INTERIM RESULTS ANNOUNCEMENT FOR THE SIX MONTHS ENDED 30 JUNE 2009

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET ("GEM") OF THE STOCK EXCHANGE OF HONG KONG LIMITED ("STOCK EXCHANGE")

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this announcement, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this announcement.

This announcement, for which the directors ("Directors") of Enviro Energy International Holdings Limited ("Company", and together with its subsidiaries and jointly-controlled entity, "Group") collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM of the Stock Exchange ("GEM Listing Rules") for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: (i) the information contained in this announcement is accurate and complete in all material respects and not misleading; (ii) there are no other matters the omission of which would make any statement in this announcement misleading; and (iii) all opinions expressed in this announcement have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

MANAGEMENT DISCUSSION AND ANALYSIS

The Group is principally engaged in investment holding and development of environmental energy-related projects involving conventional oil, unconventional natural gas and state-of-the-art oil and gas related environmental technologies.

Business Review

Conventional crude oil business

During the second quarter of 2009, the crude oil price in the People's Republic of China ("PRC") increased slightly and maintained a level ranging between approximately US\$46 to US\$54 per barrel. PetroChina Company Limited ("PetroChina"), the operator of the two oilfields of Qian An Oil Development Co., Ltd. ("Qian An Oilfields"), has ramped up to normal production levels for the three months ended 30 June 2009. However, profit has yet to resume.

Unconventional natural gas business

During the period under review, TerraWest Energy Corp. ("TWE"), as Operator (as defined in the production sharing contract dated 30 December 2005 ("PSC") entered into with China Coalbed Methane Corporation Limited ("CUCBM")) of the Linhuanggou Project, announced the discovery of gas-bearing shale in the prospective Jurassic Badaowan ("J1B") formation and confirmed the thickness of the J1B on its Liuhuanggou Project lands located in the southern Junggar Basin of Xinjiang, the PRC.

As previously reported, well LHG 08-03 intersected approximately 350 metres (1,155 feet) of J1B prior to reaching total depth in November 2008 and the intersection included approximately 170 metres (561 feet) of gas-bearing shale. Well LHG 08-03 also intersected approximately 52.3 metres (173 feet) of the previously known Jurassic Xishanyao ("J2X") coalbed methane ("CBM") target coal seam.

Geological survey work which commenced in May 2009 as part of the 2009 exploration program included reconnaissance and geological mapping of surface exposures of the J1B. Preliminary results of the survey confirm the true thickness of the J1B formation to be at least 750 metres (2,475 feet), much thicker than indicated in the 2008 drilling.

The geological survey also identified specific locations for drilling later this year. The additional test drilling at certain identified locations is expected to begin in the third quarter of 2009 and will include coring, sampling and geophysical logging of prospective formations. The drill core samples will be analyzed to provide additional information on the character and attributes of the prospective shale and other targets.

Samples of shale taken from 2008 drilling program are currently being analyzed for various qualities including total organic carbon content and mineral composition.

The board of Directors of the Company ("Board") considers that the confirmation of greater thickness of prospective shale as well as multiple interbedded CBM zones in the J1B, together with the known thickness of the J2X coal seam provides confidence that TWE has a multi-hydrocarbon play opportunity and potentially encountered a natural gas accumulation of great merit and importance to the PRC.

Environmental technologies

The Deep Un-mineable Coal Carbon Dioxide ("CO₂") Sequestration and Enhanced CBM Production Project ("JV Project") operated under the cooperative joint venture agreement dated 25 January 2008 ("JV Agreement") between the Company, CUCBM and Petromin Resources Ltd. ("Petromin") continued to move ahead smoothly during the period under review. As part of the contractual obligation to the JV Project, the Company and Petromin completed well design work which will be utilized in the forthcoming injection of CO₂. Prior to the actual injection, it is anticipated that the pilot well will be operated for a period of weeks to establish baseline production data.

