CHARACTERISTICS OF GEM OF THE STOCK EXCHANGE OF HONG KONG LIMITED (THE “STOCK EXCHANGE”)

GEM has been positioned as a market designed to accommodate small and mid-sized companies to which a higher investment risk may be attached than other companies listed on the Stock Exchange. Prospective investors should be aware of the potential risks of investing in such companies and should make the decision to invest only after due and careful consideration.

Given that the companies listed on GEM are generally small and mid-sized companies, there is a risk that securities traded on GEM may be more susceptible to high market volatility than securities traded on the main board and no assurance is given that there will be a liquid market in the securities traded on GEM.

Hong Kong Exchanges and Clearing Limited and The Stock Exchange take no responsibility for the contents of this report, make no representation as to its accuracy or completeness and expressly disclaim any liability whatsoever for any loss howsoever arising from or in reliance upon the whole or any part of the contents of this report.

This report, for which the directors (the “Directors”) of Zhonghua Gas Holdings Limited (the “Company”) collectively and individually accept full responsibility, includes particulars given in compliance with the Rules Governing the Listing of Securities on GEM of The Stock Exchange (the “GEM Listing Rules”) for the purpose of giving information with regard to the Company. The Directors, having made all reasonable enquiries, confirm that, to the best of their knowledge and belief, the information contained in this report is accurate and complete in all material respects and not misleading; or deceptive, and there are no other matters the omission of which would make any statement herein or this report misleading.

Notes to the Condensed Consolidated Interim Financial Information

For the six months ended 30 September 2025

1. GENERAL INFORMATION

Zhonghua Gas Holdings Limited (the “Company”) was incorporated in the Cayman Islands as an exempted company with limited liability under the Companies Law, Cap 22 (Law 3 of 1961, as combined and revised) of the Cayman Islands on 8 September 2011 and its shares are listed on GEM of The Stock Exchange of Hong Kong Limited (the “Stock Exchange”). The address of the registered office is Cricket Square, Hutchins Drive, P.O. Box 2681, Grand Cayman, KY1-1111, Cayman Islands and the principal place of business of the Company in Hong Kong is 23/F, Chinachem Century Tower, 178 Gloucester Road, Wan Chai, Hong Kong.

The Company is an investment holding company. The Company and its subsidiaries (collectively referred to as the “Group”) is principally engaged in:

- (i) the provision of diverse integrated energy services including technological development, construction related and consultancy services in relation to heat supply and coal-to-natural gas conversion, supply of liquefied natural gas (“LNG”), coupled with sales of LNG (“Energy Business”); and
- (ii) the leasing of investment properties located in Shanghai, China (“Investment Properties”).

2. CHANGE OF FINANCIAL YEAR END DATE

On 19 December 2024, the Company has resolved to change the financial year end date of the Company from 31 December to 31 March commencing from the financial period covering a period of fifteen months from 1 January 2024 to 31 March 2025. Accordingly, the unaudited condensed consolidated interim financial information of the Company covers a period of six months from 1 April 2025 to 30 September 2025 with comparative figures covers a period of six months from 1 April 2024 to 30 September 2024.

3. GOING CONCERN BASIS

The Group incurred a loss attributable to the owners of the Company of RMB13,454,000 and had a net operating cash outflow of RMB5,752,000 for the six months ended 30 September 2025. As at the same date, the Group’s total and current borrowings amounted to RMB33,654,000, while its cash and cash equivalents amounted to RMB10,518,000. These events or conditions indicate the existence of a material uncertainty which may cast significant doubt on the Group’s ability to continue as a going concern. Therefore, the Group may be unable to realise its assets and discharge its liabilities in the normal course of business. Notwithstanding the above, the consolidated financial statements have been prepared on a going concern basis as the directors have taken the following plans and measures:

- (a) The Group is in progress to implement operational plans to control costs and generate sufficient operating cash flows to meet its current and future obligations. These actions include cost control measures, and timely collection of outstanding receivables.
- (b) It is anticipated that a substantial portion of the prepayments for LNG purchases as of 30 September 2025 will be utilised based on the contracted sales. These sales are expected to generate operating cash inflows to the Group.

