CHAIRMAN'S STATEMENT

主席報告

As the Chairman and on behalf of the Board of Directors (the "Board"), I am pleased to present the audited consolidated result of Jilin Province Huinan Changlong Bio-pharmacy Company Limited (the "Company") and its subsidiaries (collectively referred to as the "Group") for the year ended 31 December 2020.

During the year under review, the total revenue of the Group for the year ended 31 December 2020 was approximately RMB622,250,000, representing a decrease of 3.7% as compared with RMB645,885,000 for the previous year. Profit for the year attributable to owners of the Company decreased to RMB126,558,000 from RMB144,726,000 last year. For the year ended 31 December 2020, basic earnings per share decreased to RMB22.59 cents from RMB25.83 cents last year.

The year 2020 was a very challenging year for the Company. The sudden COVID-19 outbreak has dealt a heavy blow on the global economy. We resumed work and production on the premise of ensuring safety as soon as possible after the epidemic to minimise the impact on our production and sales.

In recent years, due to the tightening environmental and resources constraints and the increasing national standards for pharmaceutical quality and environmental protection, production costs have been rising. The implementation of the pharmaceutical price control policy has led to a continuous decline in the overall price level of pharmaceutical products, and pharmaceutical companies are facing considerable pressure on their operations. However, we still overcame the impact of many factors and successfully completed the various project targets set at the beginning of the year. This year's achievements were the results of joint effort of our staff at all levels. As such, the Board would like to share its view on the Company's competitive edges with shareholders since these edges would allow the Company to achieve further success in the coming years.

本人謹代表董事會(「董事會」)欣然提呈吉林省 輝南長龍生化藥業股份有限公司(「本公司」)及 其附屬公司(合稱「本集團」)截至二零二零年 十二月三十一日止年度之經審核綜合業績。

於回顧年度內,截至二零二零年十二月 三十一日止年度本集團總收入約為人民幣 622,250,000元,較去年人民幣645,885,000 元減少3.7%。本年度本公司股權持有人應佔 溢利由去年人民幣144,726,000元減少至人民 幣126,558,000元。截至二零二零年十二月 三十一日止年度每股基本盈利由去年人民幣 25.83分減少至人民幣22.59分。

二零二零年,對公司來說,是極具嚴峻考驗的一年。新冠肺炎疫情突如其來,全球經濟受到了較大規模的衝擊,我們在疫後確保安全的情況下第一時間復工復產,最大限度的降低了疫情對企業生產和銷售的影響。

近幾年由於環境和資源約束加強,國家對藥品質量標準和環保標準不斷提高,企業生產成本不斷上升;藥品價格調控政策實施後,藥品整體價格水平持續下降,製藥企業面臨較大的經營壓力,我們依然克服了諸多因素影響,圓滿的完成年初確定各專案目標,本年業績是全體員工共同努力的成果。因此,董事會欣然與東分享本公司具有以下競爭力的優勢,該等優勢將為本公司以後之年度的發展再創新的輝煌。

管理層討論及分析

發行人為中國的持牌銀行,主要在中國從事提供企業及個人銀行以及其他金融服務。

The subscriptions of Wealth Management Products were carried out by the Group for treasury management purpose in order to maximize the utilization of its surplus cash received from its business operations, with a view to achieving balanced yields whilst maintaining high liquidity and a low level of risks. Taking into account of, among others, the low level of risks and the expected rates of return, the Group considers that the subscriptions will provide the Group with better returns than the returns on deposits generally offered by commercial banks and increase the Group's overall earnings in the long run. The Group will monitor and manage the subscriptions more closely and effectively. As at 31 December 2020, the Group did not experience any losses on the wealth management products. Further, the subscriptions were funded by the surplus cash of the Company and are redeemable on demand or highly liquid, therefore they would not affect the working capital or the operation of the Group. As such, the Directors are of the view that the subscriptions are fair and reasonable and in the interests of the Group and the Shareholders as a whole. The Group will continue to seek opportunities in utilising its idle cash by investing in appropriate Wealth Management Products.

本集團就庫務管理目的而認購理財產品,以盡 量利用自其業務營運所得的現金盈餘,以達致 收益平衡並維持較高資本流動性及較低風險。 考慮到(其中包括)較低風險及預期收益率;本 集團認為該等認購事項為本集團所帶來的回報 將較商業銀行一般提供的存款回報更佳,就長 遠而言可增加本集團的整體盈利。本集團將更 密切及更有效監察及管理該等認購事項。於二 零二零年十二月三十一日,本集團並未出現任 何理財產品方面的損失。此外,該等認購事項 乃以本集團盈餘現金撥付,可按要求贖回或流 動性高,因此不會對本集團的營運資金或營運 造成影響。因此,董事認為,該等認購事項屬 公平合理,並符合本集團及股東的整體利益。 本集團將繼續尋求機會透過投資合適理財產品 利用其閒置現金。

During the reporting year, the number of principal guaranteed Wealth Management Products in the market has been decreasing and the expected return on Wealth Management Products has been gradually decreasing, while the annual return rate on long term time deposits is increasing and making it closer the return between time deposits and Wealth Management Products. Based on a prudent investment strategy, the management has changed the direction of investment and used idle funds to invest in time deposits, making even safer for the Group.

