(Stock Code: 8189)

VOLUNTARY ANNOUNCEMENT

SIGNING OF STRATEGIC COOPERATION AGREEMENT

This announcement is made by Tianjin TEDA Biomedical Engineering Company Limited (the "Company") on a voluntary basis to provide the shareholders and potential investors of the Company with the latest information in relation to the development of the Company.

The board of directors (the "Board") of the Company is pleased to announce that its controlling subsidiary, Shenzhen Yishu Jingcheng Technology Co., Ltd. ("Yishu Jingcheng"), and China Communications Construction Group Design Institute Co., Ltd. ("Zhongtongjian Design Institute"), the wholly-owned leading consulting and design enterprise under China Communications Construction Group Limited ("Zhongtongjian"), a central state-owned enterprise, have entered into a strategic cooperation agreement.

PRINCIPAL TERMS OF THE STRATEGIC COOPERATION

Leveraging their respective qualifications, technical strengths and project experience, the two parties will carry out in-depth strategic cooperation in fields relating to public data operations and industry large models:

1. **Joint Project Development:** The two parties will jointly develop projects relating to public data operations and industry large models.
2. **Project Construction and Operation:** The two parties will jointly undertake the construction and operation of projects relating to public data operations and industry large models. Yishu Jingcheng will provide end-to-end data services including data cleansing, intelligent data analytics and customised model training; and Zhongtongjian Design Institute will leverage its qualifications, technical strengths and project experience to ensure the smooth delivery of the projects.

REASONS FOR AND BENEFITS OF ENTERING INTO THE STRATEGIC COOPERATION AGREEMENT

Public data operations and industry large models are currently becoming an important engine

driving the high-quality development of the digital economy. The training, optimisation, scenario implementation and personalised service delivery of industry large models all rely on the core support of high-quality, highly secure and highly available data resources. The Board believes that this strategic cooperation carries significant strategic synergy and complementary advantages: Yishu Jingcheng has profound data governance experience and end-to-end data service capabilities; while Zhongtongjian Design Institute possesses top-tier qualifications, rich technical reserves and extensive experience in integrating large-scale projects in the areas of public data operations, high-quality datasets and industry large models.

Through in-depth collaboration between the two parties in the early-stage development, construction and operation of projects relating to public data operations and industry large models, on the one hand, Yishu Jingcheng's data service capabilities can be combined with Zhongtongjian Design Institute's top-tier qualifications and large-scale project experience, so as to jointly expand the public data operations and industry large models market and accelerate the implementation of high-quality projects. On the other hand, this will also help extend Yishu Jingcheng's data governance and AI model training capabilities to a wider range of public data and industry large model application scenarios, further expanding the Group's business boundaries in the AI data services field and laying a solid foundation for the Group's long-term high-quality development.

INFORMATION ON ZHONGTONGJIAN DESIGN INSTITUTE

Zhongtongjian Design Institute is the leading consulting and design enterprise under Zhongtongjian, a central state-owned enterprise. It provides end-to-end consulting services covering pre-project planning, preparation of project proposals, feasibility studies, survey and design, software development, system integration, and post-operation evaluation, with nearly one thousand technical experts across various disciplines. The Company holds top-tier industry qualifications, including Class A qualification for the design of the construction industry (construction engineering), Class A qualification for the electronic communications, broadcasting and television industry, CMMI Level 5, Class A qualification for information security, and Class A qualification for the integration of classified systems. In recent years, the Company has intensified its efforts in the construction and research of public data operations, high-quality datasets, industry large models, digital twins, big data, new infrastructure, cloud computing, blockchain and dual-carbon fields, and has undertaken the design and integration of a number of projects in relation to public data operations, high-quality datasets and industry large models.

INFORMATION ON YISHU JINGCHENG

Yishu Jingcheng is a controlling subsidiary of the Company and focuses on end-to-end data services including data cleansing, intelligent data analytics and customised model training. By leveraging the customer resources it has accumulated, Yishu Jingcheng has built a bridge connecting technology and the market. Through the integration of cutting-edge data technologies with industry needs, it is able to provide data support for model research and development and address the challenges of data governance, while also offering solutions for industrial digital transformation. It possesses end-to-end data project delivery capabilities covering requirement research, software development, system deployment and ongoing technical support.
