CEO's Message

Dear Shareholders,

This year's annual report, themed "Beyond the Pages," captures both our achievements and our ongoing transformation. As we are moving beyond our roots as a traditional financial printer, our business is evolving into new areas — demonstrating that we are not only engaged in paper-related services but are also capitalizing on the collaboration with industry expertise to supplement and diversify our revenue stream.

Throughout the financial year, Hong Kong's capital markets have demonstrated strong resurgence, with strong performance in both Initial Public Offerings ("IPO") and secondary market activities. For the first nine months of 2025, Hong Kong regained the top position in the global IPO ranking, raising HK\$182.9 billion across 67 listings. However, we must acknowledge the intensified competition and expanded paperless listing regime by the Stock Exchange that continually reshape the financial printing industry.

In response, we have dedicated ourselves to providing outstanding, customized services tailored to our customers' unique needs. Enriching our service portfolio and enhancing our customer base allow us to deliver solutions that go beyond expectations. Every relationship we build is founded on a deep understanding of our clients' goals, enabling us to craft offerings that are not only effective but also personal and impactful.

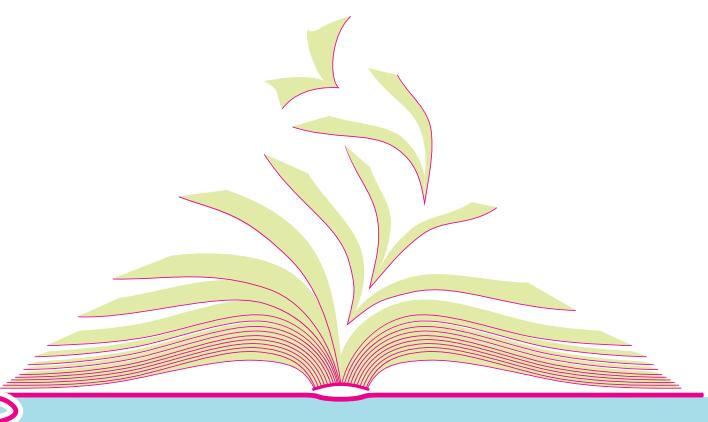

"Beyond the Pages" also means expanding the horizons of our company's capabilities. In addition to strengthening our core financial printing business, we are excited to announce our diversification into event management and insurance. These new ventures allow us to utilize our strong cash position and sustainable operating cash inflows generated from the core financial printing business to enhance our financial performance and value to our shareholders.

As we look to the future, we are confident in our ability to continue elevating our services, deepening our client partnerships, and reaching new heights in both established and emerging business areas.

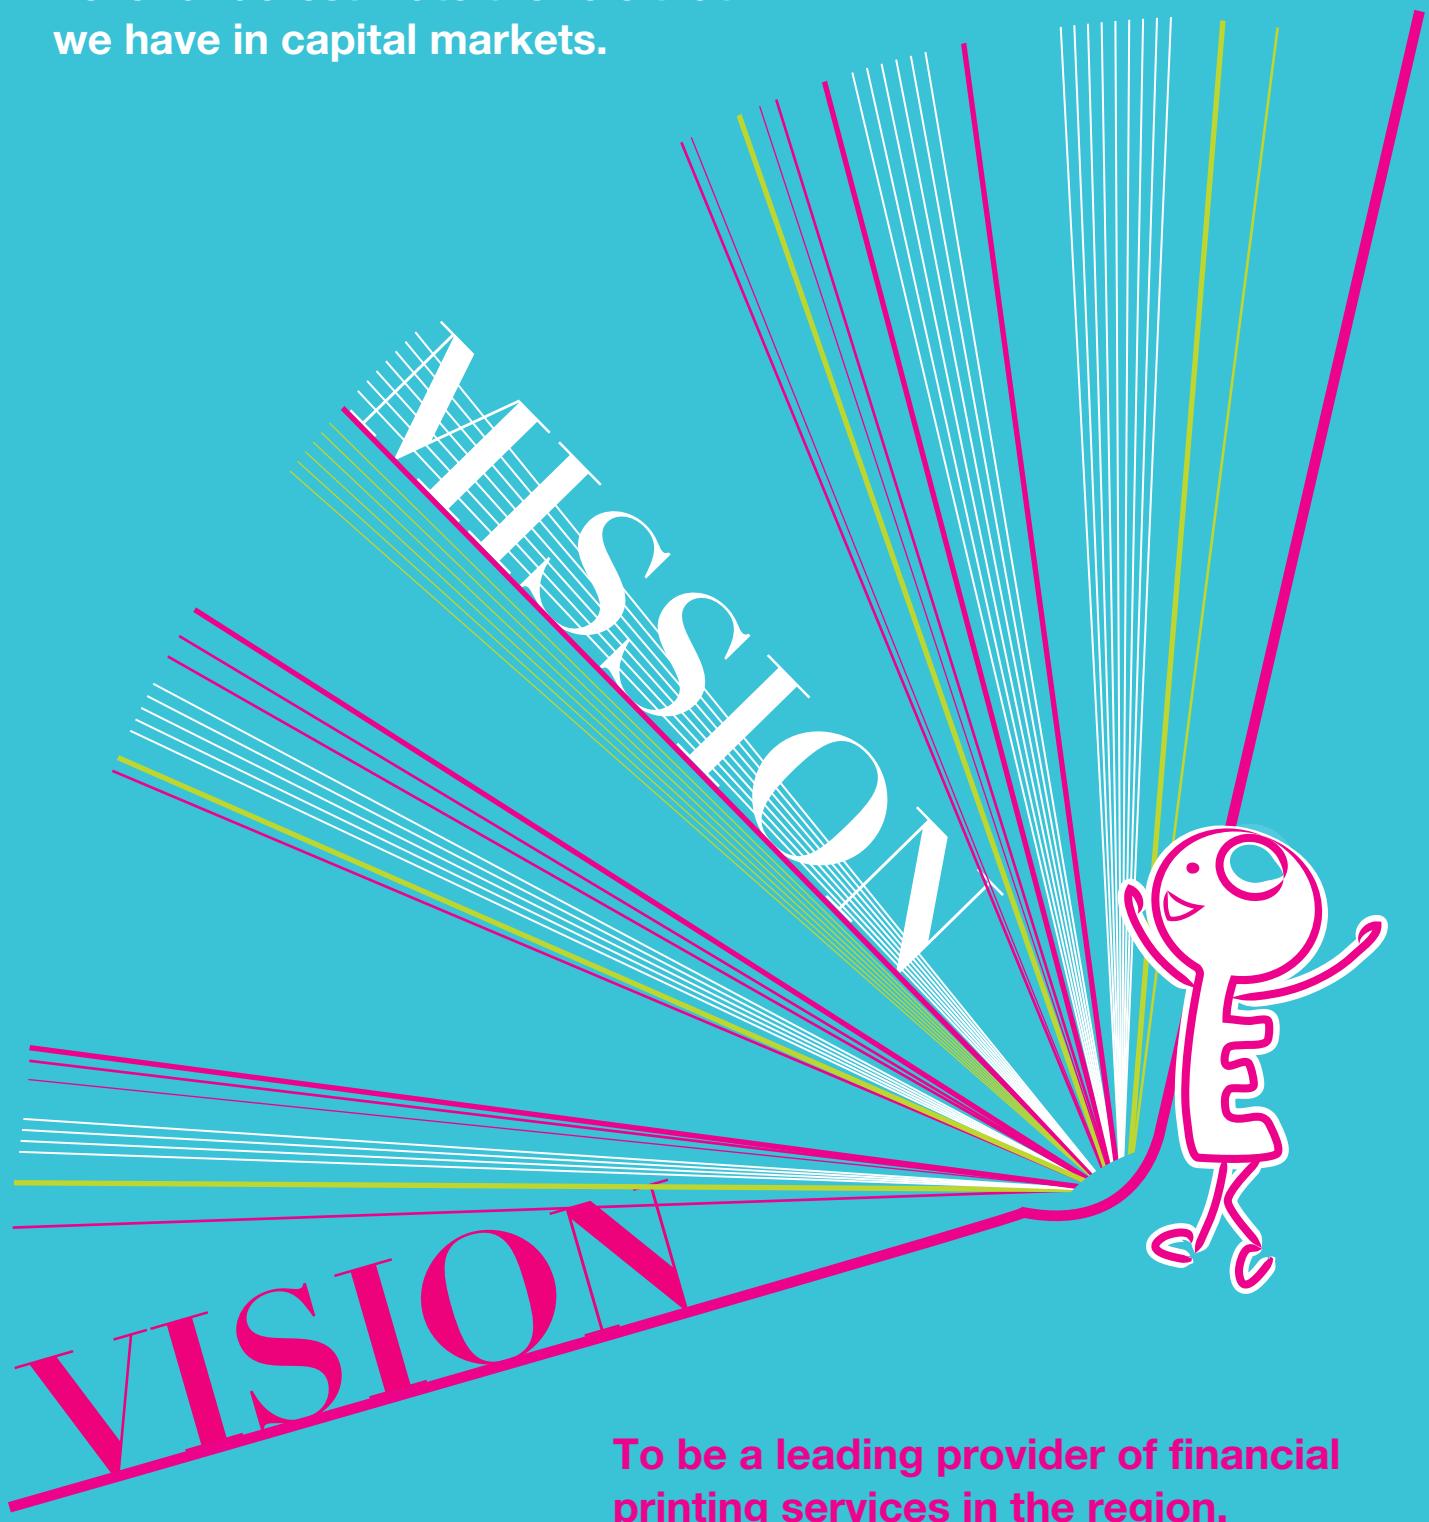

Donati Chan Yi Mei Amy

Chief Executive Officer

Hong Kong, 23rd December 2025

We are a trusted provider of financial printing services.
We continue to pursue excellence through
improvements in technology and people,
never underestimate the role that
we have in capital markets.

