MANAGEMENT DISCUSSION AND ANALYSIS

Business Review

In 2022, the Group continued to focus on promoting bentonite for paints and coatings and consolidated the sales market of organic bentonite for oil coatings, and its products were recognized in the market, and its sales and profits increased to a greater extent. The Group also committed to the application of high-end water-based bentonite in the market, which is applied in the field of environmental protection coatings such as water-based industrial paints.

The product of “highly suspended nano inorganic gel” proposed by the Group have been listed in the First Batch of Application Demonstration Directory for Key New Materials (2021 Edition) of the Ministry of Industry and Information Technology, and provided quality standards for this type of products. The Group continued to focus on the development of overseas markets and preliminarily confirmed the business agreement with APP Group, one of the largest papermaking group in Southeast Asia.

Financial Review

Revenue of the Group for the nine months ended 30 September 2022 amounted to approximately RMB110,137,000, representing a decrease of approximately RMB291,000 or 0.3% compared to approximately RMB110,428,000 for the nine months ended 30 September 2021. The decrease in sales was mainly due to the decrease in sales of organic bentonite and quality calcium bentonite during the Reporting Period.

Gross profit of the Group for the nine months ended 30 September 2022 amounted to approximately RMB38,060,000, representing a decrease of approximately RMB9,552,000 or 20.1% compared to approximately RMB47,612,000 for the nine months ended 30 September 2021. The distribution costs, mainly including transportation expenses, salaries and benefits, and travelling expenses, amounted to approximately RMB14,200,000 for the nine months ended 30 September 2022, representing an increase of approximately RMB2,046,000 or 16.8% as compared to RMB12,154,000 for the nine months ended 30 September 2021. FUTURE OUTLOOK

In the past, the solvent-based paints and coatings were preferred in the application of paints and coatings in the market, however, this type of paints and coatings will cause environment pollution during the construction and application due to the solvent volatilization. The water-based coating is a kind of coatings with low pollution, energy and resources saving. With the strengthening of people's awareness of environmental protection and the rising cost of organic solvents, the traditional solvent-based coatings are facing more and more challenges, and water-based coatings have attracted more and more attention and have been widely studied and developed.

The Group will be committed to the research and development of high-end water based bentonite and its application in water-based coatings. By adjusting the formulation of the bentonite composite stabilizer, inorganic modified bentonite products are prepared to meet the stability requirements of different water-based coatings.

China Paper Association put forward the development plan of “adhering to green and low-carbon circular development, strengthening clean production, and effectively preventing and controlling pollution through resource conservation, energy conservation and emission reduction”. Based on the advantages of bentonite resources, the Group will help paper-making enterprises to take the path of sustainable development of circular economy, and achieve circular development, energy saving and emission reduction and clean production by means of comprehensive utilization of resources and environmental protection investment. The Group will develop and promote the following papermaking additive products:

- 1) Ash accelerator products, which will increase the ash content of paper, the Group will reduce the amount of fiber raw materials, and lower production costs; and
- 2) Application of modified bentonite in paper coating, which will improve the rheological properties of the coating and improve the surface quality of the coated paper.

In 2022, the Group will continue to adhere to the development strategy of taking profit as the center and innovation as the driving force. On the basis of consolidating existing products, the Group will actively develop new products. To this end, the Group will adhere to the following strategies:

- 1) The Group will develop and promote high-end water-based bentonite products on the basis of consolidating the oil-based organic bentonite market;
- 2) The Group will develop new products, and continue to cooperate with Jiangnan University to develop high-performance flame retardant composites based on non-metallic minerals; and