在本報告年度內,市場中保本類型的理財產品 一直減少及理財產品預期收益率逐漸下降,而 有見存款近年的收益率顯著提高,縮小存款與 理財產品收益差距。因此,管理層基於穩健的 投資策略,轉變投資方向,利用閒置資金投資 定期存款,以達到更安全的投資。

The Group has established a Risk Management Committee to strengthen the assessment and management of investments in Wealth Management Products and time deposits, and conducts regular reviews of the Group's investment projects to control potential investment risks.

本集團已經成立了風險管理委員會,以加強對 理財產品及定期存款投資評估及管理,定期對 集團投資專案進行審查,以控制潛在的投資風 險。

Save as disclosed, there were no other significant investments held during the period under review.

除所披露者外,於回顧期內概無持有其他重大 投資。

As at 31 December 2020, the Group's investments in the Wealth Management Products were classified as financial assets at fair value through profit or loss in its consolidated balance sheet, and amounted to approximately RMB60,417,000 (2019: RMB683,483,000). For the year ended 31 December 2020, the gain realised by the Group from the Wealth Management Products amounted to approximately RMB7,721,000 (2019: RMB11,428,000). BASIS OF OPINION

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSAs") issued by the HKICPA. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the HKICPA's Code of Ethics for Professional Accountants (the "Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgement, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matters identified in our audit are summarised as follows:

 Impairment of trade receivables and contract assets, advances to staff and other receivables

KEY AUDIT MATTERS (continued)

Impairment of trade receivables and contract assets, advances to staff and other receivables

Refer to Note 3, Note 24 and 25 to the consolidated financial statements for the related disclosures. As at 31 December 2020, gross trade receivables and contract assets, advances to staff and other receivables of the Group amounted to RMB392 million, RMB23 million and RMB65 million respectively, which accounted for approximately 22%, 1% and 4% of the Group's total assets respectively. The allowance for expected credit losses of trade receivables and contract assets, advances to staff and other receivables amounted to RMB139 million, RMB14 million and RMB20 million respectively, all of which was attributable to customers located in China.

Management judgement is required in assessing and determining the recoverability of trade receivables and contract assets, advances to staff and other receivables and adequacy of allowance made using the expected credit losses ("ECL") model under HKFRS 9 "Financial Instruments". These judgement includes estimating and evaluating expected future receipts from the receivables based on historical experience, ageing analysis, subsequent settlement status, past collection history, current economic conditions and forward looking information.

We focused on this area due to the magnitude of the receivables and the estimation and judgement involved in the determination of the recoverable amounts of trade receivables and contract assets, advances to staff and other receivables.

關鍵審計事項(續)

應收貿易賬款及合約資產,向員工墊款及 其他應收款項的減值

有關相關事項的披露,請參閱綜合財務報表附註3、附註24及附註25。於二零二零年十二月三十一日, 貴集團的應收貿易賬款及合約資產,向員工墊款及其他應收款項總額約為人民幣3.92億元、人民幣0.23億元及人民幣0.65億元,佔 貴集團總資產約22%、1%及4%。應收貿易賬款及合約資產,向員工墊款及其他應收款項的減值撥備約為人民幣1.39億元、人民幣0.14億元及人民幣0.2億元,當中全部源自中國的客戶。

根據香港財務報告準則第9號金融工具,評估 及釐定應收貿易賬款及合約資產,向員工墊款 及其他應收款項的可收回性及使用預期信貸虧 損(「預期信貸虧損」)模式計提的撥備是否充足 時須管理層作出判斷。該等判斷包括基於過往 經驗、應收款賬齡分析、報告期結束後的收款 情況、過往收款記錄、當前經濟情況及前瞻性 資料。

我們關注此範疇是鑑於應收賬款及合約資產, 向員工墊款及其他應收款項的重大數額,以及 在釐定應收款可收回金額時涉及的估計和判 斷。

KEY AUDIT MATTERS (continued)

How our audit addressed the Key Audit Matter

Our audit procedures in relation to the management's assessment on recoverability of trade receivables and contract assets, advances to staff and other receivables included:

- Understood the credit control procedures performed by the management, including its procedures on periodic review on aged receivables and assessment on recoverability of these receivables;
- Evaluating the management's impairment assessment of receivables;
- Assessing the reasonableness of management's loss allowance estimates by examining the information used by management to form such judgements, including testing the accuracy of the historical default data, evaluating whether the historical loss rates are appropriately adjusted based on current economic conditions and forward-looking information;
- Tested on a sample basis, the accuracy of ageing profile on receivables by checking to the underlying source documents; and
- Tested subsequent settlement of receivables balances. Where settlement had not been received subsequent to the year end for those unprovided aged receivables beyond the credit period as at year end, we obtained the management's assessment on the recoverability of these debts and corroborated explanations with historical settlement pattern and underlying correspondence with the relevant customers.