To be a leading provider of financial
printing services in the region.

REVENUE

For the Year 2024 and Year 2025, the Group's revenue was approximately HK\$40.1 million and HK\$37.5 million respectively. The decrease was mainly due to the further expand of paperless listing regime and the uncertainties in the financial market during the Year 2025.

Management Discussion and Analysis

FOREIGN CURRENCY EXPOSURE

The Group's businesses are located in Hong Kong and most transactions are conducted in Hong Kong dollars ("HK\$") except for certain contract sum denominated in United States dollars ("USD"). Most of the Group's assets and liabilities are denominated in HK\$, except for certain cash on hand and bank deposits which were denominated in USD, Taiwan Dollar and Renminbi.

The Directors are of the view that the Group's operating cash flow and liquidity are not subject to significant foreign exchange rate risks and therefore, no hedging arrangements were made during the Year 2025. However, the Group will review and monitor the relevant foreign exchange risk from time to time based on its business development requirements and may enter into foreign exchange hedging arrangements when applicable.

PRINCIPAL RISKS AND UNCERTAINTIES

Our Group generally do not enter into long-term agreements with our customers and may not be able to retain existing customers or secure new customers. We engage our subcontractors on a project-by-project basis and their failure to meet our requirements may affect the quality of our services. However, customer satisfaction and quality services are the cornerstones of the Group's long-term sustainable growth. Thus, the Group will continue to invest in our facilities and our staff to further enhance our service standard and competitiveness.

LIQUIDITY, FINANCIAL RESOURCES, BORROWING AND GEARING RATIO

The Group's primary use of cash is to satisfy the working capital and capital expenditure needs. Historically, the Group's use of cash has mainly been financed through a combination of cash received from the provision of services and financial support from the shareholders.

As at 30th September 2025, the Group had cash and cash equivalents and fixed deposits of approximately HK\$30.4 million (2024: HK\$60.2 million) and did not have any bank borrowings. Our Directors believe that the Group's operation will be funded by internally generated cash flows and, if necessary, additional equity and/or debt financing.

As at 30th September 2025, the Group's current assets amounted to approximately HK\$62.1 million (2024: HK\$71.5 million) and current liabilities amounted to approximately HK\$27.3 million (2024: HK\$20.3 million). Current ratio was 2.3 times as at 30th September 2025 (2024: 3.5 times).

Independent Auditor's Report

To the Shareholders of EDICO Holdings Limited
(incorporated in the Cayman Islands with limited liability)

OPINION

We have audited the consolidated financial statements of EDICO Holdings Limited (the "Company") and its subsidiaries (collectively referred to as the "Group") set out on pages 59 to 119, which comprise the consolidated statement of financial position as at 30th September 2025; and the consolidated statement of profit or loss and other comprehensive income, the consolidated statement of changes in equity and the consolidated statement of cash flows for the year then ended; and notes to the consolidated financial statements, including material accounting policy information.

In our opinion, the consolidated financial statements give a true and fair view of the consolidated financial position of the Group as at 30th September 2025, and of its consolidated financial performance and its consolidated cash flows for the year then ended in accordance with HKFRS Accounting Standards issued by the Hong Kong Institute of Certified Public Accountants ("HKICPA") and have been properly prepared in compliance with the disclosure requirements of the Hong Kong Companies Ordinance.

BASIS FOR OPINION

We conducted our audit in accordance with Hong Kong Standards on Auditing ("HKSAs") issued by the HKICPA. Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the HKICPA's Code of Ethics for Professional Accountants (the "Code"), and we have fulfilled our other ethical responsibilities in accordance with the Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

KEY AUDIT MATTERS

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Independent Auditor's Report

Key audit matters identified in our audit are summarised as follows:

- Revenue recognition
- Impairment assessment of trade receivables
- Impairment assessment of non-financial assets

Key Audit Matter

How our audit addressed the Key Audit Matter

Revenue recognition

Refer to Note 5(a) (significant accounting judgments and estimates) and Note 7 (revenue) to the consolidated financial statements.

The Group recognised revenue of HK\$35,092,000 from provision of financial printing services for the year ended 30th September 2025.

Revenue from provision of financial printing services is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation at reporting date using input method as the customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs. We identified the recognition of revenue from provision of financial printing services as a key audit matter due to the financial significance of revenue to the consolidated financial statements and the significant management's judgements required in determining the earliest time at which the Group can reasonably measure the outcome of the performance obligation and estimation required for measuring the progress and variable consideration.

Our procedures in relation to revenue recognition mainly included:

- Obtaining an understanding of the processes and testing the Group's internal controls over the recognition of revenue;
- Reviewing signed fee proposals on a sample basis with customers to understand the terms of the provision of financial printing services to assess if the revenue recognition policy applied by the Group is in compliance with HKFRS 15 *Revenue from Contracts with Customers*;
- Assessing the reasonableness of management's judgement applied in determining the earliest time at which the Group can reasonably measure the outcome of the performance obligation and estimation required for measuring the progress and variable consideration;
- Checking the mathematical accuracy of and examining the incurred costs to date by tracing to source documentation on a sample basis and evaluating their recoverability; and
- Examining the supporting documents on a sample basis including the invoices and the correspondences confirming the progress of performance obligation.

Independent Auditor's Report

Key Audit Matter

How our audit addressed the Key Audit Matter

Impairment assessment of trade receivables

Refer to Note 5(b) (significant accounting judgments and estimates) and Note 20 (trade receivables) to the consolidated financial statements.

As at 30th September 2025, trade receivables recognised by the Group amounted to HK\$17,097,000. The related provision for expected credit losses recognised by the Group amounted to HK\$6,869,000.

Management's judgement is involved in assessing the appropriateness of forward-looking information used for estimating expected credit losses. Management estimated the expected credit losses, based on historical credit loss experience by customers as adjusted for forward-looking information. The impact of economic factors, both current and future, is considered in assessing the likelihood of recovery from customer, where applicable.

We focus on the area due to the financial significance of trade receivables to the consolidated financial statements and the significant management's judgement and estimation involved in assessing the expected credit losses.

Our procedures in relation to impairment assessment of trade receivables mainly included:

- Reviewing management's assessment of the overall policies and procedures in relation to expected credit losses model for estimating impairment provisions and assessing the appropriateness of the model applied by the management;
- Assessing the reasonableness of management's judgement and estimates for expected credit losses by examining the information used by management, including testing accuracy of the historical default data, evaluating whether the historical loss rates are appropriately adjusted based on current economic conditions and forward-looking information; and
- Checking the subsequent settlements made by customers to relevant bank records on a sample basis.

Independent Auditor's Report

Key Audit Matter

How our audit addressed the Key Audit Matter

Impairment assessment of non-financial assets

Refer to Note 5(c) (significant accounting judgments and estimates), Note 16 (property, plant and equipment) and Note 17(i) (right-of-use assets) to the consolidated financial statements.

We identified the impairment assessment of non-financial assets for financial printing unit as a key audit matter owing to the significance of the carrying amounts and the significant estimates made by the management in determining the recoverable amounts of the cash-generating-unit ("CGU"), including the cash flows projections and discount rate as disclosed in Note 17 to the consolidated financial statements. During the year, an impairment loss of HK\$4,650,000 was made by the management.

The accounting policies, accounting judgements and estimates and the related disclosures are included in Notes 4, 5 and 17 to the consolidated financial statements.

Our audit procedures included:

- Evaluating management's methodology for impairment assessment of non-financial assets and corroborating the projected future cash flows, discount rate and growth rate used based on the market information;
- Evaluating the discounted cash flows prepared by the management in deriving the recoverable amounts of the CGU for the impairment assessment by checking the mathematical accuracy of discounted cash flow calculation, assessing the reasonableness of the key assumptions adopted by the management in the model with reference to the Group's historical performances and external market data; and
- Performing sensitivity analysis.

