QUARTERLY  
REPORT  
2019**

## CHARACTERISTICS OF GEM (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

*Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.*

*This report, for which the directors (the “**Directors**”) of Xi’an Haitian Antenna Technologies Co., Ltd.\* (the “**Company**”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on the GEM (the “**GEM Listing Rules**”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief, the information contained in this report is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this report misleading.*

#### 4. INCOME TAX CREDIT

No provision for Hong Kong Profits Tax has been made as the Group did not generate assessable profits in Hong Kong for both periods.

Under the Law of the PRC on Enterprise Income Tax (the “EIT Law”) and Implementation Regulation of the EIT Law, the tax rate of the Company and the PRC subsidiaries is 25% for both periods.

The income tax credit represents a refund of tax overpaid in previous periods (2018: nil).

#### 5. DIVIDENDS

The Board does not recommend the payment of a dividend for the nine months ended 30 September 2019 (2018: nil).

#### 6. LOSS PER SHARE

The calculation of basic loss per share attributable to owners of the Company is based on the unaudited loss for the three months and nine months ended 30 September 2019 attributable to owners of the Company of RMB3,090,000 and RMB16,310,000 respectively (2018: RMB12,056,000 and RMB28,555,000 respectively) and the weighted average number of 1,531,058,824 (2018: 1,531,058,824) shares in issue during the period. The weighted average number of ordinary shares is the number of shares in issue at the beginning of the period, adjusted by the number of shares issued during the period multiplied by a time-weighting factor.

The diluted loss per share is equal to the basic loss per share as calculated above since the Company does not have any potential shares outstanding for the both periods.

## MANAGEMENT DISCUSSION AND ANALYSIS

### BUSINESS REVIEW

#### Revenue

Unaudited revenue of approximately RMB26.84 million was recorded for the nine months ended 30 September 2019 (the “**Review Period**”), representing approximately 149% of unaudited revenue for the corresponding period in the year of 2018. The significant increase in revenue was mainly attributable to the growth in revenue from the operating segments of sales of construction related products and sales of agricultural products by approximately RMB5.25 million and RMB3.34 million respectively during the Review Period.

No revenue was recognised for 5G products during the Review Period as no large-scale procurement was carried out by the telecommunication operators since the issue of 5G commercial licenses in June 2019. Approximately RMB1.87 million was come from sales of 4G antenna products which contributed approximately 7% to revenue of the Group for the Review Period.

Following the commencement of 5G commercialisation, the market demand for communication capacity of underwater surveillance products and unmanned aerial products were became higher and the Group concentrated to upgrade and improve existing underwater surveillance products and unmanned aerial products during the Review Period. Accordingly, merely 1% of revenue was attributable to the operating segment of sales of underwater surveillance and related products.

Approximately RMB19.38 million was recorded as revenue from the operating segment of sales of construction related products during the Review Period, which represented approximately 37% increase as when comparing to approximately RMB14.13 million for the corresponding period in the year of 2018. No sales order was completed in the third quarter of 2019 although the price was relatively stable than the corresponding period in the year of 2018.

There was significant growth in the revenue from the operating segment of sales of agricultural products from approximately RMB2.12 million for the corresponding period in the year of 2018 to RMB5.45 million for the Review Period, representing an increase of approximately 157%. The operation was steadily expanded to generate stable income to the Group.

#### Gross Profit

Because of the revenue growth in the operating segment of sales of agricultural products with reasonable profit margin, the unaudited gross profit margin for the Review Period was approximately 2.9%, compared to approximately 2.0% in the corresponding period of 2018.

## Other Revenue

Approximately RMB3.12 million and RMB0.93 million were recognised as liquidated damages received from a supplier and receipts from impaired trade receivables respectively for the operating segment of sales of antennas products and related services. The liquidated damages received from the supplier were penalties for the supplier's failure to meet the required product technical specifications.

## Segment Results

Distribution expenses were decreased from approximately RMB0.34 million in the corresponding period of 2018 to approximately RMB0.25 million for the Review Period as the Group did not perform any large-scale marketing and promotion activities during the Review Period.

After allocation of the liquidated damages received and the receipts from impaired trade receivables under other revenue, net loss on waiver of trade and other payables, and depreciation and amortisation expenses under administrative expenses, except for the operating segments of sales of unmanned aerial products and sales of construction related products, segment profit was reported for all other operating segments. The profit margin and sales volume of the operating segment of sales of construction related products were not sufficient to cover relevant operating costs, and the liquidated damages received resulted in segment profit for the operating segment of sales of antennas products and related services.

## Other Costs and Expenses

Administrative expenses for the Review Period was approximately RMB16.19 million which was more or less the same as the corresponding period in the year of 2018. The travelling expenses were decreased by approximately RMB0.47 million due to less business trips for operating activities, and the amortisation expenses of intangible assets was decreased by approximately RMB1.10 million due to fully impaired self-developed prototype. Legal and professional fees were increased by approximately RMB0.61 million for the purposes of full acquisition of an associate, and rental expenses were increased by approximately RMB0.56 million for expansion of office premises in Shanghai.

Interest expenses of approximately RMB3.07 million were incurred during the Review Period for the short-term bank borrowings of approximately RMB50.00 million which was for the operation purposes and was fully repaid in July 2019.

Unrealised loss on change in fair value of financial assets at fair value through profit or loss was approximately RMB1.98 million as the result of drop in market price during the Review Period. The financial assets were the investment in equity securities listed on the Shenzhen Stock Exchange. Accordingly, the fair value of financial assets at fair value through profit or loss as at 30 September 2019 was approximately 28% lower than the original acquisition costs.