The JV Project involves injecting CO₂ into a coal formation to test CO₂ sequestration and storage and enhanced CBM production. Pursuant to the JV Agreement, the Company holds a 20% participating interest in the JV Project which is operated by CUCBM. The Group's technology partner, the Alberta Research Council of Canada, provides expert consulting services to the Company and Petromin relating to the JV Project.

Business prospects

Conventional crude oil business

Overall oil demand in China was slightly down in the first half of 2009 as a result of significant drop in demand in the first quarter which was not totally offset by the demand increase in the second quarter of the year. The situation in China is more positive than the rest of the world where global oil demand is expected to remain below 2008 levels and continuation of this demand outlook is expected to keep oil prices at current levels for the remainder of the year.

Looking ahead, the Qian An Oilfields would have the upside benefit from increased oil price levels and opportunities for further development that could include in-fill drilling, opening additional by-pass pay formation zones, new target formation drilling and enhanced production concepts.

Unconventional natural gas business

In respect of CBM, given the high demand for clean energy and concerns over environmental issues, CBM is regarded as a key source of alternative clean energy which can ease the acute shortage of natural gas in various regions of the world. In the PRC, a number of favorable policies and incentives to encourage CBM exploration and utilisation have been implemented. These policies and incentives include value added tax waiver, corporate income tax relief, preferable access to pipeline transportation and CBM gas sales price subsidy. Under the 11th Five-year Plan, the PRC aims to achieve more than 10 billion cubic metres annual CBM production by 2010. The PRC is considered as one of the most prospective regions in the world for CBM development based on its widespread and high quality coal resources.

International shale gas developments

The Board considers it notable that the development of shale gas resources in the United States and Canada has continued at a rapid pace, spurred by very large capital investments by both domestic and international energy firms, including global majors, and advances in well completion technology. Commercial shale gas developments typically show very large natural gas resources in place and significant individual well production rates with long production life.

The energy resource additions represented by shale gas are large enough to potentially reduce long-term natural gas import demand in North America as well as increase the utilization of natural gas in industrial sectors currently dominated by coal and petroleum. The replacement of the higher carbon content fuels by natural gas would have a beneficial environmental effect.

These developments in North America and the positive impact of shale gas resources on domestic energy supply have made an impression in Europe where a major collaboration of government, universities and industry has launched a broad study of shale basins in European countries (Gas Shales in Europe, GASH). The industry participation includes major energy corporations. The positive international implications of shale gas development were also discussed by industry and governments at the G8 Energy Ministers Meeting in May 2009.

The Board considers the potential for similar energy resource additions and environmental benefits in the PRC to be a key driver of shale gas exploration and development in that country and further considers TWE to have gained a competitive, early-mover advantage in the PRC through the discovery of gas-bearing shale on the Liuhuanggou Project lands.

Capturing the above future potential returns to the Company's shareholders, the Company's effective controlling interest in TWE will increase from approximately 58.17% to approximately 65.58% upon the completion of the subscription for 40,000,000 units of TWE ("Unit(s)"). Each Unit consists of one common share, one A warrant and one B warrant of TWE. Assuming the A warrants and the B warrants are fully exercised pursuant to the subscription agreement dated 23 July 2009, the effective controlling interests of the Company in TWE will further increase to approximately 74.59%. In addition, the Company's effective interests in TWE will further be increased to approximately 76.08% upon the completion and full conversion of 630 nine percent subordinated unsecured convertible debentures ("Debenture(s)") at the conversion price of C\$0.2 per Debenture under the Subscription Agreement (as defined in Note 20 to the consolidated interim financial statements), to be issued by Petromin, a substantial shareholder of TWE, to Dragon Bounty Company Limited ("Dragon Bounty"), a wholly-owned subsidiary of the Company.

FINANCIAL REVIEW

Oil and gas segment

Conventional energy project

During the period under review, PetroChina maintained the production volume of crude oil at normal production levels. However, due to continuous low crude oil price in the PRC, the jointly-controlled entity contributed a loss of approximately HK\$3,434,000 (2008: a profit of approximately HK\$4,465,000) to the Group.