OTHER INFORMATION

The directors of the Company are responsible for the other information. The other information comprises all of the information included in the annual report other than the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

RESPONSIBILITIES OF DIRECTORS AND THE AUDIT COMMITTEE FOR THE CONSOLIDATED FINANCIAL STATEMENTS

The directors of the Company are responsible for the preparation of the consolidated financial statements that give a true and fair view in accordance with HKFRS Accounting Standards issued by the HKICPA and the disclosure requirements of the Hong Kong Companies Ordinance, and for such internal control as the directors of the Company determine is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, the directors of the Company are responsible for assessing the Group's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors of the Company either intend to liquidate the Group or to cease operations, or have no realistic alternative but to do so.

The Audit Committee is responsible for overseeing the Group's financial reporting process.

AUDITOR'S RESPONSIBILITIES FOR THE AUDIT OF THE CONSOLIDATED FINANCIAL STATEMENTS

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Our report is made solely to you, as a body, in accordance with our agreed terms of engagement and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with HKSAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with HKSAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's internal control.

Independent Auditor's Report

- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the directors of the Company.
- Conclude on the appropriateness of the Company's directors' use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Plan and perform the group audit to obtain sufficient appropriate audit evidence regarding the financial information of the entities or business units within the Group as a basis for forming to an opinion on the group financial statements. We are responsible for the direction, supervision and review of the audit work performed for purpose of the group audit. We remain solely responsible for our audit opinion.

We communicate with the Audit Committee regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with the Audit Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The engagement partner on the audit resulting in this independent auditor's report is Wan Tak Shing (Practising Certificate Number: P04844).

Notes to the Consolidated Financial Statements

3. APPLICATION OF NEW AND AMENDMENTS TO HKFRS ACCOUNTING STANDARDS (Continued)

Amendments to HKFRS 9 and HKFRS 7 Amendments to the Classification and Measurement of Financial Instruments

The amendments to HKFRS 9 clarify the recognition and derecognition for financial asset and financial liability and add an exception which permits an entity to deem a financial liability to be discharged before the settlement date if it is settled in cash using an electronic payment system if, and only if certain conditions are met.

The amendments also provide guidance on the assessment of whether the contractual cash flows of a financial asset are consistent with a basic lending arrangement. The amendments specify that an entity should focus on what an entity is being compensated for rather than the compensation amount. Contractual cash flows are inconsistent with a basic lending arrangement if they are indexed to a variable that is not a basic lending risk or cost. The amendments state that, in some cases, a contingent feature may give rise to contractual cash flows that are consistent with a basic lending arrangement both before and after the change in contractual cash flows, but the nature of the contingent event itself does not relate directly to changes in basic lending risks and costs. Furthermore, the description of the term “non-recourse” is enhanced and the characteristics of “contractually linked instruments” are clarified in the amendments.

The amendments are effective for annual reporting periods beginning on or after 1st January 2026, with early application permitted.

Upon the application of the amendments, the Group will apply the exception to derecognise financial liabilities settled via electronic payment systems when the payment instruction is initiated. On the other hand, for the settlement by the customers via electronic settlement systems, the Group can only derecognise the financial assets when cash is deposited in the bank accounts, which is consistent with the current accounting policies. As a result of the clarification made by the amendments on the derecognition of financial assets and liabilities, the Group can only derecognise financial assets and financial liabilities settled via cheques on the date the cheques have been cleared in the bank account.

HKFRS 18 Presentation and Disclosure in Financial Statements

HKFRS 18 Presentation and Disclosure in Financial Statements, which sets out requirements on presentation and disclosures in financial statements, will replace HKAS 1 *Presentation of Financial Statements*. This new HKFRS Accounting Standard, while carrying forward many of the requirements in HKAS 1, introduces new requirements to present specified categories and defined subtotals in the statement of profit or loss; provide disclosures on management-defined performance measures in the notes to the financial statements and improve aggregation and disaggregation of information to be disclosed in the financial statements. In addition, some HKAS 1 paragraphs have been moved to HKAS 8 and HKFRS 7. Minor amendments to HKAS 7 *Statement of Cash Flows* and HKAS 33 *Earnings per Share* are also made. HKFRS 18, and amendments to other standards, will be effective for annual periods beginning on or after 1st January 2027, with early application permitted. The application of the new standard is expected to affect the presentation of the statement of profit or loss and disclosures in the future financial statements. The Group is in the process of assessing the detailed impact of HKFRS 18 on the Group's consolidated financial statements.

4. MATERIAL ACCOUNTING POLICIES

BASIS OF CONSOLIDATION

The consolidated financial statements include the financial statements of the Company and its subsidiaries. A subsidiary is an entity, directly or indirectly, controlled by the Company. Control is achieved when the Company is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee.

Consolidation of a subsidiary begins when the Group obtains control over the subsidiary and ceases when the Group loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired during the year are included in the consolidated statement of profit or loss and other comprehensive income from the date the Group gains control.

Profit or loss and each item of other comprehensive income are attributed to the owners of the Company and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the Company and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

The financial statements of the subsidiaries are prepared for the same reporting period as the Company, using consistent accounting policies. The results of subsidiaries are consolidated from the date on which the Group obtains control over the subsidiaries, and continue to be consolidated until the date that such control ceases.

All intragroup assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

Non-controlling interests in subsidiaries are presented separately from the Group's equity therein, which represent present ownership interests entitling their holders to a proportionate share of net assets of the relevant subsidiaries upon liquidation.

BUSINESS COMBINATIONS OR ASSET ACQUISITIONS

Asset acquisitions

When the Group acquires a group of assets and liabilities that do not constitute a business, the Group identifies and recognises the individual identifiable assets acquired and liabilities assumed by allocating the purchase price first to financial assets/financial liabilities at the respective fair values, the remaining balance of the purchase price is then allocated to the other identifiable assets and liabilities on the basis of their relative fair values at the date of purchase. Such a transaction does not give rise to goodwill or bargain purchase gain.

Notes to the Consolidated Financial Statements

4. MATERIAL ACCOUNTING POLICIES (Continued)

BUSINESS COMBINATIONS OR ASSET ACQUISITIONS (Continued)

Business combinations

A business is an integrated set of activities and assets which includes an input and a substantive process that together significantly contribute to the ability to create outputs. The acquired processes are considered substantive if they are critical to the ability to continue producing outputs, including an organised workforce with the necessary skills, knowledge, or experience to perform the related processes or they significantly contribute to the ability to continue producing outputs and are considered unique or scarce or cannot be replaced without significant cost, effort, or delay in the ability to continue producing outputs.

Acquisitions of businesses are accounted for using the acquisition method. The consideration transferred in a business combination is measured at fair value, which is calculated as the sum of the acquisition-date fair values of the assets transferred by the Group, liabilities incurred by the Group to the former owners of the acquiree and the equity interests issued by the Group in exchange for control of the acquiree. Acquisition-related costs are generally recognised in profit or loss as incurred.

The identifiable assets acquired and liabilities assumed must meet the definitions of an asset and a liability in the Conceptual Framework for Financial Reporting (the “Conceptual Framework”) except for transactions and events within the scope of HKAS 37 *Provisions, Contingent Liabilities and Contingent Assets* or HK(IFRIC)-Int 21 *Levies*, in which the Group applies HKAS 37 or HK(IFRIC)-Int 21 instead of the Conceptual Framework to identify the liabilities it has assumed in a business combination. Contingent assets are not recognised.

At the acquisition date, the identifiable assets acquired and the liabilities assumed are recognised at their fair value.

Goodwill is measured as the excess of the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree, and the fair value of the acquirer’s previously held equity interest in the acquiree (if any) over the net amount of the identifiable assets acquired and the liabilities assumed as at acquisition date. If, after re-assessment, the net amount of the identifiable assets acquired and liabilities assumed exceeds the sum of the consideration transferred, the amount of any non-controlling interests in the acquiree and the fair value of the acquirer’s previously held interest in the acquiree (if any), the excess is recognised immediately in profit or loss as a bargain purchase gain.

Non-controlling interests that are present ownership interests and entitle their holders to a proportionate share of the relevant subsidiary’s net assets in the event of liquidation are initially measured at the non-controlling interests’ proportionate share of the recognised amounts of the acquiree’s identifiable net assets or at fair value.

INVESTMENTS IN ASSOCIATES

An associate is an entity over which the Group has significant influence. Significant influence is the power to participate in the financial and operating policy decisions of the investee but is not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in these consolidated financial statements using the equity method of accounting.

The financial statements of associates used for equity accounting purposes are prepared using uniform accounting policies as those of the Group for like transactions and events in similar circumstances.

Under the equity method, an investment in an associate is initially recognised in the consolidated statement of financial position at cost and adjusted thereafter to recognise the Group's share of the profit or loss and other comprehensive income of the associate. When the Group's share of losses of an associate exceeds the Group's interest in that associate (which includes any long-term interests that, in substance, form part of the Group's net investment in the associate), the Group discontinues recognising its share of further losses. Additional losses are recognised only to the extent that the Group has incurred legal or constructive obligations or made payments on behalf of the associate.

