NOTES TO THE UNAUDITED FINANCIAL STATEMENTS

For the period ended 30 June 2015

1. OVERVIEW OF THE COMPANY

Ruifeng Petroleum Chemical Holdings Limited (the “**Company**”) is an investment holding company. The principal activities of the Company and its subsidiaries (together the “**Group**”) are fuel oil processing and storage and the development and distribution of computer software solutions and related products and services. Commencing from 2014, the Company also directly accepts oil processing and storage orders from customers for directing to its subsidiaries or other parties which have the facilities to executive such orders.

The Company is listed on The Growth Enterprise Market of The Stock Exchange of Hong Kong Limited (the “**Stock Exchange**”). Ruifeng Petroleum Chemical Holdings Limited is a limited liability company incorporated in the Cayman Islands. The principal place of business of the Company is located at 13/F Guangdong Investment Tower, 148 Connaught Road Central, Hong Kong and the address of its registered office is Cricket Square, Hutchins Drive, P.O. Box 2681, Grand Cayman KY1-1111, Cayman Islands. These unaudited consolidated financial information are presented in units of Hong Kong dollars, unless otherwise stated.

2. BASIS OF PREPARATION

These unaudited consolidated financial statements of the Group (after the exclusion of the Deconsolidated Group) have been prepared in accordance with HKFRSs (which include all Hong Kong Financial Reporting Standards, Hong Kong Accounting Standards (“**HKASs**”) and Interpretations) issued by the Hong Kong Institute of Certified Public Accountants.

The unaudited consolidated financial statements include the financial statements of the Company and its subsidiaries (collectively referred to as the “**Group**”) for the period ended 30 June 2015. The financial statements of the subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies.

Reference is made to the announcement of the Company dated 19 September 2014, the, the Group has deconsolidated Foshan Ruifeng and accordingly Foshan Ruifeng’s subsidiaries (collectively, the “**Deconsolidated Group**”) from the Group’s financial statements since the financial year ended 31 December 2012 (the “**Deconsolidation**”).

3. SIGNIFICANT ACCOUNTING POLICIES

Book-keeping Bases and Measurement Principles

The Company adopts the accrual basis as the basis of book-keeping in accounting. All those income realized and expenses incurred during the period are stated as income and expenses for the period whether they are settled or not. Those income and expenses not come under the period are not stated as income and expenses for the period even they are settled in the period.

Foreign Currency Translation

The results and financial position of all the group entities that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- (i) assets and liabilities for each balance sheet presented are translated at the closing rate at the date of that balance sheet;
- (ii) income and expenses for each income statement are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and
- (iii) all resulting exchange differences are recognised as a separate component of equity.

On consolidation, exchange differences arising from the translation of the net investment in foreign operations, and of borrowings and other currency instruments designated as hedges of such investments, are taken to shareholders' equity. When a foreign operation is partially disposed of or sold, exchange differences that were recorded in equity are recognised in the income statement as part of the gain or loss on sale.

Measurement and Depreciation Methods for Fixed Assets

The fixed assets of the Group are mainly office equipment, which are accounted for at costs on acquisition. Costs on acquisition comprise the purchase price, import tariff, relevant expenses like transportation and insurance, and all necessary outgoings to bring the fixed assets to the anticipated conditions for use.

Depreciation is calculated on the straight-line basis to write off the cost of each item of property, plant and equipment to its residual value over its estimated useful life, if any, using the straight line method over their estimated useful lives as follows:

– Furniture and fixtures 5 years

Financial asset

Financial assets of the Group within the scope of HKAS 39 are classified as loans and receivables. The Group determines the classification of its financial assets at initial recognition. When financial assets are recognised initially, they are measured at fair value, plus, in the case of financial assets not at fair value through profit or not, directly attributable transaction costs.

The Group's financial assets include trade receivables, prepayments, deposits and other receivables, financial assets at fair value through profit or loss, and cash and cash equivalents.

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. After initial measurement, such assets are subsequently measured at amortised cost using the effective interest rate method less any allowance for impairment. Amortised cost is calculated by taking into account any discount or premium on acquisition and includes fees or costs that are an integral part of the effective interest rate. The effective interest rate amortisation is included in interest income in the income statement. The loss arising from impairment is recognised in the income statement.

Financial liabilities

Financial liabilities of the Group within the scope of HKAS 39 are classified as financial liabilities at fair value through profit or loss and financial liabilities at amortised costs, as appropriate. The Group determines the classification of its financial liabilities at initial recognition. All financial liabilities are recognised initially at fair value, plus directly attributable transaction costs.

The Group's financial liabilities include trade and other payables and accruals, amounts due to directors and derivative financial instruments. Financial liabilities subsequently measured at fair value through profit or loss.

Provisions

Provisions are recognised when the Group has a present obligation as a result of a past event, and it is probable that the Group will be required to settle that obligation. Provisions are measured at the best estimate of consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation.

Principle of Revenue Recognition

For the period ended 30 June 2015, the Group's operating businesses are structured and managed separately, according to the nature of their operations and the products and services they provide. Each of the Group's business segments represents a strategic business unit that offers products and services which are subject to risks and returns that are different from those of other business segments. Details of the business segments are as follows:

- (i) the software segment – provision of software solutions;
- (ii) the fuel oil segment – provision of fuel oil processing and storage services.

Revenue is recognised when it is probable that the economic benefits will flow to the Group and when the revenue can be measured reliably, on the following bases:

- (i) from the sale of goods, when the significant risks and rewards of ownership have been transferred to the buyer, provided that the Group maintains neither managerial involvement to the degree usually associated with ownership, nor effective control over the goods sold; and
- (ii) interest income, on an accrual basis using the effective interest method by applying the rate that exactly discounts the estimated future cash receipts through the expected life of the financial instrument or a shorter period, when appropriate, to the net carrying amount of the financial asset.
