companies (《H股公司境內未上市股份申請「全流通」業務指引》), allows certain qualified H-share listed companies and H-share companies to be listed for the application of full circulation to CSRC.

According to the Guidelines for the "Full Circulation" Program for Domestic Unlisted Shares of H-share Listed Companies, shareholders of domestic unlisted shares may determine by themselves through consultation the amount and proportion of shares, for which an application will be filed for circulation, provided that the requirements laid down in the relevant laws and regulations and set out in the policies for state-owned asset administration, foreign investment and industry regulation are met, and the corresponding H-share listed company may be entrusted to file the said application for "full circulation". Pursuant to the Overseas Listing Trial Measures, shareholders holding unlisted shares in the PRC should comply with the relevant requirements of the CSRC and appoint a domestic enterprise to file a report with the CSRC.

On December 31, 2019, China Securities Depository and Clearing Corporation Limited and Shenzhen Stock Exchange jointly announced the Measures for Implementation of H-share "Full Circulation" Business (《H股「全流通」業務實施細則》), or the Measures for Implementation. The businesses of cross-border share transfer registration, maintenance of deposit and holding details, transaction entrustment and instruction transmission, settlement, management of settlement participants, services of nominal holders, etc. in relation to the H-share "full circulation business", are subject to these Measures for Implementation.

U.S. Export Controls Laws and Regulations

The U.S. Export Controls regime is a system of laws and regulations administered primarily by the Bureau of Industry and Security (BIS) to protect national security and advance U.S. foreign policy objectives. These controls are implemented through the Export Administration Regulations (EAR), which govern the movement of commercial and dual-use items, software, and technology that are subject to U.S. jurisdiction.

The EAR applies to three categories of transactions:

- Exports: shipments or transmissions of items from the United States to a foreign destination.
- Reexports: shipments or transmissions of U.S.-origin items, or items otherwise subject to the EAR, from one foreign country to another.
- In-country transfers: releases or shipments of such items within a single foreign country to a different end user or for a different end use than originally authorized.

For EAR purposes, the term "items" is broad and includes physical commodities (such as circuit boards or hardware), software, and technology (such as blueprints, design plans, technical data, or know-how). The method of transmission does not affect whether a transaction is controlled. For example, an export can occur through regular mail, hand-carriage, fax, email, cloud upload/download, or even a phone conversation.

In addition to direct exports from the United States, the EAR also extends to certain foreign-produced items:

- Under the Foreign Direct Product (FDP) Rule, foreign-made items may be subject to the EAR if they are the direct product of specified U.S. technology or software, or are produced in a plant or by equipment that is itself a direct product of such U.S. technology or software. Several China-specific FDP rules extend these controls further by applying to items that meet both a defined product scope (based on ECCNs or technical parameters) and a defined destination or end-user scope (such as shipment to designated Chinese companies or entities).

- Under the De Minimis Rule, a foreign-made item may be subject to the EAR if it contains more than a threshold percentage of controlled U.S.-origin content. The threshold is generally 25% for most countries (including China), and 10% for comprehensively sanctioned countries such as Iran and North Korea. Only controlled content (i.e., items that would require a license if exported directly from the United States to the destination country) is counted toward this threshold.

Whether a license is required for an item subject to the EAR depends on several factors: the item's classification on the Commerce Control List (CCL), its destination, the end use in the transaction, and the identity of the end user. Not every transaction involving items subject to the EAR requires a license, and some transactions may qualify for specific license exceptions. However, transactions involving restricted destinations, prohibited end uses, or designated end users (such as those on the Entity List) typically require a license, which may be subject to a policy of denial.

Final Rule by the U.S. Department of the Treasury

On October 28, 2024, the U.S. Department of the Treasury (the "**Department of Treasury**") issued the "Provisions Pertaining to U.S. Investments in Certain National Security Technologies and Products in Countries of Concern" (the "**Final Rule**") to implement an outbound investment program that restricts investments by U.S. Persons and U.S.-controlled entities. The Final Rule became effective on January 2, 2025. On December 18, 2025, the Comprehensive Outbound Investment National Security Act of 2025 (the "**COINS Act**") was passed by the U.S. congress and became law. The COINS Act directs the U.S. Secretary of the Treasury to issue regulations restricting United States outbound investments in countries of concern involving certain technologies and will supersede the Final Rule. It was instructed that the regulations implementing the relevant provisions of the new law will be issued within 450 days of its enactment (i.e., before March 2027). The Final Rule remains in effect until the regulations implementing the COINS Act are issued.

Application Scope of the Final Rule

The Final Rule applies to investments by U.S. Persons as to "covered transactions" involving "covered foreign person" associated with a "country of concern" in "covered activities." Below are certain key concepts for the application of the Final Rule:

- "Covered Transactions" under the Final Rule include (1) acquisition of an equity interest or contingent equity interest; (2) provision of a loan or a similar debt financing arrangement that affords the U.S. person an interest in profits, right to appoint members of the board of directors (or equivalent), or other comparable financial or governance rights characteristic of an equity investment but not typical of a loan; (3) conversion of a contingent equity interest; (4) greenfield and brownfield investments; (5) entrance into a joint ventures; and (6) acquisition of a limited partner or equivalent interest in a venture capital fund, private equity fund, fund of funds, or other pooled investment fund.

- "Covered Foreign Person" under the Final Rule include (1) an entity that is (a) established or with principal place of business in China (including Hong Kong or Macau) or (b) 50% owned by an entity described in (a) above, the Chinese government, or a citizen or a permanent resident of China, where in both cases, the entity engages in a "covered activity"; (2) an entity with Chinese ties, meaning an entity that (a) has certain governance, voting or equity interests, or management rights in an entity identified in (1) above, and (b) attributes more than 50% of its revenues, net income, capital expenditures, and operating expenses to the entity identified in (1) above; and (3) an entity described in (1) (a) and (b) above that participates in a joint venture that engages, or plans to engage, in a "covered activity".

- "Country of Concern" is the People's Republic of China, including Hong Kong and Macau.

- "Covered Activities" refer to activities in three sensitive sectors: (1) semiconductors and microelectronics sector, (2) quantum information technologies sector and (3) artificial intelligence sector that pertain to specified categories of national security technologies and products.

Main Restrictions under the Final Rule

The Final Rule prohibits or requires notification of certain investments by U.S. Persons in Covered Persons. Moreover, it prohibits U.S. Persons from knowingly directing investments in Covered Persons by non-U.S. investors if such investments would be prohibited if undertaken by a U.S. Person. Among the three sensitive sectors covered by the Final Rule, the sector that is relevant to our Group is the artificial intelligence sector.

In the artificial intelligence sector, "prohibited transactions" include:

- developing any AI system that is designed to be **exclusively** used for, or which the relevant covered foreign person intends to be used for, any: (1) military end use (e.g., for weapons targeting, target identification, combat simulation, military vehicle or weapon control, military decision-making, weapons design (including chemical, biological, radiological, or nuclear weapons), or combat system logistics and maintenance); or (2) government intelligence or mass-surveillance end use (e.g., through incorporation of features such as mining text, audio, or video; image recognition; location tracking; or surreptitious listening devices); or

- developing any AI system that is trained using a quantity of computing power greater than (1) 10^25 computational operations (e.g., integer or floating-point operations); or (2) 10^24 computational operations (e.g., integer or floating-point operations) using primarily biological sequence data).

"Notifiable transaction" with respect to the artificial intelligence sector include developing any AI system that does not fall under the "prohibited" category but is:

- designed to be used for any military end use (e.g., for weapons targeting, target identification, combat simulation, military vehicle or weapons control, military decision-making, weapons design (including chemical, biological, radiological, or nuclear weapons), or combat system logistics and maintenance); or government intelligence or mass-surveillance end use (e.g., through incorporation of features such as mining text, audio, or video; image recognition; location tracking; or surreptitious listening devices); or

- intended by the covered foreign person or joint venture to be used for any of the following: (i) cybersecurity applications; (ii) digital forensics tools; (iii) penetration testing tools; or (iv) the control of robotic systems.

"AI system" under the Final Rule means (a) a machine-based system that can, for a given set of human-defined objectives, make predictions, recommendations, or decisions influencing real or virtual environments—i.e., a system that (1) uses data inputs to perceive real and virtual environments; (2) abstracts such perceptions into models through automated or algorithmic statistical analysis; and (3) uses model inference to make a classification, prediction, recommendation, or decision; or (b) a data system, software, hardware, application, tool, or utility that operates in whole or in part using a system described in (a) above.

Certain transactions that would have been considered prohibited or notifiable transactions may be exempted from the prohibition or notification requirements and may fall into "excepted transaction" under the Final Rule. The exemptions include (1) investments in publicly traded securities, (2) securities issued by investment companies, (3) certain limited partner or equivalent investments, (4) derivatives, (5) full buyouts from a person of a country of concern, (6) intracompany transactions, (7) certain syndicated debt financings, (8) equity-based compensation, and (9) certain transactions involving a person of a country or territory outside of the U.S. based on a determination by the U.S. Secretary of the Treasury.

The publicly traded securities exemption applies to securities traded on a securities exchange in any jurisdiction, as long as (i) the trade does not afford the U.S. Person rights beyond standard minority shareholder protections with respect to the covered foreign person and (ii) the shares are officially available for public trading after the initial public offering. On December 23, 2025, the U.S. Department of the Treasury issued new guidance regarding the Final Rule through "Frequently Asked Questions". The new guidance clarified that, absent additional facts, when a U.S. Person acquires an equity interest in a "covered foreign person", and at the time of such acquisition the equity interest is publicly traded, such security falls under the description of a "publicly traded security" in the Final Rule, regardless of when a subscription agreement for such equity interest is entered into, as long as the transaction does not afford the U.S. Person rights beyond standard minority protections with respect to the issuer of such securities. Therefore, U.S. Persons may be able to rely on the publicly traded securities exemption for their purchases of our H Shares in the **[REDACTED]** if the relevant requirements are met. However, whether a transaction meets the requirements of the "publicly traded securities" exemption is highly fact-specific; any investors seeking to rely on this exemption must consult their own legal advisors to make their own determinations as to the availability of the exemption for a particular transaction and their obligations under the Final Rule.

OVERVIEW

Our Company was founded in the PRC in June 2016. Through the years, we have become a leader in industrial intelligent mobile robotic solutions, dedicated to empowering smart factories across a wide range of industrial scenarios. We are also an early mover in industrial embodied intelligence robotic solutions. Our tailored one-stop robotic solutions comprise our core robotic technology platform, our industrial intelligent multi-functional robotic products and our one-stop intelligent collaborative system. In the year ended December 31, 2025, we were the fourth largest provider of the industrial intelligent mobile robotic solutions in China by sales volume, according to CIC.

See "Directors and Senior Management — Board of Directors — Executive Directors" for the biographical details of our founder, Mr. Wang.

BUSINESS MILESTONES

The following table illustrates our major business milestones:

Year	Milestone
2016	Our Company was incorporated in Shenzhen.
	We launched our self-developed operating system SROS and core controller.
2017	We pioneered the SLAM technology based on prior information and launched our first standard robot.
	We are among the first to launch a large-scale cluster scheduling system in China, enabling our product solution capable of robot collaborative work.
2018	We started mass delivery for the first time in the automotive sphere, being the first in our industry's that automates the entire delivery process from in-progress inventory to production, providing flexible logistics solution.
2019	We commenced our business in overseas markets and successfully completed our first export to Japan and became one of the first Chinese manufacturing-oriented AMR companies to export to Japan.
	We are accredited as a national high-tech enterprise in the PRC.
2020	We launched a variety of next-generation functional robots, including lifting, transport, forklift and tugger robots which provide a variety of application in different settings.
2021	We released our robot internet of things intelligent software system (the predecessor of RoboVerse), pioneering 1+N+S = ∞ philosophy, providing customers with efficient and stable intelligent solutions.
	We commenced production in our plant in Kunshan, Jiangsu Province, PRC.
2022	We have successfully deployed and dispatched over 200 robots on a single project, demonstrating our ability to deliver at scale, with this deployment scale placing us at the forefront of the industry.

Year	Milestone
2023	We obtained RMB150 million series C pre-**[REDACTED]** investment from Xiaomi.
	We were accredited as a National Specialized New "Little Giant" Enterprise.
2024	Our products and solutions are sold in 15 countries and regions.
	We have reached an annual sales volume of around 2,000 robots.
	Our Company was awarded as the Guangdong Manufacturing Single Champion Enterprise.
2025	We released DARWIN, the first wheeled embodied robot with the highest degree of flexibility implemented in industrial settings in China, equipped with advanced AI algorithms such as multi-modal perception and VLA.
	We released the next-generation RoboVerse which is our Intelligent Collaborative System for smart manufacturing, enabling rapid evolution from single intelligence to swarm intelligence.

OUR SUBSIDIARIES

The following entities are the operating subsidiaries of our Group.

Name	Place of incorporation	Date of incorporation	Principal business activities
Standard Robots (Kunshan) Co., Ltd. (斯坦德機器人(昆山)有限公司)	PRC	March 8, 2021	Research, development and sales of intelligent robots; manufacturing, sales, installation and maintenance of industrial robots.
Standard Robots Intelligence (Shenzhen) Co., Ltd. (斯坦德機器人智能(深圳)有限公司)	PRC	April 10, 2025	Operation, management, research and development of industrial robots; research and development of intelligent robots; operation, management, research and development of service consumption robots.
Standard Shengji (Shenzhen) Intelligent Robots Co., Ltd. (斯坦德盛基(深圳)智能機器人有限公司)	PRC	April 8, 2026	Sales of industrial robots; research, development and sales of intelligent robots; sales of service consumption robots.

CORPORATE DEVELOPMENT

1. Establishment and Shareholding Evolution of Our Company

On June 14, 2016, our Company was established as a limited liability company under the laws of the PRC by Mr. Wang Huaiqing (王淮卿) with our angel investor Mr. Luo Hong (羅鴻) ("**Mr. Luo**"), with a registered capital of RMB2.10 million. Mr. Wang Huaiqing and Mr. Luo held as to 90.00% (corresponding to RMB1,890,000 of the registered capital) and 10.00% (corresponding to RMB210,000 of the registered capital) of the registered capital of our Company, respectively.

On April 20, 2017, Wang Huaiqing entered into share transfer agreements with each of Mr. Li, Mr. Wang and Standard Automation, pursuant to which (i) Wang Huaiqing transferred 14.56% equity interest in our Company to Mr. Li at a consideration of RMB305,760; (ii) Wang Huaiqing transferred 11.83% equity interest in our Company to Mr. Wang at a consideration of RMB248,430; and (iii) Wang Huaiqing transferred 21.82% equity interest in our Company to Standard Automation at a consideration of RMB458,220. After the transfer, Mr. Wang Huaiqing, Standard Automation, Mr. Li, Mr. Wang and Mr. Luo held as to 41.79% (corresponding to RMB877,590 of the registered capital), 21.82% (corresponding to RMB458,200 of the registered capital), 14.56% (corresponding to RMB305,760 of the registered capital), 11.83% (corresponding to RMB248,430 of the registered capital), and 10.00% (corresponding to RMB210,000 of the registered capital), of the registered capital of our Company, respectively.

2. Pre-[REDACTED] Investments

Since April 2017, we have completed several rounds of Pre-**[REDACTED]** Investments through capital injections and equity transfers between our Pre-**[REDACTED]** Investors. For details, please refer to "— Pre-**[REDACTED]** Investments" below.

3. Joint Stock Conversion

On April 28, 2025, our then Shareholders, being our promoters, passed resolutions approving, among others, the conversion of our Company into a joint stock company with limited liability under the laws of the PRC. RMB20,000,000 was converted into 20,000,000 Shares with a nominal value of RMB1.00 each and the amount of net assets as of March 31, 2025 was converted into capital reserve. Our Shares upon conversion were subscribed for by our then Shareholders in proportion to their respective equity interest in our Company immediately before the conversion. The joint stock reform was completed on May 29, 2025.

EMPLOYEE INCENTIVE PLATFORM

In recognition of the contributions of our key employees and to incentivize them to further promote our development, Standard Automation was established as our employee incentive platform. Standard Automation was established as a limited partnership under the laws of the PRC on April 10, 2017. As of the Latest Practicable Date, Standard Automation held 14.30% of our Shares, all management and voting power of Standard Automation are exercised by the general partner, Mr. Wang, according to the relevant partnership agreement. As of the Latest Practicable Date, our incentive platform had 96 beneficiaries, including (i) Mr. Wang and Mr. Wang Jinpeng, our Directors, each interested in 13.24% and 7.30% of the partnership interest, (ii) Mr. Yuan Caiwen, our senior management, interested in 2.19% of the partnership interest, (iii) Mr. Lyu Fengchi and Mr. Zhao Yihao, our co-founders and employees, each interested in 8.36% and 6.82% of the partnership interest, and (iv)

91 employees (including 2 former employees) of our Group interested in the rest of the 62.10% partnership interests. Except as otherwise disclosed, none of the other limited partners hold more than 5% partnership interest in Standard Automation.

ACTING-IN-CONCERT ARRANGEMENT

Mr. Wang, Standard Automation and Mr. Li (our executive Director and vice general manager) have been acting in concert since September 2018 pursuant to an acting-in-concert agreement between them dated September 26, 2018 and have been acting in concert in each and every Shareholders' meeting since then. On April 1, 2025, Mr. Wang and Mr. Li entered into the Acting-in-Concert Agreement (in replacement of the previous acting-in-concert agreement between them dated September 26, 2018), pursuant to which, Mr. Wang and Mr. Li (collectively, the "**Concert Parties**" and each a "**Concert Party**") have confirmed that, among others:

(i) the Concert Parties shall act in concert when addressing matters pertaining to the operational development of the Group and those requiring resolutions by a Shareholders' meeting;

(ii) if one Concert Party and its controlled entities intend to submit a proposal to the Shareholders' meeting of the Company, they must first communicate and consult with the other Concert Party. Upon reaching a consensus, the proposal should be submitted to the Shareholders' meeting either in the name of one Concert Party or jointly by the Concert Parties;

(iii) prior to the Shareholders' meeting to review relevant proposals, the Concert Parties must engage in comprehensive communication and consultation to reach a consensus on the exercise of voting rights. During the shareholders' meeting, both Concert Parties and their controlled entities should exercise their voting rights in accordance with the agreed position; and

(iv) in the event that a consensus cannot be reached, the decisions of Mr. Wang shall prevail and all other Concert Parties shall exercise their voting rights in accordance with Mr. Wang's decision.

The Acting-in-Concert Agreement shall remain effective during the period that the Concert Parties maintain ownership of Shares in the Company.

On March 3, 2023, Mr. Wang, Mr. Luo and Wanzai Hongya Consulting Service Center (Limited Partnership) (萬載鴻雅諮詢服務中心(有限合夥)) ("**Wanzai Hongya**") entered into a acting-in-concert agreement, pursuant to which Wanzai Hongya shall vote in accordance with the opinion or instructions of Mr. Wang in the event of disagreement. Wanzai Hongya is a partnership incorporated in the PRC whose sole managing partner is Mr. Luo. Mr. Luo indirectly controlled 3.5% of the Shares in the Company through Wanzai Hongya as at the date of the agreement. The aforementioned agreement was automatically terminated on March 25, 2025 when Mr. Luo decided to directly hold the Shares in the Company and instructed Wanzai Hongya transferred all Shares in the Company to Mr. Luo himself. Mr. Luo and Wanzai Hongya have confirmed in writing to the Company that Mr. Luo did not and does not intend to participate in the management of the Company, the purpose of the aforementioned agreement was to entrust the voting rights of the shares held by Wanzai Hongya, not to seek acting in concert with Mr. Wang.

VOTING PROXY ARRANGEMENT

On June 22, 2025, Golden Summer Holding Limited ("**Golden Summer**"), Shenzhen Hongze Intelligent Manufacturing Investment Partnership (Limited Partnership) (深圳鴻澤智造投資合夥企業(有限合夥)) ("**Shenzhen Hongze**") and Zhuhai Shengyinjing Investment Enterprise (Limited Partnership) (珠海盛銀璟投資合夥企業(有限合夥)) ("**Zhuhai Shengyinjing**"), each as a grantor ("**Grantor**"), entered into the Voting Proxy Agreements for a term of two years from the **[REDACTED]**, in favor of Mr. Wang, our chairman, executive Director, Chief Executive Officer and founder (the "**Voting Proxy Agreements**"). Pursuant to the Voting Proxy Agreements, Golden Summer, Shenzhen Hongze and Zhuhai Shengyinjing has each irrevocably granted a voting proxy in favor of Mr. Wang in respect of, and Mr. Wang is entitled to the voting rights attached to 6,516,020, 1,547,370 and 2,000,000 Shares (taking into account the Share Subdivision), respectively, held by the aforementioned Shareholders in aggregate, representing **[REDACTED]**%, **[REDACTED]**% and **[REDACTED]**% of the voting rights, respectively, in our Company upon **[REDACTED]**.

Other than the Grantors' Shares subject to the Voting Proxy Agreements as abovementioned, the remaining Shares held by the Grantors are not subject to the Voting Proxy Agreements or any other voting arrangements, and the voting rights attaching to these Shares are exercised by the Grantors independently. As the Grantors are all independent institutional investors, whose ultimate beneficial owners or general partners are all independent third parties, the voting rights in respect of these Shares have always been and will continue to be exercised independently in accordance with their internal policies and procedures, which would not be influenced by Mr. Wang.

Pursuant to the Voting Proxy Agreement, Mr. Wang is entitled to the voting rights of the relevant Shares and vote on matters at the shareholders' meeting, except for the following matters which are immaterial from both operational and financial perspectives of the Company: (i) matters related to the disposal of entrusted shares, such as share transfers, share pledges and the disposal of interests in shares; (ii) matters relating to proposed privatization or delisting of our Company by Mr. Wang, his close associates or concert parties; (iii) matters of which Mr. Wang is required to abstain from voting under the Listing Rules and applicable laws and regulations and pursuant to the Articles of our Company; and (iv) very substantial acquisition and disposal and reverse takeovers under Chapter 14 of the Listing Rules.

The Voting Proxy Agreements shall remain valid for a period of two years from the date of **[REDACTED]** or until the occurrence of the earliest of the following events: (i) the date on which our Company ceases to be **[REDACTED]** on the Stock Exchange; (ii) our Company submits a **[REDACTED]** application on a stock exchange other than the Stock Exchange; (iii) the relevant Grantor is deemed to be a member of the Controlling Shareholder group of our Company under the Listing Rules; and/or deemed as the actual controller of our Company pursuant to the applicable PRC laws and regulations; (iv) Mr. Wang or his close associates commits a breach of the agreement or failed to comply with any obligation or commitment under this agreement, and such breach is not rectified within ten working days after the occurrence; (v) the relevant Grantor ceases to hold the Shares of our Company or enters into any binding agreement to sell all Shares of our Company held by such Grantor; and (vi) Mr. Wang consolidated voting power (whether through concert parties, close associates or through voting proxy arrangements with other Grantors, excluding this arrangement), exceeds or reached 30% **[REDACTED]** and constitute a group of Controlling Shareholders under the Listing Rules without considering the entrusted Shares held by the relevant Grantor.

Pursuant to the applicable PRC laws, each of the Grantors, as the existing Shareholders of the Company, are subject to a lock-up period of 12 months following the **[REDACTED]**. Upon the expiry of the lock-up period, the voting proxy arrangements will terminate if the relevant Grantors dispose(s) of their Shares during the validity period. As a result, Mr. Wang may no longer be a Controlling Shareholder of our Company.

SHARE SUBDIVISION BEFORE THE [REDACTED]

Pursuant to the resolutions of the Shareholders dated June 16, 2025, the Shares will be split on a one-for-ten basis immediately prior to the **[REDACTED]**, and the nominal value of the Shares will be changed from RMB1.0 each to RMB0.10 each. Immediately after the Share Subdivision, the registered share capital of our Company will be RMB22,105,263 with 221,052,630 Shares in a nominal value of RMB0.10 each.

MATERIAL ACQUISITIONS AND DISPOSALS

During the Track Record Period and up to the Latest Practicable Date, we did not conduct any material acquisition or disposal.

NO PREVIOUS [REDACTED] ATTEMPT

(1) The post-money valuation is calculated by dividing the total consideration of equity subscriptions under the relevant round of the pre-**[REDACTED]** investment by the percentage of the new subscribed equity interest in the total registered capital of our Company at the relevant time. The pre-money valuation is calculated by excluding the total consideration of equity subscriptions from the post-money valuation under the relevant round of the pre-**[REDACTED]** investment. The valuation of our Company has been increasing along with our rapid business development and expansion in business scale.

The fluctuations in valuations as compared to the immediate previous round of pre-**[REDACTED]** investments were due to the general business status of the Group, and in particular, the launch and commercialization of our robotic products and solutions, the significant growth of financial and operational performance during the Track Record Period, the advancement of our research and development, and the prevailing market sentiment amongst the venture capital markets at the time when the pre-**[REDACTED]** investments were made. Please refer to "— Business Milestones" for details of our key business milestones which have attracted further investments and improved our business and financial performance.

The increase in valuation from Series D Investments to the **[REDACTED]** was due to the launch of new products and business increase since May 2024, including: (i) the release of DARWIN, which is the first wheeled embodied robot with the highest degree of flexibility implemented in industrial settings in China, equipped with advanced AI algorithms such as multi-modal perception and VLA, (ii) the release of next generation RoboVerse, enabling rapid evolution from single intelligence to swarm intelligence; and (iii) the increase of the shipment volume of our robots and expansion of our customer base during May 2024 to June 2025, and the expected continuing increase until the **[REDACTED]**. These milestones are proof of our capability to maintain our leading positions in the industrial intelligent mobile robotic solutions and have significantly reduced the development risks in relation to our specialist technology products and significantly improved our growth prospects, which in turn boosts the Company's valuation.

(2) The cost per Share presented in the table has been adjusted to take into account the enlarged registered capital of our Company as a result of the joint stock reform carried out in May 2025 and assuming the Share Subdivision is completed. The amount is arrived at by dividing the total consideration by the total number of Shares to be converted from the registered capital held by the respective investors as a result of the joint stock reform and their respective subscriptions or purchases.

(3) Under certain transfers of equity interest between our investors, the relevant investors considered various factors, such as timing of the transaction, past or present relationships between the parties and their respective bargaining power in the negotiations when determining the consideration, in addition to the then valuation of our Company, and thus agreed on a discount to the then valuation.

(4) The discount to the **[REDACTED]** is calculated based on the assumption that the **[REDACTED]** is HK$**[REDACTED]** per H Share, being the mid-point of the indicative **[REDACTED]** range of HK$**[REDACTED]** to HK$**[REDACTED]** per H Share, and that the **[REDACTED]** is not exercised.

(5) The Shares were acquired from BAXVILLE (BEIJING) MINERALS TRADING LIMITED (巴斯威爾(北京)礦產貿易有限公司) ("**Baxville**"), a then shareholder of the Company.

(6) The Shares were acquired from each of Tibet Guoke Dingyi Investment Center (Limited Partnership) (西藏國科鼎奕投資中心(有限合夥)), Qingdao Xinda Puchuang Investment Centre (Limited Partnership) (青島信達普創投資中心(有限合夥)) (a then Shareholder of our Company), Shanghai Yaohong Venture Investment Management Co., Ltd. (上海要弘創業投資管理有限公司) and Wanzai Hongya Consulting Service Centre (Limited Partnership) (萬載鴻雅諮詢服務中心(有限合夥)) (a then Shareholder of our Company).

(7) The Shares were acquired from Shenzhen Hechuang Intelligent and Health Venture Investment Fund (Limited Partnership) (深圳市合創智能及健康創業投資基金(有限合夥)).

(8) The Shares were acquired from Shenzhen Hechuang Intelligent and Health Venture Investment Fund (Limited Partnership) (深圳市合創智能及健康創業投資基金(有限合夥)) and Wanzai Hongya Consulting Service Centre (Limited Partnership) (萬載鴻雅諮詢服務中心(有限合夥)) (a then Shareholder of our Company).

(9) The Shares were acquired from Shenzhen Hechuang Intelligent and Health Venture Investment Fund (Limited Partnership) (深圳市合創智能及健康創業投資基金(有限合夥)) and Wanzai Hongya Consulting Service Centre (Limited Partnership) (萬載鴻雅諮詢服務中心(有限合夥)) (a then Shareholder of our Company).

(10) The Shares were acquired from Wanzai Hongya Consulting Service Centre (Limited Partnership) (萬載鴻雅諮詢服務中心(有限合夥)) (a then Shareholder of our Company).

(11) The Share were acquired from Tibet Guoke Dingyi Investment Center (Limited Partnership) (西藏國科鼎奕投資中心(有限合夥)).

(12) The Shares were acquired from Shanghai Guangyi Investment Management Center (Limited Partnership) (上海光易投資管理中心(有限合夥)), Zhuhai Qingyan Equity Investment Partnership (Limited Partnership) (珠海青岩股權投資合夥企業(有限合夥)) and Shenzhen Hechuang Intelligent and Health Venture Investment Fund (Limited Partnership) (深圳市合創智能及健康創業投資基金(有限合夥)).

(13) The Shares were acquired from Mr. Wang.

(14) The Shares were acquired from Suzhou Yuanming Venture Investment Center (Limited Partnership) (蘇州源明創業投資中心(有限合夥)) and Shenzhen Hechuang Intelligent and Health Venture Investment Fund (Limited Partnership) (深圳市合創智能及健康創業投資基金(有限合夥)).

(15) The Shares were acquired from Mr. Li.

Use of [REDACTED] from the Pre-[REDACTED] Investments

The **[REDACTED]** received by us from the pre-**[REDACTED]** investments which involved subscriptions of increased registered capital of our Company amounted to approximately RMB**[REDACTED]** million. As of the Latest Practicable Date, approximately **[REDACTED]** the net **[REDACTED]** from the pre-**[REDACTED]** investments have not been fully utilized. The utilized portion of the **[REDACTED]** from the pre-**[REDACTED]** investments has been for production and operational purposes in accordance with the business plan or budget as approved by the Board.

Special Rights of Our Pre-[REDACTED] Investors

In connection with the pre-**[REDACTED]** investments, we granted our Pre-**[REDACTED]** Investors certain special rights, including, among others, pre-emptive right, right of first offer, right of co-sale, redemption right, information right, anti-dilution right, and special rights in liquidation. In anticipation of the **[REDACTED]**, the redemption right, anti-dilution right and special rights in liquidation have been terminated before the submission of the **[REDACTED]** application for the **[REDACTED]** and all other special rights will be terminated automatically upon the **[REDACTED]** pursuant to the shareholder special rights termination agreement among all the Shareholders of the Company dated June 22, 2025.

Save as disclosed above, the Company confirmed that (i) there are no other side arrangements between the Company and the Pre-**[REDACTED]** Investors or between the Company and the individual Controlling Shareholders regarding the redemption rights granted to the Pre-**[REDACTED]** Investors; and (ii) the Company did not provide any guarantee on the redemption rights granted by the individual Controlling Shareholders in case of default by the individual Controlling Shareholders, nor was the Company a party to such agreement. Considering that the Company has no obligation to repurchase the Shares held by the Pre-**[REDACTED]** Investors, no redemption liability was recorded during the Track Record Period. For details, please refer to note 31 of the Accountants' Report.

Article 143 of the Civil Code of the People's Republic of China (中華人民共和國民法典) stipulates that a civil legal act is valid if it is conducted by parties with the requisite capacity for civil conduct, is based on genuine intent, and does not contravene mandatory provisions of laws, administrative regulations, or public order and morals. Adhering to the principle of autonomy of will, the Company and the Pre-**[REDACTED]** Investors explicitly agreed that the redemption rights granted by the Company to the Pre-**[REDACTED]** Investors were irrevocably terminated and deemed void ab initio. The Company and each of the Pre-**[REDACTED]** Investors have agreed in writing to terminate the redemption rights granted by the Company to the Pre-**[REDACTED]** Investors and to treat them as having no legal effect from the time of their execution, thereby restoring the rights and obligations of both parties to the status quo ante as if such clauses had never been agreed upon. This arrangement does not violate any mandatory provisions of laws, administrative regulations, or public order and morals, and is thus legally valid. Based on the above, the PRC Legal Advisor is of the view that the redemption rights agreed upon by the Company and the Pre-**[REDACTED]** Investors have been irrevocably terminated and shall be deemed void ab initio. No Pre-**[REDACTED]** Investors had exercised their redemption rights during the Track Record Period. For details, please refer to note 31 of the Accountants' Report.

Compliance with the Guide for New Listing Applicants

On the basis that (i) the considerations for the last round of the Pre-**[REDACTED]** Investments have been fully settled on May 30, 2025, which would be 120 clear days before the **[REDACTED]**, and (ii) all the special rights granted to the Pre-**[REDACTED]** Investors will be terminated upon the **[REDACTED]** (save for the redemption right which has been terminated before the submission of the **[REDACTED]** as described above) pursuant to the shareholder special rights termination agreement among all the Shareholders of the Company dated June 22, 2025, the Joint Sponsors confirm that the Pre-**[REDACTED]** investments are in compliance with Chapter 4.2 of the Guide for New Listing Applicants.

Information regarding Our Pre-[REDACTED] Investors

Set out below is a description of our Sophisticated Independent Investors (including Pathfinder SIIs) and other Pre-**[REDACTED]** Investors. Among our Pre-**[REDACTED]** Investors, we have 3 Sophisticated Independent Investors, all of which respectively held more than 3% of the total issued Shares of the Company as of the Latest Practicable Date. Save for being a shareholder of our Company, each of our Sophisticated Independent Investors and other Pre-**[REDACTED]** Investors is independent from and not connected with any Director, chief executive or substantial shareholder of our Company, or its subsidiaries, or any of their respective close associates. Save for Bohua Investment and Liangxi Investment, Zhuhai Shengyinjing and Zhuhai Shengxinze as disclosed herein, each of the Pre-**[REDACTED]** Investors is independent from each other. Each of the ultimate beneficial owners of the Pre-**[REDACTED]** Investors is an Independent Third Party.

Our Pathfinder SIIs

Beijing Xiaomi Zhizao Equity Investment Fund Partnership Enterprise (Limited Partnership) (北京小米智造股權投資基金合夥企業(有限合夥)) ("Xiaomi Zhizao")

Xiaomi Zhizao is a limited partnership established in the PRC on September 18, 2021. The general partner of Xiaomi Zhizao is Beijing Xiaomi Enterprise Management Co., Ltd. (北京小米企業管理有限公司), a wholly-owned subsidiary of Xiaomi Private Equity Fund Management Co., Ltd. (小米私募股權基金管理有限公司) ("**Xiaomi Fund Management**"), which is in turn wholly-owned by Xiaomi

Inc. (小米科技有限責任公司). Xiaomi Inc. is controlled by Xiaomi Corporation, a company listed on the Stock Exchange (stock code: 1810). As of December 31, 2025, other than Wuhan One Eight One Zero Enterprise Management Co., Ltd. (武漢壹捌壹零企業管理有限公司), a company incorporated in the PRC and a wholly-owned subsidiary of Xiaomi Inc., holding 36% partnership interests, there was no other limited partner holding partnership interests of 30% or more in Xiaomi Zhizao.

Xiaomi Fund Management is one of the investment managers of Xiaomi Corporation responsible for managing Xiaomi Corporation's innovative investment portfolio. Xiaomi Fund Management has investment experience in intelligent manufacturing sector. Examples of portfolio companies include companies listed on the Shenzhen Stock Exchange, Shenzhen UUGreenPower Co., Ltd. (深圳市優優綠能股份有限公司) (stock code: 301590) and Wuxi Jinyang New Materials Co., Ltd. (無錫市金楊新材料股份有限公司) (stock code: 301210). Our Group became acquainted with Xiaomi Fund Management during our Series C financing through introduction by industry peers. As of the commencement date of the pre-application 12-month period, Xiaomi Zhizao held approximately 9.29% of the total issued share capital of our Company. As of the Latest Practicable Date, Xiaomi Zhizao holds approximately 8.40% of the total issued shares of the Company. Xiaomi Corporation has a diverse investment portfolio. According to the annual reports of Xiaomi Corporation, (i) as of December 31, 2022, being a date not more than six months prior to the date on which the relevant investor signed the relevant definitive agreement for their investment in the Company, it had invested in more than 420 companies and other long-term investments with an aggregate book value of RMB63.9 billion; and (ii) as of December 31, 2024, it had invested in about 430 companies with an aggregate book value of RMB68.3 billion.

Zhangjiagang Bohua Venture Investment Partnership (Limited Partnership) (張家港博華創業投資合夥企業(有限合夥)) ("Bohua Investment")

Bohua Investment is a limited partnership established in the PRC on May 11, 2018. The general partner of Bohua Investment is Zhangjiagang Bohua Yaoshi Investment Partnership (Limited Partnership) (張家港博華耀世投資合夥企業(有限合夥)) ("**Bohua Yaoshi Investment**"). Bohua Yaoshi Investment is managed by Beijing Bohua Capital Co., Ltd. (北京博華資本有限公司) ("**Bohua Capital**"), which is in turn controlled by Xu Wenbo (徐文博) who owns 74% of the interests in Bohua Capital. Mr. Wei Xiaoan (衛曉安), our non-executive Director, holds 10% of the issued share capital of Bohua Capital. No other entities holds more than 10% of the interests in Bohua Capital. To the best knowledge of our Company, the ultimate beneficial owners of Bohua Investment are independent third parties with no limited partners with equity interests of 30% or more. Our Group became acquainted with Bohua Capital through Bohua Capital's industry research. Bohua Capital pioneers in the "dual investment" strategy comprising of domestic direct investment and fund investment. It is also rated as a class A fund manager by the Insurance Asset Management Association of China. Bohua Capital primarily focuses on growth-stage and pre-**[REDACTED]** stage companies in industries such as next-generation information technology, integrated circuits, artificial intelligence, 5G communications, new energy vehicles, and medical devices. Bohua Capital has led investments in companies including Beijing ESWIN Computing Technology Co., Ltd., BYD Semiconductor Co., Ltd., Shanghai Narinway Technology Co., Ltd., Suzhou Recodeal New Material Co., Ltd., Shanghai Gaussian Automation Technology Development Co., Ltd., Wuxi Yunji Aerospace Industry Co., Ltd., Shanghai Zhaoxin Medical Technology Co., Ltd., Shanghai Re-Fire Technology Co., Ltd., and Inceptio Technology (Shanghai) Co., Ltd.

As of the commencement date of the pre-application 12-month period, Bohua Investment held approximately 8.02% of the total issued share capital of our Company. As of the Latest Practicable Date, Bohua Investment held approximately 7.26% of the total issued share capital of our Company. The assets under management ("**AUM**") of the Bohua Capital was more than RMB5 billion where that

value is derived primarily from Specialist Technology investments as of October 27, 2021 (being a date not more than six months prior to the date on which Bohua Investment signed the relevant definitive agreement for its investment in our Company), and RMB22.71 billion as of December 31, 2025.

Wuxi Liangxi Sci-Tech Innovation Industry Investment Fund Partnership (Limited Partnership) (無錫市梁溪科創產業投資基金合夥企業(有限合夥)) ("Liangxi Investment")

Liangxi Investment is a limited partnership established in the PRC on February 9, 2023. The general partner of Liangxi Investment is Wuxi Liangxi Kechuang Industrial Investment Management Co., Ltd. (無錫市梁溪科創產業投資管理有限公司) ("**Liangxi Kechuang**"). The limited partners of Liangxi Investment are Wuxi Xiangyun Investment Co., Ltd. (無錫市象雲投資有限公司), and Wuxi Liangxi Science and Technology City Innovation Investment Co., Ltd. (無錫市梁溪科技城創新投資有限公司), each holding 49.90% of the interest, and is ultimately controlled by the State-owned Assets Supervision and Administration Office of the People's Government of Liangxi District, Wuxi City (無錫市梁溪區人民政府國有資產監督管理辦公室). Liangxi Kechuang is owned by Jiangsu Boshang Investment Management Co., Ltd. (江蘇博尚投資管理有限公司) ("**Jiangsu Boshang**") as to 70%. The registered largest ultimate shareholder of Jiangsu Boshang is Bohua Capital. To the best knowledge of our Company, the ultimate beneficial owners of Liangxi Investment are independent third parties. Pursuant to the relevant PRC laws and/or the partnership agreement, Bohua Capital does not fully control the investment committee of Liangxi Investment. Liangxi Investment is a partnership dedicated to investing in the technology innovation industry, aims to support the growth of technology-driven innovative enterprises through capital operations, thereby promoting industrial upgrading and regional economic development.

Liangxi Investment is committed to investing in the technology innovation industry, with a primary focus on growth-stage companies in sectors such as robotics and automation, semiconductors, cloud services and artificial intelligence, advanced communication technology, autonomous driving, aerospace technology, advanced manufacturing, advanced materials, new energy, and energy conservation and environmental protection. Its investment strategy aims to support the growth of technology-driven innovative enterprises through capital operations, thereby promoting industrial upgrading and regional economic development. The portfolio companies of Liangxi Investment includes but not limited to Jiangsu Space Pioneer Technology Co., Ltd (江蘇天兵航天科技股份有限公司), a commercial liquid launch vehicle operator, Beijing Micro-Nano Space Technology Company Limited (北京微納星空科技有限公司), a commercial satellite manufacture, Nova Technology (暖哇科技), an insurance AI technology company, Benewake Beijing Technology (北醒(北京)光子科技), a laser radar and solution provider, Kairui Xingtong (凱睿星通), a satellite communication technology solutions provider, Hangtian Yunji (航天雲機), a company focusing on the R&D and production of refueling robot mechanical arms.

As of the commencement date of the pre-application 12-month period, Liangxi Investment held approximately 5.26% of the total issued share capital of our Company. As of the Latest Practicable Date, Liangxi Investment held approximately 14.29% of the total issued share capital of our Company. The AUM of the Liangxi Investment was RMB5.01 billion where that value is derived primarily from Specialist Technology investments as of May 31, 2024 (being a date not more than six months prior to the date on which Liangxi Investment signed the relevant definitive agreement for its investment in our Company), and RMB5.01 billion where that value is derived primarily from Specialist Technology investments as of December 31, 2025.

Our Other Principal Pre-*[REDACTED] *Investors

Tibet Guoke Dingyi Investment Center (Limited Partnership) (西藏國科鼎奕投資中心(有限合夥)) ("Guoke Investment")

Guoke Investment is a limited partnership established in the PRC on July 9, 2015. The general partner of Guoke Investment is Tibet Guoke Jiahe Investment Management Partnership (Limited Partnership) (西藏國科嘉和投資管理合夥企業(有限合夥)), whose general partner is Lhasa Guoke Jiahe Investment Management Co., Ltd. (拉薩國科嘉和投資管理有限公司), which is a wholly owned subsidiary of Cash Capital (Beijing) Investment Management Co., Ltd. (國科嘉和(北京)投資管理有限公司) ("**Cash Capital**"), whose largest shareholder is Beijing Dingxin Huifeng Investment Consulting Co., Ltd. (北京鼎鑫匯豐投資顧問有限公司)) ("**Dingxin Huifeng**")". Wang Ge (王戈) and Chen Hongwu (陳洪武) each holds 50% of the issued share capital of Dingxin Huifeng respectively. Our Group became acquainted with Guoke Investment through industry research and industry events. Founded in 2011, Cash Capital is an equity investment fund initiated by the Chinese Academy of Sciences Holding Co., Ltd. It currently focuses on emerging industries such as information technology (TMT) and life sciences, and invests in high-tech innovation enterprises in their initial and growth stages, particularly those with technical barriers.

Suzhou Yuanming Venture Investment Center (Limited Partnership) (蘇州源明創業投資中心(有限合夥)) ("Suzhou Yuanming VC LP")

Suzhou Yuanming VC LP is a limited liability partnership established under the laws of the PRC in October 2019 which principally engages in venture capital investment. Its general and executive managing partner is Nanjing Yuanxin Management Consulting Co., Ltd. (南京源芯管理諮詢有限公司) ("**Nanjing Yuanxin**"), holding approximately 0.03% interest therein. Nanjing Yuanxin is a limited liability company established under the laws of the PRC, the equity interest of which is ultimately controlled by Mr. Cao Yi (曹毅) ("**Mr. Cao**"), the founder of Source Code Capital (源碼資本). Meaningful Investment from Sophisticated Independent Investors

We have received investments from 3 Pathfinder SIIs, namely Xiaomi Zhizao, Bohua Investment and Liangxi Investment, each having invested in the Group for at least 12 months prior to the first submission of our **[REDACTED]** to the Stock Exchange for the purpose of the **[REDACTED]**. In accordance with Chapter 2.5 of the Guide, each of Xiaomi Zhizao, Bohua Investment and Liangxi Investment held more than 3%, and in aggregate more than 10%, of the issued share capital of our Company as of the date of our **[REDACTED]** and throughout the pre-application 12-months period commencing from June 23, 2024. For details of the shareholding percentage in our Company's share capital of each of the Sophisticated Independent Investors, see "— Capitalization of Our Company."

As of the Latest Practicable Date, our Sophisticated Independent Investors (as identified above) held, in aggregate, approximately **[REDACTED]**% in the total issued share capital of our Company. Upon the **[REDACTED]**, such Sophisticated Independent Investors will hold, in aggregate, no less than **[REDACTED]**% in the total issued share capital of our Company, assuming that our expected market capitalization at the time of **[REDACTED]** will be more than HK$**[REDACTED]** but less than HK$**[REDACTED]**.

PRC LEGAL ADVISOR'S CONFIRMATION

As advised by our PRC Legal Advisor, the equity transfers and increases in the registered capital in respect of our Company and our Company's principal subsidiaries, as described above have been completed and settled, and all material regulatory approvals, registrations or filings have been granted in accordance with PRC laws and regulations.

LOCK-UP PERIOD

Pursuant to the applicable PRC law, within the 12 months following the **[REDACTED]**, all existing Shareholders (including our Pre-**[REDACTED]** Investors) are prohibited from disposing of any of the Shares held by them.

The following Shares will be subject to disposal restrictions pursuant to Rule 18C.14 of the Listing Rules at the time of the **[REDACTED]**:

Name	Capacity	Aggregate number of Shares held immediately following the completion of the [REDACTED] and taking into account of the Share Subdivision[(1)]	Aggregate ownership percentage of shareholding in the total issued share capital of our Company following the completion of the [REDACTED][(1)]	Lock-up period
Key persons and their close associates				
Mr. Wang	Founder, chairman of our Board, executive Director and Chief Executive Officer	38,357,950[(2)]	**[REDACTED]**	Commencing on the date of this document and ending on expiry of 12 months from the **[REDACTED]**
Standard Automation . . .	Share incentive platform controlled by Mr. Wang	31,612,950	**[REDACTED]**	Commencing on the date of this document and ending on expiry of 12 months from the **[REDACTED]**
Mr. Li	Executive Director and Chief Technology Officer	8,410,820	**[REDACTED]**	Commencing on the date of this document and ending on expiry of 12 months from the **[REDACTED]**
Mr. Wang Maolin	co-founder and Dean of the Innovation Research Institute	N/A[(3)]	**[REDACTED]**	Commencing on the date of this document and ending on expiry of 12 months from the **[REDACTED]**
Mr. Zhao Yihao	co-founder and Director of Robotics Research and Development	N/A[(3)]	**[REDACTED]**	Commencing on the date of this document and ending on expiry of 12 months from the **[REDACTED]**
Mr. Lyu Fengchi	co-founder and Director of Algorithms	N/A[(3)]	**[REDACTED]**	Commencing on the date of this document and ending on expiry of 12 months from the **[REDACTED]**
Pathfinder SIIs				
Xiaomi Zhizao.	Pathfinder SII	18,575,850	**[REDACTED]**	Commencing on the date of this document and ending on expiry of six months from the **[REDACTED]**
Bohua Investment	Pathfinder SII	16,048,840	**[REDACTED]**	Commencing on the date of this document and ending on expiry of six months from the **[REDACTED]**

Name	Capacity	Aggregate number of Shares held immediately following the completion of the [REDACTED] and taking into account of the Share Subdivision[(1)]	Aggregate ownership percentage of shareholding in the total issued share capital of our Company following the completion of the [REDACTED][(1)]	Lock-up period
Liangxi Investment	Pathfinder SII	31,578,960	**[REDACTED]**	Commencing on the date of this document and ending on expiry of six months from the **[REDACTED]**

Notes:

(1) Assuming the **[REDACTED]** is not exercised.

(2) Including the 10,063,390 Shares of the Grantors subject to the Voting Proxy Agreements.

(3) Holding indirect interest in the Company as a limited partner of Standard Automation.

PUBLIC FLOAT

Rule 19A.13A of the Listing Rules requires that there must be an open market in the securities for which listing is sought. Where a new applicant is a PRC issuer with no other listed shares at the time of listing, this will normally mean that for a class of securities new to listing, at least a minimum prescribed percentage of that class of securities must be held by the public at the time of listing. Where the expected market value of the class of securities at the time of listing is over HK$6,000,000,000 but not exceeding HK$30,000,000,000, the minimum prescribed percentage is determined at the higher of: (i) the percentage that would result in the expected market value of such securities held by the public to be HK$1,500,000,000 at the time of listing; and (ii) 15%. Assuming that the **[REDACTED]** is not exercised, based on an **[REDACTED]** of HK$**[REDACTED]** per Share (being the low-end of the indicative **[REDACTED]** range), the market capitalization of our Shares immediately upon **[REDACTED]** is expected to be HK$**[REDACTED]**. Accordingly, at least 15% of the total number of issued shares must be held by public upon **[REDACTED]**.

All of the 221,052,630 H Shares will be converted from Domestic Shares (taking into account the Share Subdivision) and **[REDACTED]** on the Stock Exchange following the Completion of the **[REDACTED]** (assuming the **[REDACTED]** is not exercised) and the Conversion of all Domestic Shares into H Shares:

(a) 109,960,680 H Shares representing approximately **[REDACTED]**% of our total issued Shares upon the **[REDACTED]** (assuming that the **[REDACTED]** is not exercised) will not be counted towards the public float for the purpose of Rule 19A.13A of the Listing Rules upon the **[REDACTED]** as such H Shares are held by Mr. Wang (by himself and through Standard Automation and the Voting Proxy Agreements), Mr. Li and Liangxi Investment, the core connected persons of our Company; and

(b) the remaining 111,091,950 H Shares (representing approximately **[REDACTED]**% of our total issued Shares upon the **[REDACTED]** (assuming the **[REDACTED]** is not exercised) will be counted towards the public float for the purpose of Rule 19A.13A of the Listing Rules after the **[REDACTED]** as such Shareholders are not core connected persons of our Company upon the **[REDACTED]** nor accustomed to take instructions from our Company's

core connected persons in relation to the acquisition, disposal, voting or other disposition of their Shares and their acquisition of Shares were not financed directly or indirectly by our Company's core connected persons.

See "Share Capital — Conversion of Domestic Shares into H Shares" for more details of the H Shares to be converted from Domestic Shares and **[REDACTED]** on the Stock Exchange following the completion of the **[REDACTED]** and the Conversion of Domestic Shares into H Shares, taking into account the Share Subdivision.

As a result, immediately upon completion of the **[REDACTED]** and the Conversion of Domestic Shares into H Shares, taking into account **[REDACTED]** H Shares to be **[REDACTED]** pursuant to the **[REDACTED]** (assuming the **[REDACTED]** is not exercised and taking into account the Share Subdivision), an aggregate of **[REDACTED]** H Shares will count towards the public float of our Company, representing **[REDACTED]**% of the total issued Shares of our Company. The public float of our Company immediately upon completion of the **[REDACTED]** is higher than the prescribed percentage of Shares required to be held in public hands under Rule 19A.13A(1) of the Listing Rules, thereby satisfying Rule 19A.13A(1) of the Listing Rules.

FREE FLOAT

Rule 19A.13C of the Listing Rules provides that, where a new applicant is a PRC issuer with no other listed shares at the time of listing, this will normally mean that the portion of H shares for which listing is sought that are held by the public and not subject to any disposal restrictions (whether under contract, the Listing Rules, applicable laws or otherwise), at the time of listing, must: (a) represent at least 10% of the total number of issued shares in the class to which H shares belong at the time of listing (excluding treasury shares), with an expected market value at the time of listing of not less than HK$50,000,000; or (b) have an expected market value at the time of listing of not less than HK$600,000,000.

It is expected that immediately following completion of the **[REDACTED]**, a market capitalization of approximately HK$**[REDACTED]** of the H Shares **[REDACTED]** on the Stock Exchange are not subject to such disposal restrictions at the time of the **[REDACTED]** (assuming an **[REDACTED]** of HK$**[REDACTED]** per **[REDACTED]**, being the low-end of the indicative **[REDACTED]** range, and the **[REDACTED]** is not exercised). Accordingly, our Company will be able to satisfy the requirements under Rule 19A.13C of the Listing Rules.

CAPITALIZATION OF OUR COMPANY

OVERVIEW

Who We Are

We are a leader in industrial intelligent mobile robotic solutions, dedicated to empowering smart factories across a wide range of industrial scenarios. We are also an early mover in the market segment of industrial embodied intelligence robotic solutions. Our tailored one-stop robotic solutions integrate our technology platform, intelligent robots and intelligent collaborative system. We were the fourth largest provider of the industrial intelligent mobile robotic solutions in China by sales volume in 2025, with a market share of 4.0%, according to CIC. As of the Latest Practicable Date, our premier solutions had been recognized and adopted by over 400 customers worldwide, many of which are leaders in their respective sectors. Globally, we are one of the largest industrial intelligent mobile robotic solutions providers in several high-tech sectors as measured by shipment in 2025: second largest in the 3C sector, with a market share of 4.1%, third largest in the automotive sector, with a market share of 4.1% and fifth largest in the semiconductor sector, with a market share of 0.9%, according to CIC.

According to CIC, we are one of the few enterprises in the industry with self-developed full-stack technologies. We started as an early mover of industrial intelligent robotic systems engineering and a proprietary robotic operating system in China. We were among the first companies to launch SLAM technology, according to CIC. Our leadership in localization, navigation, control, and perception and manipulation technologies equip our robots with intelligence, efficiency, and reliability and safety. Powered by world modeling and multi-robot coordination technologies, our robots possess collaborative intelligence. We were among the first in China to have achieved world modeling and collaborative intelligence in industrial robotic systems, according to CIC.

Source: CIC

Notes:

(1) Among the first to develop SLAM technology based on prior information.
(2) One of the first in China to have self-developed operating system for industrial intelligent mobile robots.
(3) First wheeled embodied intelligence robot with the highest degree of freedom in industrial settings implemented in China.
(4) One of the few enterprises capable of scheduling over 2,000 robots in single simulated scenario.
(5) Ranked in terms of sales volume in 2025.
(6) Ranked in terms of shipment volume in respective sector in 2025.
(7) Calculated by dividing the difference between the number of customers in the respective year and the number of new customers in the respective year by the number of customers in the immediately preceding year, multiplied by 100%, for the year of 2023, 2024 and 2025.

We primarily offer tailored one-stop robotic solutions to our customers, empowering their smart manufacturing. Depending on customer needs, we also provide our customers with robots sold individually and related accessories, software and services. Our robots, sharing the same core technology platform, are sold either integrated in our robotic solutions under robotic solutions segments or individually under robots and others segments. All our robtic solutions include robots and are revenue generating.

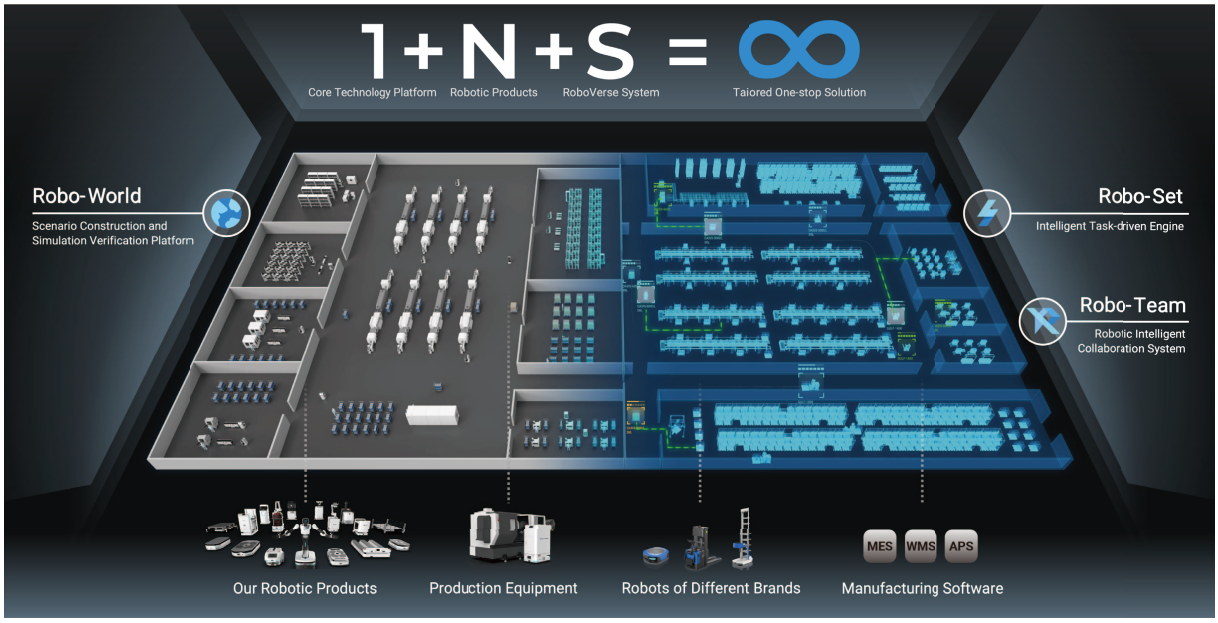

Market Challenges

We are dedicated to providing robotic solutions in a wide range of industrial scenarios, particularly high-tech sectors such as 3C, automotive and semiconductor. These industries are characterized by complex processes, high precision requirements and rapid technological advancements. Traditional production management models increasingly face issues like inefficiency, low reliability and high labor costs, resulting in major bottlenecks in the path toward industrial transformation. Prominent specific issues include: (i) low production efficiency and high hidden costs due to labor dependence; (ii) complex production environments increase the difficulty of production management; (iii) frequent changes in production plans; (iv) high time-sensitivity of material supply; (v) poor compatibility among different types of automation equipment; and (vi) high demands for cross-departmental collaboration.

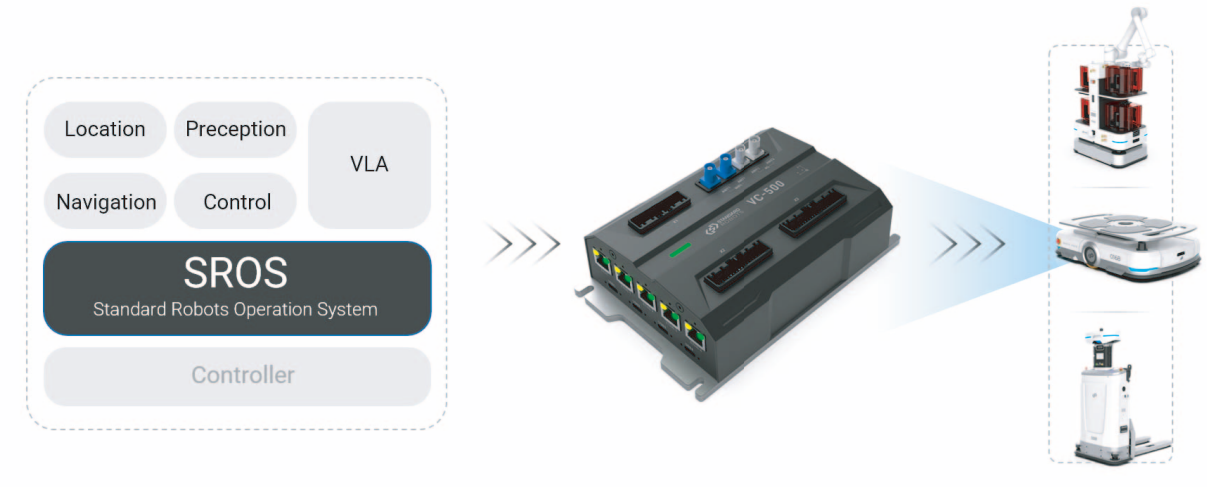

In today's rapidly evolving industrial landscape, there is significant demand for intelligent robotic systems that can operate autonomously and collaboratively in complex manufacturing environments. According to CIC, the global market for industrial intelligent mobile robotic solutions is approximately RMB21.1 billion in 2025 and is expected to increase to RMB80.8 billion by 2030, representing a CAGR of 29.6% from 2026 to 2030. The market for industrial embodied intelligence robotic solutions is anticipated to grow from RMB2.0 billion in 2025 to over RMB15.7 billion by 2030, at a CAGR exceeding 43.7% from 2026 to 2030. This robust growth is fueled by advancements in robotic technology, the need for flexible and efficient logistics solutions and the ongoing shift towards smart manufacturing across industries, particularly high-tech sectors such as 3C, automotive and semiconductor.

Our Robotic Solutions

The philosophy of our robotic solutions is "1 + N + S = ∞." Our tailored one-stop robotic solutions comprise our core robotic technology platform ("**1**"), our industrial intelligent multi-functional robotic products ("**N**") and the RoboVerse System ("**S**"), our one-stop intelligent collaborative system, and encompass a wide range of industrial scenarios. Our goal is to provide infinite possibilities for smart manufacturing ("**∞**").

Our Core Robotic Technology Platform. Our core robotic technology platform consists of a self-developed core controller, our proprietary operating system SROS and algorithms. The operating system and algorithms are embedded in our controllers, which are installed in all our robots. Our controllers are equipped with multi-processor architecture meets high computing power, real-time response, and strict security requirements. The industrial-grade design and verification standards ensure stability and safety. The key features of our self-developed operating system SROS include efficient communication mechanism, heterogeneous processor task scheduling, high real-time performance and continuously evolving AI architecture. Our self-developed algorithms include (i) algorithms for localization, navigation and control, which is a high-precision, adaptive, robust, and self-updating multi-sensor information fusion localization system, and (ii) algorithms for perception and manipulation, which have achieved closed-loop intelligence from command understanding to action execution. The core robotic technology platform meets the demands of high computing power, real-time responsiveness and stringent safety requirements, allows for efficient processing of complex and advanced algorithms, and equips our robots with intelligence, efficiency, reliability and safety.

Our Robotic Products. Our robotic products are built upon our core robotic technology platform, which governs essential robotic functions such as navigation, perception and manipulation. Our robotic products feature modular design — by adding modules serving different functions to the core robotic technology platform, these robotic products are versatile in application across a wide range of industrial scenarios. Our robotic products include standard robots, functional robots and embodied robots. Our standard robots offer mobility in a wide range of complex scenarios. Powered by our proprietary algorithms and advanced autonomous driving technology, standard robots can be seamlessly deployed in new scenarios without requiring any modifications to the specific scenario. Our functional robots include lifting robots, transport robots, forklift robots and tugger robots. By incorporating additional modules into the core robotic technology platform, these robots are equipped with advanced capabilities tailored to specific functional requirements. Our functional robots have lifting, drawing, and transporting functions, enabling precise execution of various tasks. Our embodied robots, including LINK, our classic industrial embodied robots, and DARWIN, our advanced embodied robots, enhance flexibility through increased DoF and enable more general capabilities through AGI. These robots are designed to adapt to and perform a series of complex tasks in a wide range of industrial scenarios. Our embodied robots are versatile tools used in manufacturing sectors. enabling humans and machines to work together seamlessly and safely.

Our RoboVerse System. Our RoboVerse System is a one-stop intelligent collaborative system. It comprises three constituent sub-systems, Robo-World, Robo-Set, and Robo-Team. Robo-World is a sophisticated platform that digitally reconstructs factory scenarios using world modeling technology, enabling precise simulation of operations and providing data-driven insights to optimize smart manufacturing solutions, thereby reducing development time and deployment risks. Robo-Set is an intelligent task engine that simplifies the creation and management of manufacturing tasks through a no-code approach, leveraging built-in templates and intelligent agents to enhance operational efficiency and adaptability. Robo-Team is a collaborative system that unifies diverse robots into a cohesive workforce by employing intelligent algorithms for efficient resource management, real-time path planning, and dynamic task allocation, ensuring robust operation and enhanced system efficiency.

Our RoboVerse system facilitates integration and data exchange across various brands of robots by utilizing standardized communication protocols or adapting to proprietary communication protocols. Building on this foundation, the RoboVerse system incorporates standardized robotic models that unify the motion and action model frameworks of diverse robot configurations. Additionally, the RoboVerse system employs a heterogeneous mapping algorithm which enables robots with different navigation and positioning principles, such as SLAM and QR code navigation, to operate within a unified coordinate space. This innovative approach enhances interoperability and operational efficiency across multi-brand robotic systems. Customers are required to maintain continuous connectivity with our platform and the RoboVerse System in order to operate our robots.

Our robotic solutions are based on a thorough understanding of the actual needs of our customers across various industries, proprietary knowledge of specific industries, and accumulated data. We utilize our technology to simulate the real scenario of our customers' factories, which allows us to formulate and deliver tailored one-stop solutions to our customers, enabling them to achieve robots-centric automation, digitalization, and intelligence in smart manufacturing. The openness of our software allows customers to incorporate equipment and third party robots into their automated production plan.

Our Technological Features

According to CIC, we are one of the few enterprises in the industry with self-developed full-stack technologies. We have successfully developed robotic technologies featuring intelligence, efficiency, and reliability and safety. Leveraging innovative technologies, we are well-versed to deliver tailored one-stop solutions comprising our core robotic technology platform, our industrial intelligent robotic products and the RoboVerse System.

Our core robotic technology platform consists of our core controller, our operating system, namely SROS, and algorithms, which empowers our robots with individual intelligence. Our self-developed operating system SROS is a universal robot operating system suitable for various robot forms. Its key features include efficient communication mechanism, heterogeneous processor task scheduling, high real-time performance and continuously evolving AI architecture. Our self-developed algorithms include (i) algorithms for localization, navigation and control, which is a high-precision, adaptive, robust, and self-updating multi-sensor information fusion localization system, and (ii) algorithms for perception and manipulation, which have achieved closed-loop intelligence from command understanding to action execution. Our advancements in technologies infuse individual intelligence into our robots, enabling them to think, adapt and perform tasks with autonomy.

Drawing on years of experience in research, development, and delivery of industrial intelligent robotic solutions, we have established full-stack robotic systems engineering capabilities. We develop our industrial intelligent robots in a modular design, building all robots with the same core technology platform and adding different modules of functions. This standardization of robotic components allows us to design, manufacture and upgrade our robots in a cost-effective and efficient manner.

Our RoboVerse system is based on self-developed industrial scene-oriented world modeling and mass scale multi-robot coordination technologies. The industrial scene-oriented world modeling technology integrates AI-driven modeling and prediction capabilities to enhance robots' environmental perception and decision-making. The mass scale multi-robot coordination technology enables efficient collaboration among robots, addressing efficiency bottlenecks and complex task distribution. Powered by these technologies, our robots possess collaborative intelligence and can seamlessly adapt to a wide range of industrial scenarios without modifications.

Our Go-To Market Strategy and Premium Customer Base

We employ a highly effective customer-centric go-to-market strategy, focusing on establishing a strong presence and cultivating long-term relationships with major and influential customers in the 3C, automotive and semiconductor sectors. By collaborating with these industry leaders, we design and deliver solutions that set new benchmarks, showcase our capabilities, and strengthen our reputation in the market. This also enhances our understanding of specific industry needs. Our partnerships with established customers encourage mid-sized and smaller customers to adopt similar solutions, further expanding our market share and solidifying our position as a trusted provider of industrial intelligent robotic solutions.

Starting from 2019, we strategically expanded our global presence, targeting key international markets including the Asia-Pacific, North America and Europe to drive growth. This global expansion enables us to deliver our solutions and products worldwide. By consistently delivering high-performance solutions tailored to the specific needs of each high-tech industry, we have built a strong foundation of trust and collaboration with our premium customers, such as Xiaomi Auto, Foxconn and OPPO.

Our Proven Success

We have achieved remarkable growth in recent years. Our total revenue increased from RMB162.2 million in 2023 to RMB250.5 million in 2024, and continued to increase to RMB301.5 million in 2025 and from RMB44.7 million in the four months ended April 30, 2025 to RMB106.9 million in the same period of 2026. Our revenue growth outpaced the increase of our cost of sales, leading to an increase in our gross profit margin, which increased from 31.6% for 2023 to 38.8% for 2024, and continued to increase to 40.5% for 2025 and remained relatively stable at 44.7% for the four months ended April 30, 2025 and 44.5% for the same period of 2026.

STRENGTHS

Market Leadership in Industrial Intelligent Mobile Robotic Solutions and Industrial Embodied Intelligence Robotic Solutions

We are a leader in providing industrial intelligent mobile robotic solutions, dedicated to empowering smart factories across a wide range of industrial scenarios. We are also an early mover in providing industrial embodied intelligence robotic solutions. In the year ended December 31, 2025, we were the fourth largest provider of the industrial intelligent mobile robotic solutions in China by sales volume, according to CIC. Our leading position strengthens our competitiveness by enabling scale efficiencies in R&D, procurement and manufacturing, which in turn support faster product iteration and a structurally lower unit cost. With a large and diversified installed base, we capture extensive operational data across use cases and environments, allowing us to continuously refine algorithms, improve reliability and deliver superior performance benchmarks. Leadership also enhances brand trust and customer preference, shortening sales, while expanding cross_sell and upsell opportunities across our portfolio.

Dedicated to providing robotic solutions for a wide range of industrial scenarios, we are trusted by customers with leading market share in 3C, automotive and semiconductor sectors. In the global market, we are one of the largest industrial intelligent mobile robotic solution providers in several high-tech sectors as measured by shipment, being the second largest in the 3C sector, the third largest in the automotive sector and the fifth largest in the semiconductor sector, according to CIC.

The global industrial intelligent mobile robotics market is projected to grow from RMB21.1 billion in 2025 to RMB80.8 billion by 2030, with a CAGR of 29.6% from 2026 to 2030. The market for industrial embodied intelligence robotic solutions is anticipated to grow from RMB2.0 billion in 2025 to over RMB15.7 billion by 2030, at a CAGR exceeding 43.7% from 2026 to 2030. Our dedications to innovation and industry-focused solutions have enabled us to capture leading market share, reinforcing our position as a leader in industrial automation. Key drivers of market growth include the upgrade of intelligent manufacturing systems, robust demand from downstream industries, labor shortages and rising costs, alongside mature supply chains and increased policy support.

Self-Developed Robotic Technologies Featuring Intelligence, Efficiency, and Reliability and Safety

According to CIC, we are one of the few enterprises in the industry with self-developed full-stack technologies. We started as an early innovator of industrial intelligent robotic systems engineering in China and we were also one of the first in China to have developed our proprietary robotic operating system for industrial intelligent robots. We were among the first companies to pivot into the SLAM technology, according to CIC. We were also one of the first in the industry to have developed VLA for industrial scenarios, according to the same source.

Our leading advancements in localization, navigation and control, and perception and manipulation technologies equip our robots with intelligence, efficiency, and reliability and safety, infusing individual intelligence into our robots, enabling them to think, adapt and perform tasks with autonomy. Our robots achieve high-precision localization with ±2 mm repeat accuracy, navigation, perception and manipulation. Powered by world modeling and multi-robot coordination technologies, our robots possess collaborative intelligence. They seamlessly adapt to a wide range of industrial scenarios without modifications, utilizing multi-level semantic maps, intelligent localization technology, and autonomous navigation algorithms to operate safely and efficiently even in dynamic scenarios. According to CIC, we are one of the few companies to have developed the capability of scheduling over 2,000 robots in a single simulated scenario. There are typically no more than 500 robots involved in a single real-world industrial scenario.

Premier Solutions for Smart Manufacturing across a Wide Range of Industrial Scenarios

We provide industrial intelligent robotic solutions to empower smart manufacturing across a wide range of industrial scenarios, addressing unique operational needs of our customers. Our solutions are characterized by industry-leading intelligence, efficiency, reliability and safety. Drawing on our extensive experience and deep industry expertise, we work closely with customers to develop tailored one-stop solutions that address specific challenges and enhance operational efficiency. Our tailored solutions enable seamless integration with existing factory equipment, support cross-brand and multi-model robot collaboration, and adapt to complex manufacturing processes.

Extensive Deployment by Leading Enterprises

We are dedicated to providing robotic solutions to customers in a wide range of industrial scenarios, particularly leading enterprises in high-tech sectors such as 3C, automotive and semiconductor, and have established a robust and loyal customer base with over 400 customers.

In the 3C sector, our solutions enhance production efficiency by ensuring timely and accurate material supply, adapting swiftly to varying production tasks. Based on shipment volumes of smartphones in 2025, we have served manufacturers represent up to 95% of the market share in China, according to CIC. In the automotive sector, we have provided solutions to five of the top ten

automotive groups in China, which accounted for over 50% of the passenger car market share based on shipment volumes in 2025. The strong load-bearing capacity and high-frequency mixed-line scheduling capabilities of our robots are essential for the simultaneous production of diverse vehicle models, addressing the industry's need for flexible and efficient manufacturing processes. In the semiconductor sector, our robots excel in high-precision, high-cleanliness scenarios, ensuring safe and accurate material handling. We have provided services to three of the top five enterprises in China's semiconductor outsourced semiconductor assembly and test market, which collectively commanded over 70% of the market share in terms of relevant revenue generated in 2025. These accomplishments have built a broad and high-quality customer base, providing a solid foundation for sustained growth.

Visionary Management Team with Technical Expertise and Strategic Insight and Strong Support from Reputable Investors

We are led by a highly experienced management team. They have a proven track record of guiding us through periods of dynamic growth and have demonstrated their ability to commercialize products by tapping into previously unaddressed market needs. The strategic foresight, expertise and leadership of our Chief Executive Officer, Mr. Wang Yongkun, and our Chief Technology Officer, Mr. Li Hongxiang have been instrumental in our growth and success. This stable core team has worked together since our inception, leveraging their professional research capabilities, passion for their work, and forward-looking industry insights to continue to grow as a market leader.

We committed to a path of independent R&D, choosing to innovate rather than modify foreign technologies. Our team has a keen understanding of industry trends and adapts swiftly to national policy directions, expanding from the initial 3C sector to the automotive and semiconductor sectors, maintaining competitive market positioning.

We have received investment and support from strategic partners such as Xiaomi, Qiji and Bohua. Many of these investors are prominent leaders in high-tech industries, which naturally present a wide array of applications for our products and solutions. Their contributions extend beyond significant financial resources; they enhance our brand reputation, deepen our industry insights, and expand our ability to seize future opportunities through their extensive networks.

STRATEGIES

Increase Investment in the R&D of Industrial Embodied Intelligence Technologies

We plan to continue investing in the R&D of industrial embodied intelligence technologies to enhance the capabilities and diversity of our solutions. We will further develop innovative types of embodied intelligence robots to expand our product lineup, while improving the quality and cost-effectiveness of our robotic products and solutions. By refining our localization, navigation and control algorithms, we aim to boost the overall motion performance of our robots. We also envision ourselves to advance our perception and manipulation technologies to expand our robots' capabilities to perceive and interact with the physical world. Additionally, we will continue to strengthen our capacity to build world models and achieve collaborative intelligence.

Our focus is on creating industrial embodied intelligence technologies with general application capabilities. Building on this foundation, we plan to develop smarter robotic products and solutions to meet the ever-evolving demands of industrial intelligent transformation and technological innovation.

Deepen Our Expertise in Industrial Intelligent Robotic Solutions, Particularly in Industrial Embodied Intelligence Robotic Solutions

We aim to deepen our expertise in industrial intelligent robotic solutions, particularly in the rapidly growing market of industrial embodied robotic intelligence. Based on our "1 + N + S = ∞" philosophy of robotic solutions, we focuses on:

- **Core robotic technology platform:** Building a versatile robotic technology platform that integrates AI, machine learning, sensing and control systems, ensuring unified capabilities for easier updates and integration across industries.

- **Robotic products:** Developing a diverse range of robots with comprehensive functions, supported by advanced R&D equipment to enhance product robustness and application-specific functionalities.

- **RoboVerse system:** Iterating intelligent collaborative systems for smart manufacturing by advancing AI technology, expanding simulation scenarios, refining AI agents, and strengthening multimodal data collection, all backed by high-performance computing resources to accelerate AI development.

Enhance In-House Manufacturing Capabilities to Support Sustained Growth

Our production capabilities and production capacity directly impact product quality, delivery efficiency, and market competitiveness. Our Kunshan facility serves as our core production base, offering complete in-house production capabilities that ensure full control from research to delivery. We plan to further enhance our manufacturing capability and production capacity to support domestic and international market expansion. We expect to purchase production equipment and develop new production lines. We plan to deploy our robotic solutions in our new production lines, aiming to establish this new plant as an industry-leading intelligent manufacturing demonstration factory.

Expand Our Influence among Current and Future Customers, Domestically and Internationally

We plan to invest in strategic brand marketing to enhance recognition and influence in domestic and international markets, expanding marketing channels and digital efforts, media partnerships, and local outreach. We will participate in industry exhibitions and seminars to showcase our brand and share industry trends, strengthening our image among a broader customer base.

We aim to expand market influence with current customers by offering embodied intelligence robots that address a wider range of needs, enhancing operational efficiency and fostering long-term partnerships. We will also transform tailored solutions for industry leaders into standardized, scalable modules, making advanced technologies accessible to more businesses and expanding our customer base while maintaining quality. Furthermore, we are expanding globally, focusing on strategic regions like Asia-Pacific, North America and Europe, tailoring our expansion plans to regional characteristics to build a competitive industrial intelligence brand and enhance global business and brand value.

OUR ROBOTIC SOLUTIONS

Our Solutions

We offer tailored one-stop solutions that integrate robots to assist customers in achieving robots-centric automation, digitalization, and intelligence in smart manufacturing. Our solutions are based on a thorough understanding of the actual needs of our customers across various industries, proprietary knowledge of specific industries, and accumulated data. The industrial intelligent mobile robotic solutions can adapt to various complex industrial scenario, offering higher load capacity and flexibility. Industrial embodied intelligence robots can achieve high-precision operations and flexible task execution, completing various complex assembly, and other tasks in industrial production scenarios, meeting the needs of different industries and settings.

The philosophy of our robotic solutions is "1 + N + S = ∞." Our tailored one-stop robotic solutions consist of the following elements:

The "1" — our core robotic technology platform.

The "N" — our industrial intelligent multi-functional robotic products, consisting of our standard robots, functional robots and embodied robots.

The "S" — the RoboVerse system, our one-stop intelligent collaborative system, empowering robots to autonomously operate across scenarios and tasks.

The "∞" — our commitment to provide infinite possibilities for smart manufacturing.

Our Core Robotic Technology Platform

Our core robotic technology platform consists of our self-developed core controller, our proprietary operating system SROS and algorithms. Featuring a CPU+GPU+MCU multi-processor architecture, our core controller integrates self-developed operating system SROS to meet the demands of high computing power, real-time responsiveness and stringent safety requirements. This independently developed controller allows for efficient processing of complex and advanced algorithms. Our core controller is a pivotal component that equips our robots with intelligence, efficiency, reliability and safety.

Our Robotic Products

Our robotic products are built upon our core robotic technology platform, which governs essential robotic functions such as navigation, perception and manipulation. Our robotic products feature modular design — by adding modules serving different functions to the core robotic technology platform, these robotic products are versatile in application across different in a wide range of industrial scenarios. We standardize and reuse core components such as controllers, LiDAR units and motors across different robot models. This practice streamlines new product development because we can rely on proven parts instead of validating new ones, which shortens our R&D cycle and reduces upfront costs. It also benefits our after-sales service — using the same components across the fleet lowers the chance of field failures and allows us to maintain a smaller, more focused inventory of spares, reducing maintenance complexity and cost for our customers and us.

Our robotic products include standard robots, functional robots and embodied robots. Our robots offerings are standardized, except in rare cases we may provide slightly modified products using existing modules to fulfill customers needs.

