MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

The Group offers a comprehensive and wide range of services to meet its customers' needs, including air/sea freight forwarding and related services, trucking and warehousing related services. In addition, the Group provides value-added services such as supply chain management services including pick & pack, distribution and stock & inventory report, security escort services and tracking services. These services are complementary to one another, and provide customers a wide range of services with cost savings. Although the freight forwarding industry in Malaysia is highly fragmented and competitive, in particular, we directly and indirectly compete with other integrated logistics service providers on a local, regional and international basis in the form of pricing, range of services provided, information technology and network of customer, the Group will implement various strategies as stated in the prospectus of the Company dated 28 June 2016 (the "**Prospectus**") with the intention to strengthen our market position. The Group will closely monitor the market situations and make necessary adjustments to its strategies and operations.

For the six months ended 30 June 2019, our integrated logistics services can be broadly categorized into (1) air freight forwarding and related services; (2) sea freight forwarding and related services; and (3) transportation and warehousing related services.

3. Trucking and Related Services

(i) *Trucking and Related Services*

The Group's trucking and related services can be divided into two categories: (i) supporting service for its freight forwarding business; and (ii) service which does not involve sea freight or air freight.

Majority of the transportation revenue was from the supporting services for the Group's freight forwarding business including income from haulage and trucking services. Such revenue has been taken into account as part of the revenue generated from the air/sea freight forwarding services provided by the Group.

The revenue from the trucking services which does not involve air freight or sea freight accounted for approximately RM0.6 million and RM0.7 million for the six months ended 30 June 2019 and 2018, respectively. Revenue from such services mainly consists of delivery fee for trucking services. Such revenue is mainly driven by the volume of goods delivered, and the numbers of trips and types of customers served, among other factors.

(ii) ***Warehousing and Related Services***

The Group's self-owned warehouse was set up for operation in March 2016. The Group's warehousing business mainly serves a supporting role for its freight forwarding services. The Group's warehousing services provided in Port Klang mainly consisted of general warehousing services. The warehousing services provided in Kuala Lumpur and Penang airports mainly served as temporary storages of goods for the Group's international air freight business. Therefore, revenue from the Group's warehouse business only accounted for an insignificant portion of less than 1% of the Group's total revenue for the six months ended 30 June 2019 (2018: 1%).

Trading of used mobile phones business

The Group commenced its trading of used mobile phones in Hong Kong ("**New Business**") in the fourth quarter of 2018. The Board is of the view that the New Business will diversify the income stream of the Company and broaden its revenue base.

During the six months ended 30 June 2019, the Group recorded a revenue from the trading of used mobile phones of approximately RM4.1 million (2018: nil). It is expected that the New Business may also improve the capital usage efficiency of the Company and generate additional investment returns on the idle funds of the Company.

FUTURE PROSPECTS AND OUTLOOK

The Group aims to strengthen its position as an integrated logistics solution service provider in Malaysia. The Directors believe that there are (i) still plenty of room for growth for business in Penang given the fact that companies continue to set up new manufacturing plants in Penang; (ii) new business opportunities in Malacca, Johor and border of Thailand upon opening up of the borders of the ASEAN countries. To achieve this, the Group intends to further expand its business in major gateways of Malaysia and expand the scope of services to cover cross border trucking, haulage and rail freight.
