Hong Kong profits tax has been provided at the rate of 17.5% (2002: 16%) on the estimated assessable profits for the period. In 2003, the Government enacted a change in the profits tax rate from 16% to 17.5% for the fiscal year 2003/2004. Taxation on overseas profits has been calculated on the estimated assessable profits for the period at the rates of taxation prevailing in the countries in which the Group operates.

Deferred taxation for 2002 has been restated to reflect the adoption of the Hong Kong Statement of Standard Accounting Practice 12 "Income taxes", details of which are set out in section D "Statutory Accounts".

#### (4) Earnings per share

The calculation of earnings per share is based on the Group's profit attributable to shareholders of HK\$390,646,000 (2002:HK\$384,825,000) and 232,190,115 (2002: 232,190,115) shares in issue during the period.

#### 15. Cross-border claims

The Group analyses cross-border claims by exposures to foreign counterparties on which the ultimate risk lies, and is derived according to the location of the counterparties after taking into account any transfer of risk. The transfer of risk from one country to another is recognised if the claims against a counterparty are guaranteed by another party in a different country or if the claims are on an overseas branch of a bank whose head office is located in a different country. Those areas which contribute 10% or more of the aggregate cross-border claims are as follows:-

	Banks and other financial institutions HK\$'000	Public sector entities HK\$'000	Others HK\$'000	Total HK\$'000

The capital adequacy ratio represents the consolidated ratio of the Bank and certain subsidiaries, as specified by the Hong Kong Monetary Authority as at 30 June 2003 and 31 December 2002 computed in accordance with the Third Schedule of the Hong Kong Banking Ordinance.

The adjusted capital adequacy ratio represents the consolidated ratio of the Bank and certain subsidiaries, as specified by the Hong Kong Monetary Authority as at 30 June 2003 and 31 December 2002 computed in accordance with the guideline of "Maintenance of Adequate Capital Against Market Risks" issued by the Hong Kong Monetary Authority taking into account both credit risk and market risk.

The liquidity ratio is calculated as the simple average of each calendar month's average consolidated liquidity ratio for the period calculated for the Bank and a subsidiary as specified by the Hong Kong Monetary Authority during the period in accordance with the Fourth Schedule of the Hong Kong Banking Ordinance.

#### 16. Capital adequacy and liquidity ratios (continued)

The capital base after deductions used in the calculation of the above capital adequacy ratio as at 30 June 2003 and 31 December 2002 and reported to the Hong Kong Monetary Authority is analysed as follows:

#### **D.** Statutory Accounts

The financial information relating to any financial periods included in these interim results does not constitute the Bank's statutory accounts.

The financial information relating to the financial year ended 31 December 2002 is derived from the statutory accounts for that financial year as adjusted to reflect the change in accounting policy in relation to deferred taxation as set out below. Statutory accounts for the year ended 31 December 2002 are available from the Bank's registered office. The auditors have expressed an unqualified opinion on those accounts in their report dated 26 February 2003.

The accounting policies used in preparing these interim results are consistent with those adopted in the 2002 annual accounts except that the Group has changed its accounting policy in relation to deferred taxation following its adoption of the Hong Kong Statement of Standard Accounting Practice ("SSAP") 12 "Income taxes" issued by the Hong Kong Society of Accountants which is applicable to the Group for accounting periods commencing on or after 1 January 2003.

Page 14 of 20

Following the adoption of SSAP 12, which became effective on 1 January 2003, deferred taxation is recognised in full, using the liability method, for all temporary differences between the carrying amounts of assets and liabilities in the balance sheet and the corresponding tax bases used in the computation of taxable profit. Deferred tax assets are recognised to the extent that it is probable that future taxable profit will be available against which the temporary differences can be utilised. Taxation rates enacted or substantively enacted by the balance sheet date are used to determine deferred taxation.

In prior years, deferred taxation was accounted for at the current taxation rate in respect of timing differences between profit as computed for taxation purposes and profit as stated in the accounts to the extent that a liability or an asset was expected to be payable or recoverable in the foreseeable future. Deferred tax assets were not recognised unless their realisation was assured beyond reasonable doubt.

The above change in accounting policy has been applied retrospectively so that the comparative figures presented have been restated to reflect the above changes accordingly.

The opening total equity at 1 January 2003 and 1 January 2002 have been increased by HK\$48,115,000 and HK\$43,987,000 respectively, which represent the unrecognised net deferred tax assets. This change in accounting policy has resulted in an increase in deferred tax assets and a decrease in deferred tax liabilities at 30 June 2003 by HK\$33,470,000 (31 December 2002: HK\$32,002,000) and HK\$14,074,000 (31 December 2002: HK\$16,113,000) respectively. The profit and amount charged directly to equity for the six months ended 30 June 2003 have been increased by HK\$5,708,000 (30 June 2002: HK\$3,021,000) and HK\$6,279,000 (30 June 2002: HK\$318,000) respectively.

