INTERIM REPORT  
2023

## CHARACTERISTICS OF GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

*Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.*

# MANAGEMENT DISCUSSION AND ANALYSIS

## BUSINESS REVIEW AND OUTLOOK

The Group is a regional manufacturer and supplier of wires and cables and also engages in processing of aluminum cast-rolled coil and aluminum plate manufacturing of foil, with integrated production facilities situated in Chengdu, Guangyuan and Yaan of Sichuan Province, the PRC. The Group's products can be broadly classified into four categories: (i) finished wires and cables; (ii) semi-finished wires; (iii) aluminium products; and (iv) other products, which comprise cable accessories. The Group's portfolio of finished wires and cables products comprises classic and special products. Apart from finished wires and cables, the Group also produce semi-finished wires comprising aluminium rods and bare copper wires to maximise the Group's market exposure and enlarge its market share.

During the six months ended 30 June 2023 (the "**Period**"), the Group continued to engage in the manufacturing and sales of wires and cables and continued to serve a large number of customers, mainly are power companies, manufacturing enterprises, construction and renovation companies as well as trading companies which purchase products from the Group for onward sale on their own accounts.

## FUTURE PROSPECTS

Despite the challenges faced by manufacturers and suppliers of wires and cables in the PRC, there are also several factors that could help to sustain and grow the industry.

1. **Increasing Demand in Various Applications:** The demand for wires and cables is expected to continue growing in sectors such as automotive, construction, and telecommunications. Ongoing urbanization, infrastructure development, and technological advancements will contribute to this demand. As these industries expand, the need for wires and cables will increase, presenting manufacturers with new opportunities.
2. **Government Investment in Infrastructure:** The Chinese government's continued investment in infrastructure development will be a significant driver for the industry. Projects related to power grids, high-speed railways, 5G networks, and other infrastructure initiatives will require substantial amounts of wires and cables. Manufacturers and suppliers can benefit from these investments by meeting the demand for these essential components.
3. **Adoption of Renewable Energy Technologies:** The increasing adoption of renewable energy sources, such as wind and solar power, presents a significant growth opportunity for wire and cable manufacturers. These technologies rely heavily on extensive wiring and cabling systems to connect power generation facilities to the grid. As China continues to prioritize its transition to cleaner energy sources, the demand for wires and cables in this sector is expected to rise.

4. Domestic Market Development: As the PRC focuses on developing its domestic market, manufacturers and suppliers can shift their attention from exports to catering to the local demand. This strategic shift can help businesses reduce their reliance on external factors, such as trade tensions or global market fluctuations. By capturing a larger share of the domestic market, manufacturers can experience more stable growth and increased profitability.

Considering these factors, it is reasonable to expect that the financial performance of wire and cable manufacturers in the PRC will improve in the foreseeable future. However, it is essential for companies in the industry to stay updated with market trends, invest in research and development, and maintain high-quality standards to remain competitive and capitalize on the opportunities presented by these growth drivers.

For the six months ended 30 June 2022, our gross loss amounted to RMB6.0 million, while our gross loss margin was 1.7%. It was mainly attributable to the reduction in aluminium cast-rolled coil from Yaan Company as a result of the change in product structure while realizing gross profit by cost control on cable products.

### **Other income and gains**

Other income and gains decreased from approximately RMB12.8 million for the six months ended 30 June 2022 to approximately RMB1.2 million for the six months ended 30 June 2023. The decrease is mainly due to the decrease of the government grants of approximately RMB8.7 million as compared to the six months ended 30 June 2022.
