**ENVIRONMENTAL, SOCIAL
AND GOVERNANCE REPORT 2022**

INTRODUCTION, ENVIRONMENTAL, SOCIAL AND GOVERNANCE POLICIES

During the year ended 31 March 2022, Dadi International Group Limited (the “Company”) and its subsidiaries (collectively, the “Group”) were principally engaged in the publication, purchase and distribution of books, as well as provision of environmental consultancy services and sales of healthcare products.

This Environmental, Social and Governance Report (the “ESG Report”) summarizes the environmental, social and governance (“ESG”) initiatives, plans and performances of the Group and demonstrates its commitment to sustainable development.

The ESG Governance Structure

The Group has set up an ESG working taskforce (the “Taskforce”), composed of staff from relevant departments, in which, full-time staff has been assigned to collect the data relevant to ESG and compile the ESG Report. The Taskforce would periodically report to the board of directors of the Company (the “Board”), assisting in the assessment and identification of risk management of the Group on ESG aspects and whether its internal control system is appropriate and effective. The Taskforce reviews the ESG performance of the Group, including environmental, labour practices, and other ESG aspects. The Board sets the tone at the top for its ESG strategies and is responsible for ensuring effective risk management and internal controls. The details of the ESG strategy are stated below.

Details of the ESG Strategy

We established an ESG management system with clarified management functions and responsibilities at all levels. We carry out specific work through the Taskforce and help the Board understand our ESG risks and performance in a timely manner, so as to better incorporate ESG factors into company planning and daily operations.

- The Board is responsible for:
 - assessing and determining the Group’s ESG risks;
 - ensuring the establishment of appropriate and effective ESG risk management and internal control systems;
 - developing ESG strategies, action plans and objectives;
 - monitoring the progress and performance of ESG work;
 - reviewing and approving annual ESG reports.

- The management is responsible for:
 - reporting ESG-related risks and opportunities to the Board;
 - implementing ESG risk management and internal control systems;
 - informing the Board of the effectiveness of ESG risk management and internal control systems;
 - arranging work in accordance with the ESG strategies, action plans and objectives developed by the Board;
 - reporting to the Board on the progress and performance of ESG work;
 - reviewing and submitting annual ESG report to the Board for approval.

- The Taskforce is responsible for:
 - carrying out specific ESG work;
 - reporting to the management on the progress of the work;
 - collecting information and data;
 - preparing annual ESG reports and reporting to the management.

SCOPE OF REPORTING

This ESG Report covers the Group’s business activities of offices in mainland China, which represents the Group’s major source of revenue. The ESG key performance indicator (“KPI”) data is gathered and included subsidiaries under the Group’s direct control. The Group will extend the scope of disclosures when and where applicable. The KPIs are shown in the ESG Report as well as supplemented by explanatory notes to establish benchmarks.

REPORTING FRAMEWORK

The ESG Report has been prepared in accordance with the “Environmental, Social and Governance Reporting Guide” (the “ESG Reporting Guide”) as set out in the Appendix 20 of the Rules Governing the Listing of Securities on GEM of The Stock Exchange of Hong Kong Limited. Information relating to the corporate governance practices of the Group has been set out in the Corporate Governance Report on pages 26 to 34 of the annual report of the Company for the year ended 31 March 2022.

REPORTING PRINCIPLES

Quantitative: The Group regularly collects KPI required by the ESG Reporting Guide and follows up on the Group’s performance in relevant aspects to optimize and improve the disclosure of KPIs. Where applicable, the Group compares data for each year and discusses relevant trends and impacts.

Consistency: Methodologies and key performance indicators are used and calculated in a consistent approach. If there are any changes in consistency that may affect a meaningful comparison, details would be disclosed.

REPORTING PERIOD

The ESG Report describes the ESG activities, challenges and measures taken by the Group from 1 April 2021 to 31 March 2022 (the “Relevant Period”).