Based upon the above, we are satisifed that the estimation and judgement made by the management in respect of the collectability of receivables were supportable by the available evidence.

關鍵審計事項(續) 我們的審計如何處理關鍵審計事項

我們對有關管理層評估應收貿易賬款及合約資產,向員工墊款及其他應收款項可收回性之審計程序包括:

- 理解管理層執行的信用監控程序,包括 其對定期審閱逾期應收款項及評估該等 應收款項可收回性的程序;
- 評估管理層的應收賬款減值評估;
- 一 透過檢查管理層達致有關判斷時所用資料,評估管理層對虧損撥備的估計是否合理,包括測試歷史違約數據之準確性,根據當前經濟狀況及前瞻性資料評估歷史虧損率是否已適當調整;
- 透過檢查相關原始文件,以抽樣方式測 試應收賬款賬齡之準確性;及
- 測試應收賬款結餘於結算日後的償付情況。對於在年結日已超出其信貸期而未撥備的逾期應收款項在年末後仍未有付款,我們取得了管理層對該等應收賬款可收回性所作的評估,並透過相關客戶過往的償付模式和有關的往來信函佐證其解釋。

基於上述各項,我們有證據支持管理層就應收款項可收回性所作的估計及判斷。

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. We report our opinion solely to you, as a body, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(d) New standards, amendments and interpretation of HKFRSs issued but are not effective for the financial year beginning on 1 January 2020 and have not been early adopted by the Group (continued)

The directors of the Company anticipate that the application of all the new and amendments to HKFRSs above will have no material impact on the consolidated financial statements in the foreseeable future.

(e) Consolidation

A subsidiary is an entity (including a structured entity) over which the Group has control. The Group controls an entity when the Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are consolidated from the date on which control is transferred to the Group. They are deconsolidated from the date that control ceases.

(i) Business combination

The Group applies the acquisition method to account for business combinations. The consideration transferred for the acquisition of a subsidiary is the fair values of the assets transferred, the liabilities incurred to the former owners of the acquiree and the equity interests issued by the Group. The consideration transferred includes the fair value of any asset or liability resulting from a contingent consideration arrangement. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. The Group recognises any non-controlling interest in the acquiree on an acquisition-by-acquisition basis, either at fair value or at the non-controlling interest's proportionate share of the recognised amounts of acquiree's identifiable net assets. Acquisition-related costs are expensed as incurred.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(e) Consolidation (continued)

(i) Business combination (continued)

If the business combination is achieved in stages, the acquisition date carrying value of the acquirer's previously held equity interest in the acquiree is re-measured to fair value at the acquisition date; any gains or losses arising from such re-measurement are recognised in profit or loss.

Any contingent consideration to be transferred by the Group is recognised at fair value at the acquisition date. Subsequent changes to the fair value of the contingent consideration that is deemed to be an asset or liability is recognised in accordance with HKAS 39 either in profit or loss or as a change to other comprehensive income. Contingent consideration that is classified as equity is not remeasured, and its subsequent settlement is accounted for within equity.

(ii) Changes in ownership interests in subsidiaries without change of control

Transactions with non-controlling interests that do not result in loss of control are accounted for as equity transactions — that is, as transactions with the owners of the subsidiary in their capacity as owners. The difference between fair value of any consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

(e) Consolidation (continued)

(iii) Disposal of subsidiaries

When the Group ceases to have control, any retained interest in the entity is re-measured to its fair value at the date when control is lost, with the change in carrying amount recognised in profit or loss. The fair value is the initial carrying amount for the purposes of subsequently accounting for the retained interest as an associate, joint venture or financial asset. In addition, any amounts previously recognised in other comprehensive income in respect of that entity are accounted for as if the Group had directly disposed of the related assets or liabilities. This may mean that amounts previously recognised in other comprehensive income are reclassified to profit or loss.

(iv) Separate financial statements

Investment in subsidiaries are included in the Company's balance sheet at cost less impairment. The results of subsidiaries are accounted for the Company on the basis of dividends received and receivables.

Impairment testing of the investment in subsidiaries is required upon receiving dividends from these investments if the dividend exceeds the total comprehensive income of the subsidiary in the period the dividend is declared or if the carrying amount of the investment in the separate financial statements exceeds the carrying amount in the consolidated financial statements of the investee's net assets including goodwill.

