FIRST QUARTERLY REPORT

CHARACTERISTICS OF GEM (“GEM”) OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been established as a market designed to accommodate companies to which a high investment risk may be attached. In particular, companies may list on GEM with neither a track record of profitability nor any obligation to forecast future profitability. Furthermore, there may be risks arising out of the emerging nature of companies listed on GEM and the business sectors or countries in which the companies operate. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration. The greater risk profile and other characteristics of GEM mean that it is a market more suited to professional and other sophisticated investors.

Given the emerging nature of companies listed on GEM, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

The principal means of information dissemination on GEM is publication on the internet website operated by the Stock Exchange. Listed companies are not generally required to issue paid reports for disclosure of information in gazetted newspapers. Accordingly, prospective investors should note that they need to have access to the GEM website in order to obtain up-to date information on GEM listed issuers.

The Stock Exchange takes no responsibility for the contents of this report, makes no representation as to its accuracy or completeness and expressly disclaims any liability whatsoever for any loss however arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors (the “Directors”) of Shaanxi Northwest New Technology Industry Company Limited collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM of the Stock Exchange (the “GEM Listing Rules”) for the purpose of giving information with regard to Shaanxi Northwest New Technology Industry Company Limited. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief: (i) the information contained in this report is accurate and complete in all material respects and not misleading; (ii) there are no other matters the omission of which would make any statement in this report misleading; and (iii) all opinions expressed in this report have been arrived at after due and careful consideration and are founded on bases and assumptions that are fair and reasonable.

NOTES TO THE CONDENSED INTERIM ACCOUNTS

1. BASIS OF PREPARATION AND ACCOUNTING POLICIES

The accounting policies and methods of computation adopted in the preparation of this quarterly accounts are consistent with those used in the annual accounts for the year ended 31 December 2018, with the exception of adoption of the Statements of Standard Accounting Practice (SSAP) No.12 Income Tax (revised) ("SSAP 12 (revised)") issued by the Hong Kong Institute of Certified Public Accountants.

The principal effect of the implementation of SSAP 12 (revised) is on deferred tax. In previous years, no material un-provided deferred tax existed in the relevant periods or as at respective balance sheet dates. SSAP 12 (revised) requires the adoption of the balance sheet liability method, whereby deferred tax, with a few exceptions, is recognized in respect of all temporary differences between the carrying amount of assets and liabilities in the financial statements and the corresponding tax bases used in the computation of taxable profit. The adoption of SSAP 12 (revised) has no material effect on the results of the current or prior accounting periods.

Certain comparative figures have been reclassified to conform with the presentation of the current period.

MANAGEMENT DISCUSSION AND ANALYSIS

In the year 2020, due to the impact of the COVID-19 epidemic, the production line of the Company's Weinan Branch was shut down for an extended period of time, resulting in the failure of most production process pipelines and some key equipment to be used due to corrosion and thus the Company was unable to resume production quickly after the epidemic. As at the end of December 2020, the Company decided to carry out repair and renovation of the original production line with a view to resuming production of key products as soon as possible, so that the Company's overall operations could be restored to normal conditions prior to the epidemic as far as possible. As at the date of this report, the repair and renovation work of the production line at the Weinan Branch was completed and passed the overall joint testing. The production line has met the requirements for product production and commenced trial production since May.

The management of the Company believes that the Company's principal business will expedite its recovery as the production line resumes production upon completion of the renovation. The management will further intensify its efforts in this regard and strive to bring the production capacity of the production line and overall operating capacity of the Company to the original level or above prior to the epidemic, so as to minimise the losses caused thereby. In the meantime, the Company will continue to expand its business ideas and continue to cultivate new growth points, thus laying a foundation for the Company's future sustainable development.