STAKEHOLDER ENGAGEMENT

A. ENVIRONMENTAL

AI. Emissions

General Disclosure and KPIs

During the Relevant Period, the Group principally engaged in publication, purchase and distribution of books, as well as provision of environmental consultancy services and sales of healthcare products. Our business operation did not directly GHG emissions, exhaust gases emissions, hazardous waste, and only generated an insignificant amount of non-hazardous waste. Nonetheless, we recognised our responsibilities towards the potential indirect negative environmental impacts associated with our business operations.

By integrating environmental consideration into our decision-making processes, we embraced our responsibilities to create an environmentally sustainable business. We were also committed to raising our employees' environmental awareness and complying with relevant environmental laws and regulations.

To enhance our environmental governance practice and mitigate the environmental impacts produced by our operations, we have implemented relevant environmental protection policies and communicated such policies to our employees. These policies encouraged our staff to contribute towards sustainability by adopting environmentally friendly operation methods. In the long run, we will continue to enhance our environmental management strategies in monitoring and minimizing the environmental impacts brought by our businesses regularly in the coming years.

During the Relevant Period, the Group did not have any material non-compliance with the relevant environmental laws and regulations the People's Republic of China, including but not limited to Environmental Protection Law of the People's Republic of China which have an impact on the Group's operations.

The main types of emission sources from the Group during the Relevant Period included petrol consumed by vehicles, electricity and disposal of paper to landfill (for other indirect emission of GHG). The Group's business does not entail significant consumption of packaging materials, industrial production-related air, water and land pollutions which are regulated under national laws and regulations. In addition, the Group's principal businesses do not contribute to significant environmental or natural resources impact when compared to businesses in other sectors. Most importantly, the Group strives to minimize its adverse environmental impact of its business operation by implementing a range of green practices in its daily operations.

Exhaust Gas Emissions

A total of approximately 1,420 litres of petrol was used as fuel for vehicles over the course of business operations during the Relevant Period, generating approximately 0.90 kg of nitrogen oxides, 0.02 kg of sulphur oxides and 0.07 kg of particulate matter. Therefore, the exhaust gas emissions generated from the Group's operations were immaterial.

GHG Emissions

The Group's GHG emissions include direct emissions (Scope 1) generated by fuel combustion by vehicles, indirect emissions (Scope 2) from purchased electricity and other indirect emissions (Scope 3) from paper consumption.

Scope of Greenhouse Gas Emissions	Emission Sources	Emission (in tCO₂e)	Total Emission (in %)
Scope 1 Direct emission	Unleaded petrol consumed by vehicle	3.35	7.91%
Scope 2 Indirect emission	Use of electricity	35.45	83.71%
Scope 3 Other indirect emission	Paper consumption	3.55	8.38%
Total		42.34	100%

There were 42.34 tonnes of carbon dioxide equivalent (“tCO₂e”) greenhouse gases (mainly comprising carbon dioxide, methane and nitrous oxide) emitted from the Group’s business operations in the Relevant Period. The total GHG emissions from direct, indirect and other indirect emissions are 42.34 tCO₂e and the annual emission intensity was 1.12 tCO₂e/HK\$ million revenue (calculation based on the revenue of the Group in the Relevant Period).

Emission Targets

The Group targets to reduce GHG emission by 6% in the coming period.

Measures to Mitigate Emissions

The Group has adopted the following measures to mitigate the indirect GHG emissions from electricity consumption in its operations as our effort to achieve the aforementioned emission targets:

- Requiring employees to turn off all the lights and switch off the desktops after work;
- Encouraging employees to turn off the lights when it is not necessarily used;
- Keeping the air-conditioning temperature at 26 degrees Celsius;
- Encouraging employees to use power-saving appliances;
- Opening windows for ventilation when applicable to reduce reliance on air-conditioning; and
- Avoiding employees from working overtime to reduce electricity consumption in the office

Consumption of electricity was accounted as the highest source of indirect GHG emission for the Group. As such, the Group has implemented measures as set out in the paragraph headed “Energy Consumption” of Aspect A2 below in order to reduce energy consumption, and thereby minimizing carbon footprint.

Through the implementation of the GHG emissions mitigating measures as mentioned above, the employees’ awareness of GHG emission mitigation has been enhanced.