Our Standard Robots

Our standard robots offer mobility in a wide range of complex scenarios. Powered by our proprietary algorithms — including localization, navigation and control algorithms — standard robots can be seamlessly deployed in new scenarios without requiring any modifications to the scenario, such as the addition of QR codes or magnetic strips on the floor. As customer workflows change and evolve, standard robots can be efficiently redeployed to meet changing needs. Furthermore, they are equipped with a comprehensive set of external interfaces, enabling flexible and versatile functional extensions.

Our Standard Robots have the below key features:

- **Versatile movement capabilities**: Equipped with forward, backward, in-place rotation movements, our robots offer precise navigation and localization. Certain models also support left and right lateral movements, allowing for omnidirectional navigation, which enhances maneuverability in confined spaces.

- **Flexible load capacities**: Covering load ranges up to 2,000 kg, customers can select models that best fit their specific requirements, ensuring scalability and adaptability to various operational demands.

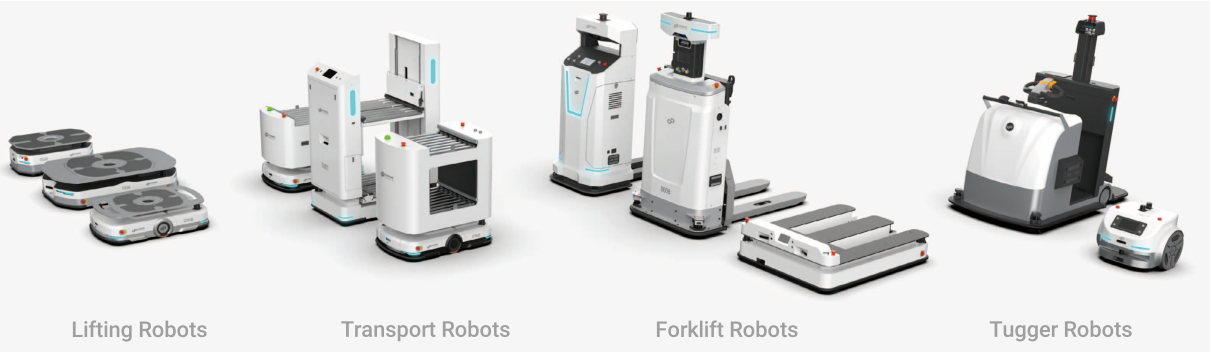

- **High-precision navigation**: Our multi-sensor information fusion localization system achieves ±2 mm repeat localization accuracy, maintaining ±5 mm accuracy even in dynamic scenarios with up to 90% environmental changes.

- **Open integration**: Open electrical interfaces and standard communication protocols support easy integration with various application modules such as collaborative robotic arms and conveyor systems. This enables custom solutions tailored to specific industrial needs without extensive proprietary development efforts.

- **Advanced safety features**: Comprehensive safety systems, including emergency stop functions, obstacle detection, and overspeed monitoring, ensure safe operation in collaborative scenarios.

Our Functional Robots

Our functional robots are engineered to adapt and perform efficiently in a variety of operational scenarios. By incorporating additional modules into the core robotic technology platform, these robots are equipped with advanced capabilities tailored to specific functional requirements. Our different types functional robots are designed to optimize material handling and logistics within industrial scenarios, each offering specialized capabilities to enhance efficiency, precision, and adaptability across various sectors.

Lifting robots: Designed for covert lifting and carrying within factories, lifting robots handle various types of carriers like material carts, racks, pallets and flat carriers. By automating intra-factory transfers, they address repetitive handling tasks and improve efficiency and accuracy. Our lifting robots support material handling from 300 kg to 2,000 kg.

Transport robots: These robots automate the transfer of trays, boxes, and other carriers between equipment interfaces, enhancing automated and precise loading and unloading functions and intelligent management within factories. They address challenges like low production space utilization and difficulties in data tracking and refined management. Equipped with our intelligent localization technology, they achieve high precision docking (±5 mm) and flexible deployment, adapting to varying customer requirements.

Forklift robots: Forklift robots address challenges associated with intra-factory transfers, including high-density stacking, and high-level storage. They automate pallet logistics transfer, enhancing precision and efficiency. Equipped with AI-based perception and control algorithms for high-precision recognition and docking, they utilize our perception & manipulation framework. This includes a semantic-level spatial perception system that provides high-precision perception of objects, obstacles, and dynamic changes in the scenario.

Tugger robots: Tugger robots are designed to tow multiple carts, enhancing the efficient transfer of materials within industrial scenarios. Leveraging our proprietary algorithms and modular hook-and-gripper designs, tugger robots automate the identification and hooking of carts, while easily adapting to existing customer cart designs.

Our Embodied Robots

Embodied robots enhance flexibility through increased DoF and enable more general capabilities through AGI.

LINK, our classic industrial embodied robots. LINK is generally equipped with a single robotic arm and, depending on the specific task to be performed, a special-purpose "hand" to perform the particular function, such as gripping, lifting, pushing and pulling. Equipped with these features, LINK can operate machine interfaces, manipulate objects and transfer materials and finished products. They can perform complex tasks with precision, stability and flexibility, which makes them indispensable in high-tech industries. For example, in semiconductor production, LINK helps ensure the precise transfer and handling of fragile and high-value materials such as semiconductor wafers.

DARWIN, our advanced embodied robots. A wheeled humanoid robot equipped with two arms, DARWIN breaks the limitations of single-arm operation and can complete more complex tasks through coordinated operations with multiple hand-like end-effectors, achieving over 23 DoF. Equipped with a quick-change dexterous hand system, it can rapidly switch between different hand-like end-effectors, efficiently handling tasks ranging from heavy material transport to precise manipulation of small components. DARWIN features omnidirectional chassis, enabling it to navigate complex industrial scenarios with ease and stability at speeds exceeding two meters per second. Its advanced perception system, comprising a matrix of multiple sensors, delivers 360° x 360° dynamic environmental awareness, ensuring operational safety and adaptability.

DARWIN integrates next-generation AGI technologies. Multimodal perception algorithms and a rich sensor matrix allow DARWIN to accurately and comprehensively understand spatial relationships among objects in the physical world. Equipped with end-to-end models such as VLA, DARWIN can achieve cross-task generalization in perception, decision-making, and manipulation. Through continuous high-quality data accumulation and iterative model training, it delivers high efficiency, precision, and a high success rate in task execution.

The table below sets forth the main functions, key features and price range of our robots and features of the robotic solutions that primarily deploy the relevant types of robots.

Functions and Key Features	Features of Solutions	Price Range*
Standard Robots (DoF: 3)		
Main Function: Mobility Key Feature: Standard robots provide mobility for a variety of complex scenarios, driven by proprietary algorithms. They can move omnidirectionally, providing precise navigation and positioning.	Our one-stop tailored robotic solutions that primarily deploy standard robots mainly serve integrators for developing automation solutions.	RMB60,000–350,000 per unit
Functional Robots (DoF: 4 ~ 8)		
Main Function: Mobility plus additional functions (e.g. lifting, transport, stacking and towing) Key Feature: Functional robots integrate additional modules into the core robotics technology platform. In addition to mobility, they can perform advanced capabilities tailored to specific functional requirements.	Our one-stop tailored robotic solutions that primarily deploy functional robots serve customers in a wide range of industries.	RMB100,000–550,000 per unit
Embodied Robots (DoF: 9+)		
Main Function: General purpose functions to perform complex tasks Key Feature: Embodied robots are equipped with enhanced flexibility through increased freedom and achieving more general-purpose functions through AGI. They can perform complex tasks across multiple industrial scenarios, enabling humans and machines to collaborate seamlessly and safely.	Our one-stop tailored robotic solutions that primarily deploy embodied robots primarily serve customers in high-end manufacturing industries such as semiconductor business.	RMB450,000–1,111,000 per unit

Note:

* Represents the price range of each category of robots when sold individually. The pricing of robotic solutions vary widely by projects.

The table below sets forth the number of units of each category of robot sold during the Track Record Period, which include robots both sold individually and integrated in our solutions.

	Year ended December 31,			Four months ended April 30,	
	2023	2024	2025	2025	2026
Standard Robots	237	388	501	41	119
Functional Robots	949	1,525	1,715	294	410
Embodied Robots	26	19	68	18	27
Total	1,212	1,932	2,284	353	556

The sales of embodied robots decreased from 26 units in 2023 to 19 units in 2024, which was a normal fluctuation during the ramp-up phase, as the technology and application scenarios were in the early exploration stage. The sales volume of our embodied robots increased from 19 units to 68 units in 2025 and from 18 units in the four months ended April 30, 2025 to 27 units in the same period of 2026.

Our RoboVerse System

Our RoboVerse System is an one-stop intelligent collaborative system, comprising three constituent sub-systems, Robo-World, Robo-Set, and Robo-Team:

- Robo-World is a sophisticated platform that digitally reconstructs factory scenarios using world modeling technology, enabling precise simulation of operations and providing data-driven insights to optimize smart manufacturing solutions, thereby reducing development time and deployment risks.

- Robo-Set is an intelligent task engine that simplifies the creation and management of manufacturing tasks through a no-code approach, leveraging built-in templates and intelligent agents to enhance operational efficiency and adaptability.

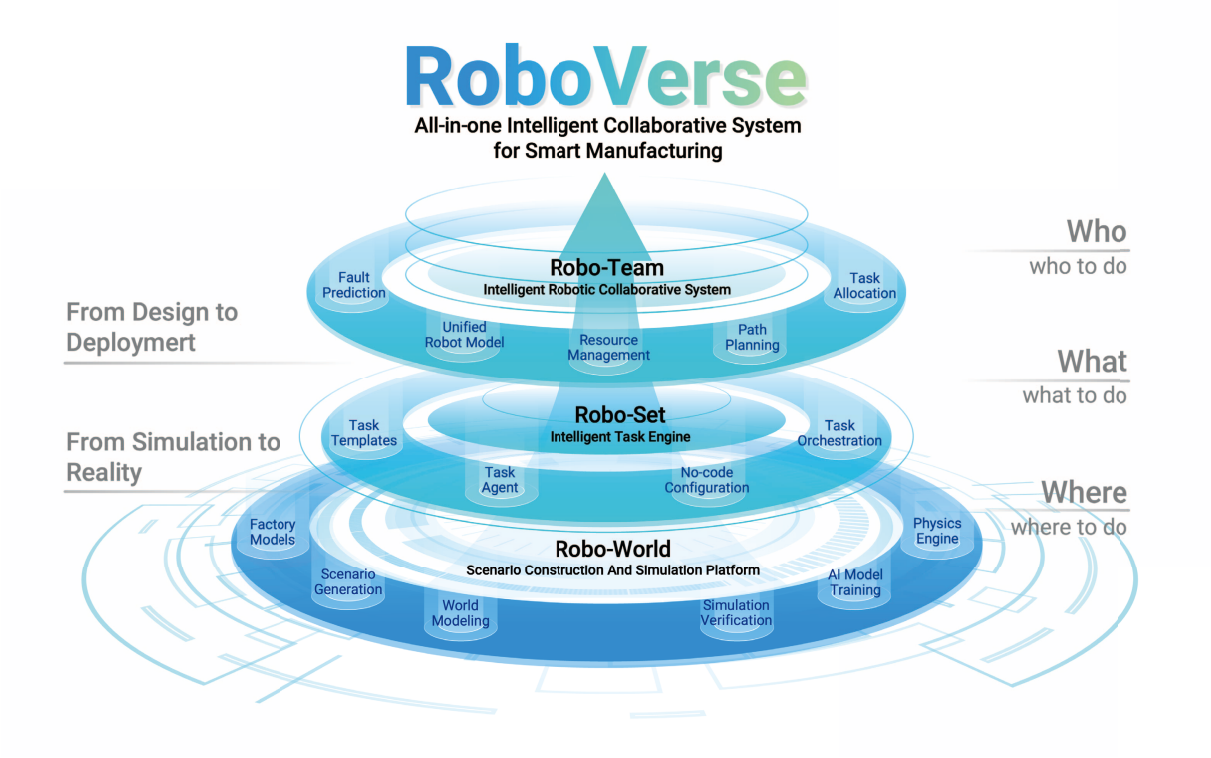

- Robo-Team is a collaborative system that unifies diverse robots into a cohesive workforce by employing intelligent algorithms for efficient resource management, real-time path planning, and dynamic task allocation, ensuring robust operation and enhanced system efficiency.

We use our RoboVerse system throughout pre-sales, delivery, and operational phases to tailor intelligent robotic solutions, simulate and manage digital factory scenarios, and enhance smart manufacturing efficiency, quality, and safety for our customers' high-tech industry needs.

In the pre-sales phase, we utilize our RoboVerse system to gain an in-depth understanding of the customer's needs, including products, processes, materials, factory layout, information system, and production cadence. Based on the understanding obtained in this phase, we then formulate tailored intelligent robotic solutions particular to each of our customers. Through Robo-World, we simulate a digital industrial scenario. Through Robo-Set, we simulate the operation process of the robot cluster in the customer's factory based on production materials and layout. Through Robo-Team, we simulate the collaboration of robot cluster with dynamic task changes. Supported with RoboVerse system, we select the appropriate models and quantities of robots.

In the delivery phase, we manufacture and deliver robots to the site and deploy our robotic solutions. Building upon pre-sales simulation results, through Robo-World, we deploy an actual digital model of the factory; through Robo-Set, we assign production tasks based on production needs; through Robo-Team, we schedule and manage robot operations on-site, achieving coordinated scheduling with existing personnel, production equipment, and other robots.

In the operational phase, our customers use our robotic solutions to achieve robots-centric smart manufacturing. By improving production efficiency, reducing production costs, ensuring production quality, and enhancing production safety, our robotic solutions specifically address the challenges of complex production in the high-tech industry, meeting the dynamic production needs of the high-tech industry, as well as the high precision and time requirements for material distribution and production needs.

Robo-World: Crafting the Intelligent Manufacturing Landscape ("Where"), Bringing Virtual World to Reality

Robo-World is a scenario construction and simulation verification platform based on world modeling. Robo-World incorporates a rich and extensive library of factory models. It can digitally reconstruct a customer's factory quickly and accurately using information from CAD, natural language and other sources. The reconstructed model includes the key elements of factory operations. With the high-precision physics engine as the underlying driver, Robo-World can achieve precise simulation of factory operations. It generates targeted production operation simulation reports, helping customers assess the rationality of smart manufacturing solutions and determine optimization directions based on data-driven insights. This significantly reduces the time and resources required for developing and validating smart manufacturing solutions, thereby improving efficiency and reducing deployment risks.

Robo-Set: Orchestrating Intelligent Manufacturing Tasks ("What"), Simplifying Complexity with Intelligent Task Engines

Robo-Set is an intelligent task-driven engine. It helps factories quickly and efficiently build intelligent manufacturing production systems by orchestrating tasks across different production modes and processes. It drives the operation of production system through production task creation and management methods. By selecting a large number of built-in scenario and configuring task templates through a no-code approach, the process becomes highly efficient and customer-friendly, reducing reliance on specialized technical personnel. The built-in task agents continuously learn the production modes of smart factories. By inputting business requirements described in natural language, the task agents directly generate corresponding production tasks, further simplifying production process configuration and enabling rapid adaptation to changing needs. Robo-Set streamlines the creation and

management of production tasks, enhancing operational efficiency and adaptability. By simplifying task configuration and leveraging intelligent agents, it reduces configuration time and accelerates the implementation of intelligent manufacturing systems.

Robo-Team: The Collaborative Brain of Intelligent Robots ("Who"), Unifying Diverse Robots into a Cohesive Workforce

Robo-Team is an intelligent robotic collaboration system. It supports efficient collaboration among robots of different forms and brands. It addresses the issues of poor compatibility and low collaboration efficiency found in traditional systems. Robo-Team employs various intelligent collaboration algorithms to achieve efficient resource management and allocation. Through intelligent fault prediction technology, Robo-Team monitors operational status of the robot cluster in real-time, conducts deep analysis of anomalies, and automatically adjusts scheduling strategies.

The openness of our software allows customers to incorporate equipment and third party robots into their automated production plan. In a typical manufacturing plant, materials move from the central warehouse through multiple processing stages before becoming finished goods, a journey that involves numerous production machines, software systems and internal-logistics activities. The customer's existing business software orchestrates day-to-day production and transmits the resulting material-delivery requests to our RoboVerse platform. Because RoboVerse provides a unified set of data interfaces, it links seamlessly with the factory's IT systems and process equipment, then dispatches and coordinates our robots to pick up raw materials, deliver them to the correct workstations, and return semi-finished or finished items, all without manual intervention. To achieve a fully one-stop solution, some customers choose to add third-party softwares like a production-scheduling application and/or hardwares like compact line-side storage units, which act as small buffer warehouses next to the production line; these optional additions are easily integrated to our solutions and extend automation across the entire manufacturing flow. By combining our robots with these complementary software modules, storage units and site-specific engineering, customers create an integrated, end-to-end automation solution tailored to their specific production requirements.

Our solutions draw on our experience and proven success in creating advanced robotic solutions from complex, high-tech manufacturing scenarios to all industries. The following case studies demonstrate how our solutions are integrated in broader intelligent manufacturing scenes and deliver exceptional value and drive success for our customers.

Case Study 1: Solution for a Leading New Energy Vehicle Super Factory

Background

A prominent new energy vehicle manufacturer embarked on constructing its strategic new energy vehicle manufacturing plant with exceptionally high standards.

Challenges

- **Accelerated project timeline:** Due to high-stake and complex nature of the project, we have to constantly solve new issues and respond to evolving decision-making process from the customer.

- **Fast-paced large-scale manufacturing:** The new energy vehicle production is characterized by numerous heavy-load process requirements, with significant variations in component specifications, dimensions and weights across different models.

- **"Just-in-sequence" needs:** Customer imposes stringent requirements on production efficiency and materials being delivered "just in sequence." In automotive manufacturing, production processes are tightly interconnected, with any disruptions or logistical delays potentially triggering cascading effects, leading to production halts and substantial economic losses.

- **Mixed model production:** To meet market diversification demands, automotive manufacturers widely adopt mixed-model production lines. This requires robots with robust payload capacities and high-frequency mixed-model scheduling capabilities.

Solution

We deployed over 150 robots of different models in the workshops, with all robots centrally managed and dispatched by our RoboVerse system. Our solution empowers a functionally comprehensive and highly compact automotive manufacturing facility, with 100% automation in the key processes across its several core workshops.

Our value proposition combines deep automotive experience with the RoboVerse system to design, simulate, and adjust quickly for fast deployment; robust robots with high payload and precise performance to support stable, high-capacity production; centralized dispatch and traffic control of over 150 robots on a unified map for easy monitoring, operation and maintenance, and reliable just-in-sequence delivery that reduces disruptions; and flexible, AI-driven mixed-model scheduling that adapts to frequent product changes, enables quick switching, and helps achieve 100% automation across key workshops.

Case Study 2: Solution for a Leading Smart Phone Module Mega Factory

Background

Our customer runs a mega factory focusing on manufacturing precision components related to smart phones. This project encompassed several assembly production lines, handling approximately 20,000 material movements every 24 hours, highlighting our solutions in meeting the high-frequency demands of intelligent manufacturing.

Challenges

- **Integration of complex production processes:** The factory featured dozens of distribution stations with automated sector transfer docking. The limited layout space raised additional challenges for navigation, operations and collaboration between workers and high-speed robots.

- **High-volume task assignment:** Another challenge is to manage high-capacity production (featured by approximately 20,000 material movements daily across several assembly lines) without bottlenecks or delays.

- **Rapid product iterations and high flexibility scheduling problem:** The manufacturing process involves rapid product iterations, necessitating high flexibility to accommodate diverse production needs.

Solution

We provided a comprehensive intelligent robotic solution, deploying around 50 robots, including our customized robots designed for the 3C sector, and implemented the RoboVerse system to integrate the complex production process.

Our solution delivers precise, safe operations in dynamic environments, using intelligent localization and adaptive safety to achieve millimeter-level accuracy even with a 90% environmental change rate, enabling humans and high-speed robots to work side by side. Coordinated deployment of machinery and robots allows simultaneous debugging, shortens implementation timelines, and boosts efficiency, while automating the full assembly workflow from component assembly to final assembly. By reaching 100% automation for in-process transport and loading/unloading, we reduced headcount by over 60 workers, improved ROI with a payback within 18 months, and lowered reliance on manual labor. The system also integrates with both manual and robotic handling to support ramp-up and ensure a stable, smooth transition to full automation without disrupting existing workflows.

Our Business Model

We have adopted a transaction-based model for the sales of (i) robotic solutions, and (ii) robots and others. Robots and others primarily consist of robots sold individually and related accessories, software and services, including the RoboVerse system software, technical support services and other parts, components and accessories which are required or essential for the functioning and/or enhancing the performance of the robots and robotic solutions supplied by us. The robotic accessories, software and services are either developed by us in-house or specifically sourced by us and require our services to be integrated with robotic products or solutions. All of these are considered a single performance obligation, with one pricing and contract amount for each order. We charge our customers for the sales of (i) robotic solutions, and (ii) robots and others on one-off basis.

Factors considered by us in pricing our robotic solutions include the types of robots to be used, technical specifications, project size, after-sales commitment, sales channel and product competitiveness. For pricing our robots sold individually, we take into account the product type, technical specifications, after-sales commitment, sales channel, and product competitiveness. Additionally, for sales in markets outside mainland China, we consider the region and required certifications. We do not generate recurring revenue through ongoing upgrades or enhancements to our robotic solutions or robots sold individually under our sales arrangements with customers.

Our delivery process covers design, component procurement, manufacturing and testing, and outbound logistics. For domestic orders of non-customized products, the lead time is typically four to six weeks, with additional 20 to 50 days for overseas shipments. Full-scale, tailored one-stop projects such as end-to-end plant automation are executed in phased milestones and generally reach completion within three to nine months, depending on scope and site conditions.

For our robotic solutions, installation services are not separately priced in the contracts. Instead, they are combined with other products or services in the contracts as one single performance obligation, which is fulfilled when the solutions are accepted by the customer. Generally, there are no significant after-sales services required, as the solutions are highly customized and have demonstrated operational effectiveness upon customer acceptance. For robots individually, installation is a simple assembly process with minimal value and is not separately priced in the contract. Consequently, the entire contract consideration is fully allocated to the product, and the revenue is recognized when the product is accepted by the customer. We provide general repairs for defects occurring during the one-year warranty period for both robotic solutions and robots. Provisions for these assurance-type warranties are initially recognized based on sales volume and historical data regarding repair and return levels. The warranty-related costs are reviewed and revised annually. After the warranty period, we may provide repair or technical support services to the customers for a fee, upon request. These services are separately priced, and the revenue is recognized once services are completed and accepted by the

customer. The designed lifespan of our robotic products is normally five years. After this period, they can typically continue to function; however, system upgrades will no longer be available. We generally release a new generation of our robots every two years.

The following table shows the details on the contract value of our orders awarded and completed during the Track Record Period:

	Year ended December 31,			Four months ended April 30,
	2023	2024	2025	2026
	(RMB in thousands)			
For All types of Orders				
Contract value as at the beginning of period[1]	138,988	164,883	121,991	168,433
Contract value of new orders[2]	188,061	207,630	347,935	124,460
Revenue recognized[3]	162,166	250,522	301,493	106,940
Contract value as of the end of period[4]	164,883	121,991	168,433	185,953

Notes:

1. "Contract value as at the beginning of period" means the total contract value carried forward from the previous period.
2. "Contract value of new orders" means the total contract value of new orders obtained during the relevant period.
3. "Revenue recognized" means the total revenue recognized from all types of orders during the relevant period.
4. "Contract value as of the end of period" means the contract value as of the beginning of period plus the total contract value of new orders awarded to our company minus total revenue recognized during the relevant period.

The following table shows the details on the movement of the number of our robotic solution projects during the Track Record Period:

	Year ended December 31,			Four months ended April 30,
	2023	2024	2025	2026
	(unit)			
For Robotic Solution Projects				
Number of projects as of the beginning of period	148	172	153	108
Number of new projects obtained during the period	265	283	327	84
Number of projects completed during the period	241	302	372	80
Number of projects as of the end of the period	172	153	108	112

During the Track Record Period, we noticed a general growth trend in the average contract value per project and the number of projects or orders with large transaction value, mainly because (i) we have built up the capability to handle large projects and orders, evidenced by the general increase in the number of projects completed during the Track Record Period; and (ii) the industry has reached a turning point, with customers moving beyond the trial phase and expanding the scale of their projects.

The table below summarizes details of our material robotic solution projects during the Track Record Period:

Ranking	Project Location	Nature of Products Included in the Project	Served Industry	Contract Value	Project Status as of the Latest Practicable Date
				(RMB in millions)	
For the Year Ended December 31, 2023					
1	InnerMongolia	Functional Robots, Embodied Robots	Others	11.5	Completed
2	Ganzhou	Functional Robots	3C	9.0	Completed
3	Zhuhai	Functional Robots	New Energy	7.6	Completed
For the Year Ended December 31, 2024					
1	Taiwan	Functional Robots, Standard Robots	3C	31.2	Completed
2	Dongguan	Functional Robots	3C	4.8	Completed
3	Hangzhou	Functional Robots, Standard Robots	Others	4.2	Completed
For the Year Ended December 31, 2025					
1	Singapore	Functional Robots	Semiconductor	38.8	On-going
2	Huizhou	Functional Robots	3C	15.8	Completed
3	Hefei	Functional Robots	Automotive	14.8	On-going
For the Four Months Ended April 30, 2026					
1	Taiwan	Functional Robots	3C	24.9	On-going
2	Taiwan	Functional Robots	3C	19.25	On-going
3	Wuhan	Functional Robots	Automotive	13.7	On-going

Commercialization

We are engaged in the design, development and manufacturing of, and have achieved commercialization of, (i) robotic solutions, and (ii) robots and others. Our robotic solutions comprise our core robotic technology platform, our industrial intelligent multi-functional robotic products and our all-in-one intelligent collaborative system, the RoboVerse system. Our core robotic technology, robotic products and the RoboVerse system are self-developed. Our robotic products include standard robots, functional robots and embodied robots. See "— Our Robotic Solutions" for details. We also provide our customers with related accessories, software and services, including the RoboVerse system software, technical support services and other parts, components and accessories which are required or essential for the functioning and/or enhancing the performance of the robots and robotic solutions supplied by us. Such other parts, components and accessories mainly include controllers, LiDAR, batteries, battery modules, camera, etc. which were either designed by us or required commissioning by us or necessary accessories to suit the implementation or functioning of the robots and robotic solutions supplied by us. Customers in this segment, except for new customers purchasing a single robot (along with related accessories, software and services) for trial purposes, are typically existing customers who need these products to work in conjunction with the robots that they previously brought from us.

According to CIC, driven by synergistic advancements in hardware and software, industrial intelligent robots have become a key force in upgrading smart manufacturing systems. Their adoption is accelerating in response to global industrial intelligence growth and robust downstream demand from sectors such as 3C, automotive, and semiconductor. By deploying industrial intelligent robots at scale and enabling collaborative operationsamong them, factories can achieve automated, intelligent, and flexible production processes.

Our industry consultant, CIC, confirms and our Directors are of the view that based on the information above, each of (i) robotic solutions, and (ii) robots and others fall within the robotics and automation (robot technology) sector, which is an acceptable sector of a Specialist Technology Industry as defined under Chapter 18C of the Listing Rules.

OUR CORE TECHNOLOGIES

Our core robotic technology platform consists of our core controller, our operating system SROS and algorithms, which empowers our robots with individual intelligence. Drawing on years of experience in research, development, and delivery of industrial intelligent robotic solutions, we have established full-stack robotic systems engineering capabilities. We develop our industrial intelligent robots with a modular feature, building all robots with the same core technology platform and adding different modules of functions. This standardization of robotic components allows us to design, manufacture and upgrade our robots in a cost-effective and efficient manner. Our RoboVerse System is based on self-developed industrial scene-oriented world modeling and mass scale multi-robot coordination technologies.

Core Controller

Our core controller is a pivotal component that equips our robots with exceptional performance, precision and reliability:

- **Heterogeneous multi-processor architecture:** We adopt a CPU+GPU+MCU multi-processor architecture combined with our self-developed robot operating system to fully leverage hardware performance. This architecture simultaneously meets the demands for high computational power, real-time responsiveness and stringent safety requirements. Further more, this approach enhances the scalability of computing power and provides robust support for a variety of complex AI models.

- **Industrial-grade design:** We design our electric circulates to meet to industrial-grade design standards and conduct comprehensive electromagnetic compatibility design and validation. This ensures that our robots maintain stable operation in complex industrial scenarios. Furthermore, we embed an independent security monitoring processor within our controllers and ensure that the system remains safe even under extreme scenarios.

Robot Operating System — SROS

We have developed a universal robot operating system, SROS, suitable for various robot forms, utilizing a three-tier architecture comprising a hardware abstraction layer, resource support layer and core algorithm layer. Key features include:

- **Efficient communication mechanism**: We establish a multi-sensor data fusion communication bus and a loosely coupled asynchronous communication mechanism. Leveraging a highly optimized data serialization mechanism and "zero-copy" memory technology, processing latency is reduced to the microsecond level.

- **Heterogeneous processor task scheduling**: The operating system is capable of managing computation tasks across heterogeneous processors, ensuring optimal utilization of computing resources. Through a unified message structure and bus mechanism, the system supports horizontal scaling with additional processors to enhance overall computing power.

- **High real-time performance**: Through deterministic task scheduling, we ensure microsecond-level low-latency responses for critical system tasks, maintaining high real-time control even in robots with up to 28 motors.

- **Continuously evolving AI architecture**: This architecture is integrated with an incremental machine learning engine, building an efficient model production and deployment system. It supports operational data acquisition and efficient storage, online model updates, improving the iteration efficiency of core algorithm models and meeting various needs of intelligent manufacturing scenarios.

Localization, Navigation & Control Algorithms

We have developed a high-precision, adaptive, robust and self-updating multi-sensor fusion localization and intelligent navigation system, along with a model-based robot control system. Highlights include:

- **Multi-level semantic maps:** We develop technology for building and updating global and local semantic maps, endowing robots with environmental understanding capabilities, enhancing intelligence and operational efficiency.

- **Localization technology:** Based on multi-sensor fusion technology, the repeat localization accuracy of our robots reaches ±2 millimeters and even with environmental changes up to 90%, maintains ±5 millimeter precision, demonstrating excellent capability to adapt to scenarios.

- **Motion control technology**: We develop superior and generalizable algorithms that can achieve exceptional stability and execution precision across various types of robots.

- **Autonomous navigation algorithms**: Our algorithms combine neural network models with heuristic search, enabling intelligent decision-making and real-time obstacle avoidance, ensuring safe and efficient operation even in highly dynamic scenarios.

- **End-to-end navigation architecture**: We establish an industry-leading end-to-end navigation system, providing outstanding capability to adapt to scenarios and continuously optimizing through reinforcement learning (RL).

Perception & Manipulation Framework

Our robot systems achieve closed-loop intelligence from command understanding to action execution:

- **Spatial intelligent perception**: Our high-precision spatial intelligent perception technology excels in target pose capturing and dynamic obstacle detection, improving operational efficiency and safety.

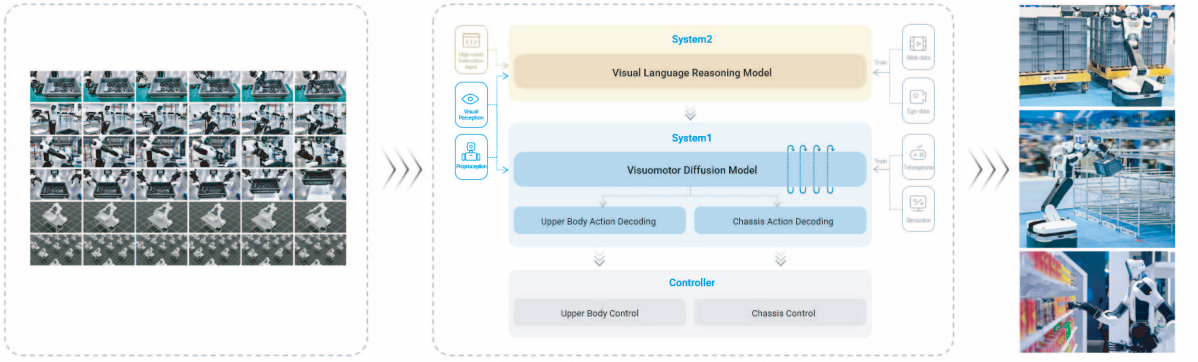

- **Multi-modal perception**: Leveraging multi-modal perception algorithms and a rich sensor matrix, robots can accurately and comprehensively understand the semantic and spatial relationships of objects in the environment.

- **Robot teleoperation and imitation learning (IL)**: Through low-latency robot teleoperation technology, we achieve high-quality multi-modal data collection, accelerate the upgrade of IL skill models and enable robots to have smoother, more efficient and stable operation capabilities.

- **Intelligent decision-making model**: We have developed an embodied intelligence technology that integrates Vision-Language model (VLM) and IL. This provides robots with the ability to understand commands and dynamically combine decisions, efficiently handling dexterous operations and long-chain task scenarios.

- **Dual-System VLA Architecture**: We build a VLA model-based multi-modal intelligent execution framework with multi-modal understanding and generalization capabilities, enabling robots to comprehend complex natural language, recognize real environments and execute tasks that align with semantic expectations.

Our robotics incorporate extensive AI technologies to enhance intelligence and operational efficiency. First, multimodal-perception models trained with deep-learning methods accurately identify target objects and estimate their spatial pose, enabling precise subsequent manipulation. Second, high-quality operation data are collected through teleoperation and fed into imitation-learning pipelines, yielding vision-action models that markedly improve autonomous manipulation capability. Third, a dual-system VLA architecture allows the robots to interpret natural-language instructions and flexibly combine their individual skills, thereby completing complex, continuous tasks without additional programming.

Robotic Systems Engineering

Drawing on years of experience in research, development, and delivery of industrial intelligent robotic solutions, we have established full-stack robotic systems engineering capabilities. Our comprehensive approach includes:

- **Mechatronic system architecture**: Developed a highly cohesive yet loosely coupled architecture, ensuring optimal performance while supporting independent iterative development and future scalability.

- **Solution rack**: Through a collaborative model that includes independent development and vertical integration, we have standardized and modularized robotic systems, subsystems and core components, achieving scenario closed-loop verification. We have accumulated over 200 high-reliability, mass-production-level common basic blocks, enhancing R&D efficiency, cost control, and quality assurance.

- **Dynamics design platform**: Our dedicated platform achieves high-precision dynamic modeling. It enables accurate measurement of dynamic coefficients and includes a database of multi-physical scenarios. Equipped with comprehensive testing and calibration systems, we have improved development efficiency by over 40% and achieved millimeter-level algorithm control precision across robot clusters.

- **Electrical and electronics engineering technology**: We have full-stack robotic electrical and electronic engineering capabilities, covering safety, reliability, electromagnetic compatibility, safety and environmental compliance and certification design.

- **Security technology**: We establish a comprehensive robotic safety system covering emergency stops, personnel detection, overspeed monitoring, hardware diagnostics, and more. This enables us to tackle safety challenges across various scenarios. We have obtained major certifications like CE certification, US UL certification, Chinese CR certification and semiconductor Semi (S2) certifications.

This comprehensive technical system addresses stringent requirements regarding safety, reliability, task success rate, operational precision and delivery efficiency, laying a solid foundation for developing high-performance robotic solutions.

Industrial Scene-Oriented World Modeling Technology

Our technology integrates AI-driven modeling and prediction capabilities to enhance environmental perception and decision-making of robots:

- **Scene generation and prediction**: We utilize generative models and dynamic evolution modeling to capture environmental features, generate realistic scenes, and predict trends, optimizing robot decision-making.

- **Sim-to-real digital simulation**: Leverages high-fidelity simulation to recreate real production line scenarios, our robots optimizes navigation and operations through reinforcement learning.

- **Data-to-sim intelligent data platform**: This is an efficient automated training system integrating multi-modal data, enhancing scene generalization capabilities, and accelerating precise understanding and agile adaptation to complex environments of robots.

Mass Scale Multi-Robot Coordination Technology

Our technology enables efficient collaboration among robots, addressing efficiency bottlenecks and complex task distribution:

- **Multi-robot path planning ("MAPF")**: Our multi-robot path planning algorithms are designed based on MAPF, able to plan optimal paths in real-time based on path resource utilization, reducing congestion and improving resource utilization towards global optimality.

- **Heterogeneous map fusion**: Our technology integrates sensory data from multi-form robots in real-time into a unified scene description model, ensuring spatial consistency during collaboration and supporting large-scale automatic deployment.

- **Intelligent task allocation**: Combining operational research optimization algorithms and dynamic allocation techniques, we achieve real-time and efficient task distribution, improving system throughput and task execution efficiency.

- **Task agent technology**: Task agents can parse complex task requirements expressed by users in natural language, generate executable instruction flows for robots and allocate them. They support users in flexibly adjusting business needs.

- **Intelligent system fault prediction**: It monitors the operational data of robot clusters in real-time, using an AI reasoning framework to predict and diagnose issues, adjusting cluster collaboration strategies to improve efficiency and operational robustness.

RESEARCH AND DEVELOPMENT

We have always prioritized R&D as a core driver of our business growth and innovation. With strong R&D capabilities, we are one of the few companies in the industry to have self-developed full-stack core technologies, according to CIC. We are committed to spearheading the development of industrial embodied intelligence robotic technologies, achieving collaborative intelligence, and ensuring our leadership in the industrial intelligent robotic industry.

Our Key R&D Projects

To sustain our technological leadership and expand our products and solutions offerings, we are pursuing strategically important projects. The table below sets forth examples of the principal features, latest status and commercialization timetable of our ongoing key R&D projects.

Category	R&D Project	Brief Description	Primary Objective	Current Status	Target Commercialization
Embodied Robots	Next-Generation DARWIN	Wheeled humanoid robot with embodied-AI algorithms; new version targets higher reliability, improved manufacturability, and ultra-low unit cost for large-scale production.	Improve stability, optimize manufacturability, and reduce system cost.	Under testing and validation.	Q3 2026
Embodied Robots	Next-Generation LINK	Mobile base plus integrated robotic arm for high-end industrial applications (semiconductor, 3C, etc.); combines strong mobility with precise material handling and proprietary embodied-AI for broader task generalization.	Serve high-end industrial use cases while boosting intelligence and task generalization.	In design and development stage.	Q3 2026
Standard Robots	"Zero-Deployment" EasyGO	Low-cost mobile robot for simple scenarios; onboard or built-in screen enables transition from on-site placement to live operation with no engineering effort.	Expand product line with a low-cost, zero-deployment offering.	In small-batch trial production.	Q3 2026
Core Tech Platform	World-Model-Enhanced VLA for Industrial	Enables robots to understand both visual and language instructions, improves their ability to predict future states resulting from different actions, and allows them to generate more appropriate and safer control actions.	Expand sequentially in high-value industrial scenarios.	In design and development stage.	Q4 2026
Core Tech Platform	Embodied Robot Core Controller RC100	Embodied-AI algorithms demand higher computing power and real-time responsiveness; RC100 leverages heterogeneous processor architecture and robot operating system technologies to strengthen hardware-software integration and provide a reliable computing foundation for embodied-AI algorithms.	Enhance robot system performance and reduce hardware cost.	In design and development stage.	Q4 2026

Our R&D Talents

As of April 30, 2026, our R&D team comprised 141 members. The core members of our R&D team have an average of nearly 10 years of industry experience, and many of them hold postgraduate degrees. Their leadership ensures us to remain at the forefront of industrial intelligent robotic innovation.

Mr. Hongxiang Li is our co-founder and Chief Technology Officer. Mr. Li obtained his Bachelor's Degree in Computer Science and Technology from Harbin Institute of Technology (哈爾濱工業大學) in the PRC in June 2014 and has joined us since our inception. With nearly a decade's experience in industrial intelligent mobile robots, he is in charge of the establishment of our core robotic technology platform, leads the research and development of our RoboVerse system, and is responsible for defining and implementing our robotic products and solutions.

Mr. Maolin Wang is our co-founder and Dean of the Innovation Research Institute. He holds a Bachelor's degree in Communication Engineering from Harbin Institute of Technology. With nearly a decade of experience in the field of industrial intelligent mobile robots, Mr. Wang leads our team in exploring embodied intelligence and facilitates the application and implementation of cutting-edge AI algorithms in our embodied intelligent robotic solutions. He is also responsible for strategy and incubation of our innovative businesses.

Mr. Yihao Zhao is our co-founder and Director of Robotics Research and Development. Mr. Zhao holds a Master's degree in Mechanical Engineering from Harbin Institute of Technology. As a core R&D leader with nearly a decade's experience, he has led our robot development efforts, including our core controller and major robotic products. He also led the team in launching our embodied intelligence robotic system architecture and product series.

Mr. Fengchi Lyu is our co-founder and Director of Algorithms. He holds a Bachelor's degree in Light Chemical Engineering from South China University of Technology and a Master's degree in Mechatronic Engineering from Harbin Institute of Technology. With around a decade's experience in robot intelligent algorithm, he has led breakthroughs and innovations in key technologies, such us localization, navigation and control, perception and manipulation, and VLA model, which equip robots with intelligence.

The salient terms of agreements with management and technical staff are set out below:

Confidentiality	During and after the employment, the employee shall not, without our consent, divulge, disseminate, publish or otherwise make known to any third party, or in any way use any information, such as technical and trade secrets, belonging to us or belonging to any other party for which we have a duty of confidentiality.
Ownership of intellectual properties	We own all rights (including patent rights, copyrights, know-how and all other intellectual property rights) relating to any and all Inventions, utility models and designs, know-how etc., by the employee during the term of the employment contract, and the employee shall take best effort to help us secure full rights and protect our legitimate interests.
Non-competition	During the term of employment and the non-competition period initiated by us, employees shall not engage in any competitive behavior specified in the agreements.
Non-solicitation	During and after the employment, the employee shall not, directly or indirectly, solicit other employees.

To manage and mitigate the potential risks associated with the departure of key management or technical staff, we have implemented a set of measures and arrangements that we believe are suited to the demands of the R&D-heavy robotics industry. Our R&D management protocols aim to facilitate the systematic documentation and transfer of knowledge. This approach is intended to help preserve critical research insights and technological advancements within the organization, potentially reducing dependency on individual contributors and aiding in the onboarding of new talent. Confidentiality agreements are utilized to protect sensitive information and proprietary technologies. By binding key personnel to uphold confidentiality, we seek to mitigate the risk of intellectual property leakage, which is important for maintaining our competitive position in a rapidly evolving market.

Our information security management systems are designed to strengthen our digital infrastructure against unauthorized access and data breaches. These systems are intended to help ensure that our valuable data and research findings remain secure, even in the event of staff turnover, thereby supporting our innovation pipeline. Additionally, we enter into non-competition agreements with relevant personnel, which are intended to deter the transfer of strategic knowledge to competitors.

These agreements are seen as instrumental in retaining our industry expertise and helping to prevent the erosion of our market position. Collectively, these initiatives help us maintain operational stability and continuity. During the Track Record Period and up to the Latest Practicable Date, to the best knowledge of our Directors, there was no legal claim or proceeding that may have an influence on the R&D of our Specialist Technology Products.

R&D Philosophy and Process

Our R&D process follows a structured development framework that integrates technology research with product application scenarios and commercialization considerations. From initial research to full-scale commercialization, we take a holistic approach to innovation, aligning each phase with rigorous decision reviews to ensure quality and market readiness.

The R&D process begins with product planning, where we identify potential new products or technology upgrades based on market demand and emerging technological trends. If the concept passes the internal concept decision review, we proceed to formalize the project initiation. Upon passing the project initiation decision review, the project moves to the next phase — development and validation. For controllers and robots, this begins with prototype development and functional verification, followed by iterative optimization cycles. Afterwards, we perform rigorous design validation to ensure the product meets all technical specifications and performance criteria. We then proceed to small batch trial production to validate the manufacturing process and identify any potential issues in a controlled environment. If the product successfully passes the release decision review, which assesses the readiness for mass production based on performance, safety, and market demand, it moves to the final stage — mass production. In the mass production phase, the newly developed product is incorporated into our product portfolio. Following the product launch, we implement comprehensive maintenance measures throughout the product lifecycle. This includes regular updates, technical support, and proactive monitoring. Our robot operation system supports over-the-air updates and remote diagnostics, allowing continuous improvement and adaptation. We engage in ongoing product management to adapt to technological advancements and maintain competitiveness. This structured R&D process, guided by rigorous decision reviews at each critical juncture, ensures that our innovations are not only technologically advanced but also market-ready and aligned with customer needs. By integrating thorough planning, meticulous development and validation, and strategic commercialization efforts, we deliver high-quality robotic solutions that drive value and support our customers' success.

R&D Investment

During the Track Record Period, we made substantial investments in R&D, with the majority of expenses attributed to compensation for our R&D staff, material costs, testing costs, depreciation and amortization, and professional service fees. For the years ended December 31, 2023, 2024 and 2025 and the four months ended April 30, 2025 and 2026, our R&D expenses amounted to RMB56.1 million, RMB36.6 million, RMB76.7 million, RMB13.5 million and RMB29.1 million, respectively. See "Financial Information — Period-to-Period Comparison of Results of Operations — R&D Expenses" for details.

SALES AND MARKETING

Sales

We believe that our solutions speak for themselves. Our go-to-market strategy starts with market leaders in each industry we target to enter who are also early adopters of industrial intelligent robotic solutions. We demonstrate the value of our solutions and establish our reputation through collaborating with industry leaders. Once our value has been proven, we are able to expand our solutions quickly and penetrate further and provide solutions to other players, leveraging our understanding of the industries.

We have established a professional in-house sales team. Our sales team plays a pivotal role in shaping our brand image by directly engaging with customers to present our solutions, address inquiries, and gather real-time feedback. Armed with indepth product and industry knowledge, our sales force communicates with customers to understand their evolving demands, providing insights that directly inform our product development and marketing strategies. They also works closely with our product team to ensure that they can propose the best solutions to address the pain points faced by market participants in the relevant industry verticals.

Marketing

We enhance the awareness of our brand and promote our new and existing solutions through both offline and online channels. We participate in various offline events, such as industry conferences and forums, product launches and industry salons to showcase our technological advancements and develop relationships with industry participants. By presenting our robotic solutions and exhibiting our robots in those events, we attract potential customers. We also promote our solutions through various digital marketing activities and channels such as website and social media marketing, search engine optimization and online advertising.

Based on customer needs, our sales personnel prepare and provide proposals of our robotic solutions or robots to, and handle inquiries from, potential customers. For certain customers, such as government agencies, state-owned enterprises and large-scale companies, we pursue new business opportunities through the bidding and tendering process. During the Track Record Period, we obtained eight projects with a total contract value of approximately RMB32.2 million through the bidding and tendering process. For mid- or small-scale private companies or repeat customers, we seek new business opportunities through commercial negotiations. In 2023, 2024, 2025 and the four months ended April 30, 2025 and 2026, our selling and marketing expenses were RMB57.4 million, RMB64.6 million, RMB114.2 million, RMB20.2 million and RMB42.0 million, accounting for 35.4%, 25.8%, 37.9%, 45.2% and 39.3% of our revenue in the same periods, respectively.

OUR CUSTOMERS

We have a diversified customer base across various industries, particularly high-tech sectors such as 3C, automotive, and semiconductor. Our customers are mainly manufacturers that apply our robotic solutions directly in their factories. Our customers also include system integrators that incorporate our robotic products into broader automation solutions. System integrators, with their expertise in system integration and understanding of the specific application needs of downstream industries, combine robots, supporting systems, and peripheral automation equipment from various manufacturers to deliver comprehensive robotic solutions. As a manufacturer, we focus on the research, development, and production of robots. Many domestic enterprise customers prefer to procure through system integrators with whom they have established long-term relationships, as these system integrators offer

comprehensive service capabilities, especially for large-scale, complex robotics solution projects. System integrators typically serve as our strategic partners because their business model is inherently complementary to ours and creates aligned incentives across the value chain. Unlike our Company, system integrators do not manufacture robots themselves; they procure robotic products from us for their solutions. By selling robotic products to system integrators and having them lead deployment and after-sales support, we reduce our customer acquisition and maintenance cost, as the system integrators own the downstream customer relationship, deliver ongoing service, and manage long-term performance. This division of roles allows each party to focus on its strengths, scales market reach efficiently, and creates a durable, mutually beneficial partnership model. According to the CIC, given the distinct division of roles, there is no direct competition between us and system integrators. We also sell robots individually to customers who possess development capabilities and integrate our robots into solutions developed by them. Purchasers of individual robots are mainly system integrators and end-user manufacturers with in house automation teams. System integrators buy robots to incorporate into turnkey automation projects for their customers. End-user manufacturers acquire robots directly when they intend to develop or expand proprietary automation, retrofit existing lines, maintain control over application IP and tooling, or standardize on a common robotic platform across multiple facilities. Our customers are mainly in Chinese mainland. We remain attuned to the evolving needs of complex industrial scenarios, refining products to meet diverse market demands, thereby expanding our market reach and deepening our industry exposure.

The tables below set forth information about our customers and transactions during the Track Record Period.

	Year ended December 31,			Four months ended April 30,
	2023	2024	2025	2026
Total revenue (RMB in thousands)	162,166	250,522	301,493	106,940
Number of customers	171	208	242	123
Number of new customers[(1)]	87	83	112	25
Average customer value[(2)] (RMB in thousands)	948	1,204	1,246	869
Number of transactions with customers	461	780	544	377
Average transaction value of customers[(3)] (RMB in thousands)	352	321	554	284
Customer retention rate[(4)]	42.2%	52.6%	55.3%	35.9%
Net dollar retention rate[(5)]	168%	114%	102%	31%
Customer acquisition cost[(6)] (RMB in thousands)	659.3	778.3	1,020.6	1,369.8

Notes:

(1) Refers to customers who do not purchase products or solutions from us for the previous period.

(2) Calculated by dividing the revenue generated in a given period by the number of customers in the same period.

(3) Calculated by dividing the revenue generated in a given period by the number of transactions in the same period.

(4) Calculated by dividing the difference between the number of customers in the respective period and the number of new customers in the respective period by the number of customers in the immediately preceding period, multiplied by 100%.

(5) Calculated by dividing the revenue contribution of a customer in the immediately preceding period by the revenue contribution of the same customer for the current period, for the year ended December 31, 2023, 2024 and 2025 and April 30, 2026.

(6) Calculated by dividing the total sales and marketing expenses for the relevant period by the number of new customers acquired in that same period.

During the Track Record Period, we successfully strengthened our transactional relationships with customers, leading to an increase in average customer value and a higher average number of transactions per customer. As our relationships with customers deepened, we became more integrated into their production processes, offering additional products and services to complement their solutions. These ancillary transactions typically have lower contract values compared to the primary contracts, which has resulted in a decline in the average transaction value. Additionally, as we expand into international markets, we are partnering with integrators who typically begin with smaller-scale orders. This approach allows us to establish initial collaborations with key overseas customers, laying a strong foundation for future growth and larger orders.

During the Track Record Period, our customer acquisition cost generally increased period by period. This rise is primarily due to our proactive efforts to acquire new customers, particularly overseas customers and leading large enterprise customers across various industries, which tend to have higher acquisition costs. Additionally, our relatively high customer retention rates during the Track Record Period, combined with the inclusion of expenses related to maintaining existing customers in our total sales and marketing expenses, have also contributed to the increase.

The tables below set forth information about our top five customers during the Track Record Period.

For the year ended December 31, 2023:

Customer	Solutions Provided	Background	Year of Commencement of Business Relationship	Transaction Amount	% of Total Revenue	Credit Term and Payment Method
				(RMB in thousands)		
Customer A . . .	Robots and Others	(1)	2019	14,897	9.2%	30-60 days; Bank transfer
Customer B . . .	Robotic Solutions	(2)	2022	13,516	8.3%	10–30 days; Bank transfer/banker's acceptance
Customer C . . .	Robotic Solutions	(3)	2021	13,334	8.2%	7–30 working days; Bank transfer/banker's acceptance
Customer D . . .	Robotic Solutions, Robots and Others	(4)	2019	10,757	6.6%	60–90 days; Bank transfer
Customer E . . .	Robotic Solutions	(5)	2022	7,292	4.5%	30-60 days; Bank transfer/banker's acceptance
Total				**59,796**	**36.8%**	

For the year ended December 31, 2024:

Customer	Solutions Provided	Background	Year of Commencement of Business Relationship	Transaction Amount	% of Total Revenue	Credit Term and Payment Method
				(RMB in thousands)		
Customer F . . .	Robotic Solutions	(6)	2024	31,289	12.5%	7–60 days; Bank transfer
Customer C . . .	Robotic Solutions	(3)	2021	23,359	9.3%	7–30 working days; Bank transfer/banker's acceptance
Customer D . . .	Robotic Solutions, Robots and Others	(4)	2019	22,535	9.0%	60–90 days; Bank transfer
Customer G . . .	Robotic Solutions	(7)	2020	13,971	5.6%	90 days; Bank transfer
Customer A . . .	Robots and Others	(1)	2019	12,264	4.9%	30-60 days; Bank transfer
Total				**103,418**	**41.3%**	

For the year ended December 31, 2025:

Customer	Solution Provided	Background	Year of Commencement of Business Relationship	Transaction Amount	% of Total Revenue	Credit Term and Payment Method
				(RMB in thousands)		
Customer F . .	Robotic Solutions	(6)	2024	25,708	8.5%	7–60 days; Bank transfer
Customer D . .	Robotic Solutions, Robots and Others	(4)	2019	23,390	7.8%	60–90 days; Bank transfer
Customer H . .	Robotic Solutions	(8)	2024	23,042	7.6%	30 days, Bank transfer
Customer I. . .	Robotic Solutions	(9)	2023	17,145	5.7%	60 days; Bank transfer
Customer J. . .	Robotic Solutions	(10)	2022	16,719	5.5%	60 days, Bank transfer
Total				**106,004**	**35.1%**	

For the Four Months Ended April 30, 2026

Customer	Solution Provided	Background	Year of Commencement of Business Relationship	Transaction Amount	% of Total Revenue	Credit Term and Payment Method
				(RMB in thousands)		
Customer F . .	Robots and Others	(6)	2024	34,376	32.1%	7–60 days; Bank transfer
Customer K . .	Robots and Others	(11)	2025	16,572	15.5%	30 days; Bank transfer
Customer D . .	Robotic Solutions, Robots and Others	(4)	2019	8,854	8.3%	90 days; Bank transfer
Customer L . .	Robotic Solutions	(12)	2025	7,357	6.9%	30 days; Bank transfer
Customer G . .	Robotic Solutions, Robots and Others	(7)	2020	5,558	5.2%	90 days; Bank transfer
Total				**72,717**	**68.0%**	

Notes:

(1) Customer A is a privately-held limited liability company incorporated in Japan in 2005, with a capital of JPY3.0 million and principally engaged in the sales and maintenance of computer hardware and software. Customer A is an integrator.

(2) Customer B is a privately-held limited liability company established in the PRC in 2021, with a registered capital of RMB4.5 billion and principally engaged in electricity and thermal power generation and supply. Its holding company is a listed company on the Shanghai Stock Exchange. Customer B is a manufacturer.

(3) Customer C is a privately-held limited liability company established in the PRC in 2003, with a registered capital of RMB75.8 million and principally engaged in the manufacturing business. Customer C is a manufacturer.

(4) Customer D consists of a number of subsidiaries of a listed company incorporated in Taiwan in 1971, which is listed on the Taiwan Stock Exchange with a market capitalisation of approximately NT$1 trillion as at December 31, 2024, and is principally engaged in the provision of power and thermal management solutions. Customer D is a manufacturer.

(5) Customer E is a privately-held limited liability company established in the PRC in 2020, with a registered capital of RMB20.0 million and principally engaged in instrument and meter manufacturing. Customer E is a manufacturer.

(6) Customer F is a privately-held limited liability company incorporated in Hong Kong in 1990, with a paid-up capital of HK$309.5 million and principally engaged in the industrial supplies business. Customer F is a manufacturer.

(7) Customer G consists of a number of subsidiaries of a listed company incorporated in Taiwan in 1974, which is listed on the Taiwan Stock Exchange with a market capitalisation of approximately NT$3 trillion as at December 31, 2024, and is principally engaged in the provision of electronics contract manufacturing services. Customer G is a manufacturer.

(8) Customer H is a privately-held limited liability company established in 1989, headquartered in Guangdong province, China, and principally engaged in the business of appearance structure and module solutions for smart devices. Customer H is a manufacturer.

(9) Customer I is a company listed on the Stock Exchange. It was founded in 2010, headquartered in China, and principally engaged in the design, development and sale of smartphones, smart devices and IoT based consumer electronics. Customer I is a manufacturer.

(10) Customer J is a privately-held limited liability company established in the PRC in 1987, with a registered capital of RMB41 billion and principally engaged in providing information and communications technology solutions. Customer J is a manufacturer.
(11) Customer K is a company founded in 1853 and headquartered in Tokyo, Japan. It is a global engineering and heavy-industry conglomerate and listed on Tokyo Stock Exchange. Customer K is a manufacturer.
(12) Customer L is a company founded in 1964 and headquartered in the PRC. It is an automobile and commercial vehicle manufacturer and listed on the Shanghai Stock Exchange.

During the Track Record Period and up to the Latest Practicable Date, we did not experience any material delay in delivery, or customer acceptance, of robotic products and solutions.

Except for Customer I and one of our Shareholders belong to the same group, none of our Directors, their close associates or any Shareholders which, to the knowledge of our Directors, own more than 5% of our share capital as of the Latest Practicable Date, or have any interest in any of our five largest customers. Our Directors confirm that the transactions with Customer I were conducted on an arm's length basis.

The salient terms and conditions of our agreements with customers are set out below:

- **Product delivery:** Typically, we are responsible for delivering products to the customer's designated location.

- **Payment term:** We typically require payment in installments: an initial portion of the purchase amount is paid upon signing the contract, a second portion upon our shipment of the ordered products, a third portion upon receipt and acceptance, and the final installment upon the expiration of the warranty period. Some customers may opt to pay the full lump sum upon receipt and acceptance.

- **Warranty:** We typically offer a warranty period of 12 months for both our solutions and robots and related products. The warranty covers general repairs of defects during the warranty period, with certain exclusions for misuse or damage caused by external factors.

- **Credit term:** We typically offer a credit period up to 90 days to our customers.

- **Product return policy:** We generally do not allow product returns after the customers' acceptance.

- **Termination:** Generally, the contract can be terminated upon mutual agreement.

After-Sales Services

We are dedicated to providing comprehensive after-sales support that adapts to the changing needs of our customers. Within the warranty period, we deliver repair and maintenance services at no cost. Once the warranty period concludes, we continue to offer assistance. Replacement parts are billed at cost, while labor services are available for a fee. Our team ensures that customers receive the necessary help to maintain optimal product performance. During the Track Record Period and up to the Latest Practicable Date, there had been no material claims between customers and us regarding product returns and refunds.

Our after-sales service team is available 24/7 to provide continuous support. Our team is equipped to address various technical issues, ensuring swift resolution. We are committed to respond to customer requests within 6 hours, and help customers address issues within 7 days. We offer ongoing technical support through multiple channels, including manuals, online resources, and on-site visits. Our team is trained to provide guidance and assistance, helping customers make the most of our products. By offering dependable, responsive, and cost-effective after-sales support, we help customers minimize disruptions and maximize the value they gain from our solutions. Our focus is on customer satisfaction, ensuring our solutions continue to meet their needs effectively.

OUR SUPPLIERS

We source a diverse range of raw materials essential for the production of our robots from our suppliers, such as power batteries, motors, LiDAR, structural components, forklifts and charging pile. We predominantly procure these materials from domestic suppliers, and we are progressively incorporating domestically manufactured components into our supply chain. At present, all imported core components utilized in our products have domestic alternatives, underscoring our strategic focus on enhancing supply chain resilience and fostering local innovation.

The salient terms and conditions of our agreements with suppliers are set out below:

- **Delivery:** Suppliers are generally responsible for delivering the raw materials to our designated locations in accordance with the agreed delivery schedule.
- **Quality control:** All components must comply with applicable national and industry standards as well as our technical specifications. We conduct inspections upon delivery and reserve the right to reject or return non-compliant goods.
- **Payment:** Payments are subject to satisfactory completion of our inspection process and formal acceptance of the delivered materials.
- **Credit term:** Our suppliers typically grant us a credit term of 90 days.
- **Warranty period:** Suppliers generally provide us with a warranty period of 12 to 36 months from the date of acceptance.
- **Confidentiality:** Suppliers must keep all technical and commercial information confidential, both during and after the term of the agreement.
- **Termination:** Generally, the contract can be terminated upon mutual agreement.

The tables below set forth information about our top five suppliers during the Track Record Period.

For the year ended December 31, 2023

Supplier	Products/Services Provided	Background	Year of Commencement of Business Relationship	Transaction Amount	% of Total Procurement Amount	Payment Term and Method
				(RMB in thousands)		
Supplier A	Automation control components	(1)	2018	7,958	9.1%	60/90 days; Bank transfer/banker's acceptance
Supplier B	Forklifts	(2)	2021	4,630	5.3%	30 days; Bank transfer/ banker's acceptance

Supplier	Products/Services Provided	Background	Year of Commencement of Business Relationship	Transaction Amount	% of Total Procurement Amount	Payment Term and Method
				(RMB in thousands)		
Supplier C	Buffer racks	(3)	2022	4,275	4.9%	5 working days–6 months; Bank transfer/ banker's acceptance
Supplier D	Charging pile	(4)	2019	3,768	4.3%	30 days; Bank transfer/ banker's acceptance
Supplier E	LiDAR	(5)	2018	3,575	4.1%	Shipment upon receipt of payment; Bank transfer/banker's acceptance
Total				**24,206**	**27.7%**	

For the year ended December 31, 2024

Supplier	Products/Services Provided	Background	Year of Commencement of Business Relationship	Transaction Amount	% of Total Procurement Amount	Payment Term and Method
				(RMB in thousands)		
Supplier F	ASRS System	(6)	2022	15,740	18.5%	90 days; Bank transfer/ banker's acceptance
Supplier A	Automation control components	(1)	2018	5,326	6.3%	90 days; Bank transfer/banker's acceptance
Supplier G	6-axis robotic arms	(7)	2022	3,937	4.6%	90 days; Bank transfer/banker's acceptance
Supplier H	Docking station	(8)	2022	3,784	4.4%	10 working days; Bank transfer and banker's acceptance
Supplier I	PCBA	(9)	2018	3,357	3.9%	30 days; Bank transfer/ banker's acceptance
Total				**32,144**	**37.7%**	

For the year ended December 31, 2025

Supplier	Products/Services Provided	Background	Year of Commencement of Business Relationship	Transaction Amount	% of Total Procurement Amount	Payment Term and Method
				(RMB in thousands)		
Supplier F	ASRS System	(6)	2022	22,632	14.5%	90 days; Bank transfer/banker's acceptance
Supplier A	Automation control components	(1)	2018	11,209	7.2%	90 days; Bank transfer/banker's acceptance
Supplier J	Forklift truck and accessories	(10)	2024	9,234	5.9%	Pro-rata payments: prepay 30%, pay 30% within 10 working days after delivery, pay 35% within 10 working days after signing completion reports and pay the remaining 5% payment within 30 working days after the expiration of the quality warranty period
Supplier C	Buffer racks	(3)	2022	6,169	3.9%	5 working days-6 months; Bank transfer/banker's acceptance
Supplier E . . .	LiDAR	(5)	2018	5,228	3.3%	Shipment upon receipt of payment; Bank transfer/banker's acceptance
Total				**54,472**	**34.8%**	

For the Four Months Ended April 30, 2026

Supplier	Products/Services Provided	Background	Year of Commencement of Business Relationship	Transaction Amount	% of Total Procurement Amount	Payment Term and Method
				(RMB in thousands)		
Supplier F	ASRS System	(6)	2022	30,930	27.9%	90 days; Bank transfer/banker's acceptance
Supplier A	Automation control components	(1)	2018	8,396	7.6%	90 days; Bank transfer/banker's acceptance
Supplier K	Vertical lift door mechanism	(11)	2025	6,593	6.0%	10 to 90 days; Bank transfer
Supplier L	LiDAR	(12)	2025	5,427	4.9%	60 days; Bank transfer/banker's acceptance
Supplier M	Automation processing components	(13)	2022	3,341	3.0%	60/90 days; Bank transfer/banker's acceptance
Total				**54,687**	**49.4%**	

Notes:

(1) Supplier A is a privately-held limited liability company established in the PRC in 2007, with a registered capital of RMB150.0 million and principally engaged in manufacturing computers, telecommunications and other electronic equipment. Its holding company is a listed company on the Shanghai Stock Exchange.

(2) Supplier B is a privately-held limited liability company established in the PRC in 2001, with a registered capital of RMB31.2 million and principally engaged in manufacturing of electrical machinery and equipment.

(3) Supplier C is a privately-held limited liability company established in the PRC in 2018, with a registered capital of RMB1.0 million and principally engaged in the sales of machinery equipment and electronic products.

(4) Supplier D is a privately-held limited liability company established in the PRC in 2016, with a registered capital of RMB19.1 million and principally engaged in manufacturing of electrical machinery and equipment.

(5) Supplier E is a privately-held limited liability company established in the PRC in 2006, with a registered capital of €4.0 million and principally engaged in the sales of machinery equipment and electronic products.

(6) Supplier F is a privately-held limited liability company established in the PRC in 2015, with a registered capital of RMB5.0 million and principally engaged in industrial robot manufacturing.

(7) Supplier G is a privately-held limited liability company established in the PRC in 2019, with a registered capital of RMB5.0 million and principally engaged in industrial robot manufacturing.

(8) Supplier H is a privately-held limited liability company established in the PRC in 2011, with a registered capital of RMB110.0 million and principally engaged in manufacturing computers, telecommunications and other electronic equipment. Its holding company is a listed company on the Shenzhen Stock Exchange.

(9) Supplier I is a listed company established in the PRC in 2003, which is listed on the Shenzhen Stock Exchange with a market capitalisation of approximately RMB7 billion as at December 31, 2024, and is principally engaged in electronics manufacturing services.

(10) Supplier J is a privately-held limited liability company established in the PRC in 2016, with a registered capital of RMB8.0 million. It is a company principally engaged in the sales of machinery equipment.

(11) Supplier K is a limited liability company established in China in 2008 with a registered capital of RMB5.0 million, and is primarily engaged in the manufacture of automation equipment.

(12) Supplier L is a limited liability company incorporated in Hong Kong, China in 1994, and is primarily engaged in the sales of products and solutions for factory automation and logistics automation.

(13) Supplier M is a limited liability company established in China in 2010 with a registered capital of RMB1.0 million, and is primarily engaged in the manufacture of raw materials required for automation equipment.

During the Track Record Period and up to the Latest Practicable Date, we did not experience any significant fluctuation in prices set by our suppliers, material breach of contract on the part of our suppliers, or material delay in delivery of our orders from our suppliers.

To the best of our Directors' knowledge, none of our Directors or their respective close associates or any person who, to the knowledge of our Directors, owned more than 5% of our issued share capital, had any interest in any of our five largest suppliers in each year during the Track Record Period.

Supplier Management

We have developed a comprehensive supplier management system designed to ensure product quality, delivery reliability, services and efficiency in the supply of raw materials, while also taking costs into consideration. We have established a robust procurement management system that clearly delineates roles and responsibilities, organizes dedicated teams for procurement and cost management, and integrates project procurement engineers and strategic procurement engineers into these teams.

We uphold stringent requirements for supplier admission, assessment, and auditing throughout the supplier lifecycle. Our supplier assessment process evaluates quality, supply reliability, cost, technology and service indicators. We employ a tiered management strategy, incorporating rewards for excellence, supervised improvement plans, and the removal of underperforming suppliers, thereby optimizing our supplier base and maintaining our competitiveness.

Furthermore, to promote environmental, social, and governance practices among our suppliers, we typically require them to sign a supplier quality assurance agreement, social responsibility commitment, and integrity commitment, ensuring that our suppliers align with our values and standards, fostering a responsible and sustainable supply chain. During the Track Record Period, over 90% of our suppliers signed integrity commitment with us.

OVERLAPPING OF CUSTOMERS AND SUPPLIERS

According to CIC, the industrial intelligent robotic solutions industry comprises multiple specialized segments, including component design and manufacturing, robot design and development, manufacturing, assembly and integration, and algorithm and software development. To satisfy the evolving demands of customers, market players in the industry often procure products or services from peers to deliver comprehensive solutions. As a result, it is common for upstream and downstream enterprises within the industry to engage in transactions with each other as both suppliers and customers.

We are a solutions provider in the industrial intelligent robotics ecosystem. On the one hand, we procure raw materials from other industry participants to support our product development and solutions offering. On the other hand, these enterprises may also procure our robotic solutions, robots and related products to enhance their own capabilities. This overlap between customers and suppliers reflects the highly interconnected nature of the intelligent robotics ecosystem facilitating mutual growth and innovation across the industry.

Customer E, being our fifth largest customer in 2023, was also our supplier in 2023 and 2025. We mainly sold robotic solutions to Customer E, and procure AGV systems from them. In 2023, 2024, 2025 and four months ended April 30, 2026, our sales to Customer E amounted to RMB7.3 million, RMB2.6 million, RMB1.7 million and RMB13.9 thousand, accounting for 4.5%, 1.1%, 0.6% and 0.01% of our total revenue, respectively. In 2023, 2024, 2025 and four months ended April 30, 2026, our purchases from Customer E amounted to RMB188.6 thousand, nil, RMB148.0 thousand and nil, respectively, and accounted for 0.2%, nil, 0.1% and nil of our total procurement costs for the corresponding year.

Supplier A, being one of our five largest suppliers for each year/period during the Track Record Period, was also our customer in 2023. We procured automation control components from Supplier A during the Track Record Period, and had a sale of ancillary products to one of the subsidiary of Supplier A in 2023 for an amount of RMB8.8 thousand.

Supplier G, being our third largest supplier in 2024, was also our customer in the four months ended April 30, 2026. We procured six-axis robotic arms and TM labels from Supplier G during the Track Record Period, and sold robots and other products including batteries, charging equipment and software systems to Supplier G in the four months ended April 30, 2026. In the four months ended April 30, 2026, our sales to Supplier G amounted to RMB285.4 thousand, accounting for 0.3% of our total revenue. In the four months ended April 30, 2026, our purchases from Supplier G amounted to RMB1.8 million and accounted for 1.6% of our total procurement costs for the corresponding period.

Negotiations of the terms of our sales to and purchases from the overlapping customers and suppliers were conducted on a project-by-project/standalone basis and purchases were neither interconnected nor inter-conditional with each other. The gross profit margins for sales to overlapping customer-suppliers are similar to those for sales to customers who are not our suppliers. Our Directors confirmed that all of our sales to and purchases from these overlapping customers and suppliers were entered into after due consideration taking into account the prevailing purchase and selling prices at the relevant times, conducted in the ordinary course of business under normal commercial terms and on arm's length basis.

PRODUCTION

We formulate production schedules and plans according to the market demand, taking into consideration the level of our stock and utilization rates of our production facilities. We have implemented a set of internal production and operation policies to promote our compliance with applicable national and international industry standards. We carry out regular inspections to assess the conditions of our production facilities and conduct necessary repairs and maintenance. We have also introduced and implemented a stringent reporting system to all the accidents and malfunction of the equipment and keep all the relevant records.

Our Production Processes

We have established a comprehensive production manufacturing system that integrates production plan, raw materials procurement and management, production, quality control and packaging and storage.

- **Production plan:** Following the design phase, we establish a production plan guided by key milestones identified during the project kickoff meeting. Weekly sales and operations planning (S&OP) meetings are conducted to confirm project delivery plans for the upcoming two weeks, resulting in a rolling plan that directs suppliers in material delivery and secondary plans for semi-finished product production and master production schedule for finished products.

- **Material management:** We formulate our material procurement plans based on our master production schedule and the status of our raw materials, work-in-progress and finished products, inventory and in-transit material status to generate material procurement plans. Through kit completeness checks, we form the weekly material delivery plan, and request delivery of materials from suppliers, as well as formulate our secondary plan for semi-finished product production.

- **Manufacturing:** We have pioneered the introduction of assembly line production modes in the robotics industry, tailored to the characteristics of different products. We have established three types of production lines: the semi-automatic production line, single-piece flow production line and flexible custom product line. In addition, we incorporate automation system in our production

processes to ensure product consistency, and utilize information technology to achieve data sharing and real-time communication, eliminating paper-based processes through electronic dashboards and paperless workflows.

- **Quality control:** Quality control is a critical component of our production process, encompassing initial inspections during production, regular and random in-process quality control (IPQC) inspections, and independent quality engineers conducting comprehensive tests on finished products. All products must pass 100% inspection before being stored, ensuring they meet our stringent quality standards.

- **Storage and delivery:** Prior to shipment, products undergo a second quality check to mitigate potential risks during storage. Packaging adheres to strict standards, with export packaging protocols established for overseas transportation. This ensures that high-quality products are delivered to our customers, maintaining the integrity and reliability of our offerings throughout the storage and delivery process.

Our Production Facility

As of the Latest Practicable Date, we have one production facility located in Kunshan, Jiangsu Province, with a gross floor area of approximately 6,129.27 square meters. Our Kunshan Robots Production Base is designed with production lines tailored to the characteristics of various products, including a semi-automatic line, a single-piece flow line, and a flexible custom product line. The facility also includes a pre-assembly area for semi-finished products, a warehousing and logistics area, and a quality inspection area. As we continue to expand our business scale, we plan to establish new production lines to accommodate the growing demand.

The following table sets forth the details of our production facility during the Track Record Period.

Period	Designed Production Capacity[(1)]	Production Volume[(2)]	Utilization Rate[(3)]
Year ended December 31, 2023	2,000 units	1,633 units	81.7%
Year ended December 31, 2024	2,000 units	1,578 units	78.9%
Year ended December 31, 2025	2,000 units	2,417 units	120.9%
Four months ended April 30, 2026	896 units	1,366 units	152.5%

Notes:

(1) The designed capacity for each period is calculated based on the maximum output a production facility can achieve under ideal conditions, considering factors such as equipment capabilities, labor availability, and operational hours. More specifically, it is calculated based on the hourly capacity and the operating hours of relevant product lines for such period. The operating hours are calculated by multiplying 8 hours per day by 250 working days per year. For the four months ended April 30, 2026, the calculation is based on 80 working days and an estimated annual designed production capacity of 2,800 in 2026. According to CIC, our calculation basis of designed capacity is consistent with industry norm.

(2) The production volume refers to the actual output for the relevant period.

(3) Utilization rate is calculated by dividing the actual production volume by the designed production capacity for the relevant period.

We achieved utilization rates of approximately 80% in 2023 and 2024, and an a utilization rate of approximately 120% in 2025 and 152% in the four months ended April 30, 2026. To guarantee delivery, we utilized flexible overtime system and temporary worker and achieved utilization rate of above 100%.

Our Directors are of the view that (i) the COVID-19 pandemic had negative impact over our business in the first quarter of 2023 due to the temporary factory closure under COVID-19 policies; and (ii) the outbreak and spread of COVID-19 had no material adverse impact on our business operations and financial condition during the Track Record Period and up to the Latest Practicable Date, on the basis that (a) our revenue and gross profit increased period by period during the Track Record Period, (b) as the COVID-19 pandemic has subsided since early 2023, our business and the operations had resumed to normal and we do not anticipate further adverse impact on our business and financial performance, and (c) as the COVID-19 policies were relaxed and lifted, the impact of the pandemic on our business was gradually diminishing.

We have leased a new production facility in Wuxi City, Jiangsu Province. The new production facility will comply with cleanliness production standards (Class 100 cleanroom system) and intelligent manufacturing capability standards (integrated Industry 4.0 smart production line system). It will complement the functions of the existing production base. In addition to enhancing the production capacity of standard and functional robots, it will also focus on producing functional robots specifically for certain special industries and high-end manufacturing. The requisite licenses and approvals for construction of this production facility have been obtained. As of the Latest Practicable Date, we have commenced trial operation in certain areas of the new production facility, with the rest of the facility still under renovation. We anticipate to commence full operation in the fourth quarter of 2026.

For reference and illustration purpose only, set forth below is a highly hypothetical analysis on the payback period and breakeven points in respect of our new production facility in Wuxi to be completed and commenced production under our plan and it is not indicative of our future performance as our revenue, expenses and operating results may vary from period to period in response to a variety of factors beyond our control. We consider that a production facility achieves breakeven when the revenue it generates is able to cover its costs and expenses arising in the same year on an accounting basis. The production scale required to achieve breakeven varies depending on various factors, including but not limited to general economic and market conditions, market demands, utilization rate of our production facility, market competition and costs of production. We consider that a production facility achieves investment payback when the total future net cash flow generated from operating activities since the commencement of commercial production is able to cover the total investment amount. The time required to achieve investment payback also varies depending on various factors, including those mentioned above and the capital expenditure such as costs of machinery and equipment. The anticipated total investment for the new production facility is approximately HK$131 million. The designed annual production capacity of the new production facility is expected to be 800 units when the commercial production commences and will gradually increase to 8,000 units in 2030. The expected annual revenue is calculated by multiplying the estimated annual sales volume of robots (on the basis of the designed annual production capacity which will increase gradually) by an expected average selling price of our robots. It is estimated that, based on our Directors' knowledge and experience, the expected payback period for the investment in the new production facility will be approximately three years, with the investment cost anticipated to be recovered by 2028 and that breakeven could be achieved by 2027.

LOGISTICS AND INVENTORY MANAGEMENT

We leverage our own warehouse for storing work-in-progress, finished products and certain components and raw materials, and we engage third-party logistics service providers for delivery services. Finished products that have passed quality inspections are delivered by the logistics service providers from our production facility directly to our customers or to locations specified by our customers.

Our inventories include raw materials, work-in-process, finished goods and contract fulfillment costs. We have set up a comprehensive inventory management system to cover the of inventory storage, acceptance and dispatch, monitor the status of inventories and conduct inventory counting. As of December 31, 2023, 2024 and 2025 and April 30, 2026, our inventories were RMB110.5 million, RMB59.4 million, RMB63.6 million and RMB122.5 million, respectively. See "Financial Information — Discussion on Key Items of Consolidated Statements of Financial Position — Inventories." We have a strict inventory control policy to monitor our inventory levels to minimize obsolete inventory. Through close coordination with our customers and suppliers, we are committed to carrying less raw materials and in-process products and lowering our inventory risk.

QUALITY CONTROL

Quality control and assurance are integral to our operations, ensuring that our products meet the highest standards of safety and performance. We have implemented a comprehensive quality management system to help ensure that all products comply with national and industry standards, such as ISO9001, ISO45001, ISO14001 and ISO27001 standards, covering all aspects of our operations, and are committed to preventing any significant quality incidents. We have established a comprehensive set of internal quality management policies and rigorous quality management procedures to regulate product quality control throughout all relevant aspects of our operation. Our quality control procedures involve multiple stages of inspection: incoming quality control for materials received from suppliers, process quality control for monitoring quality of work-in-progress and final quality control for finished goods, preventing non-conforming products from being shipped. These procedures are aligned with industry practices, ensuring that our products consistently meet high-quality standards. Our quality assurance framework is designed to uphold the integrity and reliability of our products, supported by a dedicated team. The quality department is responsible for overseeing the quality engineering team, supplier quality team and process quality team. These teams are responsible for managing product quality comprehensively, spanning from product development and production processes to supplier management, ensuring quality at every stage.

We have not experienced any significant product returns, liability claims, or legal issues related to product safety or quality control during the Track Record Period, nor have we had any product or service recalls up to the Latest Practicable Date.

INFORMATION TECHNOLOGY

We utilize a number of information technology systems to manage all aspects of our operations, including but not limited to procurement, production, inventory management, financial reporting and human resources. Information technology systems including (i) the Operations Platform, which is an enterprise management system providing comprehensive solutions for sales, delivery, supply and production-related activities; (ii) the Supplier Relationship Management System, which is a comprehensive solution focused on procurement-related activities, facilitating collaboration and information exchange between internal procurement personnel and external suppliers; and (iii) the Enterprise Resource Planning System, which is an integrated enterprise management software that consolidates core business processes such as finance, supply chain, production, sales and human resources, are critical to our business among our collective integrated information systems.