An investment in an associate is accounted for using the equity method from the date on which the investee becomes an associate. On acquisition of the investment in an associate, any excess of the cost of the investment over the Group's share of the net fair value of the identifiable assets and liabilities of the investee is recognised as goodwill, which is included within the carrying amount of the investment. Any excess of the Group's share of the net fair value of the identifiable assets and liabilities over the cost of the investment, after reassessment, is recognised immediately in profit or loss in the period in which the investment is acquired.

The Group assesses whether there is an objective evidence that the interest in an associate may be impaired. When any objective evidence exists, the entire carrying amount of the investment (including goodwill) is tested for impairment in accordance with HKAS 36 as a single asset by comparing its recoverable amount (higher of value in use and fair value less costs of disposal) with its carrying amount. Any impairment loss recognised is not allocated to any asset, including goodwill, that forms part of the carrying amount of the investment.

INTERESTS IN JOINT OPERATIONS

A joint operation is a joint arrangement whereby the parties that have joint control of the arrangement have rights to the assets, and obligations for the liabilities, relating to the joint arrangement. Joint control is the contractually agreed sharing of control of an arrangement, which exists only when decisions about the relevant activities require unanimous consent of the parties sharing control.

When a group entity undertakes its activities under joint operations, the Group as a joint operator recognises in relation to its interest in a joint operation:

- Its assets, including its share of any assets held jointly
- Its liabilities, including its share of any liabilities incurred jointly
- Its revenue from the sale of its share of the output arising from the joint operation
- Its share of the revenue from the sale of the output by the joint operation
- Its expenses, including its share of any expenses incurred jointly

The Group accounts for the assets, liabilities, revenues and expenses relating to its interest in a joint operation in accordance with the HKFRS Accounting Standards applicable to the particular assets, liabilities, revenues and expenses.

PROPERTY, PLANT AND EQUIPMENT AND DEPRECIATION

Property, plant and equipment are stated at cost less accumulated depreciation and any accumulated impairment losses. The cost of an item of property, plant and equipment comprises its purchase price and any directly attributable costs of bringing the asset to its working condition and location for its intended use.

Expenditure incurred after items of property, plant and equipment have been put into operation, such as repairs and maintenance, is normally charged to profit or loss in the period in which it is incurred. In situations where the recognition criteria are satisfied, the expenditure is capitalised in the carrying amount of the asset as a replacement.

Depreciation is calculated on the straight-line basis to write off the cost of each item of property, plant and equipment to its residual value over its estimated useful lives. The principal annual rates used for this purpose are as follows:

Leasehold improvements	20%
Furniture and fixtures	20%
Office equipment	20%
Computer equipment	20%

Residual values, useful lives and the depreciation method are reviewed, and adjusted prospectively if appropriate, at least at each financial year end.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its use. Any gain or loss on disposal or retirement recognised in profit or loss in the year the asset is derecognised is the difference between the net sales proceeds and the carrying amount of the relevant asset.

4. MATERIAL ACCOUNTING POLICIES (Continued)

INTANGIBLE ASSETS ACQUIRED IN A BUSINESS COMBINATION

Intangible assets acquired in a business combination are recognised separately from goodwill and are initially recognised at their fair value at the acquisition date (which is regarded as their cost).

The useful lives of intangible assets are estimated by the directors as 5 years.

Subsequent to initial recognition, intangible assets acquired in a business combination are carried at cost less accumulated amortisation and any subsequent accumulated impairment losses.

Amortisation is recognised on a straight-line basis over their estimated useful lives.

IMPAIRMENT OF NON-FINANCIAL ASSETS

Where an indication of impairment exists, or when annual impairment testing for an asset is required, the asset's recoverable amount is estimated. An asset's recoverable amount is the higher of the asset's value in use and its fair value less costs of disposal, and is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets, in which case the recoverable amount is determined for the cash-generating unit ("CGU") to which the asset belongs.

In testing a cash-generating unit for impairment, corporate assets are allocated to the relevant cash-generating unit when a reasonable and consistent basis of allocation can be established, or otherwise they are allocated to the smallest group of cash generating units for which a reasonable and consistent allocation basis can be established. The recoverable amount is determined for the cash-generating unit or group of cash-generating units to which the corporate asset belongs, and is compared with the carrying amount of the relevant cash-generating unit or group of cash-generating units.

An impairment loss is recognised only if the carrying amount of an asset (or a CGU) exceeds its recoverable amount. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset (or a CGU). In allocating the impairment loss, the impairment loss is allocated first to reduce the carrying amount of any goodwill (if applicable) and then to the other assets on a pro-rata basis based on the carrying amount of each asset in the unit or the group of cash-generating units. The carrying amount of an asset is not reduced below the highest of its fair value less costs of disposal (if measurable), its value in use (if determinable) and zero. An impairment loss is charged to profit or loss in the period in which it arises in those expense categories consistent with the function of the impaired asset.

FINANCIAL INSTRUMENTS

Financial assets and financial liabilities are recognised when a group entity becomes a party to the contractual provisions of the instrument. Financial assets and financial liabilities are initially measured at fair value except for trade receivables arising from contracts with customers which are initially measured in accordance with HKFRS 15 *Revenue from contracts with customers*. Transaction costs that are directly attributable to the acquisition or issue of financial assets or financial liabilities are added to or deducted from the fair value of the financial assets or financial liabilities, as appropriate, on initial recognition.

The effective interest method is a method of calculating the amortised cost of a financial asset or financial liability and of allocating interest income and interest expense over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts and payments (including all fees and points paid or received that form an integral part of the effective interest rate, transaction costs and other premiums or discounts) through the expected life of the financial asset or financial liability, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Financial assets

Classification and subsequent measurement of financial assets

Financial assets that meet the following conditions are subsequently measured at amortised cost:

- the financial asset is held within a business model whose objective is to collect contractual cash flows; and
- the contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

All other financial assets are subsequently measured at fair value.

Amortised cost and effective interest rate

Interest income is recognised using the effective interest method for financial assets measured subsequently at amortised cost. Interest income is calculated by applying the effective interest rate to the gross carrying amount of a financial asset, except for financial assets that have subsequently become credit-impaired. For financial assets that have subsequently become credit-impaired, interest income is recognised by applying the effective interest rate to the amortised cost of the financial asset from the next reporting period. If, in subsequent reporting periods, the credit risk on the credit-impaired financial instrument improves so that the financial asset is no longer credit-impaired, interest income is recognised by applying the effective interest rate to the gross carrying amount of the financial asset from the beginning of the reporting period following the determination that the asset is no longer credit-impaired.

Impairment of financial assets and contract assets

The Group performs impairment assessment under expected credit loss ("ECL") model on trade and other receivables, rental deposits, bank balances and cash, fixed deposits and contract assets which are subject to impairment assessment under HKFRS 9. The amount of ECL is updated at each reporting date to reflect changes in credit risk since initial recognition.

Lifetime ECL represents the ECL that will result from all possible default events over the expected life of the relevant instrument. In contrast, 12-month ECL ("12m ECL") represents the portion of lifetime ECL that is expected to result from default events that are possible within 12 months after the reporting date. Assessments are done based on the Group's historical credit loss experience, adjusted for factors that are specific to the debtors, general economic conditions and an assessment of both the current conditions at the reporting date as well as the forecast of future conditions.

The Group always recognises lifetime ECL for trade receivables and contract assets without significant financing component. For all other instruments, the Group measures the loss allowance equal to 12m ECL, unless there has been a significant increase in credit risk since initial recognition, in which case the Group recognises lifetime ECL. The assessment of whether lifetime ECL should be recognised is based on significant increases in the likelihood or risk of a default occurring since initial recognition.

Significant increase in credit risk

In assessing whether the credit risk has increased significantly since initial recognition, the Group compares the risk of a default occurring on the financial instrument as at the reporting date with the risk of a default occurring on the financial instrument as at the date of initial recognition. In making this assessment, the Group considers both quantitative and qualitative information that is reasonable and supportable, including historical experience and forward-looking information that is available without undue cost or effort.

In particular, the following information is taken into account when assessing whether the credit risk has increased significantly:

- an actual or expected significant deterioration in the financial instrument's external (if available) or internal credit rating;
- significant deterioration in external market indicators of credit risk, e.g. a significant increase in the credit spread, the credit default swap prices for the debtor;
- existing or forecast adverse changes in business, financial or economic conditions that are expected to cause a significant decrease in the debtor's ability to meet its debt obligations;
- an actual or expected significant deterioration in the operating results of the debtor; and
- an actual or expected significant adverse change in the regulatory, economic, or technological environment of the debtor that results in a significant decrease in the debtor's ability to meet its debt obligations.

