

西安海天天綫科技股份有限公司
Xi'an Haitian Antenna Technologies Co., Ltd.*

(a joint stock limited company incorporated in the People's Republic of China with limited liability)
(Stock Code: 8227)

FIRST QUARTERLY REPORT
2021

* for identification purposes only

CHARACTERISTICS OF GEM (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

*This report, for which the directors (the “**Directors**”) of Xi’an Haitian Antenna Technologies Co., Ltd.* (the “**Company**”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM (the “**GEM Listing Rules**”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief, the information contained in this report is accurate and complete in all material respects and not misleading or deceptive, and there are no other matters the omission of which would make any statement herein or this report misleading.*

HIGHLIGHTS

- During the three months ended 31 March 2021, the Group recorded an unaudited net loss of approximately RMB2.79 million, comparing to the unaudited net loss of approximately RMB4.76 million for the corresponding period in the year of 2020.
- The unaudited total operating income for the three months ended 31 March 2021 was approximately RMB7.84 million, representing approximately 441% of the unaudited total operating income for the corresponding period in the year of 2020.
- The Board does not recommend the payment of a dividend for the three months ended 31 March 2021 (2020: nil).

CONSOLIDATED RESULTS FOR THE THREE MONTHS ENDED 31 MARCH 2021

The board of Directors (the “**Board**”) hereby submits the unaudited consolidated results of the Company and its subsidiaries (the “**Group**”) for the three months ended 31 March 2021, together with the unaudited comparative figures for the corresponding period in the year of 2020 as follows:

22. SEGMENT INFORMATION

Analysis of Group's income and results by reportable and operating segments:

	1 January to 31 March 2021	1 January to 31 March 2020
Main business income:		
Sales of antenna products and provision of related services	6,032,137.89	663,716.81
Sales of underwater monitoring products and related products	-	-
Sales of aircraft products	-	-
Sales of agricultural products	1,679,737.69	983,820.35
	<hr/> 7,711,875.58	<hr/> 1,647,537.16
Segment profit (loss):		
Sales of antenna products and provision of related services	472,103.09	(2,866,854.28)
Sales of underwater monitoring products and related products	(85,776.83)	(307.44)
Sales of aircraft products	(163,493.63)	(36,727.09)
Sales of agricultural products	(3,887.11)	(416,100.72)
Unallocated portion	(11,420.64)	(177,846.56)
	<hr/> 207,524.88	<hr/> (3,497,836.09)
Unallocated income and gain	474,664.40	2,678,064.89
Unallocated costs, expenses, loss and expenditure	(3,472,002.75)	(3,941,060.73)
	<hr/> Total profit ("-" for total loss)	<hr/> (4,760,831.93)

23. EARNINGS PER SHARE

The calculation of basic earnings per share is based on the unaudited net profit attributable to owners of the parent company of (2,767,107.24) (2020: (RMB4,554,627.42)) and the weighted average number of 1,897,629,000 (2020: 1,697,629,000) shares in issue during the period. The weighted average number of ordinary shares is the number of shares in issue at the beginning of the period, adjusted by the number of shares issued during the period multiplied by a time-weighting factor.

The diluted earnings per share is equal to the basic earnings per share as calculated above since the Company does not have any potential shares outstanding for the both periods.

24. DIVIDENDS

The Board does not recommend the payment of a dividend for the three months ended 31 March 2021 (2020: nil).

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

Total Operating Income

The unaudited total operating income for the three months ended 31 March 2021 was approximately RMB7.84 million, representing approximately 441% of the unaudited total operating income for the corresponding period in the year of 2020.

The Company has been mainly engaged in the research and development of mobile communication technologies since its establishment. The Company, together with a number of subsidiaries, provided mobile communication network operators, mobile communication equipment suppliers and system integration suppliers with the most advanced mobile communication base station antenna products, network optimisation services, and maintenance and inspection services.

In response to the market demand for 5G technologies of mobile communication, the Group developed a series of artificial dielectric lens antenna products (the “**Dielectric Lens Antennas**”) for 7 years. By the end of 2020, the Dielectric Lens Antennas obtained 6 invention patents and 17 utility patents. The Dielectric Lens Antennas, with the characteristics of low energy consumption, high gain, large capacity, and small size, not only can be applied to 5G technologies, but can also reduce investment costs for construction and maintenance costs for operation, effectively solving critical issues of large capital requirement in the construction and development for 5G technologies and excessive energy consumption for operation.

