First Quarterly Report 2015

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

*This report, for which the directors (the “**Directors**”) of Goldenmars Technology Holdings Limited (the “**Company**”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM (the “**GEM Listing Rules**”) for the purpose of giving information with regard to the Company. MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW AND PROSPECT

In the first quarter of 2015, the Group maintained its overall growth momentum by virtue of its effective inventory and business strategy and prudent business approach, which enabled the Group to maintain steady operating revenue growth amid conservative demands in the quarter.

The joint venture, in which the Group holds 16.74% equity interest, has shown a steady growth in sales order since commencement of production in December 2014, and is expected to deliver steady revenue in the second half of 2015.

Looking ahead, the market will maintain stable development trend in the second half of 2015, coupled with a moderate increase in growth potential. Meanwhile, the Group will actively expand the market share, aiming to consolidate its core business and improve its profitability to bring fruitful return to the shareholders ultimately.

FINANCIAL REVIEW

The Group's revenue increased by approximately 17.5% from about HK\$185.8 million to about HK\$218.3 million for the three months ended 30 June 2015 as compared with the Last Corresponding Period.

Increase in revenue mainly resulted from increase in trading orders of CPU chips and NAND flash chips as driven by market demand, and was partially offset by the decrease in revenue of DRAM chips and modules.

Gross profit margin of approximately 5.9% for the Current Period remained fairly stable when compared with the Last Corresponding Period (2014: 5.5%).

Selling expenses as well as general and administrative expenses for the Current Period decreased by approximately HK\$0.3 million and HK\$0.6 million, representing about 41.2% and 12.6% decrease from the Last Corresponding Period respectively, were mainly due to the decrease in employee benefit expenses following the enhancement of organizational structure in previous year.

The increase in profit attributable to equity holders by approximately HK\$2.6 million for the Current Period was mainly attributable to the increase in revenue with fairly stable gross profit margin maintained.
