## **Ziyuanyuan Holdings Group Limited**

紫元元控股集團有限公司

*(Incorporated in the Cayman Islands with limited liability)*

**(Stock Code: 8223)**

### **SUPPLEMENTAL ANNOUNCEMENT IN RELATION TO THE ANNUAL REPORT FOR THE YEAR ENDED 31 DECEMBER 2022**

Reference is made to the annual report of Ziyuanyuan Holdings Group Limited (the “**Company**”) together with its subsidiaries (collectively the “**Group**”) for the year ended 31 December 2022 (the “**2022 Annual Report**”). This announcement is supplemental to, and should be read in conjunction with the 2022 Annual Report. Unless otherwise defined, capitalised terms used in this announcement shall have the same meanings as those defined in the 2022 Annual Report.

In addition to the information disclosed in the 2022 Annual Report, the board of directors (the “**Board**”) of the Company would like to provide further information in relation to the Group’s finance leasing services.

#### **RISK MANAGEMENT POLICIES**

The Group faces a variety of risks in providing finance leasing services, including credit risk, liquidity risk, interest rate risk, operational risk, and legal and compliance risk. The Group recognises the importance of an effective risk management system for identifying and mitigating these risks. The Group has developed a risk management system tailored to the characteristics of our business operations, with a focus on managing the risks through comprehensive due diligence on the customer, independent information review and multi-level approval process. The Group continues to monitor and review the operation and performance of the risk management system, and to improve the system from time to time to adapt to the changes in market conditions and regulatory environment. The core principle of risk management system is to minimise such risks in business activities and to protect the long-term interests of the Group and the Shareholders.

The following summary illustrates the major credit risk management measures:

- Due diligence. The risk management department is responsible for conducting due diligence on the customer's background, operating and financial conditions, credit history, financing purposes, major shareholders and guarantors, including on-site interviews and document review at specific customer business locations and at the same time cross-validating through online website inquiries, remote video, etc. Through comprehensive customer due diligence process, the risk management department is able to have a complete understanding of the customer's operations and financial situation, and then produce a customer credit assessment report with assessment of the specific customer's financing needs and ability to make lease payments.
- Asset quality. We evaluate the value and liquidity of assets under each finance leasing transaction and ensure the outstanding lease payments will be sufficiently covered by the value of leased assets.
- Approval process. We have a multi-level review and approval system that enables us to thoroughly discuss the potential issues and risks associated with each finance leasing transaction. Once receiving the customer's application materials, the risk management department makes a preliminary assessment of the customer's capital needs, repayment ability, value and liquidity of the leased equipment, and major risks in association with the finance leasing transaction in order to determine whether the customer meets our customer entry criteria. The risk management department conducts a detailed assessment of whether the customer's operational and financial conditions meet our criteria and prepares a credit assessment report. Depending on the transaction type and the amount of funds involved, the risk management committee evaluates the transaction through review of the transaction packet or a committee meeting. The risk management committee decides whether to grant the final approval for a transaction after review. With respect to a major business decision, the risk management committee first reviews the relevant documents. After all members agree with granting of an approval, the risk management committee submits the relevant documents to the Board of Directors which makes a decision after review.
- Post-drawdown management. The post-drawdown management includes routine inspections, on-site inspections, daily supervision, as well as monthly review, of the collection status of finance lease receivable, repayment reminders, overdue collection and overdue warnings, and ongoing monitoring of leased assets. Finance and accounting department conducts daily supervision by examining the daily log for each transaction, which includes the name, amount due and payable to the Group at relevant times, as well as the collection status of customers. In the event that the finance lease receivables are collected, the finance and accounting department marks the relevant collection status to be "normal repayment" and records the repayment date in the log. In the event that the finance lease receivables are not collected, the finance and accounting department notifies the business development department of such overdue payment, and the business department follows up with the relevant customers. The continuous review process coordinated among various departments and risk management committee enables the Group to identify any potential default of the customers and take remedial actions to enhance the security of leased assets at an early stage.

## LEASE PORTFOLIO

### *Lease Portfolio by Industry*

The following table sets forth our net amount of receivables arising from finance leasing services by industry as of the dates indicated:

	As at 31 December			
	2022		2021