(f) Biological assets

Biological assets are living animals and plants managed by the Group which is involved in the agricultural activities of the transformation of biological assets for sale or into agricultural product.

Biological assets are measured at fair value less estimated point-of-sale costs at initial recognition and at each balance sheet date. The fair value of these biological assets is determined based on active market prices in the local market with reference to comparable age, breed and genetic merit. The gain or loss arising on initial recognition and subsequent changes in fair values less estimated point-of-sale costs of biological assets is recognised in profit or loss in the period in which it arise. Biological assets that are in the stage of cultivation or do not have a quoted market price in an active market and whose fair value cannot be reliably measured are recognised in the balance sheet at cost less any impairment losses.

(g) Property, plant and equipment

Property, plant and equipment is stated at historical cost less accumulated depreciation and any impairment losses. Historical cost includes expenditure that is directly attributable to the acquisition of the items. Subsequent costs are included in the assets carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably. The carrying amount of the replaced part is derecognised. All other repairs and maintenance are charged to the consolidated statement of profit or loss and other comprehensive income during the financial period in which they are incurred.

Depreciation is calculated using the straight-line method to allocate their costs or revalued amounts to their residual value over their estimated useful lives. The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at the end of each reporting period. The principal annual rates are as follows:

Buildings 10 to 30 years
Plant and machinery 6 years
Transportation equipment 8 years
Furniture, fixtures and equipment 5 years

(g) Property, plant and equipment (continued)

An asset's carrying amount is written down immediately to its recoverable amount if the asset's carrying amount is greater than its estimated recoverable amount.

Gains or losses on the disposal are determined by comparing the proceeds with the carrying amount and are recognised in the consolidated statement of profit or loss and other comprehensive income.

(h) Transfer from property, plant and equipment to investment property carried at cost

The Group transfers a property from property, plant and equipment to investment property when there is a change of use to hold the property to earn rentals or/and for capital appreciation rather than for its own use in the ordinary course of business.

(i) Investment property

Investment property is property held to earn rentals and/or for capital appreciation.

Investment property is initially measured at cost, including any directly attributable expenditure. Subsequent to initial recognition, investment property is stated at cost less subsequent accumulated depreciation and any accumulated impairment losses. Depreciation is recognised so as to write off the cost of investment properties over their estimated useful lives using the straight-line method.

An investment property is derecognised upon disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from its disposals. Any gain or loss arising on derecognition of the property (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the profit or loss in the period in which the property is derecognised.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(i) Leases

The Group assesses at contract inception whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration.

Group as a lessee

The Group applies a single recognition and measurement approach for all leases, except for short-term leases and leases of low-value assets. The Group recognises lease liabilities to make lease payments and right-of-use assets representing the right to use the underlying assets.

(a) Right-of-use assets

Right-of-use assets are recognised at the commencement date of the lease (that is the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and any impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognised, initial direct costs incurred, and lease payments made at or before the commencement date less any lease incentives received. Right-of-use assets are depreciated over the lease term of the leasehold land.

(b) Short-term leases and leases of low-value assets

The Group applies the short-term lease recognition exemption to its short-term leases of machinery and equipment (that is those leases that have a lease term of 12 months or less from the commencement date and do not contain a purchase option). Lease payments on short-term leases and leases of low-value assets are recognised as an expense on a straight-line basis over the lease term.

(k) Construction in progress

Construction in progress represents buildings, plant and equipment under construction and pending installation, and is stated at historical cost less any impairment losses. No depreciation is made on construction in progress until such time as the relevant property, plants and equipment are available for use. Cost comprises all construction expenditure and other direct costs of construction. Construction in progress is transferred to the appropriate category of property, plant and equipment when the asset being constructed becomes available to use.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(I) Intangible assets

(i) Purchased know-how and prescription

Purchased know-how and prescription are stated at historical cost less accumulated amortisation and impairment losses. Amortisation is charged on a straight-line basis over their estimated useful lives, which range from 5 to 12 years from the date of commercial production. The estimated useful life and amortisation method are reviewed at the end of each balance sheet date, with the effect of any changes in estimate being accounted for on a prospective basis.

(ii) Research and development expenditure

Expenditure on research activities is recognised as an expense in the financial period in which it is incurred. Expenditure on development activities is capitalised if the product or process is technically and commercially feasible and the Group has sufficient resources and the intention to complete development. The expenditure capitalised includes the costs of materials, direct labour, and appropriate proportion of overheads and borrowing costs, where applicable. Capitalised development costs are stated at historical cost less accumulated amortisation and impairment losses. Amortisation begins when development is completed and the assets is available for use. Other development expenditure is recognised as an expense in the financial period in which it is incurred.

(iii) Purchased in-process research and development assets acquired through separate purchase

In-process research and development assets acquired through separate purchase are recognised as intangible assets at historical cost less accumulated amortisation and impairment losses.

