CHARACTERISTICS OF THE GEM (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

17. LITIGATION

As at the end of reporting date, the Group has the following outstanding litigation cases:

- (a) During the year ended 31 December 2015, 西安厚普智能工程有限責任公司 (“the Plaintiff A”) filed a writ against 海天投資, a related company of the Group, for the outstanding building construction fee of RMB606,000 and against the Company for joint responsibility. In 2015, the People’s Court concluded the related company was liable for the claim but the Company is not liable to the joint responsibility. The related company appealed the case on 18 May 2015. After retrial, the People’s Court dismissed all the claims from the Plaintiff A and the Plaintiff A appealed against the retrial judgement. On 8 June 2018, the People’s Court reaffirmed the original judgement in 2015 and the related company’s appeal was accepted by Xi’an Intermediate People’s Court.

No provision was made for this case as the Directors consider that legal conclusion would state unchanged and be favour to the Company. Therefore no provision has been recognised in this regard.

- (b) Pursuant to the sale and purchase agreement dated 21 August 2015, the Group acquired a piece of leasehold land and buildings from 西安翔宇航空科技股份有限公司 (the “Defendant A”) situated in Xi’an, Shaanxi Province, the PRC, at a consideration of RMB40,000,000. During the year ended 31 December 2016, an initial deposit for the acquisition of leasehold land and buildings of RMB18,546,000 has been paid in accordance the sale and purchase agreement, but the Defendant A failed to assist the Group for the transfer of the land ownership. After several unsuccessful negotiations with the Defendant A, the Group has filed a writ to the Xi’an Chang’an District People’s Court against the Defendant A in September 2017. However, the Xi’an Chang’an District People’s Court dismissed the Group’s prosecution with the grounds that the clear address of the defendant A was not provided by the Group which resulted in the failure to deliver the litigation documents such as the copy of the complaint and the trial summons in order to carry out the proceedings accordingly. After receiving the judgement, the Group filed an appeal to the Xi’an Intermediate People’s Court which ruled on 29 March 2018 that the Xi’an Chang’an District People’s Court should continue to hear the case. As at 30 June 2018, the notice of the Xi’an Chang’an District People’s Court has not yet been received.

The directors of the Company consider the legal conclusion and concluded that the transfer of the land ownership is still highly probable.

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

Revenue

During the six months ended 30 June 2018, unaudited revenue of approximately RMB16.88 million was decreased by approximately 35% when comparing to RMB25.97 million for the corresponding period in 2017. The significant decline in revenue under the operating segment of sales of construction related products was the main reason for the decrease.

As products review, upgrading and integration in respect of the operating segments of sales of antenna products and related services, sales of underwater surveillance and related products, and sales of unmanned aerial products were carried out after product development in 2017 in order to update product information to customers during the six months ended 30 June 2018, approximately RMB0.91 million was generated from the sales of unmanned aerial products only which represented approximately 5% of unaudited revenue. Approximately 5% of unaudited revenue was come from the network optimisation, inspection and maintenance under the operating segment of sales of antennas products and related services for the six months ended 30 June 2018.

Compared to the corresponding period in 2017, price fluctuation of building materials during the six months ended 30 June 2018 was relative high. Revenue from the operating segment of sales of construction related products was dropped from approximately RMB23.59 million for the corresponding period in 2017 to RMB14.13 million for the six months ended 30 June 2018, representing approximately 84% of unaudited revenue, in order to minimise the risk of back-to-back trading of building materials.

Approximately RMB0.96 million was attributable to the sales of agricultural products, representing approximately 6% of unaudited revenue, which gradually became a stable source of income for the Group. No service request was received from existing and potential customers in respect of services provided under the operating segment of provision of consultancy services during the six months ended 30 June 2018.

Gross Profit

During the six months ended 30 June 2018, unaudited gross profit was approximately RMB0.19 million and gross profit margin was 1.1% which represented a further decrease when compared to gross profit margin of 2.2% for the corresponding period in 2017. It was mainly attributable to low profit margin of sales of construction related products which was accounted for approximately 84% of unaudited revenue.

Other Revenue

Approximately RMB0.19 million, RMB0.09 million and RMB0.09 million were recognised as rental income for office premises, gain on waiver of trade and other payables, and net exchange gain during the six months ended 30 June 2018.

Segment Results

Distribution costs were decreased by approximately 50% from approximately RMB0.48 million for the corresponding period in 2017 to approximately RMB0.24 million for the six months ended 30 June 2018. PROSPECT

In the first half of 2018, the Group has placed emphasis on the research and development and related testing of mobile communication products while the production and sales of series products such as aerospace and marine engineering equipment were carried out in an orderly way, with a view to fully capturing the development opportunities in 5G market to expand the Group's market share and improve its performance.

As for mobile communication products, the research and development of antennas products with broadband, high gain and low weight and which are accessible to multi-users has been substantially completed in the first half of 2018. The Group is currently performing repetitive tests over its products and communicating with mobile communication operators in various cities. By incorporating on-site live network testing, the Group shall constantly refine and improve its project products, thereby accurately identifying the market demand at sufficient depth. Meanwhile, the Group will also conduct relevant marketing activities in an orderly manner in the second half of the year based on the testing results.

Several patents applications in respect of new antennas were filed by an associate of the Group, Suzhou Haitian New Antenna Technologies Co., Ltd.* (蘇州海天新天綫科技有限公司), and 3 patents were granted up to 30 June 2018. Based on the patents, future business plan and cash flow forecast of the associate, further RMB4.00 million funds are required for its business operation and development. The funds were determined to be raised by capital contribution with approximately RMB1.43 million registered capital and approximately RMB2.57 million capital reserve after consideration of estimated value of the associate among its shareholders. After other shareholders of the associate expressed their intention not to contribute further capital to the associate, the Company determined to inject further capital contribution to the associate on 13 July 2018 as the Directors (including the independent non-executive Directors) are of the view that the capital contribution of RMB4.0 million is in the interest of the Company and its shareholders as a whole for the reasons as described in the section headed "Reasons for and benefits of the Capital Contribution Agreement" of the announcement of the Company dated 15 July 2018.

At the same time, the Group established a wholly-owned subsidiary in the United States in the first half of the year, mainly engaged in the research and development and sales of related mobile communication equipment, as well as investments in and mergers and acquisitions of related mobile communication entities, to complement the development needs of the Group's communication business. Going forward, the Group will seize the opportunities arising from the comprehensive development of 5G in the domestic market, fully integrate the industrial chain through the wholly-owned subsidiary, aiming to proactively expand overseas markets and enhance the Group's market competitiveness.

Relevant marketing and sales activities in respect of the related aerospace, marine engineering equipment as well as the poverty alleviation projects of the Group have been carried out step by step based on the needs of market, which made contributions to enhancing the performance of the Group.

In respect of the fund required for diversified operations, the Group implemented related work towards the new issuance of 200,000,000 domestic shares in the first half of 2018. Through this issuance, the Group will be able to raise approximately RMB42 million. Meanwhile, the Group is now in the process of new issuance of 35,000,000 H shares, which will be able to raise approximately HK\$118.30 million, so as to provide good financial support for the research and development of products and market expansion of the Group. In the future, based on the needs of its business development, the Group will also intend to resort to other financing channels, such as bank borrowings and revitalisation of the existing financing channels of the Group, as and when appropriate, so as to safeguard the Group's operation and development.

The Board and management of the Company will strive to turn the Group into a high-tech enterprise with diversified operations and development.
