## MANAGEMENT DISCUSSION AND ANALYSIS

### BUSINESS REVIEW

For the six months ended 31 October 2025 (herein referred to as the “Reporting Period”), the revenue of the Group amounted to approximately HK\$39.5 million (For the same period of 2024: HK\$46.8 million), representing a decrease of approximately 15.6% compared to the corresponding period in 2024. Net profit attributable to owners of the Company during the Reporting Period was approximately HK\$76.0 million (For the same period of 2024: HK\$30.5 million). The decrease in revenue was mainly due to the decrease in scaffolding, fitting out and other auxiliary services business during the Reporting Period. However, the increase in net profit attributable to owners of the Company was mainly due to the significant increase in fair value on financial assets at FVTPL for the Reporting Period as compared to the corresponding period in 2024.

#### **Scaffolding, Fitting out and Other Auxiliary Services for Construction and Buildings Work**

This segment includes scaffolding services, fitting out and other auxiliary services for construction and buildings work. During the Reporting Period, revenue from this segment was approximately HK\$14.9 million, representing a decrease of approximately HK\$2.3 million as compared to the corresponding period in 2024, due to the number of completed projects was increased and the number of new awarded contracts was decreased in last year.

##### *Scaffolding Services*

In recent years, a number of large-scale infrastructure projects have been carried out by the Government of the HKSAR to boost the construction industry and well-being of the society. For this purpose, a multi-pronged strategy has been adopted by the government to maintain a steady and sustainable land supply with the aim to meet the continuing housing needs in Hong Kong.

On the other hand, in the past few years, the entire scaffolding industry encountered the major difficulty of shortage in supply of skilled workers and experienced personnel. Such shortage of workers resulted in rising labour costs and diminishing profit margins throughout the industry, which further intensified competition within the scaffolding sector. However, it is worth mentioning that the Group’s patented scaffolding system, which is known as “Pik-Lik”, has played a crucial role in saving manpower and enhancing efficiency in the industry.

Leveraging the widespread recognition of the impeccable quality of services and the strong relationships nurtured with clientele, the Group receives positive feedback and prominent business support and takes pride in being one of the leading scaffolding service providers in Hong Kong. During the Reporting Period, the Group provided scaffolding services to 7 ongoing projects, 22 of which were completed on schedule and 3 new contracts were awarded.

##### *Fitting out Services*

For the fitting out services, the Group mainly provided fitting out services to commercial institutions and luxury residence end-users during the Reporting Period. The competition of fitting out services is keen. The Group will continue to proactively acquire new contracts.

### *Other Auxiliary Services for Construction and Buildings Work*

For other auxiliary services for construction and buildings work, the Group mainly provided gondolas, parapet railings and access equipment installation and maintenance services. The Group has been actively cultivating its gondolas rental business over the past several years and has gained positive ‘worth-of-mouth’ in the market. This has enabled the Group to secure a stable number of new contracts despite the competitive local market.

### **Money Lending Business**

The Group’s money lending business is operated by an indirect wholly-owned subsidiary of the Company, Gold Medal Hong Kong Limited (“Gold Medal”) which is a licensed money lender in Hong Kong under the Money Lenders Ordinance (Chapter 163 of the Laws of Hong Kong). The Group earns interest income through providing loans to customers. Customers are usually from referrals from the business network and connections of the management. The day-to-day operation of the money lending business is mainly handled by the directors of Gold Medal, while all loan applications are subject to final review and approval by the Board.

### ***Business Model***

The Group’s money lending business only comprised one business model, namely the money lending model (the “Money Lending Model”). In respect of the Money Lending Model, the Group focused on the provision of loan financing to individuals, private and listed companies.

Gold Medal does not place advertisement to procure new customers from the general public. Instead, Gold Medal acquires its new customers through referrals by the business acquaintances of the management or existing and/or previous customers. When a potential customer is referred to the Group, each loan application will be considered and approved by the Board on a case-by-case basis.

The Group finances the money lending business principally by the cash inflow mainly from the repayment of the existing loan portfolio and the proceeds from the issuance of bonds by Gold Medal and the Company.

As at 31 October 2025, Gold Medal had 115 customers.

### ***Approval of loan application and major terms of the loan agreements***

All loans and loan agreements under the Group’s money lending business have been granted and approved in accordance with the Guidelines and the Procedure Manual of Gold Medal. The Guidelines provide the policies to be observed by Gold Medal for its money lending business, and set out the objective for the money lending business is to earn interest income to generate profits for Gold Medal whilst avoiding incurrence of bad debts. At present, the Guidelines provide that the usual tenure of the loan is between 3 months to 5 years, and for loan less than HK\$5,000,000, the usual interest rate is between 7%-15%, for loan in the amount between HK\$5,000,000 to HK\$20,000,000, the usual interest rate is between 7%-13% and for loan in the amount between HK\$20,000,000 to HK\$40,000,000, the usual interest rate is 7%-10%.

