MANAGEMENT DISCUSSION AND ANALYSIS

Business Review

In accordance with the requirements of the provincial government to carry out remedial work in textile enterprises (印染企業整治工作) during the Reporting Period, the Group has proactively cooperated with the relevant government departments and formulated a remediation plan tailor-made for the Group, where our major goals of remediation are to save energy, reduce carbon emissions, adopt green manufacturing and digital production procedures, and achieve quality development, targets which are conducive to the healthy and stable development of the Group. Meanwhile, the remedial work carried out on the water-jet looms in Jiapu Town and the shutdown of the water-jet loom production line of the Group have brought a certain amount of economic loss, as well as opportunities, to the Group during the Reporting Period. Besides maintaining the business relationships with our customers with established business relationships, we have also been working hard to find new customers, to increase our market share. Due to the influence of the increase in the raw material prices and the surging energy prices, the increase in our revenue during the Reporting Period is smaller than expected, and the Group recorded a decrease in our gross profit for the Reporting Period.

During the Reporting Period, the Group increased promotional efforts for its new products. A market has formed for eco-friendly functional fabric products, as domestic and overseas customers have started the application of those products with positive responses. The Group will continue to focus on the development of domestic and overseas markets for its products. During the Reporting Period, provided that existing resources remain unchanged, the Group has adjusted and arranged our production site more reasonably and conducted technical upgrade on our three printing and dyeing production lines. Business volume for the domestic printing and dyeing and processing sectors has begun to reach scale.

The Group put a strong emphasis on investment in the research and development of new products and technology. During the Reporting Period, the Group continued its research and development on environmental-friendly functional fabrics. The first postdoctoral researcher has successfully completed his studies in the Group's postdoctoral work station, while the second postdoctoral researcher has successfully joined the station. During the Reporting Period, the continuous spread of sporadic novel coronavirus (COVID-19) (the "**Pandemic**") have posed challenges to different industries in the PRC. The Group has implemented precautionary measures to mitigate the risk of outbreak of the Pandemic in the production facilities of the Group and to create a healthy and hygienic working environment, including implementation of measures for conducting thorough contact tracing whenever any of our employees is infected and continuous trainings on precautionary measures and personal hygiene etc..

Financial Review

Revenue

Our total revenue was approximately RMB77.5 million for the three months ended 31 March 2022 (2021: approximately RMB76.5 million), representing an increase of 1.3% as comparing with the revenue of the Reporting Period with the corresponding period of last year. The increase in revenue was mainly due to the gradual recovery of market demand as a result of the relative control of the Pandemic in the market during the Reporting Period as compared with the three months ended 31 March 2021.

Revenue from the sales of fabrics decreased by approximately RMB11.5 million or 21.9% from approximately RMB52.6 million for the three months ended 31 March 2021 to approximately RMB41.1 million for the three months ended 31 March 2022, reflecting the decrease in total volume of fabrics sold from approximately 9.4 million metres for the three months ended 31 March 2021 to approximately 7.7 million metres for the three months ended 31 March 2022.

With a view to diversifying our source of revenue, the Group also provided printing and dyeing services in the PRC. Such increase was mainly attributable to the increase in the prices of raw materials and other inventory costs which was in line with the increase in sales volume during the Reporting Period.

The increase of approximately RMB0.5 million for the three months ended 31 March 2022 compared to that for the three months ended 31 March 2021 was mainly due to the increase in dividend received from financial asset mandatorily measured at FVTPL of approximately RMB1.0 million while partially offset by the decrease in government subsidies of approximately RMB0.3 million and the decrease in interest income of approximately RMB0.3 million.

Government subsidies represented the subsidies received from local government in connection with the enterprise development support, innovation capabilities incentives and various tax refund during the Reporting Period. The government subsidies were in general discretionary with varying amounts depending on each of the subsidy programmes.

Our selling and distribution expenses increased by approximately RMB0.1 million or 9.1% from approximately RMB1.1 million for the three months ended 31 March 2021 to approximately RMB1.2 million for the three months ended 31 March 2022. The increase was mainly due to an increase in transportation expenses.