The capabilities and the stability of our IT infrastructure are vital to our business operations. The IT department performs system checks, data back-ups, system maintenance and other activities to secure the continual operation of the critical IT systems and facilities. During the Track Record Period and up to the Latest Practicable Date, we did not experience any material failure or general breakdown of our IT systems which had resulted in a material adverse impact on our overall business operations.

INTELLECTUAL PROPERTY

As of the Latest Practicable Date, we had 155 issued patents, including 29 invention patents, and 57 pending patent applications in the PRC. As of the Latest Practicable Date, we had 11 copyrights and 19 registered trademarks in use in the PRC, one registered trademark in Hong Kong, and four international domain. See the section headed "Appendix VI — Statutory and General Information — 2. Further Information about Our Business — 2.2. Our Intellectual Property Rights" in this document for more information of intellectual property rights that are material to our business. We self-developed and self-owned all of our material intellectual property rights for both of our robotic solutions and robots and related products. All of our material intellectual property rights are attributing to and protecting both our robotic solutions and robots and related products. The table below sets forth our core invention patents.

No.	Patent Title	Application Number	Application Date	Authorization Date	Country
1	A SLAM Method and Device Based on Prior Information	2017108267141	2017/09/14	2020/07/03	China
2	A Dynamic Pallet Recognition and Localization Method, System, and Medium Based on Kinect	2017108299157	2017/09/15	2020/06/26	China
3	An AGV with Automatic Alignment Device and Its Alignment Method	2017114091692	2017/12/22	2024/05/31	China
4	A Tight-Coupled Vision SLAM Method, Terminal, and Computer-Readable Storage Medium	2018800010298	2018/03/06	2022/04/12	China
5	A Multi-Degree-of-Freedom Charging Pile Mechanism	2018105789892	2018/06/07	2019/05/03	China
6	An Automatic Guided Vehicle and Warehouse Storage System	2019800001363	2019/02/13	2021/08/27	China
7	A Robot Task Allocation Method and Device	2019101588511	2019/03/01	2021/11/05	China
8	A Robot Path Planning Method and Device	2019101623500	2019/03/04	2022/04/29	China
9	An Obstacle Detection Method and Device	2019107822141	2019/08/23	2022/05/27	China

No.	Patent Title	Application Number	Application Date	Authorization Date	Country
10	A Filtering Method and Device, Electronic Equipment, and Computer Storage Medium	2019107839195	2019/08/23	2021/07/23	China
11	Logistics Robot Equipment and Handling Method	2020102589410	2020/04/03	2020/09/01	China
12	A Multi-Degree-of-Freedom Charging Pile Device	2020103092176	2020/04/20	2020/07/31	China
13	A Calibration Method, Device, and Equipment for a Mobile Robot	2020113016395	2020/11/19	2022/01/25	China
14	Pallet Access Method, Device, Computer Equipment, and Storage Medium	2022104568827	2022/04/28	2025/03/11	China
15	Omnidirectional Mobile Equipment and Industrial Application Mobile Robot	202210833426X	2022/07/15	2024/07/02	China
16	A Dynamic Charging Pile Recognition and Localization Method and System Based on Kinect	2017108277321	2017/09/14	2020/05/22	China

We did not in-license any material intellectual properties, nor did we outsource any material R&D processes to, or undertake any R&D in collaboration with, any external third parties.

With respect to applicable industry-specific standards, definitions, and classifications in relation to the provision of robotics solutions and robots, the Ministry of Industry and Information Technology of the People's Republic of China (MIIT) has issued the "Industrial Robot Industry Standardization Requirements (2024 Edition)" (《工業機器人行業規範條件(2024版)》), which states that enterprises should ensure that products falling within the applicable scope of the following standards comply with these standards (or their international equivalents): GB/T 15706, GB/T 5226.1, GB/T 16855.1, GB/T 38326, GB/T 38336, GB 11291.1, GB 11291.2, GB/T 36008, GB/T 10827.4.

Because China has not yet introduced a single, robotics-specific standard, we certify our products under a multilayer compliance framework. Domestically, we conform to national regulations that govern machinery safety, electrical integrity, electromagnetic compatibility and battery protection, thereby meeting the fundamental requirements for operation within the PRC. For the European market, our robots are assessed against the CE directives, including rules for driverless industrial vehicles, functional safety of control systems, electrical systems and electromagnetic compatibility, which together enable unrestricted circulation across the European Economic Area. In North America, we obtain certification under the UL program for automated mobile platforms, aligning our products with the safety expectations of United States and Canadian regulators. When projects call for deployment in specialized settings such as semiconductor fabs or clean-room environments, we also adopt the relevant sector guidelines that address equipment safety and contamination control.

We fully comply with the relevant intellectual property laws and regulations. We have established internal management policies to manage intellectual property registration, filing, and application. Our intellectual property team centrally manages and safeguards our intellectual property throughout all operational stages, ensuring protection against infringement. We also engage third-party professionals for legal support in our intellectual property endeavors.

We require that all R&D contracts with domestic and international entities or individuals must include provisions for intellectual property protection. These contracts are reviewed by the intellectual property team and require senior management approval. We have implemented reward and penalty systems to encourage innovation and enhance intellectual property protection awareness among employees.

To prevent the infringement of others' intellectual property, we have implemented a rigorous management process. Prior to initiating product and technology development projects or modifications, the intellectual property team works with relevant departments to conduct patent literature searches and analyses, offering corresponding corrective recommendations and preventive measures to avoid duplication of research or infringement. During the development and completion phases, the intellectual property team continuously tracks and searches patent literature and trademarks, strengthening the identification and mitigation of related risks, and thereby promoting the standardized management of intellectual property.

During the Track Record Period and up to the Latest Practicable Date, we had not been subject to any material disputes or claims for infringement upon third parties' intellectual property rights. Based on the Joint Sponsors' due diligence, the Joint Sponsors are not aware of any circumstances suggesting the contrary to the above.

COMPETITION

Driven by the demand for smart manufacturing system upgrades, robust downstream demand growth, rising labor costs, maturing supply chain and industrial ecosystem and strengthened policy support, the global market size of industrial intelligent mobile robotic solutions increased from RMB6.6 billion in 2021 to RMB21.1 billion in 2025, with a CAGR of 33.8%, and is expected to further increase to RMB80.8 billion in 2030, with a CAGR of 29.6% from 2026 to 2030, according to CIC. Against the backdrop of AGI's rapid advancement, industrial embodied intelligence robots with collaborative arms and based on wheeled mobile platforms are poised to become the advanced intelligent form catering to complex and dynamic multi-scenario manufacturing demands. According to CIC, the global market size for industrial embodied intelligence robotic solutions surged from RMB0.6 billion in 2021 to RMB2.0 billion in 2025, representing a CAGR of 35.0%, and is projected to increase to RMB15.7 billion in 2030 at a CAGR of 43.7% from 2026 to 2030.

The global industrial intelligent mobile robotic solution industry is relatively fragmented. In terms of relevant robot units sold of global industrial intelligent mobile robotic solutions in 2025, the top five participants collectively account for 35.6% of the market share. In this highly competitive sector, we were the fourth largest provider of industrial intelligent mobile robotic solutions in China by sales volume in 2025, according to CIC. The global industrial embodied intelligence robotic solution industry is very fragmented. Benefitting from the growth potential of industrial intelligent mobile robotic solution and embodied intelligence robotic solution markets, we believe our full-stack proprietary and

open compatible software architecture, continuous product innovation and modular development capabilities, in-depth understanding of manufacturing scenarios and industry expertise will enable us to grasp the market potential and achieve continuous growth.

SEASONALITY

We are subject to seasonality that impacts our financial performance, driven by our customers' business practices. Typically, we record higher revenue during the fourth quarter, primarily because (i) many customers tend to concentrate their order placements and/or complete their inspection toward the end of the calendar year driven by their annual budget practices, and (ii) customers generally tend to schedule their procurement before the end of the year in China and in advance of the major holidays in overseas markets, many of which are in the fourth quarter, to avoid potential supply chain issues associated with the holidays. According to CIC, such seasonality is generally prevalent in the industrial intelligent robotic solutions industry.

The seasonal trends we have experienced in the past may not be indicative of our future operating results. See "Risk Factors — Risks Related to Our Business and Industry — Our sales are subject to seasonal fluctuations."

EMPLOYEES

As of April 30, 2026, we had 453 full-time employees, among which a few were based outside of the PRC. The following table sets forth the number of our employees by function as of April 30, 2026:

Function	Number of Employees
Management	9
Sales and marketing	70
Delivery and services	109
R&D	141
Production and supply chain	84
General and administrative	40
Total	**453**

Our ability to attract, retain and motivate employees is critical to our success. We primarily recruit our employees through recruitment agencies, on-campus job fairs, referrals, and online channels including our website and social networking platforms. We believe that we offer our employees competitive compensation so that we are able to attract and retain qualified personnel and maintain a stable core management team. We place significant emphasis on employee career development, and offer comprehensive training and development programs. These programs are aimed at enhancing employees' comprehensive quality and professional competencies, fostering their professional growth, broadening career advancement opportunities, and ultimately contributing to our sustainable development.

We enter into standard labor, confidentiality and non-compete agreements with our key employees. The non-compete restricted period typically expires six months to two years after the termination of the employment relationship, and we agree to compensate the employee with a certain percentage of his or her pre-departure salary during the restricted period.

As required by laws and regulations in China, we participate in a number of employee social security plans organized by municipal and provincial government including, among others, pensions, medical insurance, unemployment insurance, maternity insurance, unemployment insurance, work-related injury insurance and housing fund plans through a PRC government-mandated benefit-contribution plan. We are required by PRC law to contribute to employee benefit plans at specific rates based on employee salaries, bonuses, and certain allowances, up to limits set by local regulations. During the Track Record Period, we met these requirements in all material respects without incurring any significant administrative fines or penalties. During the Track Record Period, our PRC subsidiaries engaged third-party human resources agencies to pay social insurance premiums and housing provident funds for several employees per their request, and we did not make full social insurance and housing provident fund contribution for certain employees in strict compliance with relevant laws and regulations. As of the Latest Practicable Date, we had not received any notice for payment of penalties of social insurance premium and housing provident funds from the competent authorities, nor any administrative penalty or labor arbitration application from employees for the agency arrangement with third-party human resources agencies. For details, please refer to "Risk Factors — Risks Related to Our Business and Industry — We may be subject to fines and penalties as a result of non-compliance with certain PRC laws and regulations regarding social insurance and the housing provident fund during the Track Record Period" in this document.

PATH TO PROFITABILITY

We are at the early stage of commercialization of our robotic solutions. We have experienced sustained business growth as we successfully commercialize new products and solutions during the Track Record Period. During the Track Record Period, attributable to our continuous endeavors in R&D, product development, and continuously expanding high-quality customer base, the sales volume of our robots increased from 1,212 units in 2023 to 1,932 units in 2024 and continued to increase to 2,284 units in 2025 and from 353 units in the four months ended April 30, 2025 to 556 units in the same period of 2026. As a result, our revenue increased at a CAGR of 36.3% from RMB162.2 million in 2023 to RMB301.5 million in 2025, and continued to increased by 139.1% from RMB44.7 million in the four months ended April 30, 2025 to RMB106.9 million in the same period of 2026. Benefiting from the solid foundation we have built and the momentum we have seized, we believe that we are able to maintain sustainability and growth of our business. Our gross profit increased by 89.8% from RMB51.2 million in 2023 to RMB97.2 million in 2024, and continued to increase by 25.7% to RMB122.2 million in 2025, and increased by 138.0% from RMB20.0 million in the four months ended April 30, 2025 to RMB47.6 million in the same period of 2026.

Historical Loss-making

Despite our rapid growth, our revenue had yet been able to fully cover the various costs and expenses incurred during the Track Record Period. We were loss-making during this period. Eliminating impact of share-based payment and **[REDACTED]**, our adjusted net losses (non-HKFRS measure) improved from RMB94.9 million in 2023, to RMB39.3 million in 2024 and further improved to RMB35.0 million 2025, and from RMB27.1 million in the four months ended April 30, 2025 to RMB23.8 million in the same period of 2026. The significant reduction in our adjusted net loss (a non-HKFRS measure) in 2024 was primarily driven by revenue expansion, which increased our gross profit by RMB46.0 million compared to 2023. Notably, our overseas revenue nearly tripled in 2024, supported by deeper penetration into markets such as Hong Kong and Thailand, and we witnessed strong demand from customers in key industries such as 3C and automotive.

Our recurring net losses and adjusted net losses (non-HKFRS measure) during the Track Record Period were primarily due to the following reasons:

- During the Track Record Period, our cost of sales amounted to RMB111.0 million, RMB153.4 million, RMB179.3 million, RMB24.8 million and RMB59.4 million for the years 2023, 2024, 2025 and the four months ended April 30, 2025 and 2026, respectively, represented 68.4%, 61.2%, 59.5%, 55.3% and 55.5% of total revenue for each corresponding period. Since 2023, following the lifting of pandemic-related containment measures, and the successful development and continuous optimization of our next-generation of robots based on our core robotic technology platform with improved product versatility and enhanced modularity, we achieved a substantial reduction in our production and delivery costs. Additionally, the increased utilization of domestically sourced components further contributed to a decrease in material costs. Despite these improvements, the elevated costs of sales during the earlier period remained a significant factor in our net loss. As we were still in the early stage of development, our business scale has not yet reached a volume high enough to fully enjoy cost advantages from economies of scale.

- The intelligent robotic solution industry are highly R&D-intensive, requiring substantial upfront investments in developing proprietary core technologies, product development and upgrades, as well as acquiring and retaining R&D talent to build competitiveness. Innovations in areas like robotic systems engineering, SLAM technology are essential to our business, necessitating significant financial and time commitments. Additionally, there is a high demand for product upgrades and technology iterations. While revenues may grow, a considerable portion is reinvested into further development. Since our inception, we have achieved key breakthroughs in the development of our robotic technologies, significantly enhancing the robustness, adaptability and efficiency of our solutions. In 2023, we successfully developed a hybrid scheduling collaboration algorithm based on swarm intelligence for large-scale robots, capable of scheduling over 2,000 robots in a single simulated scenario. In 2024, we upgraded our robot operating system to a next-generation architecture oriented towards AI, incorporating multi-layer semantic maps, intelligent localization technology and autonomous navigation algorithms, laying a solid foundation for the efficient development of VLA model. These efforts resulted in significant R&D expenses during the Track Record Period, totaling RMB56.1 million, RMB36.6 million, RMB76.7 million, RMB13.5 million and RMB29.1 million in 2023, 2024, 2025 and the four months ended April 30, 2025 and 2026, respectively. Our investments in developing core technologies and products have been substantial, yet they have not fully entered the return phase.

- As an early mover in the intelligent robotic solution sector, we face the challenge of educating potential customers about the value and functionality of our products. In addition, establishing a robust sales network and a broad customer base for companies in their startup and early commercialization stages, like us, involves significant investments. To expand our customer base and promote brand awareness, especially in overseas markets, we have incurred substantial expenses related to participating in exhibitions, maintaining customer relationships, travel and sales commissions. These efforts are aimed at driving the adoption of our robotic solutions in competitive global markets. While these advertising and promotional efforts are essential for long-term success, they have contributed to short-term losses. Our selling and marketing expenses were RMB57.4 million, RMB64.6 million, RMB114.2 million, RMB20.2 million and RMB42.0 million in 2023, 2024, 2025 and the four months ended April 30, 2025 and 2026, respectively.

Despite temporary losses, following years of substantial upfront investments in R&D, market education, and sales and marketing during our early commercialization stage, we believe we will be able to achieve economies of scale that position us to break even in the near term. We believe, as our

business scale grows, the cost to acquire and serve each additional customer will decrease as our brand recognition strengthens and sales pipeline matures, unit production costs will decline as production volumes increase, and we will gain greater bargaining power with component suppliers, obtaining more favorable pricing and payment terms, enabling us to achieve sustainable unit economics and improve profitability.

Our net operating cash outflows throughout the Track Record Period were primarily because we were still during our early high-growth development phase, where our sales revenue and the corresponding cash collections were not yet sufficient to offset the substantial cash requirements for core operations include significant upfront payments to suppliers for raw materials and components, payroll for R&D and other employees, and other operating expenses essential for market expansion, such as sales and marketing activities, resulting in a temporary negative operating cash flow position. We believe this phase is transitional until we achieve greater scale, operational efficiency and market penetration.

Our net cash used in operating activities in 2023, 2024, 2025 and the four months ended April 30, 2026 was RMB120.1 million, RMB27.2 million, RMB86.7 million and RMB64.5 million, respectively. During the Track Record Period, we consistently recorded net cash outflows from operations with fluctuations, which was generally in line with our loss before tax position and changes in working capital items that negatively affected our operating cash flows, as reflected in the procurement of raw materials and inventories and increase in trade receivables as we scaled our operations. More specifically, these items primarily include (i) increases in inventories and trade and bills receivables, and decreases in trade payables in 2023, (ii) increase in trade and bills receivables in 2024, (iii) increase in inventories, trade and bills receivables, restricted cash and trade payables in 2025 and (iv) increases in inventories and prepayments, other receivables and other assets, and decrease in contract liabilities in the four months ended April 30, 2026. Additionally, significant factors included adjustments for non-cash and non-operating items such as write-down of inventories to net realizable value, depreciation and amortization, and share-based payment expenses also contributed to our recurring net operating cash outflow positions during the Track Record Period.

We believe that our proprietary core technologies, product development capabilities, industry expertise and high-quality customer base provide a solid foundation for our sustainable long-term growth. Going forward, we plan to maintain sustainability and achieve profitability by driving sustainable revenue growth and business scale and effectively managing our costs and expenses.

Driving Sustainable Revenue Growth and Business Scale

- **Strengthen our industry leading position in industrial intelligent robotic solution sector:** Driven by the demand for smart manufacturing system upgrades, rising labor costs and maturing supply chain and industrial ecosystem, the global market size of industrial intelligent mobile robotic solutions is expected to grow from RMB21.1 billion in 2025 to RMB80.8 billion in 2030, with a CAGR of 29.6% from 2026 to 2030, according to CIC. Against the backdrop of AGI's rapid advancement, the global market size for industrial embodied intelligence robotic solutions is projected to increase from RMB2.0 billion in 2025 to RMB15.7 billion in 2030 at a CAGR of 43.7% from 2026 to 2030, according to the same source. In the year ended December 31, 2025, we were the fourth largest provider of the industrial intelligent mobile robotic solutions in China by sales volume, according to CIC. Benefitting from the growth potential of industrial intelligent robotic solution market, we believe our full-stack proprietary and open compatible software architecture, continuous product innovation and modular development capabilities, in-depth understanding of manufacturing scenarios and industry expertise will enable us to grasp the

market potential and achieve continuous revenue and business scale growth. Our embodied robots include LINK, our classic industrial embodied robots, and DARWIN, our advanced embodied robots, which enhance flexibility through increased DoF and enable more general capabilities through AGI. LINK can be applied cost-effectively and on a large scale to scenarios such as computer numerical control machine loading and unloading, biopharmaceuticals, semiconductors, and wafer manufacturing loading and unloading. By leveraging our accumulated high-quality customer base, we can quickly increase the sales of LINK. DARWIN targets high-value-added industrial scenarios, such as machine loading and unloading in the semiconductor industry and assembly operations and loading and unloading in the AI intelligent server industry. It replaces manual assembly and loading and unloading processes, helping high-value-added industry clients achieve more comprehensive automation. Our embodied robots are used for high value-added scenarios and are capable of solving more complex problems, thereby enhancing our customers' productivity. Consequently, our customers are willing to pay higher prices for embodied robots, which enable us to achieve higher gross profit margin. The price range for our embodied robots is between RMB450,000 and RMB1,111,000 per unit. In comparison, our standard robots are priced between RMB60,000 and RMB350,000 per unit, while our functional robots are priced between RMB100,000 and RMB550,000 per unit. On the other side, for the mainstream models of each type of our robots, our latest bill of materials ranges from RMB107,600 to RMB274,530 for embodied robots, RMB12,930 to RMB18,180 for standard robots and RMB16,920 to RMB68,230 for functional robots.

- **Upgrade and optimize our robotic solutions:** Our robotic solutions are subject to rapidly evolving technological advancements and customer demands. We plan to further upgrade and optimize our robotic technology platform, our robotic products and the RoboVerse system to enhance their adaptability and keep pace with the fast iterations of products in our customers' underlying industries. We continually advance our proprietary robotics platform under a disciplined product roadmap that delivers upgrades to our controller, SROS operating system and core algorithms, which allows us to constantly enhance the functionality and performance of our robots. This includes optimizing localization and navigation algorithms to achieve higher positioning accuracy and operating speed, which will increase the competitiveness of our products and solutions. We are also deploying VLA and other advanced AI algorithms to raise perception and general-purpose operating capability, which will allow us to deploy our solutions in complex tasks with lower costs and to enhance operating cash outflows. Finally, we are integrating the latest upgrades in sensors and mass-production processes to continue delivering premier products and solutions while steadily reducing material costs, which is expected to increase gross margin. Given that our technology platform is integral to all our products and solutions, we do not anticipate that ongoing technological advancements will significantly alter our revenue distribution across product types, geographic regions, or the industries we serve. We aim to develop more versatile and quickly deliverable robots with enhanced modular and configurable designs to achieve better production and deployment efficiency, greater adaptability and intelligence of our robots in industrial settings at lower costs, thereby expanding their applicability across a wider range of industrial production scenarios and serving a broader customer base from industry leaders to mid-tier customers.

- **Strengthen collaborations with existing customers and attract new customers:** By aligning closely with the evolving needs of our customers, we have cultivated long-standing partnerships with key customers, driving significant business through repeat orders and large-scale deployments. We are dedicated to cultivating deeper relationships with existing customers through multiple expansion pathways, including both the increasing deployment of robotic solutions in their production facilities and the upgrades of their legacy robotic solutions. By broadening our

tailored one-stop solutions to encompass additional stages of our customers' production workflows, we become more deeply embedded in their operations, thereby increasing their reliance on and loyalty to our platform, which would enhance our revenue and cash flow. At the same time, we are broadening our network of integrator partners in high-growth sectors and harnessing our technology platform to deliver new, sector-specific products. For example, we partner with a PRC system integrator specializing in motion-control systems and intelligent grinding/polishing equipment. We provide them with our industrial embodied robot platform, which they integrate with robotic arms and business software to cater to high-end smartphone module factories. Additionally, we supply a leading PRC system integrator in the PCB industry with our industrial embodied robot, which they enhance with specific loading and unloading mechanisms for core substrate factories. In the overseas market, we collaborate with a Hong Kong-based system integrator who augments our solutions with application software and overseas delivery services to support AI module OEMs. We also work with a globally leading system integrator that offers comprehensive design, construction and maintenance services to jointly deliver fully automated material handling and loading and unloading solutions for smart semiconductor factories. We will further collaborate with integrator partners to enhance comprehensive robotic solutions, such as the LINK automated loading and unloading solution for advanced semiconductor packaging scenarios, the heavy-duty body handling solution for new energy vehicle manufacturers, and the automated server handling solution for AI server assembly and testing scenarios, which are considered as "high growth sectors" as advised by CIC.

We have established localized service capabilities in regions such as (i) Japan, (ii) Taiwan, China and (iii) certain Southeast Asia countries. We will further deepen cooperation with integrator partners to serve more customers and sell scenario-based products and solutions to customers of more diversified industries in these markets. Additionally, we will continue to expand into new market regions, such as North America and Europe, with the support of local integrator partners. In parallel, we will deepen our relationships with leading global manufacturers that can roll out projects at scale, especially in underserved geographic regions where they plan to expand. By supporting these initiatives, we will sharpen our capabilities in those markets and extend our partner ecosystem. By developing new scenarios and solutions for existing customers, we achieve market expansion. Additionally, we leverage our accumulated high-quality industry-leading customer knowledge and mature scenario-based solutions to quickly gain the trust of new customers and promote business growth. By continuously enriching our one-stop solutions and enhancing localized service capabilities in different countries and regions, we increase our customer retention. We plan to expand our sales force and enhance marketing and brand awareness promotion efforts, such as expositions, saloons, through our integrated sales network and targeted online advertisement campaigns, to attract new customers, driving the adoption of our robotic solutions in competitive global markets. These marketing strategies will help us improve customer penetration and improve our cash flow. We keep deepening our relationship with integrators and manufacturers by selling different types of products and solutions, which are complementary to each other. As our customers continue to grow their intelligent manufacturing capabilities, the trust we have cultivated through our reliable products help us obtain higher value contracts from them, which expands our market share and increases our revenue. We aim to increase our revenue from international markets and continue to explore opportunities to serve new, high-growth industries. However, we do not anticipate that these marketing strategies will significantly change our revenue mix by product type in the near term.

- **Further expand overseas markets:** We plan to expand our business beyond Chinese mainland and bring our solutions to global customers. We are expanding globally, focusing on strategic regions such as Asia-Pacific, North America and Europe with expansion plans tailored to regional

characteristics, aiming to build a competitive industrial robotic solution brand. In the Asia-Pacific region, we focus on leading manufacturing hubs. including Japan, South Korea, Thailand, Malaysia, Singapore, Vietnam, Taiwan, Australia and India. This region accounts for approximately 25%-30% of global industrial robotics shipments, and we target high-end electronics, automotive and semiconductor applications with end-to-end embodied industrial robotics solutions for production environments, particularly logistics transfer and automated loading/unloading. In the North America, we plan to expand in U.S., Mexico and Canada, which together represent approximately 25%-30% of global industrial robotics shipments. Customers in North America prioritize mature, integrated, scenario-based solutions and place strong emphasis on compliance and safety, including CE and UL certifications. As we expand localized services and flagship projects, our brand awareness continues to build and demand is growing steadily. In Europe, key countries of expansion include Germany, Hungary, Italy and the United Kingdom; the region accounts for approximately 15% of global industrial robotics shipments. The market emphasizes localized service, compliance and rapid deployment. We hold leading advantages in solution maturity and completeness, responsiveness, regional service coverage and total cost of ownership, and demand for our robotic products and solutions continues to expand as we deepen partnerships with local integrators and accumulate regional reference cases. We also aim to enhance our international market competitiveness by strengthening worldwide solutions delivery capabilities. We also plan to strategically grow our sales team and actively participate in international industry exhibitions and technical forums to elevate our brand recognition and technological influence globally.

Continually Improving Profitability

- **Enhance product competitiveness**: We aim to develop and launch higher-margin solutions and enhance our pricing power. In particular, we will focus on robotic solutions that command premium pricing and higher margins compared to basic robotic solutions with pricing advantage driven by both the technical sophistication and measurable impact on customer operations. We constantly engage in R&D of the next-generation industrial intelligent robots. As of the Latest Practicable Date, we have commercialized all our embodied robots, including DARWIN, the first wheeled embodied intelligence robots with the highest degree of freedom in industrial settings implemented in China. We are developing embodied intelligence VLA model and accumulating high-quality real data from vertical industrial scenarios to construct a world model for industrial applications, in order to enhance the cross-scenario and cross-task generalization capabilities of our embodied robots. Our embodied robots are priced between RMB400 thousand to RMB1 million, exceeding the industry range by 10–20%, according to CIC, and lead the industry in core operating metrics regarding intelligence, efficiency and reliability and safety. We are one of the few enterprises capable of scheduling over 2,000 robots in a single simulated scenario. The competitiveness of our products is evidenced by our increased sales volume during the Track Record Period. By continuously innovating and upgrading our robotic solutions, we plan to offer more competitive products with advanced features and functionalities that meet evolving customer needs, thereby differentiating our offerings from competitors and justifying premium pricing.

- **Modular and configurable designs**: We are committed to implementing modular and configurable designs for our robots, enabling us to offer versatile, flexible and adaptable solutions that cater to a wide range of application scenarios. Our modular design decomposes a robot system into functional modules, which are cross-model reusable hardware or software units. For instance, from a hardware perspective, a standard robot is partitioned into core modules such as the core controller, power unit, communication unit, LiDAR sensor components, vision sensor components, battery components and drive motor components. These modules are interchangeable

across various standard robot models, such as the Oasis 300E, Oasis 300EL, Oasis 600E and Oasis 1200E, all of which utilize identical core controllers, power units, communication units and sensor components. From a software perspective, our united SROS operating system is deployed across different robot models, which allows for quick adaptation to specific robot models through quick parameter configuration or enabling/disabling features, avoiding divergent firmware branches, reducing software development and maintenance costs, and further contributing to overall cost efficiency.

By comparing the Oasis 300E (which employs modular design) with its predecessor, the Oasis 300C (non-modular design), we observe a reduction in material quantity by approximately 50%, a decrease in the number of material suppliers and a reduction in the variety of post-sale spare parts by approximately 30%. When comparing the Oasis 300E and Oasis 600E, both of which are products of the same generation and utilize modular design, the material reuse rate for these two models of robots is approximately 36%. These observations are based on the 2025 versions of the bills of materials and spare-parts lists for the Oasis 300E and Oasis 600E, and the 2022 versions for the Oasis 300C. This approach not only reduces procurement, inventory and production costs but also improves scalability and ensures timely deployment across diverse project needs. The reusability of core modules significantly shortens the product validation cycle during new product and solution development stage, thereby accelerating the development speed and reducing time-to-market, lowering development costs and simplifying manufacturing processes, which in turn reduces errors and waste. Additionally, these designs facilitate quicker deployment and faster delivery times, ultimately enhancing customer satisfaction and expanding our market reach. We incorporate standardized components into our modular design, enhancing efficiency and reducing the variety of post-sale spare parts and the cost of post-sale maintenance. As of the Latest Practicable Date, our standard and functional robots have fully adopted modular design. We have successfully developed the fifth-generation core controller, VC500, which stands as one of the most crucial modules within our robots. Compared to its predecessor, the VC500 integrates the functionalities of robot power management and the communication unit, thereby enhancing the module's functional integration. This advanced controller is already being applied in the development of our latest generation of robotic products, showcasing our commitment to innovation and efficiency. We continue to invest in the performance, reliability, cost-effectiveness, manufacturability and maintainability of the mechatronic systems of our robots, aiming to enhance the competitiveness and mass production capabilities of our robotic solutions.

- **Optimize product costs**: To optimize our product costs and enhance our profitability, we are increasing the proportion of self-developed critical components in our robotic solutions. We have successfully developed and already applied several key components in our products, including core controller, vision sensors, power unit, and communications unit. These components are essential to our robots and represent a substantial portion of the overall product cost. For example, compared with purchasing a similarly specified industrial-grade core controller, adopting our self-developed core controller reduces costs by approximately 70%. Likewise, relative to procuring third-party vision sensors, our self-developed vision sensors reduce costs by approximately 85%. We are in the designing phase of developing a flexible, high-performance computing unit that can be connected to the core controller via a high-real-time software bus, allowing for scalable computational power. We are also designing a series of high-torque, low-cost robotic joint modules, which are critical to embodied robots and a major cost driver. Additionally, we are in the planing stage of high-flexibility gripper end-effectors, which are crucial for the operational capabilities of embodied robots. By deepening our in-house R&D capabilities, we achieve direct material cost savings through streamlined designs, and higher product margin retention as we internalize value-added components rather than paying supplier premiums.

In addition to internalize value-added components, we also plan to optimize our supplier chain to reduce procurement costs. As we expand in scale, we expect to have more bargaining power with suppliers to negotiate for lower costs. In addition, we plan to enhance production efficiency by strategically integrating our proprietary industrial robotic solutions into our production lines, thereby elevating the level of automation within our manufacturing processes and achieving lower overall product costs.

- **Reduce solution deployment costs**: We plan to lower our robotic solution deployment costs by leveraging AI-powered deployment software and tools, enabling remote and automated deployment processes, thereby significantly reducing commissioning time and enhancing operational efficiency. By integrating advanced machine learning modules into our robots and software systems to assist deployment and delivery, we enable autonomous self-learning and self-commissioning capabilities, which streamline the deployment process and reduce reliance on highly skilled field engineers. This innovation reduces on-site commissioning, allowing our deployment teams to handle more projects simultaneously while lowering labor costs. Additionally, the system's adaptive capabilities minimize reconfiguration efforts when production layouts change, further improving long-term service margins. By transforming robotic deployment from a labor-intensive process into a AI-powered automated solution, we will be able to achieve higher project throughput with lower marginal costs, directly contributing to improved profitability. We plan to leverage our integrated sales network to provide localized maintenance services and reduce labor costs.

We manage our cost structure through several strategic initiatives. By implementing modular and configurable designs, we reduce production costs, enhance scalability, and decrease R&D time, which collectively improve cost efficiency and market reach. Additionally, we optimize product costs by increasing the proportion of self-developed components, streamlining designs, and enhancing production efficiency through automation, thereby achieving material cost savings and higher product margins. Furthermore, as sales volumes increase, we achieve lower average cost and leverage AI-powered deployment tools to lower deployment costs, reduce reliance on skilled labor, and improve long-term service margins. These efforts collectively contribute to margin improvement over time.

ENVIRONMENTAL, SOCIAL AND GOVERNANCE

Corporate Governance

Board Diversity: We uphold the principle of board diversity in the selection of directors, taking into full account a wide range of factors including gender, age, cultural and educational background, competencies, skills, professional experience, independence, and knowledge. Currently, the Board of Directors comprises seven members, including one female Director, representing 14.29% of the Board. For further details, please refer to the section titled "Directors and Senior Management."

ESG Governance: We embed a sustainability philosophy into our strategic decision-making and daily operations, established an ESG Management Policy (《ESG管理制度》) to define our ESG governance framework and clarify the responsibilities. An ESG Management Committee, established under the Board of Directors, responsible for the overall ESG affairs, including monitoring laws and regulations, identifying and managing material ESG risks and opportunities, an ESG Working Group has been established to be responsible for specific implementation. The Board of Directors convenes no

fewer than once annually to review ESG performance reports submitted by various departments, to continuously enhance the Company's ESG governance capabilities. Looking forward, we will continue to improve our ESG governance mechanisms to ensure robust support for the implementation of ESG issues.

Business Ethics: We strictly comply with the Anti-Unfair Competition Law of the People's Republic of China (《中華人民共和國反不正當競爭法》) and other regulations, unequivocally prohibit fraud, bribery, corruption, money laundering, etc. To uphold integrity within the supply chain management, all categories of suppliers are required to sign a Integrity Commitment (《廉潔承諾書》) during the onboarding process, and suppliers in breach of this commitment will be placed on a blacklist. Meanwhile, to address potential violations of business ethics, we have established multiple reporting channels — including email, WeChat, DingTalk, and Feishu — accessible to employees and business partners. Whistleblowers' legal rights are strictly protected, and all personal information is handled with strict confidentiality. As of the end of the reporting period, we were not involved in any pending or concluded legal proceedings related to corruption.

ESG Materiality Assessment

Based on the nature of our operations and strategic direction, we have conducted targeted identification and assessment of ESG-related risks through a formal risk evaluation process. Our Company has adopted corresponding mitigation measures across various risk topics to reduce potential exposure. The following table presents the identified material ESG-related risk topics the Company assessed and prioritized, along with their associated potential impacts, and corresponding mitigation measures:

Risk Topics	Potential Impacts	Mitigation Measures
Environmental Compliance Management	Non-compliance with environmental regulations may result in fines/administrative penalties, lawsuits/legal action, suspension of operations, and reputational damage. This increases compliance costs and undermines market competitiveness.	We have established an ISO 14001 Environmental Management System. It systematically identifies environmental risks, ensures compliance through the execution of environmental management plans and quarterly reviews, and reduces related risks with developed emergency response plans.
Addressing Climate Change	Climate change intensifies extreme weather, threatening supply chains and production safety. Under China's "Dual Carbon" Goals, a failure to advance the low-carbon transition may lead to compliance risks, rising carbon costs, and diminished market competitiveness.	We have formulated a Natural Disaster Emergency Response Plan (《自然災害應急預案》) and established an emergency response team to address disasters such as floods and typhoons. We have also set up extreme weather monitoring and early-warning mechanisms, conduct regular reviews of high-risk areas, and enhance staff disaster preparedness through drills and training.
Packaging and Material Use	Failure to optimize packaging or adopt eco-friendly materials may result in penalties and increased procurement and waste management costs.	We recycle materials such as cartons and PE bags and promote supplier recovery programs. This reduces packaging usage and resource waste, while also lowering operational costs.

Risk Topics	Potential Impacts	Mitigation Measures
Employee Health and Safety	Failure to provide a safe working environment or strengthen safety awareness may result in occupational injuries, staff turnover, and higher operational costs.	Our facilities in Shenzhen and Kunshan are ISO 45001 certified. We maintain workplace safety and compliance through regular risk inspections, employee health check-ups, emergency drills, safety training, and the provision of personal protective equipment.
Employee Development and Training	Failure to improve the talent development framework may lead to a shortage of key talent, skill gaps, exacerbated employee turnover, and a weakened long-term competitive position for the Company.	We have established dual promotion pathways, implemented a structured training program with an annual minimum 24-hour learning requirement, and continuously optimize through evaluations to support employee growth and organizational development.
Sustainable Supply Chain Management .	Failure to incorporate ESG into supplier management may result in supply chain disruptions and reputational damage. As ESG requirements tighten, it may also hinder order acquisition and increase costs.	During supplier admission, we prioritize those with relevant certifications and require signing compliance and social responsibility commitment documents. We provide improvement guidance and support to high-risk suppliers, systematically reducing ESG risks in the supply chain.
Product Quality and Safety.	Inadequate quality review and risk assessment may affect product quality, leading to decreased customer satisfaction, an increased risk of product recalls, and higher costs.	We have established an ISO 9001 quality management system, implementing end-to-end quality control, continuously optimizing supplier and inspection procedures, and driving continuous improvement through initiatives like "Quality Week" and monthly reviews.
Customer Relationship Management	Failure to effectively collect and respond to customer demands, or insufficient sensitivity to market trends, may impact business performance and revenue.	We continuously optimize the complaint handling mechanism to ensure closed-loop resolution. We also conduct annual customer satisfaction surveys and proactively collect feedback through multiple channels such as phone calls and interviews, in order to stay aligned with market dynamics.
Compliance and Risk Control	The lack of a sound compliance system and risk control mechanisms may hinder the Company's ability to prevent operational misconduct, impacting business continuity, revenue, and costs.	We have established a risk identification and response process, developed a risk register for categorized management, and provide annual compliance training to new employees to strengthen risk prevention and control capabilities.

ESG Risk Management

We place strong emphasis on risk and compliance management and have established a suite of internal policy documents, such as the Risk and Opportunity Control Procedures (《風險與機遇控制程序》) to provide regulatory support for safe and compliant operations. We have implemented a structured three-tier risk management framework consisting of the Board of Directors, the management representative, and department heads, with clearly defined roles and responsibilities, and standardized procedures to oversee risks associated with the Company's operations and regularly report on risk management matters.

We have established systematic risk management procedures and methodologies to identify, analyze, evaluate, and mitigate risks in key areas, with regular monitoring and improvement. We have also standardized incident response procedures to ensure timely and effective handling of unforeseen events. As of the end of the reporting period, we had not recorded any compliance violations.

Environmental Responsibility

Environmental Compliance Management: We rigorously follow the Environmental Protection Law of the People's Republic of China (《中華人民共和國環境保護法》) and other environmental laws and regulations. We set up internal systems, such as the Environmental Operation Control Procedures (《環境運行控制程序》), to systematically identify, evaluate, and effectively control its environmental aspects, and proactively minimizes the potential adverse impacts of our operations and production activities on the environment and natural resources. We have obtained ISO 14001 certification for our environmental management system and have not been subject to administrative penalties or negative publicity for environmental-related violations during the reporting period.

Waste Management: We adhere to the Law of the People's Republic of China on Prevention and Control of Environmental Pollution by Solid Waste (《中華人民共和國固體廢物污染環境防治法》) and other related laws and regulations, and formulates internal systems, such as the Solid Waste Management Rules (《固體廢棄物管理規定》), ensuring full process waste control, maximize waste recycling. We coordinate with local sanitation departments for the proper disposal of all generated solid waste. We maintain the Solid Waste Disposal Account (《固體廢棄物處理台帳》) for waste registration and explicitly prohibits the open burning of chemicals or any other waste. Our robot production business focuses on research and development, assembly, and integration, and does not involve high energy consumption or high waste discharge processes, so the amount of waste generated is limited. We have signed a Hazardous Waste Collection Service Contract (《危險廢物收集服務合同》) with a third-party company that has the qualifications for hazardous waste recovery and treatment. We actively promote the comprehensive utilization of resources by classifying and recycling waste, and have set and achieved a management target of 100% waste recycling and disposal rate. The following table presents the historical non-hazardous waste generation data.

Metrics	Unit	2023	2024	2025	Four months ended April 30, 2026
Total non-hazardous waste	Tonne	54.4	49.8	72.9	29.4
Non-hazardous waste intensity	Tonne/RMB million of revenue	0.3	0.2	0.2	0.3

Addressing Climate Change: We fully recognize the business risks posed by climate change. In response to global climate governance requirements, we have established a climate risk identification, assessment, and management system, while consistently implementing mitigation measures.

Name of Risk	Risk Description	Potential Impact	Mitigation Measures
Physical Risk			
Extreme weather such as rainstorms and typhoons .	Climate change intensifies extreme weather (such as typhoons, rainstorms).	Extreme weather can disrupt logistics, damage facilities, affect public supply, leading to production cessation, equipment damage, and increasing costs.	• Our Company has developed an emergency plan for natural disasters, established an emergency team, and established a weather monitoring and early warning mechanism to promptly issue warnings, strengthen facility protection, and systematically reduce the operational risks of extreme weather through regular inspections and educational training.
Transitional Risk			
Policy and legal impacts .	Strengthen corporate disclosure requirements, especially under the "dual carbon" policy, significantly elevate reporting standards for clean energy and carbon emissions.	Strict information disclosure regulations pose compliance risks to our Company, and potential violations may lead to operational interruption and reduced revenue.	• We would disclose environmental and social matters that meet the requirements of the Stock Exchange, reflecting the Board's involvement in ESG, we also identify and response to ESG-related risks proactively, and disclose quantitative environmental data, which would lay the foundation for improving ESG compliance.
	The regulatory is becoming increasingly stringent.	Our Company or suppliers illegally discharge hazardous waste may face administrative penalties, which could affect normal operations.	• Our Company has formulated internal systems such as Environmental Operation Control Procedures (《環境運行控製程序》) and Environmental Factor Identification and Evaluation Control Procedures (《環境因素識別與評價控制程序》) to standardize environmental behavior and reduce related risks.
Technological risks	The development of products or technologies may not keep pace with trends in sustainable transformation.	The increasing demand for environmental protection products and energy-saving technologies has driven up costs.	• We actively promote the green upgrading of core components during the product design and development stages, achieving comprehensive reductions in product energy consumption through advancements in battery technology.
Market risk .	Heightened public awareness of environmental protection has resulted in a growing consumer preference for low-carbon products and sustainable manufacturing.	Failure to meet the demand for low-carbon products in a timely manner may lead to a decline in the Company's sales and operating income.	• Our company incorporates supplier environmental performance into the evaluation to promote sustainable development of the supply chain, and integrate energy-saving concepts into product design and development, reduce carbon emissions throughout the entire product lifecycle, and develop low-carbon products that meet market demand.

Name of Risk	Risk Description	Potential Impact	Mitigation Measures
Reputational risk	Stakeholders are increasingly focused on climate change and related ESG information.	Shift in focus may affect consumer preferences and capital market expectations, thereby affecting our Company's operations and revenue.	• We have established a climate risk management mechanism, including extreme weather response measures, to reduce reputation risks. At the same time, it is planned to regularly identify major issues and actively incorporate feedback from stakeholders such as clients and investors, to strengthen communication and response.

*Greenhouse Gas ("**GHG**") Emission:* Our GHG emissions predominantly stem from indirect emissions associated with the consumption of outsourced electricity. The table below presents our historical quantification data for GHG emissions. The GHG emissions intensity metrics, calculated per RMB million of revenue, are relevant for peer group benchmarking, and our actual performance exceeds the industry average.

Metrics	Unit	2023	2024	2025	Four months ended April 30, 2026
Direct Greenhouse Gas Emissions (Scope 1)[(1)]	Tonne CO_2e	0	0	0	0
Indirect Greenhouse Gas Emissions (Scope 2)	Tonne CO_2e	330.6	264.1	256.8	96.6
Indirect Greenhouse Gas Emissions (Scope 3 — Category 6; Business Travel)[(2)]	Tonne CO_2e	212.6	179.8	187.8	80.0
Total Greenhouse Gas Emissions (Scope 1 and Scope 2)	Tonne CO_2e	330.6	264.1	256.8	96.6
Total Greenhouse Gas Emissions (Scope 1, 2 and 3)	Tonne CO_2e	543.2	443.9	444.6	176.6
Greenhouse Gas Emissions Intensity (Scope 1,2 and 3)	Tonne CO_2e/RMB million of revenue	3.3	1.8	1.5	1.7

Notes:

(1) Our business operations do not involve the direct consumption of fossil fuels. Going forward, we will continue to enhance our energy management system and further improve our energy consumption monitoring and indicator control, aiming to increase energy efficiency and strengthen transparency in data.

(2) Emission data from upstream and downstream of the value chain has not been included in the statistics. This disclosure of Scope 3 emissions is limited to greenhouse gas emissions generated from business air travel. Moving forward, we will phase in enhancements to the travel management system while building a robust Scope 3 emissions tracking framework by implementing standardized indicator controls, aiming to achieve full transparency in value-chain carbon footprint disclosure and drive improvement in low-carbon management efficiency.

Energy and Resource Use: We rigorously adhere to the Energy Conservation Law of the People's Republic of China (《中華人民共和國節約能源法》), formulate the Energy Conservation and Reduced Energy Consumption Management Standards (《節能降耗管理規範》) and various internal management systems to govern its energy usage, and a dedicated position is established to oversee the implementation of energy conservation measures among employees and to address any irregularities promptly. To promote resource conservation and emission reduction, we have set the following targets: monthly electricity consumption ≤ 13,000 kWh, quarterly water consumption ≤ 80 cubic meters, and a 10% year-over-year reduction in water consumption by 2025. Furthermore, we continuously reform and optimize the design and processes of the entire product range in line with the requirements of CE (Conformité Européenne) certification, aiming to decrease energy and raw material consumption.

To reduce daily operational energy consumption and resource waste, we have taken measures such as posting water-saving and energy-saving slogans, implementing air conditioning and lighting control, promoting paperless office work, strengthening production material and quality management, etc. to reduce energy consumption and resource waste, and promoting employees' awareness of conservation through morning meetings. In daily operations, the main resources we consume are water and electricity. The following table presents energy and resource consumption during the previous reporting period.

Metrics	Unit	2023	2024	2025	Four months ended April 30, 2026
Purchased electricity consumption	kWh	564,541	450,961	483,924	182,111
Electricity Consumption intensity	kWh/RMB million of revenue	3,481	1,800	1,605	1,703
Water consumption	Tonne	438	251	324	196
Water intensity	Tonne/RMB million of revenue	2.7	1.0	1.1	1.8

Social Responsibility

Information Security: We strictly adhere to the relevant laws and regulations, including the Cybersecurity Law of the People's Republic of China (《中華人民共和國網絡安全法》). We have established internal management supporting policies, a comprehensive information security management system, and internal management measures. Our suppliers are required to sign a Supplier Confidentiality Agreement to ensure they do not disclose any of our confidential information, thereby fully safeguarding our information security. For further details, please refer to the "Data Privacy and Security" section.

Customer Management: We strictly adhere to the Law of the People's Republic of China on the Protection of Consumer Rights and Interests (《中華人民共和國消費者權益保護法》) and other relevant regulations. We have established internal systems to oversee sales and service processes and are continuously improving our complaint handling mechanism. Customers can submit complaints via email, our website, or a dedicated hotline, and we will promptly analyze, resolve, and track each case to closure. Through annual satisfaction surveys and feedback collected by our business personnel, we continuously understand customer needs and optimize our services. The sales and after-sales teams receive regular training and review service processes and key points in weekly, bi-weekly, monthly, and quarterly meetings. During the Track Record Period, we received no customer complaints regarding product quality, service, or customer usage.

Supplier Management: We comply with relevant laws and regulations, including the Bidding Law of the People's Republic of China (《中華人民共和國招標投標法》). We have developed internal systems such as the Supplier Management Procedures (《供應商管理程序》), Procurement Control Procedures (《採購控制程序》), and have established a clear procurement management system with defined roles and responsibilities. We incorporate ESG criteria, such as quality and safety, into supplier assessments. For suppliers with notable quality issues, we regularly provide coaching and training led by quality engineers to drive their continuous improvement. For further details, please refer to the "OUR SUPPLIERS" section.

Occupational Health and Safety: We strictly adhere to laws and regulations, including the Workplace Safety Law of the People's Republic of China (《中華人民共和國安全生產法》). We have established internal systems such as the Employee Health Management Rules (《職工健康管理規定》), the Environmental Safety Management Rules (《環境安全管理規定》), the Workplace Safety Management Standards (《安全生產管理規範》), clearly defining safety checks in work processes, electrical safety, production area regulations, and workshop preventive measures, thereby systematically managing occupational health and safety activities. All work activities undergo occupational health and safety assessments with dedicated personnel assigned. To safeguard employee health, we organize annual health check-ups for all staff. The General Affairs and Supply Chain departments conduct quarterly and daily inspections to manage key environmental factors and hazardous sources, analyze non-compliances, and develop improvement plans. We have formulated emergency response plans for potential incidents such as electric shock, fire, and typhoons to reduce accident risks. In the event of a work-related injury, it will be handled strictly in accordance with the Workers' Compensation Insurance Ordinance (《工傷保險條例》) and internal agreements. We regularly conduct internal safety training and provide external training for safety personnel. The Company aims for "zero safety casualties and zero occupational diseases." As of the end of the reporting period, no workplace fatalities have been reported.

PROPERTIES

As of the Latest Practicable Date, we did not own any real property.

As of the Latest Practicable Date, we leased seven properties in the PRC with an aggregate gross floor area of approximately 23,413 square meters from third parties. These properties were used primarily as premises of offices, production and storage. Our lease agreements in respect of the abovementioned leased properties generally have lease terms ranging from six months to three years.

Pursuant to PRC laws and regulations, property lease agreements must be registered with the local branch of the Ministry of Housing and Urban-Rural Development of the PRC to obtain the property leasing filing certificates. As of the Latest Practicable Date, all of our lease agreements were not registered with the relevant authorities. According to our PRC Legal Advisor, the failure to complete such registration process does not affect the legality, validity or enforceability of the relevant property lease agreements, but the competent housing authorities may order us to register the lease agreements in a prescribed period of time and a maximum penalty of RMB10,000 may be imposed for the non-registration of each lease agreement. As of the Latest Practicable Date, we have not received ownership certificates or other proof of authorizations of four properties we leased from the lessor. Despite the lack of certain ownership certificates of our leased properties, those leased properties are easily replaceable and do not serve as the primary production sites for us, we believe that alternative property can be readily secured and that any relocation would have minimal impact on our operations. During the Track Record Period, we have not fully obtained construction permits, completed as-built acceptance filings, or fire protection filings for certain of our construction projects due to the historical legacy of the relevant lands or properties, which could subject us to administrative penalties including orders of correction and fines. We have not received regulatory inquiries and administrative penalties imposed on us during the Track Record Period and up to the Latest Practicable Date. We have conducted inquiries and interviews with the competent governmental authorities which confirmed that, in general, the failure to do so will not result in penalties against us. Based on such interviews, our PRC Legal Advisor is of the view that, such defect of such leased properties would not have a material adverse impact on our continued use of such construction projects. For more details, see "Risk Factors

— Risks Related to Our Business and Industry — Our leased property interests may be defective, and our right to lease the properties could be challenged due to such defects. Additionally, failure to renew our current leases or locate desirable alternatives could materially and adversely affect our business."

During the Track Record Period and up to the Latest Practicable Date, we had not been subject to any material penalties arising from the non-registration of our lease agreements, had not experienced any dispute arising out of, or in relation to, our leased properties, and had not received any notices or administrative penalty decisions from the relevant authorities requiring us to complete lease registration filings for certain leased properties.

INSURANCE

As a product manufacturer and service provider, we are liable for infringement caused by product defects or malfunctions in accordance with relevant laws and regulations and contractual agreements. For more information, please refer to "Regulatory Overview — Regulations Relating to Product Quality." Our PRC Legal Advisor is of the view that, during the Track Record Period and up to the Latest Practicable Date, we have not been held liable for any material product defects or malfunctions.

We believe we have adequate insurance coverage for our business operations by implementing all mandatory insurance policies required by PRC laws and regulations. As mandated by PRC laws, we maintain standard employee-related insurance, which includes pension, maternity, unemployment, work-related injury and medical insurance. Furthermore, we maintain product liability insurance to mitigate risks associated with product defects or malfunctions, even though such coverage is not mandatory under applicable PRC laws. We do not maintain insurance policies covering damages to our IT infrastructure or information technology systems. Overall, as advised by CIC, we believe our insurance coverage align with general market practices within the industry. Taking into account of the foregoing, the Directors are of the view that we have maintained sufficient insurance to cover our business and operations. During the Track Record Period and up to the Latest Practicable Date, there is no material insurance claims related to our business that have been filed. For more information, please refer to "Risk Factors — Risks Related to Our Business and Industry — We have limited insurance coverage, and any claims beyond our coverage may result in substantial costs and a diversion of resources."

RISK MANAGEMENT AND INTERNAL CONTROL

We are dedicated to the establishment and maintenance of a robust risk management and internal control system. We have adopted and continually improve our internal control system consisting of policies and procedures that are appropriate for our business operations, across critical areas of our business, including financial reporting, IT, compliance, intellectual property, human resources, and investment management. Furthermore, we conduct periodic reviews of the implementation of our risk management policies and internal control measures to ensure their effectiveness and sufficiency.

We are committed to promoting a compliance culture and adopt policies and procedures on various compliance matters, including the Stock Exchange's requirements on corporate governance and environmental, social and governance matters.

Our Board is collectively responsible for establishing and implementing such risk management mechanisms and overseeing our overall risk management. Our Directors are of the view that our current internal control measures are adequate and effective to ensure compliance with relevant laws and regulations.

Operational Risk Management

Operational risk refers to the risk of direct or indirect financial loss resulting from incomplete or problematic internal processes, personnel mistakes, IT system failures or external events. We have established a series of internal procedures to manage such risk. We take a comprehensive approach with regard to operational risk management, and we have implemented a mechanism with detailed and decentralized responsibilities and clear rewards and punishment systems. Our information technology, human resources, finance and operations departments are collectively responsible to ensure the compliance of our operations with internal procedures. In the event of a major adverse event, the matter will be escalated to our legal department to take appropriate measures. Through effective operational risk management, we expect to control operational risks within a reasonable range by identifying, measuring, monitoring and containing operational risks to reduce potential losses.

Human Resources Risk Management

We provide regular and specialized training tailored to the needs of our employees in different departments. These trainings enable our staff to improve their skill sets and better address our customers' needs. We have in place an employee handbook approved by our management and distributed to all our employees, which contains internal rules and guidelines regarding best commercial practices, work ethics, fraud prevention mechanisms, negligence, and corruption.

Financial Reporting and Risk Management

We have in place a set of accounting policies in connection with our financial reporting risk management, such as financial report management policies, treasury management policies, and reimbursement management policies. We have various procedures in place to implement accounting policies, and our financial department reviews our management accounts based on such procedures.

Credit Risk Management

We seek to maintain strict control over our outstanding receivables and have implemented a policy to minimize credit risk. We maintain regular communication with our customers, address potential payment issues proactively, and conduct detailed risk assessments. Our finance department conducts regular reviews of overdue accounts and recoverability of our outstanding balances, prioritizing high-value or long-overdue balances, and when appropriate, provides for impairment of these trade receivables. For significantly overdue accounts with no resolution, we escalate to legal proceedings.

Audit Committee Experience and Qualification and Board Oversight

To monitor the ongoing implementation of our risk management policies, we have established an Audit Committee to review and supervise our financial reporting process and internal control system on an ongoing basis to ensure that our internal control system is effective in identifying, managing and mitigating risks involved in our business operations. See "Directors and Senior Management — Board of Directors."

In addition to our internal control department, we have also established an internal audit department which is responsible for reviewing the effectiveness of internal controls and reporting issues identified and improving our internal control system and procedures by identifying internal control failures and weaknesses on an ongoing basis. The internal audit department reports any major issues identified to the Audit Committee and Board of Directors on a timely basis.

DATA PRIVACY AND SECURITY

In providing our robotic solutions, we engage in certain data-related activities to ensure their functionality and efficiency. For instance, we may access data related to the design, development, production and functionality of our robotic solutions, including production line and equipment layout in manufacturing workshops, appearance and technical specifications of equipment, type of materials, shape of products, and other information related to production and facilities. We comply with our customers' confidentiality requirements and do not disclose their data without their prior consent.

During the use of our robotic products, we do not collect any personal data or information from customers. During the course of our business operation, with the prior consent of our customers, suppliers and other business partners, we collect and maintain their contact information to the extent necessary and in accordance with the applicable laws and regulations on data privacy and security. We have taken measures to maintain the confidentiality of such information to ensure regulatory compliance. We have set up an access control system for personal information in our internal system so that it cannot be viewed without proper authorization or exported in bulk. We set up firewalls to prevent information loss or leakage caused by cyber-attacks. In addition, we from time to time examine the security of our data storage system. We strictly restrict the range of data that our employees are authorized to access based on their role and function. We continue to pay close attention to the legislative and regulatory developments in cybersecurity and data protection and conduct routine cybersecurity and data protection compliance checks and rectification to keep pace with regulatory developments.

During the Track Record Period and up to the Latest Practicable Date, we did not experience any material data leakage or data loss, nor did we encounter any significant unauthorized use of personal information belonging to customers, suppliers, other business partners or employees.

As of the Latest Practicable Date, we have not encountered any disputes, controversies, or lawsuits related to violations of information security laws and regulations. Our PRC Legal Advisor is of the view that we are in compliance with the relevant PRC laws and regulations relating to cybersecurity and data protection in all material aspects.

LICENSES AND PERMITS

Our Directors, as advised by our PRC Legal Advisor, confirm that, during the Track Record Period and up to the Latest Practicable Date, we had complied with relevant PRC laws and regulations in all material respects and had obtained all material licenses, approvals and permits from relevant PRC authorities for our operations in Chinese mainland.

We currently do not expect any material impediment in timely renewing our material permits and licenses as they expire, if applicable. For more information about the laws and regulations that we are subject to in the PRC, please see "Regulatory Overview."

The following tables set out the material licenses and permits held by us as of the Latest Practicable Date:

Holder	License/Permit/Approval	Issue Authority	Issuance Date	Expiration Date
Our Company	Business License	Wuxi Municipal Administration for Market Regulation	June 20, 2025	N/A
Our Company.	Import and Export Goods Consignee and Consignor Registration Certificate	Wuxi Custom Bureau	June 24, 2025	December 31, 2099
Standard Robot (Kunshan) Co., Ltd.	Import and Export Goods Consignee and Consignor Registration Certificate	Kunshan Custom Bureau	June 11, 2025	December 31, 2099
Standard Robot (Kunshan) Co., Ltd.	Registration Receipt for Stationary Pollution Sources	N/A	October 16, 2021	October 15, 2026

IMPACT OF INTERNATIONAL TRADE, OUTBOUND INVESTMENT AND OTHER TRADE POLICIES

Impact of U.S. Export Controls Laws and Regulations

Background

Dring the Track Record Period, we had business dealings with several customers and suppliers who are on the Entity List administered by the BIS (each, a "**Covered Entity**"). Our Group sold products and provided services to a total of 13 customers who are on the Entity List. The revenue recorded from such sales of products and provision of services from customers on the Entity List represented 1.68% of the total revenue in 2023, 3.02% in 2024, 6.20% in 2025 and 0.82% for the four months ended April 30, 2026. The increase in sales to the Covered Entity customers for 2025 was primarily driven by the combined effect of the good performance of our products and the significant demand for robotic products from Customer J, being an existing Covered Entity customer, which resulted in large orders from that customer. For the the year ended December 31, 2025, the revenue recorded from the sales to Customer J amounted to RMB16.7 million and represented 5.5% of the total sales for the period. We have also sourced certain components from three suppliers who are on the Entity List and the transaction amounts with them are of negligible amount.

The products sold and services provided to the Covered Entity customers by us during the Track Record Period were primarily used as automated logistics equipment for warehouse and production lines and thus were not intended for military applications. Such products and services included (i) products assembled by us in our own manufacturing plants using parts and goods procured from third-party suppliers ("**Assembled Products**") and (ii) parts and goods procured by the Group from third-party suppliers which were on-sold to the Covered Entity customers ("**On-Sold Products**"). During the Track Record Period, revenue recorded from sales of On-Sold Products to the Covered Entity customers represented 0.20%, 0.18%, 0.22% and 0.07% of the Group's total revenue for the years ended 31 December 2023, 2024, 2025 and for the four months ended April 30, 2026, respectively. With respect to the Assembled Products, we typically provided design blueprint to outsourced manufacturers, and the design blueprint will specify the required integrated circuits ("**IC**") for the

printed circuit board assembly ("**PCBA**") to be used for the Assembled Products. The outsourced manufacturers then procured the IC and other parts according to the design, supplied the IC, PCBA and other parts to us for assembling into final products. As such, we only have very few in-house manufacturing equipment.

In addition, (a) all of our manufacturing activities are conducted in China; (b) our procurements are all made in China from Chinese suppliers (including Chinese agents of US vendors); and (c) all of the technologies used in our production are proprietary technologies developed by our Company.

However, we used certain software and items origin from the U.S. during our blueprint design process, which involves comparing multiple technical solutions or device options, and then selecting the one most suitable for the product. These include Dassault Systèmes' Solidworks 3D CAD software and the GNU Compiler Collection ("**GCC**") software. We also procured a total of 140 micro controller units ("**MCUs**") manufactured by an international manufacturer, with an aggregate purchase amount of RMB8,218, solely for use in our design process in 2023; thereafter, we use MCUs manufactured by Chinese manufacturer to replace the MCUs from the international manufacturer.

As the MCUs manufactured by the international manufacturer were evaluated by us as one of several comparative options alongside MCUs manufactured by Chinese manufacturers. As we have ultimately chosen the domestically produced MCUs for use in our production manufacturing, our Directors are of the view that the MCUs procured from the international manufacturer were not considered as a key component in the blueprint design process and therefore not material to our solutions or products offerings. Additionally, we used several items of U.S. origin during our design process. These items were primarily hardware components used for logical control, data processing, signal interfacing and power connectivity and were certified as EAR99 by the relevant supplier in its supplier confirmation.

Relevant U.S. Export Control Restrictions

The Entity List administered by the BIS imposes tailored licensing requirements on exports, reexports, or in-country transfers of items subject to the EAR to parties on the list pursuant to § 744.16 of the EAR (15 CFR § 744.16). Any person dealing with a party on the Entity List must first obtain a license from the BIS before any item subject to the EAR can be supplied to such party—regardless of the destination country. License applications involving Entity-List parties are generally presumed to be denied and most license exceptions cannot be used for transactions with parties on the Entity List. This essentially made it difficult (if not impossible) to obtain the required license to sell or supply items subject to the EAR to persons on the Entity List. Any violation of the license requirement will risk severe civil and criminal penalties.

Under the EAR, in general, a foreign-made item is subject to the EAR if it incorporates controlled U.S.-origin content which accounts for 25% or more of the total value of such foreign-made item. This is the so-called de minimis rule. Foreign-made item for the purposes of the de minimis rule refers to foreign-made commodity, foreign-made software and foreign-made technology, which does not include services.

A few Covered Entity customers to which we supplied goods and services are on the Entity List with Footnote 1 designation, making them subject to the Entity List Foreign Direct Product (FDP) Rule under the EAR. Under the FDP rule, certain foreign-produced items that are the direct product of U.S. technology or software, or made from plants or equipment that are themselves direct products of U.S.

technology or software, are also subject to the EAR when destined for entities with Footnote 1 designation. The practical effect of this rule is that any in-country transfer of such foreign-produced or foreign-made products within China to these Footnote 1 designated entities would require a license from the BIS, and a license application in such a case is generally reviewed with a presumption of denial.

Analysis of U.S. Export Control Risk

We have carried out a comprehensive review of the bill of materials ("**BOM**") for each of the Assembled Products that was supplied to the Covered Entities during the Track Record Period. We have also identified (i) all suppliers whose goods were supplied to the Covered Entity customers during the Track Record Period and (ii) all suppliers from whom we have procured goods for use in our blueprint design process. We have obtained confirmations from the relevant suppliers of these products. According to these supplier confirmations, none of the Assembled Products and On-Sold Products incorporated U.S.-origin goods, nor are they the direct products of U.S. technology and U.S. software or made from plants or equipment that are themselves direct products of U.S. technology or software. On such a basis, the Assembled Products and On-Sold Products sold to the Covered Entity customers are not subject to the EAR under the de minimis rule, as advised by our International Sanctions Legal Advisor.

In relation to the U.S.-origin software and items we used during our blueprint design process, the Dassault Systèmes' software is Solidworks 2020 Professional Version and based on the relevant supplier confirmation, it is classified as EAR 99 item. As such, this software does not fall into the controlled software specified in the relevant FDP rule in section 734.9(e)(1) of the EAR. Regarding the GCC software, it is an open-source software freely downloadable from public source; in addition, it does not contain encryption source code. According to section 734.3(b)(3) of the EAR, software that has been made available to the public without restrictions on further dissemination are not subject to the EAR unless it is an encryption software classified under ECCN 5D002. Since the GCC software contains no built-in cryptographic routines that would trigger ECCN 5D002, it is treated as publicly available, non controlled software not subject to the EAR. With respect to the MCUs sourced from the international manufacturer, according to the relevant supplier confirmation, the ECCN number for such MCUs is 3A991.a. Under the EAR, items with ECCN 3A991.a classification are subject to anti-terrorism controls pursuant to Supplement No.1 to Part 774 of the EAR, with licensing requirements applicable to destination countries listed in AT Column 1 of Supplement No.1 to part 738 of the EAR. As China is not listed in AT Column 1, exports of these MCUs to China where our Company is located are not subject to the licensing requirements under the anti-terrorism controls. Finally, in respect of the other U.S. items specified above which were used during our blueprint design process, since the relevant supplier certified the classification of these items as EAR99, they do not fall into the scope of controlled items specified in the relevant FDP rule in section 734.9(e)(1) of the EAR either. Based on the above, our International Sanctions Legal Advisor concluded that although the Dassault Systèmes' software, the MCUs sourced from the international manufacturer and other U.S. items we used during our blueprint design process are subject to EAR, the use of such software and items does not trigger the relevant FDP rule applicable to Covered Entity customers with Footnote 1 designation to which we supplied products.

The Entity List restrictions do not apply to procurement. Therefore, our purchase of items from the three suppliers who are on the Entity List during the Track Record Period did not give rise to export control implications.

Based on the above key facts, relevant factors and analysis, our International Sanctions Legal Advisor advised us that our sales of the Assembled Products and On-Sold Products to the Covered Entity customers and our use of the relevant U.S.-origin software and items for the blueprint design process during the Track Record Period are not subject to material U.S. export control risks, and our provisions of services and sales of products to Covered Entity customers did not implicate actual or potential violation of the EAR during the Track Record Period and up to the Latest Practicable Date. Subject to our ongoing compliance with the export controls compliance measures as detailed below, our International Sanctions Legal Advisor is of the view that the U.S. export control restrictions have not had, and are not expected to have, a material adverse impact on our Group's business operations or financial performance.

Export controls compliance measures

We have adopted internal control measures on customers to mitigate risks in light of the applicable export controls laws and regulations. We have implemented a know-your-customer process to assess the background of our customers. Apart from that, we have introduced protective contractual provisions requiring customers to provide compliance representations or alternatively have notified customers reiterating our commitment to complying with all applicable export controls laws and the prohibition on any unauthorized use, resale or transfer of our products for military use, government intelligence, and massive surveillance. In addition, we also keep abreast of the latest development in applicable export control laws and regulations to ensure continued adherence to the latest legal and regulatory requirements. To facilitate implementation of these internal control measures, we are in the process of establishing a compliance committee comprising three members, including an executive Director and two other members of our senior management.

Based on the above, our Directors are of the view, and the Joint Sponsors (based on independent due diligence works conducted) concur that, subject to our ongoing compliance with the export controls compliance measures, the impact of the current U.S. export controls laws and regulations on our business is generally limited and manageable. Hence, the U.S. export control restrictions do not have material adverse impact on our Group's business operations or financial performance. For details of the U.S. export control laws and regulations, please refer to "Regulatory Overview – U.S. Export Control Laws and Regulations."

Impact of the Final Rule

The Final Rule, which took effect on January 2, 2025, imposes investment prohibition and notification requirements on U.S. Persons for a wide range of investments in entities associated with China (including Hong Kong and Macau) that are engaged in activities relating to three sectors: (i) semiconductor and microelectronics, (ii) quantum information technologies, and (iii) AI systems. For details of the Final Rule, please see "Regulatory Overview – Final Rule by the U.S. Department of the Treasury".

According to the Final Rule:

(a) we are "a person of a country of concern" under the Final Rule as we are a joint stock company established in the PRC;

(b) the term "AI system" under the Final Rule means (a) a machine-based system that can, for a given set of human-defined objectives, make predictions, recommendations, or decisions influencing real or virtual environments—i.e., a system that (1) uses data inputs to perceive real and virtual environments; (2) abstracts such perceptions into models through automated or algorithmic statistical analysis; and (3) uses model inference to make a classification, prediction, recommendation, or decision; or (b) a data system, software, hardware, application, tool, or utility that operates in whole or in part using a system described in (a) above. Our robot system's positioning and perception functions use deep learning-based methods to improve performance in some operating tasks. Our standard robots are powered by our proprietary algorithms and our embodied robots utilize artificial general intelligence to perform complex tasks in various industrial scenarios. Thus, the systems adopted by these robotic products fall within the broad definition of "AI system" under the Final Rule.

(c) Under the Final Rule, notifiable transactions include developing any AI system that is intended by the "covered foreign person" to be used for the control of robotic system. As we engage in activities involving developing certain AI systems for the control of robotic systems (which is an activity described in the definition of "notifiable transaction"), we are likely to be deemed a "covered foreign person" under the Final Rule and certain of our business activities are considered "covered activities" as defined under the Final Rule. As a result, investments by U.S. Persons in us likely constitute "notifiable transactions" of the Final Rule.

Nevertheless, investments by persons other than U.S. Persons as defined under the Final Rule are not subject to the Final Rule. In addition, the Final Rule provides an exception to "notifiable transactions" permitting U.S. Persons to invest in our publicly traded securities, provided that (i) the investment does not grant the U.S. Person rights beyond standard minority shareholder protections with respect to the covered foreign person, and (ii) our shares are officially available for public trading following an **[REDACTED]** on a securities exchange in any jurisdiction, including non-U.S. exchanges such as the Stock Exchange. See "Regulatory Overview — Final Rule by the U.S. Department of the Treasury" for further details on the requirements of the publicly traded securities exemption.

Based on the above, our Directors are of the view that the impact of the Final Rule on our Group is generally limited and manageable. Nonetheless, the Final Rule may increase the compliance burden on U.S. investors if any of them intend to purchase our H Shares prior to the **[REDACTED]** or in connection with the **[REDACTED]**, or if future U.S. investors intend to make other types of "covered transactions".

For details, please refer to "Risk Factors – Risks Relating to Our Business and Industry – The U.S. government's new China-focused Outbound Investment Program may adversely affect our business, financial condition, and results of operations", because they may need to make their own determination on whether they are permitted to invest in us, whether the transaction qualifies for the relevant exemption and whether they may have any notification obligations under the Final Rule.

Impact of Other Trade Policies

The U.S. government has, in recent years, imposed some trade policies or actions relating to tariffs and investigations in the semiconductor industry. For example, the trade and tariff tension between the U.S. and China intensified since early 2025 and negotiations on tariffs between the two

countries are still ongoing, creating uncertainties on trades and exports between the U.S. and China. We do not maintain material export sales to the U.S. market and we do not have presence and operations in the U.S. During the Track Record Period, we derived less than 1% of revenue from products sold to the United States in 2024 and less than 3% in 2025 and for the four months ended April 30, and nil revenue from products sold to the United States in 2023. We have not experienced any cancellation of orders since early 2025 as a result of the increase in U.S. tariffs. Notwithstanding the ongoing trade tensions between China and the United States, our revenue and sales volume both increased during the Track Record Period. Our revenue increased from RMB162.2 million in 2023 to RMB250.5 million in 2024, and continued to increase to RMB301.5 million in 2025. Correspondingly, our sales volume of robots increased from 1,212 units in 2023 to 1,932 units in 2024, and continued to increase to 2,284 units in 2025. The continuous improvement in our financial and operating metrics with respect to revenue and sales volume has demonstrated that our Group has not experienced any immediate financial or operational impact arising from the increased U.S. tariffs.

Nevertheless, we remain cognizant of the broader implications of U.S. tariff policies on global trade dynamics. In particular, the imposition of tariffs on certain goods has led to a reallocation of export flows, with some suppliers diverting shipments originally intended for the U.S. to alternative markets, including those in Asia and Europe. This shift may increase the level of supply in certain non-U.S. markets to which we sell our products. This in turn may potentially exert downward pressure on the pricing and margins of our products.

We plan to monitor the potential secondary effects on our supply chain, including changes in sourcing costs, lead times, and supplier behaviour, which may arise from broader trade tensions and tariff-related adjustments. While these impacts have not materially affected our operations to date, we remain vigilant and responsive to evolving market conditions.

Based on the above facts and analysis, our Directors are of the view, and the Joint Sponsors (based on independent due diligence works conducted) concur, that the U.S. export control laws, the U.S. outbound investment policies, and the U.S. tariffs would not have any material adverse impact on our business operations or financial performance.

LEGAL PROCEEDINGS AND COMPLIANCE

Legal Proceedings

We may from time to time become a party to various legal, arbitral or administrative proceedings arising in the ordinary course of our business. During the Track Record Period and up to the Latest Practicable Date, we had not been a party to, and were not aware of any threat of, any material legal, arbitral or administrative proceedings, against us or our Directors that could, individually or in the aggregate, have a material adverse effect on business, financial condition and results of operations.

Compliance

We are subject to various regulatory requirements and guidelines issued by regulatory authorities. During the Track Record Period and up to the Latest Practicable Date, we had not been and were not involved in any material non-compliance incidents that have led to fines, enforcement actions or other penalties that could, individually or in the aggregate, have a material adverse effect on business, financial condition and results of operations.

During the Track Record Period and up to the Latest Practicable Date, we engaged third-party human resources agencies to pay social insurance premiums and housing provident funds for several employees per their request, and we did not make full social insurance and housing provident fund contribution for certain employees in strict compliance with relevant laws and regulations. We estimate that the shortfall amount that we may be required to contribute to social insurance and housing provident fund for these employees would be approximately RMB7.5 million, RMB9.5 million, RMB11.3 million and RMB5.3 million in 2023, 2024, 2025 and the four months ended April 30, 2026, respectively. Our PRC Legal Advisor is of the view, that the risk of the competent authorities requiring us to pay shortfalls with respect to the social insurance and housing funds and/or take the initiative to impose penalties on us is remote, given that: (i) during the Track Record Period and up to the Latest Practical Date, no material administrative action, fine or penalty had been imposed by the relevant regulatory authorities on the Group with respect to the such shortfalls, (ii) our Company and our relevant subsidiary have completed interviews with relevant competent authorities, in which, the relevant competent authorities have confirmed that, they will not proactively impose penalties or require the recovery or supplementation of historical underpayments or non-payments of social insurance contributions or housing provident fund contributions by companies; (iii) during the Track Record Period and up to the Latest Practical Date, the Group had not subject to material labour disputes; and (iv) the Company has promised that, in the event that relevant competent authorities order the Group to pay or make up for any unpaid social insurance premiums and housing provident fund contributions within a specified time limit, the relevant companies will complete the payment within the specified time limit. Based on our PRC Legal Advisor's view above, we did not make any provision for the shortfall in our social insurance and housing provident fund contributions during the Track Record Period and up to the Latest Practicable Date.

Pursuant to the Interpretation II of the Supreme People's Court of Issues Concerning the Application of Law in the Trial of Labor Dispute Cases (《最高人民法院關於審理勞動爭議案件適用法律問題的解釋(二)》), any agreement between an employer and an employee for the non-payment of social insurance or any employee undertaking to waive such payment shall be determined as void by the people's court. Considering (i) no employee has brought a lawsuit or arbitration in respect of payment of social insurance; and (ii) we have provided an indemnification undertaking for any unpaid social insurance premiums and housing provident fund contributions, our Directors believe that the implementation of the aforementioned judicial interpretation would not have a material adverse effect on our business or financial results. Our PRC Legal Advisor is of the view that (i) the aforementioned judicial interpretation does not expand our penalty exposure; (ii) the aforementioned judicial interpretation does not repeal the PRC social insurance laws and regulations currently in force; and (iii) no employee has brought any lawsuit or arbitration in respect of payment of social insurance and none of our pending litigation or arbitration is applicable to the aforementioned judicial interpretations. For more information, please refer to "Risk Factor — we may be subject to fines and penalties as a result of non-compliance with certain PRC laws and regulations regarding social insurance and the housing provident fund during the Track Record Period." Subject to the policy restrictions and adjustments of the relevant competent authorities, we plan to rectify such non-compliance and make full and timely contributions to social insurance and housing provident funds by the end of 2026.

We lease our office and manufacturing facilities, and our leasehold interests may be adversely affected by defects in the leased properties. For more information, please refer to "Risk Factor — Our leased property interests may be defective, and our right to lease the properties could be challenged due to such defects. Additionally, failure to renew our current lease or locate desirable alternatives could materially and adversely affect our business." Due to historical reasons, we are unable to confirm the legal validity of the ownership and use rights of the relevant properties, nor complete the property lease registration procedures — an issue that cannot be rectified by us. Nevertheless, we believe that the continued use of these leased properties will not result in material disputes, third-party claims, or administrative penalties. Furthermore, we are of the view that, if required, the Group would be able to

readily secure comparable alternative properties, and any associated relocation costs and expenses would not be material. At present, there are no plans to change the current locations of our office and manufacturing facilities.

AWARDS AND RECOGNITIONS

During the Track Record Period and up to the Latest Practicable Date, we received numerous recognitions for our technologies as well as our solutions. Some of the significant awards and recognition we received are set forth below.

Award Year	Award/Recognition	Awarding Institution/Authority
2024.	Guangdong Province Manufacturing Single Champion Enterprise (廣東省製造業單項冠軍企業)	Guangdong Provincial Department of Industry and Information Technology of the People's Republic of China
2024.	"Gaogong Golden Ball Award" Annual Overseas Enterprise ("高工金球獎"年度出海企業)	Gaogong Robotics
2024.	Global Gazelle Companies List (2024胡潤全球獵豹企業榜)	Hurun Report
2023.	National Specialized and New "Little Giant" Enterprise (國家級專精特新「小巨人」企業)	MIIT
2023.	2023 China Automation Society Technology Invention Award First Prize (2023中國自動化學會技術發明獎一等獎)	China Association of Automation
2023.	Leading Enterprise Award in the Robotics Industry (機器人產業領軍企業獎)	Shenzhen Robotics Association
2023.	Guangdong Province Intelligent Manufacturing Ecosystem Partner (廣東省智能製造生態合作夥伴)	Guangdong Provincial Department of Industry and Information Technology of the People's Republic of China

You should read the following discussion and analysis in conjunction with our consolidated financial statements, included in the Accountants" Report in Appendix I, together with the respective accompanying notes. Our consolidated financial information has been prepared in accordance with HKFRSs.

The following discussion and analysis contain forward-looking statements that reflect our current views with respect to future events and financial performance. These statements are based on our assumptions and analysis in light of our experience and perception of historical trends, current conditions and expected future developments, as well as other factors we believe are appropriate under the circumstances. However, our actual results may differ significantly from those projected in the forward-looking statements. Factors that might cause future results to differ significantly from those projected in the forward-looking statements include, but are not limited to, those discussed in "Risk Factors" and "Forward-Looking Statements" and elsewhere in this document.

