

SUPERDATA SOFTWARE HOLDINGS LIMITED

(速 達 軟 件 控 股 有 限 公 司)*

(incorporated in the Cayman Islands with limited liability)

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET ("GEM") OF THE STOCK EXCHANGE OF HONG KONG LIMITED

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

The principal means of information dissemination on GEM is publication on the internet website operated by the Stock Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on GEM-listed companies.

The Stock Exchange of Hong Kong Limited (the "Stock Exchange") takes no responsibility for the contents of this announcement, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this announcement.

This announcement, for which the directors of Superdata Software Holdings Limited (the "Company") (the "Directors") collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the GEM (the "GEM Listing Rules") for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: (i) the information contained in this announcement is accurate and complete in all material respects and not misleading; (ii) there are no other matters the omission of which would make any statement in this announcement misleading; and (iii) all opinions expressed in this announcement have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

The board of Directors (the “Board”) of the Company is pleased to present the unaudited condensed consolidated results of the Company and its subsidiaries (collectively the “Group”) for the three months and six months ended 30 June 2003, together with the unaudited comparative figures for the corresponding periods in 2002:

HIGHLIGHTS

- Turnover of the Group amounted to approximately RMB18.1 million for the six months ended 30 June 2003, representing an increase of approximately 28.4% as compared to approximately RMB14.1 million for the corresponding period in the previous financial year.
- Net profit of the Group amounted to approximately RMB7.6 million for the six months ended 30 June 2003, representing an increase of approximately 48.5% as compared to approximately RMB5.1 million for the corresponding period in the previous financial year.
- Earnings per share of the Group was approximately RMB2.4 cents for the six months ended 30 June 2003.
- The financial position of the Group remains healthy. As at 30 June 2003, the Group had cash and bank balances of approximately HK\$58.6 million and had no bank borrowings.
- The Board does not recommend the payment of an interim dividend for the six months ended 30 June 2003.

BUSINESS AND OPERATION REVIEW

For the six months ended 30 June 2003, the Group has engaged in the development and sales of packaged integrated business software in the People's Republic of China excluding Hong Kong (the "PRC"). Development and sales of customised software had been reduced to a minimal level because the management considered that it will be more profitable for the Group to focus on the packaged software market.

The Group reported an unaudited turnover of approximately RMB18.1 million for the six months ended 30 June 2003, representing a significant growth of approximately 28.4% over that of the corresponding period in 2002. Turnover of the Group was derived principally from the sales of packaged integrated business management software. The growth is attributed to the growing recognition and acceptance of the Group's products and enhanced marketing and sales efforts.

The Group recorded a net profit of approximately RMB7.6 million for the six months ended 30 June 2003, representing an increase of approximately 48.5% over that of the corresponding period in 2002. If the sales of ERP (an application system for achieving company-wide integration of business and technical information), for which management resolved not to focus on in 2003, had been excluded in the first half of 2002, the increase in percentage of the net profit would have increased by approximately 195.1%.

The Directors believe that the Group has continued to be the market leader with more than 80% market share in the PRC's small and medium enterprises ("SME(s)") management software retail market on installation base. The Group has continued to promote the "QuickBooks 速達" brand and enhance its image in the market place.

PROSPECTS

The Directors believe that the Group has retained its position as the market leader in the integrated business management software solution by providing off-the-shelf solutions to the SMEs for the six months ended 30 June 2003. The Directors also believe that SME's application software will remain one of the most promising fields in the IT industry in the PRC in the long run. Based on the report prepared by IDC in August 2002, SME's management software retail market is expected to grow with a compound annual growth rate of approximately 36.5% from 2002 to 2006. The Directors therefore strongly believe that there is still a great market for the Group to grow in the future.

The Group realises that the keys to increasing its sales are to expand its sales channels in different areas in the PRC and to seek alliances with new channel partners. The Group will assess carefully its potential partners and analyse the market circumstances to ensure that its expansion will be beneficial to the Group's business development as of today and in the long run.

On the other hand, the Group will continue the strategic alliance with Intuit to enhance the brand image of the Group's products in the PRC.

PRODUCT LAUNCH

In the first half of 2003, the Group has launched a series of new products ranging from vertical field solutions such as SD pharmacy management, SD Finance Pro and SD Distribution Management System to enhanced generic solutions such as E2 Pro for medium-sized enterprises. In addition, the Group has engaged in its products upgrade. The newly upgraded products have improved in execution efficiency and functionality.

The Group expects to launch its other new products, including SD Construction, SD Production Enterprise Management, E2 Lite and E2 SQL Server in the second half of 2003.