Sewage Discharge

Due to the nature of the Group’s business, its operations do not necessitate a high level of water consumption and accordingly, there would not be significant sewage discharge by the Group or pollution issues arising from such discharge. The majority of the water supply and discharge facilities were provided and managed by the property management companies as well as the municipal authorities.

Waste Management

Hazardous waste handling method

Despite the fact that the Group did not generate hazardous waste during the Relevant Period, the Group has established guidelines in governing the management and disposal of hazardous waste. In case there is any hazardous waste produced, the Group will engage a qualified chemical waste collector to handle such waste, in order to comply with relevant environmental regulations and rules.

Non-hazardous waste handling method

The Group's waste had been mainly generated from office operation, and include paper, toner cartridge and ink cartridge. With the aim of minimizing the environmental impacts from non-hazardous waste generated from its business operations, the Group implemented measures to handle such waste and launched various reduction initiatives. The Group disposed the waste generated in the course of business operation by firstly classifying them into three categories, namely general waste, recyclable waste and special waste. Recyclable waste includes papers, paper boxes, bottles, cans, etc, and special waste includes toner, battery, etc. The three categories were handled in different ways based on their nature.

Type of non-hazardous waste	Unit	Amount	Intensity ¹ (Unit/HK\$ million)
Paper	sheets	147,771	3,892.71 Sheets/ HK\$ million

1. The intensity is calculated by dividing the unit of paper to the revenue (in HK\$ million) of the Group in the Relevant Period.

In the Relevant Period, the Group's paper consumption increased inevitably (2021: 102,446 sheets). The Group targets to reduce waste by 10% in the coming period. To achieve the above targets, the Group has endeavoured to minimize waste and to encourage employees to share responsibilities in waste management and minimization:

- Using double-sided printing or photocopying wherever possible;
- Avoiding unnecessary paper using in the office;
- Utilizing electronic media for communication;
- Recycling one-sided printed paper;
- Avoiding single-use disposable items;
- Encouraging employees to bring their own cutlery and utensils; and
- Placing "Green Message" reminders on office equipment.

Through these waste reduction measures, the employees' awareness on waste management has been enhanced.

A2. Use of Resources

General Disclosure and KPIs

The Group strives to optimise resource usage in its business operations and take initiatives to introduce measures on promoting resource efficiency and adopting eco-friendly approaches in its operations. The Group's major resource consumption are energy consumption and office paper consumption. The Group has established related policies and initiatives related to energy consumption management, which are stated in this section. It has also noticed the potential environmental impacts brought by the consumption of other natural resources, such as water consumption. Related policies and initiatives have also been implemented to mitigate such impacts brought by its operation.

The resources used by the Group are principally attributed to electricity, water, paper and petrol consumed in its daily operation. With the aim to better manage its use of resources, regular assessments of the use of resources have been performed. The Group has adopted green office practices to reduce natural consumption and its impact on the environment. Throughout the years, the Group placed emphasis on minimizing the usage of mentioned materials during its daily operations. The following table sets for the breakdown of material resource consumption by the Group.

Types of resources	Unit	Amount	Intensity (Unit/HK\$ million)
Petrol	Liter	1,420	37.41 Liter/ HK\$ million
Electricity	kWh	56,262	1,482.10 kWh/ HK\$ million
Tap water	m ³	N/A	N/A

Note:

The intensity is calculated by dividing the consumption amount to the revenue (in HK\$ million) of the Group in the Relevant Period.

During the Relevant Period, the Group consumed 56,262 kWh electricity. The Group did not have any issue in sourcing water for its business operations during the Relevant Period.

Energy Consumption

Energy Consumption Sources	Direct Consumption	Energy Consumption (in kWh)
Petrol	1,420 Liter	13,762
Electricity	56,262 kWh	56,262
Total		70,024

The major energy consumption of the Group was electricity consumption in the daily operation. The Group aims to minimize our impacts on the environment by identifying and adopting appropriate measures in our operations. The Group targets to improve energy efficiency level by 10% in the coming period. To achieve these targets, we continuously explore the use of new energy in our business operation and how to optimize, integrate and use the resources in a highly efficient manner with the

support of the latest information science and technology, thereby achieving sustainable development. Energy saving and consumption reduction are one of the Group's priorities, raising awareness of energy saving, and to maximize energy efficiency. By formulating energy efficiency standards, energy consumption quota standards, measurement and monitoring standards, as well as other energy management requirements, a standardized and reasonable integrated promotion system is formed, enabling the Group to scientifically strengthen energy management, reduce energy consumption and improve energy utilization efficiency.