Since the introduction of the Dielectric Lens Antennas to the market in 2019, they have been recognised and praised by customers, through a series of network field tests in different provinces across the country to demonstrate their unique performance, in the past two years of promotion work. As of the first quarter of 2021, the Dielectric Lens Antennas obtained cumulative sales orders of approximately RMB13.63 million, of which approximately RMB2.77 million and approximately RMB6.03 million were recognised as operating income in 2020 and the first quarter of 2021 respectively. The operating income from the operating segment of sales of antenna products and the provision of related services accounted for approximately 78% of the main business income in the first quarter of 2021, representing an increase of approximately 809% compared with the corresponding period in the year of 2020.

Mobile communication technologies have been applied by the Group to other fields including underwater surveillance products and unmanned aerial vehicles for large loading and transportation since 2015. The operating segments of sales of underwater surveillance and related products, and sales of aircraft products began to record operating income in 2015 and 2017 respectively. With the commercialisation of 5G technologies of mobile communication in 2019, the requirements of markets and customers for the communication technologies of products began to change and were continuously updated in response to the widespread use of 5G technologies. The Group considered that mobile communication is a key industry for the country to develop in the next few years, so some of the available resources were allocated to the operating segment of sales of antenna products and provision of related services to meet the gradually increasing production scale of the Dielectric Lens Antennas.

The operating segment of sales of underwater surveillance and related products still maintained technology research and development and after-sales technical support, and provided customised products and services to existing customers such as research institutes and universities. In addition to maintaining the operation of technology research and development and improvement, the operating segment of sales of aircraft products also monitored market development of unmanned aerial vehicles for large loading and transportation, and maintained communication with the industry to ensure that subsequent new products can meet market needs. No operating income was recorded for both operating segments in the first quarter of 2021.

Relying on certain preferential policies in Shanghai Free Trade Zone, the Group established the operating segment of sales of construction related products in 2016 which was mainly engaged in the trading of construction materials. As different customers had specific requirements for building materials which were very sensitive to exchange rate fluctuation, all sales and purchases were conducted in back-to-back trading in order to minimise inventory risk and price fluctuation risk. After consideration of the prolonged unstable factors of exchange rate fluctuations and requirements of large amount of working capital, the Group did not actively develop the relevant operations since last year. Accordingly, no operating income was recorded in the first quarter of 2021.

The Group carried out the production and sales of agricultural products, mainly live chicken, chicken meat and related non-staple foods, and established the operating segment of sales of agricultural products since 2016 in order to actively respond to the national policy on poverty alleviation and fulfil its social responsibilities. In addition to establishing a social image for the Group, the sales of agricultural products gradually became stable income to the Group. Approximately RMB1.68 million operating income was generated from the operating segment of sales of agricultural products, representing approximately 22% of the main business income in the first quarter of 2021 and an increase of approximately 71% compared with the corresponding period in the year of 2020.

Gross Profit

During the three months ended 31 March 2021, an unaudited gross profit of approximately RMB4.24 million was recorded which represented gross profit margin of approximately 54.03%, comparing to the unaudited gross profit margin of approximately 4.84% in the corresponding period of 2020. The improvement in gross profit margin was mainly attributable to significant increase in the operating income from the operating segment of sales of antenna products and provision of related services in the first quarter of 2021.

Segment Performance

Segment performance was evaluated after considering gross profit, selling expenses, depreciation and amortisation expenses under administrative expenses, research and development expenses, credit and assets impairment loss of each operating segment.

Selling expenses were increased from approximately RMB0.09 million for the corresponding period in the year of 2020 to approximately RMB0.63 million for the three months ended 31 March 2021 due to increase in payroll and delivery charges for the sales of antenna products.

Research and development expenses were increased slightly from approximately RMB2.27 million for the corresponding period in the year of 2020 to approximately RMB2.91 million for the three months ended 31 March 2021 which were solely used for antenna products.

No impairment loss was recognised for receivables and assets for the three months ended 31 March 2021.

After the deployment and integration of the existing resources of the Group in order to meet the needs of the sales orders and production process of the Dielectric Lens Antennas, the operating segment of sales of antenna products and the provision of related services recorded a segment profit of approximately RMB0.47 million. The production capacity has gradually operated at the normal level and the production scale has been able to make up for the operating costs and relevant expenses.