FINANCIAL INSTRUMENTS (Continued)

Financial assets (Continued)

Impairment of financial assets and contract assets (Continued)

Significant increase in credit risk (Continued)

Irrespective of the outcome of the above assessment, the Group presumes that the credit risk has increased significantly since initial recognition when contractual payments are more than 30 days past due, unless the Group has reasonable and supportable information that demonstrates otherwise.

Despite the foregoing, the Group assumes that the credit risk on a debt instrument has not increased significantly since initial recognition if the debt instrument is determined to have low credit risk at the reporting date. A debt instrument is determined to have low credit risk if (i) it has a low risk of default; (ii) the borrower has a strong capacity to meet its contractual cash flow obligations in the near term; and (iii) adverse changes in economic and business conditions in the longer term may, but will not necessarily, reduce the ability of the borrower to fulfil its contractual cash flow obligations. The Group considers a debt instrument to have low credit risk when it has an internal or external credit rating of “investment grade” as per globally understood definitions.

The Group regularly monitors the effectiveness of the criteria used to identify whether there has been a significant increase in credit risk and revises them as appropriate to ensure that the criteria are capable of identifying significant increase in credit risk before the amount becomes past due.

Definition of default

The Group considers the following as constituting an event of default for internal credit risk management purposes as historical experience indicates that receivables that meet either of the following criteria are generally not recoverable:

- when there is a breach of financial covenants by the counterparty; or
- information developed internally or obtained from external sources indicates that the debtor is unlikely to pay its creditors, including the Group, in full (without taking into account any collaterals held by the Group).

Irrespective of the above, the Group considers that default has occurred when a financial asset is more than 90 days past due unless the Group has reasonable and supportable information to demonstrate that a more lagging default criterion is more appropriate.

Credit-impaired financial assets

A financial asset is credit-impaired when one or more events of default that have a detrimental impact on the estimated future cash flows of that financial asset have occurred. Evidence that a financial asset is credit-impaired includes observable data about the following events:

- significant financial difficulty of the issuer or the borrower;
- a breach of contract, such as a default or past due event;

Notes to the Consolidated Financial Statements

FINANCIAL INSTRUMENTS (Continued)

Credit-impaired financial assets (Continued)

- the lender(s) of the borrower, for economic or contractual reasons relating to the borrower's financial difficulty, having granted to the borrower a concession(s) that the lender(s) would not otherwise consider; or
- it is becoming probable that the borrower will enter bankruptcy or other financial reorganisation.

Write-off policy

The Group writes off a financial asset when there is information indicating that there is no realistic prospect of recovery, e.g. when the counterparty has been placed under liquidation or has entered into bankruptcy proceedings, or in the case of trade receivables, when the amounts are over two years past due, whichever occurs sooner. Financial assets written off may still be subject to enforcement activities under the Group's recovery procedures, taking into account legal advice where appropriate. A write-off constitutes a derecognition event. Any subsequent recoveries are recognised in profit or loss.

Measurement and recognition of ECL

The measurement of ECL is a function of the probability of default, loss given default (i.e. the magnitude of the loss if there is a default) and the exposure at default. The assessment of the probability of default and loss given default is based on historical data adjusted by forward-looking information. Estimation of ECL reflects an unbiased and probability-weighted amount that is determined with the respective risks of default occurring as the weights. The Group uses a practical expedient in estimating ECL on trade receivables using a provision matrix taking into consideration historical credit loss experience and forward looking information that is available without undue cost or effort.

Generally, the ECL is the difference between all contractual cash flows that are due to the Group in accordance with the contract and the cash flows that the Group expects to receive, discounted at the effective interest rate determined at initial recognition.

The Group recognises an impairment gain or loss in profit or loss for all financial instruments by adjusting their carrying amount, with the exceptions of trade receivables and contract assets where the corresponding adjustment is recognised through a loss allowance account.

Lifetime ECL for trade receivables are considered on a collective basis taking into consideration past due information and relevant credit information such as forward looking macroeconomic information.

Where ECL is measured on a collective basis to cater for cases where evidence at the individual instrument level may not yet be available, the financial instruments are grouped on the following basis:

- Nature of financial instruments;
- Past-due status;
- Nature, size and industry of debtors; and
- External credit ratings where available.

FINANCIAL INSTRUMENTS (Continued)

Measurement and recognition of ECL (Continued)

The grouping is regularly reviewed by management to ensure the constituents of each group continue to share similar credit risk characteristics.

Financial liabilities and equity

Classification as debt or equity

Debt and equity instruments are classified as either financial liabilities or as equity in accordance with the substance of the contractual arrangements and the definitions of a financial liability and an equity instrument.

Equity instruments

An equity instrument is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities. Equity instruments issued by the group entities are recognised at the proceeds received, net of direct issue costs.

Financial liabilities at amortised cost

Financial liabilities including trade and other payables and accruals are subsequently measured at amortised cost, using the effective interest method.

Derecognition

The Group derecognises a financial asset only when the contractual rights to the cash flows from the asset expire.

On derecognition of a financial asset, the difference between the asset's carrying amount and the sum of the consideration received and receivable is recognised in profit or loss.

The Group derecognises financial liabilities when, and only when, the Group's obligations are discharged, cancelled or have expired. The difference between the carrying amount of the financial liability derecognised and the consideration paid and payable is recognised in profit or loss.

CASH AND CASH EQUIVALENTS

Cash and cash equivalents presented on the consolidated statement of financial position and cash flows include:

- (a) cash, which comprises of cash on hand and demand deposits; and
- (b) cash equivalents, which comprises of short-term (generally with original maturity of three months or less), highly liquid investments that are readily convertible to a known amount of cash and which are subject to an insignificant risk of changes in value.

Notes to the Consolidated Financial Statements

4. MATERIAL ACCOUNTING POLICIES (Continued)

LEASES

A contract is a lease if the contract transfers the right to control the use of an identified asset for a period of time in exchange for a consideration.

The Group as lessee

The Group recognises a right-of-use asset and a corresponding lease liability in which it is the lessee.

Right-of-use assets

Right-of-use assets should be recognised at cost and comprise the amount of the initial measurement of the lease liability, any lease payments made at or before the commencement date, less any lease incentives received, any initial direct costs incurred by the Group; and an estimate of costs to be incurred by the Group in dismantling and removing the underlying assets, restoring the site on which it is located or restoring the underlying asset to the condition required by the terms and conditions of the lease. If the Group has an obligation for costs to dismantle, remove or restore the underlying asset to the condition required by the terms and conditions of the lease, provision is recognised and measured under HKAS 37 Provision, Contingent Liabilities and Contingent Assets.

Right-of-use assets are depreciated over the shorter of the lease term and its useful life of the underlying asset. The depreciation starts at the commencement date of the lease. The right-of-use assets are presented as a separate line in the consolidated statement of financial position. The Group applies HKAS 36 *Impairment of Assets* to determine whether a right-of-use asset is impaired and accounts for any identified impairment loss as described in the “Impairment of non-financial assets” policy.

Refundable rental deposits paid are accounted under HKFRS 9 *Financial Instruments* (“HKFRS 9”) and initially measured at fair value. Adjustments to fair value at initial recognition are considered as additional lease payments and included in the cost of right-of-use assets.

Lease liabilities

Lease liability is initially measured at the present value of lease payments that are not paid at the commencement date, discounted by using the rate implicit in the lease. If the rate cannot be readily determined, the Group uses its incremental borrowing rate.

Lease payments included in the measurement of lease liability comprise fixed lease payments less any lease incentives receivable.

Lease liability is presented as a separate line in the consolidated statement of financial position. The lease liability is subsequently measured by increasing the carrying amount to reflect interest on the lease liability, using the effective interest method, and by reducing the carrying amount to reflect the lease payments made.

Notes to the Consolidated Financial Statements

4. MATERIAL ACCOUNTING POLICIES (Continued)

PROVISIONS

A provision is recognised when the Group has a present obligation (legal or constructive) as a result of a past event and it is probable that a future outflow of resources will be required to settle the obligation by the Group, provided that a reliable estimate can be made of the amount of the obligation.

The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the end of the reporting period, taking into account the risks and uncertainties surrounding the obligation. When a provision is measured using the cash flows estimated to settle the present obligation, its carrying amount is the present value of those cash flows (where the effect of the time value of money is material).

Provisions for the costs to restore leased assets to their original condition, as required by the terms and conditions of the lease, are recognised at the date of inception of the lease at the directors' best estimate of the expenditure that would be required to restore the assets. Estimates are regularly reviewed and adjusted as appropriate for new circumstances.

REVENUE FROM CONTRACTS WITH CUSTOMERS

The Group recognises revenue when (or as) a performance obligation is satisfied, i.e. when "control" of the goods or services underlying the particular performance obligation is transferred to the customer.

A performance obligation represents a good or service (or a bundle of goods or services) that is distinct or a series of distinct goods or services that are substantially the same.

