MANAGEMENT DISCUSSION AND ANALYSIS

FINANCIAL REVIEW

For the nine months ended 30 September 2020, the Group recorded an unaudited consolidated turnover of approximately RMB32,635,000 (2019: RMB48,155,000), which represented a decrease of approximately 32.2% as compared with that of the corresponding period in 2019.

The decrease of turnover was mainly attributed to the drop in revenue the processing and trading of electronic parts. The income from processing and trading of electronic parts business has dropped by approximately RMB15,524,000 or 60.7% to approximately RMB10,065,000 (2019: RMB25,589,000). The decrease was due to the lower demand from customers given the unfavourable economic conditions in the PRC due to the outbreak of Novel Coronavirus ("COVID-19") and China-US trade war. During the Period, the demand in the loan market remained stable, the Group recorded a slightly increase of by approximately RMB4,000 or 0.02% in revenue from money lending business as compared with the corresponding period in 2019. The Group has derived interest income from our loan portfolio of approximately RMB22,570,000 for the Period (2019: RMB22,566,000).

The other gains and losses were mainly attributed to net unrealised loss of approximately RMB1,314,000 (2019: RMB614,000) recorded from the listed securities portfolio held by the Group as at 30 September 2020.

The general and administrative expenses for the Period increased by approximately RMB1,751,000 or 9.6% as compared with the corresponding period in 2019. The increase was mainly attributed to less corporate expenses incurred during the Period offset by the increase in allowance for expected credit losses and impairment loss on interest in associates.

Finance costs for the Period increased by approximately RMB526,000 or 18.6% as compared with the corresponding period in 2019. The finance costs for the Period represented the interest expenses on the unsecured bonds.

Loss attributable to owners of the Company for the Period amounted to RMB1,325,000 (2019: profit attributable to owners of the Company amounted to RMB3,551,000), which represented approximately RMB4,876,000 or 137.3% decrease as compared with the corresponding period in 2019. The aforesaid turnaround from profit to loss position was mainly due to the decrease in turnover and the increase in allowance for expected credit losses and impairment loss on interest in associates.

During the year ended 31 December 2019, the valuation method of discounted cash flow ("DCF") was adopted for the calculation of the value-in-use of the cash generating units of the associates. The key assumptions used in the calculations, i.e. the cash flow forecast, future revenue and gross profit growth, were based on historical data of the previous year adjusted by forward-looking information. The growth rate of both revenue and gross profit margin were 5%.

BUSINESS REVIEW AND FUTURE PROSPECT

During the Period, the Group continued to focus on the money lending business and processing and trading of electronic parts business.

Revenue earned from the processing and trading of electronic parts business was approximately RMB10,065,000 during the Period, which represented 30.8% of the total revenue. Since January 2020, the outbreak on COVID-19 has impacted the global business environment.