3. GOING CONCERN BASIS (CONTINUED)

- (c) The Group's borrowing of RMB33,654,000 consists solely of a loan from a shareholder (the "Shareholder") who has committed not to demand repayment until the Group has sufficient resources to settle. Furthermore, the Shareholder has confirmed his intention to provide additional financial support to ensure the Group can continue its operations and meet all third-party obligations over the next twelve months.

On 16 April 2025, the Company entered into a loan capitalisation agreement with the Shareholder to convert part of the shareholder's loan owed to him into equity amounting to HK\$27,370,000 by issuing a total of 230,000,000 capitalisation shares at the capitalisation price of HK\$0.119 per capitalisation share (the "1st Loan Capitalisation"). The 1st Loan Capitalisation had completed on 4 July 2025.

On 20 October 2025, the Company entered into a loan capitalisation agreement with the Shareholder to convert part of the shareholder's loan owned to him into equity amounting to HK\$13,720,000 by issuing a total of 140,000,000 capitalisation shares at the capitalisation price of HK\$0.098 per capitalisation share (the "2nd Loan Capitalisation"). The 2nd Loan Capitalisation is subject to approval at an extraordinary meeting ("EGM"), which is scheduled to be held on 8 December 2025.

Both loan capitalisation transaction aims to reduce liability without depleting cash resources, and strengthening the Group's liquidity and supporting its going concern.

- (d) On 3 October 2025, the Company entered into 2 share subscription agreements with 2 subscribers to issue 334,000,000 shares (167,000,000 shares each) under general mandate at HK\$0.075 per shares (the "Share Subscription Agreements"), generating net proceeds of approximately HK\$24,750,000, which will be used for general working capital purpose. The share subscription was completed on 17 October 2025.

The directors of the Company have reviewed the Group's cashflow projections prepared by the management. The cash flow projection covers a period of not less than twelve months from 30 September 2025. Having taken into account the above-mentioned plans and measures, the directors of the Company concluded that the Group will have sufficient financial resources to meet in full its working capital requirements and financial obligations as and when they fall due within the next twelve months from the date of the consolidated statement of financial position. Accordingly, the consolidated financial statements have been prepared on a going concern basis.

Should the Group fail to achieve the above-mentioned plans and measures, it may be unable to continue as a going concern, and adjustments would have to be made to write down the carrying value of the assets to their recoverable amounts, to provide for any further liabilities which might arise and to classify non-current assets and liabilities as current assets and liabilities respectively. The effect of these potential adjustments have not been reflected in these consolidated financial statements.

4. BASIS OF PREPARATION

This interim financial information is unaudited and has been prepared in accordance with International Accounting Standard (“IAS”) 34 “Interim Financial Reporting” issued by the International Accounting Standards Board (the “IASB”) and the applicable disclosures provisions of the Rules Governing the Listing of Securities on GEM of the Stock Exchange.

This interim financial information should be read in conjunction with the 2024–2025 annual financial statements. Except as described below, the accounting policies (including the critical judgements made by management in applying the Group’s accounting policies and the key sources of estimation uncertainty) and methods of computation used in the preparation of these condensed interim financial information are consistent with those used in the annual financial statements for the fifteen months ended 31 March 2025.

5. NEW AND AMENDED INTERNATIONAL FINANCIAL REPORTING STANDARDS

New and amended standards adopted by the Group

The Group has applied the amendments to IAS 21 “Lack of Exchangeability” for the first time from 1 April 2025. The Group did not change its accounting policies or make retrospective adjustments as a result of adopting the abovementioned amended standard. These new and amendments to IFRS Accounting Standards have had no material effect on how the Group’s results and financial position for the current or prior periods that have been presented in this condensed consolidated financial information. The Group has not applied any other new standards or interpretation that is not yet effective for the current accounting period.

6. FAIR VALUE MEASUREMENTS OF FINANCIAL INSTRUMENTS

The carrying amounts of the Group’s financial assets and financial liabilities as reflected in the condensed consolidated statement of financial position approximate their respective fair values.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The following disclosures of fair value measurements use a fair value hierarchy that categorises into three levels the inputs to valuation techniques used to measure fair value:

Level 1 inputs: quoted prices (unadjusted) in active markets for identical assets or liabilities that the Group can access at the measurement date.