Through the development of an energy management system, the Group actively promotes the awareness, enthusiasm, initiative and creativity for all employees to participate in energy saving, improve energy utilization efficiency, reduce environmental pollution, and reduce energy consumption. The Group aims to actively undertake social responsibilities, seek harmony between the enterprise and society, and turn social responsibilities into the driving force and long-term interests of the Group's development.

Monthly monitoring on the usage of electricity, water and other materials was implemented. Unexpected high electricity consumption would be investigated to find out the root cause and preventive measures would be taken. During the Relevant Period, the Group has implemented the following measures relating to mitigating energy consumption:

- Switching off unnecessary lightings and electrical appliances when not in use;
- Using appliances and devices which are eco-friendly or energy-saving; and
- Setting all printers, photocopiers and computers to energy saving mode.
- Administrative staff will inspect office periodically to ensure adoption of energy-saving measures

As a result, the employees' awareness of energy conservation has been increased through these energy-saving measures.

Use of Packaging Material

As the principal businesses of the Group were publication, purchase and distribution of books, as well as environmental consultancy services and sales of healthcare products, The Group did not consume any significant amount of packaging materials for product packaging during the Relevant Period.

A3. The Environment and Natural Resources

General Disclosure and KPIs

The business activities of the Group have no direct/significant impact on environment and natural resources, we still recognized the importance in minimizing the negative environmental impacts of our business operations. The Group believed that it was essential to act as an environmentally responsible corporate to meet the customers' demands in environmental protection and the expectation of the community for a healthy living environment. We were also devoted to achieving sustainable development for generating long-term values to the community and our stakeholders.

We spent efforts in mitigating our potential environmental impacts through adopting industry best practices targeted at reducing natural resources consumption and developing effective environmental management. We regularly assess the environmental risks of our businesses, adopt preventive measures to reduce potential risks and ensure compliance with relevant laws and regulations.

Paperless Office

In order to reduce paper usage, the Group strongly advocated paperless office operations. All offices are operated in the electronic system as far as possible to reduce the use and consumption of office paper in order to save forest resources. We also encouraged electronic medium for communications within the office and with suppliers.

As a socially responsible enterprise, protecting nature and the environment has become an integral part of the Group's corporate culture and important value, the Group constantly looks for ways to maximize benefits with minimal resource consumption and environmental impact, and continue to strive for sustainable development.

A4. Climate change

During the Relevant Period, the Group has not been significantly impacted by climate-related issues while the Group was aware that climate-related issues had caused serious damage to the environment and as such, had been subject to rigorous regulation by the United Nations' Framework Convention. The Group recognises the importance of identifying climate change risks in order to mitigate the associated impacts on its business operations. The Group has been planning to set up a committee for providing effective governance for integrating and addressing the climate change issue within its business. The committee will aim to meet on quarterly basis and will play an integral role in overseeing the transitional risks posed from climate change.

B4. Labour Standards

General Disclosure

Prevention of Child and Forced Labour

The Group strictly comply with the Minors Protection Law of the People's Republic of China in order to prohibit the use of child labour and forced or compulsory labour at all its units and suppliers. Furthermore, the Group has instituted a comprehensive screening and recruiting process to prohibit the use of child labour. We only employ employees aged over 18 years and never force employees to work overtime. No employee is made to work against his/her will or work as forced labour, or subject to corporal punishment or coercion of any type related to work.

Personal data are collected during the process to assist in the selection of suitable candidates and to verify candidates' personal data to ensure no child labour will be recruited. The human resources department also ensures identity documents are carefully checked. Also, compensation is provided for overtime working with prior approval obtained from respective supervisor. If violation is involved, it will be dealt with in the light of the circumstances.

Also, the Group has zero-tolerance to employment of child labour and forced labour and the Group is not aware of any non-compliance with relevant rules and regulations on preventing child or forced labour.