OVERVIEW

We are a leader in industrial intelligent mobile robotic solutions, dedicated to empowering smart factories across a wide range of industrial scenarios. We are also an early mover in industrial embodied intelligence robotic solutions. Our tailored one-stop robotic solutions comprise our core robotic technology platform, our industrial intelligent multi-functional robotic products and our one-stop intelligent collaborative system, the RoboVerse system. We were the fourth largest provider of the industrial intelligent mobile robotic solutions in China by sales volume in 2025, with a market share of 4.0%, according to CIC. As of the Latest Practicable Date, our solutions had been recognized and adopted by over 400 customers worldwide, many of which are leaders in their respective sectors.

According to CIC, we are one of the few enterprises in the industry with self-developed full-stack technologies. We started as an early innovator of industrial intelligent robotic systems engineering and a proprietary robotic operating system in China. We were among the first companies to launch SLAM technology, according to CIC. Our leadership in localization, navigation, control, and perception and manipulation technologies equip our robots with intelligence, efficiency, and reliability and safety. Powered by world modeling and multi-robot coordination technologies, our robots possess collaborative intelligence. We were among the first in China to have achieved world modeling and collaborative intelligence in industrial robotic systems, according to CIC.

BASIS OF PRESENTATION

The historical financial information has been prepared in accordance with Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards and Interpretations (together, "**HKFRS**"), issued by the Hong Kong Institute of Certified Public Accountants ("**HKICPA**") and the disclosure requirements of the Hong Kong Companies Ordinance. All HKFRS Accounting Standards effective for the accounting period commencing from January 1, 2025, together with the relevant transitional provisions, have been early adopted by us in the preparation of the historical financial information throughout each of the years ended December 31, 2023, 2024 and 2025 and the four months ended April 30, 2026.

The historical financial information has been prepared under the historical cost convention except for certain financial instruments which have been measured at fair value. For ordinary shares issued to pre-**[REDACTED]** investors, pursuant to the supplemental agreements entered into between the Company and the pre-**[REDACTED]** Investors in relation to the termination of certain of special rights

granted by the Company, including redemption rights, liquidation preferences and anti-dilution rights, which are *void ab initio* as described in note 31 to the Accountants' Report, having taking into account the legal and regulatory framework of the Company's jurisdiction and the governing law of the supplementary agreements, our Directors considered that it is appropriate to present the pre-**[REDACTED]** Investments as equity throughout the Track Record Periods. For details of the financial impacts, see note 31 to the Accountants' Report.

MAJOR FACTORS AFFECTING OUR RESULTS OF OPERATIONS

We believe that the most significant factors affecting our results of operations and financial condition include the following:

Development of the global industrial intelligent robotics sector and the growth of the underlying industries of our customers

We operate in the rapidly growing industrial intelligent robotics market. Our business, financial performance, results of operations and future growth are affected by the development of the global industrial intelligent robotics sector and the growth of the industries in which our customers operate. Factors such as increasing smart manufacturing system upgrades demand, maturing supply chain and industrial ecosystem and strengthened policy support are driving demand and incentivizing the utilization of robots. As a provider of industrial robotic solution, our performance is closely tied to the industry trends. Slower-than-expected industry expansion, delays in customers' automation investments, or the emergence of alternative technologies could adversely affect demand for our robotic solutions. Conversely, accelerated adoption of robotic solutions in industrial settings may present growth opportunities, provided that we maintain our competitive positioning.

During the Track Record Period, our revenue was primarily generated from providing robotic solutions to enterprise customers in the 3C, automotive and semiconductor industries. Our results of operations are highly dependent on the development and performance of these underlying industries of our customers, which are subject to a wide range of factors such as fluctuations in capital expenditures, regulatory changes, supply chain efficiencies and macroeconomic conditions. Our strategies include deepening our expertise in industrial intelligent robotic solutions across a wide range of industry scenarios, where we identify specific industry challenges and tailor our robotic solutions to meet these unique needs. Our ability to adapt to sector-specific trends and expansion into new high-growth market or successful adaptation to emerging use cases will be critical to sustaining long-term growth.

Our ability to maintain technology leadership and product development

Our robotic solutions are subject to rapidly evolving technological advancements and customer demands. To maintain our leading position in the global industrial intelligent robotics market and achieve sustainable growth, it is imperative that we continuously enhance our robotic solutions to adapt to these changes in a timely and effective manner. Consequently, our ability to efficiently develop and launch advanced robot models, as well as improve our existing robotic solutions, is critical to our growth prospects. We have demonstrated a proven track record in this area, evidenced by the seamless integration of our intelligent robotic solutions into the complex manufacturing processes of high-tech industries. We aim to continue leveraging our existing strengths to fortify our technology leadership and product portfolio, thereby driving our growth.

Our R&D capabilities are the cornerstone of our ability to enhance and develop industrial intelligent robotic solutions. We have invested, and plan to continue investing, significant resources in our R&D efforts. During the Track Record Period, our R&D expenses were RMB56.1 million,

RMB36.6 million, RMB76.7 million, RMB13.5 million and RMB29.1 million in 2023, 2024, 2025 and four months ended April 30, 2025 and 2026, respectively. Given the R&D-intensive nature of the robotics industry, it requires substantial investments in developing proprietary core technologies, product development and upgrades and R&D talent to build competitiveness. We remain committed to investing in areas such as robotic systems engineering capabilities, SLAM technology, product upgrades and technology iterations, as well as talent acquisition and retention. Additionally, while we strive for efficiency in our R&D efforts, it is important to acknowledge that similar initiatives in the robotic solution industry are often associated with uncertainties in both process and outcome. We may experience fluctuations in R&D expenses, and the results and returns on such investments may be unpredictable.

Customer acquisition and commercialization capabilities

Our ability to reinforce relationship with existing customers and acquire new customers to broaden our customer base across both domestic and international markets, as well as effectively commercializing our robotic solutions, is crucial to our results of operations and continued growth.

We strategically focus on high-tech sectors such as 3C, automotive and semiconductor. These industries are characterized by complex processes, high precision requirements and rapid technological advancements, and demand intelligent robotic system that can operate autonomously and collaboratively in complex manufacturing scenarios. By aligning closely with the evolving needs of our existing customers, we have cultivated long-standing partnerships with key customers, driving significant business through repeat orders and large-scale deployments. We are dedicated to cultivating deeper relationships with existing customers through multiple expansion pathways, including the increasing deployment of robotic solutions in their production facilities and the upgrades of their legacy robotic solutions. In addition, the successful onboarding of new customers, particularly in emerging sectors and underserved geographic markets, serves as a critical growth driver that demonstrates the broadening applicability of our industrial intelligent robotic solutions.

In domestic markets, we benefit from established customer relationships, localized service networks, and a deep understanding of regional industry needs. Meanwhile, overseas markets present substantial growth potential, driven by rising automation adoption in emerging economies, global supply chain reconfiguration, and increasing labor costs worldwide. Our commercialization capabilities are essential for penetrating both domestic and international markets further. Rapidly deployable robotic solutions to meet varying industry demand, competitive products with measurable impact on customers' operation, critical technological breakthroughs, and well-managed commercialization costs are critical to successfully commercializing our products and solutions.

Competition and pricing

We operate in an increasingly competitive industrial intelligent robotic solution market. We face competition with international and domestic players with diverse capabilities, some of which may have longer operating history, greater business scale and resources, higher market recognition and more effective pricing strategies than us. We believe factors including strong R&D capabilities, in-depth understanding of application scenarios, ability to digitalize manufacturing settings and process and tailor robotic solutions are critical to our competitiveness in this market. We believe we have enjoyed certain competitive advantages as a result of our strong R&D capabilities, and will continue our development strategies to increase our competitiveness.

Our pricing strategy directly affects our revenue generation, gross margins and overall profitability. Our pricing approach is designed to reflect the technological sophistication and value proposition of our industrial intelligent robotic solutions while remaining competitive in both domestic and overseas markets. We employ a combination of value-based and cost-plus pricing model that considers factors such as product development, production and customization costs, after-sales service commitments, technological level involved, product competitiveness, market price and other market conditions. This strategy enables us to maintain healthy margins while ensuring our solutions remain economically attractive to customers across different industries and regions. However, our financial results could be adversely affected if we are unable to maintain appropriate pricing levels due to increased competition, market saturation, or customer price sensitivity. Conversely, our ability to implement premium pricing for technologically advanced robotic solutions may enhance our revenue quality and profitability. The effectiveness of our pricing strategy will remain a critical determinant of our future financial performance.

Our ability to manage our costs and achieve operational efficiency

Our ability to achieve profitability and sustainable growth depends in part on our management of cost of sales. In 2023, 2024, 2025 and four months ended April 30, 2025 and 2026, our cost of sales was RMB111.0 million, RMB153.4 million, RMB179.3 million, RMB24.8 million and RMB59.4 million, respectively, accounting for 68.4%, 61.2%, 59.5%, 55.3% and 55.5% of our revenue for the same periods, respectively. Our cost of sales primarily consists of cost of raw materials, production and deployment expenses, logistics expenses and inventory write-down. Changes in any major component of our cost of sales and our overall cost structure could have an impact on our gross profit and gross profit margin. For instance, our cost of raw materials accounted for 63.3%, 70.5%, 76.9%, 64.4% and 76.7% of our total cost of sales in 2023, 2024, 2025 and the four months ended April 30, 2025 and 2026, respectively. The procurement costs for such raw materials may fluctuate due to a number of factors beyond our control, such as supply chain disruptions and inflation, and we are susceptible to significant changes in the availability, price and standard of key raw materials. We have implemented cost management measures against such potential disruptions to our supply chain. In addition, our cost of sales and gross margin may, from time to time, be affected by the write-down of obsolete or slow-moving inventories.

Our business and results of operations are also significantly affected by our operating expenses, which primarily comprised selling and marketing expenses, administrative expenses and R&D expenses during the Track Record Period. Our operating expenses ratio, defined as total operating expenses (consisting of selling and marketing expenses, administrative expenses and R&D expenses) divided by total revenue, was 85.7%, 49.8%, 101.4%, 148.2% and 93.1% in 2023, 2024, 2025 and the four months ended April 30, 2025 and 2026, respectively. Our R&D, selling and marketing and administrative expenses may continue to increase as our business scale and together account for a significant portion of our revenue. For details of our measures to improve management of costs and expenses, see "Business — Path to Profitability."

In addition, our results of operations and financial position have been and are expected to be affected by the following general factors:

- **Chinese mainland's and global macroeconomic conditions:** The majority of our revenue was derived from Chinese mainland and we have expanded into overseas markets with increasing revenue amount and contribution during the Track Record Period. Chinese mainland's and global economic development and other economic factors would have a direct impact on our businesses, including the demand for our robotic solutions, the supply and prices of our requisite raw material, and our other costs. In addition, the PRC government has from time to time adjusted its monetary, financial and industry policies. Such adjustment in or implementation of economic policies and measures would also directly or indirectly affect our results of operations and financial condition.

- **Government policies supporting the robotics industry:** According to CIC, governments around the world are implementing policies to support the intelligent robotic solution industry, offering policy assurance and resource backing to advance R&D, manufacturing, and industrial

applications. For instance, the PRC government in recent years has been implementing a number of preferential policies and development plans to encourage the development of the robot industry, such as the 14th Five Year Plan for the Development of the Robot Industry and the Implementation Plan for "Robot+" Application Action. During the Track Record Period, we also received several government grants in connection with, among others, our R&D efforts, business achievements and our production facilities, which in turn facilitated our business expansion. However, to the extent that any such favorable government policies were discontinued or reduced in the future, the industrial intelligent robotics industry may be affected, which may also affect our financial performance and growth prospects.

MATERIAL ACCOUNTING POLICIEIS AND ESTIMATES

Note 2.3 to "Appendix I — Accountants' Report" to this document sets forth certain material accounting policy information, which are important for understanding our financial conditions and results of operations.

Some of our accounting policies require us to apply estimates and assumptions as well as complex judgments relating to accounting items. The estimates and assumptions we use and the judgments we make in applying our accounting policies have a significant impact on our financial position and results of operations. Our management continually evaluates such estimates, assumptions, and judgments based on past experiences and other factors, including industry practices and expectations of future events that are believed to be reasonable under the circumstances. There has not been any material deviation between our management's estimates or assumptions and actual results, and we have not made any material changes to these estimates or assumptions during the Track Record Period. We do not expect any material changes in these estimates and assumptions in the foreseeable future. See note 3 to "Appendix I — Accountants' Report."

CONSOLIDATED STATEMENTS OF PROFIT OR LOSS AND COMPREHENSIVE INCOME

The following table sets forth a summary of our consolidated statements of profit or loss for the periods indicated:

	Year ended December 31,			Four months ended April 30,	
	2023	2024	2025	2025	2026
	(RMB in thousands)				
				(unaudited)	
Revenue	162,166	250,522	301,493	44,747	106,940
Cost of sales	(110,997)	(153,364)	(179,250)	(24,751)	(59,384)
Gross profit	**51,169**	**97,158**	**122,243**	**19,996**	**47,556**
Other income and gains	7,080	7,920	3,324	751	2,819
Selling and marketing expenses	(57,358)	(64,595)	(114,203)	(20,217)	(41,985)
Administrative expenses	(25,466)	(23,575)	(114,695)	(32,551)	(28,496)
R&D expenses	(56,098)	(36,611)	(76,729)	(13,527)	(29,129)
Impairment losses on financial assets and contract assets	(14,709)	(22,853)	(18,371)	(10,112)	(10,408)
Other expenses	(2,634)	(1,208)	(2,506)	(5)	(2,089)
Finance costs	(2,332)	(1,380)	(1,084)	(421)	(103)
Loss before tax	**(100,348)**	**(45,144)**	**(202,021)**	**(56,086)**	**(61,835)**
Income tax expense	—	—	—	—	—
Loss for the year/period	**(100,348)**	**(45,144)**	**(202,021)**	**(56,086)**	**(61,835)**
Attributable to owners of the parent	**(100,348)**	**(45,144)**	**(202,021)**	**(56,086)**	**(61,835)**

NON-HKFRS FINANCIAL MEASURE

To supplement our consolidated financial statements, which are presented in accordance with HKFRSs, we also use adjusted net loss (non-HKFRS measure) as additional financial measure, which is not required by, or presented in accordance with HKFRSs. We believe this non-HKFRS measure facilitates comparisons of operating performance from year to year and company to company by eliminating potential impacts of certain items. We believe this measure provides useful information to investors and others in understanding and evaluating our combined results of operations in the same manner as they help our management. However, such non-HKFRS financial measure we presented may not be directly comparable to similar measures presented by other companies. The use of this non-HKFRS measure should not be considered as substitute for analysis of, our results of operations or financial condition as reported under HKFRSs.

We define adjusted net loss (non-HKFRS measure) as loss for the year/period adjusted by adding back equity-settled share-based payment expenses and **[REDACTED]** expenses. The following table reconciles our adjusted net loss (non-HKFRS measure) for the years/periods to loss for the years/periods, which is presented in accordance with HKFRSs.

	Year ended December 31,			Four months ended April 30,	
	2023	2024	2025	2025	2026
	(RMB in thousands, except for percentage)				
				(unaudited)	
Loss for the year/period	(100,348)	(45,144)	(202,021)	(56,086)	(61,835)
Add:					
— Equity-settled share-based payment expenses[(1)]	5,417	5,806	146,910	28,942	35,905
— **[REDACTED]** expenses	—	—	20,155	—	2,085
Adjusted net loss *(non-HKFRS measure)*	**(94,931)**	**(39,338)**	**(34,956)**	**(27,144)**	**(23,845)**
Adjusted net loss margin (non-HKFRS measure)	**(58.5)%**	**(15.7)%**	**(11.6)%**	**(60.7)%**	**(22.3)%**

Note:

(1) Equity-settled share-based payment expenses are non-cash in nature and represent the arrangement under which we receive services from employees as consideration for our equity instruments. Equity-settled share-based payment expenses are not expected to result in future cash payments.

DESCRIPTION OF MAJOR COMPONENTS OF OUR RESULTS OF OPERATIONS

Revenue

Revenue by Product Type

The following table sets forth our revenue breakdown by product type in absolute amount and as a percentage of our total revenue for the periods indicated:

	Year ended December 31,						Four months ended April 30,			
	2023		2024		2025		2025		2026	
	Amount	%	Amount	%	Amount	%	Amount	%	Amount	%
	(RMB in thousands, except for percentage)									
							(unaudited)			
Robotic solutions[(1)]										
Standard Robots Solutions	18,521	11.4	20,249	8.1	26,718	8.9	3,177	7.1	8,142	7.6
Functional Robots Solutions	114,399	70.5	200,659	80.1	199,177	66.1	21,788	48.6	28,744	27.0
Embodied Robots Solutions	9,062	5.6	7,179	2.9	28,736	9.5	8,620	19.3	3,900	3.6
Subtotal	141,982	87.5	228,087	91.0	254,631	84.5	33,585	75.0	40,786	38.2
Robots and others										
Standard Robots	1,149	0.7	796	0.3	6,308	2.1	1,769	4.0	151	0.1
Functional Robots	16,461	10.2	17,754	7.1	28,594	9.5	7,372	16.5	58,967	55.1
Embodied Robots	—	—	—	—	610	0.2	—	—	2,548	2.4
Others[(2)]	2,574	1.6	3,886	1.6	11,350	3.7	2,021	4.5	4,488	4.2
Subtotal	20,184	12.5	22,435	9.0	46,862	15.5	11,162	25.0	66,154	61.8
Total	**162,166**	**100.0**	**250,522**	**100.0**	**301,493**	**100.0**	**44,747**	**100.0**	**106,940**	**100.0**

Notes:

(1) Robotic solutions are categorized based on the primary type of robot used in a contract. The entire contract amount will be classified as the type of robot that holds a simple majority in that contract.

(2) Include the revenue derived from the sales of related accessories, software and services, including the RoboVerse system software, technical support services and other parts, components and accessories which are required or essential for the functioning and/or enhancing the performance of our robots and robotic solutions.

Revenue by Geographic Location

In terms of geographical location, we generate a majority of our revenue from Chinese mainland and have been gradually expanding our overseas presence during the Track Record Period. The following table sets out a breakdown of our revenue by geographical location, in an absolute amount and as a percentage of our total revenue, for the periods indicated. Export sales requiring customs declaration are categorized under "Others".

	Year ended December 31,						Four months ended April 30,			
	2023		2024		2025		2025		2026	
	Amount	%	Amount	%	Amount	%	Amount	%	Amount	%
	(RMB in thousands, except for percentage)									
							(unaudited)			
Chinese mainland[(1)]	141,883	87.5	190,123	75.9	225,239	74.7	36,570	81.7	34,338	32.1
Overseas										
Hong Kong	613	0.5	31,289	12.3	25,708	8.6	—	—	34,376	32.2
Japan	14,897	9.2	12,426	5.0	12,005	4.0	3,582	7.9	19,317	18.1
Others[(2)]	4,773	2.8	16,684	6.8	38,541	12.7	4,595	10.4	18,909	17.6
Subtotal	**20,283**	**12.5**	**60,399**	**24.1**	**76,254**	**25.3**	**8,177**	**18.3**	**72,602**	**67.9**
Total	**162,166**	**100.0**	**250,522**	**100.0**	**301,493**	**100.0**	**44,747**	**100.0**	**106,940**	**100.0**

Notes:

(1) Includes domestic sales subject to standard Chinese VAT invoicing and local delivery processes.

(2) Primarily consists of other Asia countries and regions such as Taiwan China, Vietnam and Thailand. In addition, sales to bonded warehouse and free trade zone of the PRC are also included in sales to other countries and regions as these transactions (i) require customs clearance procedures (similar to cross-border exports); and (ii) are exempt from PRC VAT invoicing, aligning them operationally with overseas sales, notwithstanding the relevant customers may still based within the geographical regions of the PRC. During the Track Record Period, our sales to bonded warehouse and free trade zone was RMB2.1 million, RMB3.0 million, RMB1.6 million, RMB0.1 million and RMB2.2 million in 2023, 2024, 2025 and the four months ended April 30, 2025 and 2026, respectively.

Revenue by Served Industry

The following table sets out a breakdown of our revenue by served industry, in an absolute amount and as a percentage of our total revenue, for the periods indicated.

	Year ended December 31,						Four months ended April 30,			
	2023		2024		2025		2025		2026	
	Amount	%	Amount	%	Amount	%	Amount	%	Amount	%
	(RMB in thousands, except for percentage)									
							(unaudited)			
3C	42,944	26.5	121,287	48.4	170,839	56.7	23,427	52.3	58,771	55.0
Automotive	29,616	18.3	53,134	21.2	28,133	9.3	2,676	6.0	12,570	11.8
Semiconductor	25,658	15.8	17,242	6.9	25,863	8.6	6,098	13.6	19,032	17.8
New energy	18,216	11.2	19,002	7.6	6,456	2.1	1,457	3.3	1,764	1.6
Biopharmaceutical	15,134	9.3	7,521	3.0	2,669	0.9	277	0.6	1,512	1.4
Others[(1)]	30,598	18.9	32,336	12.9	67,533	22.4	10,812	24.2	13,291	12.4
Total	**162,166**	**100.0**	**250,522**	**100.0**	**301,493**	**100.0**	**44,747**	**100.0**	**106,940**	**100.0**

Note:

(1) Primarily includes sales to integrators that are unable to categorize into specific industries, such as those covering multiple sectors or where we are unaware of the downstream customers' industries served by the integrators.

During the Track Record Period, our robotic solutions were primarily deployed in 3C manufacturing scenarios, representing our largest served industry and demonstrating significant growth momentum. The automotive and semiconductor sectors were our second and third largest served markets during the Track Record Period, respectively. We have also successfully expanded our customer base across other industries such as new energy and biopharmaceutical, which have meaningfully contributed to our customer diversification. The revenue contributions from each sector fluctuate as affected by various external factors such as the downstream industry trends, customers' factory expansion timelines and automation adoption rates. Notably, in 2025 (including the four months ended April 30, 2025), the revenue contribution from customers in the automotive sector was relatively low compared to other years/period during the Track Record Period, primarily due to the increased competitiveness in the automotive industry, coupled with the significant increased market demand and opportunities from the 3C industry in the same year, so that we devoted more resources in serving and developing customers in the 3C industry, which has impacted revenue growth in the automotive sector. Revenue contribution from customers in the new energy sector decreased period by period during the Track Record Period, primarily due to an overall industry trend and weakened market demand within the new energy sector. Revenue from customers in the biopharmaceutical sector decreased in 2024 and 2025, mainly because our customer base in this sector primarily consists of laboratory institutions, which typically place relatively small orders and have shown a low repeat purchasing orders in these periods.

Revenue by Customer Type

The following table sets out a breakdown of the revenue by customer type, in an absolute amount and as a percentage of our total revenue, for the periods indicated.

	Year ended December 31,						Four months ended April 30,			
	2023		2024		2025		2025		2026	
	Amount	%	Amount	%	Amount	%	Amount	%	Amount	%
	(RMB in thousands, except for percentage)									
							(unaudited)			
Manufacturers	61,442	37.9	93,394	37.3	175,517	58.2	22,103	49.4	33,072	30.9
System Integrators	100,724	62.1	157,128	62.7	125,976	41.8	22,644	50.6	73,868	69.1
Total	**162,166**	**100.0**	**250,522**	**100.0**	**301,493**	**100.0**	**44,747**	**100.0**	**106,940**	**100.0**

During the Track Record Period, we has experienced sustained growth across both major customer types: manufacturers and system integrators. Our business model and pricing strategy do not significantly differ between these two customer types. We aim to increase the proportion of higher-margin manufacturer projects, which helps enhance customer loyalty and generate repeat orders. In 2025, the revenue contribution by manufacturers was relatively large, primarily attributed to our efforts in building relationship directly with manufacturers and the expansion of our business scale, which provided us with more opportunities to engage and transact directly with manufacturers. In the four months ended April 30, 2026, the revenue contribution from system integrators increased to 69.1%, primarily due to increased demands and sizable orders from overseas markets.

Cost of Sales

Our cost of sales consists primarily of:

- **Raw materials:** Mainly include power batteries, motors, LiDAR, structural components, and other materials and components.
- **Production and deployment expenses:** Expenses and labor costs associated with the production and deployment of our robots.
- **Logistics expenses:** Expenses associated with shipping and delivering robotic solutions to customers, including freight charges and handling fees.
- **Write-down of inventories:** Write-down of inventories represents the costs of inventories exceeding the net realizable value.

The following table sets forth our cost of sales breakdown by nature in absolute amount and as a percentage of our total cost of sales for the periods indicated:

	Year ended December 31,						Four months ended April 30,			
	2023		2024		2025		2025		2026	
	Amount	%	Amount	%	Amount	%	Amount	%	Amount	%
	(RMB in thousands, except for percentage)									
							(unaudited)			
Raw materials	70,248	63.3	108,108	70.5	137,858	76.9	15,944	64.4	45,556	76.7
Production and deployment expenses	15,910	14.3	24,612	16.1	24,072	13.4	3,773	15.2	4,505	7.6
Logistics expenses	1,614	1.5	1,572	1.0	2,797	1.6	639	2.6	1,449	2.4

Total	**110,997**	**100.0**	**153,364**	**100.0**	**179,250**	**100.0**	**24,751**	**100.0**	**59,384**	**100.0**

The following table sets forth our cost of sales breakdown by product type in absolute amount and as a percentage of our total cost of sales for the periods indicated:

	Year ended December 31,						Four months ended April 30,			
	2023		2024		2025		2025		2026	
	Amount	%	Amount	%	Amount	%	Amount	%	Amount	%
	(RMB in thousands, except for percentage)									
							(unaudited)			
Robotic solutions	105,182	94.8	147,409	96.1	160,720	89.7	20,946	84.6	25,535	43.0
Robots and others[(1)]	5,815	5.2	5,955	3.9	18,530	10.3	3,805	15.4	33,849	57.0
Total	**110,997**	**100.0**	**153,364**	**100.0**	**179,250**	**100.0**	**24,751**	**100.0**	**59,384**	**100.0**

Note:

(1) Represents the cost of sales with respect to robots sold individually and related accessories, software and services, including the RoboVerse system software, technical support services and other parts, components and accessories which are required or essential for the functioning and/or enhancing the performance of our robots and robotic solutions.

Gross Profit and Gross Profit Margin

Our gross profit represents our revenue less our cost of sales, and our gross margin represents gross profit divided by our revenue, expressed as a percentage. The following table sets forth our gross profit and gross profit margin breakdown by product type:

	Year ended December 31,						Four months ended April 30,			
	2023		2024		2025		2025		2026	
	Gross Profit	Gross Profit Margin	Gross Profit	Gross Profit Margin	Gross Profit	Gross Profit Margin	Gross Profit	Gross Profit Margin	Gross Profit	Gross Profit Margin
	(RMB in thousands)	%	*(RMB in thousands)*	%	*(RMB in thousands)*	%	*(RMB in thousands)*	%	*(RMB in thousands)*	%
							(unaudited)			
Robotic solutions	36,800	25.9	80,678	35.4	93,911	36.9	12,638	37.6	15,251	37.4
Robots and others[(1)]	14,369	71.2	16,480	73.5	28,332	60.5	7,358	65.9	32,305	48.8
Total	**51,169**	**31.6**	**97,158**	**38.8**	**122,243**	**40.5**	**19,996**	**44.7**	**47,556**	**44.5**

Note:

(1) Represent the gross profit derived from the sales of robots sold individually and related accessories, software and services, including the RoboVerse system software, technical support services and other parts, components and accessories which are required or essential for the functioning and/or enhancing the performance of our robots and robotic solutions.

During the Track Record Period, our overall gross profit margin was primarily affected by the gross profit margin of robotic solutions, as it consistently represented a large majority of our total gross profit. During the Track Record Period, the gross profit margin for the sales of robots and other related products was typically much higher than that for our robotic solutions, primarily due to (i) differentiated pricing strategies for robotic solutions and sales of robots and related products: we typically provide more favorable pricing to our customers for robotic solutions, as a robotic solution typically involves large volume of robots, and also for the purpose of encouraging repeat purchases; and (ii) differences in delivery costs: robotic solutions typically incur higher delivery costs due to factors such as solutions planning, customized design, deployment and commissioning.

The gross profit margin for the sales of robotic solutions increased from 25.9% in 2023 to 35.4% in 2024, and continued to increase to 36.9% in 2025, primarily due to (i) an increased sales of overseas projects, which typically carry higher margins; (ii) our continuous product upgrades with reduced overall product costs, exemplified by approximately 40% reduction in the total bills of materials when comparing the 2024 version of Oasis 300E to its predecessor, the Oasis 300C in 2023; (iii) an increase in the proportion of our new Series E robots within the total number of robots in our robotic solutions sales, which rose from 41.7% in 2023 to 66.4% in 2024 and further increased to 76.5% in 2025; and (iv) improvement in our delivery efficiencies. The gross profit margin for the sales of robotic solutions remained broadly stable at 37.6% in the four months ended April 30, 2025 and 37.4% in the same period of 2026. The gross profit margin for the sales of robots and others decreased from 73.5% in 2024 to 60.5% in 2025, and further decreased from 65.9% in the four months ended April 30, 2025 to 48.8% in the same period of 2026, mainly because we offered more competitive pricing to support growth as order volumes increased.

The following table sets forth our gross profit and gross profit margin breakdown by geographical location in an order:

	Year ended December 31,						Four months ended April 30,			
	2023		2024		2025		2025		2026	
	Gross Profit	Gross Profit Margin	Gross Profit	Gross Profit Margin	Gross Profit	Gross Profit Margin	Gross Profit	Gross Profit Margin	Gross Profit	Gross Profit Margin
	(RMB in thousands, except for percentage)									
							(unaudited)			
Chinese mainland[(1)]	37,642	26.5	59,307	31.2	82,680	36.7	14,978	41.0	13,213	38.5
Others[(2)]	13,527	66.7	37,851	62.7	39,563	51.9	5,018	61.4	34,343	47.3
Total	**51,169**	**31.6**	**97,158**	**38.8**	**122,243**	**40.5**	**19,996**	**44.7**	**47,556**	**44.5**

Notes:

(1) Includes domestic sales subject to standard Chinese VAT invoicing and local delivery processes.

(2) Primarily consists of (i) Japan, (ii) Taiwan, China, (iii) Hong Kong, China and (iv) certain Southeast Asia countries such as Vietnam and Thailand. In addition, sales to bonded warehouse and free trade zone located in Chinese mainland are also included in sales to other countries and regions as these transactions (i) require customs clearance procedures (similar to cross-border exports); and (ii) are exempt from PRC VAT invoicing, aligning them operationally with overseas sales, notwithstanding the relevant customers may still based within the geographical regions of the PRC.

Overall, we achieved consistently higher gross profit margin overseas than in Chinese mainland market, primarily due to (i) a generally higher pricing of our products in overseas markets, as the overseas market is typically characterized by a higher recognition of the value provided by advanced automation, and a less saturated competitive environment leading to stronger customer willingness to pay a premium for reliable and technologically sophisticated robotic solutions, allowing for greater pricing flexibility and more favorable terms; and (ii) our sales to overseas markets primarily consist of sales of robots rather than robotic solutions, resulting in lower deployment costs. For the overseas market, our gross profit margin generally decreased slightly period by period during the Track Record Period, mainly because we incurred relatively large amount of costs for certain large-scale, high-complexity overseas projects, and we adopted a more competitive pricing strategy to expand the overseas market and strengthen our overall competitiveness. During the Track Record Period, our gross profit margin for Chinese mainland market generally increased, mainly due to our expanding operational scale and enhanced competitiveness with technology iterations and product upgrades.

Other Income and Gains

During the Track Record Period, our other income primarily consisted of (i) government grants, representing government subsidies and grants from Kunshan and Shenzhen authorities in relation to our business operation, certain R&D projects and incentives for technology innovation; (ii) investment income from financial assets at FVTPL, which consisted of interest income from structured deposits and (iii) bank interest income. The following table sets forth a breakdown of our other income and gains in absolute amount and as a percentage of our total other income and gains for the periods indicated:

	Year ended December 31,						Four months ended April 30,			
	2023		2024		2025		2025		2026	
	Amount	%	Amount	%	Amount	%	Amount	%	Amount	%

Selling and Marketing Expenses

The following table sets forth a breakdown of our selling and marketing expenses in absolute amount and as a percentage of our total selling and marketing expenses for the periods indicated:

	Year ended December 31,						Four months ended April 30,			
	2023		2024		2025		2025		2026	
	Amount	%	Amount	%	Amount	%	Amount	%	Amount	%
	(RMB in thousands, except for percentage)									
							(unaudited)			
Employee compensation and benefits	31,090	54.2	30,705	47.5	31,282	27.5	10,932	54.2	14,946	35.7
After-sale services expenses[1]	7,756	13.5	15,708	24.3	12,995	11.4	1,680	8.3	6,480	15.4
Travel and business development expense	7,312	12.7	6,933	10.7	9,357	8.2	2,071	10.2	3,790	9.0
Advertising and promotion expenses	4,198	7.3	5,711	8.8	6,880	6.0	2,925	14.5	2,970	7.1
Depreciation and amortization	4,968	8.7	3,583	5.5	3,025	2.6	1,080	5.3	1,064	2.5
Share-based payment	1,504	2.6	1,594	2.5	49,487	43.3	1,445	7.1	12,278	29.2
Others[2]	530	0.9	361	0.6	1,177	1.0	84	0.4	457	1.1
Total	**57,358**	**100.0**	**64,595**	**100.0**	**114,203**	**100.0**	**20,217**	**100.0**	**41,985**	**100.0**

Notes:

(1) Related to after-sale services provided to our customers during the warranty period.

(2) Others primarily include office expenses and consultation fees.

Our after-sale services expenses increased by 102.5% from RMB7.8 million in 2023 to RMB15.7 million in 2024. These increases were primarily driven by the growth in our revenue and the expansion of our installed base of industrial robotics solutions. As our business expands, the absolute volume of after-sales services typically grows in tandem. Our after-sale services expenses decreased by 17.3% from RMB15.7 million in 2024 to RMB13.0 million in 2025, and then increased from RMB1.7 million in the four months ended April 30, 2025 to RMB6.5 million in the same period of 2026. After-sales service requirements exhibit a degree of randomness in their occurrence. Despite our stringent quality control measures, individual service cases can fluctuate due to factors such as normal wear-and-tear, variations in operating environments, and customer-specific usage patterns. Consequently, the rate of increase in after-sale services expenses does not necessarily align strictly with our revenue growth rate.

Administrative Expenses

The following table sets forth a breakdown of our administrative expenses in absolute amounts and as a percentage of our total administrative expenses for the periods indicated:

	Year ended December 31,						Four months ended April 30,			
	2023		2024		2025		2025		2026	
	Amount	%	Amount	%	Amount	%	Amount	%	Amount	%
	(RMB in thousands, except for percentage)									
							(unaudited)			
Employee compensation	16,648	65.4	15,259	64.8	17,070	14.8	4,937	15.2	7,556	26.6
Consultation fees	1,328	5.2	1,727	7.3	6,417	5.6	602	1.8	777	2.7
Depreciation and amortization	2,394	9.4	3,021	12.8	1,233	1.1	591	1.8	484	1.7
Office and lease expenses	1,127	4.4	458	1.9	1,667	1.5	201	0.6	608	2.1

Note:

(1) Others primarily include technical service expenses, intellectual property rights application fees and travel expenses.

Impairment Losses on Financial Assets and Contract Assets

During the Track Record Period, we recorded impairment losses on financial assets and contract assets of RMB14.7 million, RMB22.9 million, RMB18.4 million, RMB10.1 million and RMB10.4 million in 2023, 2024, 2025 and the four months ended April 30, 2025 and 2026, respectively. Our impairment losses on financial assets and contract assets were primarily due to provision for trade and bills receivable and contract assets.

Other Expenses

During the Track Record Period, our other expenses primarily consist of loss related to early termination of lease contracts and foreign exchange losses. Our other expenses amounted to RMB2.6 million, RMB1.2 million, RMB2.5 million, RMB5,000 and RMB2.1 million in 2023, 2024, 2025 and the four months ended April 30, 2025 and 2026, respectively.

Finance Costs

During the Track Record Period, our finance costs primarily included interest expenses on bank borrowings and other loans and interest expenses on lease liabilities. Our finance costs amounted to RMB2.3 million, RMB1.4 million, RMB1.1 million, RMB0.4 million and RMB0.1 million in 2023, 2024, 2025 and the four months ended April 30, 2025 and 2026, respectively.

Income Tax Expense

During the Track Record Period, we did not incur any income tax expenses as we recorded loss before tax in our operation in 2023, 2024, 2025 and the four months ended April 30, 2026. We are subject to PRC income tax on an entity basis on profits arising in or derived from Chinese mainland. Under the EIT Law and the EIT Implementation Regulations, the EIT rate of our PRC subsidiaries is

25%. Our Company was qualified as high and new technology enterprises and entitled to a preferential EIT rate of 15% in 2023 and 2024. In 2025 and the four months ended April 30, 2026, the applicable tax rate of our Company was 25%. See Note 11 of the Accountants' Report in Appendix I to this document. During the Track Record Period and up to the Latest Practicable Date, we did not have any material dispute with any tax authority.

Loss for the Year/Period

During the Track Record Period, our loss for the year/period amounted to RMB100.3 million, RMB45.1 million, RMB202.0 million, RMB56.1 million and RMB61.8 million in 2023, 2024, 2025 and the four months ended April 30, 2025 and 2026, respectively.

PERIOD-TO-PERIOD COMPARISON OF RESULTS OF OPERATIONS

Four Months Ended April 30, 2026 Compared with Four Months Ended April 30, 2025

Revenue

Our revenue increased by 139.1% from RMB44.7 million in the four months ended April 30, 2025 to RMB106.9 million in the same period of 2026, primarily attributable to the increased sales of robots and other related products. Our sales volume of robots increased from 353 units in the four months ended April 30, 2025 to 556 units in the same period of 2026, reflecting strong customer demand. This growth was mainly driven by increased orders for individual robots from overseas markets. Our revenue from markets outside Chinese mainland increased significantly from RMB8.2 million in the four months ended April 30, 2025 to RMB72.6 million in the same period of 2026, as we continued to expand our presence overseas and secured sizable orders for individual robots from system integrators in Asian markets including (i) Japan, (ii) Taiwan, China, and (iii) Thailand. As our overseas market development is still at an early stage, most of the large orders during this period were placed by overseas system integrators that concentrate on their respective local markets. From an industry perspective, the growth in the four months ended April 30, 2026 was mainly contributed by customers in our strategic focus industries, including 3C, automotive and semiconductor sectors.

Cost of Sales

Our cost of sales increased by 139.5% from RMB24.8 million in the four months ended April 30, 2025 to RMB59.4 million in the same period of 2026, which was generally consistent with the increase of our sales during the same periods. The cost of sales attributable to our robotic solutions increased from RMB20.9 million to RMB25.5 million, and the cost of sales attributable to our robots and others increased from RMB3.8 million to RMB33.8 million during the same periods, generally consistent with the trend of sales increase in respective segments.

Despite the significant growth in revenue, our production and deployment expenses increased by 18.4% from RMB3.8 million in the four months ended April 30, 2025 to RMB4.5 million in the same period of 2026, at a substantially slower rate than our revenue growth. This was mainly because the increase in revenue was primarily generated from sales of robots and related products, which inherently involve limited on-site deployment activities, while our enhanced modular design improved production efficiency and helped contain the growth in overall production costs.

Gross Profit and Gross Profit Margin

As a result of the above, our gross profit increased by 138.0% from RMB20.0 million in the four months ended April 30, 2025 to RMB47.6 million in the same period of 2026, with our gross profit margin remaining relatively stable at 44.7% and 44.5% during the same periods.

Other Income and Gains

Our other income and gains increased from RMB0.8 million in the four months ended April 30, 2025 to RMB2.8 million in the same period of 2026, primarily due to an increase in other income of RMB1.5 million, mainly consisting of compensation received by us pursuant to a court judgment.

Selling and Marketing Expenses

Our selling and marketing expenses increased by 107.9% from RMB20.2 million in the four months ended April 30, 2025 to RMB42.0 million in the same period of 2026, primarily due to higher employee compensation, including share-based payment, for our sales and marketing personnel as we expanded our sales and marketing team, as well as increased after-sales service expenses in line with the growth of our sales.

Administrative Expenses

Our administrative expenses decreased by 12.6% from RMB32.6 million in the four months ended April 30, 2025 to RMB28.5 million in the same period of 2026, primarily due to decreased share-based payment of RMB10.3 million to our administrative personnel, partially offset by the incurring of **[REDACTED]** expenses of RMB2.1 million.

R&D Expenses

Our R&D expenses increased by 115.6% from RMB13.5 million in the four months ended April 30, 2025 to RMB29.1 million in the same period of 2026, primarily due to higher employee compensation, including share-based payment, for our R&D personnel as we expanded our R&D team.

Impairment Losses on Financial Assets and Contract Assets

Our impairment losses on financial assets and contract assets remained relatively stable at RMB10.4 million in the four months ended April 30, 2026 compared to RMB10.1 million in the same period of 2025.

Other Expenses

Our other expenses increased from RMB5,000 in the four months ended April 30, 2025 to RMB2.1 million in the same period of 2026, primarily due to foreign exchange losses of RMB1.8 million.

Finance Costs

Our finance costs decreased from RMB0.4 million in the four months ended April 30, 2025 to RMB0.1 million in the same period of 2026, primarily due to the full repayment of our interest-bearing bank borrowings, as a result of which no interest expense on bank and other borrowings was incurred during the four months ended April 30, 2026.

Loss for the Period

As a result of the foregoing, our loss for the period increased by 10.2% from RMB56.1 million in the four months ended April 30, 2025 to RMB61.8 million in the same period of 2026.

Year Ended December 31, 2025 Compared with Year Ended December 31, 2024

Revenue

Our revenue increased by 20.3% from RMB250.5 million in 2024 to RMB301.5 million in 2025, primarily attributable to the increased sales of our robotic solutions, robots and other related products, and the increased sales in overseas market. Our sales volume of robots increased from 1,932 units in 2024 to 2,284 units in 2025. In 2025, although our total revenue continued to increase year over year, the growth rate moderated as we strategically prioritized securing higher-margin orders over maximizing revenue expansion, which has been reflected in the improvement of our gross profit margin in 2025 compared to 2024.

The growth in the sales of our robotic solutions was primarily driven by the increased sales of robotic solutions that mainly include embodied robots featuring higher degree-of-freedom, mainly due to their ability to handle more complex and flexible automation tasks, which aligns with growing market demand for versatile and intelligent manufacturing solutions. The revenue growth was also attributable to a significant increase in sales of robots, driven by (i) repetitive purchase orders from existing customers for replacement or upgrade of older versions of robots, and (ii) increased overseas orders. Our revenue from markets outside Chinese mainland increased by 26.3% from RMB60.4 million in 2024 to RMB76.3 million in 2025. The increases were primarily attributable to our expanded sales efforts, and particularly in (i) Hong Kong, China, (ii) Japan and (iii) Vietnam for overseas markets, and primarily driven by strong demand in the 3C electronics industry.

Cost of Sales

Our cost of sales increased from RMB153.4 million in 2024 to RMB179.3 million in 2025, and specifically, the primary component, raw materials of costs increased from RMB108.1 million to RMB137.9 million, which was consistent with the increase of sales during the same periods.

Gross Profit and Gross Profit Margin

As a result of the above, our gross profit increased by 25.7% from RMB97.2 million in 2024 to RMB122.2 million in 2025, with the gross profit margin increased from 38.8% to 40.5% during the same periods.

Other Income and Gains

Our other income and gains decreased from RMB7.9 million in 2024 to RMB3.3 million in 2025, primarily due to the decrease of government grant, as we changed our registered address and was temporarily ineligible to apply for grants from the authorities in the previous registration location.

Selling and Marketing Expenses

Our selling and marketing expenses increased by 76.8% from RMB64.6 million in 2024 to RMB114.2 million in 2025, primarily due to increased share-based payment of RMB47.9 million to our sales and marketing personnel.

Administrative Expenses

Our administrative expenses increased significantly from RMB23.6 million in 2024 to RMB114.7 million in 2025, primarily due to (i) increased share-based payment of RMB62.9 million to our administrative personnel, and (ii) the incurring of **[REDACTED]** expenses of RMB20.2 million.

R&D Expenses

Our R&D expenses increased by 109.6% from RMB36.6 million in 2024 to RMB76.7 million in 2025, primarily due to (i) increased share-based payment of RMB28.7 million to our R&D personnel, (ii) increased employee compensation and benefits due to increased R&D personnel, and (iii) increased R&D related materials expenses, primarily related to our continuous R&D for embodied robots and related fundamental technologies. During the same period, the percentage of R&D expenses to total operating expenses dropped from 29.3% in 2024 to 25.1% in 2025, primarily due to the increase in revenue outpaced the increase in R&D expenses.

Impairment Losses on Financial Assets and Contract Assets

Our impairment losses on financial assets and contract assets decreased from RMB22.9 million in 2024 to RMB18.4 in 2025, primarily due to reversals of certain provisions recorded in prior year as certain balances were collected.

Other Expenses

Our other expenses increased by 108.3% from RMB1.2 million in 2024 to RMB2.5 million in 2025, primarily due to our donation of RMB1.2 million to a university.

Finance Costs

Our finance costs decreased slightly from RMB1.4 million in 2024 to RMB1.1 million in 2025, due to decrease in bank borrowings.

Loss for the Year

As a result of the foregoing, our loss for the year increased significantly from RMB45.1 million in 2024 to RMB202.0 million in 2025.

Year Ended December 31, 2024 Compared with Year Ended December 31, 2023

Revenue

Our revenue increased by 54.5% from RMB162.2 million in 2023 to RMB250.5 million in 2024, primarily attributable to the increased sales of our robotic solutions and in both domestic and overseas market.

The growth in the sales of our robotic solutions and robots and other related products was primarily driven by increased customer demand and enhanced acceptance of our products and solutions. We recorded revenue growth from both manufacturer customers and system integrator customers, and acquired major new customers in the 3C and automotive industries in 2024. Our sales volume of robots increased from 1,212 units in 2023 to 1,932 units in 2024. From robot type perspective, our revenue growth was primarily attributable to the increased sales of robotic solutions that mainly include functional robots, which have lifting, drawing, and transporting functions and typically serve as versatile and essential components in a robotic solutions. Such increase reflects the market demand for cost-effective, specialized automation solutions.

Our revenue from Chinese mainland increased by 34.0% from RMB141.9 million in 2023 to RMB190.1 million in 2024. Our revenue from markets outside Chinese mainland increased significantly from RMB20.3 million in 2023 to RMB60.4 million in 2024, accounting for 12.5% and 24.1%, respectively, of our total revenue for the respective years. The increases were primarily attributable to an expanding customer base. For overseas markets, we achieved increased sales in (i) Hong Kong, China, (ii) Japan, (iii) Taiwan, China and (iv) Southeast Asia markets such as Thailand, with the addition of key overseas customers contributing to this growth as well.

Cost of Sales

Our cost of sales increased by 38.2% from RMB111.0 million in 2023 to RMB153.4 million in 2024, below the growth rate of our revenue growth, primarily due to less inventory write-down of RMB19.1 million in 2024, compared to a write-down of RMB23.2 million in 2023, benefited from our enhanced inventory management practices and improved delivery capabilities.

The growth rate of raw materials costs and production and deployment expenses at 53.9% and 54.7%, respectively, were generally in line with revenue growth. Our logistics expenses remained relatively stable at RMB1.6 million for both 2023 and 2024, despite the growth of revenue during the period, as logistics expenses are more correlated with the frequency of transportation and does not necessarily increase proportionately with revenue.

Gross Profit and Gross Profit Margin

As a result of the above, our gross profit increased by 89.9% from RMB51.2 million in 2023 to RMB97.2 million in 2024. Our gross profit margin increased from 31.6% in 2023 to 38.8% in 2024.

Other Income and Gains

Our other income and gains increased slightly from RMB7.1 million in 2023 to RMB7.9 million in 2024, primarily attributable to (i) increase in government grants of RMB2.0 million and (ii) foreign exchange gains of RMB0.7 million, partially offset by (i) decrease in net gains on early termination of lease contracts of RMB0.7 million, and (ii) decrease in investment income from financial assets at FVTPL of RMB0.5 million.

Selling and Marketing Expenses

Our selling and marketing expenses increased by 12.6% from RMB57.4 million in 2023 to RMB64.6 million in 2024, primarily due to the increase of after-sale services expenses, which was consistent with the growth of our sales during the same period.

Administrative Expenses

Our administrative expenses decreased by 7.4% from RMB25.5 million in 2023 to RMB23.6 million in 2024, and at the same time, the percentage of administrative expenses to total revenue dropped significantly from 15.7% in 2023 to 9.4% in 2024, primarily attributable to our implementation of efficiency improvements, leading to a reduction in administrative personnel compensation and office lease expenses.

R&D Expenses

Our R&D expenses decreased by 34.7% from RMB56.1 million in 2023 to RMB36.6 million in 2024, and at the same time, the percentage of R&D expenses to total revenue dropped significantly from 34.6% in 2023 to 14.6% in 2024, primarily due to (i) the decrease in compensation primarily driven by a reduction in headcount, which resulted from our implementation of efficiency improvements and organizational realignment. Specifically, we advanced modular product design to materially improve R&D efficiency, which lowered the need for certain product design roles and led to the exit of some lower-performing staff. In parallel, to align with our business plan, we streamlined the team by phasing out most non-standard design R&D positions to concentrate resources on standard product development. These actions reduced overall R&D personnel compensation, with a significant impact on total costs given the relatively higher salaries associated with R&D roles; and (ii) the successful development and continuous optimization of our robots with improved product versatility and enhanced modularity in previous years, resulting in decreased R&D expenditure in 2024. For example, we have developed a set of standard physical interfaces and communication protocols for connecting standard robots with functional modules. This standard set of physical interfaces and communication protocols can support various forms of functional modules. When developing a new model of functional robot based on a standard robot, it is only necessary to adapt the functional module of the new robot to the standard physical interface and communication protocol. With the modular design, a large number of existing mature functional module components can be used when developing a new robot. This approach can reduce the time and costs required for new product development, resulting in a reduction in R&D expenses.

Impairment Losses on Financial Assets and Contract Assets

Our impairment losses on financial assets and contract assets increased from RMB14.7 million in 2023 to RMB22.9 million in 2024, primarily due to the increase in revenue, resulting in a larger amount of trade and bills receivables and contract assets.

Other Expenses

Our other expenses decreased from RMB2.6 million in 2023 to RMB1.2 million in 2024, primarily due to the decrease in losses related to early termination of lease contracts.

Finance Costs

Our finance costs decreased from RMB2.3 million in 2023 to RMB1.4 million in 2024, primarily due to (i) a reduction in loan scale in 2024, thereby decreasing the corresponding interest expenses, and (ii) the termination of leases for certain office space in 2024, which reduced our interest expenses on lease liabilities.

Loss for the Year

As a result of the foregoing, our loss for the year decreased significantly by 55.0% from RMB100.3 million in 2023 to RMB45.1 million in 2024.

DISCUSSION ON KEY ITEMS OF CONSOLIDATED STATEMENTS OF FINANCIAL POSITION

The following table sets forth selected information from our summary consolidated balance sheet as of the dates indicated, which has been extracted from our audited consolidated financial statements included in Appendix I to this document.

	As of December 31,			As of April 30,
	2023	2024	2025	2026
	(RMB in thousands)			
Total current assets	216,331	277,442	430,025	440,160
Total non-current assets	18,545	28,337	22,123	32,607
Total assets	**234,876**	**305,779**	**452,148**	**472,767**
Total current liabilities	141,204	159,503	158,474	199,093
Total non-current liabilities	8,000	5,809	4,126	8,318
Total liabilities	**149,204**	**165,312**	**162,600**	**207,411**
Net current assets	**75,127**	**117,939**	**271,551**	**241,067**
Net assets	**85,672**	**140,467**	**289,548**	**265,356**
Paid-in capital	5,673	6,015	—	—
Share capital	—	—	22,105	22,105
Reserves	79,999	134,452	267,443	243,251
Total equity	**85,672**	**140,467**	**289,548**	**265,356**
Total liabilities and equity	**234,876**	**305,779**	**452,148**	**472,767**

For details on the accounting treatment of redemption rights of pre-**[REDACTED]** investments, see "— Pre-**[REDACTED]** Investments" and note 31 to the Accountants' Report set out in Appendix I to this document.

Current Assets and Liabilities

The following table sets forth our current assets and liabilities as of the dates indicated:

	As of December 31,			As of April 30,	As of May 31,
	2023	2024	2025	2026	
			(RMB in thousands)		(unaudited)
Current assets					
Inventories	110,460	59,432	63,577	122,454	144,987
Trade and bills receivables	51,817	93,422	162,683	172,446	159,298
Debt investments at fair value through other comprehensive income	1,896	697	1,257	1,746	1,746
Contract assets	8,464	12,834	14,707	12,279	12,279
Prepayments, other receivables and other assets	9,850	6,435	12,589	22,743	21,160
Financial assets measured at FVTPL	—	17,008	80,609	40,791	30,791
Restricted cash	390	3,256	17,463	18,015	17,096
Time deposits	—	1,000	—	—	—
Cash and cash equivalents	33,454	83,358	77,140	49,686	54,466
Total current assets	**216,331**	**277,442**	**430,025**	**440,160**	**441,823**
Current liabilities					
Trade payables	45,785	52,299	80,563	135,054	132,263
Other payables and accruals	23,608	20,171	33,464	28,657	25,038
Interest-bearing bank and other borrowings	25,028	42,881	—	—	—
Lease liabilities	4,565	4,286	2,908	6,971	6,806
Contract liabilities	34,054	16,111	25,375	10,808	14,747
Deferred income	—	8,000	—	—	-
Provisions	8,164	15,755	16,164	17,603	17,603
Total current liabilities	**141,204**	**159,503**	**158,474**	**199,093**	**196,457**
Net current assets	**75,127**	**117,939**	**271,551**	**241,067**	**245,366**

Our net current assets decreased slightly from RMB271.6 million as of December 31, 2025 to RMB241.1 million as of April 30, 2026, primarily due to (i) an increase in trade payables of RMB54.5 million, primarily driven by the growth of our business scale and correspondingly, the increase in our total purchase, (ii) a decrease in financial assets measured at FVTPL of RMB39.8 million, as we redeemed wealth management products to support our operating needs, (iii) a decrease in cash and cash equivalents of RMB27.5 million, primarily driven by operating cash outflows during the period, and (iv) an increase in lease liabilities of RMB4.1 million, due to the addition of new lease agreements for buildings during the period, partially offset by (i) an increase in inventories of RMB58.9 million, primarily driven by increased procurement in response to growing customer orders, (ii) an increase in prepayments, other receivables and other assets of RMB10.2 million, primarily attributable to increased prepayments for raw materials procurement, deferred **[REDACTED]** expenses and value-added tax recoverable, and (iii) a decrease in contract liabilities of RMB14.6 million, attributable to the fulfillment of obligations under existing contracts and the recognition of revenue from previously received advance payments during the period.

Our net current assets increased by 130.4% from RMB117.9 million as of December 31, 2024 to RMB271.6 million as of December 31, 2025, primarily due to (i) an increase in trade and bills receivables of RMB69.3 million, consistent with the growth of our business scale, (ii) increase in financial assets measured at FVTPL of RMB63.6 million, as we conducted a new round of financing in

May 2025 and purchased wealth management products in the form of structured deposit and certificate of deposits with spare funds, and (iii) decrease in interest-bearing bank and other borrowings of RMB42.9 million, due to reduced bank borrowings, partially offset by an increase in trade payables of RMB28.3 million, primarily due to the growth of our business scale, and correspondingly, the increase in our total purchase.

Our net current assets increased by 57.0% from RMB75.1 million as of December 31, 2023 to RMB117.9 million as of December 31, 2024, primarily due to (i) an increase in trade and bills receivables of RMB41.6 million, driven by our revenue growth, (ii) an increase in financial assets at FVTPL of RMB17.0 million, as we purchased wealth management product to fully utilize our spare funds, (iii) an increase in cash and cash equivalents of RMB49.9 million, driven by our revenue growth, coupled with funds from our financing in June 2024 and (iv) a decrease in contract liabilities of RMB17.9 million, attributable to our improved delivery efficiencies, partially offset by (i) a decrease in inventories of RMB51.0 million benefited from our enhanced inventory management practices, (ii) an increase in trade payables of RMB6.5 million, (iii) an increase in interest-bearing bank and other borrowings of RMB17.9 million, driven by the need to support business development, which led to the incurring of additional bank borrowings, (iv) an increase in deferred income of RMB8.0 million, and (v) an increase in provisions of RMB7.6 million.

Inventories

The following table sets out a breakdown of our inventories as of the dates indicated:

	As of December 31,			As of April 30,
	2023	2024	2025	2026
	(RMB in thousands)			
Raw materials	20,232	15,108	17,991	30,100
Work in progress	6,814	5,801	10,298	25,389
Finished goods	9,094	9,693	11,836	18,293
Contract fulfillment costs	74,320	28,830	23,452	48,672
Total	**110,460**	**59,432**	**63,577**	**122,454**

Our inventories consist of raw materials, work in process and finished goods and contract fulfillment costs. Contract fulfillment costs refer to the robotic solutions deployed at customer site during the delivery phase, which include on-site materials such as robotic products and accessories, delivery personnel salaries and other delivery expenses. Our contract fulfillment costs decreased from RMB74.3 million as of December 31, 2023 to RMB28.8 million as of December 31, 2024, and continued to decrease to RMB23.5 million as of December 31, 2025 largely attributable to our enhanced delivery capabilities, which enabled us to expedite product delivery. The amount of raw materials, work in process and finished goods fluctuated at period-end due to varying material states during inventory counts. However, the combined total amount of these categories decreased from 2023 to 2024, largely benefiting from our enhanced inventory management practices, including more procurement based on order demand, coupled with limited space following lease terminations, which reduced the stocking of materials and products. The increase from the year end of 2024 to 2025, and further increased to April 30, 2026 were primarily due to our increased procurement in response to an increase in orders.

The table below sets forth an aging analysis for our inventories, net of loss allowances as at the dates indicated.

	As of December 31,			As of April 30,
	2023	2024	2025	2026
	(RMB in thousands)			
Within 1 year	98,282	57,798	63,240	124,516
1 to 2 years	42,122	15,139	7,364	8,017
Over 2 years	73	6,074	14,602	15,602
Less: Write-down of inventories	30,017	19,579	21,629	25,681
Total	**110,460**	**59,432**	**63,577**	**122,454**

Our management review the condition of our inventories at the end of each year and makes provisions against obsolete and slow-moving inventory items which are identified as no longer suitable for sale or use based on sales forecasts. Such sales forecasts are prepared based on agreements or orders on hand and estimated sales in the foreseeable future based on our historical experiences with customers and current market conditions of the industrial robotic solutions industry. Our management estimates the net realisable value for those obsolete and slow-moving inventories based primarily on the latest invoice prices and current market conditions. Inventories are stated at the lower of cost and net realisable value and provisions will be made as appropriate. During the Track Record Period, we recorded a substantial inventory write-down, primarily due to the rapid product iteration characteristic of the robotics industry. Given the low net realizable value of aged inventory items, we applied a high provision rate to long-term stored inventory. For example, we made a 100% provision for inventories older than two years. As of December 31, 2023, 2024 and 2025 and April 30, 2026, we had inventory write-down of RMB30.0 million, RMB19.6 million, RMB21.6 million and RMB25.7 million, respectively. Our management believes that sufficient provision has been made at the end of each of the reporting periods. Our management strategies for slow-moving and obsolete inventories include, but are not limited to: (i) the timely disposal of outdated raw materials; (ii) selling components of products that have been completely phased out of the market; and (iii) enhancing promotional efforts and implementing price reduction strategies for slow-moving products.

The following table sets forth our inventory turnover days for the periods indicated:

	Year Ended December 31,			Four Months Ended April 30,
	2023	2024	2025	2026
Inventory turnover days[(1)]	459.4	261.2	167.2	235.8

Note:

(1) Inventory turnover days are calculated using the average of opening balance and closing balance of inventories for a year/four months divided by cost of sales for the relevant year/period and multiplied by 365 or 120 days.

Our relatively long inventory turnover days are primarily a reflection of the nature of our project-based business model and the delivery cycle of our robotic solutions. Due to the customized nature of our solutions, the period from production completion to final customer acceptance is often extended, as it typically involves on-site deployment, system integration, testing, and formal acceptance procedures, particularly for projects for complex manufacturing environments. We recognize revenue only after fully deployment and formal acceptance of our robotic solutions. As a result, corresponding inventories remain on our balance sheet until revenue is recognized. We believe the relatively long inventory turnover days reflect our project-based business model rather than any issues with inventory recoverability.

Our inventory turnover days decreased from 459.4 days in 2023 to 261.2 days in 2024, and further decreased to 167.2 days in 2025. Our inventory turnover days was relatively long, at 459.4 days for 2023, primarily due to (i) the relatively high opening inventories balance for 2023, and (ii) the rise in customer orders prompted us to strategically acquire relatively large amount of new inventories to ensure fulfillment, resulting in a high ending inventories balance for 2023. The notable reduction in inventory turnover days in 2024 and subsequent decrease in 2025 were primarily due to (i) our enhanced inventory management practices, including more procurement based on order demand, coupled with limited space following lease terminations, which reduced the stocking of raw materials; and (ii) our improved delivery capabilities, beneficial from our new products with improved product versatility and enhanced modularity, as modular and universal product designs enable parallel production of standardized components, reducing manufacturing lead times, and simplify configuration changes, accelerating deployment at customer sites. With more shared components across products, we are able to lower safety stock requirements and achieve higher inventory utilization, which in turn accelerated the turnover of inventory. Our inventory turnover days increased from 167.2 days in 2025 to 235.8 days for the four months ended April 30, 2026, primarily due to (i) a high opening inventories balance for this period and (ii) our increased procurement in response to the growth of our business scale and an increase in orders, which resulting in a notably high ending inventory balance for the four-month period of 2026.

As of the Latest Practicable Date, RMB60.0 million, or 40.5% of our inventories as of April 30, 2026, had been consumed.

Trade and Bills Receivables

The following table sets forth a breakdown of our trade and bills receivables as of the dates indicated:

	As of December 31,			As of April 30,
	2023	2024	2025	2026
	(RMB in thousands)			
Bill receivables	9,764	5,503	6,393	7,589
Trade receivables	78,604	145,461	233,043	252,566
Allowance for credit losses	(36,551)	(57,542)	(76,753)	(87,709)
Total	**51,817**	**93,422**	**162,683**	**172,446**

We typically require payment in installments: an initial portion of the purchase amount is paid upon the signing of agreement, a second portion upon shipment of the ordered products, a third portion upon receipt and acceptance, and the final installment upon the expiration of the warranty period, which typically lasts one year. However, at the request of certain major customers, this practice may vary; for example, some customers may opt to pay the full lump sum upon receipt and acceptance. Our trade and bills receivables increased from RMB51.8 million as of December 31, 2023 to RMB93.4 million as of December 31, 2024 and further increased to RMB162.7 million as of December 31, 2025, which is generally in line with the increase in our business scale. Our trade and bills receivables remained relatively stable at RMB172.4 million as of April 30, 2026.

The following table sets forth the aged analysis of our trade and bill receivables as of the dates indicated, based on the revenue recognition date and net of allowance for ECLs:

	As of December 31,			As of April 30,
	2023	2024	2025	2026
	(RMB in thousands)			
Within 1 year	51,040	90,093	147,885	154,408
1 to 2 years	777	3,329	13,260	16,371
Over 2 years	—	—	1,538	1,667
Total	**51,817**	**93,422**	**162,683**	**172,446**

The following table sets forth our trade and bills receivables turnover days for the periods indicated:

	Year Ended December 31,			Four Months Ended April 30,
	2023	2024	2025	2026
Trade and bills receivables turnover days[(1)]	144.2	163.2	229.1	272.5

Note:

(1) Trade receivables turnover days are calculated using the average of opening balance and closing balance of trade receivables (excluding provision for impairment) for a year/four months divided by revenue for the relevant year/period and multiplied by 365/120 days.

Our trade receivables turnover days during the Track Record Period were longer than the standard credit period of up to 90 days that we offered to our customers, primarily due to (i) as a company in a rapid growth stage, we have strategically focused more resources on business expansion and new orders acquisition rather than receivables collections; (ii) given our high-quality customer base and high customer retention rate and net dollar retention rate, we believe the risks associated with receivables recoverability are low. Therefore, we historically adopted a more lenient approach to receivables collection, and we occasionally extend payment terms to accommodate specific customer needs, particularly for key customers and strategic customers, to foster long-term relationships.

Our trade and bills receivables turnover days increased from 144.2 days in 2023 to 163.2 days in 2024, and further increased to 229.1 days in 2025 and 272.5 days for the four months ended April 30, 2026. The increase in trade and bills receivables turnover days in 2024 was in line with our increased sales, which led to an increase in trade and bill receivables, leaving a higher average trade and bill receivables balance for this year, and our allocation of more resources to support business expansion, coupled with influence by payment delays from certain major customers. The significant increase in the trade and bills receivables turnover days in 2025 were driven by (i) a high year-end balance of trade and bills receivables as of December 31, 2024, which resulting in a correspondingly high opening balance for 2025 calculation base, mechanically elevating the average receivables and lengthening the turnover days in the period, (ii) as we continued to scale our business, the outstanding receivables continued to increase, (iii) we allocated more resources to business expansion, which temporarily diverted collection manpower and extended certain collection cycles, (iv) payment delays from several major customers contributed to higher period-end receivable balances, and (v) we changed our Company name during the period, which resulted in a temporary extension of payment processing times with some major customers as the name change triggered certain internal updates within our clients'

systems, which further prolonged the trade and bills receivables turnover days. The significant increase in trade and bills receivables turnover days for the four months ended April 30, 2026 was primarily due to: (i) a high year-end balance of trade and bills receivables as of December 31, 2025, which resulted in a correspondingly high opening balance for the calculation base; and (ii) an even higher ending balance of trade and bills receivables for this period as we continued to scale our business and outstanding receivables increased. These factors together mechanically increased the average receivables and lengthened the turnover days for the period. In addition, in response to our continued business growth, we allocated more resources to business expansion, which diverted collection manpower and extended collection cycles, further prolonging trade and bills receivables turnover days.

We are highly focused on maintaining healthy cash flow and minimizing credit risk. To that end, we plan to strengthen our collections efforts and take a proactive approach to collections. We have already established a dedicated collection team regularly monitors receivables, meets internally to review outstanding balances, and actively follow-ups with customers through multiple channels to remind them of upcoming payments. Additionally, we plan to conduct credit assessments of our customers and incorporate credit dimensions into the review of new business contracts. We plan to refine our customer base to focus on those who consistently deliver sustainable growth, while applying more rigorous credit standards across both new and existing customers. We also plan to pursue more favorable payment terms, allowing us to collect a larger proportion of prepayments, thereby reducing the pressure of collecting remaining balances, and to implement more rigorous payment collection procedures to ensure timely payments from our customers. To address the cash flow mismatch arising from the longer inventory turnover days and trade receivable turnover days compared to trade payable turnover days and improve our liquidity position moving forward, we also plan to engage with our suppliers to negotiate extended payment terms and flexible payment approaches, reducing the pressure on our working capital, and to further refine our inventory management practices such as improving demand forecasting and enhancing supplier collaboration to ensure optimal stock levels and reduce inventory turnover days.

As of the Latest Practicable Date, RMB87.4 million, or 33.6% of our trade and bills receivables as of April 30, 2026, had been settled, among which, (i) RMB75.2 million, or 39.7% of our trade and bills receivables due within one year, (ii) RMB10.0 million, or 23.1% of our trade and bills receivables due within one to two years, and (iii) RMB2.2 million, or 8.2% of our trade and bills receivables due over two years, had been settled.

Contract Assets

Our contract assets comprise warranty retention receivables, which will be collected upon the completion of warranty period and typically amount to 10 percent of the contract value for our robotic solutions. Our contract assets increased from RMB8.5 million as of December 31, 2023 to RMB12.8 million as of December 31, 2024, and continued to increase to RMB14.7 million as of December 31, 2025. These increases align with the growth in our revenue over the same periods. Our contract assets then decreased to RMB12.3 million as of April 30, 2026, primarily due to the collection of the warranty retention receivables upon expiry of warranty periods.

Prepayments, Other Receivables and Other Assets

The following table sets out a breakdown of the current portion of our prepayments, other receivables and other assets as of the dates indicated:

	As of December 31,			As of April 30,
	2023	2024	2025	2026
	(RMB in thousands)			
Prepayments	6,568	3,650	4,526	9,795
Value-added tax recoverable	175	362	2,603	4,984
Other receivables and deposit[(1)]	3,107	2,423	2,252	4,396
Deferred **[REDACTED]** expenses	—	—	3,208	3,568
Total	**9,850**	**6,435**	**12,589**	**22,743**

Note:

(1) Represents bid security, lease security and outstanding damages.

The current portion of our prepayments, other receivables and other assets decreased from RMB9.9 million as of December 31, 2023 to RMB6.4 million as of December 31, 2024, primarily due to the decrease of our prepayments from RMB6.6 million to RMB3.7 million, mainly attributable to our refined procurement policies, which focus on procuring raw materials based on order demands rather than maintaining large stockpiles. Additionally, as our business operations have scaled up, our bargaining power has strengthened, allowing us to negotiate longer payment terms and reduced prepayment requirements. We adhere to a strict policy on prepayment management and aim to maintain a relatively low level of prepayments as a percentage of our total purchase amount.

The current portion of our prepayments, other receivables and other assets increased by 96.9% from RMB6.4 million as of December 31, 2024 to RMB12.6 million as of December 31, 2025, primarily due to (i) the incurring of deferred **[REDACTED]** expenses of RMB3.2 million; (ii) increased prepayments for and value-added tax recoverables relating to raw materials procurement in light of increased orders and (iii) increased bid security.

The current portion of our prepayments, other receivables and other assets further increased by 80.2% from RMB12.6 million as of December 31, 2025 to RMB22.7 million as of April 30, 2026, primarily due to (i) an increase in prepayments of RMB5.3 million, primarily attributable to increased procurement of raw materials and services in response to growing customer orders during the period; (ii) an increase in deferred **[REDACTED]** expenses of RMB0.4 million in connection with the **[REDACTED]**; (iii) an increase in value-added tax recoverable of RMB2.4 million, consistent with the increase in our procurement activities relating to raw materials and (iv) an increase in other receivables and deposits of RMB2.1 million, primarily attributable to outstanding damages from a defendant in a lawsuit.

Financial Assets Measured at FVTPL

Our financial assets measured at FVTPL consisted of wealth management products issued by commercial banks in the PRC with variable interest rates. We did not have any wealth management products as of December 31, 2023. We recorded financial assets measured at FVTPL at an amount of RMB17.0 million, RMB80.6 million and RMB40.8 million as of December 31, 2024 and 2025 and April 30, 2026, respectively, as we purchased wealth management product to fully utilize and enhance returns on our spare funds from the consideration for issue of shares of RMB200.0 million during the

period, after reserving sufficient working capital to support our business operations and growth. These wealth management products generally have terms of less than three months and are relatively flexible, so that we can quickly redeem and convert them into working capital to meet any additional operating needs.

Our investment strategy prioritizes liquidity, safety and returns to ensure the availability of funds while maintaining a conservative risk profile. During the Track Record Period, we primarily invested in low-risk wealth management products, typically with terms ranging from 30 to 90 days and featuring automatic redemption upon maturity. To regulate and control risks associated with structured deposits and wealth management product portfolios, we have established a robust set of internal risk management policies and guidelines. These outline clear approval processes, periodic monitoring and reporting procedures to ensure that investments align with our liquidity and risk requirements. After the **[REDACTED]**, our investments in financial assets at FVTPL will be subject to compliance with Chapter 14 of the Listing Rules.

Trade Payables

Our trade payables primarily consisted of the amount payables to our suppliers. Our trade payables increased by 14.2% from RMB45.8 million as of December 31, 2023 to RMB52.3 million as of December 31, 2024 and continue to increase by 54.1% to RMB80.6 million as of December 31, 2025 and increase by 67.6% to RMB135.1 million as of April 30, 2026, primarily driven by the growth of our business and sales, leading to a rise in trade payables.

The following table sets forth the aged analysis of our trade payables as of the dates indicated:

	As of December 31,			As of April 30,
	2023	2024	2025	2026
	(RMB in thousands)			
Within 1 year	35,469	42,853	72,977	127,423
Over 1 year	10,316	9,446	7,586	7,631
Total	**45,785**	**52,299**	**80,563**	**135,054**

The following table sets forth our trade payables turnover days for the Track Record Period:

	Year Ended December 31,			Four Months Ended April 30,
	2023	2024	2025	2026
Trade payables turnover days[(1)]	180.8	116.7	135.3	217.9

Note:

(1) Trade payables turnover days are calculated using the average of opening balance and closing balance of trade payables for a year/four months divided by cost of sales used for the relevant year/period and multiplied by 365/120 days.

Our trade payables turnover days decreased from 180.8 days in 2023 to 116.7 days in 2024, primarily because we expedited the settlement of our trade payables due to our improved cash flow. Our trade payables turnover days increased to 135.3 days in 2025 and 217.9 days for the four months ended April 30, 2026, primarily because of our strategic approach to working capital management, aimed at optimizing cash flow stability and maintain a healthy balance between cash inflows and outflows, supporting sustainable operational growth.

As of the Latest Practicable Date, RMB51.1 million, or 37.8% of our trade payables as of April 30, 2026, had been settled.

Other Payables and Accruals

Our other payables and accruals decreased from RMB23.6 million as of December 31, 2023 to RMB20.2 million as of December 31, 2024, primarily attributable to the decreases in the combined amount of payroll payables and cash settled share-based payments to our employees during the same period. Our other payables and accruals then increased to RMB33.5 million as of December 31, 2025, primarily attributable to the increase of other payables, mainly due to the accounting treatment of a government grant pending fulfillment of its conditions. Our other payables and accruals then decreased to RMB28.7 million as of April 30, 2026, primarily attributable to the decreases of other tax payables mainly consisting of value added tax payable.

The following table sets out a breakdown of our other payables and accruals as of the dates indicated:

	As of December 31,			As of April 30,
	2023	2024	2025	2026
	(RMB in thousands)			
Payroll payables	11,018	9,494	12,362	14,714
Cash settled share-based payments	3,625	3,709	—	—
Output value added tax to be transferred	4,209	1,889	1,218	1,251
Other tax payables	3,150	1,443	6,985	413
Other payables and accruals	1,606	3,636	2,678	2,796
[REDACTED] expenses payables	—	—	2,221	1,483
Government grants to be refunded	—	—	—	8,000
Total	**23,608**	**20,171**	**33,464**	**28,657**

Contract Liabilities

Our contract liabilities primarily represent advances from customers for our sale of robotic solutions. Our contract liabilities decreased by 52.7% from RMB34.1 million as of December 31, 2023 to RMB16.1 million as of December 31, 2024. This reduction was primarily driven by the enhancement of our delivery capabilities, which enabled us to complete projects more swiftly and recognize revenue more promptly. Our contract liabilities increased by 57.5% from RMB16.1 million as of December 31, 2024 to RMB25.4 million as of December 31, 2025, primarily due to increased advance payments from customers under newly signed sales contracts. Our contract liabilities decreased by 57.4% from RMB25.4 million as of December 31, 2025 to RMB10.8 million as of April 30, 2026, primarily due to our enhanced project delivery efficiencies, which enabled us to complete projects more swiftly and recognize revenue more promptly.

As of the Latest Practicable Date, RMB1.4 million, or 12.9% of our contract liabilities as of April 30, 2026, had been subsequently recognized as revenue.

Provisions

We generally provide warranties of one year to our customers for our robotic solutions for general repairs of defects occurring during the warranty period. The amount of the provision for the warranties is estimated based on sales volumes and past experience of the level of repairs and returns. We recorded provisions for the warranties of RMB8.2 million, RMB15.8 million, RMB16.2 million and RMB17.6 million as of December 31, 2023, 2024 and 2025 and April 30, 2026, respectively.

Non-Current Assets and Liabilities

The following table sets forth our non-current assets and liabilities as of the dates indicated:

	As of December 31,			As of April 30,
	2023	2024	2025	2026
	(RMB in thousands)			
Non-current assets				
Property, plant and equipment	13,289	7,312	4,595	5,514
Right-of-use assets	4,035	10,011	5,567	13,603
Other intangible assets	807	490	267	277
Prepayments, other receivables and other assets	414	10,524	11,694	13,213
Total non-current assets	**18,545**	**28,337**	**22,123**	**32,607**
Non-current liabilities				
Lease liabilities	—	5,809	2,901	7,249
Deferred income	8,000	—	1,225	1,069
Total non-current liabilities	**8,000**	**5,809**	**4,126**	**8,318**

Property, Plant and Equipment

Our property, plant and equipment consisted of (i) machinery and equipment, (ii) office equipment and fixtures, (iii) motor vehicles, (iv) other equipment and (v) leasehold improvement. Our property, plant and equipment decreased by 45.1% from RMB13.3 million as of December 31, 2023 to RMB7.3 million as of December 31, 2024, primarily due to (i) disposal of office equipment and fixtures after our termination of some office leases and (ii) depreciation provided during the year. Our property, plant and equipment then decreased by 37.1% to RMB4.6 million as of December 31, 2025, primarily due to depreciation provided during the period. Our property, plant and equipment then increased to RMB5.5 million as of April 30, 2026, primarily due to the addition of other production, R&D and business operation-related equipment.

Right-of-Use Assets

Our right-of-use assets consisted of lease for buildings. Our right-of-use assets increased by 148.1% from RMB4.0 million as of December 31, 2023 to RMB10.0 million as of December 31, 2024, primarily due to the renewal of leasing agreement. Our right-of-use assets then decreased by 44.4% to RMB5.6 million as of December 31, 2025, primarily due to depreciation charge for the period. Our right-of-use assets then increased by 144.4% to RMB13.6 million as of April 30, 2026, primarily due to we entered into new lease contracts for our new Wuxi factory and the expansion of office area in Shenzhen.

Prepayments, Other Receivables and Other Assets

The following table sets out a breakdown of the non-current portion of our prepayments, other receivables and other assets as of the dates indicated:

	As of December 31,			As of April 30,
	2023	2024	2025	2026
	(RMB in thousands)			
Prepayments	414	68	1,048	956
Other receivables and deposits	—	419	419	1,967
Certificate of deposits	—	10,037	10,227	10,290
Total	**414**	**10,524**	**11,694**	**13,213**

The increase in the non-current portion of our prepayments, other receivables and other assets from RMB0.4 million as of December 31, 2023 to RMB10.5 million as of December 31, 2024 was primarily due to our purchase of certificate of deposits of RMB10.0 million to fully utilize our spare funds. The non-current portion of our prepayments, other receivables and other assets then remained relatively stable at RMB11.7 million as of December 31, 2025 and RMB13.2 million as of April 30, 2026.

PRE-[REDACTED] INVESTMENTS

Pursuant to the shareholders agreements entered into between us and our shareholders (collectively the "**Agreements**"), we issued 12,697,000 ordinary shares (representing the number of shares after conversion into a joint stock company) to certain shareholders (collectively the "**Pre-[REDACTED] Investors**") for a total net cash proceed of approximately RMB540,854,000 (collectively the "**Pre-[REDACTED] Investments**"). Pursuant to the Agreements, the Pre-**[REDACTED]** Investors were granted by us with special rights ("**Special Rights**") which included redemption rights, liquidation preferences and anti-dilution rights. There was no exercise of such Special Rights during the Track Record Periods.

In June 2025, we and the Pre-**[REDACTED]** Investors subsequently entered into supplemental agreements, agreeing that certain of the Special Rights, including redemption rights, liquidation preferences and anti-dilution rights, have been irrecoverably terminated and shall be *void ab initio*. Taking into account the applicable legal and regulatory framework and the governing law of the supplemental agreements, our Directors considered that it is appropriate to present the Pre-**[REDACTED]** Investments as equity throughout the Track Record Periods.