Control is transferred over time and revenue is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation if one of the following criteria is met:

- the customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs;
- the Group's performance creates and enhances an asset that the customer controls as the Group performs; or
- the Group's performance does not create an asset with an alternative use to the Group and the Group has an enforceable right to payment for performance completed to date.

Otherwise, revenue is recognised at a point in time when the customer obtains control of the distinct good or service.

Notes to the Consolidated Financial Statements

4. MATERIAL ACCOUNTING POLICIES (Continued)

REVENUE FROM CONTRACTS WITH CUSTOMERS (Continued)

Provision of financial printing services

The Group provides financial printing services under contracts with customers. Such contracts are entered into before the services begin. Revenue from provision of financial printing services is recognised over time by reference to the progress towards complete satisfaction of the relevant performance obligation using cost-to-cost input method as the customer simultaneously receives and consumes the benefits provided by the Group's performance as the Group performs.

Contract assets arise when the Group has right to consideration in exchange for services that the Group has transferred to a customer that is not yet unconditional. They are assessed for impairment in accordance with HKFRS 9. In contrast, a receivable represents the Group's unconditional right to consideration.

Contract liabilities arise when the Group has obligation to transfer services to a customer for which the Group has received consideration (or an amount of consideration is due) from the customer. A contract asset and a contract liability relating to the same contract are accounted for and presented on a net basis.

The progress towards complete satisfaction of a performance obligation is measured based on cost-to-cost input method, which is to recognise revenue on the basis of the Group's efforts or inputs to the satisfaction of a performance obligation relative to the total expected inputs to the satisfaction of that performance obligation, that best depict the Group's performance in transferring control of services.

Provision of insurance brokerage services

Revenue from insurance brokerage services is recognised when the signed insurance policy is in force since the Group has fulfilled its performance obligation to distribute an insurance policy on behalf of the insurance company based on the premium paid by the policyholders for the related insurance policy sold.

Revenue from other sources

Investments in entertainment events are measured at fair value through profit or loss with gain or loss arising from net changes in fair value of such financial instruments recognised as revenue from other sources in the statement of profit or loss.

Variable consideration

For contracts that contain variable consideration, the Group estimates the amount of consideration to which it will be entitled using the expected value method/the most likely amount, which better predicts the amount of consideration to which the Group will be entitled.

The estimated amount of variable consideration is included in the transaction price only to the extent that it is highly probable that such an inclusion will not result in a significant revenue reversal in the future when the uncertainty associated with the variable consideration is subsequently resolved.

At the end of each reporting period, the Group updates the estimated transaction price (including updating its assessment of whether an estimate of variable consideration is constrained) to represent faithfully the circumstances present at the end of the reporting period and the changes in circumstances during the reporting period.

Notes to the Consolidated Financial Statements

4. MATERIAL ACCOUNTING POLICIES (Continued)

REVENUE FROM CONTRACTS WITH CUSTOMERS (Continued)

Principal versus agent

When another party is involved in providing goods or services to a customer, the Group determines whether the nature of its promise is a performance obligation to provide the specified goods or services itself (i.e. the Group is a principal) or to arrange for those goods or services to be provided by the other party (i.e. the Group is an agent).

The Group is a principal if it controls the specified good or service before that good or service is transferred to a customer.

EMPLOYEE BENEFITS

Short-term employee benefits are recognised at the undiscounted amount of the benefits expected to be paid as and when employees rendered the services. All short-term employee benefits are recognised as an expense.

A liability is recognised for benefits accruing to employees (such as wages and salaries, annual leave and sick leave) after deducting any amount already paid.

The Group operates a defined contribution scheme, the MPF retirement benefits scheme (the “MPF Scheme”) under the Hong Kong Mandatory Provident Fund Schemes Ordinance, for those employees who are eligible to participate in the MPF Scheme. Contributions are made based on a percentage of the employees’ basic salaries and are charged to profit or loss as they become payable in accordance with the rules of the MPF Scheme. The assets of the MPF Scheme are held separately from those of the Group in an independently administered fund. The Group’s contributions vest fully with the employees when contributed into the MPF Scheme, which are refunded to the Group when the employee leaves employment prior to the contributions vesting fully, in accordance with the rules of the MPF Scheme.

For Long Services Payment (“LSP”) obligation, the Group accounts for the employer MPF contributions expected to be offset as a deemed employee contribution towards the LSP obligation in terms of HKAS 19.93(a) and it is measured on a net basis. The estimated amount of future benefit is determined after deducting the negative service cost arising from the accrued benefits derived from the Group’s MPF contributions that have been vested with employees, which are deemed to be contributions from the relevant employees.

INCOME TAX

Income tax comprises current and deferred tax and are recognised in profit or loss.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit/(loss) before tax because of income or expense that are taxable or deductible in other years and items that are never taxable or deductible. The Group’s liability for current tax is calculated using tax rates that have been enacted or substantively enacted by the end of the reporting period.

Notes to the Consolidated Financial Statements

4. MATERIAL ACCOUNTING POLICIES (Continued)

INCOME TAX (Continued)

Deferred tax is recognised in respect of temporary differences between the carrying amounts of assets and liabilities in the consolidated financial statements and the amounts used in the computation of taxable profit. Deferred tax liabilities are generally recognised for all taxable temporary differences. Deferred tax assets are generally recognised for all deductible temporary differences to the extent that it is probable that taxable profits will be available against which those deductible temporary differences can be utilised. Such deferred tax assets and liabilities are not recognised if the temporary difference arises from the initial recognition (other than in a business combination) of assets and liabilities in a transaction that affects neither the taxable profit nor the accounting profit and at the time of the transaction does not give rise to equal taxable and deductible temporary differences. In addition, deferred tax liabilities are not recognised if the temporary difference arises from the initial recognition of goodwill.

Unrecognised deferred tax assets are reassessed at the end of each reporting period and are recognised to the extent that it has become probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be recovered. The carrying amount of deferred tax assets is reviewed at the end of each reporting period and reduced to the extent that it is no longer probable that sufficient taxable profits will be available to allow all or part of the asset to be recovered.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

The measurement of deferred tax liabilities and assets reflects the tax consequences that would follow from the manner in which the Group expects, at the end of the reporting period, to recover or settle the carrying amount of its assets and liabilities.

For the purposes of measuring deferred tax for leasing transactions in which the Group recognises the right-of-use assets and the related lease liabilities, the Group first determines whether the tax deductions are attributable to the right-of-use assets or the lease liabilities.

For leasing transactions in which the tax deductions are attributable to the right-of-use assets, no temporary differences arise on initial recognition of the lease liability and the related component of the right-of-use asset's cost.

FOREIGN CURRENCIES

Each entity in the Group determines its own functional currency and items included in the financial statements of each entity are measured using that functional currency. Foreign currency transactions recorded by the entities in the Group are translated into the functional currency at the rates of exchange prevailing at the dates of the transactions. Monetary assets and liabilities denominated in foreign currencies are translated at the rates of exchange ruling at the end of the reporting period. Differences arising on settlement or translation of monetary items are recognised in profit or loss.

Non-monetary items that are measured in terms of historical cost in a foreign currency are translated using the exchange rates at the dates of the initial transactions and not retranslated.

 - (i) has control or joint control over the Group;
 - (ii) has significant influence over the Group; or

5. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES

In the application of the Group's accounting policies, which are described in note 4, the directors of the Company are required to make judgements, estimates and assumptions about the carrying amounts of assets and liabilities that are not readily apparent from other sources. The estimates and underlying assumptions are based on historical experience and other factors that are considered to be relevant. Actual results may differ from these estimates.

The estimates and underlying assumptions are reviewed on an on-going basis. Revisions to accounting estimates are recognised in the period in which the estimate is revised if the revision affects only that period, or in the period of the revision and future periods if the revision affects both current and future periods.

(a) REVENUE RECOGNITION

The Group recognised revenue from provision of financial printing services only to the extent of the recoverable costs incurred until the Group can reasonably measure the variable consideration and its progress towards complete satisfaction of the performance obligation. Thereafter the revenue is recognised over time by reference to the progress towards complete satisfaction of the performance obligation at the reporting date. Variable consideration is estimated based on the Group's efforts or inputs to the satisfaction of performance obligation according to the contract terms.

Significant judgement and estimates are required in determining whether the Group can measure reasonably the outcome of its performance obligation and the uncertainty associated with the estimation of the progress and variable consideration. Incorrect judgement and estimates would affect the Group's operating performance in future years.

(b) IMPAIRMENT ASSESSMENT OF TRADE RECEIVABLES

The Group makes allowances on trade receivables based on assumptions about risk of default and expected loss rates. The allowance for trade receivables reflects lifetime ECL i.e. possible default events over the expected life of the trade receivables, weighted by the probability of that default occurring. Judgement has been applied in determining the level of ECL, taking into account the future cash flow for trade receivables including a probability weighted amount determined by evaluating a range of possible outcomes based on the historical credit losses experience by customers, economic factors as well as forward looking estimates in assessing the likelihood of recovery from customer at the end of each reporting period. While the allowance is considered appropriate, changes in estimation basis or in economic conditions could lead to a change in the level of allowance recorded and consequently on the charge or credit to profit or loss.

