MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW AND OUTLOOK

The Group is principally engaged in the design and development, manufacturing and sales of disposable plastic food storage containers in the People's Republic of China (the "PRC"). Mr. Xu Youjiang ("Mr. Xu"), the chairman and executive director of the Company, is responsible for the overall management, strategic development and major decision-making of the Group.

The Group facilitates production of a comprehensive range of disposable plastic food storage containers, including the design and production of moulds, which are mainly sold to customers in the PRC, with a small portion of the sales to customers in overseas countries, including the United States, Australia, Saudi Arabia and the Republic of Trinidad and Tobago.

For the six months ended 30 June 2022, the revenue of the Group recorded an increase primarily due to the demands for the Group's disposable plastic food storage containers having increased and remaining at a high level.

Looking forward, the Directors consider that the Group will continue to be affected by external opportunities and challenges such as the popularity of environmentally friendly disposable plastic food storage containers, advances in production technologies and competition from substitutes, such as disposable food storage containers in the market made of other materials. The Directors are of the view that maintaining product safety and focusing on environmental protection, brand promotion, expansion of sales channels and product customisation remain to be the key drivers for the growth of the disposable plastic storage container business. With the Group's experienced management team and reputation in the market, the Directors consider that the Group is well-positioned to compete against its competitors under such future challenges that are commonly faced by all competitors, and the Group will continue to strengthen its market position in the industry and expand its market share by the implementation of the Group's business plans through utilisation of the net proceeds from the listing of the Company's shares (the "Shares") on GEM of the Stock Exchange on 13 July 2020 (the "Listing").

In view of the rapidly growing trend over the past few years of the film industry and enhancement of regulatory environment and favorable policies in the PRC, the Directors believe that the investment in film projects at this moment will enable it to leverage the opportunities that the pandemic in the PRC has gradually eased and popular entertainment needs will rebound, and seize the opportunity in the emerging film industry. For which, the Group entered into the equity sale and purchase agreements dated 10 September 2021 and supplemental agreements (the "Supplemental Agreements") dated 20 January 2022, to acquire 100% equity interest of June Pictures & Media Limited ("June Pictures") with total consideration RMB20,571,430. This acquisition was completed on 27 April 2022. The Directors believe that this investment will bring considerable income to the Group and is a suitable investment, which will also expand the business scope of the Group.

In addition, the e-commerce market in the PRC has continued to grow over the past few years. The Group acquired 100% interest in Beijing Youpinhui Trading Co., Ltd.* (北京優拼匯商貿有限公司) ("Beijing Youpinhui") through acquisition of Youpinhui Enterprise Limited ("Youpinhui Enterprise"), which held Beijing Youpinhui, on 1 June 2022. Beijing Youpinhui is engaged in the development and operation of mobile app and e-commerce platform namely Youpinhui* (優拼匯), enabling its users to purchase daily necessities and agricultural products via the mobile app with around 40,000 daily active users. In July 2022, the Group further launched a new e-commerce APP platform Yihe Tianxia* (易和天下), which is an online shopping platform covering daily necessities, beauty and skin care, household appliances, domestic special agricultural products and others, and provides innovative and interesting group purchase methods to meet customers' consumption needs.

The Group will continue to develop commercial business, continuously optimise customer experience, broaden its revenue stream and ultimately maximise shareholder returns.

3. SIGNIFICANT ACCOUNTING POLICIES *(continued)*

Adoption of new and amended HKFRSs *(continued)*

The adoption of the new and amended HKFRSs had no material impact on how the results and financial position for the current and prior periods have been prepared and presented.

The Group has not applied any new standards, interpretations or amendments to standards and interpretations that is not yet effective for the current accounting period.

Accounting policies not included in the consolidated financial statements for the year ended 31 December 2021

(a) Business combination

Acquisitions of subsidiaries and businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. Acquisition-related costs are recognised in profit or loss as incurred.

Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity in the acquiree (if any) over the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed. If, after assessment, the net of the acquisition-date amounts of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value on the acquirer's previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as bargain purchase gain.

Where the consideration the Group transfers in a business combination includes assets or liabilities resulting from a contingent consideration arrangement, the contingent consideration is measured at its acquisition-date fair value and considered as part of the consideration transferred in a business combination. Changes in the fair value of the contingent consideration that qualify as measurement period adjustments are adjusted retrospectively, with the corresponding adjustments being made against goodwill or gain on bargain purchase. Measurement period adjustments are adjustments that arise from additional information obtained during the measurement period about facts and circumstances that existed as of the acquisition date. Measurement period does not exceed one year from the acquisition date. The subsequent accounting for changes in the fair value of the contingent consideration that do not qualify as measurement period adjustments depends on how the contingent consideration is classified. Contingent consideration that is classified as equity is not remeasured at subsequent reporting dates and its subsequent settlement is accounting for within equity. Contingent consideration that is classified as a financial liability is remeasured at subsequent reporting dates at fair value with corresponding gain or loss being recognised in profit or loss.