Level 2 inputs: inputs other than quoted prices included within level 1 that are observable for the asset or liability, either directly or indirectly.

Level 3 inputs: unobservable inputs for the asset or liability.

During the six months ended 30 September 2025 and 2024, there was no transfer between Level 2 and Level 3. The Group’s policy is to recognise transfers into and transfers out of any of the three levels as of the date of the event or change in circumstances that caused the transfer.

11. SEGMENT INFORMATION

Information reported to the Chief Executive Officer, being the chief operating decision maker (“CODM”), for the purpose of resources allocation and assessment of segment performance.

The Group has two reportable operating segments, which are (a) Energy Business; and (b) Property Investments. The Group's reportable segments are strategic business units that offer different products and services. They are managed separately because each business requires different technology and marketing strategies.

Segment results are measured as gross loss of each segment without allocation of administrative expenses, finance costs, other income, other gains, (allowance of impairment)/reversal of allowance of impairment on trade receivables and contract assets, and income tax expense. This is the measure reported to the CODM for the purpose of resource allocation and performance assessment.

No segment assets or liabilities information or other segment information is provided as the CODM does not review this information for the purpose of resource allocation and assessment of segment performance.

No geographical segment information is presented as all the sales and operating losses of the Group are derived within the PRC and all the operating assets of the Group are located in the PRC, which is considered as one geographic location with similar risks and returns.

The shareholder's loan is unsecured and non-interest-bearing. The shareholder has agreed not to demand repayment until the Group has enough cash to repay.

24. SHARE-BASED PAYMENTS

Equity-settled share option scheme

The Company operates share option schemes (the “Schemes”) for the purpose of providing incentives and rewards to eligible participants who contribute to the success of the Group’s operations. The board of directors of the Company may grant options to directors and eligible employees and consultants of the Company or its subsidiaries to subscribe for shares in the Company at a consideration equal to the higher of the closing price of the shares of the Company on the Stock Exchange at the date of offer of grant and the average closing prices of the shares of the Company on the Stock Exchange for the five trading days immediately preceding the date of grant of the options.

Options granted must be taken up within 28 days for Scheme 2011 and 21 days for Scheme 2023 from the date of grant, upon payment of HK\$1. Options may be exercised at any time from the date of grant of the share option up to the tenth anniversary of the date of grant as determined by the directors at their discretion.

The maximum number of shares of the Company in respect of which options may be granted, when aggregated with any other share option scheme of the Company, shall not exceed 30% of the issued share capital of the Company from time to time excluding any shares issued upon the exercise of options granted pursuant to Scheme 2011. Notwithstanding the foregoing, the shares which may be issued upon exercise of all outstanding options granted and yet to be exercised under Scheme 2011 shall not exceed 10% of the shares in issue from time to time. For Scheme 2023, the maximum number of shares of the Company which may be issued in respect of all share options and awards which may be granted at any time under Scheme 2023 together with options and awards which may be granted under any other share schemes for the time being of the Company should not exceed such number of shares as equal to 10% of the issued share capital of the Company.

The total number of shares issued and to be issued upon exercise of the options granted to a participant under the Scheme (including both exercised and outstanding options) in any 12-month period must not exceed 1% of the shares in issue from time to time. Each Scheme is valid and effective for a period of 10 years and may continue to be exercisable in accordance with their terms of issue.

Management Discussion and Analysis

BUSINESS REVIEW

For the Current Period, the Group's total revenue amounted to approximately RMB6.5 million, representing a decrease of approximately 10.6% from approximately RMB7.3 million for the Corresponding Period, principally due to the sales price fluctuation of market.

