CHINA DATA BROADCASTING HOLDINGS LIMITED

(中華數據廣播控股有限公司)*

(incorporated in Bermuda with limited liability)

ANNOUNCEMENT APPOINTMENT AGREEMENT

This announcement is made pursuant to Rule 17.10 of the GEM Listing Rules.

In the wake of the expected new regulations to enforce the proprietary rights of stock quotations in the PRC, the Directors announce that on 15th December, 2000 the Group's 70% owned operating subsidiary Tiancai Network has been appointed by the Shanghai SE under a non-exclusive agreement to assist them to develop their securities information business operations through the Group's data broadcasting technologies in the PRC.

This announcement is made pursuant to Rule 17.10 of the GEM Listing Rules.

Background

The major sources of the Group's revenue include the sales of reception modules, stock analysis software and share of income derived from data broadcasting service subscription with strategically allied TV network operators. Substantial parts of these products and services are provided by the Group to enable end customers to receive real-time stock quotation disseminated by the two stock exchanges in the PRC, namely the Shanghai SE and the Shenzhen SE (together the "PRC Exchanges") via the Group's data broadcasting technologies.

At present, the proprietary rights of the stock quotations disseminated by the two stock exchanges are not straightly enforced. Pirating activities in relation to stock quotations by financial information providers are not uncommon in the PRC.

It is expected that the PRC Exchanges together with the China Securities Regulatory Commission will implement new regulations on the Rules Governing the Business Activities of Stock Exchanges (證券交易所管理辦法). Upon the promulgation of such new regulations, it is expected that the respective proprietary rights of the PRC Exchanges on their stock quotations will be reinforced and that all future pirate use of stock quotations originally disseminated by the PRC Exchanges will be prosecuted.

Impact on the data broadcasting industry

Data broadcasting technology is widely used by the TV network operators in the PRC for their provision of stock quotation to their customers. Upon the implementation of the new regulations, it is expected that a substantial number of TV network operators will look for a licensed source for their stock quotation services and that the number of TV network operators relying on unauthenticated source will be significantly reduced.

Appointment by The Shanghai Stock Exchange

The Directors are pleased to announce that on 15th December, 2000, the Group's 70% owned operating subsidiary Tiancai Network has been appointed by the Shanghai SE under a non-exclusive agreement for a period of one year to assist them to develop their securities information business operations through the Group's data broadcasting technologies in the PRC. The principal terms of the appointment are set out as follows:—

1. act as the representative of the Shanghai SE for the marketing of their securities information and assisting them in the negotiations and liaison with TV network operators in relation to the development of information business activities;
2. assist the Shanghai SE to investigate any unauthorized use of their stock quotation information and the prevention of pirate activities with the Group's transmission and reception technologies;
3. quantify the number of end users of the TV network operators on a regular basis in accordance with the requirements of the Shanghai SE; and

4. the remuneration to the Group will be based on the sharing of net service fee earned from the end customers, which will be paid to the Group on a monthly basis.

The appointment by the Shanghai SE has further enhanced the Group's business operations in the PRC in that not only can the Group secure authenticated sources of the stock quotation for its existing allied TV network operators it also will accelerate the number of the TV network operator alliance, and hence its market share. The Directors believe that the appointment also reconfirms the Group's position as the leading player in the data broadcasting industry in the PRC.

The Group is currently under negotiation with the Shenzhen SE to enter into an appointment agreement similar to the one with the Shanghai SE. Further announcement will be made in the event of an agreement entered into with the Shenzhen SE.