Notes to the Consolidated Financial Statements

5. SIGNIFICANT ACCOUNTING JUDGMENTS AND ESTIMATES

(Continued)

(c) IMPAIRMENT OF NON-FINANCIAL ASSETS

In determining whether an asset is impaired, the Group has to exercise judgment and make estimation, particularly in assessing: (1) whether an event has occurred or any indicators that may affect the asset value; (2) whether the carrying value of an asset can be supported by the recoverable amount or, in the case of value in use, the net present value of future cash flows which are estimated based upon the continued use of the asset; and (3) the appropriate key assumptions to be applied in estimating the recoverable amounts including cash flow projections and an appropriate discount rate. When it is not possible to estimate the recoverable amount of an individual asset, the Group estimates the recoverable amount of the cash generating unit to which the assets belongs including allocation of corporate assets when a reasonable and consistent basis of allocation can be established, otherwise recoverable amount is determined at the smallest group of cash generating units, for which the relevant corporate assets have been allocated. Changing the assumptions and estimates, including the discount rate or the growth rate in the cash flow projections, could materially affect the net present value used in the impairment test.

Details of the impairment of non-financial assets are disclosed in note 17 to the consolidated financial statements.

(d) PROVISION FOR LONG SERVICE PAYMENT

The present value of the long service payment depends on a number of factors that are determined on an actuarial basis using a number of assumptions. Any changes in these assumptions will impact the carrying amount of long service payment.

Notes to the Consolidated Financial Statements

6. OPERATING SEGMENT INFORMATION

Information reported to the chief operating decision maker (“CODM”), for the purposes of resource allocation and performance assessment among segments focuses on types of goods or services delivered or provided.

For the prior year, segment disclosures have not been presented as there was only one reporting segment.

During the year, the Group commenced the business engaging in provision of insurance brokerage services along with the acquisition of a subsidiary (as detailed in note 32), and commenced to undertake the entertainment programs production and events planning, both are considered as new operating and reportable segments by the CODM. However, the transactions and amounts involved in provision of insurance brokerage services are immaterial and therefore did not meet the quantitative thresholds for reportable segment. Accordingly, this business was grouped together with the segment of Entertainment.

Segment revenues and results

For the year ended 30th September 2025

	Financial printing HK\$'000	Entertainment and other HK\$'000	Consolidated HK\$'000
Segment revenue	35,092	2,421	37,513
Segment loss	(9,611)	(753)	(10,364)
Share of results of an associate			(169)
Unallocated other income			1,944
Unallocated corporate expenses			(3,435)
Group's loss before tax			(12,024)

The accounting policies of the operating segments are the same as the Group's accounting policies described in note 4. Segment loss represents the loss from each segment without allocation of central administration costs, directors' emoluments, share of results of an associate and interest income. This is the measure reported to the CODM for the purposes of resource allocation and performance assessment.

The CODM makes decisions according to operating results of each segment. No analysis of segment asset and segment liability is presented as the CODM does not regularly review such information for the purposes of resources allocation and performance assessment. Therefore, only segment revenue and segment results are presented.

17. LEASES

(i) RIGHT-OF-USE ASSETS

The carrying amounts of the Group's right-of-use assets and the movements during the year are as follows:

	Leased premises HK\$'000	Office equipment HK\$'000	Total HK\$'000
At 1st October 2023	10,004	1,058	11,062
Depreciation charge for the year	(8,003)	(518)	(8,521)
Impairment loss recognised	(2,001)	(540)	(2,541)
At 30th September 2024 and 1st October 2024	—	—	—
Additions	17,044	1,027	18,071
Depreciation charge for the year	(3,906)	(314)	(4,220)
Impairment loss recognised	(4,650)	—	(4,650)
At 30th September 2025	8,488	713	9,201

For both years, the Group leases offices and equipment for its operations. Lease contracts for leased premises are entered into for a fixed term of 3 years while lease of equipment generally have lease terms of 5 years. Lease terms are negotiated on an individual basis and contain different terms and conditions. Generally, the Group is restricted from assigning and subleasing the leased assets outside the Group. In determining the lease term and assessing the length of the non-cancellable period, the Group applies the definition of a contract and determines the period for which the contract is enforceable.

Impairment assessment

Financial printing unit

As at 30th September 2025, the management of the Group identified the overall operations of financial printing services underperformed and concluded there was indication for impairment and conducted impairment assessment on property, plant and equipment right-of-use assets, which belong to this cash-generating unit with carrying amounts of HK\$49,000 and HK\$11,879,000, respectively.

The recoverable amount of cash-generating unit has been determined based on a value in use calculation. That calculation uses cash flow projections based on financial budgets approved by the management of the Group covering the following 5 years with a pre-tax discount rate of 16.01% (2024: 16.75%). Other key assumptions include relocating offices after the current lease expires and implementing stringent controls on administrative costs. These measures are projected to yield savings of 50% premises rentals and 30% administrative costs, respectively from the year of relocation.

Notes to the Consolidated Financial Statements

17. LEASES (Continued)

(i) RIGHT-OF-USE ASSETS (Continued)

Impairment assessment (Continued)

Financial printing unit (Continued)

Based on the result of the assessment, management of the Group determined that the recoverable amount of the cash-generating unit is lower than the carrying amount. The impairment amount has been allocated to each category of property, plant and equipment and right-of-use assets such that the carrying amount of each category of asset is not reduced below the highest of its fair value less cost of disposal, its value in use and zero. Based on the value in use calculation and the allocation, impairment loss of HK\$Nil and HK\$4,650,000 (2024: HK\$265,000 and HK\$2,541,000) has been recognised against the carrying amount of property, plant and equipment and right-of-use assets, respectively within the relevant functions to which these assets relate.

Entertainment unit

As at 30th September 2025, the carrying amounts of property, plant and equipment and right-of-use assets allocated to the entertainment unit are HK\$891,000 and HK\$1,316,000 respectively. Due to the slower than expected growth at the early stage of the business, the management concluded that there was indication and conducted impairment assessment.

The Group estimates the recoverable amount of several cash-generating units to which the property, plant and equipment and right-of-use assets belongs when it is not possible to estimate the recoverable amount individually including allocation of corporate assets when reasonable and consistent basis can be established.

The recoverable amount of cash-generating unit has been determined based on a value in use calculation. The carrying amount of the relevant assets does not exceed the recoverable amount based on value in use and no impairment has been recognised on this unit.

Notes to the Consolidated Financial Statements

17.LEASES (Continued)

(ii) LEASE LIABILITIES

The lease liabilities are payable:

CONTRACT ASSETS

	2025 HK\$'000	2024 HK\$'000
Contract assets	13	3,748
Less: allowance for credit losses	—	(3,337)
Contract assets, net	13	411

As at 1st October 2023, contract assets amounted to HK\$217,000.

Contract assets are initially recognised for revenue earned from the provision of financial printing services as the receipt of consideration is conditional on the Group's future performance. Upon the rights to consideration become unconditional, the amounts recognised as contract assets are reclassified to trade receivables.

Typical payment terms which impact on the amount of contract assets recognised are as follows:

The Group's provision of financial printing service contracts include payment schedules which require stage payments over the service period once certain specified milestones are reached. The Group requires certain customers to provide upfront payment range from 10% to 40% (2024: 10% to 40%) of total contract sum as part of its credit risk management policies and this has resulted in a contract liability at early stage of the services.

The Group classifies these contract assets as current because the Group expects to realise them in its normal operating cycle.

The Group's trading terms and credit policy with customers are disclosed in note 20 to the consolidated financial statements.

The movements in the lifetime ECL contract assets are as follows:

	2025 HK\$'000	2024 HK\$'000
At beginning of year	3,337	3,337

As at 1st October 2023, contract liabilities amounted to HK\$11,158,000.

All contract liabilities are expected to be settled within the Group's normal operating cycle, and are classified as current liabilities.

Typical payment terms which impact on the amount of contract liabilities recognised are as follows:

When the Group receives an advance payment before the financial printing services commence, this will give rise to contract liabilities at the start of a contract, until the revenue recognised on the relevant contract exceeds the amount of the advance payment.

27. DEFERRED TAX

The following are the major deferred tax assets recognised and movement thereon during the prior year.

At 30th September 2024, 1st October 2024 and 30th September 2025			
—			

At the end of the reporting period, the Group has unused tax losses of approximately HK\$43,035,000 (2024: HK\$27,014,000) available indefinitely for offset against future profits in which HK\$3,354,000 arose from the acquisition of a subsidiary during the year. No deferred tax asset has been recognised in respect of such losses as at both years end due to the unpredictability of future profit streams.