In order to complete the sales of agricultural products before the long Chinese New Year holiday, the gross profit was affected due to the low market prices at that time and segment loss was recorded even though the operating income from the segment of sales of agricultural products increased significantly.

Since no operating income was generated from the operating segments of sales of underwater surveillance and related products, and sales of aircraft products, segment losses were recorded.

Other Expenses, Expenditure, Gain and Income

Administrative expenses were decreased from approximately RMB4.96 million for the corresponding period in the year of 2020 to approximately RMB3.75 million for the three months ended 31 March 2021 due to decrease in relevant expenses in respect of rented office as a result of deployment of resources within the Group.

Financial expenses were increased from approximately RMB0.05 million for the corresponding period in the year of 2020 to approximately RMB0.12 million for the three months ended 31 March 2021 of which approximately RMB0.11 million was attributable to the increase in the interest expenses of lease liabilities.

Approximately RMB0.31 million was received as government subsidy for the three months ended 31 March 2021, but no such other gain was recognised for the corresponding period in the year of 2020.

Gain of approximately RMB0.10 million was recognised as financial assets measured at fair value through profit or loss for the three months ended 31 March 2021, comparing to approximately RMB2.54 million for the corresponding period of 2020. It was because the shareholdings of the investment were dropped from 5,080,004 shares to 880,004 shares by the end of 2020.

Net Loss

Although there was a decrease of approximately RMB2.44 million in gain from changes in fair value for the three months ended 31 March 2021, there was a significant increase in total operating income by approximately RMB6.06 million with as high as 54.03% gross profit margin. During the three months ended 31 March 2021, the Group recorded an unaudited net loss of approximately RMB2.79 million, comparing to the unaudited net loss of approximately RMB4.76 million for the corresponding period in the year of 2020.

Composite of the Group's main business income by reportable and operating segments for the three months ended 31 March 2021, together with the comparative figures for the three months ended 31 March 2020, are provided as follows:

**For the three months ended
31 March 2021**

**For the three months ended
31 March 2020**

PROSPECTS

The Group made strategic adjustments and preparation for the production of sales orders that were obtained and expected to be obtained for the Dielectric Lens Antennas. Based on the results of network field tests and technologies exchanges carried out in 28 provinces previously, the Group will continue to increase communication with customers, deepen technologies and business exchanges with them, understand customer needs in a timely manner, and follow up related bidding and procurement plans. The Group believes that more orders could be obtained in the subsequent bidding and procurement work.

For the operating segment of sales of agricultural products, based on the existing stable customer base, the Group will make full use of poverty alleviation policy and resources to strive to expand the customer base and actively expand the business of this segment in order to make a contribution to the improvement in the performance of the Group.

The Group will focus on the development of the operating segment of sales of antenna products and provision of related services, and will pay close attention to the working capital required to complete sales orders. In addition to bank borrowings, the Group will also consider financing through issuance of shares and bonds to ensure smooth operation and development.

DIRECTORS', SUPERVISORY COMMITTEE MEMBERS' (THE "SUPERVISORS") AND CHIEF EXECUTIVES' INTERESTS AND SHORT POSITIONS IN THE SHARES, UNDERLYING SHARES AND DEBENTURES OF THE COMPANY AND ITS ASSOCIATED CORPORATIONS

As at 31 March 2021, the interests and short positions of the Directors, Supervisors (as if the requirements applicable to the Directors under the Securities and Futures Ordinance (the "**SFO**") (Chapter 571 of the Laws of Hong Kong) had applied to the Supervisors) and chief executives of the Company in the shares (the "**Shares**"), underlying Shares and debentures of the Company or its associated corporations (within the meaning of Part XV of the SFO) which were required to be notified to the Company and the Stock Exchange pursuant to Divisions 7 and 8 of Part XV of the SFO (including interests or short positions which they were taken or deemed to have under such provisions of the SFO); or which were required, pursuant to Section 352 of the SFO, to be entered in the register referred to therein; or which were required to be notified to the Company and the Stock Exchange pursuant to the required standard of dealings by Directors as referred to in Rules 5.46 to 5.67 of the GEM Listing Rules, were as follows:

Long positions in domestic shares of the Company (“Domestic Shares”)
