There was no material fluctuation in global refined lead metal production and consumption as compared with last corresponding period. In accordance with ILZSG forecasts, global demand for refined lead metal is expected to rise 2% to 10.83 million tonnes in 2016. The production for refined lead metal is expected to rise 2.3% to 10.90 million tonnes in 2016. As a consequence, it is anticipated that there should not have any material deficit/surplus between the usage and consumption in 2016.

As a consequence, it is anticipated that there would not be any material deficit/surplus between the usage and consumption in 2016.

Market review

According to the statistics of China Nonferrous Metals Industry Association, in the first eight months of 2016, the national output of ten nonferrous metals including lead and zinc, rose to approximately 34.10 million tonnes, its output growth has increased by approximately 0.67% while compared with the last corresponding period. The output of zinc lowered by 0.97% to approximately 4.1 million tonnes but lead climbed by 7.26% to approximately 2.8 million tonnes. Although the profitability of the overall industrial corporation in the first eight months of 2016 has increased by 8.4% to RMB4,058.4 billion, mining industry has decreased by 70.9% to approximately RMB53.5 billion.

Prospect

Suffering from the keen competition in the nonferrous metals market, the Group's average selling price of various products were sustainable at the low level. Moreover, the increase in the United States dollars ("US\$") index has placed pressure on the nonferrous metal prices. It is expected the business environment of the nonferrous metals market will continue to remain unfavourable during the year of 2016.

Given the industrial output (including the metals market industry) and overall economy performance both slowed down in 2016, further stimulus is expected to help revive the slowing economy which might be beneficial to the development of the nonferrous metal industry as a whole. Looking ahead, the Directors are cautiously positive on the continuous economic development in the People's Republic of China (the "PRC") and believe the PRC government will continue to implement favourable economic policies to sustain the economic development, which could facilitate the continuous growth of the nonferrous metals sector in the PRC.

Financial performance analysis

Revenue

For the nine months ended 30 September 2016, the Group recorded a turnover of approximately RMB79.1 million, representing an increase of approximately 16.5% as compared with the turnover of approximately RMB67.9 million for the same period last year. Accordingly, total costs of production was approximately RMB82.6 million (2015: RMB67.0 million), representing an increase of approximately 23.2%.

	Nine months ended 30 September 2016				Nine months ended 30 September 2015			
	Revenue	Cost of sales	Gross (loss)	Gross (loss) %	Revenue	Cost of sales	Gross profit	Gross profit %
	RMB'000	RMB'000	RMB'000		RMB'000	RMB'000	RMB'000	
Nonferrous metal mining	79,082	(82,607)	(3,525)	(4.5%)	67,885	(67,044)	841	1.2%

For the nine month ended 30 September 2016, the selling price for the Group's product in the PRC markets remained at a low level, this unfavourable conditions had a considerable adverse impact on the performance of the Group. However, the increase in the sales volume has offset the impact on the decrease in price. As a result, revenue generated from nonferrous metal mining increased to approximately RMB79 million for the nine months ended 30 September 2016 as compared to approximately RMB67.9 million recorded for the corresponding period in 2015, representing an increase of approximately 16.5%.

The average selling price of zinc concentrates and lead concentrates sold in the PRC markets decreased from approximately RMB7,201.4 per tonne to approximately RMB6,106.6 per tonne and approximately RMB8,895.4 per tonne to approximately RMB7,924.6 per tonne respectively. Given that overall production cost in the nonferrous metal mining had also been increasing, the said factors led to a gross loss of RMB3.5 million.

The followings are the sales volume and average selling price for each of the mining products and trading business in respect of the nine months ended 30 September 2016 and 2015:

	Nine months ended 30 September 2016			Nine months ended 30 September 2015

CORPORATE GOVERNANCE

The Company has complied throughout the nine months ended 30 September 2016 with the code provisions set out in the Corporate Governance Code contained in Appendix 15 to the GEM Listing Rules with certain deviations in respect of the appointment of the chairman. The Company is still in progress to file the vacancy and the announcement will be made when appropriated.

Other deviations included (1) the non-executive director is not appointed for a specific term (which is required under code provision A.4.1 of the Corporate Governance Code) but is subject to retirement by rotation and re-election at least once every three years at the annual general meeting of the Company according to the Company's bye-laws; and (2) code provision A.1.8 of the Corporate Governance Code stipulates that the Company should arrange appropriate insurance cover in respect of legal action against its Directors. The Board is of the view that the Directors may be subject to the insurance premium which is much higher than necessary, reasonably or normally charged as insurance companies may tend to have reservation in accepting insurance coverage for directors of a listed company whose shares are suspended from trading. Therefore, no insurance cover has been arranged currently. The Board will monitor any changes to the situation and identify potential insurance company(ies) to arrange appropriate insurance in respect of legal action against its Directors and officers in due course after the resumption of trading of the Company's shares in compliance with code provision A.1.8 of the Corporate Governance Code.

Also, the Company has adopted a code of conduct regarding Directors' securities transactions on terms no less exacting than the required standard set out in Rules 5.48 to 5.67 of the GEM Listing Rules. Having made specific enquiry of all Directors, all Directors confirmed that they had complied with the required standard of dealings and its code of conduct regarding Directors' securities transactions during the reporting period.

FOREIGN EXCHANGE EXPOSURE

The Group has bank balances, sales and purchases denominated in foreign currencies which expose the Group to foreign currency risk. The currency risk for those subsidiaries with functional currency in HK\$ were mainly attributable to the bank balances and trade and other receivables denominated in US\$ as at the end of the reporting period. As the exchange rate of HK\$ is pegged against US\$, the Directors were of the opinion that the currency risk of US\$ was insignificant to the Group.

The Group currently does not have foreign currency hedging policy but the management continuously monitors foreign exchange exposure and will consider hedging significant foreign currency exposure should the need arise.

CONTROLLING SHAREHOLDER INTERESTS IN COMPETING BUSINESS

During the period and at the date of this report, the following controlling shareholder is considered to have interests in the businesses, which compete or are likely to compete, either directly or indirectly, with the businesses of the Group pursuant to the GEM Listing Rules:

The Company's substantial shareholder, Mr. Mei Wei, has beneficial interest and directorship in First Create Mining and First Create (collectively referred as "First Create Group"). However, the Directors do not consider the interests/directorship held by Mr. Mei Wei to be competing in practice with the relevant businesses of the Group in view of trading business of First Create Group is overseas focus while majority turnover in the Group is local business.

Mr. Mei Wei also holds shareholding interests and/or directorship in companies engaged in the mining and processing of mineral resources. However, the Directors do not consider the interest held will create any competing in practice with the relevant businesses of the Group as the mineral resources explored are not mainly zinc and lead concentrates oriented or the mining sites activities are inactive.
