## CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET ("GEM") OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM. The principal means of information dissemination on GEM is publication on the Internet website operated by the Stock Exchange. Listed companies are not generally required to issue paid announcements in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to-date information on GEM listed issuers.

# Chairman's Statement

2011 was the first year of the "Twelfth Five-Year Plan", witnessing the most complex and volatile economic environment both at home and abroad. The United States of America was plagued with sluggish economic growth, while the debt crisis in Eurozone continued to get worse. Though maintaining a good momentum of economic growth, China faced an increasing number of uncertainties. In an environment of both opportunities and challenges and with dedicated efforts of our staff, the Company maintained a solid growth in overall operating results. In a market environment which is well-supported by policies of the "Twelfth Five-Year Plan" and boosted by domestic economy, the Group is very confident of future business developments.

On the back of our increasingly mature business operations, the Group adjusted our business structure in an effective and timely manner in response to market changes during the reporting period. Meanwhile, the Group optimized resource allocation among our major business segments, so as to guarantee smooth product supply services and sufficient available funds. The Group recorded significant growth both in turnover and profit after tax during the period, laying a solid foundation for the development of the Group in the year ahead. In the coming year, the Group will actively develop the road and bridge construction business to leverage on the opportunities brought forth by the "Twelfth Five-Year Plan" while continue to capture opportunities of China's vigorous infrastructure development and consolidate its three core businesses, i.e. the road and bridge construction, fuel oil trading and asphalt trading businesses. Therefore, the year 2012 will be a year full of opportunities to the Group.

## **Results of the Year**

During the reporting period, the Group's profit after tax increased by 11.7% over last year to approximately RMB89,481,000 (2010: approximately RMB80,077,000). The steady rise in profit is mainly attributable to a year-on-year increase of 30.1% in turnover during the reporting period. The fuel oil trading business, being one of the three major business segments of the Group, recorded a significant growth in turnover, accounting for more than half of the Group's turnover in 2011 (approximately 57.0%) and thus became one of the Group's major sources of revenue. Profit attributable to shareholders of the Company increased by 7.1% over last year to approximately RMB71,722,000 (2010: RMB66,972,000). This positive data of continuous growth reflects the Group's overall performance in business operations in 2011, bringing a good foundation for the development of the Group in the year ahead.

## Business overview and major factors affecting the profit

During the reporting period, in spite of the continuing tight monetary policy in China, with our effective management, extensive experiences, advanced technology and equipments in construction and leveraging on our overall strength and resource advantage, the Company made steady progress in the construction of all road and bridge construction projects on hand while actively participated in market competition, and succeeded in bidding for a number of large road or bridge construction projects. During the reporting period, the Group achieved stable growth in the road and bridge construction business, which recorded an income of approximately RMB920,354,000, representing an increase of 21.3% over last year.

The fuel oil trading business recorded a significant growth in 2011. The Group implemented a policy for lower margins but quick turnover for the business and therefore has successfully developed many quality customers of that business and increased the Group's market competitiveness, which drove the increase in the Group's overall profits. During the reporting period, the Group's fuel oil sales volume grew by 88.8% over last year and its turnover increased by 132.3% year on year to approximately RMB1,837,160,000. All these have proved that, in face of a complex and volatile market environment, the quality business portfolio and timely-adjusted sales strategy adopted by the Company as well as the strategic adjustment made by the Group from time to time were successful and effective. During the reporting period, due to the tightening of monetary policy, the asphalt business declined. Turnover of the Group's asphalt trading business for the year ended 31 December 2011 amounted to approximately RMB403,412,000, representing a decrease of approximately 53.3% from 2010. Another reason for the decline in the business over last year was good sales performance of the asphalt trading business in 2010 driven by the Shanghai World Expo, while it returned to normal level in 2011 since no such similar large project was held in the areas where we operated. Taking this into consideration, we believed that the operation of the business was in good condition with the gross margin of the business at 7.4%.

As for the logistics business, the Company successfully secured several major customers for our transportation and storage businesses in 2011. In addition, the Company further improved the operation management of the logistics business. As a result, the logistics business brought greater contribution to the Group over last year. The turnover of the logistics business recorded a slight decline of 3.1% as compared with the same period of last year, but since the cost of sales decreased by approximately 12.4% over last year, the logistics business achieved a gross profit of approximately RMB11,060,000, representing an increase of approximately 83.2% over last year.

#### Prospect

Driven by the State's Twelfth Five-Year Plan, it is expected that the road and bridge construction business will achieve stable growth. As of 31 December 2011, the construction contracts of the Group signed but not yet recognized as revenue amounted to approximately RMB700 million, most of which will be completed within the next 15 months. With the commencement of construction for projects such as Shanghai Disneyland Park and the coastal development projects in Northern Jiangsu province, we are confident to win the bidding of more projects. The Group has confidence in achieving good development in road and bridge construction business in the coming year.

#### Chairman's Statement <<

The fuel oil trading business has reached a certain scale and has secured a herd of mature major customers. With the gradual enhancement of bargaining power and continuous expansion of business scale, we believe that the business will maintain sustainable growth. Therefore, the Company will continue to actively explore markets in Shanghai and the neighboring provinces and cities to constantly expand our customer base and improve our market competitiveness as well as to explore and achieve additional potential market shares, so as to be better positioned for the Group's future developments.

Driven by the State's Twelfth Five-Year Plan, it is expected that the domestic demand for asphalt will rise continuously on the increase in infrastructure projects. Also with the launch of the Shanghai Disneyland project in the future, the Group therefore believes that the asphalt trading business will maintain steady growth. Meanwhile, leveraging on the existing scale of business, the Company will also continue to expand its customer base and enhance its market competitiveness to endeavour to increase the business's contribution of profit in the Company. For the logistic businesses segment, the Group will continue to improve service quality so as to satisfy and ensure the development of fuel oil and asphalt trading business, hence optimizing enterprise's resources, attracting more quality customers, enhancing the Group's image and position in the industry and promoting the Group's overall operating performance.

## **Appreciation**

Finally, I wish to express my gratitude to the Board members, the management and staff of the Group for their hard work and dedication during the year, and to the shareholders, suppliers and the customers for their continuous support for the Group.

Qian Wenhua Chairman

## **Business Review**

In 2011, with the central government's tightening measures, the Group adjusted business strategies and optimized resource allocation in a timely manner in response to market changes, enabling the Group's three major business segments to achieve stable development and the turnover of the Group to record an encouraging growth during the reporting period. During the period, the Company proceeded steadily with the construction of various road and bridge projects, meanwhile the Company also actively participated in market competition and won the bidding of several large road and bridge projects. The road and bridge construction business of the Group grew steadily and recorded an income of approximately RMB920,354,000 during the reporting period, representing an increase of approximately 21.3% over last year. During the period, the fuel oil trading business grew rapidly. With broader customer base and enhanced competitive edge, the business became the growth engine for the Group which drove the overall earning of the Group. The turnover and sales volume of the business increased by approximately 132.3% and approximately 88.8% over last year, respectively. As for the asphalt trading business, mainly due to the tight monetary policy, this business declined to certain extent. Another reason for the decline in the business over last year was the good sales performance of the asphalt trading business in 2010 driven by the Shanghai World Expo, while it returned to normal level in 2011 since no such similar large project was held in the areas where we operated. As for the logistics business, the Company successfully secured several major customers for our transportation and storage businesses. In addition, the Company further improved the operation management of the logistics business. As a result, the logistics business brought greater contribution to the Group over last year. For the twelve months ended 31 December 2011, the turnover of the Group amounted to approximately RMB3,220,685,000, representing an increase of approximately 30.1% over last year.

SHANGHAI TONVA PETROCHEMICAL CO., LTD. >> Annual Report 2011

#### **Road and Bridge Construction Business**

For the year ended 31 December 2011, turnover for the Group's road and bridge construction business was approximately RMB920,354,000 (2010: approximately RMB758,875,000), up by approximately 21.3% over last year and accounting for approximately 28.6% of the Group's total turnover. Cost of road and bridge construction business was approximately RMB828,736,000 (2010: approximately RMB671,333,000) in 2011, up by approximately 23.4% over that in the previous year.