B5. Supply Chain Management

General Disclosure

Supply Chain Management Structure

The Group highly values our relationship with suppliers and regards them as important business partners. All suppliers are evaluated carefully and subjected to regular monitoring and assessment. The Group has formulated related procurement policies and procedures to manage its suppliers and the policies and procedures are reviewed annually.

During the Relevant Period, the Group had six major suppliers in the People's Republic of China region, namely Shanghai Weaver Network Co., Ltd, Fuji Xerox of Shanghai Limited, Shanghai Telecom Co., Ltd., S.F. Holding Co., Ltd, Huawei Technologies Co., Ltd. and Tencent Holdings Ltd.. During the Relevant Period, Shanghai Weaver Network Co., Ltd provided the office automation system to the Group for its office operation. Fuji Xerox of Shanghai Limited supplied printers for the Group's operation. Shanghai Telecom Co., Ltd. provided the telecommunication services. S.F. Holding Co., Ltd. provided the delivery services to the Group. Huawei Technologies Co., Ltd provided office automation system and web server to the Group and Tencent Holdings Ltd provided WeChat and e-mail systemservices to the Group.

The Group has established clear requirements on selection and management of suppliers to ensure standardized management and proper selection of suppliers and effective control over operational risks resulting from improper selection, unreasonable method or fraudulent practice of suppliers. The Group's policies regarding the purchase from suppliers focused on service and product quality, price level, technical ability, after sales service, and current cooperation situation etc. Furthermore, areas such as the environmental and labour employment policy of suppliers on the use of recycle or natural materials and forbidding child and forced labour are considered by the Group in selecting its suppliers.

In order to manage the progress and quality of work conducted by its suppliers, the Group has set up standards for the tender and purchase from suppliers. It has also established a database of suppliers, which includes the basic information of suppliers, such as the name of suppliers, the types of products, the provision of services, the types of suppliers, contact details (including name, job title, mail address and telephone) of suppliers, date of purchase and the supply prices for the Group's long-term follow up assessment of suppliers. Its managers and project coordinators also conduct regular review with the appointed suppliers.

The Group implemented the aforementioned practices to all of the above six suppliers during the Relevant Period.

Fair and Open Procurement

Procurement and bidding policies are formulated and strictly implemented by the Group to ensure that the suppliers could participate in competitions in an open and fair way. The Group should not have differentiated or discriminated treatment on certain suppliers; it would strictly monitor and prevent all kinds of business bribery; and employees or personnel having any interest relationship with the supplier should not be involved in the related business activity.

Environmental and Social Risks of Supply Chain

Beside the policies and strategies mentioned in above, the Group also focused on the environmental and social risks of our suppliers. The Group focused on purchasing from the suppliers who also cares about

the environment and the society and denied the suppliers who would cause pollution to the environment. To achieve the above, we make a serious assessment of suppliers' compliance with all applicable laws and regulations; actions in safeguarding workers' health and safety; and actions in mitigating environmental impacts. During the Relevant Period, the Group did not notice that its main suppliers had had any environment and social risks.

One of the main businesses of the Group is the provision of environmental consultancy services. The Group completed the acquisition of Shanxi Jinxin Keyuan Environmental Protection Science and Technology Company Limited ("Jinxin Keyuan") in February 2021. Its main business is radiation monitoring. The Group has given strong support to expand its business during the Relevant Period.

The Group designs a new supplier selection index system based on the traditional supplier selection index system and new indicators that can contribute to low-carbon construction.

The indicator system is the basis and standard for the Group's comprehensive evaluation of suppliers. It is an index reflecting different attributes such as enterprise itself and the environment.

Based on system comprehensiveness, scientific, stability and flexibility, the Group establishes a comprehensive evaluation system in an integrated supply chain management environment, and establishes an evaluation and supervision team to conduct the whole process of supplier selection, tracking and monitoring.

B6. Product Responsibility

General Disclosure

The Group highly values customers' satisfaction in pursuit of quality excellence. In such case, the Group strictly complies with the Product Quality Law of the People's Republic of China. The quality management system of the Group is applicable to all operation related departments.