Each loan application is considered on a case-by-case basis. In general, if the intending borrower will not provide any collateral for the borrowing, the Group will assess the overall creditworthiness of the intending borrower. To balance the risk and return, a higher interest rate (when compared with usual secured bank borrowing) will be charged by the Group and such interest rate may be higher than any of the interest rates as specified in the Guidelines.

## ***Credit risk assessment policy***

When evaluating the overall creditworthiness of the intending borrower, Gold Medal has adopted the following practices:

- (i) With regard to private and listed companies, Gold Medal does not approve loan application of intending borrower which conducts business in industries engaging in sensitive or high risk activities for money laundering and terrorist financing, such as the entertainment and the gambling industries.
- (ii) With regard to individual customers, in accordance with the Licensing Condition 15 of the licensing conditions as imposed by the Licensing Court, in respect of unsecured personal loans only, Gold Medal is required to carry out a reasonable assessment of the intending borrower's ability to make repayments in an affordable manner. Therefore, Gold Medal has obtained income proof and asset proof from the intending borrower and also took into account payments needed to meet existing debts (if any) and essential living expenses of the intending borrower when reviewing the loan application.

## ***Existing loans and repayment collection***

In relation to the overdue loans, Gold Medal has sent loan repayment request letter to the relevant borrowers and/or has been conducting negotiation with the relevant borrowers and may consider taking legal action.

The Company has complied with the requirements set out in Chapter 19 and/or Chapter 20 of the GEM Listing Rules when Gold Medal granted the loan to each of the borrowers, whose loan was still outstanding as at 31 October 2025.

The Company does not have any agreement, arrangement, understanding, or undertaking (whether formal or informal and whether express or implied) with a connected person (as defined in the GEM Listing Rules) with respect to the grant of any loan by Gold Medal to the borrower whose loan was still outstanding as at 31 October 2025.

## ***Size of the borrowers***

Gold Medal has reviewed and flexibly adjusted the business strategies, which is to enhance the requirements of the loan granted to the borrowers. For example, the borrowers have to provide the asset proof or income proof to prove they have the ability to repay the loan. As the requirements of the loan granted to the borrowers are higher and the risk for the loan borrowings are lower, the related interest rate will become lower. Thus, the business segment recorded a slight decrease of revenue during the Reporting Period and recorded a turnover of approximately HK\$24.6 million for the Reporting Period (For the same period of 2024: approximately HK\$29.5 million). For the loan portfolio as at 31 October 2025, the principal amount of the loans ranged from approximately HK\$0.1 million to HK\$25.0 million with interest rates ranging from 7.0% to 22% per annum. As at 31 October 2025, approximately 76.1% of the Group's net loan and interest receivables were unsecured. The remaining loan were secured by listed companies shares. As at 31 October 2025, the net amount of loan and interest receivables due from the largest borrower was approximately HK\$28.8 million, being approximately 6.0% to the net loan and interest receivables of the Group. The net amount of loan and interest receivables due from the five largest borrowers (in aggregation with loans granted to persons connected with each other) was less than 20.6% of the net loan and interest receivables of the Group. The five largest borrowers were individuals, all of which were third parties independent of the Company and its connected persons (as defined in the GEM Listing Rules).

All loans and loan agreements under the Group's money lending business have been granted and approved in accordance with the Money Lending Guidelines ("Guidelines") and the Money Lending Procedure Manual ("Procedure Manual") of Gold Medal. The Guidelines provide the policies to be observed by Gold Medal for its money lending business, and set out the objective for the money lending business is to earn interest income to generate profits for Gold Medal whilst avoiding incurrence of bad debts. The Guidelines also provide references or specific requirements for setting of interest rates of the loan, the tenure of the loan and the credit assessment and approval process of each loan. Each loan application will be considered and approved by the Board on a case by case basis. The Board will usually take into account of the applicant's creditability, reputation, financial status, the value of the security (if any), the applicant's past repayment record with Gold Medal, and the proposed tenure, principal amount and interest rate of the loan to consider whether a loan application will be approved and whether a security/guarantee is needed or adequate for a loan.