In 2011, gross profit for the Group's road and bridge construction business increased to a certain extent to approximately RMB91,618,000 (2010: approximately RMB87,542,000) and gross margin was approximately 10.0% (2010: approximately 11.5%).

Despite the monetary austerity measures by the PRC government to contain inflation, the road and bridge construction business of the Group remained unaffected and still maintained good development momentum thanks to optimization of resource allocation by the Group. Related construction projects were progressing smoothly and the amount receivables for construction were duly collected.

### **Fuel Oil Trading Business**

The Yangtze River Delta region, where the Group operates, is one of the major fuel oil consumption areas in the PRC. During the year, apart from the operations for our traditional power plants and glass factory customer groups, the Group introduced the marine fuel oil business which expanded the Group's fuel oil customer base and increased the Group's competitiveness in the fuel oil market. Currently, the storage network locations of fuel oil are mainly in Shanghai, with a total storage capacity of 10,000 tons.

For the year ended 31 December 2011, turnover for fuel oil trading business was approximately RMB1,837,160,000 (2010: approximately RMB790,945,000), accounting for approximately 57.0% of the Group's total turnover. The Group's cost of sales of fuel oil was approximately RMB1,777,569,000 (2010: approximately RMB770,018,000), increased by approximately 130.8% over last year, accounting for approximately 58.7% of the Group's total cost of sales.

During the year, sales volume of fuel oil was approximately 430,000 tons, representing an increase of 88.8% over 2010. For the year ended 31 December 2011, the Group's gross profit from the fuel oil business was approximately RMB59,591,000 (2010: approximately RMB20,927,000), whereas the gross margin increased from 2.6% last year to approximately 3.2%.

The significant increase in fuel oil trading business was mainly attributable to the short turnover cycle of trading capital required for the business, high capital utilization rate and several new major customers secured by the Group during this year, all of which contributed largely to the sales volume of the Group.

## Asphalt Trading Business

The Group is engaged in one-stop asphalt sales services. After procuring asphalt both domestically and from overseas, the Group distributes the asphalt to ultimate users through its distribution network.

For the year ended 31 December 2011, turnover of the Group's asphalt trading business was approximately RMB403,412,000 (2010: approximately RMB863,551,000), representing a decrease of approximately 53.3% over the previous year and accounting for approximately 12.5% of the Group's total turnover.

For the year ended 31 December 2011, the Group's cost of sales of asphalt was approximately RMB373,720,000 (2010: approximately RMB795,295,000), representing a year-on-year decrease of approximately 53.0%.

For the year ended 31 December 2011, gross profit of the Group's asphalt trading business decreased by approximately 56.5% to approximately RMB29,692,000 as compared to the corresponding period last year. The gross margin was approximately 7.4%, similar with 7.9% in 2010.

The decrease of income and gross profit from the asphalt trading business during the period was mainly attributable to a rapid surge in demand for asphalt in Shanghai in 2010, resulting from the increase of road construction projects due to the Shanghai World Expo. While in this year, with an aim to control inflation, the government implemented monetary austerity measures, which resulted in a shortage of funds for certain asphalt users, delayed the commencement of road construction projects and subsequently pushed down the demand for asphalt.

## **Logistics Service Business**

The Group has actively developed its logistics service business, which caters mainly transport and warehouse service for fuel oil and asphalt for both the Group and external customers. By the end of 2010, the Group has set up 8 storage network locating mainly in Shanghai, Jiangsu Province (Taizhou and Changzhou), Anhui Province (Hefei and Anqing), Nanchang in Jiangxi Province, Wuhan in Hubei Province and Zhengzhou in Henan Province, with a total storage capacity of 160,000 tons. Moreover, the Group has 1 ocean vessel and 4 river carriers and 27 delivery vehicles, with a total loading capacity of 8,000 tons.

For the year ended 31 December 2011, the Group's turnover for logistics services was approximately RMB59,759,000 (2010: approximately RMB61,653,000), representing a slight decrease of approximately 3.1% over last year and accounting for approximately 1.9% of the Group's total turnover. Cost of sales for logistics services in 2011 was approximately RMB48,698,000 (2010: approximately RMB55,614,000), representing a decrease of approximately 12.4% over the previous year.

For the year ended 31 December 2011, gross profit of the Group's logistics service business was approximately RMB11,061,000 (2010: approximately RMB6,039,000) and gross margin was approximately 18.5%, as compared to approximately 9.8% in the same period of last year.

## **Profit for the Year**

For the year ended 31 December 2011, the Group recorded profit attributable to owners of the Company for the year of approximately RMB71,722,000 (2010: approximately RMB66,972,000), representing an increase of approximately 7.1% over last year.

## **Other Income and Gains**

Other income and gains increased from approximately RMB27,177,000 for the year ended 31 December 2010 to approximately RMB37,714,000 for the year ended 2011. The increase in the other income and gains was mainly due to the interest income of approximately RMB10,183,000 (2010: Nil) for a guaranteed deposit from customer in the road and bridge construction segment in the amount of RMB84,864,000 (2010: Nil).

## **Administrative Expenses**

For the year ended 31 December 2011, the administrative expenses increased by approximately 50.2% to The approximately RMB93,394,000. increase in administrative expenses was mainly because the Group has made approximately RMB18,882,000 discount provision for balances of trade receivables on road and bridge construction business segment according to the accounting standards. It is due to the increase in the income in road and bridge construction business and the upfloat of discount rate this year affected by the PRC market's benchmark lending rate. There was reversal of such provision of approximately RMB3,967,000 last year.

## **Distribution Costs**

For the year ended 31 December 2011, the distribution costs were approximately RMB13,611,000, which decreased by approximately 21.1% as compared with the previous year. The decrease in distribution costs was mainly because the decrease in sales of asphalt which reduced the relative distribution costs arising thereof for the year.

## **Finance Costs**

The finance costs for the year were approximately RMB29,009,000, representing a year-on-year increase of approximately 3.3%. The increase in finance costs was mainly due to higher overall gearing ratio resulting from the increase in funding requirements arising from the development of fuel oil business and road and bridge construction projects.

## **Debt to Asset Ratio**

The debt to asset ratio as at 31 December 2011 was approximately 71.9% (2010: approximately 66.3%) which was calculated as total liabilities divided by total assets.

## **Foreign Currency Risk**

The Group operates mainly in the PRC, but sources its products both domestically and from overseas. It is exposed to various foreign currency exposures, primarily with respect to United States Dollars (USD) and Hong Kong Dollars (HKD). Foreign currency risk arises from future commercial transactions, recognized assets and liabilities that are denominated in a currency that is not the entity's functional currency. The Group does not use financial derivative instruments to hedge its currency risk, but closely monitor the fluctuation of the rates of these foreign currencies against Renminbi.

TO THE SHAREHOLDERS OF SHANGHAI TONVA PETROCHEMICAL CO., LTD. (incorporated in the People's Republic of China with limited liability)

We have audited the consolidated financial statements of Shanghai Tonva Petrochemical Co., Ltd. (the "Company") and its subsidiaries (together the "Group") set out on pages 29 to 94, which comprise the consolidated and company statements of financial position as at 31 December 2011, and the consolidated statement of comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended, and a summary of significant accounting policies and other explanatory information.

## Directors' responsibility for the consolidated financial statements

The directors of the Company are responsible for the preparation of consolidated financial statements that give a true and fair view in accordance with Hong Kong Financial Reporting Standards issued by the Hong Kong Institute of Certified Public Accountants and the Hong Kong Companies Ordinance, and for such internal control as the directors determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

## Auditor's responsibility

Our responsibility is to express an opinion on these consolidated financial statements based on our audit. This report is made solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

We conducted our audit in accordance with Hong Kong Standards on Auditing issued by the Hong Kong Institute of Certified Public Accountants. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

## **Independent Auditor's Report**

**TO THE SHAREHOLDERS OF SHANGHAI TONVA PETROCHEMICAL CO., LTD.** (incorporated in the People's Republic of China with limited liability)

## Auditor's responsibility (continued)

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and true and fair presentation of the consolidated financial statements that give a true and fair view in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by the directors, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

## **OPINION**

In our opinion, the consolidated financial statements give a true and fair view of the state of affairs of the Company and of the Group as at 31 December 2011 and of the Group's profit and cash flows for the year then ended in accordance with Hong Kong Financial Reporting Standards and have been properly prepared in accordance with the disclosure requirements of the Hong Kong Companies Ordinance.