At the end of the reporting period, the Group has deductible temporary differences of HK\$10,210,000 (2024: HK\$10,983,000). No deferred tax asset has been recognised in relation to such deductible temporary difference during both years due to the unpredictability of future profit streams.

28. PROVISION FOR LSP

For the Group's subsidiaries operating in Hong Kong, pursuant to the Employment Ordinance, Chapter 57, the Group has the obligation to pay LSP to qualifying employees in Hong Kong under certain circumstances (e.g. dismissal by employers or upon retirement), subject to a minimum of 5 years employment period.

Furthermore, the Mandatory Provident Fund Schemes Ordinance passed in 1995 permits the Group to utilise the Group's mandatory MPF contributions, plus/minus any positive/negative returns thereof, for the purpose of offsetting LSP payable to an employee (the "Offsetting Arrangement").

The Amendment Ordinance was gazetted on 17th June 2022, which abolishes the use of the accrued benefits derived from employers' mandatory MPF contributions to offset the LSP. The Abolition will officially take effect on the Transition Date (i.e., 1st May 2025). Separately, the Government of the HKSAR is also expected to introduce a subsidy scheme to assist employers for a period of 25 years after the Transition Date on the LSP payable by employers up to a certain amount per employee per year.

Notes to the Consolidated Financial Statements

28. PROVISION FOR LSP (Continued)

Under the Amendment Ordinance, the Group's mandatory MPF contributions, plus/minus any positive/negative returns, after the Transition Date can continue to be applied to offset the pre-Transition Date LSP obligation but are not eligible to offset the post-Transition Date LSP obligation. Furthermore, the LSP obligation before the Transition Date will be grandfathered and calculated based on the Last monthly wages immediately preceding the Transition Date and the years of service up to that date. The Amendment Ordinance has impact on the Group's LSP liability with respect to employees that participate in MPF Scheme and the Group has accounted for the offsetting mechanism and its abolition.

LSP OBLIGATION

Movements in the present value of unfunded LSP obligation in the current year were as follows:

	2025 HK\$'000	2024 HK\$'000
Opening unfunded obligation	635	—
Current service cost	62	59
Interest cost	20	18
Past service cost	—	558
 Closing unfunded obligation	 717	 635

The average duration of the benefit obligation at 30th September 2025 is 9.59 (2024: 10.59) years.

The service cost and the interest expense for the year are included in the employee benefits expenses in profit or loss and other comprehensive income. Of the expenses for the year, HK\$59,000 (2024: HK\$421,000) has been included in cost of sales, HK\$5,000 (2024: HK\$48,000) has been included in selling expenses and HK\$18,000 (2024: HK\$166,000) has been included in administrative expenses.

Significant actuarial assumptions for the determination of the LSP obligation are discount rate of 3% (2024: 3%), expected salary increase of 3% (2024: 3%) and expected investment return on offsettable MPF accrued benefits of 3% (2024: 3%). The sensitivity analysis below have been determined based on reasonably possible changes of the respective assumptions occurring at the end of the reporting period, while holding all other assumptions constant.

- If the discount rate is 100 basis points higher (lower), the LSP obligation would decrease by HK\$88,000 (2024: HK\$90,000) (increase by HK\$88,000 (2024: HK\$90,000)).
- If the expected salary increases (decreases) by 1%, the LSP obligation would increase by less than HK\$1,000 (2024: HK\$1,000) (decrease by less than HK\$1,000 (2024: HK\$1,000)).

The sensitivity analysis presented above may not be representative of the actual change in the LSP obligation as it is unlikely that the change in assumptions would occur in isolation of one another as some of the assumptions may be correlated.

38.FAIR VALUE OF FINANCIAL INSTRUMENTS

The carrying amounts of the Group's financial instruments were reasonably approximate to their fair values as at 30th September 2025 and 2024.

39.FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

The Group's principal financial instruments comprise trade and other receivables, contract assets, rental deposits, cash and bank balance, fixed deposits, trade and other payables, accruals and lease liabilities.

The main risks arising from the Group's financial instruments are interest rate risk, foreign currency risk, credit risk and liquidity risk. The directors of the Company review policies for managing and monitoring each of these risks and they are summarised below.

INTEREST RATE RISK

The Group's exposure to the risk of changes in market interest rates relates primarily to the Group's bank balances with floating interest rates. The Group's fixed deposits, other receivables (Note 22) and lease liabilities (Note 17) carry fixed rates. The Group has not used any interest rate swaps to hedge its interest rate risk.

The directors consider there is no expected significant exposure to interest rate risk and hence, no sensitivity analysis is presented.

Notes to the Consolidated Financial Statements

39. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (Continued)

FOREIGN CURRENCY RISK

The Group's businesses are located in Hong Kong and most of the transactions are denominated in HK\$. Most of the Group's assets and liabilities are denominated in HK\$, except for certain cash on hand and bank balances which were denominated in US\$, Taiwan Dollar, Renminbi and Sterling Pound.

Since HK\$ is pegged to US\$ and bank balances denominated in other foreign currencies were insignificant, the directors consider there is no significant exposure expected on foreign currency transactions and balances and hence, no sensitivity analysis is presented.

CREDIT RISK

The Group's credit risk is primarily attributable to trade and other receivables, contract assets, rental deposits, and cash and bank balances and fixed deposits. The Group's maximum exposure to credit risk which will cause a financial loss to the Group due to failure to discharge a contractual obligation by the counterparties is arising from the carrying amount of the respective recognised financial assets as stated in the consolidated statement of financial position at the end of each of the reporting period.

The credit risk for cash and bank balances and fixed deposits is considered limited as such amounts are placed in reputable banks with high credit rating assigned by international credit rating agencies.

Rental deposits are available for netting off its leases payment in case of default by the counterparty. The Group assessed the ECL for rental deposits are insignificant.

In order to minimise the credit risk, the Group performs impairment assessment under ECL model upon application of HKFRS 9 on other receivables and on amount due from an associate individually. Other monitoring procedures are in place to ensure that follow-up action is taken to recover overdue debts.

The directors consider the credit risk arising from earnest money paid to StarMac insignificant as StarMac is a reputable and financing healthy partner and maintain a strong business relationship with the Group regarding the entertainment segment.

Regarding the amount due from a business associate, the directors consider no loss allowance was required on the ground that the business associate is financially healthy and the amount is subsequently settled.

The Group regularly monitors the business performance of the associate. The Group's credit risks in this balance is mitigated through the value of the assets held by the associate and the power to participate the relevant activities of the entity. The management believes that there are no significant increase in credit risk of these amounts since initial recognition and the Group estimated impairment based on 12m ECL. For the year ended 30th September 2025, the Group assessed the ECL for amounts due from an associate is insignificant and thus no loss allowance is recognised.

Notes to the Consolidated Financial Statements

39. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (Continued)

CREDIT RISK (Continued)

With respect to the credit risk arising from amounts due from shareholders of an associate, the directors consider that the Company's exposure is limited as the counterparties are co-investors and share interests in the associate and the Company does not expect any significant loss for these balances.

Trade receivables and contract assets

In order to minimise the credit risk on trade receivables and contract assets, the management of the Group has delegated a team responsible for determination of credit limits and assessing credit quality of the customers. Other monitoring procedures are in place to ensure that follow-up action is taken to recover overdue debts. The credit quality of the debtors is assessed based on their financial position, past experience and other factors. The Group has policies in place to ensure credit terms are granted to reliable debtors. In addition, the Group performs impairment assessment at the end of each of the reporting period to ensure that adequate impairment losses are made on trade receivables and contract assets. As at 30th September 2025, the Group reversed HK\$257,000 (2024: HK\$3,043,000) impairment allowance for trade receivables, based on the provision matrix.

An impairment analysis is performed at each reporting date using a provision matrix within lifetime ECL. The provision rates for the measurement of lifetime ECL of the contract assets are based on those of the trade receivables as the contract assets and the trade receivables are from the same customer base. The provision rates of trade receivables are based on days past due of trade receivables. The calculation reflects the probability-weighted outcome, the time value of money and reasonable and supportable information that is available at the reporting date about past events, current conditions and forecasts of future economic conditions. Generally, trade receivables are written off if past due for more than two years.

Set out below is the information about the credit risk exposure on the Group's trade receivables using a provision matrix.

LIQUIDITY RISK

In the management of liquidity risk, the Group's policy is to regularly monitor current and expected liquidity requirements on the basis of the maturity of both its financial assets and liabilities and to ensure that it maintains sufficient reserves of cash.

40. CAPITAL MANAGEMENT

The primary objectives of the Group's capital management are to safeguard the Group's ability to continue as a going concern and to maintain healthy capital ratios in order to support its business and maximise shareholders' value. The Group manages its capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Group may adjust the dividend payment to shareholders, share buy-backs or issue new shares.

The Group is not subject to any externally imposed capital requirements. No changes were made in the objectives, policies or processes for managing capital during the years ended 30th September 2025 and 2024.