The Energy Business continued to contribute over 99% to the Group's total revenue. Net loss after tax of approximately RMB14.7 million in the Current Period was recorded compared to net loss of approximately RMB20.7 million for the Corresponding Period. Such decrease in net loss after tax was mainly attributable to (i) no equity-settled share-based expense was recorded in the Current Period (Corresponding Period: approximately RMB14.1 million); (ii) a decrease in reversal of allowance of impairment on trade receivables and contract assets from approximately RMB7.4 million for the Corresponding Period to allowance of impairment on trade receivables and contract assets of approximately RMB6.8 million for the Current Period, which was due to the recovery of certain long outstanding trade receivable balance in the Corresponding Period; (iii) a decrease of finance cost from approximately RMB6.3 million for the Corresponding Period to approximately RMB0.6 million in the Current Period; and (iv) the Group implemented certain cost control measures which led to a decrease in administrative expenses.

Energy Business

The Group is principally engaged in the provision of diverse integrated energy services including technological development, construction related and consultancy services in relation to heat supply and coal-to-natural gas conversion, as well as supply and sales of LNG.

During the Current Period, the Energy Business generated revenue primarily from the supply of LNG and the management of customers' LNG supply stations. The LNG supply business continued to face fierce competition. Also, as the construction related and consultancy services of the Energy Business showed no sign of improvement and the coal-to-natural gas conversion initiatives in Tianjin has become increasingly saturated, the Group expects the number of new projects to continue to decrease in the future.

The Group continues to maintain strategic partnerships with a number of other significant partners with a view to explore new business opportunities with potential customers.

The Group has been actively broadening its business scope and geographic reach to achieve diversification and global expansion.

On 6 June 2025, the Company, entered into a memorandum of understanding (the "MOU") with the Ministry of Industry and Commerce ("Lao MOIC") of the Lao People's Democratic Republic ("Lao PDR"). Pursuant to the MOU, the Company and Lao MOIC intend to cooperate with each other and conduct the feasibility studies for the development of fuel oil and gas supply network in the Lao PDR. On 22 October 2025, the Company and Shandong Longzhong Information Technology Co., Ltd entered into a project technical consultation agreement to perform the feasibility studies in respect of the development of fuel oil and natural gas supply network in Lao PDR and to conduct market research.

The Board considers the strategic cooperation with Lao MOIC will enable the Group to venture into the refined oil (gas) business in the Lao PDR and diversify its existing business portfolio and broaden its revenue base.

Investment Properties

The Group owns two office premises on Beijing West Road, Jing An District, Shanghai, the People's Republic of China (the "PRC"). Both the properties were held for investment purpose and they generated rental income. The investment properties were expected to bring stable long-term rental income to the Group.

FINANCIAL REVIEW

Revenue

For the Current Period, revenue of the Group amounted to approximately RMB6.5 million, representing a decrease of 10.6% from approximately RMB7.3 million for the Corresponding Period. The decrease was due to the sales price fluctuation of market.

Cost of Sales

The cost of sales for Energy Business amounted to approximately RMB5.0 million (Corresponding Period: approximately RMB5.5 million). The decrease was mainly attributable to the decrease in cost in LNG supply during the Current Period.

Gross Profit Margin

Gross profit represents revenue less cost of sales. Gross profit margin of the Energy Business segment was 22.8% in the Current Period (Corresponding Period: 24.8%). The decrease was mainly attributable to the decrease in sales price during the Current Period.

The gross profit margin of the Investment Properties segment was 100% (Corresponding Period: 100%).

Other Gains

Other gains of approximately RMB0.6 million were recorded in the Current Period as compared to approximately RMB1.6 million in the Corresponding Period, mainly due to the foreign exchange gains of approximately RMB0.6 million recognised in the Current Period (Corresponding Period: approximately RMB1.6 million).

Administrative Expenses

Administrative expenses decreased by 62.6% from approximately RMB25.2 million for the Corresponding Period to approximately RMB9.4 million for the Current Period. The decrease was mainly due to the absence of equity-settled share-based expenses during the Current Period (Corresponding Period: approximately RMB14.1 million), as well as the implementation of other costs control measures.

Finance Costs

For the Current Period, the Group's finance costs amounted to approximately RMB0.6 million (Corresponding Period: approximately RMB6.3 million), representing a decrease of RMB5.6 million or 89.8%, which was mainly due to a decrease in the interest expense from the other loan and late payment with suppliers.