### 1. GENERAL

Shanghai Tonva Petrochemical Co., Ltd. (the "Company") and its subsidiaries (together as the "Group") are principally engaged in road and bridge construction, trading of fuel oil, trading of asphalt and provision of logistic services in the People's Republic of China (the "PRC"). For the road and bridge construction business, the Group has construction contract tier-one qualification and municipal utility contract tier-one qualification. The Group offers "one-stop" solutions to customers ranging from procurement, storage and delivery of fuel oil and asphalt. The Group's fuel oil and asphalt trading business geographically covers the downstream region of the Yangtze River and some inland provinces. Its logistics services cover vehicle transportation, waterway transportation, inland water transportation and the storage of fuel oil and asphalt products.

The Company is a joint stock limited company incorporated in the PRC. The address of the Company's registered office is 706 Renhe Building, No. 2056 Pudong Road, Pudong New Area, Shanghai, the PRC. Its principal place of business is located at Room 2201, BM Tower, No. 218 Wu Song Road, Shanghai, the PRC.

The H shares of the Company are listed on The Growth Enterprise Market ("GEM") of The Stock Exchange of Hong Kong Limited.

## 2. ADOPTION OF HONG KONG FINANCIAL REPORTING STANDARDS ("HKFRSs")

#### (a) Adoption of new/revised HKFRSs – effective 1 January 2011

HKFRSs (Amendments)	Improvements to HKFRSs 2010
Amendments to HKAS 32	Classification of Rights Issues
Amendments to HK(IFRIC)	Prepayments of a Minimum Funding Requirement
– Interpretation 14	
HK(IFRIC) – Interpretation 19	Extinguishing Financial Liabilities with Equity Instruments
HKAS 24 (Revised)	Related Party Disclosures

Except as explained below, the adoption of these new/revised standards and interpretations has no material impact on the Group's financial statements.

#### HKFRS 7 (Amendments) – Financial Instruments: Disclosures

As part of the Improvements to HKFRSs issued in 2010, HKFRS 7 has been amended to enhance the interaction between quantitative and qualitative disclosures. If the carrying amount of a financial asset best represents the maximum exposure to credit risk, the standard does not require a positive statement to this effect in the financial statements. This amended disclosure requirement has been applied retrospectively. The carrying amount of the Group's trade receivables represents the Group's maximum exposure to credit risk in respect of these financial assets as at 31 December 2011 and 2010. The prior year financial statements `included a positive statement to this effect which is removed in the 2011 financial statements following the amendments. The adoption of the amendments has no impact on the Group's reported profit or loss, total comprehensive income or equity for any period presented.

For the year ended 31 December 2011

## 2. ADOPTION OF HONG KONG FINANCIAL REPORTING STANDARDS ("HKFRSs") (continued)

#### (a) Adoption of new/revised HKFRSs – effective 1 January 2011 (continued)

HKAS 24 (Revised) – Related Party Disclosures

HKAS 24 (Revised) amends the definition of related party and clarifies its meaning. This may result in changes to those parties who are identified as being related parties of the reporting entity. The Group has reassessed the identification of its related parties in accordance with the revised definition and concluded that there is no change on the Group's related party disclosures. The adoption of HKAS 24 (Revised) has no impact on the Group's reported profit or loss, total comprehensive income or equity for any period presented.

HKAS 24 (Revised) also introduces simplified disclosure requirements applicable to related party transactions where the Group and the counterparty are under the common control, joint control or significant influence of a government, government agency or similar body. These new disclosures are not relevant to the Group because the Group is not a government related entity.

#### (b) New/revised HKFRSs that have been issued but are not yet effective

The following new/revised HKFRSs, potentially relevant to the Group's financial statements, have been issued, but are not yet effective and have not been early adopted by the Group.

- Effective for annual periods beginning on or after 1 July 2012
- Effective for annual periods beginning on or after 1 January 2013
- Effective for annual periods beginning on or after 1 January 2013 and 2014, as appropriate
- Effective for annual periods beginning on or after 1 January 2015 5

For the year ended 31 December 2011

#### 2. ADOPTION OF HONG KONG FINANCIAL REPORTING STANDARDS ("HKFRSs")

(continued)

#### (b) New/revised HKFRSs that have been issued but are not yet effective (continued)

Amendments to HKAS 1 (Revised) – Presentation of Items of Other Comprehensive Income

The amendments to HKAS 1 (Revised) require the Group to separate items presented in other comprehensive income into those that may be reclassified to profit and loss in the future (e.g. revaluations of available-forsale financial assets) and those that may not (e.g. revaluations of property, plant and equipment). Tax on items of other comprehensive income is allocated and disclosed on the same basis. The amendments will be applied retrospectively.

#### HKFRS 9 – Financial Instruments

Under HKFRS 9, financial assets are classified into financial assets measured at fair value or at amortised cost depending on the entity's business model for managing the financial assets and the contractual cash flow characteristics of the financial assets. Fair value gains or losses will be recognised in profit or loss except for those non-trade equity investments, which the entity will have a choice to recognise the gains and losses in other comprehensive income. HKFRS 9 carries forward the recognition, classification and measurement requirements for financial liabilities from HKAS 39, except for financial liabilities that are designated at fair value through profit or loss, where the amount of change in fair value attributable to change in credit risk of that liability is recognised in other comprehensive income unless that would create or enlarge an accounting mismatch. In addition, HKFRS 9 retains the requirements in HKAS 39 for derecognition of financial assets and financial liabilities.

#### HKFRS 10 – Consolidated Financial Statements

HKFRS 10 introduces a single control model for consolidation of all investee entities. An investor has control when it has power over the investee (whether or not that power is used in practice), exposure or rights to variable returns from the investee and the ability to use the power over the investee to affect those returns. HKFRS 10 contains extensive guidance on the assessment of control. For example, the standard introduces the concept of "de facto" control where an investor can control an investee while holding less than 50% of the investee's voting rights in circumstances where its voting interest is of sufficiently dominant size relative to the size and dispersion of those of other individual shareholders to give it power over the investee. Potential voting rights are considered in the analysis of control only when these are substantive, i.e. the holder has the practical ability to exercise them. The standard explicitly requires an assessment of whether an investor with decision making rights is acting as principal or agent and also whether other parties with decision making rights are acting as agents of the investor. An agent is engaged to act on behalf of and for the benefit of another party and therefore does not control the investee when it exercises its decision making authority. The implementation of HKFRS 10 may result in changes in those entities which are regarded as being controlled by the Group and are therefore consolidated in the financial statements. The accounting requirements in the existing HKAS 27 on other consolidation related matters are carried forward unchanged. HKFRS 10 is applied retrospectively subject to certain transitional provisions.

For the year ended 31 December 2011

## 2. ADOPTION OF HONG KONG FINANCIAL REPORTING STANDARDS ("HKFRSs") (continued)

#### (b) New/revised HKFRSs that have been issued but are not yet effective (continued)

HKFRS 12 – Disclosure of Interests in Other Entities

HKFRS 12 integrates and makes consistent the disclosures requirements about interests in subsidiaries, associates and joint arrangements. It also introduces new disclosure requirements, including those related to unconsolidated structured entities. The general objective of the standard is to enable users of financial statements to evaluate the nature and risks of a reporting entity's interests in other entities and the effects of those interests on the reporting entity's financial statements.

#### HKFRS 13 – Fair Value Measurement

HKFRS 13 provides a single source of guidance on how to measure fair value when it is required or permitted by other standards. The standard applies to both financial and non-financial items measured at fair value and introduces a fair value measurement hierarchy. The definitions of the three levels in this measurement hierarchy are generally consistent with HKFRS 7 "Financial Instruments: Disclosures". HKFRS 13 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (i.e. an exit price). The standard removes the requirement to use bid and ask prices for financial assets and liabilities quoted in an active market. Rather the price within the bidask spread that is most representative of fair value in the circumstances should be used. It also contains extensive disclosure requirements to allow users of the financial statements to assess the methods and inputs used in measuring fair values and the effects of fair value measurements on the financial statements. HKFRS 13 can be adopted early and is applied prospectively.

