

安瑞科能源裝備控股有限公司
ENRIC ENERGY EQUIPMENT HOLDINGS LIMITED

(Incorporated in the Cayman Islands with limited liability)
(Stock code: 8289)

FIRST QUARTERLY ANNOUNCEMENT
FOR THE THREE MONTHS ENDED 31 MARCH 2006

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

The principal means of information dissemination on GEM is publication on the internet website operated by the Stock Exchange. GEM-listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website at <http://www.hkgem.com> in order to obtain up-to-date information on GEM-listed issuers.

The Stock Exchange takes no responsibility for the contents of this announcement, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this announcement.

This announcement, for which the directors (the “Directors”) of Enric Energy Equipment Holdings Limited (the “Company”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM (the “GEM Listing Rules”) for the purposes of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: (1) the information contained in this announcement is accurate and complete in all material respects and not misleading; (2) there are no other matters the omission of which would make any statement in this announcement misleading; and (3) all opinions expressed in this announcement have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

FIRST QUARTERLY RESULTS (UNAUDITED)

The board of Directors (the “Board”) of Enric Energy Equipment Holdings Limited (the “Company”) is pleased to announce the unaudited condensed consolidated results of the Company and its subsidiaries (collectively, the “Group”) for the three months ended 31 March 2006, together with the comparative figures for the corresponding period in 2005, as follows:

Notes:

1. Reorganisation and basis of preparation

The Company was incorporated in the Cayman Islands on 28 September 2004 as an exempted company with limited liability under the Companies Law (Revised), Chapter 22 (Law 3 of 1961, as consolidated and revised) of the Cayman Islands. Pursuant to a reorganisation (the "Reorganisation") of the Company and its subsidiaries completed on 26 September 2005 to rationalise the structure of the Group in preparation for the public listing of its shares on the Growth Enterprise Market ("GEM") of The Stock Exchange of Hong Kong Limited (the "Stock Exchange"), the Company became the holding company of the subsidiaries now comprising the Group. The Company's shares were listed on GEM on 18 October 2005 (the "Listing Date").

The unaudited consolidated results of the Group for the three months ended 31 March 2006 comprise the results of the Company and its subsidiaries for the three months then ended.

The Group is regarded as a continuing entity resulting from the Reorganisation and therefore the unaudited consolidated results for the three months ended 31 March 2005 have been prepared on the basis that the Company was the holding company of the Group for the corresponding period presented rather than from 26 September 2005. Accordingly, the unaudited consolidated results of the Group for the three months ended 31 March 2005 include the results of the Company and its subsidiaries with effect from 1 January 2005 or where their respective dates of incorporation/establishment are at a date later than 1 January 2005, from the respective dates of incorporation/establishment, as if the current group structure had been in existence throughout the three months ended 31 March 2005. In the opinion of the Directors, the unaudited consolidated results prepared on this basis present fairly the results of operations of the Group as a whole.

The Group's unaudited consolidated results have been prepared in accordance with all applicable Hong Kong Financial Reporting Standards ("HKFRSs"), which collective term includes all applicable individual Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards ("HKASs") and Interpretations issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA"), accounting principles generally accepted in Hong Kong and the applicable disclosure provisions of the Rules Governing the Listing of Securities on GEM (the "GEM Listing Rules"). The measurement basis used in the preparation of the unaudited consolidated results is the historical cost basis.

2. Turnover and segment information

The Group is principally engaged in the provision of integrated business solutions in the gas energy industry and the design, manufacture and sale of specialised gas equipment. Turnover represents the sales value of goods sold after allowances for returns of goods, excludes value added or other sales taxes and is after the deduction of any trade discounts.

The Group's core products are pressure vessels, compressors and integrated business solutions for gas equipment.

	For the three months ended 31 March	
	2006 RMB'000 (unaudited)	2005 RMB'000 (unaudited)
Sales of pressure vessels	83,396	47,696
Sales of compressors	23,567	26,579
Provision of integrated business solutions	21,350	8,852
	<u>128,313</u>	<u>83,127</u>

3. Taxation

No provision has been made for Hong Kong Profits Tax as the Group did not have assessable profits subject to Hong Kong Profits Tax during the three months ended on 31 March 2006 (2005: Nil).

Profits of the Company's subsidiaries in the People's Republic of China (the "PRC") are subject to PRC income taxes.

The statutory state income tax rates applicable to the Company's subsidiaries in the PRC range from 15% to 30%. Pursuant to the relevant laws and regulations in the PRC, the Company's certain subsidiaries in the PRC, being foreign-invested enterprises of manufacturing nature, are entitled to exemption from PRC state income tax for the first two years commencing from the year in which a taxable income is made after the offset of deductible losses incurred in prior years, and thereafter will be entitled to a 50% reduction in state income tax rate for the following three years. During the three months ended 31 March 2006, these subsidiaries in the PRC were enjoying the tax relief period and were subject to state income tax ranging from 0% to 15% (2005: 0% to 15%).

