THIRD QUARTERLY RESULTS ANNOUNCEMENT FOR THE NINE MONTHS ENDED 31 SEPTEMBER 2007

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

The principal means of information dissemination on GEM is publication on the Internet website operated by the Stock Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on GEM-listed issuers.

The Stock Exchange of Hong Kong Limited takes no responsibility for the contents of this announcement, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this announcement.

This announcement, for which the directors of Ko Yo Ecological Agrotech (Group) Limited collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM of the Stock Exchange for the purpose of giving information with regard to Ko Yo Ecological Agrotech (Group) Limited. The directors of Ko Yo Ecological Agrotech (Group) Limited, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: (i) the information contained in this announcement is accurate and complete in all material respects and not misleading; (ii) there are no other matters the omission of which would make any statement in this announcement misleading; and (iii) all opinions expressed in this announcement have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

MANAGEMENT DISCUSSION AND ANALYSIS *(Continued)*

Prospects

The National Development and Reform Commission of the PRC released “The Policy of Natural Gas Usage” on 30 August 2007, of which it clearly stated that the supply of natural gas must remain stable according to the current natural gas policy. In particular for the chemical fertilizer projects approved by the Government, the supply of natural gas must remain stable in long term. The policy also encourages optimization of natural gas efficiency by using advanced technology and facilities. For the urea manufacturers using natural gas as the key energy, the policy is beneficial in long-term natural gas supply and it provides the Group with favorable environment for future’s growth.

The Group will speed up the construction of the urea plant at Dazhou City, Sichuan Province, the PRC, according to the above-mentioned policy. We will also speed up to launch the production in order to amplify the Group’s profit in future.

In the aspect of technology and product research and development, the Group will not only continue the effort on the research of new BB fertilizer formula, slow release fertilizer and controlled release fertilizer as well as the specialized fertilizers for cash crops such as rapes, peanuts, garlic and onions which are cultivated in Sichuan Province and Shandong Province, the PRC, the Group will also undergo the preliminary research of producing compound fertilizer by extruding-prilling method. The method is a brand new technology to produce compound fertilizer and has been rapidly developed overseas in recent years. It is believed that the method will help enhance product quality of the Group.

With the help of national favorable policies and guarantee natural gas and electricity supply, the Group will strive to meet the target of this year. Meanwhile, the Group will also strengthen the product marketing and research in Sichuan’s and Shandong’s key markets. This is to lay solid foundation for the operation in 2008 in order to enhance shareholders’ value.