#### Amendments to HKAS 32 and HKFRS 7 – Offsetting Financial Assets and Financial Liabilities

The amendments to HKAS 32 clarify existing application issues relating to the offsetting requirements. Specifically, the amendments clarify the meaning of "currently has a legally enforceable right of set-off" and "simultaneous realisation and settlement". The amendments to HKFRS 7 require entities to disclose information about rights of offset and related arrangements (such as collateral posting requirements) for financial instruments under an enforceable master netting agreement or similar arrangement. The amended offsetting disclosures are required for annual periods beginning on or after 1 January 2013 and interim periods within those annual periods. The disclosures should also be provided retrospectively for all comparative periods. However, the amendments to HKAS 32 are not effective until annual periods beginning on or after 1 January 2014, with retrospective application required.

The Group is in the process of making an assessment of the potential impact of these new/revised HKFRSs and the directors so far concluded that the application of these new/revised HKFRSs will have no material impact on the Group's financial statements.

For the year ended 31 December 2011

### 3. BASIS OF PREPARATION

#### (a) Statement of compliance

The consolidated financial statements have been prepared in accordance with all applicable HKFRSs, Hong Kong Accounting Standards ("HKASs") and Interpretations (hereinafter collectively referred to as the "HKFRSs") issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and the disclosure requirements of the Hong Kong Companies Ordinance. In addition, the consolidated financial statements include applicable disclosures required by the Rules Governing the Listing of Securities on the GEM of The Stock Exchange of Hong Kong Limited.

#### (b) Basis of measurement

The consolidated financial statements have been prepared under the historical cost basis as explained in the accounting policies set out below, except for non-current assets classified as held for sale which are measured at lower of their carrying amount immediately prior to being classified as held for sale in accordance with the Group's accounting policy and fair value less costs to sell.

#### (c) Functional and presentation currency

The financial statements are presented in Renminbi ("RMB"), which is the same as the functional currency of the Company.

### 4. SIGNIFICANT ACCOUNTING POLICIES

#### (a) Business combination and basis of consolidation

The consolidated financial statements comprise the financial statements of the Company and its subsidiaries. Inter-company transactions and balances between group companies together with unrealised profits are eliminated in full in preparing the consolidated financial statements. Unrealised losses are also eliminated unless the transaction provides evidence of impairment on the asset transferred, in which case the loss is recognised in profit or loss.

The results of subsidiaries acquired or disposed of during the year are included in the consolidated statement of comprehensive income from the effective dates of acquisition or up to the effective dates of disposal, as appropriate. Where necessary, adjustments are made to the financial statements of subsidiaries to bring their accounting policies into line with those used by other members of the Group.

Acquisition of subsidiaries or businesses is accounted for using the acquisition method. The cost of an acquisition is measured at the aggregate of the acquisition-date fair value of assets transferred, liabilities incurred and equity interests issued by the Group, as the acquirer. The identifiable assets acquired and liabilities assumed are principally measured at acquisition-date fair value. The Group's previously held equity interest in the acquiree is re-measured at acquisition-date fair value and the resulting gains or losses are recognised in profit or loss. The Group may elect, on a transaction-by-transaction basis, to measure the non-controlling interests that represent present ownership interests in the subsidiary either at fair value or at the proportionate share of the acquiree's identifiable net assets. All other non-controlling interests are measured at fair value unless another measurement basis is required by HKFRSs. Acquisition-related costs incurred are expensed unless they are incurred in issuing equity instruments in which case the costs are deducted from equity.

For the year ended 31 December 2011

## 4. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### (a) Business combination and basis of consolidation (continued)

Any contingent consideration to be transferred by the acquirer is recognised at acquisition-date fair value. Subsequent adjustments to consideration are recognised against goodwill only to the extent that they arise from new information obtained within the measurement period (a maximum of 12 months from the acquisition date) about the fair value at the acquisition date. All other subsequent adjustments to contingent consideration classified as an asset or a liability are recognised in profit or loss.

Contingent consideration balances arising from business combinations whose acquisition dates preceded 1 January 2010 (i.e. the date the Group first applied HKFRS 3 (2008)) have been accounted for in accordance with the transition requirements in the standard. Such balances are not adjusted upon first application of the standard. Subsequent revisions to estimates of such consideration are treated as adjustments to the cost of these business combinations and are recognised as part of goodwill.

Changes in the Group's interests in subsidiaries that do not result in a loss of control are accounted for as equity transactions. The carrying amounts of the Group's interest and the non-controlling interest are adjusted to reflect the changes in their relative interests in the subsidiaries. Any difference between the amount by which the non-controlling interest is adjusted and the fair value of the consideration paid or received is recognised directly in equity and attributed to owners of the Company.

When the Group loses control of a subsidiary, the profit or loss on disposal is calculated as the difference between (i) the aggregate of the fair value of the consideration received and the fair value of any retained interest and (ii) the previous carrying amount of the assets (including goodwill), and liabilities of the subsidiary and any noncontrolling interest. Amounts previously recognised in other comprehensive income in relation to the subsidiary are accounted for in the same manner as would be required if the relevant assets or liabilities were disposed of.

Subsequent to acquisition, the carrying amount of non-controlling interests that represent present ownership interests in the subsidiary is the amount of those interests at initial recognition plus such non-controlling interest's share of subsequent changes in equity. Total comprehensive income is attributed to such non-controlling interests even if this results in those non-controlling interests having a deficit balance.

#### (b) Subsidiaries

A subsidiary is an entity over which the Company is able to exercise control. Control is achieved where the Company, directly or indirectly, has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities. In assessing control, potential voting rights that presently are exercisable are taken into account.

In the Company's statement of financial position, investments in subsidiaries are stated at cost less impairment loss, if any. The results of subsidiaries are accounted for by the Company on the basis of dividend received and receivable.

For the year ended 31 December 2011

### 4. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### (c) Associates

An associate is an entity over which the Group has significant influence and that is neither a subsidiary nor a joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but not control or joint control over those policies. Associates are accounted for using the equity method whereby they are initially recognised at cost and thereafter, their carrying amount are adjusted for the Group's share of the post-acquisition change in the associates' net assets except that losses in excess of the Group's interest in the associate are not recognised unless there is an obligation to make good those losses.

Profits and losses arising on transactions between the Group and its associates are recognised only to the extent of unrelated investors' interests in the associate. The investor's share in the associate's profits and losses resulting from these transactions is eliminated against the carrying value of the associate.

Any premium paid for an associate above the fair value of the Group's share of the identifiable assets, liabilities and contingent liabilities acquired is capitalised and included in the carrying amount of the associate and the entire carrying amount of the investment is subject to impairment test, by comparing the carrying amount with its recoverable amount, which is higher of value in use and fair value less costs to sell.

In the Company's statement of financial position, investments in associates are carried at cost less impairment losses, if any. The results of associates are accounted for by the Company on the basis of dividends received and receivable during the year.

#### (d) Goodwill

Goodwill is initially recognised at cost being the excess of the aggregate of consideration transferred and the amount recognised for non-controlling interests over the fair value of identifiable assets, liabilities and contingent liabilities acquired.

Where the fair value of identifiable assets, liabilities and contingent liabilities exceed the fair value of consideration paid, the excess is recognised in profit or loss on the acquisition date, after re-assessment.

Goodwill is measured at cost less impairment losses. For the purpose of impairment testing, goodwill arising from an acquisition is allocated to each of the relevant cash-generating units that are expected to benefit from the synergies of the acquisition. A cash-generating unit to which goodwill has been allocated is tested for impairment annually, and whenever there is an indication that the unit may be impaired.

For goodwill arising on an acquisition in a financial year, the cash-generating unit to which goodwill has been allocated is tested for impairment before the end of that financial year. When the recoverable amount of the cash-generating unit is less than the carrying amount of the unit, the impairment loss is allocated to reduce the carrying amount of any goodwill allocated to the unit first, and then to the other assets of the unit pro-rata on the basis of the carrying amount to each asset in the unit. Any impairment loss for goodwill is recognised in profit or loss and is not reversed in subsequent periods.