Amortisation and impairment assessment are accounted for in a similar manner as internal development expenditure set out in (ii) above.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(m) Impairment of non-financial assets

Assets that have an indefinite useful life — for example, goodwill or intangible assets not ready to use — are not subject to amortisation and are tested annually for impairment. Assets that are subject to amortisation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value in use. For the purpose of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal of the impairment at each reporting date.

(n) Inventories

Inventories are stated at the lower of cost and net realisable value. Cost is determined using the weighted average cost formula. The cost of finished goods and work in progress comprises raw materials, direct labour, other direct costs and related production overheads (based on normal operating capacity). It excludes borrowing costs. Net realisable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses.

(o) Financial assets

(a) Classification

The Group classifies its financial assets in the following measurement categories:

- those to be measured subsequently at fair value (either through other comprehensive income ("OCI") or through profit or loss), and
- those to be measured at amortised cost.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(o) Financial assets (continued)

(a) Classification (continued)

The classification depends on the entity's business model for managing the financial assets and the contractual terms of the cash flows.

For assets measured at fair value, gains and losses will either be recorded in profit or loss or OCI. For investments in equity instruments that are not held for trading, this will depend on whether the Group has made an irrevocable election at the time of initial recognition to account for the equity investment at fair value through other comprehensive income ("FVOCI").

(b) Recognition and derecognition

Regular way purchases and sales of financial assets are recognised on trade-date, the date on which the Group commits to purchase or sell the asset. Financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Group has transferred substantially all the risks and rewards of ownership.

(c) Measurement

At initial recognition, the Group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss ("FVPL"), transaction costs that are directly attributable to the acquisition of the financial asset.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(o) Financial assets (continued)

(c) Measurement (continued) Equity instruments

The Group subsequently measures all equity investments at fair value. Where the Group's management has elected to present fair value gains and losses on equity investments in OCI, there is no subsequent reclassification of fair value gains and losses to profit or loss following the derecognition of the investment. Dividends from such investments continue to be recognised in profit or loss as other income when the Group's right to receive payments is established.

Changes in the fair value of financial assets at FVPL are recognised in other losses in the statement of profit or loss as applicable. Impairment losses (and reversal of impairment losses) on equity investments measured at FVOCI are not reported separately from other changes in fair value.

(d) Impairment

The Group assesses on a forward looking basis the expected credit losses associated with its financial assets carried at amortised cost. The impairment methodology applied depends on whether there has been a significant increase in credit risk.

For trade receivables, the Group applies the simplified approach permitted by HKFRS 9, which requires expected lifetime losses to be recognised from initial recognition of the receivables, see note 3(b) for further details.

(p) Cash and cash equivalents

In the consolidated statement of cash flows, cash and cash equivalents include cash in hand, deposits held at call with banks, and other short-term highly liquid investments with original maturities of three months or less, and bank overdrafts. In the consolidated and entity balance sheet, bank overdrafts are shown within "bank borrowings" in current liabilities.

(q) Current and deferred income tax

The tax expense for the period comprises current and deferred tax. Tax is recognised in the consolidated statement of profit or loss, except to the extent that it relates to items recognised in consolidated other comprehensive income or directly in equity. In this case, the tax is also recognised in consolidated other comprehensive income or directly in equity, respectively.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the balance sheet date in the countries where the Company and its subsidiaries operate and generate taxable income. The management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulation is subject to interpretation. It establishes provisions where appropriate on the basis of amounts expected to be paid to the tax authorities.

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the consolidated financial statements. However, deferred tax liabilities are not recognised if they arise from the initial recognition of goodwill, the deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (or laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(q) Current and deferred income tax (continued)

Deferred income tax assets are recognised only to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised.

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes assets and liabilities relate to income taxes levied by the same taxation authority on either the taxable entity or different taxable entities where there is an intention to settle the balances on a net basis.

(r) Provisions

Provisions for environmental restoration, restructuring costs and legal claims are recognised when: the Group has a present legal or constructive obligation as a result of past events; it is probable that an outflow of resource will be required to settle the obligation; and the amount has been reliably estimated. Restructuring provisions comprised lease termination penalties and employee termination payments. Provisions are not recognised for future operating losses.

Where there are a number of similar obligations, the likelihood that an outflow will be required in settlement is determined by considering the class of obligations as a whole. A provision is recognised even if the likelihood of an outflow with respect to any one item included in the same class of obligations may be small.

Provisions are measured at the present value of the expenditures expected to be required to settle the obligation using a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the obligation. The increase in the provision due to passage of time is recognised as interest expense.

(s) Foreign currency translation

(i) Functional and presentation currency

Items included in the financial statements of each of the Group's entities are measured using the currency of the primary economic environment in which the entity operates (the "functional currency"). The financial statements are presented in Renminbi ("RMB"), which is the Company's functional and the Group's presentation currency.

