ANNUAL RESULTS ANNOUNCEMENT FOR THE YEAR ENDED 31 DECEMBER 2014

Characteristics of the Growth Enterprise Market ("GEM") of The Stock Exchange of Hong Kong Limited (the "Stock Exchange")

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this announcement, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this announcement.

This announcement, for which the directors (the "Directors") of Xi'an Haitian Antenna Technologies Co., Ltd.* (the "Company") collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the GEM of the Stock Exchange (the "GEM Listing Rules") for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief, the information contained in this announcement is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this announcement misleading.

9. LOSS PER SHARE

The calculation of basic loss per share attributable to owners of the Company is based on the loss for the year attributable to owners of the Company of RMB3,622,933 (2013: RMB15,194,510) and the weighted average number of 647,058,824 (2013: 647,058,824) ordinary shares in issue during the year.

The diluted loss per share is equal to the basic loss per share as calculated above as the Company did not have any potential shares outstanding for the two years ended 31 December 2014 and 2013.

10. AVAILABLE-FOR-SALE INVESTMENT

Available-for-sale investment comprises:

	2014 <i>RMB</i>	2013 <i>RMB</i>
Unlisted investment in equity security Less: impairment loss recognised	1,293,580 (305,080)	1,293,580 _
	988,500	1,293,580

The above unlisted equity investment represents investment in unlisted equity security issued by a private entity incorporated in the PRC. It is measured at cost less impairment at the end of the reporting period because the range of reasonable fair value estimates is so significant that the directors of the Company are of the opinion that their fair values cannot be measured reliably.

Subsequently on 17 March 2015, the Company entered into an agreement with an independent third party for the disposal of the available-for-sale investment at a consideration of RMB988,500. PROSPECTS

With China Mobile Group leading the 4G market for more than a year, on 27 February 2015, the Ministry of Industry and Information Technology of the PRC officially awarded 4G FDD licenses to China Telecom Group and China Unicom Group, which meant the two operators are authorised to carry on nationwide 4G operations. China Telecom Group and China Unicom Group will be able to break through the limits of trial cities and conduct large-scale 4G operations throughout China, thus narrowing the gap in 4G operation between China Mobile Group and these two operators. However, based on years of experience in operating base station antennas for mobile communication, as well as analysis of the current profit level in the market, while the aggregate market demand for antenna has picked up in 2015, the 4G antenna market has also evolved into a phase of intensifying price competition with substantial fall in product profitability.

To cope with these circumstances, the Group will continue to reduce follow-up expenditure in 4G antenna market, and turn to place more emphasis on communications-related services including network optimisation and network inspection and maintenance, and focus on accumulation of technology and market development in the areas of mobile communication system module and related testing and tuning/adjusting businesses. In addition, the Company will increase investments in the fields of marine, underwater and underground monitoring and inspection, product research and development of aircraft, spacecraft and core components, and research and development of automobile electronics and key components by leveraging on resources previously accumulated in other new products and projects. The Group will strive to realise strategic product diversification in 2015, expand the scope of development of the Group, and thereby enhance the operating performance of the Group.

For the purpose of providing funds required for our diversified operations, apart from general bank borrowings, the Company also intends to utilise other financing channels, such as new share issue, as and when appropriate. The Board of Directors and management of the Company will strive to establish the Group as a high-tech enterprise with diversified operations.