# **Interim Dividend**

The Directors are pleased to declare an interim dividend of HK\$0.38 per share to be paid on or after 29 September 2003 to shareholders registered on 29 September 2003.

# **Closure of Register of Members**

The Register of Members will be closed from 23 September 2003 to 29 September 2003, both days inclusive, during which period no transfer of shares will be registered. In order to qualify for the above dividend, all transfers, accompanied by the relevant share certificates, must be lodged with the Bank's Registrars, Computershare Hong Kong Investor Services Limited (19th Floor, Hopewell Centre, 183 Queen's Road East, Hong Kong) for registration not later than 4 p.m. on Monday, 22 September 2003.

# **Financial Results and Operation Review**

The economic conditions in Hong Kong remained stagnant in the first half of 2003, as it sustained the impacts of the Iraq war and the SARS outbreak. Quite a number of business sectors were affected to some degree. These developments, combined with persistent deflation, high unemployment, sluggish consumption and weak loan demand, have dealt a heavy blow to the economy of Hong Kong. The operating conditions in the banking sector remained tough, limiting earnings growth of the industry as a whole.

Comparing the Bank's operating results for the first half of 2003 with the corresponding period of 2002:

Profit after taxation amounted to HK\$390,646,000, representing an increase of 1.5%.

The Bank recorded a marked increase in fee income and a decline in charge on bad and doubtful debts; however, this improvement was partially offset by a decline in net interest income and the increase in provision for debt securities.

Local interest rates still remained at an exceptionally low level, causing interest expense to drop by 11.5% to HK\$379,140,000, despite higher interest rates on foreign currency deposits.

Our endeavour to expand non-interest income business in the first half of 2003 saw favourable results. Non-interest income increased by 23.5% to HK\$227,108,000, mainly attributable to the impressive growth in earnings and handling fees generated from our insurance operation and wealth management business. However, income from credit card operation continued to fall due to adverse operating environment.

Operating income increased by 1.2% to HK\$791,858,000. Operating expenses decreased marginally by 0.6% to HK\$266,924,000, primarily due to the decrease in credit card promotion expenses.

The cost-to-income ratio decreased by 0.6% to 33.7%, compared with the first half of 2002. Operating profit before provisions grew by 2.2% to HK\$524,934,000. The charge for bad and doubtful debts decreased by 20.6% to HK\$52,211,000.

Operating profit increased by 5.6% to HK\$472,723,000.

Advances to customers registered a mild decline by 1.6% from the level a year ago to HK\$29,996,084,000, which is 0.1% lower compared with that at 31 December 2002. Provisions for bad and doubtful debts amounted to HK\$707,738,000, of which 64% is general provision, representing 1.51% of the total advances to customers.

Total customer deposits of HK\$50,083,928,000 was 2.9% higher compared with the same period last year, or an increase of 2.9% as compared with that at 31 December 2002. Certificates of deposit issued amounted to HK\$2,635,552,000. The loan-to-deposit ratio was 55.6%, compared with 59% for the same period of 2002 and 57.8% at 31 December 2002, reflecting high liquidity owing to weak loan demand. The Bank will continue to maintain a prudent lending policy and re-allocate its resources to higher yielding operations and commission income businesses, such as hire-purchase and leasing, wealth management, insurance and securities trading business, etc.

The return on average total assets was 1.21%, slightly higher than 1.2% for the same period in 2002. The return on average shareholders' funds was 9.65%, below the 9.99% recorded in the same period in 2002.

At 30 June 2003, the consolidated capital adequacy ratio was 22.1%, and the average liquidity ratio was 49.1%.

#### Deposits

Total deposits registered a 2.9% increase from 2002 year-end, primarily due to the appreciation of various foreign currency deposits when translated into Hong Kong dollar. As the HK dollar deposit rate remains unattractively low, some depositors re-allocate their funds to other higher-yielding investment products.

As at 30 June 2003, floating rate certificates of deposit and a small amount of US\$ fixed rate retail certificates of deposit totaling HK\$2,635,552,000 were issued, up 28.3% as compared with that at 2002 year-end.

#### Advances to customers

Loans and advances to customers declined, mainly attributable to the contraction of the property lending loan book. Property development and investment financing and Home Ownership Scheme Loan accounted for the decline by different magnitudes; whereas residential mortgage lending remained stable. Continued price competition in the residential mortgage market forced the residential mortgage interest rate for new homes to drop to exceptionally low levels, making mortgage yields extremely low. Despite government measures to stabilise the property market, the market remained subdued. Investor sentiment was further dampened by the outbreak of SARS, causing residential property prices to fall by nearly 10% in the first half of the year.

Syndicated loans financing and corporate lending business grew steadily. Despite a higher loan balance, profit did not grow commensurately, reflecting shrinking interest rates and stiff competition.

Our hire-purchase and leasing subsidiary, Wing Lung Finance Limited, recorded a contraction in loan balance with the reduction in taxi and minibus financing activities. However, operating profit grew steadily, mainly attributable to the growth in other loan types.

