## **PROFIT WARNING**

This announcement is made by Flydoo Technology Holding Limited (the “**Company**”, together with its subsidiaries, the “**Group**”) pursuant to Rule 17.10(2) of the Rules Governing the Listing of Securities on GEM of The Stock Exchange of Hong Kong Limited (the “**GEM Listing Rules**”) and the Inside Information Provisions (as defined under the GEM Listing Rules) under Part XIVA of the Securities and Futures Ordinance (Chapter 571 of the Laws of Hong Kong).

The board (the “**Board**”) of directors (the “**Directors**”) of the Company wishes to inform the shareholders (the “**Shareholders**”) and potential investors of the Company that, based on the information currently available and preliminary assessment of the unaudited consolidated management accounts of the Group for the six months ended 30 September 2025, the Group is expected to record an increase in net losses for the six months ended 30 September 2025 by approximately 550% as compared to the net losses of approximately HK\$588,000 for the six months ended 30 September 2024.

The increase in losses is primarily due to the unfounded disaster rumors predicted by a Japanese manga artist, which claims that a large-scale earthquake will occur in Japan in July 2025. The prediction of a catastrophe has spooked tourists.

The manga written by the artist predicted a catastrophic event, such as a massive earthquake, tsunami, or other large-scale calamity, in Japan this July, and this premonition has been scaring off travelers, especially those from Hong Kong. Social media posts in Asia were warning people to cancel or delay their trips, so much so that certain Hong Kong-based airlines have reduced or canceled flights between the two destinations.

With Japan as its key destination for outbound tours, the package tour bookings for departures during one of its peak periods, i.e., the summer holidays in July and August, were massively impacted due to various rumors and speculation regarding the aforementioned potential disaster. As a result, the Group has faced a considerable drop in both revenue and gross profit during the six months ended 30 September 2025.

Fortunately, the anticipated earthquake did not occur, and the rumors have been debunked. Nonetheless, management believes that tourism in Japan will eventually rebound, and we remain confident in the Group's strategy, having faith that our outbound travel, tourism, and hospitality activities will thrive.

The information above is based only on management's preliminary assessment of the unaudited consolidated management accounts of the Group for the six months ended 30 September 2025 and the information currently available, which has not been audited or reviewed by the auditor or the Audit Committee of the Company, and is thus subject to change. The Company is in the process of finalising the Group's financial results for the six months ended 30 September 2025, which is expected to be published before the end of November 2025 in accordance with the Listing Rules.

**Shareholders and potential investors are advised to exercise caution when dealing in the shares of the Company.**