Had the Special Rights been accounted for as financial liabilities measured at present value of the redemption amount prior to entering into the supplemental agreements, the redemption financial liabilities, total current liabilities and net deficits would have been:

	As of December 31,	
	2023	2024
	(RMB in thousands)	
Redemption financial liabilities	563,192	720,678
Total current liabilities	704,396	880,181
Net deficits	(477,520)	(580,211)

The finance costs associated with the redemption financial liabilities, the total net losses, basic and dilutive loss per share would have been:

	Year ended December 31,			Four months ended April 30,
	2023	2024	2025	2025
	(RMB in thousands)			
Finance costs associated with the redemption financial liabilities	48,037	62,598	29,376	20,580
Total net losses	(148,385)	(107,742)	(231,397)	(76,666)
Basic and dilutive loss per share (RMB per share)	(0.87)	(0.60)	(1.11)	(0.40)

LIQUIDITY AND CAPITAL RESOURCES

Our Directors are of the opinion that, taking into account the estimated net **[REDACTED]** from the **[REDACTED]** and other capital resources available to us, including cash flow from operating activities and cash and cash equivalents, we have sufficient working capital to meet our present requirements and for the next 12 months from the date of this document.

Our cash burn rate refers to the average monthly aggregate amount of (i) net cash used in operating activities, (ii) purchase of property, plant and equipment and purchase of intangible assets, and (iii) lease payment and lease interests. Our historical cash burn rate was RMB11.2 million, RMB2.8 million, RMB7.8 million and RMB17.1 million in 2023, 2024, 2025 and the four months ended April 30, 2026, respectively. In 2023, our cash burn rate was relatively high, primarily because of (i) significant outflows for settling outstanding supplier payables accumulated in prior years and (ii) an expansion in the scale of trade receivables corresponding to the substantial growth in revenue. In 2024, we observe a notable reduction in the cash burn rate, mainly attributable to (i) the delayed benefits of prior cost-saving measures materializing through leaner operations, such as downsizing our workforce which lowered our monthly payroll outflows and refined procurement management which reduced our overall payments to suppliers, and (ii) strategic business mix optimization, with increased share of high-margin orders from customers with strong payment performance, which facilitated faster cash conversion and reduced our net operating cash outflows. Our cash burn rate then increased to RMB7.8 million in 2025 primarily driven by our continued business scale-up, when we incurred (i) increased payments to suppliers due to the increased procurement, (ii) increased payroll and related personnel costs as our headcount grown, and (iii) higher travel and other international operating expenses as our overseas operations expanded. In addition, the outpace of our payments to suppliers over the collection of trade and bill receivables also resulted in an increase in our net operating cash outflows. Our cash burn in the four months ended April 30, 2026 is relatively high because we incurred substantial expenses for overseas business expansion, which is not representative of the full-year operating profile.

We had cash and cash equivalents, and financial assets at FVTPL of RMB102.4 million in aggregate as of May 31, 2026. We estimate that we will receive net **[REDACTED]** of approximately HK$**[REDACTED]** after deducting the estimated **[REDACTED]** and other fees and expenses paid and payable by us in connection with the **[REDACTED]**, assuming no **[REDACTED]** is exercised and assuming an **[REDACTED]** of HK$**[REDACTED]** per **[REDACTED]**, being the low-end of the indicative **[REDACTED]** range as set out in this document. Assuming that the average cash burn rate going forward will be RMB7.8 million, similar to the cash burn rate level in 2025, based on the underlying assumptions that (i) it represents the most recent and operationally relevant data, reflecting

our latest business operations; (ii) our workforce growth will generally align with our business expansion, and (iii) prior to the completion of the **[REDACTED]**, no substantial capital investment or significant acquisition of fixed assets are expected, although such assumptions are subject to change due to various factors including but not limited to the business development, industry trend and customers' requirement, we estimate that our cash and cash equivalents and financial assets at FVTPL as of May 31, 2026 will be able to maintain our financial viability for approximately 13.2 months; or, if we take into account 10% of the estimated net **[REDACTED]** from the **[REDACTED]** (namely, the portion allocated for our working capital and other general corporate purposes), approximately **[REDACTED]** months; or, if we take into account 100% of the estimated net **[REDACTED]** from the **[REDACTED]**, approximately **[REDACTED]** months.

We have no concrete plan for future financing after the **[REDACTED]** for purpose of our commercialization plan as disclosed in this document taking into account our available cash, **[REDACTED]** from the **[REDACTED]** and based on our cash burn rate. However, with the continuing expansion of our business and development of our solutions or services, or if we discover suitable targets for acquisition or business collaboration, we could not exclude the possibility to require further funding through public or private equity **[REDACTED]**, debt financing and other sources. Solely on the basis that our cash and cash equivalents, financial assets at FVTPL and unutilized banking facilities as of the Latest Practicable Date will be able to maintain our financial viability for approximately 14.8 months assuming an average cash burn rate of RMB13.1 million, we expect to raise the next round of financing around October 2027. However, this timeline may be adjusted earlier if market conditions are favorable, or postponed, or potentially foregone if we achieve breakeven or profitability in the near future, contingent upon prevailing capital market conditions and our actual business operations and financial performance at that time. We will comply with applicable laws and regulations, including requirements under the Listing Rules, when we proceed with such financings.

Consolidated Statements of Cash Flow

The following table sets forth a summary of our cash flows for the periods indicated:

	Year ended December 31,			Four months ended April 30,	
	2023	2024	2025	2025	2026
	(RMB in thousands)				
Net cash flows used in operating activities	(120,123)	(27,184)	(86,656)	(2,781)	(64,531)
Net cash flows (used in)/from investing activities	(2,980)	(28,038)	(63,203)	(13,453)	38,200
Net cash flows from/(used in) financing activities	126,415	105,094	144,132	(11,471)	(517)
Net increase/(decrease) in cash and cash equivalents	**3,312**	**49,872**	**(5,727)**	**(27,705)**	**(26,848)**

	Year ended December 31,			Four months ended April 30,	
	2023	2024	2025	2025	2026
			(RMB in thousands)		
Cash and cash equivalents at beginning of year	30,129	33,454	83,358	83,358	77,140
Effect of foreign exchange rate changes, net	13	32	(491)	5	(606)
Cash and cash equivalents at end of year/period	**33,454**	**83,358**	**77,140**	**55,658**	**49,686**

Net Cash Used in Operating Activities

We had net operating cash outflows throughout the Track Record Period. However, we believe we are able to improve our operating cash flows position based on the following grounds:

- **Positive trend in inventory balance and inventory turnover days.** As of December 31, 2023, 2024 and 2025, the balance of our inventories was RMB110.5 million, RMB59.4 million and RMB63.6 million, respectively. Our inventory turnover days was 459.4 days, 261.2 days and 167.2 days, respectively, for the year of 2023, 2024 and 2025. These positive trends highlight the positive impact of our scaling operations on improving efficiency and managing liquidity.

- **Refined inventory management practices.** We are transitioning to a more demand-driven inventory model by aligning procurement with orders to reduce excess stock and establishing minimum safety stock levels by product category based on lead times and demand volatility.

- **Strengthen collections efforts.** We are establishing a dedicated collection team regularly monitors receivables, meets internally to review outstanding balances, and follow-ups with customers through multiple channels to remind them of upcoming payments. We are also refining our customer base to focus on those who consistently deliver sustainable growth, while applying more rigorous credit standards across both new and existing customers. We may also consider provide early payment incentives for customers who settle invoices ahead of schedule.

- **Supplier payment management.** We plan to engage with our suppliers to negotiate (i) extended payment terms where feasible, (ii) flexible payment approaches such as instalment payment or staggered payment schedules aligned with our cash inflow patterns, and (iii) early payment discounts where our cash position permits.

In the four months ended April 30, 2026, we had net cash flows used in operating activities of RMB64.5 million, as compared to loss before tax of RMB61.8 million. The principal items accounting for the difference were the adjustments of: (i) share-based payment compensation of RMB35.9 million; (ii) write-down of inventories to net realizable value of RMB7.9 million; (iii) impairment of financial assets and contract assets of RMB10.4 million; (iv) depreciation of right-of-use assets of RMB2.1 million; (v) depreciation of property, plant and equipment of RMB1.1 million; and (vi) foreign exchange losses of RMB1.8 million. The amount was further adjusted by changes in itemized balances of operating assets and liabilities, which primarily consisted of (i) an increase in inventories of RMB66.8 million, and (ii) an increase in prepayments, other receivables and other assets of RMB11.1 million, partially offset by (i) an increase in trade payables of RMB54.5 million, (ii) an increase in trade and bills receivables of RMB21.4 million, (iii) a decrease in contract assets of RMB2.4 million, and (iv) a decrease in other payables and accruals of RMB4.8 million.

In 2025, we had net cash flows used in operating activities of RMB86.7 million, as compared to loss before tax of RMB202.0 million. The principal items accounting for the difference were the adjustments of: share-based payment compensation of RMB147.2 million; impairment of financial assets and contract assets, net of RMB18.4 million and write-down of inventories to net realizable value of RMB14.5 million. The amount was further adjusted by changes in itemized balances of operating assets and liabilities, which primarily consisted of increase in trade payables of RMB25.7 million and increase in other payables and accruals of RMB14.0 million, partially offset by (i) increase in trade and bills receivables of RMB85.7 million, (ii) increase in inventories of RMB18.7 million, and (iii) increase in restricted bank deposits of RMB14.2 million.

In 2024, we had net cash flows used in operating activities of RMB27.2 million, as compared to loss before tax of RMB45.1 million. The principal items accounting for the difference were the adjustments of: (i) depreciation of property, plant and equipment expenses of RMB6.6 million; (ii) depreciation of right-of-use assets of RMB5.1 million; (iii) write-down of inventories to net realizable value of RMB19.1 million; (iv) impairment of financial assets and contract assets of RMB22.9 million; and (v) share-based payments of RMB5.9 million. The amount was further adjusted by changes in itemized balances of operating assets and liabilities, which primarily consisted of (i) decrease in inventories of RMB32.0 million, (ii) increase in trade and bills receivables of RMB63.3 million, (iii) increase in trade payables of RMB6.0 million, (iv) decrease in contract liabilities of RMB17.9 million, and (v) increase in provisions of RMB7.6 million.

In 2023, we had net cash flows used in operating activities of RMB120.1 million, as compared to loss before tax of RMB100.3 million. The principal items accounting for the difference were the adjustments of: (i) depreciation of property, plant and equipment expenses of RMB7.8 million; (ii) depreciation of right-of-use assets of RMB8.1 million; (iii) impairment of financial assets and contract assets of RMB14.7 million, (iv) write-down of inventories to net realizable value of RMB23.2 million; and (v) share-based payment compensation of RMB6.1 million. The amount was further adjusted by changes in itemized balances of operating assets and liabilities, which primarily consisted of (i) increase in inventories of RMB22.2 million, (ii) increase in trade receivables of RMB36.7 million, (iii) decrease in trade payables of RMB19.3 million, and (iv) decrease in contract liabilities of RMB10.2 million.

Net Cash Flows Used in/from Investing Activities

In the four months ended April 30, 2026, our net cash flows from investing activities were RMB38.2 million, which was primarily attributable to proceeds from redemption of wealth management products of RMB50.3 million, partially offset by (i) the purchase of wealth management products of RMB10.0 million and (ii) the purchase of items of property, plant and equipment of RMB2.0 million.

In 2025, our net cash flows used in investing activities were RMB63.2 million, which was primarily attributable to purchase of wealth management products of RMB300.0 million, partially offset by the proceeds from redemption of wealth management products of RMB237.9 million.

In 2024, our net cash flows used in investing activities were RMB28.0 million, which was primarily attributable to (i) the purchase of certificate of deposits of RMB10.0 million, (ii) the purchases of wealth management products of RMB17.0 million, and (iii) the purchase of time deposits of RMB1.0 million.

In 2023, our net cash flows used in investing activities were RMB3.0 million, which was attributable to the purchase of items of property, plant and equipment of RMB4.7 million, and offset by (i) proceeds from redemption of wealth management products of RMB1.1 million and (ii) proceeds from disposal of items of property, plant and equipment of RMB0.6 million.

Net Cash Flows Used in Financing Activities

In the four months ended April 30, 2026, our net cash flows from financing activities were RMB0.5 million, attributable to (i) payment for **[REDACTED]** expenses of RMB0.5 million, and (ii) principal payments of lease liabilities of RMB1.7 million, offset by capital contribution by shareholders of RMB1.7 million.

In 2025, our net cash flows from financing activities were RMB144.1 million, attributable to the issuance of shares of RMB200 million, partially offset by repayment of bank loans of RMB51.9 million.

In 2024, our net cash flows from financing activities were RMB105.1 million, attributable to (i) new bank borrowings of RMB68.0 million and (ii) capital contribution of RMB94.9 million, and partially offset by (i) repayment of bank loans of RMB50.2 million, (ii) principal payments of lease liabilities of RMB5.5 million, and (iii) interest paid of RMB1.4 million.

In 2023, our net cash flows from financing activities were RMB126.4 million, attributable to (i) new bank borrowings of RMB45.0 million and (ii) capital contribution of RMB179.2 million, and offset by (i) repayment of bank loans of RMB79.7 million, (ii) principal payments of lease liabilities of RMB8.6 million, (iii) interest paid of RMB2.4 million and (iv) cash-settled share based payments of RMB7.1 million.

CASH OPERATING COSTS

The following table sets forth key information relating to our cash operating costs for the periods indicated:

	Year ended December 31,		
	2023	2024	2025
		(RMB in thousands)	
Direct production costs, including materials[(1)]	98,008	148,402	159,238
Workforce employment[(2)]	90,341	82,963	93,235
Product marketing[(3)]	21,300	30,307	79,896
R&D costs[(4)]	15,198	8,270	41,251
Non-income taxes and other charge	4,062	12,766	14,048
Contingency allowances	—	—	—
Total	**228,909**	**282,708**	**387,668**

Notes:

(1) Represents the costs of sales (excluding employee benefit expenses and non-cash items under contract fulfillment costs) adjusted by changes in working capital relating to production as of the previous and current year end.

(2) Represent the sum of employee compensation and benefits expenses under costs of sales, R&D expenses, administrative expenses, and selling and marketing expenses (excluding equity-settled share-based payments expenses) adjusted by changes in working capital relating to employee compensation and benefit expenses as of previous and current year end under the costs of sales and operating expenses.

(3) Represents the selling and marketing expenses (excluding employee compensation and benefits and non-cash items under selling and distribution expenses) adjusted by changes in working capital relating to sales and marketing activities as of the previous and current year end.

(4) Represents R&D expenses (excluding employee compensation and benefit expenses and non-cash items under R&D expenses) adjusted by changes in working capital relating to R&D activities as of the previous and current year end.

INDEBTEDNESS

As of December 31, 2023, 2024 and 2025 and April 30 and May 31, 2026, our indebtedness included lease liabilities and interest-bearing bank borrowings. The following table sets forth the breakdown of our indebtedness as of the dates indicated:

	As of December 31,			As of April 30,	As of May 31,
	2023	2024	2025	2026	
			(RMB in thousands)		
					(unaudited)
Current:					
Lease liabilities	4,565	4,286	2,908	6,971	6,806
Interest-bearing bank and other borrowings	25,028	42,881	—	—	—
Non-current:					
Lease liabilities	—	5,809	2,901	7,249	6,725
Total	**29,593**	**52,976**	**5,809**	**14,220**	**13,351**

Lease Liabilities

As of December 31, 2023, 2024 and 2025 and April 30, 2026, our total lease liabilities (including current and non-current portions) amounted to RMB4.6 million, RMB10.1 million, RMB5.8 million and RMB14.2 million, respectively.

Our total lease liabilities increased from RMB4.6 million as of December 31, 2023 to RMB10.1 million as of December 31, 2024, primarily due to renewal of existing leases. Our total lease liabilities decreased from RMB10.1 million as of December 31, 2024 to RMB5.8 million as of December 31, 2025, primarily due to lease payment made during the period. Our total lease liabilities increased to RMB14.2 million as of April 30, 2026, primarily because we entered into new lease contracts for our new Wuxi factory and the expansion of office area in Shenzhen.

Interest-Bearing Bank and Other Borrowings

As of December 31, 2023, 2024 and 2025 and April 30, 2026, our interest-bearing bank loans amounted to RMB25.0 million, RMB42.9 million, nil and nil, respectively. We did not have any unutilized banking facilities as of April 30, 2026, and had an amount of RMB80.0 million of unutilized banking facilities as of the Latest Practicable Date. During the Track Record Period, Mr. Wang provided guarantees over certain loans for the benefit of our Group which were applied in our ordinary course of business. As of December 31, 2025, these bank loans had been fully repaid and such guarantee had been released.

Our interest-bearing bank loans increased by 71.6% from RMB25.0 million as of December 31, 2023 to RMB42.9 million as of December 31, 2024, primarily driven by the need to support business development, which led to the incurring of additional bank borrowings. Our interest-bearing bank loans decreased from RMB42.9 million as of December 31, 2024 to nil as of December 31, 2025, primarily because we repaid the bank loans and borrowings after our equity financing in 2025.

No Other Outstanding Indebtedness

Our Directors confirm that as of the Latest Practicable Date, there was no material covenant on any of our outstanding debt and that we did not experience any difficulty in obtaining bank loans and other borrowings, material default in payment of trade and non-trade payables, bank loans and other borrowings or breach of covenants during the Track Record Period and up to the date of this document.

Except as disclosed above, as of May 31, 2026, being the most recent practicable date for determining our indebtedness, we did not have any outstanding mortgages, charges, debentures, other issued debt capital, bank overdrafts, borrowings, liabilities under acceptance or other similar indebtedness, hire purchase commitments, guarantees or other material contingent liabilities. Our Directors have confirmed that there has been no material change in our indebtedness from May 31, 2026 to the date of this document.

CONTINGENT LIABILITIES

As of December 31, 2023, 2024 and 2025 and April 30, 2026, we did not have any material contingent liability, guarantee or any litigation or claim of material importance, pending or threatened against us or any member of our Group that is likely to have a material and adverse effect on our business, financial condition and result of operations.

R&D EXPENDITURE AND TOTAL OPERATING EXPENDITURE

In 2023, 2024 and 2025 our R&D expenditure is consistent with our R&D expenses and we did not capitalize any R&D expenses. The following table sets forth our annual and total R&D expenditure for the periods indicated:

	Year ended December 31,		
	2023	2024	2025
	(RMB in thousands)		
Annual R&D expenditure	56,098	36,611	76,729
Total R&D expenditure for the three financial years prior to [REDACTED]			**169,438**

The following table sets forth our annual and total operating expenditure for the periods indicated:

	Year ended December 31,		
	2023	2024	2025
	(RMB in thousands)		
R&D expenses	56,098	36,611	76,729
Selling and marketing expenses	57,358	64,595	114,203
Administrative expenses	25,466	23,575	114,695
Annual operating expenditure	**138,922**	**124,781**	**305,627**
Total operating expenditure for the three financial years prior to [REDACTED]			**569,330**

The following table sets forth our annual R&D expenditure ratio and total R&D expenditure ratio for the periods indicated:

	Year ended December 31,		
	2023	2024	2025
Annual R&D expenditure ratio[(1)]	**40.4%**	**29.3%**	**25.1%**
Total R&D expenditure ratio[(2)]			**29.8%**

Notes:

(1) Calculated by dividing annual R&D expenditure by annual total operating expenditure.

(2) Calculated by dividing total R&D expenditure for the three financial years prior to **[REDACTED]** by total operating expenditure for the three financial years prior to **[REDACTED]**.

CAPITAL EXPENDITURES AND COMMITMENTS

The table below sets forth the breakdown of our capital expenditure for the periods indicated:

	Year ended December 31,			Four months ended April 30,
	2023	2024	2025	2026
	(RMB in thousands)			
Purchase of property, plant and equipment	4,739	896	2,066	1,992
Purchase of intangible assets	—	—	33	62
Total	**4,739**	**896**	**2,099**	**2,054**

Following the **[REDACTED]**, we will continue to incur capital expenditure to grow our business. We plan to fund our planned capital expenditure primarily with cash flows generated from our operations, bank borrowings, and the net **[REDACTED]** received from the **[REDACTED]**. See "Future Plans and Use of **[REDACTED]**". We may adjust our capital expenditure for any given year according to our development plans or in light of market conditions and other factors we believe to be appropriate.

As of December 31, 2023, 2024 and 2025 and April 30, 2026, our capital commitments were RMB0.6 million, RMB0.1 million, RMB0.1 million and RMB1.4 million, respectively, which comprised of purchases of items of property, plant and equipment that had been contracted but not provided for.

KEY FINANCIAL RATIOS

The following table sets forth our key financial ratios for the periods indicated:

	As of/For the year ended December 31,			As of/For the four months ended April 30,	
	2023	2024	2025	2025	2026
Gross profit margin[(1)]	31.6%	38.8%	40.5%	44.7%	44.5%
Net loss margin[(2)]	(61.9)%	(18.0)%	(67.0)%	(125.3%)	(57.8%)
Current ratio[(3)]	1.5	1.7	2.7	1.6	2.2
Quick ratio[(4)]	0.7	1.4	2.3	1.1	1.6
Gearing ratio[(5)]	0.3	0.4	0.0	0.4	0.1

Notes:

(1) Calculated by dividing gross profit by revenue for the period multiplied by 100%.

(2) Calculated by dividing net loss by revenue for the period multiplied by 100%.

(3) Calculated by dividing total current assets by total current liabilities as of the end of the period.

(4) Calculated by dividing total current assets minus inventory by total current liabilities as of the end of the period.

(5) Calculated by dividing total interest-bearing bank and other borrowings and lease liabilities divided by total equity as of the end of the period.

RELATED PARTY TRANSACTIONS

We enter into transactions with our related parties from time to time. For details of our related party transactions, see Note 36 to the Accountants' Report included in Appendix I to this document.

Our Directors are of the view that each of the related party transactions set out in Note 36 to the Accountants' Report included in Appendix I to this document was conducted in the ordinary course of business on an arm's length basis and with normal commercial terms between the relevant parties. Our Directors are also of the view that our related party transactions during the Track Record Period would not distort our track record results or cause our historical results to become non-reflective of our future performance.

OFF-BALANCE SHEET COMMITMENTS AND ARRANGEMENTS

As of the Latest Practicable Date, we had not entered into any off-balance sheet arrangements. We also have not entered into any financial guarantees or other commitments to guarantee the payment obligations of third parties. In addition, we have not entered into any derivative contracts that are indexed to our equity interests and classified as owners' equity. Furthermore, we do not have any retained or contingent interest in assets transferred to an unconsolidated entity that serves as credit, liquidity or market risk support to such entity. We do not have any variable interest in any unconsolidated entity that provides financing, liquidity, market risk or credit support to us or that engages in leasing, hedging or R&D services with us.

FINANCIAL RISKS DISCLOSURE

Our principal financial instruments comprise cash and cash equivalents, restricted cash and financial assets at FVTPL. The main purpose of these financial instruments is to raise finance for our operations. We have various other financial assets and liabilities such as trade and bills receivables and trade payables, which arise directly from our operations. See Note 40 of the Accountants' Report in Appendix I to this document.

The main risks arising from our financial instruments are foreign currency risk, credit risk and liquidity risk. Our Board of Directors reviews and agrees policies for managing each of these risks. For details of our risk exposure and sensitivity analysis, see note 40 to "Appendix I — Accountants' Report."

DIVIDENDS

During the Track Record Period, no dividend has been paid or declared by our Company. Any declaration and payment, as well as the amount of dividends, will be subject to our Articles of Association and the relevant PRC laws. We currently do not have any dividend policy or fixed dividend pay-out ratio. As confirmed by the PRC Legal Advisor, according to relevant PRC laws, when a company distributes its after-tax profit for the current year, 10% of the profit shall be accrued and included in the company's statutory reserve. Such accrual is no longer required when the accumulated amount of the company's statutory reserve is 50% or more of the company's registered capital. Where the accumulative amount of the company's statutory reserve is not enough to make up for the losses of the previous year, the current year's profits shall first be used to make up for the losses before the statutory reserve is accrued. We will, therefore, only be able to declare dividends after: (i) all our historically accumulated losses have been made up for; and (ii) we have allocated sufficient net profit to our statutory common reserve fund as described above.

DISTRIBUTABLE RESERVES

As of April 30, 2026, we had no distributable reserves.

[REDACTED] EXPENSES

[REDACTED] expenses represent professional fees, **[REDACTED]** and other fees incurred in connection with the **[REDACTED]**. We estimate that our **[REDACTED]** expenses will be approximately HK$**[REDACTED]** (assuming an **[REDACTED]** of HK$**[REDACTED]** per **[REDACTED]** (being the mid-point of the indicative **[REDACTED]** range) and no exercise of the **[REDACTED]**), representing **[REDACTED]** of the gross **[REDACTED]** (based on the mid-point of our indicative price range for the **[REDACTED]** and assuming that the **[REDACTED]** is not exercised) of the **[REDACTED]**. During the Track Record Period, an amount of HK$**[REDACTED]** and HK$**[REDACTED]** for the **[REDACTED]** expenses has been expensed through the statement of profit or loss in 2025 and the four months ended April 30, 2026, respectively, and no **[REDACTED]** expenses has been incurred for the two years ended December 31, 2024. We expect the remaining estimated amount of HK$**[REDACTED]** is expected to be recognized in the consolidated statements of profit or loss as administrative expenses and HK$**[REDACTED]** is expected to be recognized as a deduction in equity directly upon the **[REDACTED]**. By nature, our **[REDACTED]** expenses are composed of (i) **[REDACTED]** of HK$**[REDACTED]**, and (ii) **[REDACTED]** related expenses of HK$**[REDACTED]**, which consist of fees and expenses of legal advisors and Reporting Accountants of HK$**[REDACTED]** and other fees and expenses of HK$**[REDACTED]**.

UNAUDITED [REDACTED] ADJUSTED CONSOLIDATED NET TANGIBLE ASSETS

See "Appendix II — Unaudited **[REDACTED]** Financial Information."

NO MATERIAL ADVERSE CHANGE

Our Directors have confirmed that up to the date of this document there has been no material adverse change in our financial or **[REDACTED]** position or prospects since April 30, 2026, being the end date of the periods reported in Appendix I to this document, and there is no event since April 30, 2026 that would materially affect the information as set out in the Accountants" Report in Appendix I to this document.

DISCLOSURE REQUIRED UNDER THE LISTING RULES

Our Directors confirm that, as of the Latest Practicable Date, there was no circumstance that would give rise to a disclosure requirement under Rules 13.13 to 13.19 of the Listing Rules.

RELATIONSHIP WITH OUR CONTROLLING SHAREHOLDERS

OVERVIEW

On April 1, 2025, Mr. Wang and Mr. Li, our executive Director and Chief Technology Officer, entered into the Acting-in-Concert Agreement (in replacement of the acting-in-concert agreement dated September 26, 2018) to confirm that they have acted in concert when addressing matters pertaining to the operational development of the Group and those requiring resolutions by a Shareholders' meeting. For details, see "History and Corporate Structure — Acting-in-Concert Arrangement" of this Document. As of the Latest Practicable Date, (a) Mr. Wang was able to exercise 27.10% of voting rights in our Company through (i) 28,294,560 (assuming the completion of the Share Subdivision) Shares directly owned by him, and (ii) 31,612,950 (assuming the completion of the Share Subdivision) Shares indirectly owned by him through Standard Automation, which is controlled by Mr. Wang as general partner; and (b) Mr. Li was able to exercise 3.80% of voting rights in our Company through 8,410,820 (assuming the completion of the Share Subdivision) Shares directly owned by him. By virtue of the Acting-in-Concert Agreement, Mr. Wang, Standard Automation and Mr. Li will together be interested in and control 30.90% of voting rights in our Company. Further, pursuant to the Voting Proxy Agreement, Mr. Wang is entitled to the voting rights of approximately of 6,516,020, 1,547,370 and 2,000,000 Shares of Shares (taking into account the Share Subdivision) held by Golden Summer Holding Limited, Shenzhen Hongze Intelligent Manufacturing Investment Partnership (Limited Partnership) (深圳鴻澤智造投資合夥企業(有限合夥)) and Zhuhai Shengyinjing Investment Enterprise (Limited Partnership) (珠海盛銀璟投資合夥企業(有限合夥)) respectively in our Company, representing **[REDACTED]**%, **[REDACTED]**% and **[REDACTED]**% of the voting rights, respectively, in our Company upon **[REDACTED]**. For details, see "History and Corporate Structure — Voting Proxy Arrangement". Immediately upon completion of the **[REDACTED]** (assuming the **[REDACTED]** is not exercised), they will be entitled to exercise approximately **[REDACTED]**% of voting rights in our Company and will constitute our Controlling Shareholders under the Listing Rules upon **[REDACTED]**. Standard Automation is a share incentive platform of our Company.

For background and biographical details of Mr. Wang and Mr. Li, see "Directors and Senior Management" in this Document.

INDEPENDENCE FROM OUR CONTROLLING SHAREHOLDERS

Management Independence

Our business is primarily managed and conducted by our Board and senior management. Upon the completion of the **[REDACTED]**, our Board will comprise of three executive Directors, one non-executive Director and three independent non-executive Directors. See "Directors and Senior Management" for more information.

Our Directors believe that our Board and senior management is able to manage our business and function independently from our Controlling Shareholders based on the following reasons:

(1) each of our Directors is aware of his/her fiduciary duties as a Director of our Company which require, among other things, that he/she acts for the benefit and in the best interests of our Company and does not allow any conflict between his/her duties as a Director and his/her personal interest;

(2) in the event that there is a potential conflict of interest arising out of any transaction to be entered into between our Group and our Directors or their respective associates, the interested Directors shall abstain from voting at the relevant board meetings of our Company in respect of such transactions and shall not be counted in the quorum;

(3) we have three independent non-executive Directors, who have extensive experience in different areas and have been appointed to ensure that the decisions of our Board are made after due consideration of independent and impartial opinions. Certain matters of our Company must always be referred to the independent non-executive Directors for review in accordance with the Listing Rules, the applicable laws and our Articles of Association and internal policies;

(4) our daily management and operations are carried out by our senior management team. Except Mr. Wang and Mr. Li, our senior management team members are independent from our Controlling Shareholders, all of whom have substantial experience in the industry in which our Company is engaged, and will therefore be able to make business decisions that are in the best interest of our Group; and

(5) we have adopted a series of corporate governance measures to manage conflicts of interest, if any, between our Group and our Controlling Shareholders which would support our independent management. See "— Corporate Governance."

Operation Independence

We have established our own organizational structure comprised of individual departments, each with specific areas of responsibilities. We have also established various internal controls procedures to facilitate the effective operation of our business. Our Group is not operationally dependent on our Controlling Shareholders. Our Company (through our subsidiaries) holds or enjoys the benefit of all relevant licenses and owns all relevant intellectual property and R&D facilities necessary to carry on our business. We have sufficient capital, facilities, equipment and employees to operate our business independently from our Controlling Shareholders. We also have independent access to our customers and suppliers.

Based on the above, our Directors believe that we are capable of carrying on our business independently of our Controlling Shareholders and their close associates.

Financial Independence

We have an independent financial system. Our Group's accounting and finance functions are independent of our Controlling Shareholders and their close associates. Our Group makes financial decisions according to our own business needs. Our Group's major finance operations are handled by our financial management department, which operates independently from our Controlling Shareholders and their close associates. We do not share any other functions or resources with any of our Controlling Shareholders or their close associates.

During the Track Record Period, we primarily financed our business operations through cash generated from our business activities and equity financing activities. As of the Latest Practicable Date, we did not have any outstanding borrowings from our Controlling Shareholders or any of their respective close associates.

During the Track Record Period, Mr. Wang provided guarantees over certain loans for the benefit of our Group which were applied in our ordinary course of business. As of the Latest Practicable Date, such loans had been fully repaid, and the aforementioned guarantees had been discharged. Our Directors are of the view that we are financially independent of our Controlling Shareholders and/or their close associates for the following reasons:

(1) the guarantee provided by Mr. Wang had been discharged; and

(2) we have an independent financial system and make financial decisions according to our Group's own business needs independently. We have internal control and accounting systems and a finance department which can make financial decisions independently. None of our Controlling Shareholders and/or their close associates interferes with our use of funds. We have also established an Audit Committee in compliance with Rule 3.21 of the Listing Rules.

Based on the above, our Directors are of the view that we are capable of carrying on our business independently of, and do not place undue reliance on, our Controlling Shareholders and their respective close associates after the **[REDACTED]**. Based on the above, our Directors believe that our Group is able to operate with financial independence from our Controlling Shareholders and their close associates.

CORPORATE GOVERNANCE

We have put in place sufficient corporate governance measures to manage the conflict of interest and potential competition from our Controlling Shareholders and safeguard the interest of our Shareholders, including:

(1) where a Shareholders' meeting is to be held for considering proposed transactions in which our Controlling Shareholders or any of their close associates has a material interest, our Controlling Shareholders will not vote on the resolutions and shall not be counted in the quorum in the voting;

(2) our Company has established internal control mechanism to identify connected transactions. After the **[REDACTED]**, our Company will comply with the requirements in connection with connected transactions under the Listing Rules;

(3) where our Directors reasonably request the advice of independent professionals, such as independent financial advisors, the appointment of such independent professional will be made at our Company's expense;

(4) we have appointed Somerley Capital Limited as our compliance advisor to provide advice and guidance to us in respect of compliance with the applicable laws and regulations, as well as the Listing Rules, including various requirements relating to corporate governance;

(5) we have established the audit committee, remuneration committee and nomination committee with written terms of reference in compliance with the Listing Rules and the Corporate Governance Code;

(6) our Controlling Shareholders will confirm the status of their non-competing interest on an annual basis and to provide all information necessary, including all relevant financial, operational and market information and any other necessary information as required by our Company; and

(7) our Company will disclose decisions (with basis), if any, on matters reviewed by the independent non-executive Directors either in its annual report or by way of announcements.

Our Directors consider that the above corporate governance measures are sufficient to manage any potential conflict of interests between our Controlling Shareholders and their respective close associates and our Group and to protect the interests of our Shareholders, in particular, the minority Shareholders.

OVERVIEW

Upon the **[REDACTED]**, the Board will consist of seven Directors, including three executive Directors, one non-executive Director and three independent non-executive Directors. The Board is responsible, and has general authority for, the management and operation of the Company. Our Directors are appointed for a term of three years and are eligible for re-election upon expiry of their term of office.

Our senior management is responsible for the day-to-day operations of the Company.

All of the Directors and senior management have met the qualification requirements under the relevant PRC laws and regulations and the Listing Rules for their respective positions.

BOARD OF DIRECTORS

The following table sets forth certain information regarding the members of our Board.

Name	Age	Position	Date of joining our Group	Date of appointment as a Director	Responsibility	Relationship with other Directors and senior management
Executive Directors						
Mr. Wang Yongkun (王永錕)	33	Executive Director, Chairman of the Board, Chief Executive Officer	June 2016	March 2018	Responsible for overall strategic planning and operational decisions	N/A
Mr. Li Hongxiang (李洪祥)	33	Executive Director, Chief Technology Officer	June 2016	January 2019	Responsible for product R&D management	N/A
Mr. Wang Jinpeng (王金鹏)	36	Executive Director, Chief Operating Officer	April 2017	August 2020	Responsible for domestic and overseas marketing, sales and customer operation	N/A
Non-executive Director						
Mr. Wei Xiaoan (衛曉安)	48	Non-Executive Director	October 2021	October 2021	Responsible for providing guidance on overall strategic planning, corporate governance and business direction of our Group	N/A
Independent non-executive Directors						
Dr. Zang Yunzhi (臧蘊智)	45	Independent non-executive Director	May 2025	May 2025	Responsible for providing independent opinion and judgment to the Board	N/A
Mr. Sun Wei Yung Kevin (孫偉勇). . . .	53	Independent non-executive Director	May 2025	May 2025	Responsible for providing independent opinion and judgment to the Board	N/A
Dr. Fan Zhiyong (范智勇)	49	Independent non-executive Director	May 2025	May 2025	Responsible for providing independent opinion and judgment to the Board	N/A

Executive Directors

Mr. Wang Yongkun (王永錕), aged 33, is our founder, executive Director, chairman of the Board and Chief Executive Officer mainly responsible for the Company's overall strategic planning and operational decisions.

Mr. Wang joined our Group as our Chief Technology Officer in June 2016, and has served as the executive Director, chairman of the Board and Chief Executive Officer of our Company since March 2018.

Mr. Wang obtained his bachelor's degree in automation, and master's degree in control engineering, from Harbin Institute of Technology (哈爾濱工業大學) in the PRC in July 2013 and July 2015, respectively.

Mr. Li Hongxiang (李洪祥), aged 33, is our co-founder, executive Director and Chief Technology Officer mainly responsible for the Company's product research and development management since he joined our Group as our head of research and development department in June 2016.

Prior to joining our Group, Mr. Li obtained his bachelor's degree in computer science and engineering (計算機科學與技術) from Harbin Institute of Technology (哈爾濱工業大學) in the PRC in June 2014.

Mr. Wang Jinpeng (王金鵬), aged 36, is our executive Director and Chief Operating Officer mainly responsible for the Company's domestic and overseas marketing, sales and customer operation.

Prior to joining our Group, Mr. Wang obtained his bachelor's degree in mechanical design, manufacturing and automation (機械設計製造及其自動化), and his master's degree in software engineering (軟件工程), from Harbin Institute of Technology (哈爾濱工業大學) in the PRC in July 2012 and October 2014, respectively. He obtained his master's degree in computer science and technology from Blaise Pascal University (Clermont-Ferrand II) in France in January 2015. Mr. Wang further pursued his doctorate degree in computer vision and machine learning from University of Birmingham in the United Kingdom from December 2014 to December 2016.

Non-executive Director

Mr. Wei Xiao'an (衛曉安), aged 48, is our non-executive Director mainly responsible for the Company's guidance on overall strategic planning, corporate governance and business direction of our Group.

Mr. Wei has served as the partner of Beijing Bohua Capital Co., Ltd. (北京博華資本有限公司) from September 2017. From June 2015 to September 2017, Mr. Wei served as Managing Director at Jiantou Investment Co., Ltd. (建投投資有限公司) and Jiantou Huawen Investment Co., Ltd. (建投華文投資有限公司). From May 2004 to March 2015, Mr. Wei served at Beijing Hony Investment Advisory Co., Ltd. (北京弘毅投資顧問有限公司) and Beijing Hony Horizon Investment Advisory Co., Ltd. (北京弘毅遠方投資顧問有限公司).

Mr. Wei has obtained the Fund Practitioner Qualification from Asset Management Association of China (中國證券投資基金業協會) in January 2018.

Mr. Wei obtained his bachelor's degree in international finance from University of International Business and Economics (對外經濟貿易大學) in the PRC in July 1999. He obtained his Master of Business Administration from Rotterdam School of Management in Netherlands in March 2003.

Independent Non-executive Directors

Dr. Zang Yunzhi (臧蘊智), aged 45, is our independent non-executive Director mainly responsible for providing independent opinion and judgment to the Board.

Since September 2024, Dr. Zang has been appointed as the co-director of the Center for Securities Analysis with Financial Technology at the Hong Kong University of Science and Technology. Dr. Zang has also served as an associate professor at the department of accounting in the Hong Kong University of Science and Technology since July 2015. Dr. Zang served as an assistant professor at the department of accounting in the Hong Kong University of Science and Technology from July 2009 to July 2015, and as an assistant professor at the Simon School of Business, University of Rochester from July 2006 to June 2009.

Dr. Zang has been an independent non-executive director of China East Education Holdings Limited (中國東方教育控股有限公司), a company listed on the Stock Exchange (stock code: 667) since May 2021, SEM Holdings Limited (澳達控股有限公司), a company listed on the Stock Exchange (stock code: 9929), since January 2026, and Poly Property Group Co., Limited (保利置業集團有限公司), a company listed on the Stock Exchange (stock code: 119), since May 2026.

Dr. Zang obtained her bachelor's degree in accounting from Tsinghua University in July 2001 and a Ph.D. degree in business administration from Duke University in December 2006. Dr. Zang is a member of American Accounting Association, a member of American Finance Association and a member of CPA Australia. Dr. Zang has extensive experience in accounting and teaching. She has held positions at the editorial boards of *The Accounting Review (TAR)* since 2017 and is currently an editorial member of *Contemporary Accounting Research (CAR)*. Dr. Zang had passed all exams at the Certified General Accountants Association of Canada in 2001.

During her experience at the department of accounting in the Hong Kong University of Science and Technology, she has undertaken teaching and research in various accounting topics such as analysis and interpretation of financial statements, financial reporting quality, corporate disclosure and governance, and the design and evaluation of internal control and risk management frameworks. Her publications include "Evidence on the Trade-off Between Real Activities Manipulation and Accrual-Based Earnings Management" and "Evidence on the Information Content of Text in Analyst Reports" both published in *The Accounting Review* by the American Accounting Association and "An Unintended Benefit of Risk Factor Mandate of 2005" published in Review of Accounting Studies. As an independent non-executive director and an audit committee member of China East Education Holdings Limited, Dr. Zang's responsibilities include participating in the board's oversight of financial reporting and internal control, reviewing and analyzing the company's annual and interim financial statements and related management discussion and analysis, engaging with management and external auditors on significant accounting policies and estimates, and considering matters including risk assessment and internal control recommendations. Considering Dr. Zang's education, teaching, research and publication experience, as well as her experience with internal controls, preparing or auditing comparable financial statements, and reviewing and analyzing audited financial statements of public companies, Dr. Zang has the appropriate professional qualifications, accounting and related financial management experience as required under Rule 3.10 of the Listing Rules.

Mr. Sun Wei Yung Kevin (孫偉勇), aged 53, is our independent non-executive Director mainly responsible for providing independent opinion and judgment to the Board.

Mr. Sun has over 30 years of experience in the travel and hospitality industry. During 2009 to 2021, Mr. Sun established and acted as a director of Prolink Development Limited. From 1999 to 2008, Mr. Sun served as the associate director of customer services, leasing manager, director of development and vice president of consulting services in the business units of, Hyatt Regency Hong Kong, a subsidiary of Associated International Hotels Limited (stock code: 0105), Beijing Oriental Plaza CO., Ltd., belongs to CK Asset Holdings Limited (stock code: 1113), and Macro Polo Hotels, a subsidiary of the Wharf (Holdings) Limited (stock code: 0004), which are companies listed on the Stock Exchange, and HVS Global Hospitality Services. From 1995 to 1999, Mr. Sun worked on the hotel project developments at Champion Hotel Management Company Limited.

Mr. Sun has been an independent non-executive director of SY Holdings Group Limited (盛業控股集團有限公司), a company listed on the Stock Exchange (stock code: 6069.HK) since October 2024.

Mr. Sun received his bachelor of science degree from the Cornell University School of Hotel Administration in 1994. Mr. Sun has been active in public service for many years. Currently, Mr. Sun is serving as the Hong Kong deputy to the 14th National People's Congress of the PRC.

Dr. Fan Zhiyong (范智勇), aged 49, is our independent non-executive Director mainly responsible for providing independent opinions and judgment to the Board.

Dr. Fan has been a faculty member at the department of electronic and computer engineering at HKUST since May 2010. He started his career as an Assistant Professor and was promoted to Associate Professor in 2016 and then to Professor in 2019. In July of 2023, he was promoted to Chair Professor. Prior to joining HKUST, he was a postdoctoral scholar employee in the Department of Electrical Engineering and Computer Sciences at the University of California, Berkeley from February 2007 to April 2010.

Dr. Fan earned his bachelor's and master's degrees in Physics Electronics from Fudan University in July of 1998 and 2001. And he obtained his Ph.D. in Interdisciplinary Materials Science from the University of California, Irvine in December 2006.

SENIOR MANAGEMENT

Mr. Wang Yongkun (王永錕) is our Chief Executive Officer. For details of his biography, see "— Board of Directors" in this section.

Mr. Li Hongxiang (李洪祥) is our Chief Technology Officer. For details of his biography, see "— Board of Directors" in this section.

Mr. Wang Jinpeng (王金鵬) is our Chief Operating Officer. For details of his biography, see "— Board of Directors" in this section.

Mr. Yuan Caiwen (袁才文), aged 40, has joined our Group since March 2017 and is our Chief Financial Officer mainly responsible for the Company's management of financial operations.

Before joining our Group, Mr. Yuan served as the vice manager of the financial management office in Shenzhen Taiping Investment Co., Ltd. (深圳太平投資有限公司) from May 2016 to March 2017. From January 2015 to May 2016, he served as the audit supervisor at the audit department in Fangda Group Co., Ltd. (方大集團股份有限公司). Prior to that, Mr. Yuan was a senior audit manager in Zhongzheng Tiantong Accounting Firm (Special General Partnership) (中證天通會計師事務所(特殊普通合夥)) from July 2007 to November 2014.

Mr. Yuan obtained his bachelor's degree in accounting from Beijing Forestry University (北京林業大學) in the PRC in July 2007.

Ms. Ling Qian (凌倩), aged 33, joined our Group in June 2025 as our vice president, Board secretary and one of our joint company secretaries, mainly responsible for our Group's capital markets matters, investor relations and corporate governance related matters.

Before joining our Group, Ms. Ling worked at several investment banks specialized in private equity financings, mergers and acquisitions, restructurings, and capital markets. From June 2018 to June 2025, she served at the investment banking department of China International Capital Corporation Limited (中國國際金融股份有限公司) with last position as vice president. Prior to that, she worked at the investment banking department of CITIC Securities Company Limited (中信證券股份有限公司) from July 2016 to June 2018.

Ms. Ling graduated with a bachelor's degree in economics and management from the Southwestern University of Finance and Economics in June 2013. She subsequently obtained a master's degree in financial engineering from the National University of Singapore in June 2016 and a master's degree in management from the Peking University in July 2016.

Save as disclosed above and "5. Other Information — 5.5 Other information about our Directors" in Appendix VI of this document, each of our Directors and senior management members confirms with respect to himself or herself that (1) he or she had no other relationship with any Director, senior management or substantial Shareholder of our Company as at the Latest Practicable Date; (2) he or she did not hold any other directorships in the three years prior to the Latest Practicable Date in any public companies of which the securities are listed on any stock exchange in Hong Kong and/or overseas; and (3) there are no other matters concerning our Directors' appointment that need to be brought to the attention of our Shareholders and the Stock Exchange or shall be disclosed pursuant to Rule 13.51(2)(h) to (v) of the Listing Rules.

JOINT COMPANY SECRETARIES

Ms. Ling Qian (凌倩) was appointed as a joint company secretary of our Company with effect from June 2025. For details of her biography, please refer to "— Senior Management" in this section.

Ms. Li Ching Yi (李菁怡), was appointed as a joint company secretary of our Company with effect from June 2025.

Ms. Li is a senior manager of the Listed & Fiduciary Corporate Services Department of Trident Corporate Services (Asia) Ltd., a global professional services firm. She has over 9 years of professional experience in company secretarial field.

She is currently serving as the company secretary of Yadong Group Holdings Limited (stock code: 1795.HK), a joint company secretary of Yidu Tech Inc. (stock code: 2158.HK), Pop Mart International Group Limited (stock code: 9992.HK), Acotec Scientific Holdings Limited (stock code: 6669.HK), 3D Medicines Inc. (stock code: 1244.HK), Sipai Health Technology Co., Ltd. (stock code: 0314.HK) and Laopu Gold Co., Ltd. (stock code: 6181.HK), respectively. All of these companies are listed on the Stock Exchange.

Ms. Li is an associate member of The Chartered Governance Institute (formerly known as The Institute of Chartered Secretaries and Administrators) in the United Kingdom and The Hong Kong Chartered Governance Institute (formerly known as The Hong Kong Institute of Chartered Secretaries). Ms. Li obtained a bachelor's degree in social sciences in October 2011 from Lingnan University in Hong Kong and a master's degree in professional accounting and corporate governance in July 2015 from City University of Hong Kong.

BOARD COMMITTEES

The Company has established three committees under the Board of Directors, namely the Audit Committee, the Remuneration Committee and the Nomination Committee.

Audit Committee

The Audit Committee consists of three Directors, namely Dr. Zang Yunzhi, Mr. Sun Wei Yung Kevin and Dr. Fan Zhiyong, with Dr. Zang Yunzhi currently serving as the chairperson. Dr. Zang Yunzhi has the appropriate professional qualification and experiences as required under Rules 3.10(2) and 3.21 of the Listing Rules. The Audit Committee is mainly responsible for reviewing and overseeing the financial reporting procedure, risk management and internal control system of our Group and has the terms of reference in compliance with the relevant PRC laws and regulations and Rule 3.21 of the Listing Rules and paragraph D.3 of part 2 of the Corporate Governance Code as set out in Appendix C1 to the Listing Rules.

Remuneration Committee

The Remuneration Committee consists of three Directors, namely Mr. Wang Yongkun, Dr. Fan Zhiyong and Mr. Sun Wei Yung Kevin, with Dr. Fan Zhiyong currently serving as the chairman. The Remuneration Committee is mainly responsible for evaluating the remuneration polices for Directors and senior management of our Group and making recommendations thereon to the Board of Directors and has the terms of reference in compliance with relevant laws and regulations of the PRC and paragraph E.1 of part 2 of the Corporate Governance Code as set out in Appendix C1 to the Listing Rules.

Nomination Committee

The Nomination Committee consists of three Directors, namely Mr. Wang Yongkun, Dr. Zang Yunzhi and Dr. Fan Zhiyong, with Mr. Wang Yongkun currently serving as the chairman. The Nomination Committee is mainly responsible for identifying, screening and recommending to the Board of Directors qualified candidates to serve as the Directors and senior management and monitoring the procedures for evaluating the performance of the Board of Directors and has the terms of reference in compliance with the relevant laws and regulations of the PRC and paragraph B.3 of part 2 of the Corporate Governance Code as set out in Appendix C1 to the Listing Rules.

DIVERSITY POLICY OF THE BOARD OF DIRECTORS

The Board of Directors has adopted a board diversity policy (the "**Board Diversity Policy**") in order to enhance the effectiveness of our Board of Directors and to maintain high standard of corporate governance. The Board Diversity Policy sets out the criteria in selecting candidates to our Board of Directors, including but not limited to gender, age, cultural and educational background, ethnicity, professional experience, skills, knowledge and length of service. The ultimate decision will be based on merit and contribution that the selected candidates will bring to our Board of Directors.

Our Directors have a balanced mixed of knowledge and skills, including but not limited to overall business management, finance and accounting, robot technology and law. The Board of Directors is of the view that our Board of Directors satisfies the Board Diversity Policy. In addition, our Board of Directors has a wide range of age, ranging from 33 years old to 53 years old. One of our Directors is female. Our Board of Directors will also ensure that appropriate balance of gender diversity is achieved with reference to investors' expectation, and international and local recommended best practices.

The Nomination Committee is responsible for reviewing the diversity of the Board of Directors. After **[REDACTED]**, the Nomination Committee will monitor and evaluate the implementation of the Board Diversity Policy from time to time to ensure its continued effectiveness. The Nomination Committee will also include in successive annual reports a summary of the Board Diversity Policy, including any measurable objectives set for implementing the Board Diversity Policy and the progress on achieving these objectives.

CORPORATE GOVERNANCE

Our Directors recognize the importance of good corporate governance in management and internal procedures so as to achieve effective accountability. Save as disclosed below, our Group is expected to comply with the code provisions of the Corporate Governance Code as set out in Appendix C1 to the Listing Rules.

Pursuant to code provision C.2.1 of Part 2 of the Corporate Governance Code, companies listed on the Stock Exchange are expected to comply with, but may choose to deviate from the requirement that the roles of chairman and chief executive should be separate and should not be performed by the same individual. We do not have a separate chairman and chief executive and Mr. Wang currently performs these two roles. Our Board believes that vesting the roles of both the chairman of our Board and general manager in the same person has the benefit of (1) ensuring consistent leadership within our Company, (2) enabling more effective and efficient overall strategic planning for our Company, and (3) facilitating the flow of information between the management and our Board. Our Board considers that the balance of power and authority for the present arrangement will not be impaired and this structure will enable our Company to make and implement decisions promptly and effectively. Our Board will continue to review and consider splitting the roles of the chairman of our Board and the general manager of our Company at a time when it is appropriate by taking into account the circumstances of our Company as a whole.

COMPENSATION OF DIRECTORS AND SENIOR MANAGEMENT

The compensation and remuneration of the Directors and members of the senior management of the Company are determined by the Shareholders' meetings and the Board of Directors as appropriate in the form of salaries and bonuses. The Company also reimburses them for expenses which are necessary and reasonably incurred in providing services to the Company or discharging their duties in relation to

the operations of the Company. When reviewing and determining the specific remuneration packages for our Directors and members of the senior management of the Company, the Shareholders' meetings and the Board of Directors take into account factors such as salaries paid by comparable companies, time commitment, level of responsibilities, employment elsewhere in our Group and desirability of performance-based remuneration. As required by the relevant PRC laws and regulations, the Company also participates in various defined contribution plans organized by relevant provincial and municipal government authorities and welfare schemes for employees of the Company, including medical insurance, injury insurance, unemployment insurance, pension insurance, maternity insurance and housing provident fund.

The Company offers executive Directors and senior management members, who are our employees, compensation in the form of salaries, bonuses, social security plans, housing provident fund plans and other benefits. The independent non-executive Directors receive compensation based on their responsibilities.

The aggregate amounts of remuneration (including fees, salaries, contribution to pension schemes, housing allowances, other allowances and benefits-in-kind and discretionary bonuses and share-based payment) paid to the Directors for the year ended December 31, 2023, 2024, 2025 and the four months ended April 30, 2026, were RMB4.7 million, RMB3.9 million, RMB57.3 million and RMB12.3 million, respectively.

The aggregate amounts of remuneration (including fees, salaries, contribution to pension schemes, housing allowances, other allowances and benefits-in-kind and discretionary bonuses and share-based payment) paid to the five highest paid individuals, excluding Directors and chief executive, for the year ended December 31, 2023, 2024, 2025 and the four months ended April 30, 2026, were RMB2.0 million, RMB2.0 million, RMB8.0 million and RMB2.0 million, respectively.

It is estimated that remuneration equivalent to approximately RMB3.7 million in aggregate will be paid to the Directors by the Company for the year ending December 31, 2026, based on the arrangements in force as of the date of this document. The actual remuneration of Directors in 2026 may be different from the expected remuneration.

No remuneration was paid by the Company to the Directors or the five highest paid individuals as inducement to join or upon joining the Company or as a compensation for loss of office during the Track Record Period. Furthermore, none of the Directors had waived or agreed to waive any remuneration during the Track Record Period.

COMPLIANCE ADVISOR

The Company appointed Somerley Capital Limited as the compliance advisor pursuant to Rules 3A.19 of the Listing Rules, and the compliance advisor will advise the Company in the following circumstances:

(i) before the publication of any regulatory announcement, circular or financial report;

(ii) where a transaction, which might be a notifiable or connected transaction, is contemplated, including share issues and share repurchases;

(iii) where the Company proposes to use the **[REDACTED]** of the **[REDACTED]** in a manner that is different from that detailed in this document or where our business activities, developments or results deviate from any forecasts, estimates or other information in this document; and

(iv) where the Stock Exchange makes an inquiry of the Company regarding unusual movements in the price or trading volume of the Shares, the possible development of a false market in the Shares or any other matters.

The terms of the appointment of the compliance advisor will commence on the **[REDACTED]** and end on the date when the Company distributes the annual report of its financial results for the first full financial year commencing after the **[REDACTED]**.

CORE R&D TEAM MEMBERS

For further details of the experience of our core R&D team members, see "Business — Research and Development — Our R&D Talents" in this document.

CONFIRMATION FROM OUR DIRECTORS

Rule 8.10 of the Listing Rules

Each of our Directors confirms that, as of the Latest Practicable Date, he or she did not have any interest in any business which competes, or is likely to compete, directly or indirectly, with our business, and requires disclosure under Rule 8.10 of the Listing Rules.

Rule 3.09D of the Listing Rules

Each of our Directors confirms that he or she (1) has obtained the legal advice referred to under Rule 3.09D of the Listing Rules on June 16, 2025; and (2) understands his or her obligations as a director of a listed issuer under the Listing Rules.

Rule 3.13 of the Listing Rules

Each of the independent non-executive Directors confirms (1) his/her independence as regards each of the factors referred to in Rule 3.13(1) to (8) of the Listing Rules; (2) that he/she has no past or present financial or other interest in the business of our Company or our subsidiaries or any connection with any core connected person of our Company under the Listing Rules as of the Latest Practicable Date; and (3) that there are no other factors that may affect his/her independence at the time of his/her appointment.

This section presents certain information regarding our share capital prior to and following the completion of the **[REDACTED]** and the Conversion of Domestic Shares into H Shares.

BEFORE THE [REDACTED]

As of the Latest Practicable Date, the registered and issued share capital of our Company was RMB22,105,263, comprising 22,105,263 Domestic Shares with a nominal value of RMB1.00 each.

Immediately prior to the **[REDACTED]**, the ordinary shares of our Company will be split on a one for ten basis, and the registered share capital of our Company will be RMB**[REDACTED]**, comprising of **[REDACTED]** Domestic Shares in issue of nominal value RMB0.10 each.

UPON COMPLETION OF THE SHARE SUBDIVISION AND THE [REDACTED]

Immediately following completion of the **[REDACTED]** and the Conversion of Domestic Shares into H Shares, assuming that the **[REDACTED]** is not exercised and taking into account the Share Subdivision, the registered and issued share capital of our Company will be as follows:

Description of Shares	Number of Shares	Approximate percentage of the enlarged issued share capital after the [REDACTED]
Domestic Shares	—	—
H Shares converted from Domestic Shares	221,052,630	**[REDACTED]**
H Shares to be issued under the **[REDACTED]**	**[REDACTED]**	**[REDACTED]**
Total	**[REDACTED]**	**100.00%**

See "— Conversion of Domestic Shares into H Shares" below for further details.

Immediately following completion of the **[REDACTED]** and the Conversion of Domestic Shares into H Shares, assuming that the **[REDACTED]** is fully exercised and taking into account the Share Subdivision, our registered and issued share capital will be as follows:

Description of Shares	Number of Shares	Approximate percentage of the enlarged issued share capital after the [REDACTED]
Domestic Shares	—	—
H Shares converted from Domestic Shares	221,052,630	**[REDACTED]**
H Shares to be issued under the **[REDACTED]**	**[REDACTED]**	**[REDACTED]**
Total	**[REDACTED]**	**100.00%**

See "— Conversion of Domestic Shares into H Shares" below for further details.

OUR SHARES

Upon completion of the **[REDACTED]** we will only have one class of Shares. Domestic Shares and H Shares are all ordinary Shares in the share capital of our Company. Apart from certain qualified domestic institutional investors in the PRC, the qualified PRC investors under the Shanghai-Hong Kong Stock Connect and the Shenzhen-Hong Kong Stock Connect and other persons who are entitled to hold our H Shares pursuant to relevant PRC laws and regulations or upon approvals of any competent authorities, H Shares generally cannot be subscribed for by or traded between legal or natural PRC persons. H Shares may only be subscribed for and traded in Hong Kong dollars.

RANKING

Domestic Shares and H Shares shall rank *pari passu* with each other in all other respects and, in particular, will rank equally for dividends or distributions declared, paid or made. All dividends in respect of the H Shares are to be paid by us in Hong Kong dollars or in the form of H Shares.

CONVERSION OF DOMESTIC SHARES INTO H SHARES

According to stipulations made by the State Council's securities regulatory authority and the Articles of Association, our Domestic Shares may be converted into H Shares, and such converted H Shares may be listed or traded on an overseas stock exchange, provided that prior to the conversion and trading of such converted Shares, the requisite internal approval processes have been duly completed and the approvals from the relevant PRC regulatory authorities, including the CSRC, and the relevant overseas stock exchange have been obtained. In addition, such conversion, trading and listing shall in all respects comply with the regulations prescribed by the State Council's securities regulatory authorities and the regulations, requirements and procedures prescribed by the relevant overseas stock exchange.

The Conversion of Domestic Shares into H Shares will involve an aggregate of 221,052,630 Domestic Shares held by existing Shareholders (taking into account the Share Subdivision) (the "**Full Circulation Participating Shareholders**").

[REDACTED] Review and Approval by the CSRC

In accordance with the Guidelines for Applying "Full Circulation" for Domestic Unlisted Shares of H-share Listed Companies (H股公司境內未上市股份申請「全流通」業務指引) and Trial Administrative Measures and relevant five guidelines announced by the CSRC, H-share listed companies which apply for the conversion of domestic unlisted shares into H shares for listing and circulation on the Stock Exchange shall conform to relevant regulations promulgated by the CSRC, and authorize the company to file with the CSRC on their behalf.

Our Company has applied for a "Full Circulation" with the CSRC on June 25, 2025, and submitted the application reports, authorization documents of the Shareholders of Domestic Shares for which an H-share "Full Circulation" was applied, commitment about the compliance of share acquisition and other documents in accordance with the requirements of the CSRC.

[REDACTED] Approval by the Stock Exchange

We [have applied] to the Listing Committee of the Stock Exchange for the granting of **[REDACTED]** of, and permission to deal in, our H Shares to be issued pursuant to the **[REDACTED]** (including any H Shares which may be issued pursuant to the exercise of the **[REDACTED]**) and the H Shares to be converted from 221,052,630 Domestic Shares (taking into account the Share Subdivision), which is subject to the approval by the Stock Exchange.

We will perform the following procedures for the Conversion of Domestic Shares into H Shares after receiving the approval of the Stock Exchange: (1) giving instructions to our **[REDACTED]** regarding the relevant share certificates of the converted H Shares; and (2) enabling the converted H Shares to be accepted as eligible securities by **[REDACTED]** for deposit, clearance and settlement in the **[REDACTED]**. The Full Circulation Participating Shareholders may only deal in the H Shares upon completion of the domestic procedures as disclosed in this section.

TRANSFER OF SHARES ISSUED PRIOR TO THE [REDACTED]

The PRC Company Law provides that in relation to the public offering of a company, the shares issued prior to the public offering shall not be transferred within a period of one year from the date on which the publicly offered shares are listed on any stock exchange. Accordingly, Shares issued by our Company prior to the **[REDACTED]** shall be subject to this statutory restriction and not be transferred within a period of one year from the **[REDACTED]**.

CIRCUMSTANCES UNDER WHICH GENERAL MEETING IS REQUIRED

For details of circumstances under which our Shareholders' general meeting is required, please see "Appendix V — Summary of Articles of Association — Requirements for Annual Shareholders' Meeting" in this document.

SUBSTANTIAL SHAREHOLDERS

To the best of our Directors' knowledge and information, the following persons will, immediately following the completion of the **[REDACTED]** and the Conversion of Domestic Shares into H Shares, have interests or short positions in our Shares or underlying Shares which would be required to be disclosed to our Company and the Stock Exchange pursuant to Divisions 2 and 3 of Part XV of the SFO or will, directly or indirectly, be interested in 10% or more of the nominal value of any class of share capital carrying rights to vote in all circumstances at any general meeting of our Company:

Xiaomi Corporation[5][6]	Interest in controlled corporation	1,857,585	8.40%	1,857,585	H Shares	[REDACTED]%	[REDACTED]%
Bohua							
Zhangjiagang Bohua Venture Investment Partnership (Limited Partnership) (張家港博華創業投資合夥企業 (有限合夥))[6][7]	Beneficial owner	1,604,884	7.26%	1,604,884	H Shares	[REDACTED]%	[REDACTED]%
Zhangjiagang Bohua Yaoshi Investment Partnership (Limited Partnership) (張家港博華耀世投資合夥企業(有限合夥))[6][7]	Interest in controlled corporation	1,604,884	7.26%	1,604,884	H Shares	[REDACTED]%	[REDACTED]%
Beijing Bohua Capital Co., Ltd. (北京博華資本有限公司)[6][7]	Interest in controlled corporation	1,604,884	7.26%	1,604,884	H Shares	[REDACTED]%	[REDACTED]%
Mr. Xu Wenbo (徐文博)[6][7]	Interest in controlled corporation	1,604,884	7.26%	1,604,884	H Shares	[REDACTED]%	[REDACTED]%

(1) The calculation is based on the assumption that (i) the Share Subdivision is completed; (ii) the **[REDACTED]** is not exercised; (iii) 221,052,630 Domestic Shares (taking into account the Share Subdivision) will be converted into H Shares; and (iv) the total number of Shares in issue will be **[REDACTED]** H Shares immediately after the completion of the **[REDACTED]**.

(2) As of the Latest Practicable Date, Mr. Wang is the general partner of Standard Automation and is responsible for its overall management and entitled to exercise the voting rights held by Standard Automation at his full and absolute discretion. Therefore, Mr. Wang is deemed to be interested in the Shares held by Standard Automation under the SFO.

(3) Pursuant to the Acting-in-Concert Agreement, Mr. Wang and Mr. Li confirm that they have acted in concert when addressing matters pertaining to the operational development of the Group and those requiring resolutions by a Shareholders' meeting. For further details, see "History and Corporate Structure — Acting-in-Concert Arrangement". Therefore, under the SFO, each of Mr. Wang, Mr. Li and Standard Automation is deemed to be interested in the Shares held by each other.

(4) Pursuant to the Voting Proxy Agreements, Mr. Wang has the right to vote certain number of Shares held by the respective grantors. See the section headed "History and Corporate Structure — Voting Proxy Arrangements" for further details.

(5) As of the Latest Practicable Date, the general partner of Wuxi Liangxi Sci-Tech Innovation Industry Investment Fund Partnership (Limited Partnership) (無錫市梁溪科創產業投資基金合夥企業(有限合夥)) ("**Wuxi Liangxi**") is Wuxi Liangxi Kechuang Industrial Investment Management Co., Ltd. (無錫市梁溪科創產業投資管理有限公司) ("**Liangxi Kechuang**"). The controlling shareholder of Liangxi Kechuang is Jiangsu Boshang Investment Management Co., Ltd. (江蘇博尚私募基金管理有限公司) ("**Jiangsu Boshang**"), which is ultimately controlled by Beijing Bohua Capital Co., Ltd. (北京博華資本有限公司) ("**Bohua Capital**"), which is in turn controlled by Mr. Xu Wenbo (徐文博) ("**Mr. Xu**"). Therefore, each of Mr. Xu, Bohua Capital, Jiangsu Boshang and Liangxi Kechuang is deemed to be interested in the Shares held by Wuxi Liangxi under the SFO.

(6) As of the Latest Practicable Date, the general partner of Beijing Xiaomi Zhizao Equity Investment Fund Partnership (Limited Partnership) (北京小米智造股權投資基金合夥企業(有限合夥)) ("**Xiaomi Zhizao**") is Beijing Xiaomi Enterprise Management Co., Ltd. (北京小米企業管理有限公司) ("**Xiaomi Enterprise Management**"), which is in turn wholly-owned by Xiaomi Private Equity Fund Management Co., Ltd. (小米私募股權基金管理有限公司) ("**Xiaomi Fund Management**"), which is in turn wholly-owned by Xiaomi Inc. (小米科技有限責任公司). Xiaomi Inc. is controlled by Xiaomi Corporation, a company listed on the Stock Exchange (stock code: 1810). Therefore, each of Xiaomi Corporation, Xiaomi Inc., Xiaomi Fund Management and Xiaomi Enterprise Management is deemed to be interested in the Shares held by Xiaomi Zhizao under the SFO.

(7) As of the Latest Practicable Date, the general partner of Zhangjiagang Bohua Venture Investment Partnership (Limited Partnership) (張家港博華創業投資合夥企業(有限合夥)) ("**Bohua Investment**") is Zhangjiagang Bohua Yaoshi Investment Partnership (Limited Partnership) (張家港博華耀世投資合夥企業(有限合夥)) ("**Bohua Yaoshi**"). Bohua Investment is managed by Bohua Capital, which is controlled by Mr. Xu. Therefore, each of Mr. Xu, Bohua Capital and Bohua Yaoshi is deemed to be interested in the Shares held by Bohua Investment under the SFO.

Save as disclosed above and in "Appendix VI — Statutory and General Information" of this document, our Directors are not aware of any person who will, immediately following the completion of the **[REDACTED]** and the Conversion of Domestic Shares into H Shares (and the **[REDACTED]** of any additional H Shares pursuant to the **[REDACTED]**), have an interest or short position in the Shares or underlying shares of the Company which would be required to be disclosed to the Company and the Stock Exchange under Divisions 2 and 3 of Part XV of the SFO or will, directly or indirectly, be interested in 10% or more of the nominal value of any class of share capital carrying rights to vote in all circumstances at general meetings of the Company or any other members of our Group.

FUTURE PLANS

See the section headed "Business — Strategies" for a detailed description of our future plans.

USE OF [REDACTED]

We estimate that we will receive net **[REDACTED]** from the **[REDACTED]** of approximately HK$**[REDACTED]**, after deducting **[REDACTED]**, fees and estimated expenses payable by us in connection with the **[REDACTED]**, assuming **[REDACTED]** is not exercised, at the **[REDACTED]** of HK$**[REDACTED]** per H Share.

In line with our strategies, we plan to apply the net **[REDACTED]** from the **[REDACTED]** in the following amounts and manner, subject to changes in light of our evolving business needs and changing market conditions:

(a) **Research and Development:** approximately **[REDACTED]**% of the net **[REDACTED]**, or approximately HK$**[REDACTED]**, is expected to be used to advance our core robotic technology platform, robotic products and the RoboVerse system and develop relevant proprietary robotics technologies. We intend to invest resources to advance our robotic products, core robotic technology platform and the RoboVerse system, enhancing our technological capabilities and driving solution advancements to maintain our leadership in the robotic industry. Our ongoing key R&D projects include (i) the Next-Generation DARWIN project of the embodied robots, which is to improve stability, optimize manufacturability, and reduce system cost; (ii) the Next-Generation LINK project of the embodied robots, which is to serve high-end industrial use cases while boosting intelligence and task generalization; (iii) the "Zero-Deployment" EasyGO project of the standard robots, which is to expand product line with a low-cost, zero-deployment offering; (iv) the Layered VLA Architecture for Industry project of the core technology platform, which is to expand sequentially in high-value industrial scenarios; and (v) the Robo-Pocket Portable O&M Terminal project of the software or the RoboVerse system, which is to increase deployment and maintenance efficiency, lower delivery and operating costs. For details, see "Business — Research and Development — Our Key R&D Projects". Specifically:

   (i) approximately **[REDACTED]**%, or HK$**[REDACTED]**, is expected to be allocated to the enhancement and development of our robotic products, among which 21% (HK$**[REDACTED]**), 34% (HK$**[REDACTED]**) and 45% (HK$**[REDACTED]**) will be used for R&D equipment, R&D materials and R&D personnel, respectively. This initiative encompasses, but is not limited to: (1) the design and development of foundational robotic components, such as next-generation high-performance controller systems and motor drivers; (2) the upgrade of standard and functional robotic product lines, focusing on enhancing modularity, reducing weight and costs, and expanding application-specific functionalities; (3) the design and development of embodied intelligence robotic product series, including advancements in next-generation robotic body design, real-time sensor fusion systems, and the establishment of data collection systems; and (4) the acquisition of various R&D equipment, including high-performance computing servers, high-precision positioning systems, and reliability testing apparatus, to bolster our computational reserves and design verification capabilities, ensuring product robustness. We plan to recruit a total of 45 R&D personnel over the next five years, comprising 20 senior and 25 junior roles. Senior personnel will lead the design and development processes, including system

architecture and cross-functional coordination from concept through validation and iteration, while junior personnel will support product and software R&D by implementing code, test cases, and technical solutions, and assisting senior engineers with product development and integration. Senior personnel are expected to have over five years of robotics R&D experience, strong software engineering and systems integration skills, and a bachelor's degree or above in robotics, automation, computer science, mechanical/electrical engineering, or a related field, with expertise in one or more of: robot structural design, electrical system design, or embodied algorithm development. Junior personnel are expected to have up to three years of robotics R&D experience (including relevant internships or projects), foundational skills in one or more of the above areas, solid coding and documentation habits, strong cross-team collaboration skills, and a bachelor's degree or above in a related field.

(ii) approximately **[REDACTED]**%, or HK$**[REDACTED]**, is expected to be allocated to the development of core robotic technology platform and the RoboVerse system, among which **[REDACTED]**% (HK$**[REDACTED]**) and **[REDACTED]**% (HK$**[REDACTED]**) will be used for R&D equipment and R&D personnel, respectively. In particular, we aim to: (1) enhancing our AGI technology capabilities by developing next-generation AI models, including VLA algorithms, to improve autonomous decision-making and adaptability in robotic systems, and extensively integrating these models into our RoboVerse system to continuously elevate its intelligence; (2) expanding our simulation scenarios, further developing world models, and refining task-specific AI agents for effective real-world deployment; (3) strengthening our multimodal data collection capabilities to encompass a broader range of industrial application scenarios; and (4) acquiring various R&D equipment, including advanced high-performance GPU servers and cloud-based computing resources, to accelerate AI training and development while bolstering our computational reserves. We plan to recruit a total of 80 R&D personnel over the next five years, comprising 35 senior and 45 junior roles. Senior personnel will lead the design and development of software components and systems, with end-to-end ownership of at least one module or subsystem, and drive technical roadmaps, ensure engineering quality and scalability, mentor junior engineers, and coordinate cross-functional delivery; while junior personnel will focus on software R&D execution, including code implementation, unit and integration testing, documentation, iterative improvement, and contributing to solution design under senior guidance. Senior personnel should have more than five years of software R&D experience, demonstrated expertise in one or more of AI algorithms, simulation software, or operating system development, and a proven track record leading complex technical initiatives. They should hold a bachelor's degree or above (typically a graduate degree) in software engineering, computer science, mathematics, or a related field, and be proficient in systems architecture design, software feature development, and AI algorithm development, with strong engineering leadership and quality discipline. Junior personnel should have up to three years of software R&D experience (including new graduates), foundational exposure to software feature and/or AI algorithm development, familiarity with collaborative development practices, and a bachelor's degree or above in software engineering, computer science, mathematics, or a related field. They should have basic programming, testing, and version control skills, strong learning aptitude under mentorship, and good teamwork and communication abilities.

(b) **Sales and Service Network Expansion and Brand Promotion:** approximately **[REDACTED]**% of the net **[REDACTED]**, or approximately HK$**[REDACTED]**, is expected to be used to establish and fortify our sales and service networks both domestically and internationally, while also enhance our robotic solution deployment capabilities, and promote our brand. In particular:

(i) Sales and service network expansion

(1) approximately **[REDACTED]**%, or HK$**[REDACTED]**, is expected to be used to develop and expand our sales network and service teams based in China to support our ongoing business growth and execute our medium- to long-term strategic plans. We plan to retain and hire experienced sales and marketing staff domestically to facilitate our business collaborations with domestic and global suppliers and customers. Over the next five years, we plan to expand our workforce by recruiting 18 additional sales personnel and 25 customer service personnel to support our growth and enhance customer engagement. Our sales hires are expected to possess prior experience in the robotic industry, hold a bachelor's degree or above with an engineering-related academic background, and demonstrate the capability to design bespoke solutions responsive to customer needs and to drive successful product sales. Our customer service hires are expected to have relevant robotic industry customer service experience, hold an associate degree or above with an engineering-related academic background, and, following training, be able to master our products' operating methods and key features. They are expected to exhibit strong service awareness and the ability to rapidly resolve a wide range of application issues encountered by customers in the course of using our products, thereby supporting customer satisfaction and long-term retention.

(2) approximately **[REDACTED]**%, or HK$**[REDACTED]**, is expected to be used to establish our market presence, sales and deploy capacity and service capabilities internationally. We plan to develop a global sales framework tailored to our international markets system for our international markets, set up overseas subsidiaries, lease office spaces, recruit oversea sales staff, build up our local sales teams and technical support centers, attract top talent, and provide regional market expertise to drive sales growth across key overseas markets. The industrial mobile robot market is projected to double in the next five years, with China and Southeast Asia delivering the highest volumes and North America and Europe rewarding certified, high-performance robots with premium pricing. Expanding across these regions lets us tap both scale and margin, align with shifting supply chains, and extend our technology lead worldwide. To better serve our overseas customers, we plan to establish dedicated teams responsible for key markets including (i) Hong Kong, China, (ii) Japan, (iii) Southeast Asia and (iv) Europe. Additionally, we plan to implement comprehensive support systems abroad to manage local sales, deployment, operation, support and value-added services for international customers. Over the next five years, we plan to further strengthen our international commercialization and after-sales capabilities by recruiting approximately 20 overseas sales personnel and 25 overseas customer service personnel. Our overseas sales hires will typically possess prior sales experience in the overseas robotic industry, hold a bachelor's degree or higher (preferably in engineering or related disciplines), demonstrate fluent foreign language

capabilities tailored to their target regions, and exhibit the cultural agility necessary to integrate quickly into local markets. We expect these personnel to work closely with customers to identify needs, tailor appropriate solutions, and drive successful product sales. Our overseas customer service hires will generally have overseas robotics industry customer service experience, hold an associate degree or higher (preferably in engineering or related disciplines), and demonstrate fluent region-specific foreign language skills. Following structured training, they will be able to master our products' operating methods and key functional characteristics, deliver high-quality service, and efficiently resolve a broad range of issues encountered by customers during product application. Please see "Business — Path To Profitability — Driving Sustainable Revenue Growth and Business Scale" for details.

(ii) **Brand marketing and promotion:** approximately **[REDACTED]**% of the net **[REDACTED]**, or approximately HK$**[REDACTED]**, is expected to be used for our brand promotion in domestic and overseas markets.

We plan to invest in strategic brand marketing initiatives that will enhance our brand recognition and influence across both domestic and international markets. We also plan to expand our marketing channels and bolstering our digital marketing efforts, media partnerships and local outreach to a broader customer base. Additionally, we plan to host seminars and participate in industry exhibitions and forums, showcasing our brand and sharing the latest industry trends with potential customers and collaboration partners worldwide, strengthening our brand image and influence among a broader customer base.

(c) **Development of Manufacturing Capabilities and New Production Lines:** approximately **[REDACTED]**% of the net **[REDACTED]**, or approximately HK$**[REDACTED]**, is expected to be used for the development of manufacturing capabilities and new production lines. Our production activities generally experience a deceleration in the first quarter of each year, primarily due to the holiday season. Conversely, during peak periods, our facilities operate at or near full capacity, underscoring the rationale for expanding our production capabilities. For example, we achieved a utilization rate of approximately 120% in 2025. In particular:

(i) approximately **[REDACTED]**%, or HK**[REDACTED]**, is expected to be used to develop and expand production and factory operation teams.

(ii) approximately **[REDACTED]**%, or HK$**[REDACTED]**, is expected to be used to purchase production equipment and develop new production lines in a new plant. We plan to deploy our robotic solutions in our new production lines, aiming to establish this new plant as an industry-leading intelligent manufacturing demonstration factory. Please see "Business — Production — Our Production Facility" for details.

(d) **General Corporate Purposes and Working Capital:** approximately **[REDACTED]**% of the net **[REDACTED]**, or approximately HK$**[REDACTED]**, is expected to be used for working capital and other general corporate purposes to support our business operation and growth.

The above allocation of the **[REDACTED]** will be adjusted on a pro-rata basis in the event that the **[REDACTED]** is fixed below or above the mid-point of the indicative price range. If the **[REDACTED]** is set at HK$**[REDACTED]** per Share, which is the high end of our indicative **[REDACTED]** range, the net **[REDACTED]** from the **[REDACTED]** will increase to approximately HK$**[REDACTED]**. If the **[REDACTED]** is set at HK$**[REDACTED]** per Share, which is the low end of our indicative **[REDACTED]** range, the net **[REDACTED]** from the **[REDACTED]** will decrease to approximately HK$**[REDACTED]**.

Any additional **[REDACTED]** received from the exercise of the **[REDACTED]** will also be allocated to the above purposes on a pro-rata basis. In the event that the **[REDACTED]** is exercised in full, we will receive net **[REDACTED]** of HK$**[REDACTED]** (after deducting the estimated **[REDACTED]** and other fees and expenses payable by us in connection with the **[REDACTED]** and assuming an **[REDACTED]** of HK$**[REDACTED]** per Share, being the midpoint of our indicative **[REDACTED]** range).

