### CHARACTERISTICS OF GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE "STOCK EXCHANGE")

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the Main Board of the Stock Exchange and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and the Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

Before accepting any new customer, the Group assesses the potential customer's credit quality and defines credit limits by customers. Recoverability of the trade receivables is reviewed by the management of the Group regularly.

In addition, the management of the Group is of the opinion that no event of default occurred for trade receivables past due over 90 days as the balances are still considered fully recoverable based on the management's historical experience on the settlement pattern from these customers.

The Group applies the simplified approach to provide for expected credit loss ("ECL") prescribed by HKFRS 9. There has been no change in the estimation techniques or significant assumptions made during the six months ended 30 September 2025 in assessing the loss allowances for the trade receivables.

For the other receivables including rental and other deposits, allowance for impairment was insignificant and thus negligible to be made since the management of the Group considers the probability of default is minimal after assessing the counterparties' financial background and creditability.

#### **PROSPECTS**

The external environment in Hong Kong remains complicated. The Group anticipates that intense competition in tenders, driven by aggressive pricing strategies from competitors, along with stringent customer budgets, rising interest rates, increased material costs, subcontracting charges and labour costs, will continue to impact the Group's operations and financial performance in the near term.

Given the current economic uncertainties and difficulties, the Group will regularly review its existing asset structure and business strategies and may make necessary adjustments so as to be flexibly prepared for encountering any challenges in the future. With the aim of optimising resource utilisation, the Group will strictly adhere to its cost control policy and will take necessary actions to control costs and drive efficiency to maintain profitability and competitiveness in the market. On the other hand, the Group will also proactively pursue all suitable investment opportunities to diversify the Group's business horizons which will strengthen its overall business development.

Going forward, the Group will stay vigilant and continue to strengthen its market position by expanding its workforce and competing for more building protection work projects in Hong Kong. The Directors remain confident in the prospects of the Group and are committed in creating long-term and sustainable value for the Company and its shareholders.

### PRINCIPAL RISKS AND UNCERTAINTIES

There are certain risks that could adversely affect the Group's operations and financial results. The major uncertainties may include:

- (i) the Group derives revenue from projects and purchase orders of a non-recurrent nature, where there is no guarantee that customers will provide the Group with new business or that the Group will secure new contracts;
- (ii) the Group determines the contract price based on estimated time and costs involved in the project. An under- estimation or ineffective cost management may adversely affect the Group's financial results;
- (iii) the slow economic recovery may significantly and adversely impact the Group's business operation and financial performance;
- (iv) the timing of the Group's payment to suppliers may not match the receipt of payment from customers;
- (v) the Group relies on its major subcontractors to help complete the building protection works projects. Any material surges of their charges or any substandard work by subcontractors will affect the Group to a large extent;
- (vi) the Group relies on independent third party suppliers for production of all its own-brand building protection products; and
- (vii) the Group relies on brand owners and manufacturers for the supply of building protection products to satisfy its business operation needs. Failure to secure a steady supply of these products to the Group may adversely affect its results of business operations.

The Group will continue to use its best effort to ensure it has sufficiently mitigated the risks present in its operations and financial position as efficiently and effectively as possible.
