

CORPORATE PROFILE

Printed Circuit Boards (“PCB”)

Listed on the Singapore Exchange Securities Trading Limited since 1994 and with thirteen offices worldwide and twelve plants across Southeast Asia, Elec & Eltek International Company Limited is the flagship of our PCB Business.

With a track record in mass producing printed circuit boards (“PCBs”) with microvia holes and ultra fine lines up to 24 layers, our PCB Business has achieved an annual output capacity of approximately 27 million sq.ft. to supply high-density double-sided and multi-layered PCBs and successfully kept pace with the rapid technological developments in the mass production of microvia PCBs. Our diverse customer base includes various worldwide market leaders in communication/networking sector including mobile products, computers and peripherals sector, automotive sector and other electronic products.

Our mission is to be a leading PCB manufacturer that supplies quality high-tech PCBs in mass volume at competitive prices with excellent services.

Liquid Crystal Displays (“LCD”)

Elec & Eltek Display Technology Limited offers integrated design and production expertise for a comprehensive range of LCD products including a variety of display modes (TN, HTN, STN, FSTN and DSTN) as well as IC packages (COG, COB, TAB and COF). Our two plants in Guangzhou and Dongguan, China have over 1,600 experienced staff and manufacture on average 2.3 million sq.ft. laminates annually for local and export sales.

We have a global network of independent sales representatives and distributors in the US, the UK, France, Germany, Singapore, Malaysia, Thailand, Taiwan and Korea. Our customers include OEM of multinational companies from various industries, including educational learning aids, timepiece, telecommunication, automotive, multi-media and electrical appliances.

Our LCD Business is committed to providing total satisfaction to our customers via maintaining high quality standards in our products and services.

Corporate Profile

Magnetic Products

The continuing growth in global demands for broadband and wireless applications has resulted in high demands for data communication magnetic components and provides opportunities of driving our Magnetic Products Business to a new horizon.

With the focus on delivering the best value of our products, E & E Magnetic Products Limited with manufacturing presence in mainland China has been positioned as a major supplier of Gigabit Ethernet Magnetic Modules, Silicon DAA DIB, IEEE 1394 EMI filters etc. in the industry.

The Magnetic Products Business has established a well far-reaching marketing and sales network in the US, Europe, North and Southeast Asia, and through our various sales offices and sales representatives, offers efficient and effective sales and engineering support to our business partners.

Our continuous commitments to work with silicon vendors have further gained approvals from major multinational corporations during the year and render tremendous opportunities for further growth of our business. Together with a strong and dedicated work force, we are committed to timely deliveries of quality products to our valued customers.

Information Technology (“IT”)

Elec & Eltek Technology Investment Limited is the technology flagship of the Elec & Eltek Group which extends our business presence to information technology (“IT”) industry.

Our IT Business will play an instrumental role inside our Group to assist us in transforming the business and technology structure to embrace e-Business and collaborative commerce. Besides, with its headquarter located in Hong Kong and regional offices in Beijing and Guangzhou, China, our IT Business is currently staffed with seasoned IT professionals offering a wide spectrum of services to external customers from total and integrated e-Business enabling solutions, IT application systems covering customer relationship management (CRM), enterprise resource planning (ERP) and supply chain management (SCM) to strategic IT consulting, business process re-engineering and professional services in Hong Kong and China regions.