(ii) Transactions and balances

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transactions or valuation where items are re-measured. Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year- end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the consolidated statement of profit or loss, except when deferred in equity as qualifying cash flow hedges and qualifying net investment hedges.

Foreign exchange gains and losses that relate to borrowings and cash and cash equivalents are presented in the consolidated statement of profit or loss within "finance income or cost". All other foreign exchange gains and losses are presented in the consolidated statement of profit or loss income statement within "other gains and/(losses)". Currency translation differences arising are recognised in consolidated other comprehensive income.

Changes in the fair value of monetary securities denominated in foreign currency classified as available for sale are analysed between translation differences resulting from changes in the amortised cost of the security and other changes in the carrying amount of the security. Translation differences related to changes in amortised cost are recognised in profit or loss, and other changes in carrying amount are recognised in consolidated other comprehensive income.

(iii) Group companies

The results and financial position of all the group entities (none of which has the currency of a hyper-inflationary economy) that have a functional currency different from the presentation currency are translated into the presentation currency as follows:

- (b) income and expenses for each statement of profit or loss are translated at average exchange rates (unless this average is not a reasonable approximation of the cumulative effect of the rates prevailing on the transaction dates, in which case income and expenses are translated at the dates of the transactions); and
- (c) all resulting exchange differences are recognised in other comprehensive income.

Goodwill and fair value adjustments arising on the acquisition of a foreign entity are treated as assets and liabilities of the foreign entity and translated at the closing rate. Currency translation differences arising are recognised in consolidated other comprehensive income.

(v) Borrowings

Borrowings are recognised initially at fair value, net of transaction costs incurred. Borrowings are subsequently carried at amortised cost; any difference between the proceeds (net of transaction costs) and the redemption value is recognised in the consolidated statement of profit or loss and other comprehensive income over the period of the borrowings using the effective interest method.

Fees paid on the establishment of loan facilities are recognised as transaction costs of the loan to the extent that it is probable that some or all of the facilities will be drawn down. In this case, the fee is deferred until the draw-down occurs. To the extent there is no evidence that it is probable that some or all of the facility will be drawn down, the fee is capitalised as a prepayment for liquidity services and amortised over the period of the facility to which it relates.

Borrowings are classified as current liabilities unless the Group has an unconditional right to defer settlement of the liability for at least 12 months after the end of the reporting period.

(w) Trade and other receivables

Trade receivables are amounts due from customers for merchandise sold or services performed in the ordinary course of business. Trade and other receivables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less allowance for impairment (see note 2(o)(d) for a description of impairment policy). If collection of trade and other receivables is expected in one year or less (or in the normal operating cycle of the business if longer), they are classified as current assets. If not, they are presented as non-current assets.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(y) Revenue recognition

Revenue is measured at the fair value of the consideration received and receivable, and represents amounts receivable for goods supplied or service performed, stated net of rebates and returns. The Group recognises revenue when the amount of revenue can be reliably measured; when it is probable that future economic benefits will flow to the entity; and when specific criteria have been met for each of the Group's activities, as described below. The Group bases its estimates of returns on historical results, taking into consideration the type of customers, the type of transactions and the specifics of each arrangement.

Sales of goods

Revenue from the sale of good directly to the customers is recognized at the point that the control of the inventory have passed to the customers, which is primarily upon the acceptance of the products by the customers. The customers have full discretion over the products, and there is no unfulfilled obligation that could affect the customers' acceptance of the products.

Interest income

Interest income is recognised as it accrues using the effective interest method. For financial assets measured at amortised cost that are not credit-impaired, the effective interest rate is applied to the gross carrying amount of the asset.

A contract asset represents the Group's right to consideration in exchange for goods or services that the Group has transferred to a customer that is not yet unconditional. It is assessed for impairment in accordance with HKFRS 9. In contrast, a receivable represents the Group's unconditional right to consideration, i.e. only the passage of time is required before payment of that consideration is due.

A contract liability represents the Group's obligation to transfer goods or services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer. If a customer pays consideration before the Group transfers goods or services to the customer, a contract liability is recognised when the payment is made or the payment is due (whichever is earlier). Contractual liabilities are recognised as revenue when the Group performs under the contract.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

(z) Trade and other payables

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Trade payables are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities.

(aa) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker, who is responsible for allocating resources and assessing performance of the operating segments, has been identified as the executive directors that makes strategic decisions.

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

Estimates and judgements are continuously evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

The Group makes estimates and assumptions concerning the future. The resulting accounting estimates will, by definition, seldom equal the related actual results. The estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are addressed below.

