## **MANAGEMENT DISCUSSION AND ANALYSIS**

### **Business review and future outlook**

Revenue of the Group for the nine months ended 30 September 2017 increased when compared to the corresponding period in 2016. Such increase was mainly because in 2017, the natural gas business continued to grow and contribute significant revenue to the Group. The board (the “Board”) of directors (the “Director(s)”) believes that revenue of the Group will be further improved with the development of the natural gas business, plus the upcoming trading business and anticipated improvement of the Polyethylene pipes (“PE pipes”) business. Therefore, the results of the Group will be improved accordingly.

After years of business transformation, the natural gas business has become the core business of the Group. Operating performance of the natural gas business segment continued to grow in 2017. In view of the People’s Republic of China (the “PRC”) government has implemented the policy to use clean energy in the PRC, the prospect of natural gas business is very bright. As a result of various acquisitions and investments of the natural gas business in the past two years, the Group operated the natural gas business in various areas and provinces in the PRC. Our customers include industrial and domestic customers. In 2016, the Group disposed certain assets of some subsidiaries which had low profitability and high management cost. Similar disposals may occur again in the future. The Group will focus its resources in the development of piped natural gas business with commercial and industrial clients of a larger business scale. The Group is also exploring natural gas related areas such as electricity generating business so as to fully use the synergy effect on current natural gas business. The Group is of the view that the natural gas business is still growing and is now the most significant business of the Group.

The manufacturing segment has been the major business segment of the Group in previous years and continued as one of the businesses of the Group in 2017. The PE pipes are the major products of the manufacturing segment and include both water pipes and gas pipes. They are products used for construction and city development in the PRC. The Group’s major customers are the government and public entities, or their suppliers, from different provinces and cities in the PRC. With the anticipated improvement of revenue and a strengthened customer portfolio, the PE pipes business will be improved in the long term.

From November 2017 onwards, the Group commenced its trading business segment. With the international trading platform in Hong Kong and the built up business relationship of the Group, the trading segment is anticipated to grow with variety of trading products such as natural gas, electronic components and consumables.

In view of the unstable global political environment and the pressure on economic downturn, the Board and management will be more careful and prudent in managing the operations of the Group. In the meantime, the Board has been exploring possible investing opportunities to increase the Company's value.

### **Financial review**

Revenue was approximately HK\$135,926,000 for the nine months ended 30 September 2017, which represented an increase of approximately 0.3% when compared with approximately HK\$135,583,000 in the corresponding period of last year. The Board believes that revenue of the Group will be further improved with the continue growing of the natural gas business, the commencement of the trading business and anticipated improvement of the manufacturing business.

For the nine months ended 30 September 2017, unaudited loss before income tax was approximately HK\$32,559,000 (nine months ended 30 September 2016: loss of approximately HK\$42,530,000). The loss attributable to owners of the Company was approximately HK\$31,121,000 (nine months ended 30 September 2016: loss of approximately HK\$41,300,000). Significant loss is mainly due to insufficient revenue generated in the reporting period. In the current economic environment, the Board will continue to exercise stringent cost control and maintain a low and effective overheads structure and prudently utilise the Group's corporate resources to create wealth for the shareholders.

### **Liquidity and financial resources**

As at 30 September 2017, the Directors anticipated that the Group has adequate financial resources to meet its ongoing operations and future development.
