FIRST QUARTERLY RESULTS FOR THE THREE MONTHS ENDED 31 MARCH 2007

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the main board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

The principal means of information dissemination on GEM is publication on the internet website operated by the Stock Exchange. GEM-listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website at www.hkgem.com in order to obtain up-to-date information on GEM-listed issuers.

The Stock Exchange takes no responsibility for the contents of this announcement, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this announcement.

This announcement, for which the directors of QUASAR Communication Technology Holdings Limited collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM (the “GEM Listing Rules”) for the purpose of giving information with regard to QUASAR Communication Technology Holdings Limited. The directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief:– (1) the information contained in this announcement is accurate and complete in all material respects and not misleading; (2) there are no other matters the omission of which would make any statement in this announcement misleading; and (3) all opinions expressed in this announcement have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

BUSINESS REVIEW AND OUTLOOK

During the period ended 31 March 2007, turnover of the Group increased by approximately 36.75% to around HK\$83,361,000 (period ended 31 March 2006: HK\$60,959,000). The upsurge in turnover was due to (i) increase in market demand driven by the rural markets in the People's Republic of China (the "PRC"); (ii) continuous renovation of product features catering for young adults with strong purchasing power; and (iii) a solid customer base established by the Group.

By the end of March 2007, the total number of mobile phone subscribers in the PRC reached 481 million, representing an increase of 20 million compared with the amounts at the beginning of 2007. It is general believed that the mobile phone market in the PRC still has a double-digit growth approximately 14% in 2007.

Diversified flashing selling points covering music, video, high pixel camera, smart, ultra thin and slide cover mobile phones led the popular trend in the market in 2006. The Group still expects that this market trend will continue in the near future. As such, the Group will continue to strengthen its unique strength in making ongoing innovative product features catering for customers' needs so as to maintain our competitiveness in the market.

China's Ministry of Information Industry has just worked out their layout for the Eleventh 5-year Period which emphasized heavily on 3G development. Minister of Information Industry of the PRC, Mr. Wang Xudong, also said that the telecom reforms in 2007 will depend on the opportunities developing within the 3G industry. As such, it is expected that 3G mobile phones are another main stream in the PRC mobile phone market in the near future. In order to make preparations for the

new 3G era in China in the near future, the Group entered into sale and purchase agreements with Korea Technology Investment Corporation (“Korea Technology”) and KTIC M&A, Inc (“KTIC”) on 29 December 2006 and re-entered into supplemental agreements with Korea Technology and KTIC on 30 March 2007, to acquire 38.29% equity interest in KBT Mobile Co., Limited, a South Korean company which has the capability to develop 3G mobile appliances. The Group will then form a business alliance through the proposed acquisition to capitalise any potential business opportunity in the near future. The whole transaction is expected to be completed by the end of June 2007.

The telecommunications law is expected to create an improved environment and harmonic society for fair competition and operations to attract both overseas and local investments in the telecommunication industry. As such, it is generally believed that the PRC general environment of mobile phone industry will remain very healthy throughout 2007. The Group will continue to attain potential business opportunities while at the same time strengthen our competitive advantages so as to bring in more values for our shareholders.