To the extent that the net **[REDACTED]** of the **[REDACTED]** are not immediately required for the above purposes or if we are unable to put into effect any part of our development plan as intended, we may deposit the net **[REDACTED]** into short-term interest-bearing accounts at licensed commercial banks and/or other authorized financial institutions (as defined under the SFO or applicable laws and regulations in other jurisdictions). In such event, we will comply with all applicable disclosure requirements as mandated by the Listing Rules.

ACCOUNTANTS' REPORT ON HISTORICAL FINANCIAL INFORMATION TO THE DIRECTORS OF STANDARD ROBOTS (WUXI) CO., LTD. AND CITIC SECURITIES (HONG KONG) LIMITED AND GUOTAI JUNAN CAPITAL LIMITED

Introduction

We report on the historical financial information of Standard Robots (Wuxi) Co., Ltd. (the "**Company**") and its subsidiaries (together, the "**Group**") set out on pages I-3 to I-[•], which comprises the consolidated statements of profit or loss and other comprehensive income, consolidated statements of changes in equity and consolidated statements of cash flows of the Group for each of the years ended 31 December 2023, 2024, 2025 and the four months ended 30 April 2026 (the "**Relevant Periods**"), and the consolidated statements of financial position of the Group and the statements of financial position of the Company as at 31 December 2023, 2024, 2025 and 30 April 2026, and material accounting policy information and other explanatory information (together, the "**Historical Financial Information**"). The Historical Financial Information set out on pages I-3 to I-[•] forms an integral part of this report, which has been prepared for inclusion in the document of the Company dated **[REDACTED]** (the "**Document**") in connection with the initial **[REDACTED]** of the shares of the Company on the Main Board of The Stock Exchange of Hong Kong Limited (the "**Stock Exchange**").

Directors' responsibility for the Historical Financial Information

The directors of the Company are responsible for the preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information, and for such internal control as the directors determine is necessary to enable the preparation of the Historical Financial Information that is free from material misstatement, whether due to fraud or error.

Reporting accountants' responsibility

Our responsibility is to express an opinion on the Historical Financial Information and to report our opinion to you. We conducted our work in accordance with Hong Kong Standard on Investment Circular Reporting Engagements 200 *Accountants' Reports on Historical Financial Information in Investment Circulars* issued by the Hong Kong Institute of Certified Public Accountants ("**HKICPA**"). This standard requires that we comply with ethical standards and plan and perform our work to obtain reasonable assurance about whether the Historical Financial Information is free from material misstatement.

Our work involved performing procedures to obtain evidence about the amounts and disclosures in the Historical Financial Information. The procedures selected depend on the reporting accountants' judgement, including the assessment of risks of material misstatement of the Historical Financial Information, whether due to fraud or error. In making those risk assessments, the reporting accountants consider internal control relevant to the entity's preparation of the Historical Financial Information that gives a true and fair view in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information, in order to design procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Our work also included evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the Historical Financial Information.

We believe that the evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Opinion

In our opinion, the Historical Financial Information gives, for the purposes of the accountants' report, a true and fair view of the financial position of the Group and the Company as at 31 December 2023, 2024, 2025 and 30 April 2026 and of the financial performance and cash flows of the Group for each of the Relevant Periods in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information.

Review of interim comparative financial information

We have reviewed the interim comparative financial information of the Group which comprises the consolidated statements of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the four months ended 30 April 2025 and other explanatory information (the "**Interim Comparative Financial Information**"). The directors of the Company are responsible for the preparation and presentation of the Interim Comparative Financial Information in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information. Our responsibility is to express a conclusion on the Interim Comparative Financial Information based on our review. We conducted our review in accordance with Hong Kong Standard on Review Engagements 2410 *Review of Interim Financial Information Performed by the Independent Auditor of the Entity* issued by the HKICPA. A review consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with Hong Kong Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion. Based on our review, nothing has come to our attention that causes us to believe that the Interim Comparative Financial Information, for the purposes of the accountants' report, is not prepared, in all material respects, in accordance with the basis of preparation set out in note 2.1 to the Historical Financial Information.

Report on matters under the Rules Governing the Listing of Securities on the Stock Exchange and the Companies (Winding Up and Miscellaneous Provisions) Ordinance

Adjustments

In preparing the Historical Financial Information, no adjustments to the Underlying Financial Statements as defined on page I-3 have been made.

Dividends

We refer to note 12 to the Historical Financial Information which states that no dividends have been paid by the Company in respect of the Relevant Periods.

Certified Public Accountants

I HISTORICAL FINANCIAL INFORMATION

Preparation of Historical Financial Information

Set out below is the Historical Financial Information which forms an integral part of this accountants' report.

The financial statements of the Group for the Relevant Periods, on which the Historical Financial Information is based, were audited by Ernst & Young in accordance with Hong Kong Standards on Auditing issued by the HKICPA (the "**Underlying Financial Statements**").

The Historical Financial Information is presented in Renminbi ("**RMB**") and all values are rounded to the nearest thousand (RMB'000) except when otherwise indicated.

CONSOLIDATED STATEMENTS OF PROFIT OR LOSS AND OTHER COMPREHENSIVE INCOME

	Notes	Year ended 31 December			Four months ended 30 April	
		2023	2024	2025	2025	2026

II NOTES TO THE HISTORICAL FINANCIAL INFORMATION

1. CORPORATE INFORMATION

The Company, formerly known as Standard Robot Co., Ltd, was established in the People's Republic of China (the "**PRC**") as a limited liability company on 14 June 2016 and converted into a joint stock company with limited liability on 29 May 2025. The address of the Company's registered office is No. 98 Jianghai West Road, Liangxi District, Wuxi City, Jiangsu Province, PRC.

During the Relevant Periods, the Company and its subsidiaries (together, the **"Group**") were mainly engaged in the design, development, manufacture and commercialisation of intelligent service robots.

In the opinion of the directors, the single largest group of shareholders of the Company included: (i) Mr. Wang Yongkun; and (ii) Mr. Li Hongxiang.

As at the date of this report, the Company had direct interests in its subsidiaries, all of which are private limited liability companies, the particulars of the subsidiaries are set out below:

Name	*Notes*	Place and date of establishment and place of operations	Registered share capital	Percentage of equity attributable to the Company	Principal activities
				Direct	
Standard Robot (Kunshan) Co., Ltd. 斯坦德機器人(昆山)有限公司*.	*(a)*	PRC/Chinese Mainland 8 March 2021	RMB50,000,000	100%	Manufacture of intelligent robots
Standard Robots Technology (Wuxi) Co., Ltd. 斯坦德機器人科技(無錫)有限公司*.	*(c)*	PRC/Chinese Mainland 22 July 2024	RMB50,000,000	100%	Research and development company
Standard Robot intelligent (Shenzhen) Co., Ltd. 斯坦德機器人智能(深圳)有限公司*.	*(b)*	PRC/Chinese Mainland 10 April 2025	RMB50,000,000	100%	Research and development company

* The English names of these companies represent the best effort made by the directors of the Company to translate the Chinese names as these companies have not been registered with any official English names.

Notes:

(a) The statutory financial statements of the entity for the years ended 31 December 2023 and 2024, prepared in accordance with Accounting Standards for Business Enterprises — Basic Standard and specific accounting standards, implementation guidance, interpretations and other relevant provisions ("**PRC GAAP**") issued by the Ministry of Finance, were audited by Shenzhen Guangyi Certified Public Accountants (深圳廣宜會計師事務所), certified public accountants registered in the PRC. The statutory financial statements of the entity for the year ended 31 December 2025 prepared under PRC GAAP were audited by Suzhou Zhongqing Accounting Firm (General Partnership) (蘇州中晴會計師事務所(普通合夥)), certified public accountants registered in the PRC.

(b) The statutory financial statements of the entity for the year ended 31 December 2025 prepared under PRC GAAP were audited by Shenzhen Tiandi Accounting Firm (General Partnership) (深圳天地會計師事務所(普通合夥)), certified public accountants registered in the PRC.

(c) No audited statutory financial statements have been prepared and issued for these entities during the Relevant Periods as these entities were not subject to any statutory audit requirements under the relevant rules and regulations in the jurisdiction of incorporation.

2.1 BASIS OF PREPARATION

For ordinary shares issued to pre-**[REDACTED]** investors, pursuant to the supplemental agreements entered into between the Company and the pre-**[REDACTED]** Investors in relation to the termination of certain of special rights granted by the Company, including redemption rights, liquidation preferences and anti-dilution rights, which are void ab initio as described in note 31 to this report, having taking into account the legal and regulatory framework of the Company's jurisdiction and the governing law of the supplementary agreements, the directors considered that it is appropriate to present the pre-**[REDACTED]** Investments as equity throughout the Relevant Periods. For the details of financial impacts, see note 31 of this report.

The Historical Financial Information has been prepared in accordance with HKFRS Accounting Standards (which include all Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards ("**HKASs**") and Interpretations) issued by the Hong Kong Institute of Certified Public Accountants ("**HKICPA**") and the disclosure requirements of the Hong Kong Companies Ordinance. All HKFRS Accounting Standards effective for the accounting period commencing from 1 January 2026, together with the relevant transitional provisions, have been early adopted by the Group in the preparation of the Historical Financial Information throughout the Relevant Periods.

The Historical Financial Information has been prepared under the historical cost convention except for certain financial instruments which have been measured at fair value.

Basis of consolidation

The Historical Financial Information includes the financial statements of the Group for the Relevant Periods. A subsidiary is an entity (including a structured entity), directly or indirectly, controlled by the Company. Control is achieved when the Group is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee (i.e., existing rights that give the Group the current ability to direct the relevant activities of the investee).

Generally, there is a presumption that a majority of voting rights results in control. When the Company has, less than a majority of the voting or similar rights of an investee, the Group considers all relevant facts and circumstances in assessing whether it has power over an investee, including:

(a) the contractual arrangement with the other vote holders of the investee;

(b) rights arising from other contractual arrangements; and

(c) the Group's voting rights and potential voting rights.

The financial statements of the subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies. The results of subsidiaries are consolidated from the date on which the Group obtains control, and continue to be consolidated until the date that such control ceases.

All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

The Group reassesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control described above. A change in the ownership interest of a subsidiary, without a loss of control, is accounted for as an equity transaction.

If the Group loses control over a subsidiary, it derecognises the related assets (including goodwill), liabilities, any non-controlling interest and the exchange fluctuation reserve; and recognises the fair value of any investment retained and any resulting surplus or deficit in profit or loss. The Group's share of components previously recognised in other comprehensive income is reclassified to profit or loss or retained profits, as appropriate, on the same basis as would be required if the Group had directly disposed of the related assets or liabilities.

Going concern basis

According to the cash flow forecast prepared by the management and taking into account the financial resources available to the Group, including cash and cash equivalents on hand and the internally generated funds from operations, the directors of the Company consider that the Group will have adequate funds available to enable it to meet its financial liabilities and obligations as and when they fall due for the next twelve months from 30 April 2026. Accordingly, the Historical Financial Information for the Relevant Periods has been prepared on a going concern basis.

2.2 ISSUED BUT NOT YET EFFECTIVE HKFRS ACCOUNTING STANDARDS

The Group has not applied the following revised HKFRS Accounting Standards, that have been issued but are not yet effective, in the Historical Financial Information.

Amendments to HKFRS 10 and HKAS 28	*Sale or Contribution of Assets between an Investor and its Associate or Joint Venture*[1]
HKFRS 18	*Presentation and Disclosure in Financial Statements*[2]
HKFRS 19 and its amendments	*Subsidiaries without Public Accountability: Disclosures*[2]
Amendments to HKAS 21	*Translation to a Hyperinflationary Presentation Currency*[2]
Amendments to Illustrative Examples on HKFRS 7, HKFRS 18, HKAS 1, HKAS 8, HKAS 36 and HKAS 37	*Disclosures about Uncertainties in the Financial Statements*[3]

[1] No mandatory effective date yet determined but available for adoption
[2] Effective for annual/reporting periods beginning on or after 1 January 2027
[3] The examples do not have an effective date or transitional provisions

The Group is in the process of making a detailed assessment of the impact of these new and revised HKFRS Accounting Standards upon initial application. So far, the Group considers that these new and revised HKFRS Accounting Standards, except for HKFRS 18, may result in changes in

accounting policies but are unlikely to have a significant impact on the Group's financial performance and financial position in the period of initial application. The application of HKFRS 18 is not expected to have a material impact on the financial position of the Group but is expected to affect the presentation of the statements of profit or loss and other comprehensive income and statements of cash flows and disclosures in the future financial information. The Group will continue to assess the impact of HKFRS 18 on the Group's financial information.

2.3 MATERIAL ACCOUNTING POLICY INFORMATION

Fair value measurement

The Group measures its financial assets at FVTPL and debt investments at fair value through other comprehensive income at fair value at the end of each of the reporting periods. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either in the principal market for the asset or liability, or in the absence of a principal market, in the most advantageous market for the asset or liability. The principal or the most advantageous market must be accessible by the Group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

Level 1	—	based on quoted prices (unadjusted) in active markets for identical assets or liabilities
Level 2	—	based on valuation techniques for which the lowest level input that is significant to the fair value measurement is observable, either directly or indirectly
Level 3	—	based on valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Group determines whether transfers have occurred between levels in the hierarchy by reassessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each of the reporting periods.

Impairment of non-financial assets

Where an indication of impairment exists, or when annual impairment testing for an asset is required (other than inventories, contract assets, financial assets and other non-current assets), the asset's recoverable amount is estimated. An asset's recoverable amount is the higher of the asset's or cash generating unit's value in use and its fair value less costs of disposal, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is determined for the cash generating unit to which the asset belongs.

An impairment loss is recognised only if the carrying amount of an asset exceeds its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. An impairment loss is charged to profit or loss in the period in which it arises in those expense categories consistent with the function of the impaired asset.

An assessment is made at the end of each of the reporting periods as to whether there is an indication that previously recognised impairment losses may no longer exist or may have decreased. If such an indication exists, the recoverable amount is estimated. A previously recognised impairment loss of an asset other than goodwill is reversed only if there has been a change in the estimates used to determine the recoverable amount of that asset, but not to an amount higher than the carrying amount that would have been determined (net of any depreciation/amortisation) had no impairment loss been recognised for the asset in prior years. A reversal of such an impairment loss is credited to profit or loss in the period in which it arises.

Related parties

A party is considered to be related to the Group if:

(a) the party is a person or a close member of that person's family and that person

  (i) has control or joint control over the Group;

  (ii) has significant influence over the Group; or

  (iii) is a member of the key management personnel of the Group or of a parent of the Group;

or

(b) the party is an entity where any of the following conditions applies:

  (i) the entity and the Group are members of the same group;

  (ii) one entity is an associate or joint venture of the other entity (or of a parent, subsidiary or fellow subsidiary of the other entity);

  (iii) the entity and the Group are joint ventures of the same third party;

(iv) one entity is a joint venture of a third entity and the other entity is an associate of the third entity;

(v) the entity is a post-employment benefit plan for the benefit of employees of either the Group or an entity related to the Group;

(vi) the entity is controlled or jointly controlled by a person identified in (a);

(vii) a person identified in (a)(i) has significant influence over the entity or is a member of the key management personnel of the entity (or of a parent of the entity); and

(viii) the entity, or any member of a group of which it is a part, provides key management personnel services to the Group or to the parent of the Group.

Property, plant and equipment and depreciation

Property, plant and equipment, are stated at cost less accumulated depreciation and any impairment losses. The cost of an item of property, plant and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use.

Expenditure incurred after items of property, plant and equipment have been put into operation, such as repairs and maintenance, is normally charged to profit or loss in the period in which it is incurred. In situations where the recognition criteria are satisfied, the expenditure for a major inspection is capitalised in the carrying amount of the asset as a replacement. Where significant parts of property, plant and equipment are required to be replaced at intervals, the Group recognises such parts as individual assets with specific useful lives and depreciates them accordingly.

Depreciation is calculated on the straight-line basis to write off the cost of each item of property, plant and equipment to its residual value over its estimated useful life. The estimated useful lives and residual values are as follows:

	Estimated useful lives	Residual value
Machinery and equipment.	3 to 5 years	0% to 5%
Office equipment and fixtures. . .	3 to 5 years	0% to 5%
Motor vehicles.	4 years	0% to 5%
Other equipment	3 to 5 years	0% to 5%
Leasehold improvements	Shorter of lease term and estimated useful life	NA

Where parts of an item of property, plant and equipment have different useful lives, the cost of that item is allocated on a reasonable basis among the parts and each part is depreciated separately. Residual values, useful lives and the depreciation methods are reviewed, and adjusted if appropriate, at least at each financial year end.

An item of property, plant and equipment including any significant part initially recognised is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss on disposal or retirement recognised in profit or loss in the year the asset is derecognised is the difference between the net sales **[REDACTED]** and the carrying amount of the relevant asset.

Construction in progress is stated at cost less any impairment losses, and is not depreciated. Cost comprises the direct costs of construction and capitalised borrowing costs on related borrowed funds during the period of construction. It is reclassified to the appropriate category of property, plant and equipment when completed and ready for use.

Intangible assets (other than goodwill)

Intangible assets acquired separately are measured on initial recognition at cost. The useful lives of intangible assets are assessed to be either finite or indefinite. Intangible assets with finite lives are subsequently amortised over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at each financial year end.

Software

Purchased software is stated at cost less any impairment losses and is amortised on the straight-line basis over its estimated useful life of 3 to 5 years.

Research and development costs

All research costs are charged to profit or loss as incurred.

Expenditure incurred on projects to develop new products is capitalised and deferred only when the Group can demonstrate the technical feasibility of completing the intangible asset so that it will be available for use or sale, its intention to complete and its ability to use or sell the asset, how the asset will generate future economic benefits, the availability of resources to complete the project and the ability to measure reliably the expenditure during the development. Product development expenditure which does not meet these criteria is expensed when incurred.

Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

(a) Right-of-use assets

Right-of-use assets are recognised at the commencement date of the lease (that is the date the underlying asset is available for use). Right-of-use assets are measured at cost, less accumulated depreciation and any impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated on a straight-line basis over the shorter of the lease terms and the estimated useful lives of the assets.

Buildings	2 to 5 years

If ownership of the leased asset transfers to the Group by the end of the lease term or the cost reflects the exercise of a purchase option, depreciation is calculated using the estimated useful life of the asset.

(b) Lease liabilities

Lease liabilities are recognised at the commencement date of the lease at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by the Group and payments of penalties for termination of a lease, if the lease term reflects the Group exercising the option to terminate the lease. The variable lease payments that do not depend on an index or a rate are recognised as an expense in the period in which the event or condition that triggers the payment occurs.

In calculating the present value of lease payments, the Group uses its incremental borrowing rate at the lease commencement date because the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in lease payments (e.g., a change to future lease payments resulting from a change in an index or rate) or a change in assessment of an option to purchase the underlying asset.

(c) Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases of buildings (that is those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). It also applies the recognition exemption for leases of low-value assets to leases of office equipment that is considered to be of low value. Lease payments on short-term leases and leases of low-value assets are recognised as an expense on a straight-line basis over the lease term.

Investments and other financial assets

Initial recognition and measurement

Financial assets are classified, at initial recognition, as subsequently measured at amortised cost, fair value through other comprehensive income, and fair value through profit or loss.

The classification of financial assets at initial recognition depends on the financial asset's contractual cash flow characteristics and the Group's business model for managing them. With the exception of trade and bills receivables that do not contain a significant financing component or for which the Group has applied the practical expedient of not adjusting the effect of a significant financing component, the Group initially measures a financial asset at its fair value, plus in the case of a financial asset not at fair value through profit or loss, transaction costs. Trade and bills receivables that do not contain a significant financing component or for which the Group has applied the practical expedient are measured at the transaction price determined under HKFRS 15 in accordance with the policies set out for "Revenue recognition" below.

In order for a financial asset to be classified and measured at amortised cost or fair value through other comprehensive income, it needs to give rise to cash flows that are solely payments of principal and interest ("**SPPI**") on the principal amount outstanding. Financial assets with cash flows that are not SPPI are classified and measured at fair value through profit or loss, irrespective of the business model.

The Group's business model for managing financial assets refers to how it manages its financial assets in order to generate cash flows. The business model determines whether cash flows will result from collecting contractual cash flows, selling the financial assets, or both. Financial assets classified and measured at amortised cost are held within a business model with the objective to hold financial assets in order to collect contractual cash flows, while financial assets classified and measured at fair value through other comprehensive income are held within a business model with the objective of both holding to collect contractual cash flows and selling. Financial assets which are not held within the aforementioned business models are classified and measured at fair value through profit or loss.

Purchases or sales of financial assets that require delivery of assets within the period generally established by regulation or convention in the marketplace are recognised on the trade date, that is, the date that the Group commits to purchase or sell the asset.

Subsequent measurement

The subsequent measurement of financial assets depends on their classification as follows:

Financial assets at amortised cost (debt instruments)

Financial assets at amortised cost are subsequently measured using the effective interest method and are subject to impairment. Gains and losses are recognised in profit or loss when the asset is derecognised, modified or impaired.

Financial assets at fair value through other comprehensive income (debt instruments)

For debt investments at fair value through other comprehensive income, interest income, foreign exchange revaluation and impairment losses or reversals are recognised in profit or loss and computed in the same manner as for financial assets measured at amortised cost. The remaining fair value changes are recognised in other comprehensive income. Upon derecognition, the cumulative fair value change recognised in other comprehensive income is recycled to profit or loss.

Financial assets at fair value through profit or loss

Financial assets at fair value through profit or loss are carried in the consolidated statements of financial position at fair value with net changes in fair value recognised in profit or loss.

Derecognition of financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognised (i.e., removed from the Group's consolidated statements of financial position) when:

- the rights to receive cash flows from the asset have expired; or

- the Group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a "pass-through" arrangement; and either (a) the Group has transferred substantially all the risks and rewards of the asset, or (b) the Group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if, and to what extent, it has retained the risk and rewards of ownership of the asset. When it has neither transferred nor retained substantially all the risks and rewards of the asset nor transferred control of the asset, the Group continues to recognise the transferred asset to the extent of the Group's continuing involvement. In that case, the Group also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Group has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the Group could be required to repay.

Impairment of financial assets

The Group recognises an allowance for expected credit losses ("**ECLs**") for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that the Group expects to receive, discounted at an approximation of the original effective interest rate. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

General approach

ECLs are recognised in two stages. For credit exposures for which there has not been a significant increase in credit risk since initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12 months (a 12-month ECL). For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (a lifetime ECL).

At the end of each of the Relevant Periods, the Group assesses whether the credit risk on a financial instrument has increased significantly since initial recognition. When making the assessment, the Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition and considers reasonable and supportable information that is available without undue cost or effort, including historical and forward-looking information.

The Group considers a financial asset in default when contractual payments are 90 days past due. However, in certain cases, the Group may also consider a financial asset to be in default when internal or external information indicates that the Group is unlikely to receive the outstanding contractual amounts in full before taking into account any credit enhancements held by the Group.

A financial asset is written off when there is no reasonable expectation of recovering the contractual cash flows.

Debt investments at fair value through other comprehensive income and financial assets at amortised cost are subject to impairment under the general approach and they are classified within the following stages for measurement of ECLs except for trade receivables and contract assets which apply the simplified approach as detailed below.

Stage 1	—	Financial instruments for which credit risk has not increased significantly since initial recognition and for which the loss allowance is measured at an amount equal to 12-month ECLs
Stage 2	—	Financial instruments for which credit risk has increased significantly since initial recognition but that are not credit-impaired financial assets and for which the loss allowance is measured at an amount equal to lifetime ECLs
Stage 3	—	Financial assets that are credit-impaired at the reporting date (but that are not purchased or originated credit-impaired) and for which the loss allowance is measured at an amount equal to lifetime ECLs

Simplified approach

For trade receivables and contract assets that do not contain a significant financing component or when the Group applies the practical expedient of not adjusting the effect of a significant financing component, the Group applies the simplified approach in calculating ECLs. Under the simplified approach, the Group does not track changes in credit risk, but instead recognises a loss allowance based on lifetime ECLs at each reporting date. The Group has established a provision matrix that is based on its historical credit loss experience, adjusted for forward-looking factors specific to the debtors and the economic environment.

Classification as equity and financial liabilities

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of financial liability and equity instrument.

A financial liability is any liability that is (a) a contractual obligation (i) to deliver cash or another financial asset to another entity; or (ii) to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the entity; or (b) a contract that will or may be settled in the entity's own equity instruments and is: (i) a non derivative for which the entity is or may be obliged to deliver a variable number of the entity's own equity instruments; or (ii) a derivative that will or may be settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the entity's own equity instruments.

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

Financial liabilities

Initial recognition and measurement

Financial liabilities are classified, at initial recognition, as financial liabilities at fair value through profit or loss, loans and borrowings, or payables, as appropriate.

All financial liabilities are recognised initially at fair value and, in the case of loans and borrowings and payables, net of directly attributable transaction costs.

The Group's financial liabilities include trade payables, other payables and accruals, interest-bearing bank borrowings and lease liabilities.

Subsequent measurement

Financial liabilities at amortised cost

After initial recognition, trade and other payables, and loans and borrowings are subsequently measured at amortised cost, using the effective interest rate method unless the effect of discounting would be immaterial, in which case they are stated at cost. Gains and losses are recognised in profit or loss when the liabilities are derecognised as well as through the effective interest rate amortisation process.

Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included in finance costs in profit or loss.

Derecognition of financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged or cancelled, or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and a recognition of a new liability, and the difference between the respective carrying amounts is recognised in profit or loss.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the assets and settle the liabilities simultaneously.

Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined on the weighted average basis and, in the case of work in progress and finished goods, comprises direct materials, direct labour and an appropriate proportion of overheads. Net realisable value is based on estimated selling prices less any estimated costs to be incurred to completion and disposal.

Cash and cash equivalents

Cash and cash equivalents in the statement of financial position comprise cash on hand and at banks, and short-term highly liquid deposits with a maturity of generally within three months that are readily convertible into known amounts of cash, subject to an insignificant risk of changes in value and held for the purpose of meeting short-term cash commitments.

For the purpose of the consolidated statements of cash flows, cash and cash equivalents comprise cash on hand and at banks, and short-term deposits as defined above.

Provisions

A provision is recognised when a present obligation (legal or constructive) has arisen as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation, provided that a reliable estimate can be made of the amount of the obligation.

When the effect of discounting is material, the amount recognised for a provision is the present value at the end of the reporting periods of the future expenditures expected to be required to settle the obligation. The increase in the discounted present value amount arising from the passage of time is included in finance costs in profit or loss.

The Group provides for warranties in relation to the sale of products for general repairs of defects occurring during the warranty period. Provisions for these assurance-type warranties granted by the Group are initially recognised based on sales volume and past experience of the level of repairs and returns. The warranty-related cost is revised annually.

Income tax

Income tax comprises current and deferred tax. Income tax relating to items recognised outside profit or loss is recognised outside profit or loss, either in other comprehensive income or directly in equity.

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of each of the Relevant Periods, taking into consideration interpretations and practices prevailing in the country in which the Group operates.

Deferred tax is provided, using the liability method, on all temporary differences at the end of each of the Relevant Periods between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

Deferred tax liabilities are recognised for all taxable temporary differences, except:

- when the deferred tax liability arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss and does not give rise to equal taxable and deductible temporary difference; and

- in respect of taxable temporary differences associated with investments in subsidiaries, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

Deferred tax assets are recognised for all deductible temporary differences, and the carry-forward of unused tax credits and any unused tax losses. Deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which the deductible temporary differences and the carryforward of unused tax credits and unused tax losses can be utilised, except:

- when the deferred tax asset relating to the deductible temporary differences arises from the initial recognition of an asset or liability in a transaction that is not a business combination and, at the time of the transaction, affects neither the accounting profit nor taxable profit or loss and does not give rise to equal taxable and deductible temporary difference; and

- in respect of deductible temporary differences associated with investments in subsidiaries, deferred tax assets are only recognised to the extent that it is probable that the temporary differences will reverse in the foreseeable future and taxable profit will be available against which the temporary differences can be utilised.

The carrying amount of deferred tax assets is reviewed at the end of each of the Relevant Periods and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are reassessed at the end of each of the Relevant Periods and are recognised to the extent that it has become probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply to the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of each of the Relevant Periods.

Deferred tax assets and deferred tax liabilities are offset if and only if the Group has a legally enforceable right to set off current tax assets and current tax liabilities and the deferred tax assets and deferred tax liabilities relate to income taxes levied by the same taxation authority on either the same taxable entity or different taxable entities which intend either to settle current tax liabilities and assets on a net basis, or to realise the assets and settle the liabilities simultaneously, in each future period in which significant amounts of deferred tax liabilities or assets are expected to be settled or recovered.

Government grants

Government grants are recognised at their fair value where there is reasonable assurance that the grant will be received and all attaching conditions will be complied with. When the grant relates to an expense item, it is recognised as income on a systematic basis over the periods that the costs for which it is intended to compensate, are expensed.

Where the grant relates to an asset, the fair value is credited to a deferred income account and is released to profit or loss over the expected useful life of the relevant asset by equal annual instalments or deducted from the carrying amount of the asset and released to profit or loss by way of a reduced depreciation charge.

Revenue recognition

Revenue from contracts with customers

Revenue from contracts with customers is recognised when control of goods or services is transferred to the customers at an amount that reflects the consideration to which the Group expects to be entitled in exchange for those goods or services.

When the consideration in a contract includes a variable amount, the amount of consideration is estimated to which the Group will be entitled in exchange for transferring the goods or services to the customer. The variable consideration is estimated at contract inception and constrained until it is highly probable that a significant revenue reversal in the amount of cumulative revenue recognised will not occur when the associated uncertainty with the variable consideration is subsequently resolved.

(a) Sales of robotic solutions

Robotic solutions involve design, production, deployment and commissioning of customised robotic systems, which can complete required tasks in specified scenarios as indicated in the sales contract. The Group determines that the promised goods and services in robotic solutions represent one performance obligation, because these promises are highly interdependent, and the customer is unable to derive significant benefits from the access to an individual promise for the intended purposes without receipt of the other goods or services.

As none of the criteria under paragraph 35 of HKFRS 15 can be met for the control transfers over time, revenue from the sale of robotic solutions is recognised at point in time when the robotic solutions are accepted by the customers.

(b) Sales of robots and others

Revenue from the sale of robots and others is recognised at the point in time when control of the product or service is transferred to the customer, generally on delivery or acceptance of the products or services as agreed in the sales contracts.

Other income

Interest income is recognised on an accrual basis using the effective interest method by applying the rate that exactly discounts the estimated future cash receipts over the expected life of the financial instrument or a shorter period, when appropriate, to the net carrying amount of the financial asset.

Contract assets

If the Group performs by transferring services to a customer before being unconditionally entitled to the consideration under the contract terms, a contract asset is recognised for the earned consideration that is conditional. Contract assets are subject to impairment assessment, details of which are included in the accounting policies for impairment of financial assets. They are reclassified to trade receivables when the right to the consideration becomes unconditional.

Contract liabilities

A contract liability is recognised when a payment is received or a payment is due (whichever is earlier) from a customer before the Group transfers the related goods or services. Contract liabilities are recognised as revenue when the Group performs under the contract (i.e., transfers control of the related goods or services to the customer).

Contract costs

Other than the costs which are capitalised as inventories, property, plant and equipment and intangible assets, costs incurred to fulfil a contract with a customer are capitalised as an asset if all of the following criteria are met:

(a) The costs relate directly to a contract or to an anticipated contract that the entity can specifically identify.

(b) The costs generate or enhance resources of the entity that will be used in satisfying (or in continuing to satisfy) performance obligations in the future.

(c) The costs are expected to be recovered.

The capitalised contract costs are amortised and charged to profit or loss on a systematic basis that is consistent with the transfer to the customer of the goods or services to which the asset relates. Other contract costs are expensed as incurred.

Share-based payments

The Company operates share award schemes. Employees (including directors) of the Group receive remuneration and rewards in the form of share-based payments, whereby employees render services as consideration for equity instruments ("**equity-settled transactions**").

The cost of equity-settled transactions with employees is measured by reference to the fair value at the date at which they are granted. The fair value is determined by an external valuer using a binomial model, further details of which are given in note 33 to the Historical Financial Information.

The cost of equity-settled transactions is recognised in employee benefit expense, together with a corresponding increase in equity, over the period in which the performance and/or service conditions are fulfilled. The cumulative expense recognised for equity-settled transactions at the end of each of the Relevant Periods until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the number of equity instruments that will ultimately vest. The charge or credit to profit or loss for a period represents the movement in the cumulative expense recognised as at the beginning and end of that period.

Service and non-market performance conditions are not taken into account when determining the grant date fair value of awards, but the likelihood of the conditions being met is assessed as part of the Group's best estimate of the number of equity instruments that will ultimately vest. Market performance conditions are reflected within the grant date fair value. Any other conditions attached to an award, but without an associated service requirement, are considered to be non-vesting conditions. Non-vesting conditions are reflected in the fair value of an award and lead to an immediate expensing of an option unless there are also service and/or performance conditions.

For awards that do not ultimately vest because non-market performance and/or service conditions have not been met, no expense is recognised. Where awards include a market or non-vesting condition, the transactions are treated as vesting irrespective of whether the market or non-vesting condition is satisfied, provided that all other performance and/or service conditions are satisfied.

Where the terms of an equity-settled option are modified, as a minimum an expense is recognised as if the terms had not been modified, if the original terms of the option are met. In addition, an expense is recognised for any modification that increases the total fair value of the share-based payments, or is otherwise beneficial to the employee as measured at the date of modification.

Where an equity-settled option is cancelled, it is treated as if it had vested on the date of cancelation, and any expense not yet recognised for the option is recognised immediately.

A liability is recognised for the fair value of cash-settled transactions. The fair value is measured initially at the grant date and at each reporting date up to and including the settlement date, further details of which are given in note 33 to the Historical Financial Information. The fair value is expensed over the period until the vesting date with recognition of a corresponding liability. The cumulative expense recognised for cash-settled transactions at the end of each reporting period until the vesting date reflects the extent to which the vesting period has expired and the Group's best estimate of the number of awards that will ultimately vest.

Other employee benefits

Pension scheme

The employees of the Group's subsidiaries which operate in Chinese Mainland are required to participate in a central pension scheme operated by the local municipal government. The subsidiaries operating in Chinese Mainland are required to contribute a certain percentage of their payroll costs to the central pension scheme. The contributions are charged to profit or loss as they become payable in accordance with the rules of the central pension scheme.

Housing fund and other social insurances — Chinese Mainland

The Group has participated in defined social security contribution schemes for its employees pursuant to the relevant laws and regulations of the PRC. These include housing fund, basic medical insurance, unemployment insurance, injury insurance and maternity insurance. The Group makes monthly contributions to the housing fund and other social insurances. The contributions are charged to profit or loss on an accrual basis. The Group's liability in respect of these funds is limited to the contributions payable in each reporting period.

Termination benefits

Termination benefits are recognised at the earlier of when the Group can no longer withdraw the offer of those benefits and when the Group recognises restructuring costs involving the payment of termination benefits.

Foreign currencies

The Historical Financial Information is presented in RMB, which is the Company's functional currency. Foreign currency transactions recorded by the entities in the Group are initially recorded using their respective functional currency rates prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the functional currency rates of exchange ruling at the end of each of the Relevant Periods. Differences arising on settlement or translation of monetary items are recognised in profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions. Non-monetary items measured at fair value in a foreign currency are translated using the exchange rates at the date when the fair value was measured. The gain or loss arising on translation of a non-monetary item measured at fair value is treated in line with the recognition of the gain or loss on change in fair value of the item (i.e.,translation difference on the item whose fair value gain or loss is recognised in other comprehensive income or profit or loss is also recognised in other comprehensive income or profit or loss, respectively).

In determining the exchange rate on initial recognition of the related asset, expense or income on the derecognition of a non-monetary asset or non-monetary liability relating to an advance consideration, the date of initial transaction is the date on which the Group initially recognises the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, the Group determines the transaction date for each payment or receipt of the advance consideration.

Borrowing costs

All borrowing costs are expensed in the period in which they are incurred. Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds.

Events after the reporting period

If the Group receives information after the reporting period, but prior to the date of authorisation for issue, about conditions that existed at the end of the reporting period, it will assess whether the information affects the amounts that it recognises in its financial statements. The Group will adjust the amounts recognised in its financial statements to reflect any adjusting events after the reporting period and update the disclosures that relate to those conditions in light of the new information. For non-adjusting events after the reporting period, the Group will not change the amounts recognised in its financial statements, but will disclose the nature of the non-adjusting events and an estimate of their financial effects, or a statement that such an estimate cannot be made, if applicable.

3. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES

The preparation of the Group's Historical Financial Information requires management to make Judgments, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and their accompanying disclosures, and the disclosure of contingent liabilities. Uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amounts of the assets or liabilities affected in the future.

Judgements

In the process of applying the Group's accounting policies, management has made the following judgements, apart from those involving estimations, which have the most significant effect on the amounts recognised in the Historical Financial Information:

Recognition of income taxes and deferred tax assets

Determining income tax provision involves judgement on the future tax treatment of certain transactions and when certain matters relating to the income taxes have not been confirmed by the local tax bureau. Management evaluates tax implications of transactions and tax provisions are set up accordingly. The tax treatments of such transactions are reconsidered periodically to take into account all changes in tax legislation.

Deferred tax assets are recognised for unused tax losses to the extent that it is probable that taxable profit will be available against which the losses can be utilised. Significant management judgement is required to determine the amount of deferred tax assets that can be recognised, based upon the likely timing and level of future taxable profits together with future tax planning strategies.

Development expenses

Expenses incurred on each pipeline project to develop new products is capitalised and deferred only when the Group can demonstrate the technical feasibility of completing the intangible asset so that it will be available for use or sale, its intention to complete and its ability to use or sell the asset, how the asset will generate future economic benefits, the availability of resources to complete the project and the ability to measure reliably the expenditure during the development. Product development expenditure which does not meet these criteria is expensed when incurred.

Estimation uncertainty

The key assumptions concerning the future and other key sources of estimation uncertainty at the end of each of the Relevant Periods, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year, are described below.

Fair value of share-based payments

The equity-settled share-based payments were estimated based on fair value of the awards as at the date of grant using valuation model depending on the terms and conditions of the grant. The fair value of the cash-settled share-based payments was estimated at the grant date and at each reporting date up to and including the settlement date using valuation models. This requires the Group to determine the most appropriate inputs to the valuation model and make assumptions about them. Further details are included in note 33 to the Historical Financial Information.

Provision against obsolete and slow-moving inventories

The Group reviews the condition of its inventories at the end of each of the Relevant Periods and makes provisions against obsolete and slow-moving inventory items which are identified as no longer suitable for sale or use based on sales forecasts. Such sales forecasts are prepared based on agreements or orders on hand and estimated sales in the foreseeable future based on historical experiences with its customers and current market conditions of robots' industry. Management estimates the net realisable value for those obsolete and slow-moving inventories based primarily on the latest invoice prices and current market conditions. The estimation is reassessed at the end of each of the Relevant Periods. The provision against obsolete and slow-moving inventories requires the use of judgements and estimates. Where the actual outcome or expectation in future is different from the original estimate, such difference will impact on the carrying value of inventories and the write-down of inventories recognised in the periods in which such estimates have been changed.

Provision for expected credit losses on trade receivables and contract assets

The Group uses a provision matrix to calculate ECLs for trade receivables and contract assets. The provision rates are based on days past due for groupings of various customer segments that have similar loss patterns.

The provision matrix is initially based on the Group's historical observed default rates. The Group will calibrate the matrix to adjust the historical credit loss experience with forward-looking information. For instance, if forecast economic conditions (i.e., gross domestic product) are expected to deteriorate over the next year which can lead to an increased number of defaults in the manufacturing sector, the historical default rates are adjusted. At each reporting date, the historical observed default rates are updated and changes in the forward-looking estimates are analysed.

The assessment of the correlation among historical observed default rates, forecast economic conditions and ECLs is a significant estimate. The amount of ECLs is sensitive to changes in circumstances and forecast economic conditions. The Group's historical credit loss experience and forecast of economic conditions may also not be representative of a customer's actual default in the future. The information about the ECLs on the Group's trade receivables and contract assets is disclosed in note 20 and note 22 to the Historical Financial Information, respectively.

Leases — estimating the incremental borrowing rate

The Group cannot readily determine the interest rate implicit in a lease, and therefore, it uses an incremental borrowing rate ("**IBR**") to measure lease liabilities. The IBR is the rate of interest that the Group would have to pay to borrow over a similar term, and with a similar security, the funds necessary to obtain an asset of a similar value to the right-of-use asset in a similar economic environment. The IBR therefore reflects what the Group "would have to pay", which requires estimation when no observable rates are available (such as for subsidiaries that do not enter into financing transactions) or when it needs to be adjusted to reflect the terms and conditions of the lease (for example, when leases are not in the subsidiary's functional currency). The Group estimates the IBR using observable inputs (such as market interest rates) when available) when available and is required to make certain entity-specific estimates (such as the subsidiary's stand-alone credit rating).

Impairment of non-financial assets

The Group assesses whether there are any indicators of impairment for all non-financial assets (including the right-of-use assets) at the end of each reporting period. Non-financial assets are tested for impairment when there are indicators that the carrying amounts may not be recoverable. An impairment exists when the carrying value of an asset or a cash-generating unit exceeds its recoverable amount, which is the higher of its fair value less costs of disposal and its value in use. The calculation of the fair value less costs of disposal is based on available data from binding sales transactions in an arm's length transaction of similar assets or observable market prices less incremental costs for disposing of the asset. When value in use calculations are undertaken, management must estimate the expected future cash flows from the asset or cash-generating unit and choose a suitable discount rate in order to calculate the present value of those cash flows.

4. SEGMENT INFORMATION

For management purposes, the Group is organised into business units based on their products and services and has one reportable operating segment.

The information reported to the directors, who are the chief operating decision makers, for the purpose of resource allocation and assessment of performance does not contain discrete operating segment financial information and the directors reviewed the financial results of the Group as a whole. Therefore, no further information about the operating segment is presented.

Geographical information

(a) Revenue from external customers

	Year ended 31 December			Four months ended 30 April	
	2023	2024	2025	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* (Unaudited)	*RMB'000*
Chinese mainland*	141,883	190,123	225,239	36,570	34,338
Others**	20,283	60,399	76,254	8,177	72,602
	162,166	250,522	301,493	44,747	106,940

* Includes domestic sales subject to standard Chinese VAT invoicing and local delivery processes.

** Primarily consists of (i) Japan, (ii) Taiwan, China, and (iii) certain Southeast Asia countries such as Vietnam and Thailand. In addition, sales to bonded warehouse and free trade zone located in Chinese mainland are also included in sales to other countries and regions as these transactions (i) require customs clearance procedures (similar to cross-border exports); and (ii) are exempt from PRC VAT invoicing, aligning them operationally with overseas sales, notwithstanding the relevant customers may still based within the geographical regions of the PRC.

(b) Non-current assets

The Group's most of non-current assets are located in Chinese Mainland. Thus, no geographic information is presented.

(c) Information about major customers

Revenue from a major customer which accounted for 10% or more of the Group's revenue during the Relevant Periods and the four months ended 30 April 2025 are set out below:

	Year ended 31 December			Four months ended 30 April	
	2023	2024	2025	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* (Unaudited)	*RMB'000*
Customer 1	N/A*	31,289	N/A*	N/A*	34,376
Customer 2	N/A*	N/A*	N/A*	N/A*	16,572

* The corresponding revenue of the customer is not disclosed as the revenue individually did not account for 10% or more of the Group's revenue during the corresponding period.

5. REVENUE

An analysis of revenue is as follows:

Revenue from contracts with customers

(a) Disaggregated revenue information

	Year ended 31 December			Four months ended 30 April	
	2023	**2024**	**2025**	**2025**	**2026**
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* (Unaudited)	*RMB'000*
Types of goods					
Robotic solutions	141,982	228,087	254,631	33,584	40,786
Robots and others*	20,184	22,435	46,862	11,163	66,154
Total	162,166	250,522	301,493	44,747	106,940
Timing of revenue recognition					
Goods transferred at a point in time	162,166	250,522	301,493	44,747	106,940

* "Others" primarily represents the revenue derived from the sales of the RoboVerse system software, technical support services and other parts, components and accessories.

The following table shows the amounts of revenue recognised in the Relevant Periods and four months ended 30 April 2025 that were included in the contract liabilities at the beginning of each of the reporting periods:

	Year ended 31 December			Four months ended 30 April	
	2023	**2024**	**2025**	**2025**	**2026**
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* (Unaudited)	*RMB'000*
Revenue recognised that was included in contract liabilities at the beginning of the reporting period:	43,270	34,054	16,111	16,111	25,375

(b) Performance obligations

Information about the Group's performance obligations is summarised below:

Sales of robotic solutions

The performance obligation is satisfied when the customer takes possession of and accepts the robotic solution. Payment terms and conditions are based on the billing schedule established in the contracts with customers.

Sale of products

The performance obligation is satisfied upon delivery and acceptance of products and payment is generally due within 3 months from delivery.

The amounts of transaction prices allocated to the remaining performance obligations (unsatisfied or partially unsatisfied) are as follows:

	As at 31 December			As at 30 April
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Amounts expected to be recognised as revenue				
Within one year	164,883	121,991	168,433	185,959
Total	164,883	121,991	168,433	185,959

The amounts of transaction prices allocated to the remaining performance obligations mainly relate to robotic solutions, of which the performance obligations are to be satisfied within one year.

6. OTHER INCOME AND GAINS

An analysis of other income and gains is as follows:

	Year ended 31 December			Four months ended 30 April	
	2023	2024	2025	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* (Unaudited)	*RMB'000*
Other income					
Government grants*	4,181	6,142	1,076	361	792
Bank interest income	416	181	578	91	37
Interest income from certificate of deposits	—	37	190	63	63
Investment income from financial assets at fair value through profit or loss	1,117	573	866	100	254
Compensation income from a lawsuit	—	—	—	—	1,491
Others	38	50	5	—	—
Total other income	5,752	6,983	2,715	615	2,637
Gains					
Foreign exchange gains	—	734	—	136	—
Gains on disposal of property, plant and equipment	598	128	—	—	—
Gains on lease termination	730	67	—	—	—
Fair value gains on financial assets at FVTPL	—	8	609	—	182
Total gains	1,328	937	609	136	182
Total other income and gains	7,080	7,920	3,324	751	2,819

* Certain government grants have been received related to the Group's day-to-day operations. Government grants also included compensation for expenses or losses that already incurred by the Group or for the purpose of giving immediate financial support to the Group. There are no unfulfilled conditions or contingencies relating to these grants.

7. FINANCE COSTS

An analysis of finance costs is as follows:

	Year ended 31 December			Four months ended 30 April	
	2023	2024	2025	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* (Unaudited)	*RMB'000*
Interest expenses on:					
Bank and other borrowings	1,913	1,150	826	319	—
Lease liabilities	419	230	258	102	103
Total	2,332	1,380	1,084	421	103

For the details of pre-**[REDACTED]** investments, please refer to note 31 to this report.

8. LOSS BEFORE TAX

The Group's loss before tax is arrived at after charging/(crediting):

	Notes	Year ended 31 December			Four months ended 30 April	
		2023	2024	2025	2025	2026
		RMB'000	*RMB'000*	*RMB'000*	*RMB'000* (Unaudited)	*RMB'000*

	Notes	Year ended 31 December			Four months ended 30 April	
		2023	2024	2025	2025	2026
		RMB'000	*RMB'000*	*RMB'000*	*RMB'000* (Unaudited)	*RMB'000*
Employee benefit expense (excluding directors', supervisors' and chief executive's remuneration *(note 9))**:*	*9*					
—Wages and salaries		95,515	78,925	89,882	30,497	45,624
— Pension scheme contributions		3,891	3,531	4,744	1,473	2,150
— Share-based payment expenses		5,372	5,186	93,336	3,966	24,553
Total		104,778	87,642	187,962	35,936	72,327

* The amounts disclosed for cost of inventories sold included the write-down of inventories to net realisable value.

** The depreciation of property, plant and equipment, amortisation of intangible assets, depreciation of right-of-use assets and employee benefit expense are included in "Cost of sales", "Selling and distribution expenses", "Administrative expenses", and "Research and development expenses" in the consolidated statements of profit or loss and other comprehensive income.

*** The amounts are included in "Other income and gains" and "Other expenses" in the consolidated statements of profit or loss and other comprehensive income.

**** The amount is included in "Selling and marketing expenses" in the consolidated statements of profit or loss and other comprehensive income.

9. DIRECTORS' CHIEF EXECUTIVE'S AND SUPERVISORS' REMUNERATION

Directors', chief executive's and supervisors' remuneration for the Relevant Periods and the four months ended 30 April 2025 disclosed pursuant to the Listing Rules, section 383(1)(a), (b), (c) and (f) of the Hong Kong Companies Ordinance and Part 2 of the Companies (Disclosure of Information about Benefits of Directors) Regulation, is as follows:

	Year ended 31 December			Four months ended 30 April	
	2023	2024	2025	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* (Unaudited)	*RMB'000*
Fees	—	—	408	—	213
Other emoluments:

Notes:

(i) Mr. Wang Yongkun was appointed as the executive chairman in April 2018.

(ii) Mr. Li Hongxiang was appointed as an executive director in June 2016.

(iii) Mr. Wang Jinpeng was appointed as an executive director in August 2020.

(iv) Mr. Wang Maolin was appointed as an executive director in October 2021 and retired as executive director in May 2025.

(v) Mr. Zhu Jia was appointed as non-executive director in August 2020. Mr. Zhu Jia did not receive any director's emolument, annual performance bonus and/or share based payments granted from the Company.

(vi) Mr. Zhang Xingchen was appointed as a non-executive director in September 2020. Mr. Zhang Xingchen did not receive any director's emolument, annual performance bonus and/or share based payments granted from the Company.

(vii) Mr. Luo Hong was appointed a non-executive director in June 2016 and resigned as a non-executive director in May 2025. Mr. Luo Hong did not receive any director's emolument, annual performance bonus and/or share based payments granted from the Company.

(viii) Mr. Wei Xiao'an was appointed a non-executive director in October 2021. Mr. Wei Xiao'an did not receive any director's emolument, annual performance bonus and/or share based payments granted from the Company.

(ix) Mr. Lin Enfeng was appointed as non-executive director in August 2017, changed to supervisor in August 2020, and resigned as supervisor in March 2023. Mr. Lin Enfeng did not receive any director's emolument, annual performance bonus and/or share based payments granted from the Company.

(x) Mr. Ni Liang was appointed as non-executive director in March 2023. Mr. Ni Liang did not receive any director's emolument, annual performance bonus and/or share based payments granted from the Company.

(xi) Mrs. Tai Hanning was appointed as supervisor in March 2023 and resigned as supervisor in November 2023. Mrs. Tai Hanning did not receive any director's emolument, annual performance bonus and/or share based payments granted from the Company.

(xii) Mr. Qiu Lianyong was appointed as supervisor in November 2023. Mr. Qiu Lianyong did not receive any director's emolument, annual performance bonus and/or share based payments granted from the Company.

During the Relevant Periods and the four months ended 30 April 2025, share awards were granted to certain directors in respect to their services rendering to the Group, further details of which are set out in note 33 to the Historical Financial Information. The fair value of such granted share awards, which has been recognised in profit or loss, was determined as at the date of grant and the amount included in the Historical Financial Information is included in the above directors' remuneration disclosures.

Save for the above disclosures, there was no arrangement under which a director or the chief executive or a supervisor waived or agreed to waive any remuneration during the Relevant Periods and the four months ended 30 April 2025.

10. FIVE HIGHEST PAID EMPLOYEES

The five highest paid employees of the Group during the Relevant Periods and the four months ended 30 April 2025 included three, two, two, two and one directors of the Company, respectively, details of whose remuneration are set out in note 9 to the Historical Financial Information above. Details of the remuneration the remaining two, three, three, three and four highest paid employees who are neither a director nor chief executive of the Company for the five highest paid employees during the Relevant Periods and the four months ended 30 April 2025 are as follows:

	Year ended 31 December			Four months ended 30 April	
	2023	2024	2025	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* (Unaudited)	*RMB'000*
Salaries, allowances and benefits in kind	1,805	1,761	1,612	611	702
Performance related bonuses	16	187	613	138	356
Pension scheme contributions	20	62	136	14	35
Share-based payment expenses	109	—	5,592	336	863
Total	1,950	2,010	7,953	1,099	1,956

The emoluments of the five highest paid individuals were within the following bands:

	Year ended 31 December			Four months ended 30 April	
	2023	2024	2025	2025	2026
				(Unaudited)	
HKD500,001 to HKD1,000,000	1	3	—	4	3
HKD1,000,001 to HKD1,500,000	1	—	—	—	—
HKD1,500,001 to HKD2,000,000	—	—	2	—	—
HKD4,500,001 to HKD5,000,000	—	—	1	—	—
Total	2	3	3	4	3

During the Relevant Periods and the four months ended 30 April 2025, share awards were granted to certain highest paid employees in respect of their services and contributions to the Group, further details of which are set out in note 33 to the Historical Financial Information. The fair value of such awards, which has been recognised in profit or loss immediately upon the date of grant or over the vesting period, was determined as at the date of grant and the amount included in the Historical Financial Information for the Relevant Periods and the four months ended 30 April 2025 is included in the above highest paid employees' remuneration disclosures.

11. INCOME TAX

The Group is subject to income tax on an entity basis on profits arising in or derived from the jurisdictions in which members of the Group are domiciled and operate.

The provision for corporate income tax in Chinese Mainland is based on the statutory rate of 25% of the assessable profits, in accordance with the PRC Income Tax Law and the respective regulations which were approved and became effective on 1 January 2008.

The Company was qualified as a high and new technology enterprise and was subject to income tax at a preferential tax rate of 15% during the years ended 31 December 2023 and 2024. For the year ended 2025 and the four months ended 30 April 2026, the applicable tax rate was 25%.

A reconciliation of the tax expense applicable to loss before tax at the statutory rate to the tax expense at the effective tax rate is as follows:

	Year ended 31 December			Four months ended 30 April	
	2023	2024	2025	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* (Unaudited)	*RMB'000*
Loss before tax	(100,348)	(45,144)	(202,021)	(56,086)	(61,835)
Tax at the statutory tax rate	(25,087)	(11,286)	(50,505)	(14,022)	(15,459)
Effect of different tax rates enacted by local authorities	8,307	2,872	—	—	—
Effect of research and development expenses that are additionally deducted	(8,162)	(5,038)	(10,760)	(2,694)	(4,839)
Expenses not deductible for tax	1,127	1,076	37,705	7,471	9,236
Effect of deductible temporary difference not recognised	2,551	2,441	7,536	3,224	5,151
Tax losses utilised from previous periods	—	—	(2,244)	—	(4,927)
Tax losses not recognised	21,264	9,935	18,268	6,021	10,838
Total	—	—	—	—	—

According to the PRC Corporate Income Tax regulations, the Company is entitled to additional deduction of qualified research and development expenses from the taxable income. The percentage of additional deduction was 100% during the Relevant Periods and the four months ended 30 April 2025.

Deferred tax assets have not been recognised in respect of the following items:

	As at 31 December			As at 30 April
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Tax losses	432,976	484,105	547,186	569,284
Deductible temporary differences	86,099	101,535	131,680	151,083

The Group has accumulated tax losses in Chinese Mainland of RMB432,976,000, RMB484,105,000 and RMB547,186,000 and RMB569,284,000 as at 31 December 2023, 2024, 2025 and 30 April 2026, respectively, that would expire in one to ten years for offsetting against future taxable profits of the companies located in Chinese Mainland in which the tax losses arose.

Deferred tax assets have not been recognised in respect of these losses as they have arisen in subsidiaries that have been loss-making for some time and it is not considered probable that taxable profits in foreseeable future will be available against which the tax losses can be utilised.

12. DIVIDEND

No dividend has been paid or declared by the Company during the Relevant Periods and the four months ended 30 April 2025.

13. LOSS PER SHARE ATTRIBUTABLE TO ORDINARY EQUITY HOLDERS OF THE PARENT

The calculation of the basic loss per share amounts is based on the loss for each of the Relevant Periods and the four months ended 30 April 2025 attributable to ordinary equity holders of the parent, and the weighted average number of share capital issue during the Relevant Periods and the four months ended 30 April 2025. The weighted average numbers of ordinary shares in issue for the Relevant Periods and the four months ended 30 April 2025 before the conversion of the Company into a joint stock company were determined by assuming that the paid-in capital had been fully converted into share capital at the same conversion ratio of 1:3.08 as upon conversion of the Company into a joint stock company in May 2025.

No adjustment has been made to the basic loss per share amounts presented for the Relevant Periods and the four months ended 30 April 2025 in respect of a dilution as the Group had no potentially dilutive ordinary shares in issue.

The calculation of basic loss per share is based on:

	Year ended 31 December			Four months ended 30 April	
	2023	2024	2025	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* (Unaudited)	*RMB'000*
Loss attributable to ordinary equity holders of the parent *(RMB'000)*	(100,348)	(45,144)	(202,021)	(56,086)	(61,835)
Weighted average number of ordinary shares in issue during the year/period used in the basic and diluted loss per share calculation *('000)**	170,399	180,352	209,388	190,884	221,053

For the details of pre-**[REDACTED]** investments, please refer to note 31 to this report.

* The weighted average number of ordinary shares in issue used in the basic loss per share calculation has been adjusted retrospectively to reflect the subdivision of shares on a one-for-ten basis, which shall take effect immediately before the **[REDACTED]**.

Net carrying amount	446	272	102	2,358	329	465	3,972

Impairment testing of non-financial assets

Non-financial assets (including the property, plant and equipment, right-of-use assets and intangible assets) of the Group are assessed as one cash-generating unit for impairment testing as at the end of each of the Relevant Periods.

The recoverable amount of the cash-generating unit has been determined based on a value in use calculation using cash flow projections based on financial budgets covering the remaining useful life of non-financial assets approved by senior management. The pre-tax discount rate applied to the cash flow projections, the revenue growth rate and the profit margin used to extrapolate the cash flows of the cash-generating unit are as follows:

	As at 31 December			As at 30 April
	2023	2024	2025	2026
Average revenue growth rate	30.53%	25.74%	26.82%	26.82%
Average profit margin	41.74%	42.33%	44.18%	44.18%
Pre-tax discount rate	18.2%	18.2%	19.0%	19.0%

The calculation of value in use is based on the following assumptions:

Revenue growth rate — the rate is based on the average revenue growth achieved in the past years and expected market development.

Profit margin — the margin is derived through combining historical performance analysis and forward-looking market projections incorporating industry-specific demand drivers, competitive dynamics, and macroeconomic development.

Pre-tax discount rate — the rate reflects management's estimate of the risks specific to the unit.

The values assigned to the key assumptions on revenue growth rate, profit margin, discount rates are consistent with management's past experience and external information sources.

As at 31 December 2023, 2024, 2025 and 30 April 2026, the recoverable amount of the cash-generating unit has exceeded its carrying amount and no impairment provision was made.

15. INTANGIBLE ASSETS

Accumulated amortisation	(1,313)
Net carrying amount	277

16. LEASES

The Group as a lessee

During the Relevant Periods, the Group entered into certain long-term lease contracts for buildings which generally have lease terms between two and five years. Generally, the Group is restricted from assigning and subleasing the leased assets outside the Group.

(a) Right-of-use assets

The carrying amounts of right-of-use assets and the movements during the Relevant Periods are as follows:

The Group

	Buildings
	RMB'000
As at 1 January 2023	18,732
Additions	244
Early termination	(6,833)
Depreciation charge	(8,108)
As at 31 December 2023	4,035
As at 1 January 2024	4,035
Additions	11,465
Early termination	(394)
Depreciation charge	(5,095)
As at 31 December 2024	10,011
As at 1 January 2025	10,011
Depreciation charge	(4,444)
As at 31 December 2025	5,567
As at 1 January 2026	5,567
Additions	10,097
Depreciation charge	(2,061)
As at 30 April 2026	13,603

The Company

	Buildings
	RMB'000
As at 1 January 2023	14,398
Additions	244
Early termination	(5,223)
Depreciation charge	(5,646)
As at 31 December 2023	3,773
As at 1 January 2024	3,773
Additions	8,234
Early termination	(394)
Depreciation charge	(3,487)
As at 31 December 2024	8,126
As at 1 January 2025	8,126
Depreciation charge	(2,828)
As at 31 December 2025	5,298
As at 1 January 2026	5,298
Additions	9,276
Depreciation charge	(1,515)
As at 30 April 2026	13,059

(b) Lease liabilities

The carrying amounts of lease liabilities and the movements during the Relevant Periods are as follows:

The Group

	Year ended 31 December			Four months ended 30 April
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Carrying amount at the beginning of the year/period	20,504	4,565	10,095	5,809

	2023	2024	2025	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* (Unaudited)	*RMB'000*
Interest on lease liabilities	346	159	225	85	97
Gain on lease termination	600	67	—	—	—
Depreciation charge of right-of-use assets	5,646	3,487	2,828	931	1,515
Expense relating to short-term leases*	96	42	741	24	29
Total amount recognised in profit or loss	6,688	3,755	3,794	1,040	1,641

* Included in "Administrative expenses" and "Selling and marketing expenses" in the consolidated statements of profit or loss and other comprehensive income.

(d) The total cash outflow for leases is set out in note 34 to the Historical Financial Information.

17. INVESTMENT IN SUBSIDIARIES

The Company

	As at 31 December			As at 30 April
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Investment in subsidiaries, at cost				
Standard Robots (Kunshan) Co., Ltd	40,543	51,096	55,076	55,556
Standard Robots Technology (Wuxi) Co., Ltd.	—	8,000	8,000	8,000
Standard Robots Intelligence (Shenzhen) Co., Ltd	—	—	4,000	6,000
	40,543	59,096	67,076	69,556

Standard Robots Intelligence (Shenzhen) Co., Ltd ("**Standard Shenzhen**") is engaged in the research and development and incurred losses. Standard Robots (Kunshan) Co., Ltd ("**Standard Kunshan**") is the sole manufacturing entity of the Group. The directors of the Company determined that the investments in Standard Kunshan and Standard Shenzhen have impairment indicators as at each end of the Relevant Periods and have performed impairment testing. As the recoverable amount of investments in the subsidiaries is higher than the carrying amount of the investments, therefore no provision was made for the Relevant Periods.

18. FINANCIAL ASSETS AT FAIR VALUE THROUGH PROFIT OR LOSS

The Group and the Company

	As at 31 December			As at 30 April
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Wealth management products	—	17,008	80,609	40,791

As at 31 December 2023, 2024, 2025 and 30 April 2026, the financial assets at fair value through profit or loss represented floating return monetary fund and wealth management products issued by certain banks in Chinese Mainland, with expected return rates ranging from 1.89% to 2.99% per annum. They were classified as financial assets at fair value through profit or loss as their contractual cash flows are not solely payments of principal and interest.

19. INVENTORIES

The Group

	As at 31 December			As at 30 April
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Raw materials	20,232	15,108	17,991	30,100
Work in progress	6,814	5,801	10,298	25,389
Finished goods	9,094	9,693	11,836	18,293
Contract fulfillment costs	74,320	28,830	23,452	48,672
Total	110,460	59,432	63,577	122,454

As at 31 December 2023, 2024, 2025 and 30 April 2026, the amount of inventories was net of a write-down of approximately RMB30,017,000, RMB19,579,000, RMB21,628,000 and RMB25,681,000, respectively.

The Company

	As at 31 December			As at 30 April
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Raw materials	1,994	755	2,223	8,554
Work in progress	797	211	498	1,539
Finished goods	7,241	5,272	8,886	14,680
Contract fulfillment costs	74,320	28,830	26,754	50,697
Total	84,352	35,068	38,361	75,470

As at 31 December 2023, 2024, 2025 and 30 April 2026, the amount of inventories was net of a write-down of approximately RMB25,881,000, RMB14,825,000, RMB14,233,000 and RMB22,607,000, respectively.

20. TRADE AND BILLS RECEIVABLES

The Group

	As at 31 December			As at 30 April
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Bills receivable	9,764	5,503	6,393	7,589
Trade receivables	78,604	145,461	233,043	252,566
	88,368	150,964	239,436	260,155
Less: Allowance for credit losses	(36,551)	(57,542)	(76,753)	(87,709)
Total	51,817	93,422	162,683	172,446

Bills receivable are subject to impairment under the general approach and the impairment is considered to be minimal.

The Group's trading terms with its customers are mainly on credit. For sales of products, the credits period is normally 90 days. For sales of robotic solutions, the settlement is made in accordance with the terms specified in the sales contracts. The Group seeks to maintain strict control over its outstanding receivables to minimise credit risk. Overdue balances are reviewed regularly by senior management. The Group does not hold any collateral or other credit enhancements over its trade receivable balances. The balances of trade receivables are non-interest-bearing.

An ageing analysis of the trade and bills receivables as at the end of each of the Relevant Periods, based on the revenue recognition date and net of allowance for expected credit losses, is as follows:

	As at 31 December			As at 30 April
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Within 1 year	51,040	90,093	147,885	154,408
1 to 2 years	777	3,329	13,260	16,371
Over 2 years	—	—	1,538	1,667
Total	51,817	93,422	162,683	172,446

The movements in the loss allowance for impairment of trade and bills receivables are as follows:

	As at 31 December			As at 30 April
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
At beginning of year/period	23,241	36,551	57,542	76,753
Impairment losses, net of reversal *(note 8)*	11,869	18,148	16,034	9,788
Amount written off as uncollectable	—	—	(128)	—
Transfer from contract assets	1,441	2,843	3,305	1,168
At end of year/period	36,551	57,542	76,753	87,709

The increase in the loss allowance was due to an increase in the gross carrying amount after the settlement of trade receivables of over 1 year trade receivables.

An impairment analysis is performed at each reporting date using a provision matrix to measure expected credit losses. The provision rates are based on days past due for groupings of various customer segments with similar loss patterns (i.e., by product/service, customer type and rating). The calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions. Trade receivables for which the counterparties failed to make the demanded repayments are defaulted receivables. The Group has provided full impairment for the defaulted receivables.

Set out below is the information about the credit risk exposure on the Group's trade and bills receivables using a provision matrix:

	As at 31 December 2023		
	Amount	Expected loss rate	Impairment
	RMB'000	*%*	*RMB'000*
Defaulted receivables	1,022	100.00	1,022
Other trade receivables aged:			
Within 1 year	63,641	19.80	12,601
1 year to 2 years	9,930	92.18	9,153
Over 2 years	13,775	100.00	13,775
Total	88,368	41.36	36,551

	As at 31 December 2024		
	Amount	Expected loss rate	Impairment
	RMB'000	*%*	*RMB'000*
Defaulted receivables	1,022	100.00	1,022
Other trade receivables aged:			
Within 1 year	119,398	24.54	29,305
1 year to 2 years	16,312	79.59	12,983
Over 2 years	14,232	100.00	14,232
Total	150,964	38.12	57,542

	As at 31 December 2025		
	Amount	Expected loss rate	Impairment
	RMB'000	*%*	*RMB'000*
Defaulted receivables	1,022	100.00	1,022
Other trade receivables aged:			
Within 1 year	181,355	18.46	33,470
1 year to 2 years	34,604	61.68	21,344
Over 2 years	22,455	93.15	20,917
Total	239,436	32.06	76,753

	As at 30 April 2026		
	Amount	Expected loss rate	Impairment
	RMB'000	*%*	*RMB'000*
Defaulted receivables	1,022	100.00	1,022
Other trade receivables aged:			
Within 1 year	189,453	18.50	35,045
1 year to 2 years	43,230	62.13	26,859
Over 2 years	26,450	93.70	24,783
Total	260,155	33.71	87,709

The Company

	As at 31 December			As at 30 April
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Bills receivable	7,611	4,937	5,209	5,146
Trade receivables	78,604	142,877	223,991	219,159
Due from subsidiaries	30,777	11,312	18,251	13,670
	116,992	159,126	247,451	237,975
Less: Allowance for credit losses	(36,551)	(56,878)	(75,021)	(81,271)
Total	80,441	102,248	172,430	156,704

The Company estimated that the expected loss rate for its trade receivables due from subsidiaries is minimal.

An aging analysis of the trade and bills receivables as at the end of each of the Relevant Periods, based on the revenue recognition date and net of allowance for expected credit losses, is as follows:

	As at 31 December			As at 30 April
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Within 1 year	79,664	98,919	157,631	138,666
1 to 2 years	777	3,329	13,260	16,371
2 to 3 years	—	—	1,539	1,667
Total	80,441	102,248	172,430	156,704

21. DEBT INVESTMENTS AT FAIR VALUE THROUGH OTHER COMPREHENSIVE INCOME

The Group and the Company

	As at 31 December			As at 30 April
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Bank acceptance bills	1,896	697	1,257	1,746

The above bank acceptance bills are issued by reputable banks in Chinese Mainland. They are classified and measured at fair value through other comprehensive income as they are held within a business model with the objective of both collecting contractual cashflows and selling. The fair value approximates to the carrying value due to the short maturity.

22. CONTRACT ASSETS

The Group and the Company

	As at 31 December			As at 30 April
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Contract assets arising from:				
Warranty retention receivables	11,049	17,281	18,186	15,210
Less: Impairment of contract assets	(2,585)	(4,447)	(3,479)	(2,931)
Net carrying amount	8,464	12,834	14,707	12,279

Contract assets are mainly generated by the robotic solutions contracts. According to the contract term, a certain percentage of contract amount is retention receivables which will be collected upon the completion of warranty period. The retention receivables are recognised as contract assets when the robotic solutions are accepted by the customer and are reclassified to trade receivables upon the completion of warranty period which is one year.

The movements in the loss allowance for impairment of contract assets are as follows:

	As at 31 December			As at 30 April
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
At the beginning of the year	1,186	2,585	4,447	3,479
Impairment losses,net *(note 8)*	2,840	4,705	2,337	620
Transfer to trade and bills receivables	(1,441)	(2,843)	(3,305)	(1,168)
At the end of the year	2,585	4,447	3,479	2,931

An impairment analysis is performed at each reporting date using a provision matrix to measure expected credit losses. The provision rates for the measurement of the expected credit losses of the contract assets are referred to those of the trade and bills receivables as the contract assets and the trade and bills receivables are from the same customer bases. The provision rates of contract assets have also considered the probability of default, historical loss record as well as forward-looking information. The calculation are adjusted as appropriate to reflect current conditions and estimates of future economic conditions.

Set out below is the information about the credit risk exposure on contract assets:

	As at 31 December			As at 30 April
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Expected credit loss rate	23.40%	25.73%	19.13%	19.27%
Gross carrying amount	11,049	17,281	18,186	15,210
Expected credit losses	(2,585)	(4,447)	(3,479)	(2,931)

23. PREPAYMENTS, OTHER RECEIVABLES AND OTHER ASSETS

The Group

	As at 31 December			As at 30 April

Certificate of deposits (note (a))	—	10,037	10,227	10,290
	12	10,479	11,694	12,811
Current:				
Prepayments	5,195	3,079	3,408	8,431
Value-added tax recoverable	—	—	400	2,431
Other receivables and deposits *(note (b))*	2,545	1,902	1,660	4,169
Deferred **[REDACTED]** expenses	—	—	3,208	3,568
	7,740	4,981	8,676	18,599
Total	7,752	15,460	20,370	31,410

(a) Certificate of deposits are issued by banks in Chinese Mainland and they are classified and measured at amortised costs as they are held within the business model with the objective to collect contractual cashflows.

(b) The other receivables as at 30 April 2026 included an amount of RMB1,511,000 due from a defendant in a lawsuit based on a court judgment issued in April 2026. The amount was fully received in May 2026.

The other receivables and deposits are interest-free and unsecured.

As at 31 December 2023, 2024, 2025 and 30 April 2026, the impairment of the other receivables and deposits were measured based on 12-month expected credit loss if they were not past due and there was no information indicating that the financial assets had a significant increase in credit risk since initial recognition. Otherwise, they were measured based on lifetime expected credit loss.

The loss allowances for the above other receivables and deposits were assessed as minimal.

24. CASH AND CASH EQUIVALENTS, RESTRICTED CASH AND TIME DEPOSITS

Government grants	—	—	625	469
Analysed into:				
Non-current portion	—	—	625	469

The Group's deferred income represented government grants received for projects with conditions to be satisfied. The government grant of RMB8,000,000 were transferred to other payables as the conditions were not satisfied as at 31 December 2025 (note 26).

30. PROVISIONS

The Group and the Company

	Warranties
	RMB'000
At 1 January 2023	8,413
Additional provision	7,756
Amounts utilised during the year	(8,005)
At 31 December 2023	8,164
At 1 January 2024	8,164
Additional provision	15,708
Amounts utilised during the year	(8,117)
At 31 December 2024	15,755
At 1 January 2025	15,755
Additional provision	12,994
Amounts utilised during the year	(12,585)
At 31 December 2025	16,164
At 1 January 2026	16,164
Additional provision	6,480
Amounts utilised during the period	(5,041)
At 30 April 2026	17,603

The Group generally provides warranties of one year to its customers on certain of its products for general repairs of defects occurring during the warranty period. The amount of the provision for the warranties is estimated based on sales volumes and past experience of the level of repairs and returns. The estimation basis is reviewed on an ongoing basis and revised where appropriate.

31. SHARE CAPITAL/PAID-IN CAPITAL

Share capital

A summary of movements in the share capital is as follows:

	Number of shares in issue	Share capital
	(in thousand)	*RMB'000*
As at 1 January 2025	—	—
Issue of ordinary shares upon conversion into a joint stock company of RMB1 each[#]	20,000	20,000
Issue of shares*	2,105	2,105
As at 31 December 2025 and 30 April 2026	22,105	22,105

In May 2025, the Company converted into a joint stock company with limited liability under the Company Law of the PRC. The net assets of the Company as of the conversion base date, including the paid-in capital, capital reserves and accumulated losses, were converted into 20,000,000 ordinary shares of RMB1.00 each. The excess of the net assets converted over the nominal value of the ordinary shares was credited to the Company's capital reserve.

* During the year ended 31 December 2025, the Company received capital contributions of RMB200,000,000. The capital contribution increased the share capital and capital reserve by RMB2,105,000 and RMB197,895,000, respectively.

On 16 June 2025, resolution was passed by the shareholders approving, among others, the share subdivision, whereby each of the shares with a nominal value of RMB1.00 each shall be sub-divided into 10 shares with a nominal value of RMB0.10 each, and such share subdivision shall take effect immediately before the **[REDACTED]**, upon which the registered capital of the Company shall be divided into 221,053,000 shares with a nominal value of RMB0.10 per share.

During the four months ended 30 April 2026, the Group received the payments of RMB978,000 and RMB760,000 from Mr. Wang Yongkun and Standard Automation, respectively, which was treated as the deemed contribution from the shareholders and credited to the capital reserve. The share capital of the Company remains unchanged.

Paid-in capital

	RMB'000
As at 1 January 2023	4,949
Capital contribution by shareholders*	724
As at 31 December 2023	5,673

	RMB'000
As at 1 January 2024	5,673
Capital contribution by shareholders**	342
As at 31 December 2024	6,015

	RMB'000
As at 1 January 2025	6,015
Capital contribution by shareholders***	483
Conversion into a joint stock company	(6,498)
As at 31 December 2025 and 30 April 2026	—

* During the year ended 31 December 2023, the Company received capital contributions of RMB179,150,000, net of transaction costs. The capital contribution increased the paid-in capital and capital reserve by RMB724,000 and RMB178,426,000, respectively.

** During the year ended 31 December 2024, the Company received capital contributions of RMB94,889,000, net of transaction costs. The capital contribution increased the paid-in capital and capital reserve by RMB342,000 and RMB94,547,000, respectively.

*** During the year ended 31 December 2025, the Company received the subscribed capital of RMB483,000 due from the share incentive platform and Mr. Wang Yongkun.

Pursuant to the shareholders agreements entered into between the Company and its shareholders (collectively the "**Agreements**"), the Company issued 12,697,000 ordinary shares (representing the number of shares after conversion into a joint stock company) to certain shareholders (collectively the "**Pre-[REDACTED] Investors**") for a total net cash proceed of approximately RMB540,854,000

(collectively the "**Pre-[REDACTED] Investments**"). Pursuant to the Agreements, the Pre-**[REDACTED]** Investors were granted by the Company with special rights ("**Special Rights**") which included redemption rights, liquidation preferences and anti-dilution rights.

There was no exercise of Special Rights granted by the Company throughout the Relevant Periods.

In June 2025, the Company and the Pre-**[REDACTED]** Investors subsequently entered into supplemental agreements, agreeing that certain of the Special Rights granted by the Company to Pre-**[REDACTED]** investors, including redemption rights, liquidation preferences and anti-dilution rights, have been irrecoverably terminated and shall be void ab initio. Taking into account the legal and regulatory framework of the Company's jurisdiction and the governing law of the supplemental agreements, the directors considered that it is appropriate to present the Pre-**[REDACTED]** Investments as equity throughout the Relevant Periods.

Had the Special Rights granted by the Company to the Pre-**[REDACTED]** Investors been accounted for as financial liabilities measured at present value of the redemption amount prior to entering into the supplemental agreements, the redemption financial liabilities, total current liabilities and net deficits would have been:

	As at 31 December	
	2023	2024
	RMB'000	*RMB'000*
Redemption financial liabilities	563,192	720,678
Total current liabilities	704,396	880,181
Net deficits	(477,520)	(580,211)

The finance costs associated with the redemption financial liabilities, the total net losses, basic and dilutive loss per share would have been:

	Year ended 31 December			Four months ended 30 April
	2023	2024	2025	2025
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Finance costs associated with the redemption financial liabilities	48,037	62,598	29,376	20,580
Total net losses	(148,385)	(107,742)	(231,397)	(76,666)
Basic and dilutive loss per share *(RMB per share)*	(0.87)	(0.60)	(1.11)	(0.40)

32. RESERVES

The Group

The amounts of the Group's reserves and the movements therein for the Relevant Periods and the four months ended 30 April 2025 are presented in the consolidated statements of changes in equity.

(a) Capital reserve

The share premium of the Group represents the difference between the par value of the shares issued and the consideration received.

(b) Share-based payment reserve

The share-based payment reserve represents the equity-settled share based payments as set out in note 33 to the Historical Financial Information.

The Company

33. SHARE INCENTIVE PLAN

Share Award Scheme

The Group approved and adopted the share award scheme (the "**Share Award Scheme**") for certain employees of the Group in order to recognise their contributions to the growth and development of the Group.

In order to implement the Share Award Scheme, Standard Automation (Shenzhen) Studio (Limited Partnership) ("**Standard Automation**") was established and designated as share incentive platform to hold the shares specially awarded to the eligible participants as the ultimate beneficial owners. The Group has no control over the share incentive platform.

In 2017 and 2018, Mr. Wang Huaiqing transferred 458,220 shares and 877,590 shares of the Company to Standard Automation, at a consideration of RMB1 per share and RMB1 per share, respectively.

The shares held by Standard Automation have been granted to Mr. Wang Yongkun and other eligible employees as at the beginning of the Relevant Periods. The share awards granted to Mr. Wang Yongkun were vested immediately. The share awards granted to other eligible employees are subject to the vesting condition of the **[REDACTED]**, which would be satisfied when the ordinary shares of the Company are successfully listed on a recognised stock exchange, and the related share-based payment expenses are amortised over the vesting period.

In October 2021, Mr. Wang Yongkun subscribed for 271,590 shares of the Company at a subscription price of RMB92.5 per share, and the subscription price was modified to RMB1 per share in March 2025 pursuant to the written resolutions of the shareholders of the Company. As the modification increased the fair value of the equity instruments that were fully vested, the incremental fair value measured at the date of modification, was recognised immediately in March 2025.

During the years ended 31 December 2023, 2024, 2025 and four months ended 30 April 2025, the Group recognised equity-settled share-based payment expenses under Share Award Scheme of RMB3,360,000, RMB2,908,000, RMB26,594,000 and RMB25,546,000 (unaudited), respectively. During the four months ended 30 April 2026, the Group recognised a reversal of share-based payment expenses under Share Award Scheme of RMB293,000.