## **Notes to the Financial Statements**

For the year ended 31 December 2011

## 4. SIGNIFICANT ACCOUNTING POLICIES (continued)

## (e) Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and accumulated impairment losses.

The cost of property, plant and equipment includes its purchase price and the costs directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are recognised as an expense in profit or loss during the financial period in which they are incurred.

Property, plant and equipment are depreciated so as to write off their cost net of expected residual value over their estimated useful lives on a straight-line basis. The useful lives, residual value and depreciation method are reviewed, and adjusted if appropriate, at the end of each reporting period. The useful lives are as follows:

Buildings	20 to 30 years
Machinery	10 years
Storage facilities	12 to 20 years
Furniture, fixtures and testing equipment	5 to 10 years
Transportation facilities	2 to 20 years

Construction in progress is stated at cost less impairment losses. Cost comprises direct costs of construction as well as borrowing costs capitalised during the periods of construction and installation. Capitalisation of these costs ceases and the construction in progress is transferred to the appropriate class of property, plant and equipment when substantially all the activities necessary to prepare the assets for their intended use are completed. No depreciation is provided for in respect of construction in progress until it is completed and ready for its intended use.

An asset is written down immediately to its recoverable amount if its carrying amount is higher than the asset's estimated recoverable amount.

The gain or loss on disposal of an item of property, plant and equipment is the difference between the net sale proceeds and its carrying amount, and is recognised in profit or loss on disposal.

For the year ended 31 December 2011

### 4. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### (f) Payments for leasehold land held for own use under operating leases

Payments for leasehold land held for own use under operating leases represent up-front payments to acquire long-term interests in lessee-occupied properties. These payments are stated at cost less any impairment loss and are amortised over the period of the lease on a straight-line basis as an expense.

#### (g) Intangible assets

#### (i) Acquired intangible assets

Intangible assets acquired separately are initially recognised at cost. The cost of intangible assets acquired in a business combination is fair value at the date of acquisition. Subsequently, intangible assets with finite useful lives are carried at cost less accumulated amortisation and accumulated impairment losses. The amortisation expense is recognised in profit or loss and included in administrative expenses. Amortisation is provided on a straight-line basis over their useful lives as follows:

Customer contracts	Over the contract period
Construction licence	Indefinite
Computer software	5 years

Intangible assets with indefinite useful lives are carried at cost less any accumulated impairment losses.

#### (ii) Impairment

Intangible assets with indefinite useful lives and intangible assets not yet available for use are tested for impairment annually by comparing their carrying amounts with their recoverable amounts, irrespective of whether there is any indication that they may be impaired. If the recoverable amount of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognised as an expense immediately.

When an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years.

Intangible assets with finite lives are tested for impairment when there is an indication that an asset may be impaired (see the accounting policies in respect of impairment of other assets in note 4(r) below).

For the year ended 31 December 2011

## 4. SIGNIFICANT ACCOUNTING POLICIES (continued)

### (h) Leasing

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

### The Group as lessor

Rental income from operating leases is recognised in profit or loss on a straight-line basis over the term of the relevant lease. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised as an expense on the straight-line basis over the lease term.

### The Group as lessee

The total rentals payable under the operating leases are recognised in profit or loss on a straight-line basis over the lease term. Lease incentives received are recognised as an integrated part of the total rental expense, over the term of the lease.

The land and buildings elements of property leases are considered separately for the purposes of lease classification.

## (i) Financial instruments

### (i) Financial assets

The Group classifies its financial assets at initial recognition, depending on the purpose for which the asset was acquired. Financial assets at fair value through profit or loss are initially measured at fair value and all other financial assets are initially measured at fair value plus transaction costs that are directly attributable to the acquisition of the financial assets. Regular way purchases or sales of financial assets are recognised and derecognised on a trade date basis. A regular way purchase or sale is a purchase or sale of a financial asset under a contract whose terms require delivery of the asset within the time frame established generally by regulation or convention in the marketplace concerned.

### Loans and receivables

These assets are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They arise principally through the provision of goods and services to customers (trade debtors), and also incorporate other types of contractual monetary asset. Subsequent to initial recognition, they are carried at amortised cost using the effective interest method, less any identified impairment losses.

For the year ended 31 December 2011

### 4. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### (i) Financial instruments (continued)

(i) Financial assets (continued)

#### Available-for-sale financial assets

These assets are non-derivative financial assets that are designated as available-for-sale or are not included in other categories of financial assets. Subsequent to initial recognition, these assets are carried at fair value with changes in fair value recognised in other comprehensive income, except for impairment losses and foreign exchange gains and losses on monetary instruments, which are recognised in profit or loss.

For available-for-sale equity investments that do not have a quoted market price in an active market and whose fair value cannot be reliably measured and derivatives that are linked to and must be settled by delivery of such unquoted equity instruments, they are measured at cost less any identified impairment losses.

(ii) Impairment loss on financial assets

The Group assesses, at the end of each reporting period, whether there is any objective evidence that financial asset is impaired. Financial asset is impaired if there is objective evidence of impairment as a result of one or more events that has occurred after the initial recognition of the asset and that event has an impact on the estimated future cash flows of the financial asset that can be reliably estimated. Evidence of impairment may include:

- significant financial difficulty of the debtor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- granting concession to a debtor because of debtor's financial difficulty; or
- it becoming probable that the debtor will enter bankruptcy or other financial reorganisation.

For the year ended 31 December 2011

### 4. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### (i) Financial instruments (continued)

(ii) Impairment loss on financial assets (continued)

For loans and receivables

An impairment loss is recognised in profit or loss when there is objective evidence that the asset is impaired, and is measured as the difference between the asset's carrying amount and the present value of the estimated future cash flows discounted at the original effective interest rate. The carrying amount of financial asset is reduced through the use of an allowance account. When any part of financial asset is determined as uncollectible, it is written off against the allowance account for the relevant financial asset.

Impairment losses are reversed in subsequent periods when an increase in the asset's recoverable amount can be related objectively to an event occurring after the impairment was recognised, subject to a restriction that the carrying amount of the asset at the date the impairment is reversed does not exceed what the amortised cost would have been had the impairment not been recognised.

For available-for-sale financial assets

Where a decline in the fair value constitutes objective evidence of impairment, the amount of the loss is removed from equity and recognised in profit or loss.

For available-for-sale equity investment that is carried at cost, the amount of impairment loss is measured as the difference between the carrying amount of the asset and the present value of estimated future cash flows discounted at the current market rate of return for a similar financial asset. Such impairment loss shall not be reversed.

#### (iii) Financial liabilities

The Group classifies its financial liabilities, depending on the purpose for which the liabilities were incurred.

The Group's financial liabilities at amortised cost, including trade and other payables, borrowings and other monetary liabilities, are initially recognised at fair value, net of directly attributable transaction costs incurred, and are subsequently measured at amortised cost, using the effective interest method. The related interest expense is recognised in profit or loss.

Gains or losses are recognised in profit or loss when the liabilities are derecognised as well as through the amortisation process.

For the year ended 31 December 2011

### 4. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### (i) Financial instruments (continued)

(iv) Effective interest method

The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating interest income or interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts and payments through the expected life of the financial asset or liability, or where appropriate, a shorter period.

(v) Equity instruments

Equity instruments issued by the Company are recorded at the proceeds received, net of direct issue costs.

(vi) Financial guarantee contracts

A financial guarantee contract is a contract that requires the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument. A financial guarantee contract issued by the Group and not designated as at fair value through profit or loss is recognised initially at its fair value less transaction costs that are directly attributable to the issue of the financial guarantee contract. Subsequent to initial recognition, the Group measures the financial guarantee contact at the higher of: (i) the amount determined in accordance with HKAS 37 "Provisions, Contingent Liabilities and Contingent Assets"; and (ii) the amount initially recognised less, when appropriate, cumulative amortisation recognised in accordance with HKAS 18 "Revenue".

