INTERIM RESULTS ANNOUNCEMENT FOR THE SIX MONTHS ENDED 30 JUNE 2017

CHARACTERISTICS OF THE GROWTH ENTERPRISE MARKET ("GEM") OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been positioned as a market designed to accommodate companies to which a high investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

This announcement, for which the directors (collectively the "Directors" or individually a "Director") of Golden Power Group Holdings Limited (the "Company") collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM of the Stock Exchange (the "GEM Listing Rules") for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that to the best of their knowledge and belief, the information contained in this announcement is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this announcement misleading.

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS OVERVIEW

The Group is principally engaged in the manufacture and sale of a broad range of batteries for various electronic devices to the PRC, Hong Kong and international markets both under its own brand "Golden Power" and the brands of its private label and OEM customers. The products of the Group are mainly categorised into two segments (i) disposable batteries; and (ii) rechargeable batteries and other battery-related products. The disposable batteries are categorised into two sub-segments namely (i) cylindrical batteries; and (ii) micro-button cells. Other battery-related products include battery chargers, battery power packs and electric fans.

The revenue of cylindrical batteries for the Period has dropped by approximately HK\$1.99 million as compared to the same period of 2016, representing an approximately 1.96% decrease. The decrease in such revenue was mainly due to the weak Renminbi ("RMB") exchange rate against Hong Kong dollar ("HKD") during the Period.

PRINCIPAL RISKS AND UNCERTAINTIES

The followings are some principal risks and uncertainties faced by the Group, which may materially adversely affect its business, financial condition or results of operations:-

The Group has no long-term sales contracts with most of the major customers. If the business relationships with the major customers deteriorates or if any of the major customers reduces substantially its purchases from the Group or terminates its business relationship with the Group entirely, the business, results of operations and financial condition may be adversely affected.

The demand for disposable batteries in general and alkaline cylindrical batteries depends on the need for such disposable batteries to operate various electronic devices, the demand for which is in turn affected by technological advances and consumer preferences. Further, technological advances and increasing environmental awareness may cause consumer demand to shift from alkaline cylindrical batteries to other disposable batteries, from disposable batteries to rechargeable batteries as a substitute or even to other forms of electronic products or energy which do not require the use of batteries.

The Group's revenue was denominated in RMB, HKD and US dollars and the cost of sales was primarily denominated in RMB and the remaining denominated in HKD, US dollars and Euros. The value of RMB against HKD and other currencies may fluctuate and is affected by, among other things, changes in political and economic conditions in the PRC.

The Group's business is subject to seasonality, so that the first quarter of a year may record relatively lower revenue. In particular, the revenue generated during the month of Chinese New Year may be significantly lower than the average revenue generated during a year.

The Group manufactures some of the products on a made-to-stock basis (that is the Group manufactures before the customers place orders with it) with reference to the sales forecast prepared in the light of the customers' historical buying pattern, particularly batteries to be sold to the customers under the Group's branded business which adopt its original design and specifications. If the sales forecast turns out to be inaccurate and the customers do not place orders with the Group in the volumes as expected, the products produced may not be absorbed by other customers, and the Group's business, results of operations and financial condition may be adversely affected.

For more details about the general risks and uncertainties in relation to the Group, please refer to the Prospectus.

FOREIGN CURRENCY RISK

The reporting currencies of the Group is HKD.

The Group has transactional currency exposures. Such exposures arise from the business operations in the PRC denominated in RMB. As at 30 June 2017, the Group had a minimal exposure to foreign currency risk as most of its business transactions, assets and liabilities were principally denominated in the functional currencies, i.e. RMB and HKD.

The Group ensures that the net exposure is kept to an acceptable level, by buying or selling foreign currencies at spot rate or entering into appropriate forward contracts when necessary.