Changes in the value of the previously held equity interest recognised in other comprehensive income and accumulated in equity before the acquisition date are reclassified to profit or loss when the Group obtains control over the acquiree.

NOTES TO THE INTERIM FINANCIAL REPORT

For the six months ended 30 June 2022

3. SIGNIFICANT ACCOUNTING POLICIES *(continued)*

Accounting policies not included in the consolidated financial statements for the year ended 31 December 2021 *(continued)*

(a) Business combination *(continued)*

If the initial accounting for a business combination is incomplete by the end of the reporting period in which the combination occurs, the Group reports provisional amounts for the items for which the accounting is incomplete. Those provisional amounts are adjusted during the measurement period, or additional assets or liabilities are recognised, to reflect new information obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the amounts recognised as of that date.

(b) Goodwill

Goodwill arising in a business combination is recognised as an asset at the date that control is acquired (the acquisition date). Goodwill is measured as the excess of the aggregate of the fair value of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer's previously held equity interest in the acquiree (if any) over the Group's interest in the net fair value of the acquiree's identifiable assets and liabilities measured as at the acquisition date.

If, after reassessment, the Group's interest in the fair value of the acquiree's identifiable net assets exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer's previously held equity interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

Goodwill is stated at cost less accumulated impairment losses. Goodwill is allocated to cash-generating units and is tested annually for impairment.

On subsequent disposal of a subsidiary, the attributable amount of goodwill capitalised is included in the determination of the amount of gain or loss on disposal.

(c) Impairment of non-financial assets

Goodwill and other intangible assets with indefinite useful life or those not yet available for use are tested for impairment at least annually, irrespective of whether there is any indication that they are impaired. All other assets are tested for impairment whenever there are indications that the asset's carrying amount may not be recoverable.

An impairment loss is recognised as an expense immediately for the amount by which the asset's carrying amount exceeds its recoverable amount. Recoverable amount is the higher of fair value, reflecting market conditions less costs of disposal, and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pretax discount rate that reflects current market assessment of time value of money and the risk specific to the asset.

For the purposes of assessing impairment, where an asset does not generate cash inflows largely independent from those from other assets, the recoverable amount is determined for the smallest group of assets that generate cash inflows independently (i.e., a cash-generating unit). As a result, some assets are tested individually for impairment and some are tested at cash-generating unit level. Goodwill in particular is allocated to those cash-generating units that are expected to benefit from synergies of the related business combination and represent the lowest level within the Group at which the goodwill is monitored for internal management purpose and not be larger than an operating segment.

NOTES TO THE INTERIM FINANCIAL REPORT

For the six months ended 30 June 2022

3. SIGNIFICANT ACCOUNTING POLICIES *(continued)*

Accounting policies not included in the consolidated financial statements for the year ended 31 December 2021 *(continued)*

(c) Impairment of non-financial assets *(continued)*

Impairment losses recognised for cash-generating units, to which goodwill has been allocated, are credited initially to the carrying amount of goodwill. Any remaining impairment loss is charged pro rata to the other assets in the cash generating unit, except that the carrying value of an asset will not be reduced below its individual fair value less cost of disposal, or value in use, if determinable.

An impairment loss on goodwill is not reversed in subsequent periods. In respect of other assets, an impairment loss is reversed if there has been a favourable change in the estimates used to determine the asset's recoverable amount and only to the extent that the asset's carrying amount does not exceed the carrying amount that would have been determined, net of depreciation or amortisation, if no impairment loss had been recognised.

Impairment losses recognised in an interim period in respect of goodwill are not reversed in a subsequent period. This is the case even if no loss, or a smaller loss, would have been recognised had the impairment been assessed only at the end of the financial year to which the interim period relates.

(d) Financial assets at fair value through profit or loss ("FVTPL")

Financial assets at FVTPL are initially measured at fair value. Transaction costs of financial assets carried at FVTPL are expensed in profit or loss.

Financial assets that are held within a different business model other than "hold to collect" or "hold to collect and sell" are categorised at FVTPL. Further, irrespective of business model, financial assets whose contractual cash flows are not solely payments of principal and interest are accounted for at FVTPL. All derivative financial instruments fall into this category, except for those designated and effective as hedging instruments, for which the hedge accounting requirements under HKFRS 9 apply.

4. ESTIMATES AND JUDGEMENTS

The preparation of condensed consolidated interim financial information requires management to make accounting judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets and liabilities, income and expenses. Actual results may differ from these estimates.

In preparing this condensed consolidated interim financial information, the significant judgements made by management in applying the Group's accounting policies and the key sources of estimation uncertainty were the same as those that applied to the consolidated financial statements of the Group for the year ended 31 December 2021.

Goodwill arose in the above business combination as the cost of combination included a control premium. These benefits are not recognised separately from goodwill because they do not meet the recognition criteria for identifiable intangible assets. None of the goodwill arising on the Acquisition is expected to be deductible for tax purposes.