PRODUCT RESEARCH AND DEVELOPMENT

The Group places a strong emphasis on its R&D for new software products and in applying new technologies to its development process, so as to keep pace with the rapid development in software technology. Total R&D expenses incurred by the Group for the six months ended 30 June 2003 was approximately RMB1.7 million, representing approximately 9.2% of the Group's turnover for the period.

MARKETING AND SALES

After the listing, the Group commenced an aggressive expansion of its sales channels by establishing "Sales Target Groups". A Sales Target Group generally comprises a group of 2-4 sales representatives who travels to a specified location for the purpose of conducting market study and identifying more potential retailers and new customers within that area. With that initiative, the number of authorised retailers comprising Advantage Business Partners ("ABPs") and Professional Service Partners ("PSPs") have further increased during the three months ended 30 June 2003.

EFFECTS OF SARS

The Group's sales for the six months ended 30 June 2003 were only slightly affected by the SARS outbreak in the PRC in April and May 2003 because the Group has been able to increase its sales with the introduction of the Sales Target Groups as mentioned above.

RELOCATION OF A SUBSIDIARY

Beijing Superdata Network Co., Ltd ("Superdata (Beijing)") is a wholly-owned subsidiary of the Company and is currently located in Beijing, the PRC. The Group intends to relocate Superdata (Beijing) from Beijing to Shanghai, the PRC to capture the opportunities there. Principal activities of Superdata (Beijing), after the relocation, will be focusing on the development of management software for vertical business products, such as products for the construction industry. After moving Superdata (Beijing) to Shanghai, the Group still maintains a representative office in Beijing to look after the market there.

CAPITAL STRUCTURE

During the six months ended 30 June 2003, the Company had allotted and issued an aggregate of 9,999,900 new shares for the purpose of reorganisation of the Group in preparation of 290,000,000 new shares at par value for each share by way of a capitalisation issue to the then existing shareholders to prepare the Group for listing and an aggregate of 100,000,000 new shares at an issue price of HK\$0.303 each by way of placing. Following the completion of the reorganisation of the Group, the capitalisation issue and the placing, as at 30 June 2003, the total number of ordinary shares of the Company in issue had been increased to 400,000,000 shares of HK\$0.01 each.

The shares of the Company were listed on GEM on 6 June 2003. There has been no change in the capital structure of the Company since its listing.

SIGNIFICANT INVESTMENTS

For the six months ended 30 June 2003, the Group had no significant investments.

MATERIAL ACQUISITIONS AND DISPOSALS/FUTURE PLANS FOR MATERIAL INVESTMENTS

The Group had no material acquisitions or disposals during the six months ended 30 June 2003. The Group has no plans for material investments or capital assets other than those set out in the Company's prospectus dated 28 May 2003 (the "Prospectus").

SEGMENT INFORMATION

Details have been set out in Note 3 under "Notes to the condensed interim accounts". The trends of the segmental results remained consistent as compared with the corresponding period in the previous year.

LIQUIDITY AND FINANCIAL RESOURCES

As at 30 June 2003, the Group had cash and bank balances of approximately RMB58.6 million, and net current assets of approximately RMB56.8 million. The Group had been maintaining a strong working capital position during the period under review. As at 30 June 2003, the Group had current liabilities of approximately RMB8.3 million and no long-term liabilities.

The Group did not have any bank borrowings, banking facilities or charges on its assets as at 30 June 2003. The gearing ratio, as a percentage of total bank borrowings over total assets, was nil as at 30 June 2003.

During the period under review, the Company raised HK\$30.3 million from the placing of 100,000,000 shares at HK\$0.303 each. The Group intended to apply the net proceeds to finance all the activities as specified in the Prospectus. Apart from equity financing, the Group generally finances its operations and any possible expansion plans with its internal resources. The Group's operating cash inflow during the period under review amounted to approximately RMB9.0 million.

Surplus cash is generally deposited with financial institutions in Hong Kong and the PRC to earn interest income.

EXCHANGE RATE RISK

The Group's sales are transacted in Renminbi. As the exchange rate fluctuation between Hong Kong dollars and Renminbi is minimal, the Board considers the exchange rate risk that the Group is exposed to is very low and accordingly, no hedging arrangement was required during the period under review.

TREASURY POLICIES

The Group adopts a conservative approach towards its treasury policies. The Group strives to reduce exposure to credit risk by performing ongoing credit evaluations of the financial conditions of its customers. To manage liquidity risk, the Board closely monitors the Group's liquidity position to ensure that the liquidity structure of the Group's assets, liabilities and commitments can meet its funding requirements.