The Procedure Manual provides the procedures to be observed by Gold Medal for granting and thereafter monitoring the repayment of the loans. In brief, the intending borrower first fills in an application form or the intending borrower communicates in person with the officer of Gold Medal. The officer will then collect documents from the intending borrower for client identification and verification, and has to confirm/enquire if the borrower is a connected person of the Group (as defined in the GEM Listing Rules). The application form will then be reviewed and/or approved by any one director of Gold Medal. The senior management will draft the loan documents in accordance with the terms specified in the approved application form. The responsible officer of the loan application will prepare the Memorandum for Credit Analysis ("Memorandum") which contains the proposed terms of the loan application, the background information of the borrower and the analysis of the credit risks and security. The draft loan documents together with the Memorandum will be passed to the Board for final approval. Based on the information in the Memorandum, the Board makes a conclusion on the credit risk assessment of the customer. Once the loan is approved and granted, the responsible officer has to report the status of the loan repayment monthly and immediately report to the Directors if any default repayment is noted. Generally, if the debt is overdue, Gold Medal will issue reminder letter to the customer and if the debt is overdue for 6 months, Gold Medal will consider to take legal action.

### ***Money Lending***

Gold Medal has reviewed and flexibly adjusted the business strategies, which is to enhance the requirements of the loan granted to the borrowers. For example, the borrowers have to provide the asset proof or income proof to prove they have the ability to repay the loan. As the requirements of the loan granted to the borrowers are higher and the risk for the loan borrowings are lower, the related interest rate will become lower. Hence, our money lending business recorded net impairment losses arising from expected credit losses on loan and interest receivables in the amount of approximately HK\$9.3 million (For the same period of 2024: approximately HK\$8.5 million). Despite such difficulties, the Group will continue putting efforts in the collection procedure of loan receivables.

### **Securities Investment Business**

In order to capture potential returns from the financial market, the Group has formed the investment committee in year 2015/16 and continued investing in Hong Kong-listed securities during the Reporting Period. Due diligence was conducted on every contemplated investment, and each investment was taken into serious consideration to ensure quality risk control and maximise shareholders' benefits.

As at 31 October 2025, the total value of the Group investment portfolio was approximately HK\$134.5 million (30 April 2025: HK\$55.6 million). The Group recorded a net fair value gain of approximately HK\$74.6 million (For the same period of 2024: HK\$22.5 million) for its investment portfolio during the Reporting Period, which was mainly due to the volatility of the stock market in Hong Kong.

None of these investments in the investment portfolio has a value of 5% or more of the Group's unaudited total assets as at 31 October 2025.

## **BUSINESS OUTLOOK**

Following a challenging year of 2025 marked by a slight revenue decline, the outlook for 2026 is cautiously optimistic, driven by a projected recovery in the Hong Kong construction market and sustained government infrastructure spending. The Group will continue to focus on scaffolding, fitting out and other auxiliary services for construction and buildings work; money lending and securities investment business. The Company's core construction services segment is poised to benefit from an anticipated market rebound, though it must navigate intense competition and evolving safety regulations within the scaffolding industry.

After a period of weakness, Hong Kong housing prices are projected to rebound in 2026, potentially supported by interest rate cuts and demand from mainland Chinese buyers. A recovery in the private property market would directly stimulate demand for the Group's fitting-out and scaffolding services for new developments and renovations. While, the fitting-out segment remains sensitive to the broader economic health and consumer confidence.

On the other hand, the scaffolding industry has become increasingly competitive. In response to demand from market development, many contractors have adopted the use of metal scaffolds instead of bamboo scaffolds nowadays. The general higher durability of metal scaffolds and the possibility of calculating load bearing capacity have shortened the time for training of workers. And recent safety concerns coming from the deadly fire tragedy, have prompted discussions about phasing out traditional bamboo scaffolding. The Group holds the view that the regulatory pressure may present an opportunity for the Group to gain market share if the Group can position itself as a provider of safer, modern, and more efficient scaffolding solutions.

After a few years of serious efforts to develop its money lending operations, the money lending business has generated stable income for the Year. The Group has adopted a more prudent and risk-averse strategy in its money lending segment, focusing on enhancing the requirements for loan approval, such as mandating asset or income proof provided by the borrowers. This cautious approach is expected to continue in 2026, prioritizing asset quality and risk mitigation over aggressive loan book expansion. The segment is likely to provide a steady, albeit modest, stream of interest income, provided the local economic environment remains stable.

Looking ahead to 2026, the Group's performance will be intrinsically linked to the positive momentum expected in the Hong Kong construction sector, particularly the government's commitment to infrastructure and the forecast rebound in the property market. The Group is reviewing its existing asset structure and business strategies and may make adjustments to our existing assets structure, with the aim of consolidating our resources, so as to be flexibly prepared for uncertainties in the future. Meanwhile, the Group will strictly adhere to its cost control policy and swiftly adjust business strategies of its scaffolding business in response to ever-changing market dynamics to generate better financial returns for shareholders.

Finally, we will actively explore all suitable investment opportunities to diversify the Group's business horizons and will work hard to strengthen overall business development. The Group's business strategy is in line with the general direction of the government's overall strategic development plans for property construction, infrastructure investment and financial market development.

The Group recorded a net profit attributable to its owners of approximately HK\$76.0 million (2024: HK\$30.5 million) during the Reporting Period.