Administrative expenses

Our administrative expenses primarily consist of (i) staff costs; (ii) professional service fee; (iii) entertainment expenses; (iv) depreciation of property, plant and equipment and amortisation of intangible assets; and (v) travelling expenses. Our administrative expenses was approximately RMB2.8 million for the three months ended 31 March 2022 which represents a decrease of approximately RMB0.3 million or 9.7% when compared to approximately RMB3.1 million for the three months ended 31 March 2021.

Research expenditure

The Group has been focusing on research and development of efficient and environmental-friendly technology for textile printing and dyeing. The Group carried out its research and development projects at its laboratory in the Huzhou Production Facilities. The Group's research expenditure was approximately RMB1.5 million for the three months ended 31 March 2022 (2021: approximately RMB2.2 million). The expenditure comprised of (i) the costs of the staff involving in the Group's research and development projects; (ii) the direct usage of raw materials for pilot-run of production and testing purpose; and (iii) the depreciation of the research and development machinery and equipment. The decrease of approximately RMB0.7 million was mainly due to the decrease in direct usage of different materials during the testing and analysing process.

Finance costs

For the three months ended 31 March 2022, the Group's finance costs amounted to approximately RMB1.0 million (2021: approximately RMB1.0 million). Profit for the period attributable to the equity holders of the Company

As a result of the foregoing, the profit for the period attributable to the equity holders of the Company decreased by approximately RMB0.3 million or 21.4% from approximately RMB1.4 million for the three months ended 31 March 2021 to approximately RMB1.1 million for the three months ended 31 March 2022.

Dividends

The Board resolved not to recommend payment of any dividends for the three months ended 31 March 2022 (2021: nil).

Future Outlook

During the Reporting Period, the impact of the continued spread of the Pandemic and international factors such as the trade frictions between China and the US continued to bring instability in the development of the textile industry in the PRC. Although demand for printing and dyeing services remained stable, the business of the Group has been adversely impacted to a certain degree due to disruptions in international logistics, the continuous rise in the price of raw materials, and the appreciation of the Renminbi, which resulted in a drop in profit from sale of its products. While the textile industry continues to be affected by domestic and international issues, the combined effect of technological advancement, safety management, and environmental protection has made it necessary for us to further improve our overall competitiveness. As a result of the effect of “the survival of the fittest”, existing enterprises are forced to transform and upgrade, the pace of industrial product restructuring and upgrading is expected to accelerate, and industrial consolidation is expected to be raised gradually.

In 2022, market competition is expected to be even more intense and is expected to feature more challenges and uncertainties. Stepping into the 20th anniversary of the Group, 2022 is expected to be a critical year for the Group’s implementation of high-quality intelligent manufacturing process, as well as the final stage of the remedial work in textile enterprises in Changxing. Standing at the starting point of a new journey, we must uphold the principles of “practicing new ideas, embracing the new era, befriending the virtuous and walk with the wise, leading the world with integrity, and innovating for the future”, and the employees of the Group shall endeavour to promote the stable and strong development of the Company.

The Group’s general strategic approach is: powered by innovation, centered on profitability, driven by market trends, and guided by sales, increasing its ability to rapidly respond to the market. To this end, the Group will develop and execute the following strategies:

- (1) Putting greater emphasis on developing higher quality products as a goal, leading the industry in sustainable development through accountability and technological innovation;

- (2) Further enhancing research and development on eco-friendly functional fabrics, expanding our business team, changing our marketing model, developing new ideas, expanding the industry chain, organising sales for finished products, marketing our products directly to end consumers by promoting them through live-stream sales on online platforms, developing markets with new products, and increasing market share;
- (3) Strengthening the information construction of the Group, developing environmentally-oriented strategies, completing the automation of production and data collection, completing the work of Changxing Province to further rectify its printing and dyeing performance and increase its acceptance rate; and
- (4) Seeking common welfare for the society, our employees, and their family members in a rational manner, and further exploring new projects and new platforms for sharing prosperity on the existing basis, to find new ways to achieve common prosperity.

Following our successful Listing on GEM of The Stock Exchange of Hong Kong Limited (the “**Stock Exchange**”) on 26 February 2019, we benefited from a strong capital platform which will be conducive to taking our business to the next level. We are positive about the market outlook and our outstanding capability and competitive edge, which will enable us to capitalise growth opportunities ahead.