(vii) Derecognition

The Group derecognises a financial asset when the contractual rights to the future cash flows in relation to the financial asset expire or when the financial asset has been transferred and the transfer meets the criteria for derecognition in accordance with HKAS 39.

Financial liabilities are derecognised when the obligation specified in the relevant contract is discharged, cancelled or expires.

For the year ended 31 December 2011

### 4. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### (j) Non-current assets held for sale

Non-current assets are classified as held for sale when:

- they are available for immediate sale;
- management is committed to a plan to sell;
- it is unlikely that significant changes to the plan will be made or that the plan will be withdrawn;
- an active programme to locate a buyer has been initiated;
- the assets are being marketed at a reasonable price in relation to its fair value; and
- a sale is expected to complete within 12 months from the date of classification.

Non-current assets classified as held for sale are measured at the lower of:

- their carrying amount immediately prior to being classified as held for sale in accordance with the Group's accounting policy; and
- fair value less costs to sell.

Following their classification as held for sale, non-current assets are not depreciated.

#### (k) Capitalisation of borrowing costs

Borrowing costs attributable directly to the acquisition, construction or production of qualifying assets, which require a substantial period of time to be ready for their intended use or sale, are capitalised as part of the cost of those assets. Income earned on temporary investments of specific borrowings pending their expenditure on those assets is deducted from borrowing costs capitalised. All other borrowing costs are recognised in profit or loss in the period in which they are incurred.

Pursuant to the transitional provision of HKAS 23 (Revised) Borrowing Costs, group entities capitalise borrowing costs for all qualified assets where construction was commenced on or after 1 January 2009 and expense all borrowing costs relating to construction projects that commenced prior to 1 January 2009.

For the year ended 31 December 2011

### 4. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### (I) Inventories

The Group's inventories represent fuel oil and asphalt for resale, asphalt for construction and other construction materials. They are initially recognised at cost, and subsequently at the lower of cost and net realisable value. Cost comprises all costs of purchase, costs of conversion and other costs incurred in bringing the inventories to their present location and condition. Cost of fuel oil and asphalt for resale is calculated using the first-in first-out method, while the cost of asphalt for construction and other construction materials is calculated using the weighted average method. Net realisable value represents the estimated selling price in the ordinary course of business less the estimated costs necessary to make the sale.

#### (m) Construction contracts

Contract revenue comprises the agreed contract amount and appropriate amounts for variation orders, claims and incentive payments. Contract costs comprise direct materials, costs of subcontracting, direct labour and an appropriate portion of variable and fixed construction overheads.

When the outcome of a construction contract can be estimated reliably, revenue and contract costs associated with the construction contract are recognised as revenue and expenses respectively by reference to the stage of completion of the contract activity at the end of reporting period.

When the outcome of a construction contract cannot be estimated reliably, revenue is recognised only to the extent of contract costs incurred that will probably be recoverable, and contract costs are recognised as an expense in the period in which they are incurred.

When it is probable that total contract costs will exceed total contract revenue, the expected loss is recognised as an expense immediately.

Where progress billings exceed contract costs incurred to date plus recognised profits less recognised losses, the surplus is treated as "amounts due to customers for contract work".

Where contract costs incurred to date plus recognised profits less recognised losses exceed progress billings, the surplus is treated as "amounts due from customers for contract work".

#### (n) Government grants

Government grants are recognised when there is reasonable assurance that they will be received and that the Group will comply with the conditions attaching to them. Grants that compensate the Group for expenses incurred are recognised as revenue in profit or loss on a systematic basis in the same periods in which the expenses are incurred. Grants that compensate the Group for the cost of an asset are deducted from the carrying amount of the asset and consequently are effectively recognised in profit or loss over the useful life of the asset by way of reduced depreciation expense.

For the year ended 31 December 2011

## 4. SIGNIFICANT ACCOUNTING POLICIES (continued)

### (o) Revenue recognition

Revenue from individual construction contracts is recognised under the percentage of completion method, when the contract has progressed to a stage where the stage of completion and expected profit on the contract can be reliably determined and, depending on the nature of the contract, is measured mainly by reference to (a) the amount of work certified by site engineer; or (b) completion of physical proportion of the contract work. Variations in contract work, claims and incentive payments are included in contract revenue to the extent that they have been agreed with the customers and are capable of being reliably measured. Anticipated losses are fully provided on contracts when identified.

Revenue from sale of goods is recognised on the transfer of risks and rewards of ownership, which generally coincides with the time when the goods are delivered to customers and title has passed.

Revenue from rendering of fuel oil and asphalt transportation services is recognised upon the completion of services, which generally coincides with the date of receipt of goods by the receivers.

Revenue from fuel oil and asphalt storage services is recognised in the period the services are provided.

Revenue from agency services for fuel oil is recognised when the services are rendered.

Revenue from other services is recognised when the services are rendered and when it is probable that the economic benefits associated with the transaction will flow to the entity.

Rental income under operating leases of transportation and storage facilities is recognised on a straight-line basis over the lease term.

Interest income is recognised on a time-proportion basis using the effective interest method.

Dividend income is recognised when the shareholder's right to receive payment is established.

#### (p) Income taxes

Income taxes for the year comprise current tax and deferred tax.

Current tax is based on the profit or loss from ordinary activities adjusted for items that are non-assessable or disallowable for income tax purposes and is calculated using tax rates that have been enacted or substantively enacted at the end of reporting period.

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the corresponding amounts used for tax purposes. Except for goodwill and recognised assets and liabilities that affect neither accounting nor taxable profits, deferred tax liabilities are recognised for all temporary differences. Deferred tax assets are recognised to the extent that it is probable that taxable profits will be available against which deductible temporary differences can be utilised. Deferred tax is measured at the tax rates expected to apply in the period when the liability is settled or the asset is realised based on tax rates that have been enacted or substantively enacted at the end of reporting period.

For the year ended 31 December 2011

### 4. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### (p) Income taxes (continued)

Deferred tax liabilities are recognised for taxable temporary differences arising on investments in subsidiaries and associates, except where the Group is able to control the reversal of the temporary difference and it is probable that the temporary difference will not reverse in the foreseeable future.

Income taxes are recognised in profit or loss except when they relate to items recognised in other comprehensive income in which case the taxes are also recognised in other comprehensive income.

#### (q) Foreign currency

Transactions entered into by group entities in currencies other than the currency of the primary economic environment in which they operate (the "functional currency") are recorded at the rates ruling when the transactions occur. Foreign currency monetary assets and liabilities are translated at the rates ruling at the end of reporting period. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing on the date when the fair value was determined. Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

Exchange differences arising on the settlement of monetary items, and on the translation of monetary items, are recognised in profit or loss in the period in which they arise. Exchange differences arising on the retranslation of non-monetary items carried at fair value are included in profit or loss for the period except for differences arising on the retranslation of non-monetary items in respect of which gains and losses are recognised in other comprehensive income, in which case, the exchange differences are also recognised in other comprehensive income.

On consolidation, the results of foreign operations are translated into the presentation currency of the Group (i.e. RMB) at the average exchange rates for the year, unless exchange rates fluctuate significantly during the period, in which case, the rates approximating to those ruling when the transactions took place are used. All assets and liabilities of foreign operations are translated at the rate ruling at the end of reporting period. Exchange differences arising, if any, are recognised in other comprehensive income and accumulated in equity as currency translation reserve. Exchange differences recognised in profit or loss of group entities' separate financial statements on the translation of long-term monetary items forming part of the Group's net investment in the foreign operation concerned are reclassified to other comprehensive income and accumulated in equity as currency translation reserve.

On disposal of a foreign operation, the cumulative exchange differences recognised in the currency translation reserve relating to that operation up to the date of disposal are reclassified to profit or loss as part of the profit or loss on disposal.

Goodwill and fair value adjustments on identifiable assets acquired arising on an acquisition of a foreign operation on or after 1 January 2005 are treated as assets and liabilities of that foreign operation and translated at the rate of exchange prevailing at the end of reporting period. Exchange differences arising are recognised in the currency translation reserve.