Non-conventional energy project

Upon completion of the acquisition of entire equity interest in Chavis International Limited ("Chavis") on 13 October 2008, the Group through Chavis holds approximately 58.17% of the existing issued common and preferred share capital of TWE, which holds 47% interest in a CBM PSC with CUCBM which holds the remaining 53% interest therein. According to the PSC, TWE, as Operator (as defined in the PSC), is entitled to recover the operating and exploration costs out of 70% of the revenue to be generated from the contract area of the PSC. The PSC, being classified as an intangible asset, is amortized on a straight-line basis over 28 years. The amortization of the PSC of approximately HK\$15,366,000 and relative deferred tax credit of approximately HK\$3,841,000 were thus recognized during the six months ended 30 June 2009.

During the period under review, the Group incurred additional exploration expenditure amounted to approximately HK\$1,113,000 for further testing and analyzing the CBM and shale gas samples.

On 11 February 2009, Petromin exercised its warrants to acquire 16,666,667 common shares in, representing approximately 5.74% of the issued common and preferred shares in the capital of, TWE. As a result of the Group's deemed disposal of approximately 5.74% of its interest in TWE, its continuing interest was reduced to approximately 58.17%. The proceed of approximately HK\$3,080,000 was received in cash from Petromin. The difference between the deemed disposal proceeds and the amount transferred to non-controlling interests of approximately HK\$38,801,000 has been recognized directly in equity.

Information technology ("IT") and network infrastructure segment

During the period under review, the Group continued focusing its resources on energy-related business and scaled-down its IT solutions and services business. As a result of the Group's change in business model, the Group's revenue generated from IT and network infrastructure businesses dropped by approximately HK\$328,000 from approximately HK\$519,000 to approximately HK\$191,000.

Administrative and operating expenses

Administrative and operating expenses decreased by approximately HK\$8,403,000 from approximately HK\$45,904,000 to approximately HK\$37,501,000 compared with the same period of 2008. This was primarily due to the recognition of the PSC amortisation of approximately HK\$15,366,000 (2008: Nil), increase in staff and Directors' salaries and allowance by approximately HK\$1,670,000 from approximately HK\$11,989,000 to approximately HK\$13,659,000, which were mainly offset by the significant drop in legal and professional fees by approximately HK\$23,878,000 to approximately HK\$2,552,000 (2008: HK\$26,430,000).

Share-based payment

As a result of additional 32,745,000 share options granted on 15 June 2009, equity settled share-based payment of approximately HK\$622,000 was recognized.

Other comprehensive income

Exchange differences arising on translation of Canadian operation substantially increased to approximately HK\$30,854,000 (2008: HK\$604,000) because the Canadian dollars ("C\$") as a functional currency against the Hong Kong dollars ("HK\$") as a presentation currency increased significantly by approximately 5.2% when translating the consolidated net assets of Chavis and its Canadian subsidiary during the period.

LBITDA and loss attributable to equity holders of the Company

Compared with the same period of 2008, adjusted LBITDA (Loss before interest, tax, depreciation and amortisation) decreased by approximately HK\$23,115,000 from approximately HK\$45,148,000 to approximately HK\$22,033,000, and the loss attributable to equity holders of the Company decreased by approximately 18.24% from approximately HK\$39,577,000 to approximately HK\$32,360,000.

Liquidity and financial resources

For the period under review, the Group's major business operations took place in Hong Kong, the PRC and Canada, financed mainly by internally generated cash flows and fund raised by previous share placings. As at 30 June 2009, the Group had bank balances and cash of approximately HK\$107,165,000 (31 December 2008: HK\$133,740,000). The Group's working capital ratio stood at 3.08 as at 30 June 2009 (31 December 2008: 3.2).

