## **Outlook and Prospects**

The Group was listed on the GEM of the Stock Exchange on 29 December 2015 (the "Listing Date") and the fund raised from the listing laid a solid foundation for the future development of the Group.

In light of the softening of policies on the real estate market of Mainland China, it is generally expected that the real estate market will pick up. Moreover, the government has set higher requirements for environmental protection in the "Thirteenth Five-Year" plan. We believe that the Low-E glass market will maintain rapid development in the future, however, the growth rate of the Low-E glass market will slow down comparatively as the development of the real estate market slows down due to government policies relating to the control on national macroeconomic development and regulation on the real estate market. As the Low-E glass industry is heavily affected by downstream industries, which are likely to be adversely affected by the governmental regulation and control in domestic real estate market, in order to reduce the negative effect of the fluctuation of the real estate market in China which closely affect our business of coated architectural glass, the Group started to shift its business focus to CTP module components since 2016. On the other

hand, with the continuous rapid development of electronic technology, China has become the largest production base and market of electronic products in the world. In 2017, Jiangsu Yutian had an annual production capacity of 7 million units CTP module components and had a market share of approximately 0.64% in China. We believe this will continue to stimulate the demand for electronic CTP module component products of the Group in an effective manner.

In order to increase the Group's competitiveness by providing more technological advanced products on a timely manner to cater to customers' need. Currently, we have three production lines – one for coated architectural glass and two for CTP module components, one of which commenced commercial production in June 2017. We are also in the process of developing and assembling another new production line to cope with the continuous demand of our on-cell CTP module components by our customers and the trial operation of such new production line is expected to be commenced in second half of 2018.

Furthermore, in view of the new development opportunities emerged in the electronic product market, the Group will actively seek acquisition or investment opportunities that can add value to the Company so as to enhance the position of the Group and its underlying value by satisfying the growing demand of the market. With the Company extensive experience in the field of coating and market data analysis, it is believed that the Group's strategic plan will seize related opportunities and bring new growth drivers to the development of the Group.

### **Contingent Liabilities**

A subsidiary of the Company was a defendant in a lawsuit filed in April 2015 in relation to a contract dispute. The plaintiff, who supplied equipment for the subsidiary's production of CTP module components, filed a lawsuit to request the subsidiary to make certain payments of RMB1.3 million under a purchase contract entered into between the plaintiff and the subsidiary, and claimed losses with accrued interest of approximately RMB0.2 million. The subsidiary filed a counterclaim against the plaintiff on the ground that the final product delivered by the plaintiff failed to meet the operating standard as agreed in the purchase contract. The subsidiary lost the lawsuit at the trial court and appealed

to the court of appeal. The court of appeal revoked the decision of the trial court and remanded the lawsuit to the trial court. As at 30 June 2018, the Group has accrued the amount payable in accordance with purchase contract. Up to the date of issue of this report, the case was under first trial. The Directors, based on the advice from its legal counsel, considered that it would be very unlikely that the Group will be fined and accordingly, except for the contract amount payable of RMB1.3 million, no provision has been made in respect of this claim.

The Directors did not recommend the payment of any dividend for the six months ended 30 June 2018 (2017: Nil).
