### THIRD OUARTERLY RESULTS ANNOUNCEMENT FOR THE NINE MONTHS ENDED 30 SEPTEMBER 2002

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET ("GEM") OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

The principal means of information dissemination on GEM is publication on the Internet website operated by the Stock Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspaper. Accordingly, prospective investors should note that they need to have access to the GEM website at http://www.hkgem.com in order to obtain up-to-date information on GEM-listed issuers.

The Stock Exchange takes no responsibility for the contents of this announcement, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this announcement.

This announcement, for which the directors (the "Directors") of AKuP International Holding Limited (the "Company") collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the GEM of the Stock Exchange (the "GEM Listing Rules") for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquires, confirm that, to the best of their knowledge and belief: (i) the information contained in this announcement is accurate and complete in all material respects and not misleading; (ii) there are no other matters the omission of which would make any statement in this announcement misleading; and (iii) all opinions expressed in this announcement have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

Two new Customer Relationship Management ("CRM") solutions, namely eBrokerage and the Linux-based eFinancial Consultant System ("eFC System"), being the new driving forces for the Group's income growth, were successfully launched in the second quarter of 2002 and revenue from these two CRM solutions are expected to be gradually reflected in the second half of 2002.

As a result of the effective cost measures, the Group successfully reduced its operating expenses to approximately HK\$14.6 million for the nine months ended 30 September 2002, representing a 33.5% decrease from approximately HK\$22.0 million for the corresponding period of 2001.

#### **BUSINESS REVIEW**

# **Business development**

With an aim to enhance the leading position of being a well-known CRM solutions provider in the Asia Pacific Region, the Group has successfully adjusted its business strategy by evolving from a provider of single generic CRM software products on a horizontal basis across different industries to a provider of specific CRM applications on a vertical basis focused on the finance sector in the first half of 2002. As a result, the Group has successfully launched two new CRM solutions, namely eBrokerage and eFC System, in the second quarter of 2002 of which their target markets are securities and banking industries respectively.

# eBrokerage

As a CRM solution which caters for the securities industry, eBrokerage has the capabilities to analyze the customers' trading portfolios and group customers with similar trading behaviours and characteristics into different categories for effective management. By implementing eBrokerage, the securities brokers will be able to provide their customers with timely advices on investment plans and instant responses to their requests as well as risk management in order to enhance the service quality and customer satisfaction. In addition, the securities brokers can better understand the customers' trading behaviours and manage effectively their portfolios through the use of eBrokerage.

China Securities Company Limited ("China Securities"), a first tier securities company in the PRC, which currently using the Group's eBrokerage at one of its major sales offices, will take two years for the completion of

installation and implementation of the system before the deployment by all its major sales offices. For the period under review, several leading securities companies in the PRC are testing eBrokerage following its adoption by China Securities.

# eFC System

The Linux-based eFC System enables financial management consultants from banks and other financial institutions to have detailed analysis and understanding of customers' financial status so that they can develop suitable investment portfolio and adjust immediately of the investment strategies and plans for customers. This innovative eFC System with business intelligence also allows financial management consultants to effectively perform risk management and to satisfactorily fulfill the requests for customers. At the date of this results announcement, the Directors believe that the Group's eFC System takes a leading role in the banking industry of the CRM market in the PRC.

For the period under review, the Group and the Beijing Branch of Guangdong Development Bank ("GD Bank") has entered into an agreement for the adoption of the Group's eFC System. Under the agreement, other branches of GD Bank will operate the eFC System in full scale should the system operated satisfactorily in its Beijing Branch. Apart from GD Bank, several leading banks in the PRC are testing the Group's eFC System.

### **Issue of Convertible Bonds**

With a view to further strengthen the Group's financial position, the Company and each of Golden J&N Investment Inc. ("Golden J&N") and Sinopac Securities (Asia) Limited ("Sinopac Securities") ("the Subscribers") entered into the Subscription Agreements dated 30 September 2002 pursuant to which the Subscribers have agreed to subscribe for the convertible bonds in an aggregate principal amount of HK\$6,250,000 (the "Bonds"). The three-year-to-maturity convertible bonds bear no interest of which the Bonds are convertible into ordinary shares of HK\$0.10 each in the share capital of the Company (the "Shares") at a conversion price of HK\$0.20 per share (the "Conversion Price') subject to adjustment. The Bonds will not be listed on the Stock Exchange or any other stock exchange.

The maximum number of new Shares which may be issued upon full conversion of the Bonds based on the Conversion Price is 31,250,000, representing approximately 4.96% and approximately 4.72% of the existing issued share capital and the enlarged issued share capital respectively.

The Directors believe that the subscription of the Bonds by Golden J&N and Sinopac Securities has demonstrated the investors' confidence in the Group.

### **PROSPECTS**

With the Group's solid background and its base firmly established in the PRC, strong R&D capabilities, a management team that has strong market sense, the Directors believe that the Group is well positioned to exploit growth opportunities emerging from the rapidly changing IT industry and the economic environment in the Asia Pacific region, especially the PRC.

Looking ahead, the Group will continue its plans to further penetrate into the PRC market by continuing to develop an effective sales distribution network and enhance its R&D capabilities by identifying opportunities of forming strategic alliances with suitable IT companies. The Directors believe that these plans will not only increase the Group's market share and broaden its revenue and client base but also further consolidate the Group's position as the leading CRM solutions provider in the Asia Pacific Region.