## **Notes to the Financial Statements**

For the year ended 31 December 2011

## 4. SIGNIFICANT ACCOUNTING POLICIES (continued)

## (r) Impairment of other assets

At the end of each reporting period, the Group reviews the carrying amounts of the following assets to determine whether there is any indication that those assets have suffered an impairment loss or an impairment loss previously recognised no longer exists or may have decreased:

- payments for leasehold land held for own use under operating leases;
- property, plant and equipment;
- construction in progress;
- intangible assets with finite lives; and
- investments in subsidiaries and associates

If the recoverable amount (i.e. the greater of fair value less costs to sell and value in use) of an asset is estimated to be less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. An impairment loss is recognised as an expense immediately.

Where an impairment loss subsequently reverses, the carrying amount of the asset is increased to the revised estimate of its recoverable amount, but so that the increased carrying amount does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior years. A reversal of an impairment loss is recognised as income immediately.

## (s) Employee benefits

(i) Defined contribution retirement plans

Contributions to defined contribution retirement plans are recognised as an expense in the profit or loss when the services are rendered by the employees.

(ii) Termination benefits

Termination benefits are recognised when, and only when, the Group demonstrably commits itself to terminate employment or to provide benefits as a result of voluntary redundancy by having a detailed formal plan which is without realistic possibility of withdrawal.

For the year ended 31 December 2011

### 4. SIGNIFICANT ACCOUNTING POLICIES (continued)

#### (t) Related parties

- (a) A person or a close member of that person's family is related to the Group if that person:
  - (i) has control or joint control over the Group;
  - (ii) has significant influence over the Group; or
  - (iii) is a member of key management personnel of the Group or the Company's parent.
- (b) An entity is related to the Group if any of the following conditions apply:
  - (i) The entity and the Group are members of the same group (which means that each parent, subsidiary and fellow subsidiary is related to the others);

- (ii) One entity is an associate or joint venture of the other entity (or an associate or joint venture of a member of a group of which the other entity is a member);
- (iii) Both entities are joint ventures of the same third party;
- (iv) One entity is a joint venture of a third entity and the other entity is an associate of the third entity;
- (v) The entity is a post-employment benefit plan for the benefit of the employees of the Group or an entity related to the Group;
- (vi) The entity is controlled or jointly controlled by a person identified in (a); and
- (vii) A person identified in (a)(i) has significant influence over the entity or is a member of key management personnel of the entity (or of a parent of the entity).

Close members of the family of a person are those family members who may be expected to influence, or be influenced by, that person in their dealings with the entity and include:

- (i) that person's children and spouse or domestic partner;
- (ii) children of that person's spouse or domestic partner; and
- (iii) dependents of that person or that person's spouse or domestic partner.

For the year ended 31 December 2011

## 4. SIGNIFICANT ACCOUNTING POLICIES (continued)

### (u) Provisions and contingent liabilities

Provisions are recognised for liabilities of uncertain timing or amount when the Group has a legal or constructive obligation arising as a result of a past event, which will probably result in an outflow of economic benefits that can be reasonably estimated.

Where it is not probable that an outflow of economic benefits will be required, or the amount cannot be estimated reliably, the obligation is disclosed as a contingent liability, unless the probability of outflow of economic benefits is remote. Possible obligations, the existence of which will only be confirmed by the occurrence or non-occurrence of one or more future events, are also disclosed as contingent liabilities unless the probability of outflow of outflow of economic benefits is remote.

# 5. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY

In the application of the Group's accounting policies, the directors are required to make judgments, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and associated assumptions are based on historical experience and other factors that are considered to be relevant. Actual results differ from these estimates.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

## (a) Impairment of goodwill and construction licence

The Group tests annually whether goodwill and construction licence have suffered any impairment in accordance with the Group's accounting policy. The recoverable amounts of cash-generating units have been determined based on value-in-use calculations. These calculations require the use of estimates (see note 19).

## (b) Impairment of trade and other receivables

Management reviews the Group's trade and other receivables at the end of each reporting period to determine whether there is objective evidence that the Group will not be able to collect all amounts due according to the original terms of the receivables. The amount of the impairment is the difference between the carrying amount of the assets and the present value of estimated future cash flows, discounted at the original effective interest rate.

If the discount rates used to estimate the present value of estimated future cash flows arising from these receivables had been changed, the amount of impairment changed accordingly.

# 5. CRITICAL ACCOUNTING JUDGMENTS AND KEY SOURCES OF ESTIMATION UNCERTAINTY (continued)

#### (c) Construction contracts

Revenue from individual contract is recognised under the percentage of completion method which requires estimation made by management. Anticipated losses are fully provided on contracts when identified. The Group's management estimates the amount of foreseeable losses of construction work based on the estimation prepared for the construction contracts. Because of the nature of the activity undertaken in construction business, the date at which the contract activity is entered into and the date when the activity is completed usually fall into different accounting periods.

The Group reviews and revises the estimates of both contract revenue and contract costs in the budget prepared for each contract as the contract progresses. Management regularly reviews the progress of the contracts and the corresponding costs of the contract revenue. If circumstances arise that may change the original estimates of revenues, costs or extent of progress toward completion, estimates are revised. These revisions may result in increase or decrease in estimated revenues or costs and are reflected in profit or loss in the period in which the circumstances that give rise to the revision become known by management.

#### (d) Financial guarantee contracts

The Group has issued financial guarantee contracts in favour of third parties (see note 33). The initial and subsequent measurement to the value of these financial guarantee contracts involve high degree of judgments and estimations by the Group's management.

#### 6. SEGMENT INFORMATION

The Group determines its operating segments based on the reports reviewed by the chief operating decision-maker that are used to make strategic decisions. The Group has four reportable segments. The segments are managed separately as each business offers different products and services and requires different business strategies. The four reportable segments are as follows:

- Road and bridge construction;
- Sale of fuel oil;
- Sale of asphalt; and
- Provision of logistic services

Inter-segment transactions are priced with reference to prices charged to external parties for similar order.

Note:

For the years ended 31 December 2006 and 2007, the Group's non-wholly owned subsidiary, 南通路橋工程有限公司 (Nantong Road and Bridge Engineering Co., Ltd) ("Nantong Road and Bridge"), provided an EIT provision of approximately RMB20.2 million for the timing difference of revenue recognition.

During the year ended 31 December 2011, the Group received the final tax assessment notice from local tax bureau and concluded that the EIT arising from the timing difference of revenue recognition is RMB1.5 million. In the opinion of the directors, the assessment made by the local tax bureau is final and no additional EIT shall be demanded. Accordingly, the over provision of RMB18.7 million was credited to the consolidated statement of comprehensive income.

## **13. PROFIT ATTRIBUTABLE TO OWNERS OF THE COMPANY**

Profit attributable to owners of the Company is dealt with in the financial statements of the Company to the extent of RMB19,336,000 (2010: RMB39,190,000).

For the year ended 31 December 2011

## **14. EARNINGS PER SHARE**

Basic earnings per share is calculated by dividing the profit attributable to owners of the Company by the weighted average number of ordinary shares in issue during the year.

	Group

Note: Construction licence represents construction contract tier-one qualification and municipal utility contract tier-one qualification for road and bridge constructions.

#### Impairment tests for goodwill and construction licence:

Goodwill and construction licence are solely allocated to one of the Group's cash-generating unit ("CGU"), namely road and bridge construction segment.

The recoverable amount of a CGU is determined based on value-in-use calculations. These calculations use pre-tax cash flow projections based on financial budgets approved by management covering a five-year period. Cash flows beyond the five-year period are extrapolated using the estimated weighted average annual growth rate of 6% (2010: 6%).

For the year ended 31 December 2011

### **19. INTANGIBLE ASSETS** (continued)

#### Impairment tests for goodwill and construction licence: (continued)

The key assumptions used for value-in-use calculations are as follows:

	2012	2013	2014	2015	2016
Weighted average gross margin	12.5%	9.1%	9.1%	9.2%	9.3%
Weighted average growth rate	-6.6%	6.0%	6.0%	6.0%	6.0%
Percentage of working capital over revenue	55%	54%	54%	54%	54%
Discount rate	8.2%	8.2%	8.2%	8.2%	8.2%

Management determined weighted average gross margin, weighted average growth rates and percentage of working capital over revenue based on past performance and its expectations for the market development. The discount rate used is pre-tax and reflects specific risks relating to the road and bridge construction segment.