The Group adopts conservative treasury policies in managing its cash and financial matters, with the Group's treasury activities mainly carried out in Hong Kong. Currently, bank balances and cash are placed in interest-bearing bank accounts denominated in HK\$, U.S. dollars ("US\$") and C\$. The Group's financial risk management objectives and policies are reviewed regularly by the Board.

As at 30 June 2009, the Group maintained a debt-free capital structure.

Material acquisitions and disposals of subsidiaries and affiliated companies

Material acquisitions of the Company are set out in Note 20 to the consolidated interim financial statements.

Save as disclosed above, there were no other material acquisitions or disposals which would be required to be disclosed under the GEM Listing Rules.

Employees' information

As at 30 June 2009, the Group had 20 full-time employees (31 December 2008: 21) working in Hong Kong, the PRC and Canada. The total employees benefit expense, including Directors' emoluments, amounted to approximately HK\$13,659,000 for the period under review (2008: HK\$11,989,000). The Group remunerates its employees based on their performance, experience and the prevailing industry practice.

In addition to the regular remuneration, share options may be granted to selected staff by reference to the Group's performance as well as the individual's performance. Other benefits, such as medical and retirement benefits and training programs, are also provided.

Charge on group assets

As at 30 June 2009, the Group did not have any charges on the Group's assets (31 December 2008: Nil).

Gearing ratio

As at 30 June 2009, the Group had no payables incurred which were not in the ordinary course of business and accordingly the gearing ratio was nil.

Foreign exchange exposure

The Group mainly earned revenue and incurred costs in HK\$, Renminbi ("RMB"), C\$ and US\$. Risk on exposure to fluctuation in exchange rates was insignificant to the Group despite there was fluctuation in the exchange rate between US\$ against C\$. The Directors and senior management will continue to monitor closely the exchange risk and hedging by forward contracts and applicable derivatives when necessary.

Capital commitments and contingent liabilities

Capital commitments are set out in Note 19 to the consolidated interim financial statements.

On 29 February 2008, the Group acquired 100% of the issued share capital of Allied Resources Limited. Save for amount due to the holding company of approximately HK\$82,594,000, the accrued liabilities and other payables of approximately HK\$28,069,000, the vendor, Global Richland Investment Limited, has agreed to fully indemnify the Group in respect of, among other matters, any losses or expenses incurred by the Group in respect of any other liabilities, tax provision, contingent liabilities and commitments of not exceeding in aggregate of HK\$365.88 million and any liability incurred by the Group relating to tax and/or relief on or before the sixth anniversary of the date of completion, i.e. 28 February 2014.

On 13 October 2008, the Group acquired 100% of the issued share capital of Chavis. Save for accrued liabilities and other payables disclosed in the unaudited consolidated financial statements of Chavis and its subsidiary as at 31 July 2008, the vendor, Ms. Cheng Miu Fong, has agreed to fully indemnify the Group in respect of, among other matters, any losses or expenses incurred by the Group in respect of any other liabilities, tax provision, contingent liabilities and commitments of not exceeding in aggregate of US\$4.031 million and any liability incurred by the Group relating to tax and/or relief on or before the sixth anniversary of the date of completion, i.e. 12 October 2014.

CONDENSED CONSOLIDATED INTERIM INCOME STATEMENT

Notes:

1. PRINCIPAL ACCOUNTING POLICIES AND BASIS OF PREPARATION

The unaudited condensed consolidated interim financial statements of the Group have been prepared in accordance with Hong Kong Accounting Standard 34 "Interim Financial Reporting" issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and the applicable disclosure requirements of the GEM Listing Rules. They have been prepared on the historical cost basis except for certain intangible assets and financial instruments, which are measured at fair values and are consistent with those followed in the Group's audited financial statements for the seventeen-month period ended 31 December 2008.