#### Bills

The changing payment mode in international trade impacted trade finance operation, causing a decline in business turnover and bills income. It is hoped that gloomy economic sentiment related to the Iraq war and the SARS outbreak will soon dissipate, and Hong Kong's confidence will be rejuvenated with the implementation of the Closer Economic Partnership Arrangement (CEPA), thereby creating more business opportunities in the local market.

The Bank has participated in the "Accounts Receivable Loan Guarantee Scheme" under the "Small and Medium Enterprises Development Support Plan" initiated by the Government in order to give support to the small and medium enterprises in their future business development.

#### Treasury

Combined income from foreign exchange and money exchange business rose by 7.3% from the level a year ago.

In the first half of 2003, US dollar fluctuated widely relative to other major currencies, boosting trading sentiment which helped generate impressive profit for our foreign exchange dealings. However, our money exchange business underperformed the target against difficult market conditions due to SARS outbreak and the resulting plunge in tourism.

As the prospect of a US recovery is still uncertain, the forex market exhibited volatility. As our tourism industry is rebounding now that SARS is behind us, we believe the worst is over and that in the latter half of 2003, foreign exchange and money exchange activities will show improvements.

The Bank has been active in capital market activities, and the result is encouraging. We will keep a keen eye on market development and interest rate trend to formulate appropriate strategies with the objective to achieving better profit growth.

#### Wealth management

Wealth management income registered a substantial growth over the level a year ago. Given the low yield on deposits, depositors have turned to higher-yielding wealth management products as a channel for investment flows.

In June, the Bank was appointed as the Retail Exchange Fund Notes Distributor by the Hong Kong Monetary Authority for the distribution of 2-year and 3-year Exchange Fund Notes in the retail market under the pilot scheme.

#### Credit card

As at 30 June 2003, our card base was in line with the comparable period in 2002; while credit card receivables were lower than that at 2002 year-end. The annualised charge-off ratio for the first six months of the year is 13.3%, an improvement from 2002 year-end. The credit card industry was hard hit under a sagging economy, prolonged deflation and weak domestic consumption, and there is no improvement in employment and personal bankruptcy situation. Given the uncertain economic outlook, the Bank will closely monitor our credit approval policy and contain the card base growth at an acceptable level. The credit data bank, facilitating the sharing of customer positive information among banks, has become operative by stages, and it will help improve bad debt position of the banks.

#### Insurance

In the first half of 2003, Wing Lung Insurance Company Limited and our Insurance Department recorded a marked performance in underwriting business and agency business. Our partnership with Equity Underwriters Limited and Professional Liability Underwriting Services Limited yields good result with substantial growth in gross premium. Sale of Hong Kong Life Insurance Limited products has contributed significant commission income growth over the level a year ago.

#### Securities broking

The Iraq war and the SARS outbreak impacted moderately the local stock market with transaction volume down by 4.5% in the first half of 2003 as compared with the corresponding period in 2002. Our securities operation recorded a better-than-market performance in terms of transaction volume.

The new securities system is expected to become operative towards the end of 2003, hence improving operation efficiency and functional capabilities when fully launched.

#### Branch

As part of our efforts to ensure effective resources allocation, the Grand Century Place Branch was merged with Lai Chi Kok Road Branch on 11 August 2003, thus reducing the total number of local branches from 34 to 33 branches.

Our Los Angeles Branch and Cayman Islands Branch both achieved steady growth.

After the signing of CEPA between the mainland and Hong Kong, the Bank is now qualified for the setting up of a branch in the mainland. A task force has been formed preparing for a branch office across the border.

#### Investment in information technology

The new IBM teller platform front-end terminals have started operating in January and February in branches and some departments. The testing of the back-end host is underway and system implementation is expected to be completed in the latter half of the year.

#### Human resources

At the end of June 2003, total workforce amounted to 1,237, including 1,223 locally, 5 in the mainland and 9 overseas.

With a view to upgrading the skills and knowledge base of our staff so that they are better able to serve business and customers' needs, our Human Resource Department has been actively organising seminars and training sessions related to bank operation, product knowledge, information technology and specialised topics, and sponsoring our staff to attend various training programs as well as continuing professional training in order that they can obtain professional qualifications in respective professions. Exchange visits have been arranged with our overseas correspondents in the sharing of experience in different aspects of business operations.

# **Purchase, Sale or Redemption of Shares**

The Bank has not redeemed any of its shares during the six months ended 30 June 2003. Neither the Bank nor any of its subsidiaries has purchased or sold any of the Bank's shares during the period.

# **Compliance with Disclosure Requirements**

In preparing the interim results for the six months ended 30 June 2003, the Bank has fully complied with the requirements set out in the guideline entitled "Interim Financial Disclosure by Locally Incorporated Authorised Institutions" issued by the Monetary Authority in November 2002.

# **Corporate Governance**

The Bank was in compliance with the Code of Best Practice as set out in Appendix 14 of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited during the six months ended 30 June 2003.