Income Tax Expense

Income tax expense was recorded approximately RMB0.1 million for the Current Period and the Corresponding Period. It was derived from PRC income tax for the Current Period.

(Loss)/profit and Total Comprehensive Income Attributable to Non-controlling Interests

Loss and total comprehensive income attributable to non-controlling interests amounted to approximately RMB1.2 million for the Current Period (Corresponding Period: Profit and total comprehensive income attributable to non-controlling interests of approximately RMB1.2 million). This was mainly attributable to a decrease in the reversal of allowance on trade receivables and contract assets for the Current Period.

Loss and Total Comprehensive Income Attributable to Owners of the Company

Loss and total comprehensive income attributable to owners of the Company decreased from approximately RMB21.9 million in the Corresponding Period to approximately RMB13.5 million in the Current Period. This was mainly attributable to a decrease in loss after tax for the Current Period.

Basic and diluted loss per share for the Current Period were both RMB0.003, as compared to basic and diluted loss per share of RMB0.006 for the Corresponding Period.

PROSPECTS

China's natural gas market, as a critical component of the national energy system, is currently undergoing an important phase of deepening transformation. Against the backdrop of global energy restructuring, domestic economic optimization and upgrading, and accelerated technological advancements, the development of the natural gas market in the next three years will present both challenges and opportunities.

Liquefied Natural Gas (LNG), as a clean energy source, directly impacts market supply-demand balance through its trading and sales performance. In recent years, China's LNG imports have shown consistent growth, exceeding 80 million tonnes in 2022, representing a year-on-year increase of 8.6%. According to the International Energy Agency (IEA), China's LNG imports are projected to maintain an average annual growth rate of 5% to 7% between 2024 and 2026. From the policy perspective, PipeChina is accelerating the construction of LNG receiving terminals, with annual receiving capacity projected to reach 120 million tonnes by 2025. On the demand side, industrial fuel and urban gas sectors are increasingly reliant on LNG, particularly in regions such as the Beijing-Tianjin-Hebei cluster, Yangtze River Delta, and Guangdong-Hong Kong-Macao Greater Bay Area, where demand for clean energy substitution remains robust. In terms of pricing, LNG prices are expected to remain volatile between US\$500 and US\$800 per tonne over the next three years due to the supply-demand mismatch in the global natural gas market, which is unlikely to resolve in the short term, as well as the volatility of international oil prices and geopolitical risks.

Urban pipeline natural gas, as a crucial terminal segment of the natural gas market, directly impacts residents' quality of life and industrial production efficiency through its development level. By the end of 2023, the total length of urban natural gas pipelines nationwide exceeded 1 million kilometres, with an annual gas transmission volume surpassing 200 billion cubic metres. During the "14th Five-Year Plan" period, China plans to vigorously promote the upgrading and renovation of natural gas pipeline network by building 30,000 kilometres of new high-pressure pipelines and 50,000 kilometres of secondary high-pressure pipelines. The development of Smart natural gas infrastructure is also accelerating, with the widespread application of technologies such as the IoT, big data and other technologies increasing the intelligent rate of pipeline inspections to over 80%. In terms of trading models, as natural gas price marketisation reforms deepen, the price linkage mechanism between pipeline gas and LNG is gradually improving, and the construction of regional spot trading platforms is accelerating. It is expected that by 2025, the proportion of market-based transactions will exceed 50%. Meanwhile, the consolidation within the urban natural gas sector is accelerating, with leading enterprises in the region expanding their scale through mergers and acquisitions and restructuring, thereby further increasing overall market concentration.

The evolution of the market landscape serves as a key indicator of the development of the natural gas industry. China's natural gas market exhibits a "3+N" competitive structure, with the three major state-owned oil and gas companies dominating upstream resources, while local state-owned enterprises and private companies are actively engaged in the end-user market. With the establishment of the China Oil & Gas Pipeline Network Corporation, the monopoly over upstream resources has been broken, and the third-party access system is being implemented at an accelerated pace, leading to more vigorous market competition. Technological innovation has become a key driver for corporate breakthroughs. With the application of technologies such as hydrogen co-firing and distributed energy system expanding gradually, some companies have already launched zero carbon natural gas demonstration projects. Regional market differentiation is also intensifying, with economically developed regions transitioning towards integrated energy service providers, while central and western regions remain focused on traditional natural gas supply. Capital operations are active, with merger and acquisition transactions in the natural gas industry exceeding RMB50 billion in 2022. Financial instruments such as industrial funds and REITs are being widely utilised.