In the current period, the Group has applied, for the first time, the following new standards, amendments and interpretations (hereinafter collectively referred to as "New HKFRSs") issued by the HKICPA, which are or have become effective for the Group's financial period beginning 1 January 2009:

HKFRSs (Amendments) Improvement to HKFRSs

16. SHARE-BASED PAYMENTS TRANSACTION

The fair value of options granted under the post-IPO share option scheme adopted by the Company on 25 January 2003 ("**Share Option Scheme**"), amounted to approximately HK\$464,000 and approximately HK\$622,000 for the three-month and six-month periods ended 30 June 2009, respectively (approximately HK\$21,000 for each of three-month and six-month periods ended for 30 June 2008).

Regarding the share options granted on 19 June 2008 and 15 June 2009, 50% of the share options shall be exercised in a period commencing two years from the date of grant and expiring on the tenth anniversary from the date of grant. The balance of 50% of the share options shall be exercised in a period commencing three years from the date of grant and expiring on the tenth anniversary from the date of grant.

The fair values of the share options granted were derived from Binomial option pricing model by applying the following bases and assumptions:

Date of grant (dd/mm/yyyy)	Dividend yield	Expected volatility ⁽ⁱ⁾	Risk-free rate ⁽ⁱⁱ⁾	Price of the Company's share at grant date of share options ⁽ⁱⁱⁱ⁾ HK\$ per share
15/06/2009	Nil	59.5%	2.911%	0.730
19/06/2008	Nil	47.8%	3.730%	0.230

Notes:

- (i) The expected volatility of the options was calculated based on the historical stock price of the Company and comparable companies, respectively. It is assumed that the volatility is constant throughout the option life.
- (ii) The risk free rate has made reference to the yield of the Hong Kong Exchange Fund Notes ("EFN") as at the grant date. In this valuation, the yield of 10-year EFN has been adopted in the estimation of risk-free rate for the option.
- (iii) The price of the Company's share disclosed as on the date of grant of the share options was the closing price on the trading day immediately prior to the date of grant of the share options.
- (iv) The values of the options are subject to the limitations of the Binomial option pricing model and a number of assumptions which are subjective and difficult to ascertain. Changes in subjective input assumptions could materially affect the fair value estimate.
- (v) The outstanding share options as at 30 June 2009 had a weighted average remaining contractual life of 5.84 years (31 December 2008: 4.76 years).
- (vi) If the options are forfeited before expiration or lapsed, the related share option reserve will be transferred directly to accumulated losses of the Company.
- (vii) The fair value of the share options has been arrived at on the basic of a valuation carried out on date of grant by Vigers Appraisal and Consulting Limited.

Number of Share Options

Notes:

- (1) The exercise price and number of share options were adjusted upon the first and second subdivisions of shares of the Company which came to effect on 18 April 2007 and 29 August 2007, respectively.
- (2) The exercise price and number of share options were adjusted upon the second subdivision of shares of the Company which came to effect on 29 August 2007.
- (3) 50% of the share options shall be exercised in a period commencing two years from the date of grant and expiring on the tenth anniversary from the date of grant. The balance of 50% of the share options shall be exercised in a period commencing three years from the date of grant and expiring on the tenth anniversary from the date of grant.
- (4) As at 30 June 2009, the Company had 118,602,200 (31 December 2008: 85,947,200) share options outstanding under the Share Option Scheme, which represented approximately 5.08% (31 December 2008: 3.67%) of the Company's shares in issue on that date.
- (5) During the six-month period ended 30 June 2009, a total of 32,745,000 share options were granted on 15 June 2009. The closing price of the Company's shares immediately before the date on which the aforesaid share options were granted was HK\$0.77 per share.

2. Share Option Scheme of TWE

On 8 April 2009, TWE adopted a share option scheme ("**TWE Scheme**") which was approved by the Company's shareholders in its annual general meeting held on 20 April 2009. As at 30 June 2009, no share options were granted under the TWE Scheme.

