Third Quarterly Report

2010/2011

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors of Tungda Innovative Lighting Holdings Limited (the “Company”) collectively and individually accept responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM of the Stock Exchange (“GEM Listing Rules”) for the purpose of giving information with regard to the Company. The directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: (1) the information contained in this report is accurate and complete in all material respects and not misleading; (2) there are no other matters the omission of which would make any statement in this report misleading; and (3) all opinions expressed in this report have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

FINANCIAL REVIEW

For the nine months ended 31st December, 2010 ("Period"), the Group's turnover was approximately HK\$10.58 million, representing an increase of approximately 18.48% as compared to approximately HK\$8.93 million of last corresponding period.

The gross profit for the Period was about HK\$1.92 million compared to gross loss about HK\$1.25 million for the same period in 2009. The change was attributable to the increase in sales of house brand products. The gross loss in prior corresponding period was attributable to the material decrease in sales of house brand products which resulted in corresponding decrease in production whilst the under-utilised fixed direct production overhead did not decrease and was included and reflected in cost of sales.

The major component of other income approximately HK\$1.06 million was interest income for the Period as compared to approximately HK\$1.07 million for the same period in 2009.

The selling and distribution costs for the Period primarily comprised of salaries.

The administrative expenses comprised primarily of staff remuneration, entertainment, rental expenses, research and development expenses and general administrative expenses. The administrative expenses increased to approximately HK\$5.49 million for the Period as compared to approximately HK\$5.02 million for the corresponding period in 2009.

As a result of the factors discussed above, the loss attributable to the equity holders for the nine months ended 31st December, 2010 was approximately HK\$2.91 million as compared to the loss approximately HK\$5.57 million for the same period in 2009.