(a) Impairment of non-financial assets

The Group tests annually whether assets have suffered any impairment in accordance with the accounting policy stated in note 2(m). The recoverable amounts of cashgenerating units have been determined based on value-inuse calculations. The value-in-use calculation requires the Group to estimate the future cash flows expected to arise from the cash-generating unit and a suitable discount rate in order to calculate present value, which has been prepared on the basis of the management's assumptions and estimates.

2. 重大會計政策概要(續)

(z) 應付貿易賬款及其他應付款項

應付貿易賬款是本集團在日常運作過程中從供應商購買貨品或使用服務產生的支付責任。如果應付貿易賬款預計將在一年或一年以內支付(或更長的業務正常經營周期範圍內的時間),則分類為流動負債。否則,其將呈列為非流動負債。

(aa) 分類報告

經營分類之呈報方式與向主要營運 決策者提供之內部報告貫徹一致。 主要營運決策者負責分配資源及評 估經營分類表現,其已被確認為作 出策略性決策之執行董事。

3. 關鍵會計估計及判斷

估計及判斷會不斷予以評估,並以過往 經驗及其他因素(包括在有關情況下相信 為合理的未來事件預測)為依據。

本集團會對未來作出估計及假設。所導致的會計估計,顧名思義,甚少與有關實際結果相符。具有重大風險須於下一財政年度內對資產及負債的賬面值作出重大調整的估計及假設載列如下。

(a) 非金融資產減值

根據附註2(m)所述的會計政策,本 集團每年測試資產是否出現減值。 現金產生單位之可收回金額以使用 價值法釐定。在計算使用價值時, 本集團需估計現金產生單位之未來 現金流量,並以適當之折現率計算 其現值,此乃根據管理層的假設及 估計編製。

3. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS (continued)

(b) Provision of ECL for trade receivables and contract assets, advances to staff and other receivables

The Group uses provision matrix to calculate ECL for the trade receivables. The provision rates are based on management judgement as groupings of various debtors that have similar loss patterns. The provision matrix is based on the Group's historical default rates taking into consideration forward-looking information that is reasonable and supportable available without undue costs or effort. At the end of each reporting period, the historical observed default rates are reassessed and changes in the forward-looking information are considered. In addition, trade receivables with significant balances and credit impaired are assessed for ECL individually. The provision of ECL is sensitive to changes in estimates. The information about the ECL and the Group's trade receivables are disclosed in note 38.

(c) Estimation of useful lives of property, plant and equipment and intangible assets

The Group's management determines the estimated useful lives and related depreciation or amortisation charges for its property, plant and equipment and intangible assets. This estimate is based on the historical experience of the actual useful lives of property, plant and equipment and purchase know-how and prescription of similar nature and functions. It could change significantly as a result of technical innovations and competitor actions in response to severe industry cycles. Management will increase the depreciation or amortisation charge where useful lives are less than previously estimated lives, or it will write-off or write-down technically obsolete or non-strategic assets that have been abandoned or sold.

(d) Income taxes

The Company is subject to income tax in the PRC. Significant judgement is required in determining the provision for income tax. There are many transactions and calculations for which the ultimate tax determination is uncertain. The Company recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the current and deferred income tax assets and liabilities in the period in which such determination is made.

(b) 應收貿易賬款及合約資產,向 員工墊款及其他應收款項的預 期信貸虧損撥備

(c) 物業、廠房及設備以及無形資 產可使用年期之估計

(d) 所得税

本公司須繳納中國之所得稅。於釐 定所得稅撥備時須作出重大判斷項 在公司有頗多未能確定最終稅預期項 交易及計算。本公司於確認預期 項審核事宜之負債時,建基於預期 出現預外應繳稅項之預測。倘認錄 事宜之最終稅務結果與初步記試錄 金額不同,有關差額將影響作出發 定之期間內之即期及遞延所得稅資 產及負債。

Financial risk management (continued)

(a) Credit risk (continued)

The expected loss rates are based on the historical monthly outstanding balances of trade receivables of 36 months before 31 December 2020 and the corresponding historical credit losses experienced within this period. The historical loss rates are adjusted to reflect current and forwardlooking information on macroeconomic factors affecting the ability of the customers to settle the receivables.

As at 31 December 2020, 1.9% (2019: 2.3%) and 7.3% (2019: 7.6%) of the total trade receivables was due from the Group's largest customer and the five largest customers, respectively.

The carrying amount of the trade and other receivables, contract assets, financial assets at fair value through profit or loss, and cash and bank balances and financial assets included in the consolidated balance sheet represents the Group's maximum exposure to credit risk in relation to the Group's financial assets.