Prior to the adoption of the TWE Scheme, pursuant to the articles of TWE, a total of 12,850,000 incentive stock options ("TWE Options") were granted by TWE to certain of its directors and consultants to subscribe for common shares of TWE on 27 August 2008. Details of which as at 30 June 2009 were as follows:

PURCHASE, REDEMPTION OR SALE OF LISTED SECURITIES OF THE COMPANY

Neither the Company, nor any of its subsidiaries purchased, redeemed or sold any of the listed securities of the Company during the period under review.

COMPETING BUSINESS AND CONFLICTS OF INTEREST

During the six months ended 30 June 2009, Mr. Chan Wing Him Kenny, an executive Director and management shareholder of the Company, is a director and co-chairman of Petromin whilst Dr. Arthur Ross Gorrell, an executive Director, is a director, the president, co-chairman and chief executive officer of Petromin. As at 30 June 2009, Mr. Chan Wing Him Kenny directly and indirectly held 1,615,177 warrants entitling him to subscribe for 1,615,177 common shares in Petromin and Dr. Arthur Ross Gorrell held 2,243,193 common shares and 1,021,000 stock options entitling him to subscribe for 1,021,000 common shares in Petromin.

Petromin is engaged in the business of acquisition and development of oil and gas properties. The Board considers that the business of Petromin competes, or is likely to compete, directly or indirectly, with the Group's business.

Save as disclosed above, none of the Directors or the management shareholders (as defined in the GEM Listing Rules) of the Company or any of their respective associates had any interest in a business, which competes or may compete, either directly or indirectly, with the business of the Group.

DIRECTORS' SECURITIES TRANSACTIONS

On 23 March 2009, the Board adopted a revised code of conduct regarding securities transactions by the Directors ("**Model Code**") on terms no less exacting than the required standard of dealings as set out in Rules 5.48 to 5.67 of the GEM Listing Rules. Having made specific enquiry with all Directors, the Directors have complied with the Model Code throughout the six months ended 30 June 2009.

CODE ON CORPORATE GOVERNANCE PRACTICES

In the opinion of the Board, save as disclosed below, the Company has complied with the code provisions of the Code on Corporate Governance Practices ("CG Code") set out in Appendix 15 to the GEM Listing Rules, throughout the six months ended 30 June 2009:

- 1. Under Code Provision A.2.1 of the CG Code, the role of chairman and chief executive officer ("CEO") should be separate and should not be performed by the same individual. Mr. Chan Wing Him Kenny, an executive Director, serves both roles as the chairman of the Board and the CEO of the Group since May 2008. The Board is of the view that this has not compromised accountability and independent decision-making for the following reasons:
 - The independent non-executive Directors ("**INEDs**") form the majority of the Board.
 - The Audit Committee of the Company ("Audit Committee") composed exclusively of INEDs.
 - The INEDs have free and direct access to the Company's external auditors and independent professional advice when considered necessary.
- 2. Under Code Provision E.1.3 of the CG Code, listed issuers are recommended to give at least 20 clear business days of notice to shareholders for annual general meetings. The Company, in accordance with the requirements under its articles of association of the Company, gave at least 21 days' notice to its shareholders before the convening of the annual general meeting held on 20 April 2009 because the senior management and the auditor required more time to obtain a technical assessment report and a valuation report for assessment of fair value of the PSC held by TWE as at 31 December 2008. The Board is of the view that this has not caused any prejudice to the shareholders of the Company.

AUDIT COMMITTEE

The Audit Committee comprises three INEDs, namely, Mr. David Tsoi (chairman of the Audit Committee), Mr. Lo Chi Kit and Mr. Tam Hang Chuen.

The primary duties of the Audit Committee are to review and supervise the financial reporting process and internal control systems of the Group. The Group's unaudited results for the six months ended 30 June 2009 have been reviewed by the Audit Committee, which was of the opinion that the preparation of such financial statements complied with the applicable accounting standards and requirements of the Stock Exchange and legal requirements, and that adequate disclosures have been made.