The statutory local income tax rate applicable to the Company's subsidiaries in the PRC is 3%. Pursuant to the relevant laws and regulations in the PRC, the Company's certain subsidiaries in the PRC, being foreign-invested enterprises, are fully exempted from local income taxes while a subsidiary in the PRC is entitled to full exemption from the PRC local income tax for the first five years commencing from the year in which a taxable income is made after the offset of deductible losses incurred in prior years, and thereafter will be entitled to a 50% reduction in local income tax rate for the following five years. During the three months ended 31 March 2006, the Company's subsidiaries in the PRC were subject to local income tax rate of 0% (2005: 0%).

4. Earnings per share

The calculation of basic earnings per share for the three months ended 31 March 2006 is based on the profit attributable to ordinary equity shareholders of the Company of RMB15,416,000 and the weighted average number of ordinary shares of 445,200,000 of the Company outstanding during the three months ended 31 March 2006.

The calculation of basic earnings per share for the three months ended 31 March 2005 was based on the profit attributable to ordinary equity shareholders of the Company of RMB10,788,000 and on the ordinary shares of 260,160,000 of the Company in issue and issuable as at the date of the prospectus (10 October 2005), as if these shares were outstanding throughout the three months ended 31 March 2005.

The calculation of diluted earnings per share for the three months ended 31 March 2006 is based on the profit attributable to ordinary equity shareholders of the Company of RMB15,416,000 and the weighted average number of ordinary shares of 453,174,921, calculated as follows:

	For the three months ended 31 March

The Directors do not recommend the payment of any dividend for the three months ended 31 March 2006 (2005: Nil).

MANAGEMENT DISCUSSION & ANALYSIS

Executive Summary

Principal activities

The Group is an integrated business solutions provider in the gas energy industry and one of the leading specialised gas equipment manufacturers in the PRC. The Group designs, manufactures and sells specialised gas equipment including seamless pressure cylinders, compressed natural gas (“CNG”) trailers, natural gas refueling station system, liquefied natural gas (“LNG”) storage tanks, LNG trailers and gas compressors. In anticipation of market needs, the Group also offers integrated business solutions, a beyond-the-equipment package of one-stop services from the design and manufacture of gas equipment system and on-site installation to staff training and after-sales services. Products of the Group are essential for the transportation, storage and distribution of natural gas.

Results for the three months ended 31 March 2006

Benefited from the blooming natural gas industry in the PRC and the Group’s dedicated efforts to strengthen its specialised gas equipment business, the Group achieved strong growth for the three months ended 31 March 2006. Turnover of the Group during the period under review was RMB128,313,000 (2005: RMB83,127,000), representing an increase of 54.4%. Net profit attributable to shareholders for the three months ended 31 March 2006 reached RMB15,416,000 (2005: RMB10,788,000), representing 42.9% increase over the corresponding period in 2005. Basic and diluted earnings per share were RMB0.035 (2005: RMB0.042) and RMB0.034 (2005: not applicable) respectively.

In particular, the CNG seamless pressure cylinder storage and transportation equipment and CNG refueling station system received very positive market response during the three months ended 31 March 2006. The turnover of pressure vessels and integrated business solutions rose by 74.8% to RMB83,396,000 and 141.2% to RMB21,350,000 respectively over the corresponding period in 2005.

Financial position

As at 31 March 2006, the Group recorded cash on hand of RMB227,400,000 and bank loans of RMB80,000,000. The Group will continue to cautiously implement its development plan and invest wisely in capital expenditures. Accordingly, the Group will review and maintain an optimal gearing level from time to time.

Intention to list the Company’s shares on the Main Board of the Stock Exchange

To further increase its public profile and recognition, the Company is preparing a listing of its shares on the Main Board of the Stock Exchange by way of introduction (the “Proposed Introduction”). On 30 March 2006, the Company submitted an advance booking form for the Proposed Introduction to the Stock Exchange. The Stock Exchange has also been notified of the Company’s intention to implement the proposed voluntary withdrawal of the listing of its shares on GEM (the “Proposed Withdrawal”). However, the Directors would like to emphasise that both the Proposed Introduction and the Proposed Withdrawal are at a preliminary stage and that the definitive timetable for the Proposed Introduction and the Proposed Withdrawal has yet to be finalised. Further announcements will be made by the Company to keep the shareholders informed on the latest progress of the Proposed Introduction and the Proposed Withdrawal in accordance with the requirements of the GEM Listing Rules and the Rules Governing the Listing of Securities on the Stock Exchange (the “Listing Rules”). Shareholders of the Company and potential investors are advised to exercise caution when dealing in the shares of the Company.

Business Review

Sales and Marketing

The sales and marketing network of the Group is primarily based in the PRC. Specialised gas equipment for the storage, transportation, distribution, compression and pressure-regulating of natural gas is of keen demand across the gas sector from city gas operators and gas refueling station operators to natural gas logistic companies and natural gas infrastructure contractors, thus forming a diversified customer base for the Group. Some of our renowned customers include branch companies of PetroChina Company Limited (“PetroChina”) and China Petroleum & Chemical Corporation (“Sinopec”), Shengli Oil Field, Liaohe Oil Field, Xinao Gas Holdings Limited (“Xinao Gas”) and The Hong Kong and China Gas Company Limited’s subsidiaries in the PRC. In addition, the Group has customers from industrial and chemical sectors which require the Group’s equipment for production.

