
GLOSSARY OF TECHNICAL TERMS

In this document, the following glossary contains explanations of certain terms in connection with the Group and its business. These terminologies and their given meanings may not correspond to those standard meanings and usage adopted in the industry:

- “PE” polyethylene, a polymer of ethylene and a thermoplastic substance often used in consumer products
- “PPR” polypropylene random, a type of plastic pipe products. This is mainly used in the building of hot and cold water systems as well as the drinking water systems
- “PVC” polyvinyl chloride, a polymer of vinyl chloride and a type of widely-used plastics. This can be made softer and more flexible by the addition of plasticisers