Overall, China's natural gas market in the next three years will be characterised by a tight balance between supply and demand, alongside accelerated structural adjustment. LNG imports will continue to expand, although price volatility is likely to intensify; the transmission and distribution capacity of urban pipeline natural gas is anticipated to improve significantly, accompanied by the emergence of innovative trading models. Meanwhile, market competition landscape will be reshaped through market opening. Companies should leverage their extensive industry experience to strengthen cooperation with long-term strategic partners, capitalise on complementary resource advantages, align with national policy directions, increase investment in technological innovation, and actively respond to market changes. In the coming year, companies should actively explore fields such as LNG trade, urban gas mergers and acquisitions, natural gas pipeline transportation, and integrated energy supply. Following the entering into of the MOU with Lao MOIC of the Laos PDR, the Group had kick started the expansion into Southeast Asian markets which aligned with the Belt and Road initiative. Through this expansion, the Group expects to diversify its business and expand its revenue base. At the same time, the Group will continue explore other suitable business opportunities and investments.

SHARE OPTION SCHEME

The Company operates share option schemes for the purpose of providing incentives and rewards to eligible participants who contribute to the success of the Group's operations.

On the extraordinary general meeting of the Company held on 14 September 2023 (the "Adoption Date"), an ordinary resolution was passed by the shareholders that to approve and adopt a new share option scheme (the "Share Option Scheme").

The Share Option Scheme is valid and effective for a period of 10 years commencing on 14 September 2023 and may continue to be exercisable in accordance with their terms of issue. The Board may grant options to Directors, employees and service providers of the Company or its subsidiaries to subscribe for shares in the Company at a consideration equal to the higher of the closing price of the shares of the Company on the Stock Exchange at the date of offer of grant and the average closing prices of the shares of the Company on the Stock Exchange for the five trading days immediately preceding the date of grant of the options. Options granted must be taken up within 21 days from the date of grant, upon payment of HK\$1.00. Options may be exercised at any time from the date of grant of the share option up to the tenth anniversary of the date of grant as determined by the Directors at their discretion. The maximum number of shares of the Company which may be issued in respect of all share options and awards which may be granted at any time under the Share Option Scheme together with options and awards which may be granted under any other share schemes for the time being of the Company shall not exceed such number of shares as equals to 10% of the issued share capital of the Company as at the Adoption Date (the "Scheme Mandate Limit"). The Company may seek approval of the shareholders in general meeting to refresh the Scheme Mandate Limit under the Share Option Scheme after 3 years from the Adoption Date (or the date of shareholders' approval for the last refreshment), provided that the limit so refreshed must not exceed 10% of the relevant class of shares in issue as at the date of passing the relevant resolution.

On 11 December 2023, 366,688,000 share options have been granted under the Share Option Scheme, representing 10% of the shares of the Company in issue at that date. Up to 30 September 2025, all the share options were exercised. No outstanding share options as at 30 September 2025.

During the Current Period, no share options granted under the Share Option Scheme were lapsed or cancelled in accordance with the terms of the scheme.

Upon adoption of the Share Option Scheme, 366,688,000 share options were granted on 11 December 2023. As such, as at 1 April 2025 and 30 September 2025, the total number of share options available for grant under the scheme mandate limit (which is 366,693,600 shares, representing 10% of the issued share capital of the Company as at the date of approval of the Share Option Scheme) and the service provider sublimit (36,669,360 shares, representing 1% of the issued share capital of the Company as at the date of approval of the Share Option Scheme) of the Share Option Scheme was 5,600.

As at 30 September 2025, no shares may be issued in respect of share options granted under the Share Schemes of the Company, as no outstanding share options under Share Option Scheme.