In March 2025, Standard Automation subscribed for 211,237 shares of the Company (equivalent to 650,156 shares after conversion into a joint stock company) at a subscription price of RMB1 per share. In June 2025, Juli Intelligent Technology (Shenzhen) Partnership Enterprise (Limited Partnership) ("**Juli Intelligent**") was established as a limited partner of Standard Automation and designated as share incentive platform to hold the shares specially awarded to the eligible participants. 433,367 shares of the Company held by Mr. Wang Yongkun through Standard Automation were transferred to Juli Intelligent. The Group has no control over Juli Intelligent. The new subscribed shares, together with the 433,367 shares of the Company held by Juli Intelligent and 602,380 shares of the Company held by Mr. Wang Yongkun through Standard Automation, equivalent to 1,685,903 shares in total after conversion into a joint stock company, will be reserved for the shares to be vested under 2022 Employee Option Scheme and 2025 Employee Option Scheme.

2022 Employee Option Scheme

In April 2022, the Company passed a written resolution of the shareholders of the Company to grant four types of share options to certain directors and employees of the Group ("**2022 Employee Option Scheme**").

Cash-settled share options

One type of the share options under 2022 Employee Option Scheme has cash settlement alternatives where the employees can receive cash settlement of the share awards in March 2023 and upon **[REDACTED]**, respectively, at the pre-determined redemption prices, on condition that the employees remain in its employment. This type of share options is accounted for as cash-settled share-based payment transactions.

The Group recognises a liability at the fair value, initially and at the end of each reporting period and at the date of settlement, with any changes in fair value recognised in profit or loss. The fair value of the liability is determined, by reference to the latest subscription price of the underlying shares, taking into account the terms and conditions on which the cash-settled transaction was granted, and the extent to which the employees have rendered service to date.

The carrying amounts of cash-settled share-based payment liability and the movements during the Relevant Periods are as follows:

	For the year ended 31 December			For the four months ended 30 April
	2023	2024	2025	2025
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* (Unaudited)
Carrying amount at 1 January	9,574	3,625	3,709	3,709
Receipts of subscriptions	—	—	—	—
Cost of awards recognised during the year	1,134	878	2,625	2,625
Cash settlement	(7,083)	(794)	(278)	(278)
Derecognition of cash-settled share-based payment liability*	—	—	(6,056)	—
Carrying amount at 31 December/ 30 April	3,625	3,709	—	6,056

* In June 2025, the Company amended the terms of the arrangement, relating to the cash-settled share options, from cash-settled to equity-settled. Eligible employees will receive 52,543 shares of the Company held by Juli Intelligent upon the satisfaction of **[REDACTED]** instead of cash compensation. On the modification date, the cash-settled share-based payment liability amounted to RMB6,056,000 was derecognised and the equity-settled share-based payment transaction to the extent to which services have been received amounted to RMB8,557,000 was recognised in equity, with the difference of RMB2,501,000 was recognised immediately in profit or loss.

Equity-settled share options

The three types of share options under 2022 Employee Option Scheme are equity-settled share options.

During the years ended 31 December 2023 and 2024, the Group granted 1,509 and 6,496 equity-settled share options, respectively, which will be vested in instalments and the vesting of share options is also subject to the **[REDACTED]** Condition. The exercise prices of share options ranged from RMB0.00 to RMB225 per share. The equity-settled share options granted under 2022 Employee Option Scheme will be settled through Juli Intelligent.

The fair values of the share option granted were estimated as at the grant date by using the Black-Scholes option pricing model. The following table lists the key inputs to the fair value model used:

	2023	2024
Risk-free interest rate *(%)*	2.68%–2.83%	2.29%
Volatility *(%)*	46.03%–48.44%	43.61%

The share options granted and outstanding under 2022 Employee Option Scheme during the Relevant Periods are as follows:

	Number of share options	Weighted average exercise price per share
At 1 January 2023	29,641	72.31
Granted during the year	1,509	—
At 31 December 2023	31,150	68.81
At 1 January 2024	31,150	68.81
Granted during the year	6,496	172.89
At 31 December 2024	37,646	86.77
At 1 January 2025	37,646	86.77
Forfeited during the year	(225)	(225.78)
Effect upon conversion into a joint stock company	77,756	—
At 31 December 2025 and 30 April 2026	115,177	27.92

During the years ended 31 December 2023, 2024, 2025 and the four months ended 30 April 2025, the Group recognised share award expenses of RMB1,620,000, RMB2,142,000, RMB1,795,000 and RMB771,000 (unaudited), respectively. During the four months ended 30 April 2026, the Group recognised a reversal of share-based payment expenses of RMB130,000, for the above equity-settled share options.

2025 Employee Option Scheme

The Company adopted a share option scheme (the "**2025 Employee Option Scheme**") which was approved and adopted by the written resolutions of all the shareholders of the Company passed on 29 May 2025 for the purpose of providing incentives or rewards to eligible persons for their contribution to, and continuing efforts to promote the interests of the Group. Eligible persons of the 2025 Employee Option Scheme include any director or employee of the Group who has contributed to or will contribute to the Group. Standard Automation and Juli Intelligent were designated as share incentive platforms to hold the shares specially awarded to the eligible participants under the 2025 Employee Option Scheme.

On 10 June 2025, 1,518,183 share options under the 2025 Employee Option Scheme were granted to eligible employees and directors of the Group. Such share options will be vested in instalments and is also subject to the **[REDACTED]** Condition and other performance conditions. The exercise prices of share options ranged from RMB0.00 to RMB47.50 per share.

The fair values of the share option granted were estimated as at the grant date by using the Black-Scholes option pricing model. The following table lists the key inputs to the fair value model used:

	2025
Risk-free interest rate (%)	1.67%
Volatility (%)	49.80%

The share options granted and outstanding under 2025 Employee Option Scheme during the Relevant Periods are as follows:

	Number of share options	Weighted average exercise price per share
At 1 January 2025	—	
Granted during the year	1,518,183	17.86
At 31 December 2025 and 30 April 2026	1,518,183	17.86

During the year ended 31 December 2025 and the four months ended 30 April 2026, the Group recognised share award expenses of RMB113,673,000 and RMB36,328,000, respectively, for the above equity-settled share options.

34. NOTES TO THE CONSOLIDATED STATEMENTS OF CASH FLOWS

(a) Major non-cash transactions

During the years ended 31 December 2023 and 2024 and the four months ended 30 April 2026, the Group had non-cash additions to right-of-use assets and lease liabilities of RMB244,000 and RMB11,465,000 and RMB10,097,000, respectively, in respect of lease arrangements for buildings.

During the years ended 31 December 2024 and 2025, the Group entered into agreements with certain customers and suppliers, pursuant to which, the Group settled trade receivables in the amount of RMB1,590,000 and RMB434,000, respectively, by using the trade payables due to the suppliers.

(b) Changes in liabilities arising from financing activities

	Interest-bearing bank and other borrowings	Lease liabilities
	RMB'000	*RMB'000*
At 1 January 2023	59,728	20,504
Changes from financing cash flows	(36,613)	(9,039)
New lease addition	—	244
Accretion of interest	1,913	419
Early termination of lease liabilities	—	(7,563)
At 31 December 2023 and 1 January 2024	25,028	4,565
Changes from financing cash flows	16,703	(5,704)
New lease addition	—	11,465
Accretion of interest	1,150	230
Early termination of lease liabilities	—	(461)
At 31 December 2024 and 1 January 2025	42,881	10,095
Changes from financing cash flows	(43,707)	(4,544)
Accretion of interest	826	258
At 31 December 2025	—	5,809
At 31 December 2025 and 1 January 2026	—	5,809
Changes from financing cash flows	—	(1,789)
New lease addition	—	10,097
Accretion of interest	—	103
At 30 April 2026	—	14,220
At 31 December 2024 and 1 January 2025	42,881	10,095
Changes from financing cash flows	(10,200)	(1,476)
Accretion of interest	319	102
At 30 April 2025 (Unaudited)	33,000	8,721

(c) Total cash outflow for leases

The total cash outflow for leases included in the consolidated statements of cash flows is as follows:

	Year ended 31 December			Four months ended 30 April	
	2023	2024	2025	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* (Unaudited)	*RMB'000*
Within operating activities	102	63	763	31	38
Within financing activities	9,039	5,704	4,544	1,476	1,789
Total	9,141	5,767	5,307	1,507	1,827

35. COMMITMENTS

The Group had the following capital commitments at the end of each of the Relevant Periods:

	As at 31 December			As at 30 April
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Contracted, but not provided for:				
Purchases of items of property, plant and equipment	586	121	96	1,371

36. RELATED PARTY TRANSACTIONS

The Directors are of the view that the following companies are related parties that have material transactions or balances with the Group during the Relevant Periods.

(a) Name and relationships of the related parties:

Name	Relationship
Mr. Wang Yongkun	Director

(b) Certain of the Group's bank loans are secured by:

	As at 31 December			As at 30 April
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Mr. Wang Yongkun	15,016	32,870	—	—

Mr. Wang Yongkun has guaranteed certain bank loans made to the Group as at the end of each of the Relevant Periods, as disclosed in note 27 to the Historical Financial Information. The guarantee period is 12 to 24 months.

As at 31 December 2025, the guarantee by Mr. Wang Yongkun has been released.

(c) Compensation of key management personnel of the Group:

The remuneration of key management personnels was as follows:

	Year ended 31 December			Four months ended 30 April	
	2023	2024	2025	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000* (Unaudited)	*RMB'000*
Salaries, allowances and benefits in kind	3,316	3,528	3,861	1,069	864
Performance related bonuses	1,211	194	387	119	195
Pension scheme contributions	48	57	76	25	25
Share-based payment expenses	901	901	67,716	25,029	16,318
Total compensation paid to key management personnel	5,476	4,680	72,040	26,242	17,402

Further details of directors' and the chief executive's and supervisors' remuneration are set out in note 9 to the Historical Financial Information.

Redemption rights of the Pre-[REDACTED] Investors granted by the Single Largest Group of Shareholders

According to the share subscription agreements entered into by the Company and the shareholders from September 2016 to December 2024, the Pre-**[REDACTED]** Investors had been granted the redemption right by certain members of the Single Largest Group of Shareholders (collectively, the "SLS Redemption Right"). The Company is not a party to the SLS Redemption Right. Pursuant to another supplemental agreement entered into by the Company and the shareholders in June 2025, the SLS Redemption Right was terminated prior to the first submission of the **[REDACTED]** to the Stock Exchange

The Company has not provided any form of guarantee in connection with any potential failure of the Single Largest Group of Shareholders to fulfil their obligations relating to the SLS Redemption Right. Accordingly, no financial liability regarding the SLS Redemption Right was recorded by the Company during the Relevant Periods.

37. TRANSFERS OF FINANCIAL ASSETS

Transferred financial assets that are not derecognised in their entirety

At 31 December 2023, 2024, 2025 and 30 April 2026, the Group endorsed certain bills receivable in Chinese Mainland (the "**Endorsed Bills**") with a carrying amount of RMB3,026,000, RMB1,069,000 and RMB2,962,000 and RMB 6,158,000 to certain of its suppliers in order to settle the trade payables due to such suppliers (the "**Endorsement**"). In the opinion of the directors, the Group has retained the substantial risks and rewards, which include default risks relating to such Endorsed Bills, and accordingly, it continued to recognise the full carrying amounts of the Endorsed Bills and the associated trade payables settled. Subsequent to the Endorsement, the Group did not retain any rights on the use of the Endorsed Bills, including the sale, transfer or pledge of the Endorsed Bills to any other third parties. The aggregate carrying amount of the trade payables settled by the Endorsed Bills during the year or period to which the suppliers have recourse was RMB13,957,000, RMB11,955,000 and RMB9,960,000 and RMB14,739,000 as at 31 December 2023, 2024, 2025 and 30 April 2026.

Transferred financial assets that are derecognised in their entirety

At 31 December 2023, 2024, 2025 and 30 April 2026, the Group endorsed certain bills receivable in Chinese Mainland (the "**Derecognised Bills**") to certain of its suppliers in order to settle the trade payables due to such suppliers with a carrying amount in aggregate of RMB1,654,000, RMB6,152,000 and RMB6,920,000 and RMB 8,313,000. The Derecognised Bills had a maturity of one to six months at the end of the reporting period. In accordance with the Law of Negotiable Instruments in the PRC, the holders of the Derecognised Bills may exercise the right of recourse against any, several or all of the persons liable for the Derecognised Bills, including the Group, in disregard of the order of precedence (the "**Continuing Involvement**"). In the opinion of the directors, the risk of the Group being claimed by the holders of the Derecognised Bills is remote in the absence of a default of the accepted banks. The Group has transferred substantially all risks and rewards relating to the Derecognised Bills. Accordingly, it has derecognised the full carrying amounts of the Derecognised Bills and the associated trade payables. The maximum exposure to loss from the Group's Continuing Involvement in the Derecognised Bills and the undiscounted cash flows to repurchase these Derecognised Bills is equal to their carrying amounts. In the opinion of the directors, the fair values of the Group's Continuing Involvement in the Derecognised Bills are not significant.

During the years ended 31 December 2023, 2024, 2025 and the four months ended 30 April 2026, the Group has not recognised any gain or loss on the date of transfer of the Derecognised Bills. No gains or losses were recognised from the Continuing Involvement, both during the year or cumulatively. The endorsement has been made evenly throughout the year or period.

38. FINANCIAL INSTRUMENTS BY CATEGORY

The carrying amounts of each of the categories of financial instruments as at the end of each of the Relevant Periods are as follows:

	As at 31 December			As at 30 April
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Financial assets

Lease liabilities	4,565	10,095	5,809	14,220
Total	80,143	111,983	98,432	160,503

39. FAIR VALUE AND FAIR VALUE HIERARCHY OF FINANCIAL INSTRUMENTS

Fair values

Management has assessed that the fair values of cash and cash equivalents, trade receivables, trade payables, financial assets included in prepayments, other receivables and other assets, financial liabilities included in other payables and accruals, interest-bearing bank and other borrowings approximate to their carrying amounts largely due to the short term maturities of these instruments.

The Group's finance department headed by the financial director is responsible for determining the policies and procedures for the fair value measurement of financial instruments. At the end of each of the Relevant Periods, the finance department analyses the movements in the values of financial instruments and determines the major inputs applied in the valuation. The directors review the results of the fair value measurement of financial instruments periodically for financial reporting.

The fair values of the financial assets and liabilities are included at the amount at which the instrument could be exchanged in a current transaction between willing parties, other than in a forced or liquidation sale. The following methods and assumptions were used to estimate the fair values:

The fair values of the financial assets at fair value through profit or loss and debt investments at fair value through other comprehensive income have been calculated by discounting the expected future cash flows using rates currently available for instruments with similar terms, credit risk and remaining maturities.

The fair value of the cash-settled liability of share-based payments was estimated as at the end of each of the Relevant Periods with reference to the latest subscription prices of the underlying shares, taking into account the terms and conditions upon which the options were granted.

Fair value hierarchy

As at 31 December 2023

	Fair value measurement using			
	Quoted prices in active markets (Level 1)	Significant observable inputs (Level 2)	Significant unobservable inputs (Level 3)	Total

Total	—	42,537	—	42,537

During the Relevant Periods, there were no transfers of fair value measurements between Level 1 and Level 2 and no transfers into or out of Level 3.

40. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Group's principal financial instruments comprise cash and cash equivalents, restricted cash and financial assets at fair value through profit or loss. The main purpose of these financial instruments is to raise finance for the Group's operations. The Group has various other financial assets and liabilities such as trade and bills receivables and trade payables, which arise directly from its operations.

The main risks arising from the Group's financial instruments are foreign currency risk, credit risk and liquidity risk. The board of directors reviews and agrees policies for managing each of these risks.

Foreign currency risk

Foreign currency risk is the risk of loss resulting from changes in foreign currency exchange rates. Fluctuations in exchange rates between RMB and other currencies in which the Group conducts business may affect the Group's financial condition and results of operations.

The following table demonstrates the sensitivity at the end of each of the Relevant Periods to a reasonably possible change in foreign currency exchange rates, with all other variables held constant, of the Group's loss before tax (due to changes in the fair value of monetary assets and liabilities) and the Group's equity.

	Increase/(decrease) in basis points	Increase/(decrease) in profit before tax	Increase/ (decrease) in equity
	%	*RMB'000*	*RMB'000*
Year ended 31 December 2023			
If RMB weakens against the US$	5	626	626
If RMB strengthens against the US$	(5)	(626)	(626)
Year ended 31 December 2024			
If RMB weakens against the US$	5	1,963	1,963
If RMB strengthens against the US$	(5)	(1,963)	(1,963)
Year ended 31 December 2025			
If RMB weakens against the US$	5	4,392	4,392
If RMB strengthens against the US$	(5)	(4,392)	(4,392)
Four months ended 30 April 2026			
If RMB weakens against the US$	5	3,576	3,576
If RMB strengthens against the US$	(5)	(3,576)	(3,576)

Credit risk

The Group trades only with recognised and creditworthy parties. It is the Group's policy that all customers who wish to trade on credit terms are subject to credit verification procedures. Receivable balances are monitored on an ongoing basis and the Group's exposure to bad debts is not significant. The credit risk of the Group's other financial assets, which comprise cash and cash equivalents and financial assets included in prepayments, other receivables and other assets, arises from default of the counterparty, with a maximum exposure equal to the carrying amounts of these instruments.

For other receivables and other assets, management makes periodic collective assessment as well as individual assessment on the recoverability of other receivables based on historical settlement records and past experience. The Directors believe that there is no material credit risk inherent in the Group's outstanding balance of other receivables.

Maximum exposure and year-end staging

The tables below show the credit quality and the maximum exposure to credit risk based on the Group's credit policy, which is mainly based on past due information unless other information is available without undue cost or effort, and year-end staging classification as at the end of each of the Relevant Periods.

The amounts presented are gross carrying amounts for financial assets.

At 31 December 2023

* For trade receivables and contract assets to which the Group applies the simplified approach for impairment, information based on the provision matrix is disclosed in note 20 and note 22 to the Historical Financial Information.

** The credit quality of the financial assets included in prepayments, deposits and other receivables is considered to be "normal" when they are not past due and there is no information indicating that the financial assets had a significant increase in credit risk since initial recognition. Otherwise, the credit quality of the financial assets is considered to be "doubtful".

As at 31 December 2023, 2024, 2025 and 30 April 2026, the Group had certain concentrations of credit risk as 11.26%, 10.99%, 5.65% and 12.11% of the Group's trade and bills receivables and contract assets were due from the Group's largest customer, 27.21%, 35.36%, 22.31% and 28.95% of the Group's gross carry amount of trade and bills receivables and contract assets were due from five largest customers.

Liquidity risk

The Group's objective is to maintain a balance between continuity of funding and flexibility through the use of internally generated cash flows from operations and lease liabilities. The Group regularly reviews its major funding positions to ensure that it has adequate financial resources in meeting its financial obligations.

The maturity profile of the Group's financial liabilities and lease liabilities as at the end of each of the Relevant Periods, based on the contractual undiscounted payments, was as follows:

As at 31 December 2023

	Less than 12 months or on demand	1 to 5 years	Total
	RMB'000	*RMB'000*	*RMB'000*
Trade payables	45,785	—	45,785
Financial liabilities included in other payables and accruals	4,765	—	4,765
Interest-bearing bank and other borrowings	25,933	—	25,933
Lease liabilities	4,639	—	4,639
Total	81,122	—	81,122

As at 31 December 2024

	Less than 12 months or on demand	1 to 5 years	Total
	RMB'000	*RMB'000*	*RMB'000*
Trade payables	52,299	—	52,299
Financial liabilities included in other payables and accruals	6,708	—	6,708
Interest-bearing bank and other borrowings	44,227	—	44,227
Lease liabilities	4,472	6,061	10,533
Total	107,706	6,061	113,767

As at 31 December 2025

	Less than 12 months or on demand	1 to 5 years	Total
	RMB'000	*RMB'000*	*RMB'000*
Trade payables	80,563	—	80,563
Financial liabilities included in other payables and accruals	12,060	—	12,060
Lease liabilities	3,044	2,945	5,989
Total	95,667	2,945	98,612

As at 30 April 2026

	Less than 12 months or on demand	1 to 5 years	Total
	RMB'000	*RMB'000*	*RMB'000*
Trade payables	135,054	—	135,054
Financial liabilities included in other payables and accruals	11,229	—	11,229
Lease liabilities	7,268	7,400	14,668
Total	153,551	7,400	160,951

Capital management

The primary objectives of the Group's capital management are to safeguard the Group's ability to continue as a going concern and to maintain healthy capital ratios in order to support its business and maximise shareholders value.

The Group manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, return capital to shareholders or issue new shares. The Group is not subject to any externally imposed capitalrequirements. No changes were made in the objectives, policies or processes for managing capital during the Relevant Periods.

The asset-liability ratios as at the end of each of the Relevant Periods are as follows:

	As at 31 December			As at 30 April
	2023	2024	2025	2026
	RMB'000	*RMB'000*	*RMB'000*	*RMB'000*
Total assets	234,876	305,779	452,148	472,767
Total liabilities	149,204	165,312	162,600	207,411
Asset-liability ratio	64%	54%	36%	44%

Note: Asset-liability ratio is calculated by dividing total liabilities by total assets and multiplying the product by 100%.

41. EVENTS AFTER THE RELEVANT PERIODS

The Group has no significant events subsequent to 30 April 2026.

42. SUBSEQUENT FINANCIAL STATEMENTS

No audited financial statements have been prepared by the Company, the Group or any of its subsidiaries in respect of any period subsequent to 30 April 2026.

PRC TAXATION

Income tax and capital gains tax of holders of the H shares is subject to the laws and practices of the PRC and of jurisdictions in which holders of the H Shares are resident or otherwise subject to tax. The following summary of certain relevant taxation provisions is based on current law and practice and has not taken into account the expected change or amendment to the relevant laws or policies. The discussion has no intention to cover all possible tax consequences resulting from the investment in H Shares, nor does it take the specific circumstances of any particular investor into account, some of which may be subject to special regulations. Accordingly, you should consult your own tax advisor regarding the tax consequences of an investment in H Shares. The discussion is based upon laws and relevant interpretations in effect as of the date of the Latest Practicable Date, which is subject to change and may have retrospective effect.

Taxation on Dividends

Individual Investors

Under the provisions of the Individual Income Tax Law of the PRC (《中華人民共和國個人所得税法》), last amended on August 31, 2018, and the Regulations on Implementation of the Individual Income Tax Law of the PRC (《中華人民共和國個人所得税法實施條例》), last amended on December 18, 2018 (collectively referred to as the "**IIT Law**"), dividends disbursed by Chinese enterprises are subject to a flat individual income tax rate of 20%. For foreign individuals who are not residents of China, dividends received from a Chinese enterprise are generally taxed at 20%, unless there are specific exemptions granted by the State Council's tax authority or reductions under an applicable tax treaty. Meanwhile, according to the Notice on Issues Concerning Differentiated Individual Income Tax Policies on Dividends and Bonus of Listed Companies (《關於上市公司股息紅利差別化個人所得税政策有關問題的通知》) issued on September 7, 2015 and effective on September 8, 2015, where an individual holds the shares of a listed company obtained from the public offering for more than one year and transfers the stock of the listed company on the stock market, the dividend and bonus income shall be temporarily exempted from individual income tax. Where an individual acquires shares of a listed company from the public offering and transfers the stock of the listed company on the stock market, if the holding period is within one month (inclusive), the dividend income shall be included in the taxable income in full; if the holding period is more than one month but less than one year (inclusive), the dividend income shall be included in the taxable income at the rate of 50%; the aforesaid income shall be subject to individual income tax at a uniform rate of 20%.

According to the Announcement of State Taxation Administration on Promulgation of the Administrative Measures on Non-resident Taxpayers Enjoying Treaty Benefits (《國家税務總局關於發布<非居民納税人享受協定待遇管理辦法>的公告》), which came into effect on 1 January 2020, non-resident taxpayers claiming treaty benefits shall be handled in accordance with the principles of "self-assessment, claiming benefits, retention of the relevant materials for future inspection". Where a non-resident taxpayer self-assesses and concludes that it satisfies the criteria for claiming treaty benefits, it may enjoy treaty benefits at the time of tax declaration or at the time of withholding through the withholding agent, simultaneously gather and retain the relevant materials pursuant to the provisions of the Measures for future inspection, and accept follow-up administration by the tax authorities. For withholding at source and designated withholding, a non-resident taxpayer asserting that it satisfies the criteria for claiming treaty benefits and need to claim such benefits shall complete an "Information Report on Non-resident Taxpayers Claiming Treaty Benefits" truthfully, submit to the withholding agent voluntarily, gather and retain the relevant materials pursuant to the relevant provisions.

In accordance with the Arrangement between the Mainland and the Hong Kong Special Administrative Region on the Avoidance of Double Taxation and the Prevention of Fiscal Evasion (《內地和香港特別行政區關於對所得避免雙重徵税和防止偷漏税的安排》), signed on August 21, 2006, the PRC Government has the authority to impose taxes on dividends paid by a PRC company to Hong Kong residents, including both natural persons and legal entities. The tax levied shall not exceed 10% of the total dividends payable by the PRC company. However, if a Hong Kong resident directly holds 25% or more of the equity interest in a PRC company and meets certain conditions as the beneficial owner of the equity, the tax imposed shall not exceed 5% of the total dividends payable by the PRC company.

The Fifth Protocol of the Arrangement between the Mainland of China and the Hong Kong Special Administrative Region on the Avoidance of Double Taxation and the Prevention of Fiscal Evasion (《<內地和香港特別行政區關於對所得避免雙重徵税和防止偷漏税的安排>第五議定書》), in effect since December 6, 2019, introduces specific criteria determining entitlement to treaty benefits. According to this protocol, if, after all the relevant facts and circumstances are considered, it could be reasonably determined that gaining such tax benefit is one of the primary purposes of any arrangement or transaction that directly or indirectly provides benefits, such benefits shall not apply to the relevant proceeds, except it could be confirmed that under such circumstances, providing such benefits align with the objectives and goals of the relevant provisions of the Arrangement.

Additionally, the application of the dividend clause of tax agreements is bound by the stipulations outlined in the PRC tax laws and regulations, including the guidelines specified in the Notice of the State Taxation Administration on the Issues Concerning the Application of the Dividend Clauses of Tax Agreements (《國家税務總局關於執行税收協定股息條款有關問題的通知》) (Guo Shui Han [2009] No. 81). Compliance with these regulations is essential in determining the taxation applicable to dividends under the Arrangement.

Enterprise Investors

Pursuant to the provisions outlined in the PRC Enterprise Income Tax Law (《中華人民共和國企業所得税法》), enacted by the National People's Congress of the PRC (NPC) on March 16, 2007, and enforced from January 1, 2008, subsequently amended on February 24, 2017, and December 29, 2018, and in alignment with the Implementation Provisions of the Enterprise Income Tax Law of the PRC (《中華人民共和國企業所得税法實施條例》), promulgated by the State Council on December 6, 2007, and effective from January 1, 2008, last amended on December 6, 2024 and effective on January 20, 2025 (collectively referred to as the "**EIT Law**"), it is established that a non-resident enterprise is generally liable to a 10% enterprise income tax on income sourced within the PRC. Such income includes dividends and bonuses received from a PRC resident enterprise. This taxation applies to non-resident enterprises that lack a physical establishment or premises in the PRC. Alternatively, if an establishment or premise exists within the PRC, but the PRC-sourced income is unrelated to said establishment or premise, it is subject to the aforementioned taxation.

The withholding tax for non-resident enterprises is mandated to be deducted at the source, whereby the entity making the payment assumes the role of the withholding agent. Consequently, the withholding agent is obligated to withhold the income tax from the payment or due payment each time it is disbursed or becomes due.

The Circular of the State Taxation Administration (STA) on Issues Relating to the Withholding and Remitting of Enterprise Income Tax on Dividends Paid by PRC Resident Enterprises to Overseas Non-PRC Resident Enterprise Shareholders of H Shares (《國家税務總局關於中國居民企業向境外H股非居民企業

股東派發股息代扣代繳企業所得税有關問題的通知》) (Guo Shui Han [2008] No. 897), which was issued by the STA and implemented on November 6, 2008, further clarified that a PRC-resident enterprise must withhold corporate income tax at a rate flat of 10% on the dividends of 2008 and onwards that it distributes to overseas non-resident enterprise shareholders of H Shares. In addition, the Response to Issues on Levying Enterprise Income Tax on Dividends Derived by Non-resident Enterprise from Holding Stock such as B-shares (《關於非居民企業取得B股等股票股息徵收企業所得税問題的批覆》) (Guo Shui Han [2009] No. 394) which was issued by the STA and implemented on July 24, 2009, further provides that any PRC-resident enterprise that is listed on overseas stock exchanges must withhold enterprise income tax at a rate of 10% on dividends of 2008 and onwards that it distributes to non-resident enterprises. Such tax rates may be further changed pursuant to the tax treaty or agreement that China has concluded with relevant jurisdictions, where applicable. Accordingly, dividends paid to non-PRC resident enterprise (including HKSCC Nominees) shall be subject to withholding enterprise income tax at a rate of 10%.

In accordance with the Arrangement between the Mainland and the Hong Kong Special Administrative Region on the Avoidance of Double Taxation and the Prevention of Fiscal Evasion, the PRC Government is authorized to impose taxes on dividends disbursed by a PRC company to Hong Kong residents, including both individuals and legal entities, not exceeding 10% of the total dividends payable by the PRC company. If a Hong Kong resident directly holds 25% or more of the equity interest in a PRC company, the tax shall not surpass 5% of the total dividends if the Hong Kong resident qualifies as the beneficial owner of the equity, and specific conditions are met.

Furthermore, the Fifth Protocol of the Arrangement between the Mainland of China and the Hong Kong Special Administrative Region on the Avoidance of Double Taxation and the Prevention of Fiscal Evasion, introduces additional criteria for qualifying for treaty benefits. While other provisions may exist within the Arrangement, if, after all the relevant facts and circumstances are considered, it could be reasonably determined that gaining such tax benefit is one of the primary purposes of any arrangement or transaction that directly or indirectly provides benefits, such benefits shall not apply to the relevant proceeds, except it could be confirmed that under such circumstances, providing such benefits align with the objectives and goals of the relevant provisions of the Arrangement.

It is important to note that the application of the dividend clause of tax agreements is contingent upon compliance with PRC tax laws and regulations, including the guidelines provided in the Notice of the State Taxation Administration on the Issues Concerning the Application of the Dividend Clauses of Tax Agreements (《國家税務總局關於執行税收協定股息條款有關問題的通知》) (Guo Shui Han [2009] No. 81).

Tax Treaties

Non-resident investors residing in jurisdictions that have established treaties or arrangements for the avoidance of double taxation with the PRC may qualify for a reduction in the PRC enterprise income tax levied on dividends received from PRC companies. Currently, the PRC has entered into Avoidance of Double Taxation Treaties or Arrangements with several countries and regions, including the Hong Kong Special Administrative Region, Macau Special Administrative Region, Australia, Canada, France, Germany, Japan, Malaysia, the Netherlands, Singapore, the United Kingdom, and the United States.

Non-PRC resident enterprises eligible for preferential tax rates under these relevant taxation treaties or arrangements are required to submit an application to the PRC tax authorities for a refund of the enterprise income tax that exceeds the agreed tax rate. The approval of the refund application is subject to the evaluation and decision of the PRC tax authorities.

Taxation on Share Transfer

Value-Added Tax and Local Surcharges

Under the guidelines outlined in the Notice on the Full Implementation of the Pilot Program for Transition from Business Tax to Value-Added Tax (《關於全面推開營業税改徵增值税試點的通知》) (Cai Shui [2016] No. 36) (referred to as "**Circular 36**"), effective from May 1, 2016, and subsequently amended on July 11, 2017, December 25, 2017, and March 20, 2019, individuals and entities conducting service transactions within the PRC are obligated to pay Value-Added Tax (VAT). "Sales of services within the PRC" are defined as transactions where either the service provider or the recipient is situated within the PRC.

Furthermore, Circular 36 specifies that the transfer of financial products, including the ownership transfer of marketable securities, is subject to a VAT rate of 6% on the taxable income. Taxable income, in this context, refers to the sales price balance after deducting the purchase price. This VAT obligation applies to both general and foreign VAT taxpayers. Notably, individuals are exempt from VAT obligations when engaging in the transfer of financial products.

As per the aforementioned regulations, non-resident individuals selling or disposing of H shares are exempt from VAT in the PRC. However, if the holders are non-resident enterprises, they may avoid VAT in the PRC only if the buyers of the H shares are individuals or entities located outside of the PRC. Conversely, the holders might be subject to VAT in the PRC if the buyers of the H shares are individuals or entities situated within the PRC.

Income Taxes

Individual investors

Under the IIT Law, gains arising from the transfer of equity interests in PRC resident enterprises are subject to individual income tax at a rate of 20%. However, in accordance with the Circular of the MOF and the STA on Declaring that Individual Income Tax Continues to be Exempted over Income of Individuals from Transfer of Shares (《財政部、國家税務總局關於個人轉讓股票所得繼續暫免徵收個人所得税的通知》) (Cai Shui Zi [1998] No. 61), issued jointly by the MOF and STA on March 30, 1998, gains obtained by individuals from the transfer of shares of listed companies have been temporarily exempted from individual income tax since January 1, 1997.

However, on December 31, 2009, the MOF, the STA, and the CSRC jointly issued the Circular on Related Issues on Levying Individual Income Tax over the Income Received by Individuals from the Transfer of Listed Shares Subject to Sales Limitation (《關於個人轉讓上市公司限售股所得徵收個人所得税有關問題的通知》) (Cai Shui [2009] No. 167). The circular, effective from January 1, 2010, stipulates that individuals' income derived from the transfer of listed shares acquired through public offerings and trading on the Shanghai Stock Exchange and the Shenzhen Stock Exchange remains exempt from individual income tax. This exemption applies to shares not subject to sales restrictions, as defined in the Supplementary Notice on Issues Concerning the Individual Income Tax on Individuals' Income from the Transfer of Restricted Stocks of Listed Companies (《關於個人轉讓上市公司限售股所得徵收個人所得税有關問題的補充通知》) (Cai Shui [2010] No. 70), jointly issued by the three aforementioned departments and effective from November 10, 2010.

As of the Latest Practicable Date, there are no provisions expressly stating that individual income tax shall be imposed on non-PRC resident individuals for the transfer of shares in PRC resident enterprises listed on overseas stock exchanges.

Enterprise investors

In accordance with the Enterprise Income Tax Law and the Implementation Provisions of the Enterprise Income Tax Law of the PRC, non-resident enterprises are typically subject to a 10% enterprise income tax on income sourced within the PRC. This includes gains realized from the disposal of equity interests in a PRC resident enterprise. However, this taxation applies only if the non-resident enterprise does not maintain a physical establishment or premises in the PRC, or if it does have such establishments in the PRC, but its PRC-sourced income is not genuinely connected with those establishments.

The withholding of income tax for non-resident enterprises is executed at the source, with the entity making the payment acting as the withholding agent. This withholding agent is obliged to deduct the income tax from each payment or due payment made to the non-resident enterprise. It's important to note that the tax liability may be reduced or exempted in accordance with applicable tax treaties or agreements on the avoidance of double taxation.

Stamp Duty

In compliance with the PRC Stamp Duty Law (《中華人民共和國印花税法》), as issued by the SCNPC on June 10, 2021, and enforced from July 1, 2022 (referred to as the "**Stamp Duty Law**"), all entities and individuals involved in securities transactions within the PRC are obligated to pay stamp duty as per the regulations outlined in the Stamp Duty Law. Consequently, the stipulations concerning stamp duty applied to the transfer of shares of PRC-listed companies do not extend to the transfer and disposal of H Shares by non-PRC investors outside the PRC.

Estate duty

Under prevailing PRC legislation, there is presently no imposition of estate duty within the jurisdiction.

Major Taxes on the Company in the PRC

Please refer to the section headed "Regulatory Overview" of this document.

FOREIGN EXCHANGE

The lawful currency of the PRC is Renminbi, which is currently subject to foreign exchange control and cannot be freely converted into foreign currency. The SAFE, with the authorization of the People's Bank of China (the "**PBOC**"), is empowered with the functions of administering all matters relating to foreign exchange, including the enforcement of foreign exchange control regulations.

The Regulations of the PRC on the Management of Foreign Exchange (《中華人民共和國外匯管理條例》, the "**Regulations on the Management of Foreign Exchange**"), which was promulgated by the State Council on January 29, 1996 and effective on April 1, 1996, classifies all international payments and transfers into current items and capital items. Most of the current items are not subject to the approval of foreign exchange administrative authorities, while capital items are subject to the

approval of foreign exchange administrative authorities. According to the Regulations on the Management of Foreign Exchange as amended on January 14, 1997 and August 5, 2008, the PRC will not impose any restriction on international current payments and transfers.

The Regulations for the Administration of Settlement, Sale and Payment of Foreign Exchange (《結匯、售匯及付匯管理規定》, the "**Settlement Regulations**"), which was promulgated by the PBOC on June 20, 1996 and effective on July 1, 1996, removes other restrictions on convertibility of foreign exchange under current items, while imposing existing restrictions on foreign exchange transactions under capital items.

According to the Announcement on Improving the Reform of the Renminbi Exchange Rate Formation Mechanism (《關於完善人民幣匯率形成機制改革的公告》) (PBOC Announcement [2005] No. 16), which was issued by the PBOC on July 21, 2005 and effective on the same date, the PRC began to implement a managed floating exchange rate system in which the exchange rate would be determined based on market supply and demand and adjusted with reference to a basket of currencies from July 21, 2005. Therefore, the Renminbi exchange rate was no longer pegged to the U.S. dollar. The PBOC would publish the closing price of the exchange rate of the Renminbi against trading currencies such as the U.S. dollar in the interbank foreign exchange market after the closing of the market on each working day, as the central parity of the currency against Renminbi transactions on the following working day.

On August 5, 2008, the State Council promulgated the revised Regulation on the Management of Foreign Exchange, which has made substantial changes to the foreign exchange supervision system of the PRC. First, it has adopted an approach of balancing the inflow and outflow of foreign exchange. Foreign exchange income received overseas can be repatriated or deposited overseas, and foreign exchange and settlement funds under the capital account are required to be used only for purposes as approved by the competent authorities and foreign exchange administrative authorities; second, it has improved the RMB exchange rate formation mechanism based on market supply and demand; third, in the event that international balance of payment suffer or may suffer a material misbalance, or the national economy encounters or may encounter a severe crisis, the State may adopt necessary safeguard or control measures against international balance of payment; fourth, it has enhanced the supervision and administration of foreign exchange transactions and grant extensive authorities to the SAFE to enhance its supervisory and administrative powers.

According to the relevant laws and regulations in the PRC, PRC enterprises (including foreign investment enterprises) which need foreign exchange for current item transactions may, without the approval of the foreign exchange administrative authorities, effect payment from foreign exchange accounts opened at the designated foreign exchange banks, on the strength of valid transaction receipt or proof. Foreign investment enterprises which need foreign exchange for the distribution of profits to their shareholders and PRC enterprises which, in accordance with regulations, are required to pay dividends to their shareholders in foreign exchange (such as our Company) may, on the strength of resolutions of the Board of Directors or the shareholders' meeting on the distribution of profits, effect payment from foreign exchange accounts at the designated foreign exchange banks or effect exchange and payment at the designated foreign exchange banks.

On October 23, 2014, the State Council promulgated the Decisions on Matters including Canceling and Adjusting a Batch of Administrative Approval Items (《國務院關於取消和調整一批行政審批項目等事項的決定》) (Guo Fa [2014] No. 50), which decided to cancel the approval requirement of the SAFE and its branches for the remittance and settlement of the proceeds raised from the overseas listing of the foreign shares into RMB domestic accounts.

On December 26, 2014, the SAFE implemented the Notice of the SAFE on Issues Concerning the Foreign Exchange Administration of Overseas Listing (《國家外匯管理局關於境外上市外匯管理有關問題的通知》) (Hui Fa [2014] No. 54), pursuant to which, a domestic company shall, within 15 business days from the date of the end of its overseas listing issuance, register the overseas listing with the Administration of Foreign Exchange at the place of its establishment; the proceeds from an overseas listing of a domestic company may be remitted to the PRC or deposited overseas, but the use of the proceeds shall be consistent with the contents as specified in the document and other disclosure documents.

According to the Guidelines for the Foreign Exchange Business under the Capital Account (2024) (《資本項目外匯業務指引(2024年版)》) issued by SAFE on April 3, 2024, in principle, the funds raised by overseas listings of domestic companies should be repatriated to China in a timely manner, and can be repatriated in RMB or foreign currency. The use of funds shall be consistent with the relevant contents listed in the document or corporate bond offering documents, shareholder circulars, resolutions of the board of directors or shareholders' meeting and other publicly disclosed documents. Domestic companies using the funds raised from overseas listings to carry out overseas direct investment, overseas securities investment, overseas lending and other businesses shall comply with the relevant foreign exchange management regulations.

According to the Notice of the SAFE on Further Simplifying and Improving Policies for the Foreign Exchange Administration of Direct Investment (《國家外匯管理局關於進一步簡化和改進直接投資外匯管理政策的通知》) (Hui Fa [2015] No. 13) promulgated by the SAFE on February 13, 2015 and took effect on June 1, 2015, and amended on December 30, 2019, two of the administrative examination and approval items, being the confirmation of foreign exchange registration under domestic direct investment and the confirmation of foreign exchange registration under overseas direct investment have been canceled, the foreign exchange registration under domestic direct investment and overseas direct investment shall be directly examined and handled by banks. The SAFE and its branch offices shall indirectly regulate the foreign exchange registration of direct investment through banks.

According to the Notice of the State Administration of Foreign Exchange on Reforming and Regulating Policies on the Administration of Foreign Exchange Settlement under Capital Accounts (《國家外匯管理局關於改革和規範資本項目結匯管理政策的通知》) (Hui Fa [2016] No. 16) issued by the SAFE and came into effect on June 9, 2016, the settlement of foreign exchange receipts under the capital account (including the foreign exchange capital, external debts and funds recovered from overseas listing, etc.) that are subject to discretionary settlement as already specified by relevant policies may be handled at banks based on the domestic institutions' actual requirements for business operation. The proportion of discretionary settlement of domestic institutions' foreign exchange receipts under the capital account is temporarily determined as 100%. The SAFE may, based on the international balance of payments, adjust the aforesaid proportion at appropriate time.

On January 26, 2017, the SAFE issued the Notice of the State Administration of Foreign Exchange on Further Promoting the Reform of Foreign Exchange Administration and Improving the Examination of Authenticity and Compliance (《國家外匯管理局關於進一步推進外匯管理改革完善真實合規性審核的通知》) (Hui Fa [2017] No. 3) to further expand the scope of settlement for domestic foreign exchange loans, allow settlement for domestic foreign exchange loans with export background under goods trading; allow repatriation of funds under domestic guaranteed foreign loans for domestic utilization; allow settlement for domestic foreign exchange accounts of foreign institutions operating in the Free Trade Pilot Zones; and adopt the model of full-coverage RMB and foreign currency overseas

lending management, where a domestic institution engages in overseas lending, the sum of its outstanding overseas lending in RMB and outstanding overseas lending in foreign currencies shall not exceed 30% of its owner's equity in the audited financial statements of the preceding year.

On October 23, 2019, the SAFE issued the Circular of the State Administration of Foreign Exchange on Further Promoting Cross-border Trade and Investment Facilitation (《國家外匯管理局關於進一步促進跨境貿易投資便利化的通知》) (Hui Fa [2019] No. 28), which stipulated that on the basis that investing foreign-funded enterprises may make domestic equity investments with their capital funds in accordance with laws and regulations, non-investing foreign-funded enterprises are permitted to legally make domestic equity investments with their capital funds under the premise that the existing Special Administrative Measures (Negative List) for the Access of Foreign Investment (《外商投資准入特別管理措施(負面清單)》) are not violated and domestic invested projects are true and compliant.

PRC LAWS AND REGULATIONS

The PRC Legal System

The PRC legal system is based on the Constitution of the PRC (the "**Constitution**") and is made up of written laws, administrative regulations, local regulations, autonomous regulations, separate regulations, rules and regulations of State Council departments, rules and regulations of local governments, laws of special administrative regions and international treaties of which the PRC Government is a signatory, and other regulatory documents. Court judgments do not constitute legally binding precedents, although they are used for the purposes of judicial reference and guidance.

Pursuant to the Constitution and the Legislation Law of the PRC (2023 Revision) (《中華人民共和國立法法(2023修正)》) (the "**Legislation Law**"), the NPC and SCNPC are empowered to exercise the legislative power of the State. The NPC has the power to formulate and amend the basic laws governing criminal and civil matters, State institutions and other matters. The SCNPC formulates and amends laws other than those required to be enacted by the NPC and to supplement and amend parts of the laws enacted by the NPC during the adjournment of the NPC, provided that such supplements and amendments are not in conflict with the basic principles of such laws.

The State Council is the highest organ of state administration and has the power to formulate administrative regulations based on the Constitution and laws. The people's congresses of the provinces, autonomous regions and municipalities and their standing committees may formulate local regulations based on the specific circumstances and actual needs of their respective administrative areas, provided that such local regulations do not contravene any provision of the Constitution, laws or administrative regulations. The people's congresses of cities with districts and their respective standing committees may formulate local regulations with respect to urban and rural construction and administration, ecological civilization construction, historical and cultural protection, grassroots governance and other aspects according to the specific circumstances and actual needs of such cities, provided that such local regulations do not contravene any provision of the Constitution, laws, administrative regulations and local regulations of their respective provinces or autonomous regions. If the law provides otherwise on the formulation of local regulations by cities divided into districts, those provisions shall prevail. Such local regulations of cities with districts will become enforceable after being reported to and approved by the standing committees of the people's congresses of the relevant provinces or autonomous regions. The standing committees of the people's congresses of the provinces or autonomous regions examine the legality of local regulations submitted for approval, and such approval should be granted within four months if they are not in conflict with the Constitution, laws, administrative regulations and local regulations of such provinces or autonomous regions. Where, during the examination for approval of local regulations of cities divided into districts by the standing committees of the people's congresses of the provinces or autonomous regions, conflicts are identified with the rules and regulations of the people's governments of the provinces or autonomous regions concerned, a decision should be made by the standing committees of the people's congresses of provinces or autonomous regions to resolve the issue. People's congresses of national autonomous areas have the power to enact autonomous regulations and separate regulations in light of the political, economic and cultural characteristics of the ethnic groups in the areas concerned. The ministries, commissions of the State Council, the PBOC, the National Audit Office, institutions with administrative functions directly under the State Council, and other institutions stipulated by law may formulate rules and regulations within the power of their respective departments based on the laws, administrative regulations, decisions and rulings of the State Council. Matters governed by the departmental rules and regulations should be those for the enforcement of the laws, administrative regulations, decisions and rulings of the State Council. The people's governments of provinces, autonomous regions and

municipalities directly under the central government and cities divided into districts and autonomous regions may formulate rules, in accordance with laws, administrative regulations and relevant local regulations of provinces, autonomous regions and municipalities directly under the central government.

Pursuant to the Resolution of the SCNPC Providing an Improved Interpretation of the Law (《全國人民代表大會常務委員會關於加強法律解釋工作的決議》) passed on June 10, 1981, issues related to the further clarification or supplement of laws or decrees should be interpreted by the SCNPC or provided by with decrees, issues related to the application of laws in a court trial should be interpreted by the Supreme People's Court, issues related to the application of laws in a prosecution process should be interpreted by the Supreme People's Procuratorate, and the application of other laws and decrees in matters other than those involved in trial or prosecution process should be interpreted by the State Council and the competent authorities. The State Council and its ministries and commissions are also vested with the power to give interpretations of the administrative regulations and departmental rules which they have promulgated. At the regional level, the power to interpret regional laws and regulations is vested in the regional legislative and administrative authorities which promulgate such laws and regulations.

The PRC Judicial System

Under the Constitution, the Law of Organization of the People's Courts of the PRC (2018 revision) (《中華人民共和國人民法院組織法(2018修訂)》) and the Law of Organization of the People's Procuratorate of the PRC (2018 revision) (《中華人民共和國人民檢察院組織法(2018修訂)》), the people's courts of the PRC are classified into the Supreme People's Court, the local people's courts at various levels, and other special people's courts. The local people's courts at various levels are divided into three levels, namely, the primary people's courts, the intermediate people's courts and the higher people's courts. The primary people's courts may set up a number of people's tribunals based on the facts of the region, population and cases. The Supreme People's Court is the highest judicial authority. The Supreme People's Court shall supervise the judicial work of the local people's courts at all levels and special people's courts, and people's courts at higher levels shall supervise the judicial work of people's courts at lower levels. The Chinese People's Procuratorates are divided into the Supreme People's Procuratorate, local people's procuratorates at various levels, and specialized people's procuratorates such as the Military Procuratorate. The Supreme People's Procuratorate is the highest procuratorial organ. The Supreme People's Procuratorate directs the work of the local people's procuratorates and specialized people's procuratorates at all levels, and the people's procuratorates at higher levels direct the work of the people's procuratorates at lower levels.

The people's court takes the rule of the second instance as the final rule, that is, the judgments or rulings of the second instance of the people's court are final. The parties may appeal against the judgment or ruling of the first instance of a local people's court. The people's procuratorate may present a protest to the people's court at the next higher level in accordance with the procedures stipulated by the laws. In the absence of any appeal by the parties and any protest by the people's procuratorate within the stipulated period, the judgments or rulings of the people's court are final. Judgments or rulings of the second instance of the intermediate people's courts, the higher people's courts and the Supreme People's Court are final. The first judgments or rulings of the Supreme People's Court are also final. However, if the Supreme People's Court or a people's court at the next higher level discovers an error in the final and binding judgment or ruling which has taken effect in any people's court at a lower level, or the presiding judge of a people's court discovers an error in a final and binding judgment which has taken effect in the court over which he presides, a retrial of the case may be initiated according to the judicial supervision procedures.

The Civil Procedure Law of the PRC (《中華人民共和國民事訴訟法》) (the "**PRC Civil Procedure Law**") adopted on April 9, 1991 and amended five times on October 28, 2007, August 31, 2012, June 27, 2017, December 24, 2021 and September 1, 2023 prescribes the conditions for instituting a civil action, the jurisdiction of the people's courts, the procedures for conducting a civil action, and the procedures for enforcement of a civil judgment or ruling. Each party to a civil action conducted within the PRC must comply with the relevant provisions of the PRC Civil Procedure Law. A civil case is generally heard by the court located in the defendant's place of domicile. The court of jurisdiction in respect of a civil action may also be chosen by explicit agreement among the parties to a contract, provided that the people's court having jurisdiction should be located at places directly connected with the disputes, such as the plaintiff's or the defendant's place of domicile, the places where the contract is executed or signed or the place where the subject-matter of the action is located. Meanwhile, such selection cannot violate the stipulations of hierarchical jurisdiction and exclusive jurisdiction in any case.

A foreign individual, a person without nationality, a foreign enterprise and organization is given the same litigation rights and obligations as a citizen, a legal person and other organization of the PRC when initiating actions or defending against litigation at the people's court. Should a foreign court limit the litigation rights of citizens, a legal person, and other organizations of the PRC, the PRC court may apply the same limitations to the civil litigation rights to citizens, enterprises and organizations of such foreign country. A foreign individual, a person without nationality, a foreign enterprise and organization must engage a PRC lawyer in case he or it needs to engage a lawyer for the purpose of initiating actions or defending against litigations at the people's court. In accordance with the international treaties to which the PRC is a signatory or participant or according to the principle of reciprocity, a people's court and a foreign court may request each other to serve documents, conduct investigation and collect evidence and conduct other actions on its behalf. A people's court shall not accommodate any request made by a foreign court which will result in the violation of sovereignty, security or public interests of the PRC.

All parties to a civil action shall perform the legally effective judgments and rulings. If any party to a civil action refuses to abide by a judgement or ruling made by a people's court or an award made by an arbitration tribunal in the PRC, the other party may apply to the people's court for the enforcement of the same within two years subject to application for postponed enforcement or revocation. If a party fails to satisfy within the stipulated period a judgement which the court has granted an enforcement approval, the court may, upon the application of the other party, mandatorily enforce the judgement on the party.

Where a party applies for enforcement of a legally effective judgement or ruling made by a people's court, and the opposite party or his property is not within the territory of the PRC, the applicant may directly apply to a foreign court with jurisdiction for recognition and enforcement of the judgement or ruling, or the people's court may, in accordance with the provisions of international treaties to which the PRC is a signatory or in which the PRC is a participant or the principle of reciprocity, request recognition and enforcement by a foreign court. Similarly, where an effective judgment or ruling made by a foreign court needs to be recognized and enforced by the people's court of the PRC, unless the people's court considers that the recognition or enforcement of the judgment or ruling would violate the basic legal principles of the PRC, national sovereignty, national security or social and public interest, the parties involved may directly apply to an intermediate people's court of the PRC with jurisdiction for recognition and enforcement, or the foreign court may, in accordance with the provisions of international treaties entered into or acceded to by that country and the PRC or according to the principle of reciprocity, request the people's court to recognize and enforce it.

The Company Law of the PRC, the Trial Administrative Measures of Overseas Securities Offering and Listing by Domestic Companies and the Guidelines for the Articles of Association of Listed Companies

The Company Law of the People's Republic of China (《中華人民共和國公司法》) (the "**PRC Company Law**") was adopted by the Standing Committee of the Eighth NPC at its Fifth Session on December 29, 1993 and came into effect on July 1, 1994. It was successively amended on December 25, 1999, August 28, 2004, October 27, 2005, December 28, 2013, October 26, 2018 and December 29, 2023. The newly revised PRC Company Law has been implemented on July 1, 2024.

On February 17, 2023, CSRC promulgated the Trial Administrative Measures of Overseas Securities Offering and Listing by Domestic Companies (《境內企業境外發行證券和上市管理試行辦法》) (the "**Overseas Listing Trial Measures**")) (which came into effect on March 31, 2023) and its relevant interpretative guidelines, which is applicable to direct and indirect overseas share subscription and listing of domestic companies, which also stipulates the filing administrative measures and regulatory requirements for the overseas securities offering and listing by domestic companies.

On March 28, 2025, the CSRC Promulgated the latest amended Guidelines for the Articles of Association of Listed Companies (《上市公司章程指引》) (the "**Guidelines for the Articles of Association**"). According to the Overseas Listing Trial Measures and its supporting guidelines, Guidelines for the Application of Regulatory Rules – Overseas Listing Category No. 1, domestic enterprises that are directly listed overseas shall formulate its Articles of Association with reference to the Guidelines for the Articles of Association and other relevant provisions of the CSRC on main provisions of the PRC Company Law, the Overseas Listing Trial Measures and the Guidelines for the Articles of Association.

General Provisions

A joint stock limited company refers to an enterprise legal person incorporated under the PRC Company Law with its registered capital divided into shares of equal par value. The liability of its shareholders is limited to the amount of shares held by them and the company is liable to its creditors for an amount equal to the total value of its assets.

A joint stock limited company shall conduct its business in accordance with laws and administrative regulations. It may invest in other limited liability companies and joint stock limited companies and its liabilities with respect to such invested companies are limited to the amount invested. If it is prescribed by any law that a company shall not become a capital contributor that shall bear the joint and several liability for the debts of the enterprises it invests in, such provisions shall prevail.

Incorporation

A joint stock limited company may be incorporated by promotion or raising. A joint stock limited company shall be incorporated by one to 200 promoters, provided that at least more than half of the promoters must reside in the PRC. Where a joint stock limited company is to be established by means of promotion, promoters shall fully subscribe for the shares that shall be issued at the time of the establishment of the company as provided for in the Articles of Association. If a joint stock limited company is to be established by means of raising, the promoters shall subscribed for not less than 35% of the total shares that shall be issued at the time of the establishment of the company as provided for in the Articles of Association; however, where laws and administrative regulations provide otherwise, such provisions shall prevail.

A document shall be published and a subscription letter shall be prepared when the promoters **[REDACTED]** to the public. The subscriber shall fill in the number of shares subscribed for, amount and domicile and affix his/her signature or seal to the subscription letter. The subscriber shall make full payment for the shares subscribed for. Where a promoter is offering shares to the public, such offer shall be underwritten by security companies established under PRC laws, and an underwriting agreement shall be concluded thereon. A promoter offering shares to the public shall also enter into agreements with banks in relation to the receipt of subscription monies. The receiving banks shall receive and keep in custody the subscription monies, issue receipts to subscribers who have paid the subscription monies and furnish evidence of receipt of those subscription monies to relevant authorities. After the share capital for a public offering has been paid in full, a capital verification institution established under PRC law must be engaged to conduct a capital verification and furnish a certificate thereof. Where the shares to be issued have not been fully subscribed for at the time of the establishment of a company, or the promoters fail to hold an establishment meeting within 30 days after the full payment has been made for the shares to be issued, subscribers may claim against the promoters for refund of the payment for shares plus the interest on the bank deposits for the same term. The promoters and subscribers may not withdraw their share capital after they have made payment for the shares or delivered non-monetary property as capital contributions, except that the shares have not been fully subscribed for within the time limit, the promoters fail to hold the establishment meeting on schedule, or the establishment meeting decides not to establish the company. The Board of Directors shall, within 30 days after the end of the establishment meeting of a company, authorize a representative to file an application for registration of establishment with the company registration authority.

A company's promoter shall be liable for the followings: (1) the debts and expenses incurred in the establishment process jointly and severally if the company cannot be established; (2) the refund of subscription monies paid by the subscribers together with interest at bank deposit rates for the same period jointly and severally if the company cannot be established.

Share Capital

The promoters may make a capital contribution in currencies, or non-monetary assets such as in kind or intellectual property rights, land use rights, stock rights or creditor's rights which can be appraised with monetary value and transferred lawfully, except for assets which are prohibited from being contributed as capital by the laws or administrative regulations. If a capital contribution is made in non-monetary assets, a valuation of the assets contributed must be carried out pursuant to the provisions of the laws or administrative regulations on valuation without any over-valuation or under-valuation. If there are provisions on the assessment of value in any law or administrative regulation, such provisions shall prevail.

The issuance of shares shall be conducted in a fair and equitable manner. Each share of the same class must carry equal rights. Shares issued at the same time and within the same class must be issued on the same conditions and at the same price. The same price per share shall be paid by any share subscriber. The issue price of par value stock may be based on the face value or exceed the face value but shall not be lower than the face value.

Under the PRC Company Law, a joint stock limited company shall maintain a shareholder register which sets forth the following matters: (1) the name and domicile of each shareholder; (2) the type and quantity of subscribed shares for each shareholder; (3) for stocks issued in paper form, the serial numbers of stocks; (4) the date on which each shareholder acquired the shares.

The Overseas Listing Trial Measures provides that domestic enterprises that are listed overseas may raise funds and distribute dividends in foreign currencies or Renminbi. Under the Overseas Listing Trial Measures, for a domestic company directly offering and listing overseas, shareholders of its domestic unlisted shares applying to convert such shares into shares listed and traded on an overseas trading venue shall conform to relevant regulations promulgated by the CSRC and authorize the domestic company to file with the CSRC on their behalf. The domestic unlisted shares mentioned in the preceding paragraph refer to the shares that have been issued by domestic enterprises but have not been listed or listed for trading on domestic exchanges. Domestic unlisted shares shall be centrally registered and deposited with domestic securities registration and settlement institutions. The registration and settlement arrangements of overseas listed shares shall be subject to the provisions of overseas listing places.

Increase In Share Capital

Pursuant to the PRC Company Law, an increase in the capital of a company by means of an issue of new shares must be approved by shareholders in a shareholder's meeting. The Articles of Association or the shareholders' meeting may authorize the Board of Directors to decide to issue not more than 50% of the shares that have been issued within three years. However, if the capital contributions are to be made using non-monetary property, they shall be subject to a resolution made by the shareholders' meeting. Where the Board of Directors is authorized and decides to issue shares, and thus results in a change in the registered capital or the number of issued shares of the company, the voting at the shareholders' meeting may not be needed to revise such item set forth in the Articles of Association of the company. Where the Articles of Association or the shareholders' meeting of a company authorizes the Board of Directors to decide on issuing new shares, a resolution of the Board of Directors shall be adopted by two thirds of all the directors. In addition, where a domestic enterprise issuing and listing overseas, the issuer shall file with the CSRC in accordance with the Overseas Listing Trial Measures and submit a filing report, legal opinions and other relevant materials, giving a true, accurate and complete account of shareholders' information and other information.

Reduction of Share Capital

The company shall reduce the registered capital in accordance with the following procedures as stipulated in the PRC Company Law:

(I) the company shall prepare a balance sheet and an inventory of properties;

(II) make a resolution at a shareholders' meeting to reduce the registered capital;

(III) the company shall notify its creditors within 10 days after making the resolution to reduce the registered capital and publish the relevant announcement in newspapers or on the National Enterprise Credit Information Publicity System within 30 days;

(IV) a creditor may, within 30 days after receipt of the notification, or within 45 days after the date of announcement if he/she has not received the notification, have the right to request the company to repay its debts or provide relevant guarantees; and

(V) the company must apply to the company registration authority for a change in registration.

Where a company reduces its registered capital, it shall reduce the amount of capital contribution or shares in proportion to the capital contribution or shares held by the shareholders, unless it is otherwise prescribed by any law, or is otherwise prescribed by the Articles of Association of the company.

If a company still has losses after making up for them in accordance with the relevant provisions of the PRC Company Law, it may reduce its registered capital to make up for the losses. If the registered capital is reduced to make up for the loss, the company shall not make any distribution to the shareholders, nor shall the shareholders be exempted from their obligation to pay the capital contribution or the share capital. If the registered capital is reduced in accordance with the aforesaid provisions, the item (III) and item (IV) mentioned above shall not apply, but the resolution to reduce the registered capital shall be made by the shareholders' meeting within 30 days from the date of the announcement in the newspapers or on the National Enterprise Credit Information Publicity System. After a company reduces its registered capital in accordance with the provisions of the preceding paragraphs, it shall not distribute profits until the accumulated amount of statutory reserve and discretionary reserve reaches 50% of the company's registered capital.

When a company reduces its registered capital in violation of the provisions of the PRC Company Law, its shareholders shall refund the funds they have received, and if the capital contributions of the shareholders are reduced or exempted, such capital contributions shall be restored to the original status; if any loss is caused to the company, the shareholders and the liable directors and senior management shall bear the liability for compensation.

Repurchase of Shares

Under the provisions of the PRC Company Law, a company shall not repurchase its own shares except in the following circumstances:

(I) reduction of the registered capital of the company;

(II) merger with another company that holds its shares;

(III) use of its shares for carrying out an employee stock ownership plan or equity incentive plan;

(IV) request from shareholders who object to a resolution of a shareholders' meeting on merger or division of the company to acquire their shares by the company;

(V) use of shares for conversion of convertible corporate bonds issued by the listed company; and

(VI) it is necessary for a listed company to maintain its company value and protect its shareholders' equity.

A resolution of a shareholders' meeting is required for the repurchase of shares by a company under either of the circumstances stipulated in item (I) or item (II) above; for a company's repurchase of shares under any of the circumstances stipulated in item (III), item (V) or item (VI) above, a resolution of a meeting of the Board of Directors shall be made by more than two-thirds of directors attending the meeting according to the provisions of the Company's Articles of Association or as authorized by the shareholders' meeting.

The shares acquired by the company according to the above provisions under the circumstance stipulated in item (I) hereof a company shall be deregistered within 10 days from the date of acquisition of shares; the shares shall be transferred or deregistered within six months if the repurchase of shares is made under the circumstances stipulated in either item (II) or item (IV); and the shares in the company held in total by the company after the repurchase of shares under any of the circumstances stipulated in item (III), item (V) or item (VI) shall not exceed 10% of the Company's total issued shares, and shall be transferred or deregistered within three years.

A company shall not accept its own shares as the subject matter of a mortgage.

No company may provide gifts, loans, guarantees or other financial aids for others to obtain the shares of the company or the parent company thereof unless it carries out an employee stock ownership plan. For the benefits of the company, the company may, upon a resolution by the shareholders' meeting or by the Board of Directors under the Articles of Association or the authorization of the shareholders' meeting, provide financial aids for others to obtain the shares of the company or the parent company thereof, provided that the total accumulative amount of the financial aids shall not exceed 10% of the total issued share capital. A resolution by the Board of Directors shall be adopted by two thirds of all the directors.

Any director or senior management who is liable for any loss to the company due to violation of the provisions of the preceding paragraph shall make compensations.

Transfer of Shares

The shares held by a shareholder of a company may be transferred to other shareholders or to persons other than the shareholders of the company. Where the Articles of Association of the company have any restriction on the transfer of shares, the transfer shall be carried out in accordance with the Articles of Association. Under the PRC Company Law, a shareholder should effect a transfer of his shares on the stock exchange established in accordance with laws or by any other means as required by the State Council. The transfer of shares by a shareholder must be conducted by means of an endorsement or by other means stipulated by laws or by administrative regulations. Following the transfer of shares, the company shall enter the names and domiciles of the transferee into its share register. Change of the register of members described in the preceding paragraph shall not be registered within 20 days before the convening of a shareholders' meeting or 5 days prior to the base date on which the company decides to distribute dividends. However, where it is otherwise provided for in any law, administrative regulation or by the securities regulatory authority of the State Council for the modification of the register of shareholders of a listed company, such provisions shall prevail.

Pursuant to the PRC Company Law, shares of the company issued prior to the public issue of shares may not be transferred within one year of the date of the company's listing on the stock exchange. Where it is otherwise provided for in any law, administrative regulation or by the securities regulatory authority of the State Council for the transfer of shares held by the shareholders or actual controllers of a listed company, such provisions shall prevail. Directors and senior management of the company shall declare to the company the shares they hold and the changes thereof during the term of office as determined when they assume the posts, the shares transferred each year shall not exceed 25% of the total shares they hold of the company. They shall not transfer the shares they hold within one year of the date of the company's listing on the stock exchange, nor within six months after they leave their positions in the company. The Articles of Association may set out other restrictive provisions in

respect of the transfer of shares in the company held by its directors and the senior management. Where the shares are pledged within the time limit for restricted transfer as provided for by laws and administrative regulations, the pledgee may not exercise the pledge right within such restricted period.

Pursuant to the Overseas Listing Trial Measures, for a domestic company directly offering and listing overseas, the shareholders of its domestic unlisted shares applying to convert its domestic unlisted shares into overseas listed shares and listed and traded on an overseas trading venue shall conform to relevant regulations promulgated by the CSRC, and appoint the domestic company to file with the CSRC.

Shareholders

Pursuant to the PRC Company Law and the Guidelines for Articles of Association, the rights of shareholders include the rights:

(I) to be legally entitled to assets income, participate in significant decision-making and select management personnel;

(II) to petition the people's court to revoke any resolution of a shareholders' meeting, a shareholders' meeting or a meeting of the Board of Directors that has been convened or whose voting has been conducted in violation of the laws, administrative regulations or the Articles of Association of the company, or any resolution the contents of which is in violation of the laws, administrative regulations or the Articles of Association of the company, provided that such petition shall be submitted to the people's court within 60 days of the passing of such resolution;

(III) to transfer his/her shares legally;

(IV) to attend or appoint a proxy to attend shareholders' meeting and exercise the voting rights;

(V) to inspect and copy the Articles of Association of the company, share register, the minutes of shareholders' meeting, board resolutions, resolutions of the Audit Committee and the financial and accounting reports, and to make suggestions or inquiries in respect of the company's operations;

(VI) to receive dividends in respect of the number of shares held;

(VII) to participate in the distribution of residual properties of the company in proportion to their shareholdings upon the liquidation of the company; and

(VIII) any other shareholders' rights provided for in laws, administrative regulations, other normative documents and the Articles of Association of the company.

The obligations of shareholders include the obligation to abide by the Articles of Association of the company, to pay the subscription monies in respect of the shares subscribed for, to be liable for the company's responsibilities in respect of the shares taken up by them and any other shareholder obligation specified in the Articles of Association of the company.

Shareholders' meeting

The shareholders' meeting is the organ of authority of the company, which exercises its powers in accordance with the PRC Company Law. The shareholders' meeting may exercise its powers:

(I) to elect or replace the directors and to decide on their remunerations;

(II) to consider and approve the reports of the Board of Directors;

(III) to consider and approve the company's profit distribution and loss recovery proposals;

(IV) to decide on any increase or reduction of the company's registered capital;

(V) to decide on the issue of corporate bonds;

(VI) to decide on merger, division, dissolution and liquidation of the company or change of its corporate form;

(VII) to amend the Articles of Association of the company; and

(VIII) to exercise any other authority stipulated in the Articles of Association of the company.

The shareholders' meeting may authorize the Board of Directors to make resolutions on the issuance of corporate bonds.

Pursuant to the PRC Company Law and the Guidelines for Articles of Association, a shareholders' meeting is required to be held once a year within six months after the end of the previous accounting year. An interim shareholders' meeting is required to be held within two months upon the occurrence of any of the following:

(I) the number of directors is less than the number required by the law or less than two-thirds of the number specified in the Articles of Association of the company;

(II) the total outstanding losses of the company amounted to one-third of the company's total capital stock;

(III) shareholders individually or in aggregate holding 10% or more of the company's shares request to convene an interim shareholders' meeting;

(IV) the Board of Directors deems necessary;

(V) the Audit Committee so proposes; or

(VI) any other circumstances as provided for in the Articles of Associations of the company.

A shareholders' meeting is convened by the Board of Directors and presided over by the chairman of the Board of Directors. In the event that the chairman is incapable of performing or is not performing his or her duties, the meeting shall be presided over by the vice chairman. If the vice chairman is incapable of performing or is not performing his or her duties, a director jointly recommended by more than half of directors shall preside over the meeting. If the Board of Directors is

unable to or fails to perform its duty of convening the shareholders' meeting, the Audit Committee shall convene and preside over such meeting in a timely manner; if the Audit Committee fails to convene and preside over such meeting, shareholders who individually or jointly hold more than 10% of the company's shares for more than 90 consecutive days may independently convene and preside over such meeting. If the shareholders who individually or jointly hold more than 10% of the shares of the company request to convene an interim shareholders' meeting, the Board of Directors and the Audit Committee shall, within 10 days after the receipt of such request, decide whether to hold an interim shareholders' meeting and reply to the shareholders in writing.

In accordance with the PRC Company Law, a notice stating the time and venue of the meeting and the matters to be considered at the meeting shall be given to all shareholders 20 days before the meeting if the shareholders' meeting is convened. Notice of the interim shareholders' meeting shall be given to all shareholders 15 days before the meeting. Shareholders who individually or jointly hold more than one percent of the shares of the company may submit an interim proposal in writing to the Board of Directors ten days before the shareholders' meeting is held. The Board of Directors shall notify other shareholders within two days upon receipt of the proposal, and submit the interim proposal to the shareholder's meeting for deliberation, unless the interim proposal is in violation of any law, administrative regulation or the Articles of Association or fails to fall into the scope of functions of the shareholders' meeting. The company shall not raise the shareholding proportion of the shareholder who brings forward any interim proposal. A company offering shares to the public shall make the notices as mentioned in the preceding paragraphs by way of announcement. The shareholders' meeting shall not make any resolution on any matter not specified in the notice.

According to the PRC Company Law, shareholders present at shareholders' meeting shall have one vote for each share they hold, except the shareholders of classified shares. The company may not have a voting right for the shares it holds.

An accumulative voting system may be adopted for the election of directors at the shareholders' meeting pursuant to the provisions of the Articles of Association of the company or a resolution of the shareholders' meeting. Under the accumulative voting system, when the shareholders' meeting elects directors, each share has the same voting rights as the number of directors to be elected, and the voting rights owned by shareholders can be used collectively.

Under the PRC Company Law, the passing of any resolution at the shareholder's meeting requires affirmative votes of shareholders representing more than half of the voting rights held by the shareholders who attend the shareholder's meeting except in cases of proposed amendments to a Articles of Association, increase or decrease of registered capital, merger, division or dissolution, or change of corporation form, which require affirmative votes of shareholders representing more than two-thirds of the voting rights held by the shareholders who attend the shareholder's meeting.

Minutes shall be prepared in respect of matters considered at the shareholders' meeting and the chairperson and directors attending the meeting shall endorse such minutes by signature. The minutes shall be kept together with the shareholders' attendance register and the proxy forms.

Board of Directors

A joint stock limited company shall have a board. However, a joint stock limited company with a relatively small scale or relatively small number of shareholders may dispense with the Board of Directors and have one director to exercise the functions and powers of the Board of Directors as prescribed by the PRC Company Law. If the Board of Directors of a company has more than three

members, it may include an employees' representative of the company. The employees' representatives in the Board of Directors shall be democratically elected by the employees through the employees' representative congress, employees' congress or by other means.

The term of office of the directors shall be provided for by the Articles of Association, but each term of office shall not exceed three years. A director may seek reelection upon expiry of the said term. A director shall continue to perform his/her duties as a director in accordance with the laws, administrative regulations and the Articles of Association until a duly re-elected director takes office, if re-election is not conducted in a timely manner upon the expiry of his/her term of office or if the resignation of directors results in the number of directors being less than the quorum. Where a director resigns, he/she shall notify the company in written form, and the resignation shall become effective on the day when the company receives the notice.

However, under any of the circumstances as mentioned in the preceding paragraph, the director shall continue performing his/her duties.

Under the PRC Company Law, the Board of Directors may exercise the following powers:

(I) to convene shareholders' meeting and report on its work to the shareholders' meeting;

(II) to implement the resolutions passed by the shareholders at the shareholders' meeting;

(III) to decide on the Company's operational plans and investment proposals;

(IV) to formulate the Company's proposals for profit distribution and for recovery of losses;

(V) to formulate proposals for the increase or reduction of the Company's registered capital and the issue of corporate bonds;

(VI) to formulate proposals for the merger, division, dissolution of the Company or change in the form of the Company;

(VII) to decide on the setup of the Company's internal management organs;

(VIII) to decide on appointment or dismissal the manager of the Company and his/her remuneration matters, and as nominated by the manager, to decide on appointment or dismissal the Company's deputy general manager and financial officer and his/her remuneration matters;

(IX) to formulate the Company's basic management system; and

(X) other authority stipulated in the Articles of Association or granted by the shareholders' meeting.

Any restrictions on the functions and powers of the Board of Directors set out in the Articles of Association may not be asserted against any bona fide third party.

Under the PRC Company Law, a company may, under the Articles of Association, set up an Audit Committee composed of directors in the Board of Directors, which shall exercise the functions and powers of the Board of Supervisors. It may not have a Board of Supervisors or supervisors. The audit committee shall be composed of at least 3 members, and more than half of the members shall not

assume any position other than the director in the company and shall not have any relationship with the company that may affect their independent and objective judgments. Among the members of the Board of Directors of the company, an employees' representative may become a member of the audit committee. A resolution made by the audit committee shall be adopted by more than half of the members thereof. For voting on a resolution of the audit committee, each member shall have one vote. The discussion methods and voting procedures of the audit committee shall be prescribed in the Articles of Association, unless it is otherwise provided under the PRC Company Law. A company may set up other committees in the Board of Directors under the Articles of Association.

Meeting of the Board of Directors shall be convened at least twice a year. Notice of meeting shall be given to all Directors and Audit Committee Members 10 days before the meeting. Interim board meeting may be proposed to be convened by shareholders representing more than one-tenth of the voting rights, more than one-third of the Directors or the Audit Committee. The chairman shall convene the meeting within 10 days of receiving such proposal, and preside over the board meeting. The Board of Directors may otherwise determine the method of giving notice and notice period for convening an interim meeting of the Board of Directors.

No meeting of the Board of Directors may be held unless more than half of the directors are present. A resolution made by the Board of Directors shall be adopted by more than half of all the directors. For voting on a resolution of the Board of Directors, each director shall have one vote. The Board of Directors shall prepare minutes regarding the decisions on the matters discussed at the meetings, which shall be signed by the directors present.

The directors shall attend the meeting of the Board of Directors in person. Where any director is unable to attend the meeting for any reason, he/she may, by issuing a written power of attorney, entrust another director to attend the meeting on his/her behalf. The power of attorney shall indicate the scope of authorization. The directors shall be responsible for the resolutions made by the Board of Directors. Where a resolution of the Board of Directors is in violation of any law, administrative regulation, Article of Association or resolution of the shareholders' meeting and causes any serious loss to the company, the directors who participate in adopting such resolution shall be liable for compensation to the company. If a director is proved to have expressed his/her objection to the voting on such resolution and such objection has been recorded in the minutes, he/she may be exempted from liability.

Under the PRC Company Law, the following person may not serve as a director of the company:

(I) devoid of or with restricted civil conduct ability;

(II) within five years after serving sentence for embezzlement, bribery, infringement or misappropriation of property, or for jeopardizing socialist market economic order, or within five years after serving sentence and being deprived of political rights for crime; within two years after being pronounced for suspension of sentence since the expiration of the suspension of sentence;

(III) within three years after insolvency and liquidation of such Company or enterprise where the person acted as a director, factory manager or business manager and has been held accountable for the insolvency;

(IV) within three years after company or enterprise the person acted as legal representative is revoked business license and ordered to shut down for violating law on which the person is held accountable; and

(V) being listed as a dishonest person subject to enforcement by the people's court due to large amount of unliquidated mature debts.

Where a company elects or appoints a director to which any of the above circumstances applies, such election, appointment or designation shall be invalid. A director to which any of the above circumstances applies during his/her term of office shall be released of his/her duties by the Company.

In addition, the Guidelines for Articles of Association of Listed Companies further stipulates other circumstances under which a person is disqualified from acting as a director of a company, including: (1) a person who has been banned from the securities market by the CSRC where the relevant period remains unexpired; or (2) a person who is banned from doing so in accordance with other laws, administrative regulations or departmental rules.

Under the PRC Company Law, the Board shall appoint a chairman and may appoint a vice chairman. The chairman and the vice chairman shall be elected with approval of more than half of all the directors. The chairman shall convene and preside over board meeting and review the implementation of board resolutions. The vice chairman shall assist the chairman to perform his/her duties. Where the chairman is incapable of performing or is not performing his/her duties, the duties shall be performed by the vice chairman. Where the vice chairman is incapable of performing or is not performing his/her duties, a director nominated by more than half of the directors shall perform his/her duties.

The Audit Committee

Under the PRC Company Law, where a joint stock limited company does not have the Board of Supervisor, the Audit Committee shall be composed of at least 3 members, and more than half of the members shall not assume any position other than the director in the company and shall not have any relationship with the company that may affect their independent and objective judgments.

Among the members of the Board of Directors of the company, an employees' representative may become a member of the Audit Committee. A resolution made by the Audit Committee shall be adopted by more than half of the members thereof. For voting on a resolution of the Audit Committee, each member shall have one vote. The discussion methods and voting procedures of the Audit Committee shall be prescribed in the Articles of Association, unless it is otherwise provided for by the PRC Company Law. A company may set up other committees in the Board of Directors under the Articles of Association.

Manager and Senior Management

Pursuant to the relevant provisions of the PRC Company Law, a company shall have a manager who shall be appointed or removed by the Board of Directors. The manager shall be responsible to the Board of Directors and exercise his/her functions and powers according to the Articles of Association or the authorization of the Board of Directors. The manager shall attend the meeting of the Board of Directors as a non-voting member.

According to the relevant provisions of the PRC Company Law, senior management refers to the manager, deputy manager, financial officer, secretary to the Board of Directors of a listed company and other personnel as stipulated in the Articles of Association.

Duties of Directors, General Managers and Other Senior Management

Directors and senior management shall comply with laws, administrative regulations and the Articles of Association.

Directors and senior management shall assume the obligation of loyalty to the company and take measures to avoid the conflict between their own interests and those of the company and may not seek any improper interests by taking advantage of their powers. The directors and senior management shall assume the duty of diligence to the company. When performing their duties, they shall, for the best interests of the company, exercise the reasonable care that shall be generally possessed by a manager.

The provisions of the preceding paragraphs shall apply to the controlling shareholder or actual controller of a company who does not serve as a director but actually executes the affairs of the company.

In the meantime, directors and senior management are prohibited from:

(I) embezzling the property or misappropriating the funds of the company;

(II) depositing company funds into accounts under their own names or the names of other individuals;

(III) giving bribes or accepting any other illegal proceeds by taking advantage of his/her power;

(IV) accept commissions from transactions between others and the company for their own benefits;

(V) unauthorized divulgence of confidential information of the company; and

(VI) other acts in violation of their duty of loyalty to the company.