The Group's management performs periodic credit evaluations/reviews of its customers and ensure that sales are made to customers with an appropriate credit history. The Group places deposits with major banks in Mainland China, to limit the amount of credit exposure to any financial institution. The Group has trade receivables from sales of products that are subject to HKFRS 9's new expected credit loss model. The Group applies the HKFRS 9 simplified approach to measuring expected credit losses which uses a lifetime expected loss allowance for all trade receivables from initial recognition. To measure the expected credit losses, trade receivables have been grouped based on shared credit risk characteristics and the ageing days. The expected loss rates are based on the payment profiles of sales and the corresponding historical credit losses experienced. The historical loss rates are adjusted to reflect current and forward-looking information on macroeconomic factors affecting the ability of the customers to settle the receivables. 38. FINANCIAL RISK MANAGEMENT (continued)

Financial risk management (continued)

(c) Interest rate risk

The Group's interest rate risk arises primarily from its borrowings from the bank and the Huinan County Finance Bureau. Borrowings at variable rates expose the Group to cash flow interest rate risk. The Group's interest rate profile as monitored by the management is set out below:

38. 財務風險管理(續) 財務風險管理(續)

(c) 利率風險

本集團的利率風險主要來自銀行及 輝南縣財政局的借貸。按浮動利率 作出的借款令本集團面對現金流量 利率風險。受管理層監控的本集團 利率概況載列如下:

	20: 二零二		2019 二零一九年	
	Effective interest rate 實際利率	interest rate		
	%	RMB'000 人民幣千元	%	RMB'000 人民幣千元
Variable rate borrowings 浮息借貸 Loan from government 政府機關貸	款			
authority	1.8	400	1.8	2,350

The interest rate and terms of repayment of the Group's borrowings are disclosed in Note 30 to the financial statements.

At 31 December 2020, it was estimated that a general increase or decrease of 100 basis points in interest rates, with all other variables held constant, would decrease or increase the Group's profit after taxation and retained profits by RMB4,000 (2019: RMB23,500).

The sensitivity analysis above has been determined assuming that the change in interest rates had occurred at the balance sheet date and had been applied to the exposure to interest rate risk for the borrowings in existence at that date. The 100 basis point increase or decrease represents the management's assessment of a reasonably possible change in interest rates over the period until the next annual balance sheet date.

(d) Currency risk

The Group mainly operated in the PRC with most of the transactions settled in Renminbi and did not have significant exposure to risk resulting from changes in foreign currency exchange rates.

本集團的借貸利率及還款期於財務 報表附註30披露。

於二零二零年十二月三十一日,假設其他變數不變,倘整體利率上升或下降100個基點,估計將導致本集團稅後溢利及保留溢利減少或增加人民幣4,000元(二零一九年:人民幣23,500元)。

上述敏感度分析乃假設利率已於結算日有所變動,且已計入於該日的借貸利率風險後釐定。上升或下降100個基點為管理層對截至下一年度結算日止期間利率可能出現的合理變動的評估。

(d) 貨幣風險

本集團主要於中國經營業務,大部 分交易以人民幣結算,故概無因外 幣匯率變動而產生的重大風險。

Financial risk management (continued)

(e) Price risk

The Group is not exposed to any equity price risk or commodity price risk.

(f) Fair value estimation

(i) Fair value hierarchy

This section explains the judgements and estimates made in determining the fair values of the financial instruments that are recognised and measured at fair value in the financial statements. (f) 公允值估計

(i) 公允值層級

該章節説明釐定於財務報表 中按公允值確認及計量的財 務工具的公允值的判斷及 計。為得出釐定公允值所用 輸入數據的可信程度指標, 本集團根據會計準則將其金 融工具分為三層。

There were no transfers between levels 1 and 2 for recurring fair value measurements during the year. For transfers in and out of level 3 measurements see (ii) below.

The Group's policy is to recognise transfers into and transfers out of fair value hierarchy levels as at the end of the year.

38. FINANCIAL RISK MANAGEMENT (continued)

Financial risk management (continued)

- (f) Fair value estimation (continued)
 - (i) Fair value hierarchy (continued)

Level 1: The fair value of financial instruments traded in active markets is based on quoted market prices at the end of the year. The quoted market price used for financial assets held by the Group is the current bid price. These instruments are included in level 1.

Level 2: The fair value of financial instruments that are not traded in an active market (for example, overthe-counter derivatives) is determined using valuation techniques which maximise the use of observable market data and rely as little as possible on entity-specific estimates. If all significant inputs required to fair value an instrument are observable, the instrument is included in level 2.

Level 3: If one or more of the significant inputs is not based on observable market data, the instrument is included in level 3. This is the case for unlisted equity securities.

38. 財務風險管理(續) 財務風險管理(續)

- (f) 公允值估計(續)
 - (i) 公允值層級(續)

第一層級:於活躍市場上交易的金融工具的公允值是按年末的市場報價計算。本集團所持金融資產使用的市場報價是現行買入價。該等工具會被列入第一層級。

第三層級:倘一項或多項重要輸入數據並非根據可觀察市場數據釐定,則有關工具會被列入第三層級。此為未上市股本證券之情況。