Approximately RMB0.79 million was recorded as a share of operating loss of an associate during the Review Period, which was still at the commencement stage of operation.

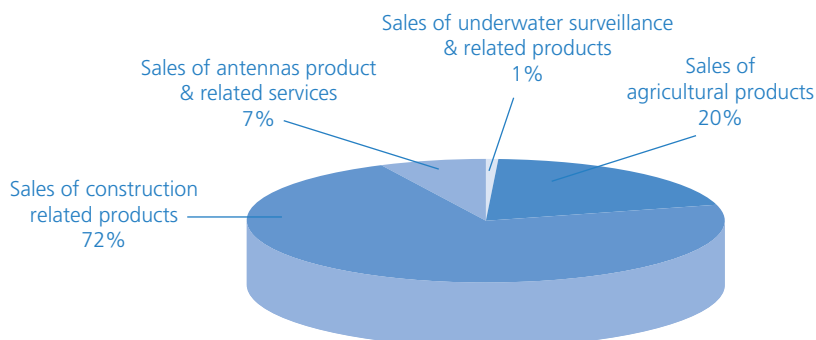

## Loss for the Period

As all expenses cannot be offset by low profit margin and low sales volume as a whole, loss of approximately RMB16.15 million was still reported for the Review Period. With a decrease in unrealised loss on change in fair value of financial assets at fair value through profit or loss by approximately RMB9.86 million when comparing to approximately RMB11.84 million for the corresponding period in the year of 2018, loss for the Review Period was approximately 43% less than the loss of approximately RMB28.57 million for the corresponding period in the year of 2018.

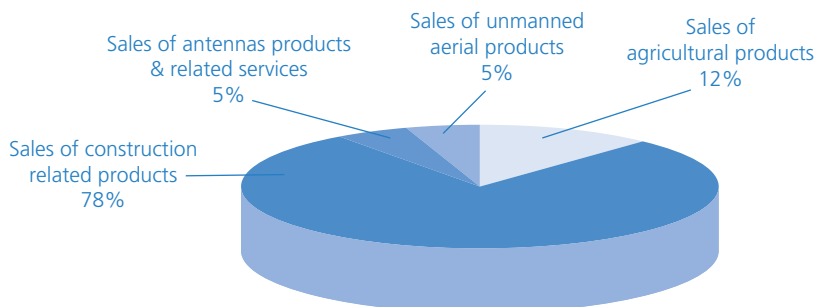

Loss attributable to owners of the Company was approximately RMB16.31 million after accounting for profit attributable to non-controlling interest of approximately RMB0.16 million in respect of sales of agricultural products.

Composite of Group's revenue by reportable and operating segments for the nine months ended 30 September 2019, together with the comparative figures for the corresponding period in the year of 2018, are provided as follows:

### For the nine months ended 30 September 2019

## PROSPECTS

In June 2019, the Ministry of Industry and Information Technology officially issued 5G commercial licenses to four companies including China Telecom, China Mobile, China Unicom and China Broadcasting Network Corporation Ltd. According to a forecast by the Global System for Mobile Communications Association (GSMA), the investment from China's telecom carriers in 5G will exceed RMB1 trillion by 2025. Therefore, the Company will pay more attention to expanding mobile communication-related business in the future.

In the third quarter of 2019, in response to the Group's development strategy in the mobile communication market, the Company carried out related work on the full acquisition of Suzhou Haitian New Antenna Technologies Co., Ltd.\* (蘇州海天新天綫科技有限公司) ("**Suzhou Haitian**"). The Company entered into the share transfer agreement with Xi'an Xiao's Antenna Technologies Co., Ltd.\* (西安肖氏天綫科技有限公司) and Mr. Liao Kang on 2 August 2019 and issued a circular on 25 October 2019. The acquisition is expected to be approved at the H shareholders' class meeting, the domestic shareholders' class meeting and the extraordinary general meeting and completed during the year. After the completion of the acquisition of Suzhou Haitian, with the Group's years of experience in mobile communication product development and system integration, mobile interconnection, mobile communication information technology services and its market strength and based on the artificial dielectric lens antenna products, the Group will fully integrate resources to actively seize the huge market opportunity in mobile communication, especially the 5G development, and continue to research and develop a series of base stations antenna products with different frequency bands that can be widely used in 4.5G, 5G mobile communications, and develop miniaturised, broadband, multi-beam, high-gain and all-angle-coverage new material series antenna products in WLAN, driverless cars, automotive electronics, the Internet of Things, smart cities and other industries, so as to promote the Company's research and development and technical strength, as well as enrich and improve the varieties of mobile communication series products. Meanwhile, the Group will give full play to the established marketing network in the communication industry and thoroughly carry out the marketing of the artificial dielectric lens multi-beam antenna to expand its market in the field of mobile communications and rapidly improve the Group's performance. Besides, the Group will continue to steadily promote the communication-related network planning, network optimisation, maintenance and inspection and other businesses so as to further ensure the Company's performance.

In addition, the Group will conduct business related to trading, underwater surveillance, agricultural products and others in an orderly manner for the purpose of cooperating with the diversified development strategies.

Concerning the funds required for production and operation, the Group will conduct fund raising in due course according to business development needs through bank borrowing, additional issuance, vitalising its existing assets and other various financing channels, so as to safeguard the Company's operation and development. The Board and the management of the Company will endeavour to develop the Group into a high-tech enterprise with diversified operations.