A director or senior management who contravenes laws, administrative regulations or Articles of Association in the performance of his/her duties resulting in any loss to the company shall be liable to the company for compensation.

Where a director or senior management is required to attend a shareholders' meeting, such director or senior management shall attend the meeting and answer the inquiries from shareholders. The Audit Committee may demand the directors or senior management to submit reports on the performance of their duties. The directors and senior management shall truthfully provide relevant information and materials to the Audit Committee, none of them may impede the exercise of powers by the Audit Committee or Audit Committee Members.

Where the directors and senior management violate laws, administrative regulations or the Articles of Association in performance of duties to the company, thereby causing damages to the company, the shareholders individually or jointly holding more than 1% of the shares in the company for more than 180 consecutive days may request in writing the Audit Committee to initiate proceedings in the people's court.

Upon receipt of shareholders' written request stipulated in the preceding paragraph, if the Audit Committee or the Board of Directors refuses to file a lawsuit or does not file a lawsuit within 30 days from receipt of such request, or in the event of emergency where the interest of the company will suffer irreparable damages if lawsuit is not filed immediately, the shareholders stipulated in the preceding paragraph shall have the right to file a lawsuit directly with the people's court in their own name for the interest of the company. For other parties who infringe the lawful interests of the company resulting in loss to the company, the aforementioned shareholder(s) may institute litigation at a people's court in accordance with the procedure described above. Where any director or senior management violates the provisions of laws, administrative regulations or the Articles of Association, damaging interests of shareholders, the shareholders may file a lawsuit with the people's court.

If a director or senior management of a wholly-owned subsidiary of the company violate laws, administrative regulations or the Articles of Association in performance of duties to the company, thereby causing damages to the company, or if the legitimate rights and interests of a wholly-owned subsidiary of the company are impaired by any other person, thus causing any losses, the shareholders of a limited liability company or shareholders of a joint stock limited company individually and jointly holding 1% or more of the total shares of the company for 180 consecutive days or more may request the Audit Committee or the Board of Directors of the wholly-owned subsidiary in written form to initiate a lawsuit in the people's court or directly files a lawsuit with the people's court in their own name.

Finance, Accounting and Profit Distribution

According to the PRC Company Law, a company shall establish its own financial and accounting systems according to the laws, administrative regulations and the regulations of the financial departments of the State Council. A company shall prepare its financial reports at the end of each accounting year which shall be audited by accounting firm according to law. The financial and accounting reports shall be prepared in accordance with the laws, administrative regulations and the regulations of the financial departments of the State Council. The company's financial and accounting reports shall be made available for shareholders' inspection at the company within 20 days before the convening of an annual shareholder's meeting. A joint stock limited company that makes public stock offerings shall announce its financial and accounting reports.

When distributing each year's after-tax profits, the company shall set aside 10% of its after-tax profits for the company's statutory common reserve fund. However, when the cumulative amount of the reserve fund has reached more than 50% of the PRC company's registered capital, it may no longer be allocated. When the company's statutory common reserve fund is not sufficient to make up for the company's losses for the previous years, the current year's profits shall first be used to make up the losses before any allocation is set aside for the statutory common reserve fund. After the company has made allocations to the statutory common reserve fund from its after-tax profits, it may, upon passing a resolution at a shareholders' meeting, make further allocations from its after-tax profits to the discretionary common reserve fund. After the company has made up its losses and made allocations to its discretionary common reserve fund, the remaining after-tax profits shall be distributed to shareholders in proportion to the number of shares held by the shareholders, except for those which are not distributed in a proportionate manner as provided by the Articles of Association. Profit shall not be distributed for a company's shares held by this company.

Where a company distributes profits to shareholders in violation of the relevant provisions of the PRC Company Law, the shareholders shall refund the profits distributed to the company, and the shareholders and the liable directors and senior management shall be held liable for compensation if any loss is caused to the company.

If the shareholders' meeting resolves to distribute profits, the Board of Directors shall do so within six months after the resolution is made.

The premiums received by a company from the issuance of shares at an issue price in excess of the par value of the shares, the amount of share proceeds from the issuance of no-par shares that have not been credited to the registered capital, and other items required by the financial department of the State Council to be included in the capital reserve shall be classified as the capital reserve of the company.

The reserve of a company shall be used for making up losses, expanding the production and business scale or increasing the registered capital of the company. Where the reserve of a company is used for making up losses, the discretionary reserve and statutory reserve shall be firstly used. If losses still cannot be made up, the capital reserve can be used according to the relevant provisions. Where the statutory reserve is converted to increase registered capital, the amount of such reserve retained shall not be less than 25% of the registered capital of the company prior to the conversion.

The company shall have no accounting books other than the statutory books. The company's funds shall not be deposited in any account opened under the name of an individual.

After a company reduces its registered capital in accordance with the provisions of the PRC Company Law, it shall not distribute profits until the accumulated amount of statutory reserve and discretionary reserve reaches 50% of the company's registered capital.

Appointment and Dismissal of Auditors

Pursuant to the PRC Company Law, the appointment or dismissal of an accounting firm responsible for the auditing of the company shall be determined by shareholders at a shareholders' meeting, the Board of Directors the Audit Committee in accordance with the Articles of Association. The accounting firm should be allowed to make representations when the shareholders' meeting, the Board of Directors the Audit Committee conducts a vote on the dismissal of the accounting firm. The company should provide true and complete accounting evidence, accounting books, financial and accounting reports and other accounting information to the engaged accounting firm without any refusal or withholding or misrepresentation of information.

Amendment to Articles of Association

Pursuant to PRC Company Law, the resolution of a shareholders' meeting regarding any amendment to a company's Articles of Association requires affirmative votes by at least two-thirds of the votes held by shareholders attending the meeting. According to the Guidelines for the Articles of Association of Listed Companies, if the amendments to the Articles of Association approved by the resolution of the shareholder's meeting of shareholders are subject to approval by the competent authority, they must be reported to the competent authority for approval; if they involve company registration matters, the modification registrations shall be handled according to law. Where the amendments to the Articles of Association belong to information required to be disclosed by laws and regulations, such amendments shall be announced in accordance with the regulations.

Profit Distribution

Where a company distributes profits to shareholders in violation of the provisions of the Company Law, the shareholders shall refund the profits distributed to the company, and the shareholders, directors, supervisors, and senior management personnel who are responsible for causing losses to the company shall bear compensation liability.

Dissolution and Liquidation

Pursuant to PRC Company Law, a company shall be dissolved for any of the following reasons:

(I) upon expiry of term of business stipulated in the Articles of Association or occurrence of other circumstances of dissolution stipulated in the Articles of Association;

(II) the shareholders' meeting has resolved to dissolve the company;

(III) the company is dissolved by reason of its merger or division;

(IV) the business license of the company is revoked or the company is ordered to close down or to be dissolved in accordance with the laws; or

(V) Where the company encounters serious difficulties in its operations or management that will lead to significant losses to the benefits of the shareholders if the company continues its existence and the situation cannot be resolved by other means, the company is dissolved by a people's court in response to the request of shareholders representing 10% or more of the voting rights of all shareholders of the company.

If any of the situations as mentioned in the preceding paragraph arises, a company shall publicize the situations through the National Enterprise Credit Information Publicity System within ten days.

Where a company falls under the circumstance as mentioned in Items (I) or (II) of the paragraph above and it has not distributed the assets to its shareholders yet, it may survive by modifying its articles of association or upon a resolution of the shareholders' meeting.

To modify its articles of association or make a resolution of the shareholders' meeting according to the provisions of the preceding paragraph, the consent of two thirds or more of the voting rights of the shareholders who attend the meeting of the shareholders' meeting is required.

Where the company is dissolved under the circumstances set forth in item (I), (II), (IV) or (V) above, it shall be liquidated. The directors, who are the liquidation obligors of the company, shall form a liquidation group to carry out liquidation within 15 days from the date of occurrence of the cause of dissolution. The liquidation group shall be composed of the directors, unless it is otherwise provided for in the company's Articles of Association or it is otherwise elected by the shareholders' meeting.

The liquidation obligors shall be liable for compensation if they fail to fulfill their obligations of liquidation in a timely manner, and thus any loss is caused to the company or the creditors.

The liquidation committee may exercise following powers during the liquidation:

(I) to verify the Company's assets and to prepare a balance sheet and an inventory of assets;

(II) to inform creditors by notice or announcement;

(III) to deal with and settle any outstanding business of relevant company;

(IV) to pay all outstanding taxes and the taxes arising during the liquidation process;

(V) to settle claims and debts;

(VI) to distribute the company's remaining assets after its debts have been paid off; and

(VII) to represent the company in civil lawsuits.

The liquidation committee shall notify the company's creditors within 10 days of its establishment, and publish an announcement in newspapers or on the National Enterprise Credit Information Publicity System within 60 days.

A creditor shall lodge his claim with the liquidation committee within 30 days of receipt of the notification or within 45 days of the date of the announcement if he has not received any notification.

The creditors shall explain matters relating to their claims and provide evidential documents. The liquidation committee shall register the creditor's claims. In the claims declaration period, the liquidation committee shall not make repayment to the creditors.

Upon disposal of the company's property and preparation of the required balance sheet and inventory of assets, the liquidation committee shall draw up a liquidation plan and submit this plan to a shareholders' meeting or a people's court for endorsement. The remaining part of the company's assets, after payment of liquidation expenses, employee wages, social insurance fees and statutory compensation, outstanding taxes and the company's debts, shall be distributed to shareholders in proportion to shares held by them. The company shall continue its existence during the liquidation period, although it cannot conduct operating activities that are not related to the liquidation. The company's property shall not be distributed to shareholders before repayments are made in accordance with the requirements described above.

Where the liquidation group finds that the property of the company are not sufficient for paying off the debts after liquidating the property of the company and preparing a balance sheet and an inventory of property, it shall file an application to a people's court for bankruptcy liquidation. After the people's court accepts the application for bankruptcy, the liquidation group shall hand over the liquidation matters to the bankruptcy administrator designated by the people's court.

The members of the liquidation group performing their duties of liquidation are obliged to loyalty and diligence. Any member of the liquidation group who neglects to fulfill his/her liquidation duties, thus causing any loss to the company shall be liable for compensation, and any member of the liquidation group who cause any loss to any creditor due to his/her intentional or gross negligence shall be liable for compensation.

Upon completion of the liquidation of the company, the liquidation group shall produce a liquidation report, report the same to the shareholders' meeting or the people's court for confirmation, and submit the same to the company registration authority to apply for deregistration of the company.

Where, during the period of survival, a company has not incurred any debts or has paid off all the debts, the company may, upon a commitment of all the shareholders, be deregistered under the summary procedures according to the relevant provisions. The deregistration of a company under the summary procedures shall be announced through the National Enterprise Credit Information Publicity System for a period of no less than 20 days. If there is no objection after the expiry of the announcement period, the company may apply for deregistration of the company with the company registration authority within 20 days.

For a company deregistered under the summary procedures, its shareholders shall be jointly and severally liable for the debts incurred before the deregistration if they have made an untrue commitment.

Where, after three years since the business license of a company is revoked, or the company is ordered to close down or is revoked, the company fails to apply for its deregistration with the company registration authority, the said authority may announce the company's deregistration through the National Enterprise Credit Information Publicity System for a period of no less than 60 days. If there is no objection after the announcement period expires, the company registration authority may deregister the company. Such deregistration of a company will not affect the liability of the original shareholders or liquidation obligors.

Overseas Listing

According to the Overseas Listing Trial Measures, the securities refer to stocks, depositary receipts, and corporate bonds that can be converted into stocks or other securities of an equity nature that are directly or indirectly offered and listed overseas by domestic companies. The direct overseas offering and listing of domestic companies refer to such overseas offering and listing of a joint stock limited company incorporated in the territory of PRC. The indirect overseas offering and listing of domestic companies refer to such overseas offering and listing made in the name of an offshore entity but based on the equity, assets, earnings, or other similar rights of a domestic company that operates its main business domestically.

The Overseas Listing Trial Measures also provide the conditions for overseas offering and listing. An overseas offering and listing are prohibited under any of the following circumstances:

(I) the listing and financing fall under specific prohibition in the laws, administrative regulations, and relevant national provisions;

(II) the overseas offering and listing may constitute endangerment to national security as reviewed and determined by competent authorities under the State Council in accordance with law;

(III) the domestic company and its controlling shareholder(s), actual controllers, have a criminal record in recent three years for corruption, bribery, encroachment of assets, misappropriation of assets, or disruption of socialist market economy order;

(IV) the domestic company is under investigation according to law for suspected crimes or major violations of laws and regulations, but no clear conclusions have been reached;

(V) there are material ownership disputes over the equities held by the controlling shareholders or the shareholders whose actions are controlled by the controlling shareholders or actual controllers.

In addition, under the Overseas Listing Trial Measures, where a PRC domestic company submits an application for initial public offering to competent overseas regulators or overseas stock exchanges, such issuer must file with the CSRC within three business days after such application is submitted.

In the event of the occurrence of any of the following material events after the overseas offering and listing, the PRC domestic companies shall make a detailed report to the CSRC within three working days after the occurrence and public announcement of the relevant event:

(I) change of control;

(II) being subject to investigation, punishment, or other measures by overseas securities regulatory authorities or the relevant competent authorities;

(III) change of the listing status or transfer of listing board;

(IV) voluntary or compulsory termination of listing.

Pursuant to the Provisions on Strengthening Confidentiality and Archives Administration Concerning Overseas Securities Offerings and Listings by Domestic Enterprises, which was issued by the CSRC, MOF, the National Administration of State Secrets Protection and the National Archives Administration on February 24, 2023 and implemented since March 31, 2023, a domestic enterprise that provides or through its overseas listed entity, publicly discloses or provides to relevant individuals or entities including securities companies, securities service providers and overseas regulators, any document and materials that contain state secrets or working secrets of government agencies, shall first obtain approval from competent authorities according to law, and files with the secrecy administrative department at the same level. A domestic enterprise that provides accounting archives or copies of accounting archives to any entities including securities companies, securities service providers and overseas regulators and individuals shall fulfill due procedures in compliance with applicable national regulations.

Merger and Division

Pursuant to the PRC Company Law, a merger agreement shall be signed by merging companies and the involved companies shall prepare respective balance sheets and inventory of assets. The companies shall within 10 days of the date of passing the resolution approving the merger notify their respective creditors and publicly announce the merger in newspapers or on the National Enterprise Credit Information Publicity System within 30 days. A creditor may, within 30 days of receipt of the notification, or within 45 days of the date of the announcement if he has not received the notification, request the company to settle any outstanding debts or provide relevant guarantees. In case of a merger, the credits and debts of the merging parties shall be assumed by the surviving or the new company.

In case of a division, the company's assets shall be divided and a balance sheet and an inventory of assets shall be prepared. When a resolution regarding the company's division is approved, the company should notify all its creditors within 10 days of the date of passing such resolution and publicly announce the division in newspapers or on the National Enterprise Credit Information Publicity System within 30 days. The liabilities of the company which have accrued prior to the division shall be jointly borne by the separated companies, unless otherwise stipulated in the agreement in writing entered into by the company with creditors in respect of the settlement of debts prior to division.

The PRC Securities Law, Regulations and Regulatory Regimes

The PRC has promulgated a series of regulations that relate to the issue and trading of shares and disclosure of information. In October 1992, the State Council established the Securities Committee and CSRC. The Securities Committee is responsible for coordinating the drafting of securities regulations, formulating securities-related policies, planning the development of securities markets, directing, coordinating, and supervising all securities related institutions in the PRC, and administering CSRC. The CSRC is the regulatory executive body of the Securities Committee and is responsible for the drafting of regulatory provisions governing securities markets, supervising securities companies, regulating public offerings of securities by PRC companies in the PRC or overseas, regulating the trading of securities, compiling securities-related statistics and undertaking relevant research and analysis. In April 1998, the State Council consolidated the two departments and reformed the CSRC.

On April 22, 1993, the State Council promulgated the Provisional Regulations Concerning the Issue and Trading of Shares (《股票發行與交易管理暫行條例》) governing the application and approval procedures for public offerings of shares, issuance of and trading in shares, the acquisition of listed companies, deposit, clearing, and transfer of shares, the disclosure of information, investigation, penalties and dispute resolutions with respect to a listed company.

The Securities Law of the PRC (《中華人民共和國證券法》) (the "**PRC Securities Law**") took effect on July 1, 1999, and was revised as of August 28, 2004, October 27, 2005, June 29, 2013, August 31, 2014, and December 28, 2019, respectively. The latest revised PRC Securities Law took effect on March 1, 2020. The PRC Securities Law is the first national securities law in the PRC, comprehensively regulating activities in the PRC securities market. It is divided into 14 chapters and 226 articles, including the issue and trading of securities, takeovers by listed companies, securities exchanges, securities companies, and the responsibilities of the securities registration and settlement institutions and securities regulatory authorities. Article 224 of the PRC Securities Law provides that domestic enterprises issuing shares overseas directly or indirectly or listing their shares overseas shall comply with the relevant provisions of the State Council. Currently, the issue and trading of foreign-issued securities (including shares) are principally governed by the regulations and rules promulgated by the State Council and CSRC.

Arbitration and Enforcement of Arbitral Awards

The Arbitration Law of the PRC (《中華人民共和國仲裁法》) (the "**PRC Arbitration Law**") was enacted by the SCNPC on August 31, 1994, which became effective on September 1, 1995, and was amended on August 27, 2009, and September 1, 2017. The PRC Arbitration Law is applicable to, among other matters, economic disputes involving foreign parties where all parties had entered into a written agreement to resolve disputes by arbitration before an arbitration committee constituted in accordance with the PRC Arbitration Law. The PRC Arbitration Law provides that an arbitration committee may, before the promulgation of arbitration regulations by the PRC Arbitration Association, formulate interim arbitration rules in accordance with the PRC Arbitration Law and the PRC Civil

Procedure Law. Where the parties have agreed to settle disputes by means of arbitration, a people's court will refuse to handle a legal proceeding initiated by one of the parties at such people's court unless the arbitration agreement is invalid.

Under the PRC Arbitration Law and PRC Civil Procedure Law, an arbitral award shall be final and binding on the parties involved in the arbitration. If any party fails to comply with the arbitral award, the other party to the award may apply to a people's court for its enforcement. A people's court may refuse to enforce an arbitral award made by an arbitration commission if there is any procedural irregularity (including irregularity in the composition of the arbitration committee, the making of an award on matters beyond the scope of the arbitration agreement, or the jurisdiction of the arbitration commission).

Any party seeking to enforce an award of a foreign affairs arbitral body of the PRC against a party or whose property is not located within the PRC may apply to a foreign court with jurisdiction over the case for recognition and enforcement of the award. Likewise, an arbitral award made by a foreign arbitral body may be recognized and enforced by a PRC court in accordance with the principle of reciprocity or any international treaties concluded or acceded to by the PRC.

The PRC acceded to the Convention on the Recognition and Enforcement of Foreign Arbitral Awards (the "**New York Convention**") adopted on June 10, 1958, pursuant to a resolution passed by the SCNPC on December 2, 1986. The New York Convention provides that all arbitral awards made in a state which is a party to the New York Convention shall be recognized and enforced by other parties thereto subject to their rights to refuse recognition and enforcement under certain circumstances, including where the enforcement of the arbitral award is against the public policy of that state. At the time of the PRC's accession to the Convention, the SCNPC declared that (I) the PRC would only apply the Convention to the recognition and enforcement of arbitral awards made in the territories of other parties based on the principle of reciprocity; and (II) the New York Convention will only be applied to disputes deemed under PRC laws to be arising from contractual or non-contractual mercantile legal relations.

An agreement has been reached between Hong Kong and the Supreme People's Court of the PRC for the mutual enforcement of arbitral awards. On June 18, 1999, the Supreme People's Court of the PRC adopted the Arrangement on Mutual Enforcement of Arbitral Awards between Mainland and Hong Kong Special Administrative Region (《關於內地與香港特別行政區相互執行仲裁裁決的安排》), which became effective on February 1, 2000. The Supreme People's Court of China issued the Supplementary Arrangements on the Mutual Enforcement of Arbitral Awards between the Mainland and the Hong Kong Special Administrative Region (《關於內地與香港特別行政區相互執行仲裁裁決的補充安排》) on November 26, 2020, which went into effect on November 27, 2020. The arrangements reflect the spirit of the New York Convention. Pursuant to the arrangements, awards made by PRC arbitral authorities acknowledged by Hong Kong arbitration rules can be enforced in Hong Kong, and Hong Kong arbitration awards are also enforceable in mainland China. Where a court of the mainland China finds that enforcement in the mainland China of the ruling made by the Hong Kong arbitral authority will violate public interests of the mainland China, execution of the ruling may be ignored.

SUMMARY OF MATERIAL DIFFERENCES BETWEEN HONG KONG AND THE PRC COMPANY LAW

As a joint stock limited company established in the PRC that is seeking an initial listing of shares on the stock exchange, we are governed by the PRC Company Law and all other rules and regulations promulgated pursuant to the PRC Company Law.

Set out below is a summary of certain material differences between Hong Kong company law applicable to a company incorporated in Hong Kong and the PRC Company Law applicable to a joint stock limited company incorporated and existing in accordance with the PRC Company Law. This summary is, however, not intended to be an exhaustive comparison.

Corporate Existence

According to the PRC Company Law, a joint stock limited company may be incorporated by promotion or raising.

Share Capital

Under the PRC Securities Law, an application for listing shall comply with the listing rules of the stock exchange.

According to the PRC Company Law, a shareholder may make capital contributions in currency, or in kind, intellectual property, land use right, stock rights, creditor's rights or other non-monetary property that may be assessed in currency and transferred according to law, except the property that may not be used as capital contributions according to any law or administrative regulation. The non-monetary property as capital contributions shall be assessed and verified, which may not be overvalued or undervalued. If there are provisions on the assessment of value in any law or administrative regulation, such provisions shall prevail.

Restrictions on Shareholding and Transfer of Shares

Under the PRC law, the Unlisted Shares, which are denominated and subscribed for in Renminbi, can only be subscribed for and traded by PRC investors, qualified overseas institutional investors or qualified overseas strategic investors. Overseas listed shares, which are denominated in Renminbi and subscribed for in a foreign currency, may only be subscribed for, and traded by, investors from countries and regions outside the PRC or other qualified PRC institutional investors. If the H Shares are eligible securities under the Southbound Trading Link, they are also available for subscription and trading by domestic investors in the PRC pursuant to the rules and restrictions of Shanghai-Hong Kong Stock Connect or Shenzhen-Hong Kong Stock Connect.

According to the PRC Company Law, the shares issued before a company makes a public offering of shares shall not be transferred within 1 year as of the day when the stocks of the company are listed and traded on the stock exchange. Where it is otherwise provided for in any law, administrative regulation or by the securities regulatory authority of the State Council for the transfer of shares held by the shareholders or actual controllers of a listed company, such provisions shall prevail. The directors and senior management of the company shall declare to the company the shares they hold and the changes thereof. During the term of office as determined when they assume the posts, the shares transferred each year shall not exceed 25% of the total shares they hold of the company. The shares of the company held by them shall not be transferred within 1 year as of the day when the stocks of the company are listed and traded on the stock exchange. Any of the aforesaid persons shall not transfer the shares of the company held within six months after he/she leaves office. Any other restrictions on the transfer of company shares held by directors or senior executives may be specified in the articles of association.

Notice of Shareholders' Meeting

According to the PRC Company Law, notice of annual shareholder's meeting must be given not less than 20 days before the meeting, while notice of an interim shareholders' meeting must be given not less than 15 days before the meeting.

Quorum for Shareholder's meeting

The PRC Company Law does not specify any quorum requirement for a shareholder's meeting.

Voting at Shareholder's meeting

According to the PRC Company Law, a resolution made by the shareholders' meeting shall be adopted by the shareholders representing more than half of the voting rights.

A resolution made by the shareholders' meeting on modifying the articles of association, increasing or decreasing the registered capital, as well as merger, division, dissolution or change of corporate form of the company shall be adopted by the shareholders representing more than two thirds of the voting rights.

Variation of Class Rights

According to the PRC Company Law, where any of the matters occurs to a company that issues classified shares and may affect the rights of the classified shareholders, it shall not only be decided by the shareholders' meeting, but also be adopted by shareholders representing two thirds of the voting rights who are present at the classified shareholders' meeting.

Directors

According to the PRC Company Law, where any director directly or indirectly concludes a contract or conducts a transaction with his/her company, he/she shall report the matters relating to the conclusion of the contract or transaction to the board of directors or shareholders' meeting, which shall be subject to the resolution of the board of directors or shareholders' meeting according to the articles of association. Where any of the near relatives of the directors, or any of the enterprises directly or indirectly controlled by the directors, or any of their near relatives, or any of the related parties who has any other related-party relationship with the directors, concludes a contract or conducts a transaction with the company, the aforesaid provisions shall apply. Where a director is removed prior to the expiration of term of office without any justifiable reason, the director may require the company to make compensation.

The PRC Company Law, unlike the Companies Ordinance, does not contain any requirements relating to the declaration of directors' interests in material contracts, restrictions on directors' authority in making major dispositions, restrictions on companies providing certain benefits to directors and guarantees in respect of directors' liability and prohibitions against compensation for loss of office without shareholders' approval.

Derivative Action by Minority Shareholders

According to the PRC Company Law, where any director other than members of the Audit Committee or senior management violates any law, administrative regulation or the articles of association during the performance of duties and causes any loss to the company, shareholders individually or jointly holding over 1% of the shares in the company for more than 180 consecutive days may request in writing the Audit Committee to initiate proceedings in the people's court. If the Audit Committee Members violate the relevant provisions of the Company Law, the above shareholders may request in writing the board of directors to initiate litigation at the people's court. Upon receipt of such written request from the shareholders, if the Audit Committee or the board of directors refuses to initiate such proceedings, or has not initiated proceedings within 30 days upon receipt of the request, or if under urgent situations, failure of initiating immediate proceeding may cause irremediable damages to the company, the above said shareholders shall, for the benefit of the company's interests, have the right to initiate proceedings directly to the people's court in their own name.

Protection of Minorities

The PRC Company Law provides that where a company meets any serious difficulty in its operation or management, and the interests of its shareholders will be subject to heavy loss if the company survives, which cannot be solved by any other means, the shareholders who hold 10% or more of the voting rights of the company may request the people's court to dissolve the company.

The Guidelines for the articles of association of Listed Companies also provide other remedies against the directors and senior management who breach their duties to the company. In addition, as a condition to the listing of shares on the Stock Exchange, each director of a joint stock limited company is required to give an undertaking in favor of the company acting as agent for the shareholders. This allows minority shareholders to take action against directors of the company in default.

Financial Disclosure

According to the PRC Company Law, a joint stock limited company is required to make available at the company for inspection by shareholders its financial report 20 days before its shareholders' meeting. In addition, a joint stock limited company of which the public offering Shares are offered should publish its financial report.

According to the PRC Company Law, a company shall at the end of each accounting year prepare a financial report which shall be audited by the accounting firm in accordance with the laws.

Information on Directors and Shareholders

The PRC Company Law gives shareholders the right to inspect and copy the Articles of Association, minutes of the shareholders' meeting, resolutions of meetings of the board of directors and financial and accounting reports.

Corporate Reorganization

According to the PRC Company Law, the merger, demerger, dissolution or change to the forms of a joint stock limited company has to be approved by shareholders at shareholder's meeting.

Statutory Deductions

According to the PRC Company Law, a company shall draw 10% of the profits as its statutory reserve fund before it distributes any profits after taxation. When the aggregate amount of the company's statutory reserve fund reaches 50% of the company's registered capital, the company may no longer make allocations from the statutory reserve fund. After a company has made an allocation to its statutory reserve fund from its after-tax profit, it may make an allocation to its discretionary reserve fund from its after-tax profit upon a resolution approved at the shareholders' meeting.

Remedies of Company

According to the PRC Company Law, if a director or senior management in carrying out his duties infringes any law, administrative regulation or the articles of association of a company, which results in damage to the company, that director or senior management should be responsible to the company for such damages.

Dividend

Under the PRC Company Law, the residual after-tax profits after a company has made up its losses and accrued reserve shall be distributed by the company in proportion to the shares held by its shareholders, except as otherwise provided for in the articles of association.

Fiduciary Duties

Under the PRC Company Law, directors, managers and other senior management personnel of a company have the duty of loyalty and diligence to the company. Such persons shall abide by the articles of association of the company, perform their duties honestly and diligently, safeguard the interests of the company, and shall not use their position and authority in the company for their personal gain.

Closure of Register of Members

According to the PRC Company Law, the register of shareholders shall not be modified within 20 days before any shareholders' meeting is held, or within 5 days prior to the benchmark date decided by the company for the distribution of dividends. Where it is otherwise provided for in any law, administrative regulation or by the securities regulatory authority of the State Council for the modification of the register of shareholders of a listed company, such provisions shall prevail.

This Appendix contains a summary of the principal provisions of the Articles of Association adopted in June 2025, which will become effective on the date on which the H Shares are **[REDACTED]** on the Stock Exchange. The main purpose of this Appendix is to provide potential investors with an overview of the Articles of Association and it may not necessarily contain all information that is important to potential investors.

DIRECTORS AND THE BOARD OF DIRECTORS

Power to allot and issue Shares

The Articles of Association does not contain clauses that authorize the Board of Directors to allot or issue Shares.

Power to dispose assets of our Company or any subsidiary

The Board of Directors shall determine the authority of external investment, acquisition and sale of assets, asset mortgage, external guarantee matters, entrusted financial management and connected transactions, and establish strict review and decision-making procedures. Major investment projects shall be reviewed by relevant experts and professionals and reported to the Shareholders' meeting for approval.

Guarantees of loans to directors or other management personnel

The external guarantee matters of the Company shall be submitted to the Board of Directors or the Shareholders' meeting for deliberation.

The following acts of external guarantee of the Company shall be submitted to the Shareholders' meeting for deliberation and approval:

(1) any guarantee to be provided after the total amount of external guarantees provided by the Company or the subsidiaries it controls has exceeded 50% of the Company's net assets as audited in the latest period;

(2) any guarantee to be provided after the total amount of external guarantees provided by the Company has exceeded 30% of the Company's net assets as audited in the latest period;

(3) any guarantee to be provided by the Company for a third party in a single year, the total amount of which has exceeded 30% of the Company's total assets as audited in the latest period;

(4) any guarantee to be provided for a party whose ratio of liabilities to assets exceeds 70%;

(5) any single guarantee for an amount more than 10% of the Company's net assets audited in the latest period;

(6) any guarantee to be provided to a Shareholder, or to an ultimate controller or its related party.

Giving of financial assistance to purchase the shares of the Company or shares of any subsidiary

The Company shall not provide any gift, loan, security, or other financial assistance for others to obtain the shares of the Company or its parent company, except where the Company implements an employee stock ownership plan.

For the benefit of the Company, the Company may, upon a resolution by the Shareholders' meeting or by the Board of Directors under these Articles of Association or the authorization of the Shareholders' meeting, provide financial aids for others to obtain the shares of the Company or its parent company, provided that the total accumulative amount of the financial aids shall not exceed 10% of the total issued share capital. A resolution by the Board of Directors shall be adopted by two thirds or more of all the Directors.

Disclosure of interests in contracts with the Company or any subsidiary

Directors shall not conclude any contract or engage in any transaction with the Company either in violation of the Articles of Association or without the approval of the Board of Directors or the Shareholders' meeting.

Remuneration

The appointment and removal of the members of the Board of Directors, as well as their remuneration and payment methods, shall be adopted by the Shareholders' meeting by ordinary resolution.

Retirement, appointment, removal

The Board shall consist of no fewer than seven (7) Directors, including at least three (3) Independent Non-Executive Directors representing not less than one-third of total Directors.

The Board shall have one chairman. The chairman of the Board shall be elected by more than half of all the Directors.

Directors shall be elected or replaced by the Shareholders' meeting and may be removed by the Shareholders' meeting before the expiration of their term of office. The Directors serve three-year terms and can be re-elected and reappointed at the end of the term, except as otherwise provided in the Articles of Association for the nomination of independent non-executive Directors.

The general manager or other senior managers may concurrently serve as Directors. However, the total number of Directors concurrently serving as the general manager or other senior managers shall not exceed half of the total number of Directors of the Company.

The following persons shall not serve as our Directors:

(1) having no capacity for civil conduct or limited capacity for civil conduct;

(2) a person who has been sentenced to criminal punishment due to corruption, bribery, embezzlement, misappropriation of property or sabotage of socialist market economic order and is within five years of the expiration of the enforcement period, or has been deprived of

political rights due to criminal offences and is within five years of the expiration of the enforcement period; in case of a suspended sentence, not more than two years have elapsed since the date of expiry of the probationary period;

(3) a person who is a former director, factory manager or general manager of a company or enterprise which has entered into insolvent liquidation and who is personally liable for the insolvency of such company or enterprise, where less than three years have elapsed since the date of the completion of the insolvent liquidation of such company or enterprise;

(4) a person who served as the legal representative of a company or enterprise which has its business license revoked or is ordered to close down due to violation of the law and who is personally liable, where less than three years have elapsed since the date of revocation of the business license or the order for closure of such company or enterprise;

(5) being listed as a dishonest person subject to enforcement by the people's court due to his/her failure to pay off a relatively large amount of debts which has fall due;

(6) a person who is banned by the CSRC from access to the securities market, and the ban has not expired;

(7) a person who is publicly recognized by the stock exchange as unsuitable to serve as directors, senior management etc. of the listing company, and the ban has not expired;

(8) other contents required by laws, regulations, departmental rules, Listing Rules and other security regulatory rules for the place where the Company's shares are listed.

If a Director is elected or appointed in violation of this article, such election, appointment or engagement shall be invalid. The Company shall remove a Director from office if any of the circumstances set forth in this article occurs during the Director's term of office.

Borrowing powers

The Board has the power to make proposals in relation to the issue of bonds or other securities of the Company, and such issue of bonds is subject to the approval of the Shareholders at the Shareholders' meeting. The Shareholders' meeting may authorize the Board of Directors to make resolutions on the issuance of corporate bonds.

Duties

The Directors shall abide by laws, administrative regulations and the Articles of Association, and shall have the following duties of loyalty to the Company:

(1) shall not encroach on the Company's property or misappropriate company funds;

(2) shall not deposit the Company's assets into accounts held in their own names or in the name of any other individual;

(3) shall not abuse their authority by accepting bribes or other illegal income;

(4) shall not conclude any contract or engage in any transaction with the Company without the report to the Board of Directors or Shareholders' meeting and the approval of the Board of Directors or Shareholders' meeting;

(5) shall not use the advantages provided by their own positions to pursue business opportunities that properly belong to the Company, unless reported to the Board of Directors or Shareholders' meeting and approved by a resolution of the Shareholders' meeting, or the Company is unable to utilize the business opportunity under laws, administrative regulations or the provisions of the Articles of Association;

(6) shall not engage in the same business as the Company either for their own account or for the account of any other person without the report to the Board of Directors or Shareholders' meeting and the approval of the Shareholders' meeting;

(7) shall not accept commissions paid by others for transactions conducted with the Company as their own;

(8) shall not disclose the Company's confidential information;

(9) shall not abuse their connected relationships to damage the Company's interests;

(10) other duties of loyalty stipulated in laws, administrative regulations, departmental rules, security regulatory rules for the place where the Company's shares are listed and the Articles of Association.

The income obtained by the Director in violation of above article shall belong to the Company. If losses are caused to the Company because of such violation, such Director shall be liable for compensation.

Directors shall abide by laws, administrative regulations and the Articles of Association, and have the following duties of diligence to the Company:

(1) shall prudently, earnestly and diligently exercise the powers the Company grants to them to ensure that the Company conducts its commercial activities in a manner that complies with the requirements of state laws, administrative regulations and state economic policies, and that the Company's commercial activities do not go beyond the scope of the business activities stipulated in the Company's business license;

(2) shall treat all Shareholders fairly;

(3) shall maintain a timely awareness of the operation and management of the Company;

(4) shall sign written statements confirming the regular reports of the Company, and ensure that the information disclosed by the Company is true, accurate and complete;

(5) shall provide accurate information and materials to the Audit Committee and shall not obstruct the Audit Committee from performing its duties;

(6) other duties of diligence stipulated in the laws, administrative regulations, departmental rules, security regulatory rules for the place where the Company's shares are listed and the Articles of Association.

Secretary of the Board of Directors

Our Company shall establish a secretary to the Board of Directors, responsible for the preparation of our Company's Shareholders' meeting and Board of Directors' meeting, retention of documents, management of our investor relations and our Company's Shareholder materials, and handling of information disclosure matters.

MODIFICATION OF THE ARTICLE OF ASSOCIATION

Our company shall amend its articles of association in any of the following circumstances:

(1) After amendments to the Company Law or relevant laws, administrative regulations, or the Listing Rules, the provisions of the articles of association conflict with the provisions of the amended laws, administrative regulations, or the Listing Rules;

(2) The circumstances of the company have changed and are inconsistent with the provisions of the articles of association;

(3) The shareholders' meeting decides to amend the articles of association.

In the event that the amendments to the Articles of Association passed by the Shareholders' meetings need the examination and approval of the competent authorities, these amendments shall be submitted hereto for approval. Where the amendment of the Articles of Association involves registration, it shall be necessary to carry out the lawfully prescribed procedures for registration change.

SPECIAL RESOLUTIONS — MAJORED REQUIRED

The resolutions of the Shareholders' meeting are categorized as ordinary resolutions and special resolutions. An ordinary resolution shall be adopted by a simple majority of the votes held by the Shareholders (including proxies) attending the Shareholders' meeting. A special resolution shall be adopted by a two-thirds majority of the votes held by the Shareholders (including proxies) attending the Shareholders' meeting.

VOTING RIGHTS (GENERALLY AND ON A POLL)

Shareholders (including proxy) shall exercise their voting rights according to the number of voting Shares they represent, and each Share shall have one vote.

The Shares held by the Company do not have voting rights, and these Shares are not included in the total number of Shares with voting rights present at the Shareholders' meeting.

When the Shareholders' meeting deliberates on related transactions, affiliated Shareholders shall not participate in voting.

The Shareholders' meeting adopts a registered voting method. The same voting right can only choose one of on-site, online or other voting methods. In case of repeated voting with the same voting right, the first voting result shall prevail.

Shareholders attending the Shareholders' meeting shall express one of the following opinions on the proposal submitted for voting: affirmative, negative or abstention.

Where any ballot is not completed in full, is completed incorrectly or unintelligibly, or has no vote recorded, the voter shall be deemed to have waived his voting rights and the voting result for his shares shall be deemed as an "abstention".

The Articles of Association do not contain provisions regarding variation of rights of existing shares or classes of shares.

REQUIREMENTS FOR ANNUAL SHAREHOLDERS' MEETING

The Shareholders' meeting are divided into annual Shareholders' meeting and extraordinary Shareholders' meeting. The annual Shareholders' meeting shall be convened once a year and be held within six months of the end of the previous fiscal year.

ACCOUNTING AND AUDITS

Financial and accounting policies

The Company shall develop its financial and accounting system in accordance with the laws, administrative regulations, and the rules stipulated by relevant authorities. Where the securities regulatory authority at the place where the Company's shares are listed has other provisions, such provisions shall prevail.

The Company shall not keep accounts other than those provided by law. Funds of the Company shall not be deposited in an account opened in the name of any individual.

Appointment and dismissal of Accountants

The Company engages accounting firms that comply with the provisions of the PRC Securities Law, the Listing Rules and other security regulatory rules for the place where the Company's shares are listed to conduct accounting statement auditing, net asset verification, and other related consulting services. The term of employment is one year and can be renewed. The appointment of an accounting firm by the Company must be decided by a majority of Shareholders at the Shareholders' meeting, and the Board of Directors shall not appoint an accounting firm before the decision is made at the Shareholders' meeting. The Company guarantees to provide the accounting firm it engages with true and complete accounting vouchers, accounting books, financial accounting reports, and other accounting materials, and shall not refuse, conceal, or falsely report.

The remuneration of an accounting firm shall be determined by the Shareholders' meeting. When the Company dismisses or no longer renews the appointment of an accounting firm, the Shareholders' meeting shall make a decision and notify the accounting firm 15 days in advance. When the Company's Shareholders' meeting votes on the dismissal of an accounting firm, the accounting firm is allowed to state its opinions. If the accounting firm proposes to resign, it shall explain to the shareholders' meeting whether the Company has any improper circumstances.

NOTICE AND AGENDA OF GENERAL SHAREHOLDERS' MEETING

The Shareholders' meeting is the organ of authority of the Company. The Company shall convene an extraordinary Shareholders' meeting within two months from the date of the fact:

(I) the number of Directors is less than two-thirds of the number specified in the PRC Company Law or the Articles of Association;

(II) where the Company's unfunded losses reach one-third of the total Share capital paid in;

(III) where the Shareholder(s) who individually or jointly hold no less than 10% of the Company's Shares (including preference shares with restored voting rights) request(s) holding of such a meeting;

(IV) when deemed necessary by the Board of Directors;

(V) when the Audit Committee proposes to convene such a meeting;

(VI) in other circumstances stipulated by laws, administrative regulations, departmental rules, Listing Rules, security regulatory rules for the place where the Company's shares are listed, or the Articles of Association.

The Audit Committee has the right to propose to the Board of Directors the convening of an extraordinary Shareholders' meeting and shall submit it in writing to the Board of Directors. The Board of Directors shall, in accordance with laws, administrative regulations and the Articles of Association, provide written feedback on whether to agree or disagree with the convening of an extraordinary Shareholders' meeting within ten days after receiving the proposal. If the Board of Directors agrees to convene an extraordinary Shareholders' meeting, a notice of convening the Shareholders' meeting shall be issued within five days after the Board of Directors' resolution is made. Any changes to the original proposal in the notice shall require the consent of the Audit Committee. If the Board of Directors does not agree to convene an extraordinary Shareholders' meeting or fails to provide feedback within ten days after receiving the proposal, it shall be deemed that the Board of Directors is unable or fails to fulfill its duty to convene a Shareholders' meeting, and the Audit Committee may convene and preside over it on its own.

Shareholders who individually or collectively hold 10% or more of the Company's Shares (excluding Treasury Shares, and including preference shares with restored voting rights) have the right to request the convening of an extraordinary Shareholders' meeting from the Board of Directors and shall submit it in writing to the Board of Directors. The Board of Directors shall, in accordance with laws, administrative regulations and the Articles of Association, provide written feedback on whether to agree or disagree with the convening of an extraordinary Shareholders' meeting within ten days after receiving the request. If the Board of Directors agrees to convene an extraordinary Shareholders' meeting, it shall issue a notice of convening the Shareholders' meeting within five days after making the Board resolution. Any changes to the original request in the notice shall be subject to the consent of the relevant Shareholders. If the Board of Directors does not agree to convene an extraordinary Shareholders' meeting or fails to provide feedback within ten days after receiving the request, Shareholders who individually or collectively hold 10% or more of the Company's Shares (including preference shares with restored voting rights) have the right to propose to the Audit Committee to convene an extraordinary Shareholders' meeting and shall submit a request in writing to the Audit Committee. If the Audit Committee agrees to convene an extraordinary Shareholders' meeting, it shall

issue a notice of convening the Shareholders' meeting within five days after receiving the request. Any changes to the original proposal in the notice shall be approved by the relevant Shareholders. If the Audit Committee fails to issue a notice of the Shareholders' meeting within the prescribed period, it shall be deemed that the Audit Committee has not convened and presided over the Shareholders' meeting. Shareholders who individually or collectively hold 10% or more of the Company's Shares for more than 90 consecutive days may convene and preside over the Shareholders' meeting on their own.

The Company holds a Shareholders' meeting, and the Board of Directors, Audit Committee, and Shareholders who individually or jointly hold more than 1% of the Company's Shares (including preference shares with restored voting rights) have the right to submit proposals to the Company. Shareholders who individually or collectively hold more than 1% of the Company's Shares (including preference shares with restored voting rights) may submit temporary proposals and submit them in writing to the convener ten days prior to the convening of the shareholders' meeting. The convener shall issue a supplementary notice of the Shareholders' meeting within two days after receiving the proposal, announcing the content of the temporary proposal.

Except for the circumstances specified in the preceding paragraph, the convener shall not modify the proposals listed in the notice of the Shareholders' meeting or add new proposals after issuing the notice of the Shareholders' meeting. Proposals that are not listed in the notice of the Shareholders' meeting or do not comply with the provisions of the Articles of Association shall not be voted on and a resolution shall not be made by the Shareholders' meeting.

The convener will notify all Shareholders by announcement 20 days before the annual Shareholders' Meeting is held, and the extraordinary Shareholders' Meeting will notify all Shareholders by announcement 15 days before the meeting is held. The notice of the Shareholders' Meeting shall be in writing and include the following contents:

(I) the time, location, and duration of the meeting;

(II) submit matters and proposals for review at the meeting;

(III) clearly state in writing that all Shareholders (including holders of preference shares with restored voting rights) have the right to attend the Shareholders' meeting and may appoint a proxy in writing to attend and vote at the meeting. The proxy does not need to be a Shareholder of the Company;

(IV) share registration date of the Shareholders entitled to attend the Shareholders' meeting;

(V) name and phone number of the permanent contact person for conference affairs;

(VI) online or other voting time and voting procedure;

The notice and supplementary notice of the Shareholders' Meeting shall fully and completely disclose all specific contents of all proposals. If the matter to be discussed requires independent non-executive directors to express their opinions, the independent non-executive directors' opinions and reasons will be disclosed simultaneously when the notice of the Shareholders' meeting or supplementary notice is issued.

The resolutions of the Shareholders' meeting are divided into ordinary resolutions and special resolutions.

The following matters shall be passed by ordinary resolution at the Shareholders' meeting:

(I) work reports of the Board of Directors;

(II) to review and approve the profit distribution plan and loss recovery plan;

(III) appointment or dismissal of the members of the Board of Directors and formulate their salary plans;

(IV) to make decisions on the hiring and dismissal of accounting firms and the determination of remuneration for our Company;

(V) to review and approve transactions as provided for in Article 48, financial aids as provided in 49 and guarantees as provided in 50 (except for item (3)) of these Articles of Association;

(VI) transactions under the Company's connected transaction regime that require approval by the Shareholders' meeting; matters related to changes in the use of proceeds;

(VII) to resolve on the issuance of bonds of the company;

(VIII) other matters other than those required by laws, administrative regulations, security regulatory rules for the place where the Company's shares are listed, or the Articles of Association to be passed through special resolutions.

The following matters shall be passed by the special resolution of the Shareholders' meeting:

(I) the increase or decrease in registered capital of the Company;

(II) the merger, division, dissolution, liquidation or change of the form of the Company;

(III) the amendment to the Articles of Association;

(IV) the Company's purchase or disposal of major assets or providing any security for others within one year in an amount exceeding 30% of the Company's net assets as audited in the latest period;

(V) equity incentive plans;

(VI) other matters required by laws, administrative regulations, the Listing Rules, security regulatory rules for the place where the Company's shares are listed or the Articles of Association, or resolved at a Shareholders' meeting, by an ordinary resolution, to be of a nature that may have a material impact on the Company and should be adopted by special resolution.

If the content of the resolutions of the Shareholders' meeting and the Board of the Company violate the laws, regulations and prescriptive documents, the Shareholders shall have the right to request the people's court to hold it invalid.

If the convening procedures and voting methods of the Shareholders' meeting or the Board violate laws, regulations and prescriptive documents or the Articles of Association, or the contents of the resolutions violate the Articles of Association, the Shareholders shall have the right to request the people's court to revoke the resolutions within 60 days from the date of adoption of the resolutions, except where the procedures for convening a meeting of the Shareholders' meeting or the Board or the voting method only has some minor defects, which produces no substantial effect on the resolution.

TRANSFER OF SHARES

Shares of the Company issued prior to the public issue of Shares may not be transferred within one year of the date of the Company's listed on a stock exchange.

Directors and the senior management of the Company shall declare to the Company their shareholdings in it and changes in such shareholdings. During their terms of office as determined when they assume the posts, they may transfer no more than 25% of their total number of shareholding in the Company every year; they shall not transfer their shareholding within one year from the date of listed of the Company's shares on a stock exchange. The aforesaid persons shall not transfer the shares of the Company held by them within half a year after they leave office.

POWER OF THE COMPANY TO PURCHASE ITS OWN SHARES

The Company shall not acquire its own Shares. However, except for one of the following situations:

(I) to reduce the registered capital of the Company;

(II) to merger with other companies holding Shares in the Company;

(III) to use Shares for employee shareholding schemes or as equity incentives;

(IV) to acquire the Shares of shareholders (upon their request) who vote against any resolution adopted at any Shareholders' meeting regarding the merger or division of the Company;

(V) to use the Shares to satisfy the conversion of the convertible corporate bonds into Shares issued by the Company;

(VI) to safeguard corporate value and Shareholders' interests as the Company deems necessary.

Repurchase of the Company's shares can be carried out in a public and centralized manner, or other ways approved by the laws and administrative regulations and the CSRC and the securities regulatory authority of the place where the Company's shares are listed. Repurchase of the Company's shares in the circumstances as stipulated in items (3), (5) or (6) of the preceding paragraph shall be carried out in a public and centralized manner.

POWER OF ANY SUBSIDIARY OF OUR COMPANY TO OWN SHARES IN ITS PARENT

There are no provisions in the Articles of Association relating to ownership by subsidiary of our Company of Shares in its parent.

DIVIDENDS AND OTHER METHODS OF DISTRIBUTION

The Company may distribute dividends in cash or stock. After the Shareholders' meeting of the Company makes a resolution on profit distribution plan, the Board of Directors of the Company shall complete distribution of dividend (or share) within two months after such Shareholders' meeting.

SHAREHOLDER PROXIES

The Shareholders may attend and vote at the Shareholders' meeting in person or by proxy.

Any proxy statement issued by a Shareholder who authorizes a proxy to attend the Shareholders' meeting on his behalf shall include the following details:

(I) the name of the proxy;

(II) agency matters and authority;

(III) respective instructions on affirmative, negative or abstention voting on each item for consideration listed in the Shareholders' meeting agenda;

(IV) the issuance date and valid period of the proxy statement;

(V) the signature (or seal) of the Shareholder. If the principal is a corporate Shareholder, the corporate seal shall be affixed.

The power of attorney shall indicate whether the Shareholder's proxy can vote according to his own will if the Shareholder does not give specific instructions.

CALLS ON SHARES AND FORFEITURE OF SHARES

There are no provisions in the Articles of Association relating to calls on Shares and forfeiture of Shares.

INSPECTION OF REGISTER OF SHAREHOLDERS

Our Company establishes a register of members based on the vouchers provided by the securities registration and settlement institution, which is sufficient evidence to prove that shareholders hold our Company's Shares. Shareholders shall enjoy rights and assume obligations according to the types of Shares they hold. Shareholders holding the same type of Shares shall have equal rights and assume the same obligations. Our Company shall keep a copy of the register of the holders of the overseas foreign Shares at our residential address. The overseas entrusted agency shall at all times maintain consistency between the original and copy of the register of the holders of the overseas foreign Shares. When there is a discrepancy between the original and copies of the register of holders of the overseas foreign Shares, the original shall prevail.

QUORUM FOR SHAREHOLDERS' MEETING

There are no provisions in the Articles of Association relating to quorum for Shareholders' Meeting of the Company.

RIGHTS OF THE MINORITIES IN RELATION TO FRAUD OR OPPRESSION THEREOF

If Directors who are not member of the Audit Committee and senior management personnel violate laws, administrative regulations, or the provisions of the Articles of Association while performing their duties, causing losses to our Company, Shareholders who individually or jointly hold more than 1% of our Company's Shares for more than 180 consecutive days have the right to request in writing that the Audit Committee file a lawsuit with the people's court; If the member of Audit Committee violates laws, administrative regulations, or the provisions of the Articles of Association while performing its duties, causing losses to our Company, the aforementioned Shareholders may request in writing that the Board of Directors file a lawsuit with the people's court. If the Audit Committee or the Board of Directors refuses to file a lawsuit after receiving a written request from the Shareholders specified in the preceding paragraph, or fails to file a lawsuit within 30 days from the date of receiving the request, or if the situation is urgent and the failure to file a lawsuit immediately will cause irreparable damage to our Company's interests, the Shareholders specified in the preceding paragraph have the right to directly file a lawsuit in their own name to the people's court for the benefit of our Company.

If another person infringes on the legitimate rights and interests of our Company and causes losses to our Company, Shareholders who individually or jointly hold more than 1% of our Company's Shares for more than 180 consecutive days may file a lawsuit with the people's court in accordance with the provisions of the preceding paragraphs.

If Directors and senior management personnel of the Company's wholly owned subsidiaries violate laws, administrative regulations, or the provisions of the Articles of Association while performing their duties, causing losses to our Company, or others infringing on the legitimate rights and interests of the Company's wholly-owned subsidiaries resulting in losses, Shareholders who individually or jointly hold more than 1% of our Company's Shares for more than 180 consecutive days have the right to request in writing in accordance with the aforementioned provisions that the Audit Committee or the Board of Directors file a lawsuit with the people's court or file lawsuit on Shareholders' own name.

PROCEDURES ON LIQUIDATION

The Company may be dissolved for the following reasons:

(I) the term of operation stipulated in the Articles of Association has expired or circumstances for dissolution specified in the Articles of Association arises;

(II) a resolution for dissolution is passed at a Shareholders' meeting;

(III) merger or division of the Company entails dissolution;

(IV) the business license is revoked or the Company is ordered to close down or be deregistered according to the law;

(V) If the company's operations and management encounter serious difficulties, and continuing to exist would cause significant losses to shareholders' interests, and the issue cannot be resolved through other means, shareholders holding more than 10% of the company's voting rights may request the People's Court to dissolve the company.

If the Company has any cause for dissolution specified in the preceding paragraphs, it shall make public the cause of dissolution through the National Enterprise Credit Information Publicity System within 10 days.

In the circumstances set out in item (1) and (2) above, and the Company has not distributed property to the Shareholders, the Company may continue to subsist by amending the Articles of Association or by a resolution of the Shareholders' meeting.

Amendments to the Articles of Association or a resolution of the Shareholders' meeting pursuant to the preceding paragraph shall be subject to the approval of more than two-thirds of the voting rights held by the Shareholders attending the Shareholders' meeting.

If the Company is dissolved pursuant to items (1), (2), (4) and (5) as mentioned above, it shall establish a liquidation committee within 15 days after the circumstance for dissolution arises. The liquidation committee shall consist of the Directors or members determined by the Shareholders' meeting. Where the liquidation obligors fail to perform their liquidation obligations in a timely manner, causing any loss to the Company or any creditor, the liquidation obligors are liable in damages.

The liquidation committee shall notify creditors within 10 days after its establishment and within 60 days make a public announcement in a newspaper or on the National Enterprise Credit Information Publicity System. The creditors shall declare their rights to the liquidation committee within 30 days after receipt of the notice or within 45 days after the announcement if the creditors have not received the notice.

When declaring the claims, the creditors shall explain matters relating to their rights and provide relevant evidential documents. The liquidation committee shall register the creditor's rights.

During the period of declaration of claims, the liquidation committee shall not repay any debts to the creditors.

After the liquidation committee has sorted out the assets of the Company and prepared a balance sheet and an inventory of property, it shall formulate a liquidation plan and submit the same to the Shareholders' meeting or the people's court for confirmation.

The Company shall, according to the proportion of the Shares held by the Shareholders, distribute the properties of the Company remaining after payment of the liquidation expenses, employees' salaries, social insurance expenses and statutory compensations, outstanding taxes, and the Company's debts.

The Company shall subsist in the course of liquidation but shall not conduct any business operations unrelated to liquidation. Before liquidation as specified in the preceding paragraphs, the properties of the Company shall not be distributed to Shareholders.

Upon liquidation of the Company's properties and the preparation of the balance sheet and inventory of assets, if the liquidation committee becomes aware that the Company does not have sufficient assets to meet its liabilities, it must apply to the people's court for a declaration for bankruptcy according to laws. After the people's court accepts the petition for bankruptcy, the liquidation committee shall refer the liquidation matters to the bankruptcy administrator designated by the people's court.

Upon completion of liquidation of the Company, the liquidation committee shall prepare a liquidation report submit it to the Shareholders' meeting or the people's court for confirmation, and shall, submit it to the company registration authority, and apply for deregistration of the Company and announce the termination of the Company.

OTHER PROVISIONS MATERIAL TO THE COMPANY OR ITS SHAREHOLDERS

General Provisions

Our Company is a permanently existing joint stock limited company.

The Shareholders are responsible for our Company to the extent of their subscribed Shares, and our Company is responsible for our Company's debts with all its assets.

From the effective date, this Articles of Association shall become a legally binding document regulating the organization and behavior of our Company, the rights and obligations between our Company and its Shareholders, and between Shareholders, and shall have legal binding force on our Company, Shareholders, Directors, and senior management.

Share and Transfer

In light of our Company's operational and developmental needs, our Company may increase its capital in accordance with the laws and regulations and subject to a resolution of the Shareholders' meeting, by any of the following methods:

(I) a public offering of shares;

(II) a private placement of shares;

(III) allotment of bonus shares to existing shareholders;

(IV) conversion of reserve funds to share capital;

(V) other methods permitted by laws, regulations, and or approved by CSRC and Hong Kong Stock Exchange.

Our Company may reduce its registered capital. Any reduction of our Company's registered capital shall be subject to the procedures prescribed in the PRC Company Law and other relevant regulations, as well as the Articles of Association.

Shareholders

Shareholders are entitled to rights and assumes obligations pursuant to the classification of their shares.

Shareholders holding the same classified Share have the same rights and assume the same obligations. Shareholders of our Company shall enjoy the following rights:

(I) the right to dividends and other distributions in proportion to the number of Shares held;

(II) the right to apply for, convene, preside, attend or appoint proxies to attend Shareholders' Meeting and to exercise the corresponding right to speak and vote;

(III) the right to supervise, present proposals or raise enquiries in respect of our Company's business operations;

(IV) the right to transfer, give as a gift or pledge the Shares it holds in accordance with laws, administrative regulations and the Articles of Association;

(V) the right to inspect and copy the Articles of Association, Register of Shareholders, minutes of Shareholders' Meeting, resolutions of the Board of Directors and accounting reports of Our Company and Subsidiaries, eligible shareholders shall enjoy the right to inspect the accounting books and documents of the Company and its wholly-owned subsidiaries;

(VI) in the event of the termination or liquidation of our Company, the right to participate in the distribution of the remaining property of our Company in proportion to the number of Shares held;

(VII) Shareholders who object to resolutions of merger or division made by the Shareholders' Meeting may request our Company to purchase Shares held;

(VIII) other rights provided for by laws, administrative regulations, departmental rules, security regulatory rules for the place where the Company's shares are listed or the Articles of Association.

Where any Shareholder demands to read the relevant information or obtain any of the aforesaid materials, he shall submit to our Company written documents proving the class(es) and number of Shares he holds. Our Company shall provide the relevant information or materials in accordance with the Shareholder's demand after verifying the Shareholder's identity.

Shareholders of our Company shall have the following obligations:

(I) to abide by laws, administrative regulations and the Articles of Association;

(II) to pay the Share subscription price based on the Shares subscribed for by them and the method of acquiring such Shares;

(III) not to return Shares unless prescribed otherwise in laws and regulations;

(IV) not to abuse Shareholders' rights to infringe upon the interests of our Company or other Shareholders; not to abuse our Company's status as an independent legal entity or the limited liability of Shareholders to harm the interests of our Company's creditors;

(V) to assume other obligations required by laws, administrative regulations and the Articles of Association.

Any Shareholder who abuses Shareholders' rights and causes our Company or other Shareholders to suffer a loss shall be liable for making compensation in accordance with the law. Any Shareholder who abuses the status of our Company as an independent legal entity or the limited liability of Shareholders to evade debts and severely harm the interests of our Company's creditors shall assume joint and several liability for our Company's debts.

The Articles of Association do not contain provisions regarding the time limit after which the entitlement to dividends lapses, or the party in whose favor the lapse operates.

The Audit Committee

Our company does not have the Board of Supervisors or Supervisor but has an Audit Committee within the Board of Directors to exercise the powers of the Board of Supervisors as stipulated in the Company Law.

General Manager

The company's general manager, deputy general managers, Chief Financial Officer, secretary of the Board of Directors, and other senior management personnel determined by the Board of Directors shall be deemed as the senior management personnel of the company. The general manager shall be accountable to the Board of Directors and exercise the following functions and powers:

(I) to be in charge of the production, operation and management of our Company, to organize the implementation of the resolutions of the Board of Directors, and to report his/her works to the Board of Directors;

(II) to organize the implementation of our Company's annual business plans and investment plans;

(III) to draft plans for the establishment of our Company's internal management organization;

(IV) to draft our Company's basic management system;

(V) to formulate the specific rules and regulations of our Company;

(VI) to propose to the Board of Directors appointment or dismissal of deputy general manager or other senior management;

(VII) to appoint or dismiss management personnel other than those required to be appointed or dismissed by the Board of Directors;

(VIII) such other functions and powers conferred by the Articles of Association, the Board of Directors.

The general manager shall attend the Board meeting as a non-voting delegate and shall be responsible to the Board of Directors.

Reserves

When distributing the after-tax profits of the current year, the Company shall allocate 10% of the profits into its statutory reserve fund. If the accumulated amount of the Company's statutory reserve fund is more than 50% of the registered capital of the Company, further appropriation is not necessary.

If the statutory reserve fund of the Company is insufficient to make up for the losses of previous years, the profits of the current year shall be used to make up for the losses before making allocations to the statutory reserve fund in accordance with the provisions of the preceding paragraph.

After the Company has withdrawn the statutory reserve fund from the after-tax profit, it may also withdraw discretionary reserve fund from the after-tax profit upon the resolution of the Shareholders' meeting.

After the Company has made up for its losses and made allocations to its common reserve fund, the remaining after-tax profits shall be distributed to the Shareholders in proportion to their shareholdings, except for those shall not be distributed in proportion to their shareholdings as stipulated in the Articles of Association.

If the Shareholders' meeting, in violation of the provisions of the preceding paragraph, distributes profits to Shareholders before the Company makes up for losses and makes allocations to the statutory common reserve fund, the Shareholders shall return the profits distributed in violation of the provisions to the Company.

The shares of the Company held by the Company shall not participate in profit distribution.

Company reserve funds shall be used to cover the Company's losses, expand production and operations, or converted to increase the Company's capital. Where the reserve funds of the Company is used for making up losses, the discretionary reserve fund and statutory reserve fund shall be used first. If such losses still cannot be made up, the capital reserve fund can be used.

After converting statutory reserve funds into capital, the amount remaining in the statutory reserve fund shall be no less than 25% of the Company's registered capital before such conversion.

1. FURTHER INFORMATION ABOUT OUR COMPANY

1.1 Incorporation

Our Company was incorporated as a limited liability company under the laws of the PRC in June 2016 and was converted into a joint stock company with limited liability in May 29, 2025. Our registered address is at No. 98 Jianghai West Road Liangxi District, Wuxi City, Jiangsu Province, PRC and our principal place of business is at Phase 2, Huafeng International Robot Industrial Park, Bao'an District, Shenzhen, Guangdong Province, PRC.

We have established a place of business in Hong Kong at 19/F, Golden Centre, 188 Des Voeux Road Central, Hong Kong and was registered with the Registrar of Companies in Hong Kong as a non-Hong Kong company under Part 16 of the Companies Ordinance on [•]. Ms. Li Ching Yi (李菁怡), our joint company secretary, is the authorized representative of our Company for the acceptance of service of process and notices on behalf of our Company in Hong Kong under Part 16 of the Companies Ordinance. The address for service of process on our Company in Hong Kong is the same as its principal place of business in Hong Kong as set out above.

As our Company was established in the PRC, we are subject to the relevant laws and regulations of the PRC. An overview of the relevant aspects of laws and regulations of the PRC is set out in the section headed "Regulatory Overview" in this document. A summary of our Articles of Association is set out in Appendix V to this document.

1.2 Changes in the Share Capital of our Company

On June 7, 2024, the registered capital of our Company was increased from RMB6,156,048 to RMB6,498,051.

The registered capital of our Company was increased from RMB6,498,051 to RMB20,000,000 upon completion of the joint stock reform of our Company on May 29, 2025. As of the date of our establishment as a joint stock company with limited liability, our registered capital was RMB20,000,000 consisting of 20,000,000 issued Domestic Shares with a nominal value of RMB1.00 each, which has been fully paid up by our promoters.

The registered capital of our Company was increased from RMB20,000,000 to RMB22,105,263 consisting of 22,105,263 issued Domestic Shares on June 20, 2025.

Save as disclosed above, there has been no alteration in the share capital within two years immediately preceding the date of this document.

1.3 Resolutions Passed by Our Shareholders' General Meeting in relation to the [REDACTED]

At the extraordinary general meeting of the Shareholders held on June 16, 2025, the following resolutions, among others, were duly passed:

(a) the sub-division of the Shares with nominal value of RMB1.0 each on the basis of 1:10, effective immediately prior to the **[REDACTED]**, and taking into account the Share Subdivision, the issue of H Shares of nominal value of RMB0.1 each and such H Shares be **[REDACTED]** on the Stock Exchange;

(b) the proposed number of H Shares to be **[REDACTED]** under the **[REDACTED]** and the grant of the **[REDACTED]**. The number of H Shares to be issued pursuant to the exercise of the **[REDACTED]** shall not exceed **[REDACTED]**% of the total number of H Shares to be **[REDACTED]** initially pursuant to the **[REDACTED]**;

(c) upon completion of the **[REDACTED]** and taking into account the Share Subdivision, **[REDACTED]** Domestic Shares in aggregate will be converted into H Shares on a one-for-one basis;

(d) subject to the completion of the **[REDACTED]**, the conditional adoption of the revised Articles of Association, which shall become effective on the **[REDACTED]**; and

(e) authorization of our Board and its authorized persons to handle all matters relating to, among other things, the **[REDACTED]**.

1.4 Changes in Share Capital of our Subsidiaries

The list of our subsidiaries is set out in Note 1 to the Accountants' Report, the text of which is set out in Appendix I to this Document.

There has been no alteration in the share capital of any of our subsidiaries within the two years preceding the date of this document.

1.5 Restriction on Share Repurchases

For details of the restrictions on share repurchases by our Company, see the section headed "Appendix V — Summary of Articles of Association" in this document.

2. FURTHER INFORMATION ABOUT OUR BUSINESS

2.1 Summary of Our Material Contract

We have entered into the following contract (not being contract entered into in the ordinary course of business) within the two years immediately preceding the date of this document that is or may be material:

(a) **[REDACTED]**.

2.2 Our Intellectual Property Rights

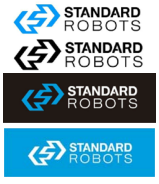

As of the Latest Practicable Date, our Company had registered, or has applied for the registration of the following intellectual property rights which were material to our Group's business.

Trademarks

As of the Latest Practicable Date, we had registered the following trademarks which we considered to be material to our business:

No.	Trademark	Class	Owner	Place of Registration	Registration No.	Validity Period
1.		7	Our Company	PRC	64366714	2023-03-07 to 2033-03-06
2.		9	Our Company	PRC	64017727	2022-12-28 to 2032-12-27
3.	AMR	7	Our Company	PRC	36753746	2020-01-21 to 2030-01-20
4.	斯坦德	12	Our Company	PRC	35448148	2019-11-28 to 2029-11-27
5.		9	Our Company	PRC	35457534	2019-11-28 to 2029-11-27
6.	斯坦德	7	Our Company	PRC	35433199	2019-11-07 to 2029-11-06
7.		9	Our Company	PRC	25033819	2018-09-21 to 2028-09-20
8.		7	Our Company	PRC	25033818	2018-10-14 to 2028-10-13

As of the Latest Practicable Date, we filed the following application for registration of trademark in Hong Kong which, in the opinion of our Directors is material to our business:

No.	Trademark	Applicant	Place of registration	Class	Application Number	Application Date
1.		7, 9, 12	Our Company	Hong Kong	306900318	2025-04-23

Patents

As of the Latest Practicable Date, we had registered the following patents which we considered to be material to our business:

No.	Owner	Description	Patent No.	Types of Patents	Application Date	Authorization Announcement Date
1.	Our Company	A Slam Method and Device Based on Prior Information (一種基於先驗信息的Slam方法和裝置)	CN201710826714.1	Innovation	2017-09-14	2020-07-03
2.	Standard Robots (Kunshan) Co., Ltd	A Kinect-based Charging Pile Dynamic Recognition and Positioning Method and System (一種基於Kinect的充電樁動態識別與定位方法及系統)	CN201710827732.1	Innovation	2017-09-14	2020-05-22

3. FURTHER INFORMATION ABOUT OUR DIRECTORS

3.1 Particulars of Directors' Contracts

Each of our Directors [has entered] into a service contract with our Company. Each service contract is for an initial term of three years. The service contracts may be renewed in accordance with the Articles and the applicable laws, rules and regulations.

Save as disclosed above, none of the Directors has or is proposed to enter into a service contract with any member of our Group, other than contracts expiring or determinable by the relevant employer within one year without the payment of compensation (other than statutory compensation).

3.2 Remuneration of Directors

See "Directors and Senior Management" and Note 9 to the Accountants' Report in Appendix I to this document for the remuneration or benefits in kind paid to our Directors for each of the three years ended December 31, 2024.

During the Track Record Period, no fees were paid by our Group to any of the Directors or the five highest paid individuals as an inducement to join us or as compensation for loss of office.

4. DISCLOSURE OF INTERESTS

4.1 Disclosure of Interests of Directors

Save as disclosed below, immediately following the completion of the **[REDACTED]** and the Conversion of Domestic Shares into H Shares (assuming that the **[REDACTED]** is not exercised), none of our Directors has any interest and/or short position in the Shares, underlying Shares and debentures of our Company or our associated corporations (within the meaning of Part XV of the SFO) which will be required to be notified to our Company and the Stock Exchange pursuant to Divisions 7 and 8 of Part XV of the SFO (including interest or short position which they were taken or deemed to have under such provisions of the SFO) or which will be required, pursuant to section 352 of the SFO, to be entered in the register referred to therein, or which will be required, pursuant to the Model Code for Securities Transactions by Directors of Listed Issuers as set out in Appendix C3 to the Listing Rules to be notified to our Company, once the H Shares are **[REDACTED]** on the Stock Exchange.

			As of the Latest Practicable Date taking into account the Share Subdivision		Immediately following the completion of the [REDACTED] and the Conversion of Domestic Shares into H Shares (assuming the [REDACTED] is not exercised and taking into account the Share Subdivision)[1]	
Shareholder	Position	Nature of interest	Number of Domestic Shares	Approximate percentage of shareholding in the total issued share capital of our Company	Number of H Shares	Approximate percentage of shareholding in the total issued share capital of our Company[1]
Mr. Wang[2][3][4]	Chairman of the Board and executive Director	Beneficial owner	28,294,560	12.80%	[REDACTED]	[REDACTED]%
		Interest in controlled corporation	31,612,950	14.30%	[REDACTED]	[REDACTED]%
		Interest held jointly with other persons	8,410,820	3.80%	[REDACTED]	[REDACTED]%
		Interest of a party to an agreement regarding interest in our Company	—	—	[REDACTED]	[REDACTED]%
Mr. Li[3]	Executive Director	Beneficial owner	8,410,820	3.80%	[REDACTED]	[REDACTED]%
		Interest held jointly with other persons	59,907,510	27.10%	[REDACTED]	[REDACTED]%

(1) The calculation is based on the assumption that (i) the Share Subdivision is completed; (ii) the **[REDACTED]** is not exercised; (iii) 221,052,630 Domestic Shares (taking into account the Share Subdivision) will be converted into H Shares; and (iv) the total number of Shares in issue will be **[REDACTED]** H Shares immediately after the completion of the **[REDACTED]**.

(2) As of the Latest Practicable Date, Mr. Wang is the general partner of Standard Automation and is responsible for its overall management and entitled to exercise the voting rights held by Standard Automation at his full and absolute discretion. Assuming the Share Subdivision is completed, as of the Latest Practicable Date, Standard Automation held 31,612,950 Domestic Shares, representing approximately 14.30% of the issued share capital of our Company. Immediately following the completion of the **[REDACTED]**, Standard Automation's shareholding will be approximately **[REDACTED]**% of the issued share capital of our Company. Therefore, Mr. Wang is deemed to be interested in the Shares held by Standard Automation under the SFO.

(3) Pursuant to the Acting-in-Concert Agreement, Mr. Wang and Mr. Li confirm that they have acted in concert when addressing matters pertaining to the operational development of the Group and those requiring resolutions by a Shareholders' meeting. For further details, see "History and Corporate Structure Acting-in-Concert Arrangement". Therefore, under the SFO, each of Mr. Wang, Mr. Li and Standard Automation is deemed to be interested in the Shares held by each other.

(4) Pursuant to the Voting Proxy Agreements, Mr. Wang has the right to vote certain number of Shares held by the respective grantors. See the section headed "History and Corporate Structure — Voting Proxy Arrangements" for further details.

Up to the Latest Practicable Date, none of the Directors or their respective spouses and children under 18 years of age had been granted by our Company or had exercised any rights to subscribe for shares or debentures of our Company or any of its associated corporations.

4.2 Substantial Shareholders

Save as disclosed in the section headed "Substantial Shareholders" in this document, our Directors or chief executive are not aware of any other person, not being a Director or chief executive of our Company, who has an interest or short position in the Shares and underlying Shares of our Company, which following the completion of the **[REDACTED]** and the Conversion of Domestic Shares into H Shares, would fall to be disclosed to our Company under the provisions of Divisions 2 and 3 of Part XV of the SFO, or who is, directly or indirectly, interested in 10% or more of the issued voting Shares of our Company or any member of our Group.

4.3 Disclaimers

(a) None of our Directors has any direct or indirect interest in the promotion of our Company, or in any assets which have within the two years immediately preceding the date of this document been acquired or disposed of by or leased to any member of our Group, or are proposed to be acquired or disposed of by or leased to any member of our Group;

(b) None of our Directors is materially interested in any contract or arrangement subsisting at the date of this document which is significant in relation to the business of our Group taken as a whole; and

(c) So far as is known to our Directors, none of our Directors, their respective close associates (as defined under the Listing Rules) or Shareholders of our Company who are interested in more than 5% of the issued share capital of our Company has any interests in the five largest customers or the five largest suppliers of our Group.

5 OTHER INFORMATION

5.1 Estate Duty

Our Directors have been advised that no material liability for estate duty under the PRC laws is likely to fall on our Company or its subsidiaries.

5.2 Litigation

As of the Latest Practicable Date, no member of our Group was engaged in any outstanding material litigation or arbitration which may have material and adverse effect on the **[REDACTED]** and, so far as our Directors are aware, no litigation or claim of material importance is pending or threatened by or against any member of our Group.

5.3 Joint Sponsors

The Joint Sponsors have made an application on our behalf to the Listing Committee for the **[REDACTED]** of, and permission to deal in, our H Shares. The Joint Sponsors satisfy the independence criteria applicable to sponsors set out in Rule 3A.07 of the Listing Rules.

The Joint Sponsors will be paid by our Company a total fee of HK$6,800,000 to act as the sponsors in connection with the **[REDACTED]**.

5.4 Compliance Advisor

Our Company has appointed Somerley Capital Limited as the compliance advisor upon the **[REDACTED]** in compliance with Rule 3A.19 of the Listing Rules.

5.5 Other information about our Directors

Mr. Sun Wei Yung Kevin was the director of Champion Travel Service Company Limited. Champion Travel Service Company Limited was dissolved in January 2002 due to inactivity. To Mr. Sun Weiyong's best knowledge, there has been no outstanding liabilities and unsatisfied judgments against the aforementioned company.

5.6 Preliminary Expenses

We have not incurred any material preliminary expenses.

5.7 Promoters

Mr. Wang, Mr. Li, Standard Automation and our other pre-**[REDACTED]** investors prior to joint stock conversion are our promoters.

Within the two years immediately preceding the date of this document, no cash, securities or other benefit has been paid, allotted or given nor is any proposed to be paid, allotted or given to any promoters in connection with the **[REDACTED]** and the related transactions described in this document.

5.8 Qualification of Experts

The qualifications of the experts, as defined under the Listing Rules, who have given opinions in this document, are as follows:

Name	Qualification
CITIC Securities (Hong Kong) Limited	A licensed corporation under the SFO to conduct Type 4 (advising on securities) and Type 6 (advising on corporate finance) regulated activities as defined under the SFO
Guotai Junan Capital Limited	A licensed corporation under the SFO to conduct Type 6 (advising on corporate finance) regulated activities as defined under the SFO
Ernst & Young	Certified public accountants and public interest entity auditors
Han Kun Law Offices	PRC Legal Advisor
Han Kun Law Offices LLP	International Sanctions Legal Advisor
China Insights Industry Consultancy Limited	Independent industry consultant

5.9 Consents of Experts

Each of the experts named in "5. Other Information — 5.8. Qualification of Experts" above has given and has not withdrawn its written consent to the issue of this document with the inclusion of its report and/or letter and/or opinion and/or the references to its name included herein in the form and context in which it is respectively included.

As of the Latest Practicable Date, none of the experts named above had any shareholding interests in any member of our Group or the right (whether legally enforceable or not) to subscribe for or to nominate persons to subscribe.

5.10 Taxation of Holders of H Shares

The sale, purchase and transfer of H Shares are subject to Hong Kong stamp duty if such sale, purchase and transfer is effected on the **[REDACTED]** of members of our Company, including in circumstances where such transaction is effect on the Stock Exchange. For further information in relation to taxation, see "Regulation Overview."

5.11 No Material and Adverse Change

Our Directors confirm that there has been no material and adverse change in the financial or **[REDACTED]** position of our Group since December 31, 2025.

5.12 Binding Effect

This document shall have the effect, if an application is made in pursuant hereof, of rendering all persons concerned bound by all the provisions (other than the penal provisions) of sections 44A and 44B of the Hong Kong Companies (Winding Up and Miscellaneous Provisions) Ordinance so far as applicable.

5.13 Related Party Transactions

Our Group entered into certain related party transactions within the two years immediately preceding the date of this document as mentioned in Note 36 to the Accountants' Report in Appendix I to this document.

5.14 Restriction on Share Repurchases

See Appendix IV to this document for details.

5.15 Miscellaneous

(a) Within the two years immediately preceding the date of this document:

(i) save as disclosed in the section headed "History and Corporate Structure", no share or loan capital of our Group has been issued or agreed to be issued or is proposed to be fully or partly paid either for cash or a consideration other than cash;

(ii) no share or loan capital of our Group is under option or is agreed conditionally or unconditionally to be put under option;

(iii) save as disclosed in the section headed "**[REDACTED]**," no commissions, discounts, brokerages or other special terms have been granted or agreed to be granted in connection with the issue or sale of any share of our Group; and

(iv) save as disclosed in the section headed "**[REDACTED]**," no commission has been paid or is payable for subscription, agreeing to subscribe, procuring subscription or agreeing to procure subscription for any share in or debentures of our Company.

(b) There are no founder, management or deferred shares or any debentures in our Group.

(c) There has not been any interruption in the business of our Group which may have or has had a significant effect on the financial position of our Group in the 12 months preceding the date of this document.

(d) Our Company has no outstanding convertible debt securities or debentures.

(e) There is no arrangement under which future dividends are waived or agreed to be waived.

(f) Save as disclosed in the section headed "History and Corporate Structure," none of our equity and debt securities is **[REDACTED]** or dealt with in any other stock exchange nor is any **[REDACTED]** or permission to deal being or proposed to be sought.

(g) All necessary arrangements have been made to enable the H shares to be admitted into **[REDACTED]** for clearing and settlement.

(h) No company within our Group is presently listed on any stock exchange or traded on any trading system.

5.16 Bilingual Document

The English language and Chinese language versions of this document are being published separately, in reliance upon the exemption provided by section 4 of the Companies (Exemption of Companies and Prospectuses from Compliance with Provisions) Notice (Chapter 32L of the Laws of Hong Kong).
