CHARACTERISTICS OF GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board and no assurance is given that there will be a liquid market in the securities traded on GEM.

MANAGEMENT DISCUSSION AND ANALYSIS

Financial Review

For the three months ended 31 March 2022 (the “Reporting Period”), the Group recorded a turnover of RMB679,704,000, representing an increase of RMB45,563,000 or 7.18% as compared with the turnover of RMB634,141,000 for the corresponding period last year. This was mainly attributable to the growth in the logistics procurement and related logistics services business of the Group as compared with the corresponding period last year.

For the three months ended 31 March 2022, the Group recorded an overall gross profit margin of 5.15%, representing a decrease of 1.8 percentage points as compared with 6.95% of the corresponding period last year. The decrease in overall gross profit margin was mainly due to the increase in the proportion of the logistics procurement and related logistics services business, and decrease in the gross profit margin of logistics and supply chain services for finished automobiles and components business.

For the three months ended 31 March 2022, profit attributable to the equity holders of the Group was RMB15,373,000, representing a growth of RMB2,791,000 or 22.18% as compared with the profit of RMB12,582,000 in the corresponding period last year. The main reason for the performance growth is that Tedahang has recorded continuous growth after turning a loss into profit in 2020, while the Group’s finance cost has decreased.

Business Review

The principal businesses of the Group are logistics and supply chain services for finished automobiles and components, logistics and supply chain services for electronic components, materials procurement and related logistics services, cold chain logistics business and other services such as bonded warehouse, supervision and agency services. During the Reporting Period, following the gradual economic recovery of the PRC, total turnover of the Group and profit attributable to the equity holders increased as compared with the corresponding period last year.