Corporate website is an excellent platform to publicise a company and maintain stable relationship with investors and customers worldwide. The Group continues to modify its official website to be more user-friendly and to disseminate the latest information on products, corporate governance and investor relations.

Research and Development

Enhancement of research and development capacity is one of the primary development strategies of the Group. During the period under review, the Group continued the development of the liquefied-compressed natural gas (“LCNG”) refueling station system. The management believes that the LCNG product will be very competitive once it is launched as it is of higher refueling efficiency, larger storage capacity, increased safety and reduced size when compared with conventional refueling stations.

Productivity

As at 31 March 2006, the annual production capacities of pressure vessels and compressors were approximately 3,000 and 1,000 standard units respectively. To feed the appetite of the emerging gas equipment market, a number of productivity enhancement programs are under progress, such as the expansion of production line of seamless pressure cylinders and the upgrade of production facilities of integrated business solutions and compressors.

Qualifications

The gas equipment industry adheres to stringent statutory regulations and industry players must obtain relevant qualifications. Apart from the prerequisite manufacturing and design licences from the PRC government, the Group has also been granted qualifications from international bodies, such as the Ministry of Commerce, Industry and Energy of Korea, the American Society of Mechanical Engineers and the United States Department of Transportation, which allows the Group to sell its gas transportation products to the US. These professional and authoritative qualifications have not only sharpened the Group’s competitive edge, but have also laid a solid foundation for the Group’s future business development.

Aiming to secure its intellectual property rights, the Group has also registered several patents in the PRC. Currently, the Group is applying for the European Union's CE certification to secure its leading position in the industry and prepare for the overseas market.

Prospects

Under a rapidly developing global economy, energy shortage and environmental pollutions are threatening issues around the world. In China, one of the world's fastest-growing countries, the government is actively looking for renewable and environmental-friendly alternatives to alleviate the nation's heavy reliance on traditional energy sources like oil and coal. Natural gas, being a green and efficient energy and more price competitive than oil and liquefied petroleum gas, has become an important energy in the PRC.

Under the 11th Five-Year Plan of the PRC central government on the state's energy structure, a series of favourable policies is promulgated to promote the utilisation of natural gas. In February 2005, the State Council issued the "Opinions on encouraging the development of non-state-owned economy", which explicitly encourages private and foreign investors to enter the urban public utilities sector. Incentives are offered by local governments to promote the conversion of oil-powered or diesel-powered vehicles to natural-gas-fuelled. These favourable policies secure the healthy and sustainable growth of the gas equipment industry in the long run.

Substantial investment in natural gas infrastructure enlarges the natural gas's share in the nation's energy market. The natural gas equipment market is now experiencing an enormous growth. The International Energy Agency (the "IEA") forecasted that the annual investment in the PRC natural gas equipment market would rocket over five times from USD0.6 billion in 2000 to USD3.2 billion in 2020. The West-East Pipeline Project is the landmark natural gas infrastructure project in the PRC. Under this project, long distance gas pipelines were completed in 2004 and more branch pipelines are to be built in coming years. The Zhong-Wu Pipeline and the Shaanxi-Beijing Pipeline have also commenced operation in 2005. Other large-scale natural gas infrastructure projects in progress include the exploration of undersea natural gas, the importation of LNG as well as the construction of LNG terminals in southern cities such as Shenzhen, Shanghai, Zhuhai, Ningbo and Quanzhou. All of these projects imply that more and more cities and provinces in the PRC will be able to use natural gas as a major energy.

The prevalence of natural gas in turn accelerates the implementation of city gas projects and the construction of CNG refueling stations for vehicles, nurturing a vast and ever-growing natural gas storage, transportation and distribution equipment market in the PRC.

In addition to domestic and industrial use, natural gas has long been used as a vehicle fuel in South America, Europe and Canada due to its advantages over gasoline and diesel – lower cost, lower exhaust emissions and safer. A research by the International Association for Natural Gas Vehicles shows that Argentina and Brazil are the two largest natural gas vehicle ("NGV") users in the world. The numbers of NGV per 1,000 people in the two countries are 40 and 6 respectively which are hundred folds higher than China's figure of 0.07. Combined with the abundant gas reserve in the region, it is expected that there is a large room for the development of NGVs in the PRC, which sets a growth engine of the Group's business in natural gas refueling stations and associated products.

The thriving natural gas industry, supported by favourable policies and substantial investment in natural gas infrastructure by the PRC government, generates huge demand for specialised gas equipment for the storage, transportation and distribution of natural gas – bringing enormous business opportunities to the Group.

Well-positioned at the blooming gas equipment industry, we are confident that through careful financial planning, industry expertise and effective marketing strategies, we will take full advantage of every business opportunity ahead and bring excellent returns to our shareholders.