## 22. AVAILABLE-FOR-SALE FINANCIAL ASSET

	Group and	Company
	2011 RMB'000	2010 RMB'000
Unlisted equity security, at cost	800	800

Available-for-sale financial asset represents investment in an unlisted company in the PRC. It is measured at cost less impairment, if any, at the end of each reporting period because the directors of the Company are of the opinion that the fair value cannot be measured reliably. The directors of the Company have no intention to dispose of the available-for-sale financial asset at the end of reporting period.

### 24. TRADE AND OTHER RECEIVABLES (continued)

#### (a) Trade and notes receivables (continued)

#### Note (i):

In respect of road and bridge construction, the average credit period is negotiated on individual basis in accordance with contract terms. Normally the general credit period is ranging from 0 day to 3 years.

The ageing analysis of trade receivables related to road and bridge construction which were past due but not impaired is as follows:

	Group		Company	
	<b>2011</b> 2010		2011	2010
	RMB'000	RMB'000	RMB'000	RMB'000
Less than 6 months past due	146,159	92,675	-	-
6 months to less than 1 year past due	24,009	3,554	-	-
1 year to less than 2 years past due	34,344	6,635	-	-
2 years to less than 3 years past due	1,140	122	-	-
3 years and over past due	73	-	-	-
	205,725	102,986	-	-

Substantially all customers of road and bridge construction are PRC government-related corporations which have no recent history of default. The credit quality of trade receivables has been assessed by reference to historical information about the counterparty default rates. The terms of some construction contracts stipulate that the customers withhold a portion of total contract sum (usually 5%) until a specified period (usually 2 years) after completion of the contract.

#### Note (ii):

For sale of fuel oil and asphalt and provision of logistic services, the credit terms granted to individual customers vary on a customer by customer basis which is determined by management with reference to the creditability of respective customers. Normally the general credit period is ranging from 0 to 90 days.

The ageing analysis of trade receivables related to sale of fuel oil and asphalt and provision of logistic services which were past due but not impaired is as follows:

	Group		Company	
	2011	2010	2011	2010
	RMB'000	RMB'000	RMB'000	RMB'000
Less than 91 days past due	368,134	141,626	164,189	67,163
91 days to 1 year past due	58,654	62,639	605	12,370
Over 1 year past due	37,384	4,260	5,861	2,596
	464,172	208,525	170,655	82,129

Trade receivables that are less than three months past due are not impaired. The amounts that were past due but not impaired relate to a number of independent customers which have no recent history of default. The credit quality of trade receivables has been assessed by reference to historical information about the counterparty default rates.

### 31. SHARE CAPITAL (continued)

#### (b) Capital management policy

The Group's objectives when managing capital are to safeguard the Group's ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders and to maintain an optimal capital structure to reduce the cost of capital.

In order to maintain or adjust the capital structure, the Group may adjust the amount of dividends paid to shareholders, return capital to shareholders, issue new shares or sell assets to reduce debts.

The Group monitors capital on the basis of the debt-to-equity ratio. This ratio is calculated as total borrowings divided by total capital. Total borrowings include current and non-current borrowings as shown on the consolidated statement of financial position. The Group regards its equity attributable to the Company's owners as its capital.

### **37. FINANCIAL INSTRUMENTS – RISK MANAGEMENT AND FAIR VALUE**

The Group's activities expose itself to a variety of financial risks: market risk (including foreign currency risk and interest rate risk), credit risk and liquidity risk. The Group's overall risk management programme focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Group.

#### **Risk management**

#### (a) Foreign currency risk

The Group operates mainly in the PRC, and most of the Group's commercial transactions, recognised assets and liabilities are denominated in RMB. In the opinion of the director's, the Groups' exposure to the foreign currency risk is minimal.

#### (b) Interest rate risk

The Group's exposure to changes in interest rates is mainly attributable to its borrowings and guaranteed deposits described in note 24(b). Borrowings issued at variable rates expose the Group to cash flow interest-rate risk. Borrowings issued at fixed rates expose the Group to fair value interest-rate risk. The Group has not entered into any financial derivative instruments to hedge its exposure to interest rate risk.

The following tables detail the interest rate profile of the Group and the Company at the end of reporting period:

	Group			
	2011		2010	
	Effective		Effective	
	interest rate		interest rate	
	per annum	RMB'000	per annum	RMB'000

### **37. FINANCIAL INSTRUMENTS – RISK MANAGEMENT AND FAIR VALUE** (continued)

#### Risk management (continued)

#### (b) Interest rate risk (continued)

At the respective end of reporting period, if interest rates had been increased/decreased by 100 basis points and all other variables were held constant, the Group's profit would decrease/increase by approximately RMB3,106,000 (2010: RMB2,745,000) for the year ended 31 December 2011.

	Company				
	2011 Effective		2010 Effective		
	interest rate		interest rate		
	per annum	RMB'000	per annum	RMB'000	
Fixed rate guarantee deposits	3.1%	17,611	2.3%	3,026	
Floating rate bank deposits	0.5%	37,164	0.4%	6,087	
		54,775		9,113	
Fixed rate borrowings	7.9%	48,000	5.3%	37,000	
Floating rate borrowings	6.3%	175,000	5.8%	54,529	
		223,000		91,529	

At the respective end of reporting period, if interest rates had been increased/decreased by 100 basis points and all other variables were held constant, the Company's profit would decrease/increase by approximately RMB1,048,000 (2010: RMB378,000) for the year ended 31 December 2011.

#### (c) Credit risk

The credit risk of the Group mainly arises from cash and cash equivalents, restricted bank deposits, trade receivables, other receivables and financial guarantee contracts that it issues. Credit risk with respect to trade receivables are limited because the Group regularly reviews the credit standing, credit terms and credit limits granted to individual customers. Management has a credit policy in place and the exposure to credit risk is monitored on an ongoing basis. Credit evaluations are performed on all customers requiring credit over a certain amount. The Group does not require collateral in respect of financial assets. The Group issues financial guarantee contracts in favour of only those counterparties that are financially strong and with good credit history.

The credit risk on the bank deposits are limited because the counterparties are financial institutions with high credit ratings assigned by international credit rating agencies or state-owned banks in the PRC.

(d) Liquidity risk

Prudent liquidity risk management includes maintaining sufficient cash, the availability of funding from an adequate amount of committed credit facilities and the ability to close out market positions.

Management of the Group aims to maintain sufficient cash and cash equivalents or have available funding through an adequate amount of committed credit facilities to meet its operation needs and business commitments.

The Group also has policy to regularly monitor its liquidity requirements and its compliance with lending covenants, so as to ensure that it maintains sufficient reserves of cash and adequate committed lines of funding from financial institutions to meet its liquidity requirements in the short and long terms.

The table below analyse the Group's and the Company's financial liabilities that will be settled on a net basis into relevant maturity groupings based on the remaining period at the end of reporting period to the contractual maturity date. The amounts disclosed in the table are the contractual undiscounted cash flows.

### 37. FINANCIAL INSTRUMENTS – RISK MANAGEMENT AND FAIR VALUE (continued)

#### **Fair value estimation**

The fair values of financial assets and financial liabilities are determined as follows:

• the fair value of financial assets and financial liabilities with standard terms and conditions and trading on active liquid markets are determined with reference to quoted market prices; and

• the fair value of other financial assets and financial liabilities are determined in accordance with generally accepted pricing models based on discounted cash flow analysis using prices from observable current market transactions.

The directors considered that the carrying amounts of the financial assets and liabilities approximate their fair value, except for the available-for-sale financial asset which is measured at cost less impairment.

### **38. EVENT AFTER THE REPORTING PERIOD**

On 3 February 2012, the Company's subsidiary, Nantong Road and Bridge, signed an agreement with People's Government of Chong Chuan District of Nantong City to acquire a payment for leasehold land held for own use under operating lease in an amount of RMB8,612,000 to build new premises for own use. The consideration shall be paid in full not later than 10 May 2012.

### **39. APPROVAL OF FINANCIAL STATEMENTS**

The financial statements were approved and authorised for issue by the Board of Directors on 15 March 2012.
