(f) Goodwill (Continued)

Goodwill arising on new acquisitions effective from 1 July 2001 is recognised as an asset and amortised to the consolidated income statement on a straight line basis over its estimated useful life. Goodwill is stated at cost less accumulated amortisation and any impairment losses. To the extent that negative goodwill relates to an expectation of future losses and expenses that are identified in the plan of acquisition, it is recognised in the consolidated income statement when future losses and expenses are recognised. Any remaining negative goodwill not exceeding the fair value of non-monetary assets acquired is recognised in the consolidated income statement over the weighted average useful life of the non-monetary assets that are depreciable or amortisable. Negative goodwill in excess of the fair values of those non-monetary assets acquired is recognised in the consolidated income statement immediately. Any negative goodwill not yet recognised in the consolidated income statement is presented as a deduction from the assets in the same balance sheet classification as goodwill.

On disposal of a subsidiary or jointly controlled entity, the attributable amount of goodwill or negative goodwill is included in the calculation of the profit or loss on disposal.

The Group has taken advantage of the transitional provisions in SSAP 30 and has made no retrospective adjustment to goodwill or negative goodwill that arose from acquisitions prior to 1 July 2001, which were previously taken to reserves.

(g) Investments in securities

(h) Properties

1. Investment properties

Investment properties are properties held as long term capital investments for rental purposes. They are stated at their open market value which is assessed annually by external qualified valuers, except for investment properties with an unexpired lease term of 20 years or less which are stated at amortised cost. Surpluses arising on revaluation are credited to the investment property revaluation reserve; deficits arising on revaluation are firstly set off against any previous revaluation surpluses on a portfolio basis and thereafter taken to the income statement. Revaluation surpluses or deficits are dealt with in the income statement upon disposal.

Properties under development are stated at cost, including borrowing costs capitalised, if any, and professional fees, less any impairment losses. A property developed for rental purposes is classified as an investment property when the construction work and development have been completed.

2. Properties under development for sale

Properties under development for sale are classified under current assets and stated at the lower of cost and net realisable value. Property development costs include borrowing costs capitalised, if any, and professional fees, plus attributable profit taken to date, less sums received from stakeholders. Net realisable value represents the estimated selling price as determined by reference to management estimates based on prevailing market conditions, less costs to be incurred in selling the property.

When a development property is sold in advance of completion, recognition of profit commences when the sale and purchase agreement has been signed. The profits recognised in a year are computed as a proportion of the total estimated profit to completion and such proportion is calculated by reference to the degree of completion for the property and the terms of payment for the properties pre-sold, with due allowance for contingencies.

When properties are sold, the carrying amount of those properties is recognised as an expense in the period in which the related revenue is recognised. The amount of any write-down of properties to net realisable value is recognised as an expense in the period the write-down occurs. The amount of any reversal of any write-down of properties, arising from an increase in net realisable value, is recognised as a reduction in the amount of properties recognised as an expense in the period in which the reversal occurs.

(i) Other fixed assets

1. Other fixed assets are stated at cost less accumulated depreciation and any impairment losses.

2. Leased assets

Finance charges implicit in the lease payments are charged to the income statement over the period of the leases so as to produce an approximately constant periodic rate of charge on the remaining balance of the obligations for each accounting period. Leases typically run for an initial period of two to five years, with some having the option to renew, at which time all terms are renegotiated. Long term leases usually contain rent review or adjustment clauses and the Group has a regular proportion of its leases up for renewal each year. Certain leases include contingent rentals calculated with reference to revenue from the properties.

Employee Benefits

(a) Retirement benefits

The Group operates a defined contribution provident fund scheme for its employees. The assets of this scheme are held separately from those of the Group, in an independent fund administered by trustees and managed by a professional fund manager.

Contributions are made by both the employer and the employees at a certain percentage of employees' basic salaries, the percentage varying with their length of service. When an employee leaves the scheme prior to his or her interest in the Group's contributions being fully vested, forfeited contributions are credited to reserves of the fund. Depending on the level of reserves, the trustees may credit dividends to members' accounts out of the reserves of the fund. The Group's contributions may be reduced by the forfeited contributions, but there was no such reduction of the Group's contributions during the year. Total contributions made by the Group for the year amounted to \$15.8 million (2002: \$19.5 million) and forfeited sums credited to reserves amounted to \$2.8 million (2002: \$1.0 million).

A master trust Mandatory Provident Fund Scheme (the "MPF Scheme") is operated by an independent service provider. Mandatory contributions are made by both the employer and the employees at 5% of the employees' monthly relevant income, up to a limit of \$20,000. The Group's contributions will be fully and immediately vested in the employees' accounts as their accrued benefits in the scheme. Total MPF contributions made by the Group for the year amounted to \$0.7 million (2002: \$0.4 million).

As the Group's provident fund scheme is an MPF Exempted Occupational Retirement Scheme (the "ORSO Scheme"), eligibility for membership of the ORSO and MPF schemes is identical. New employees are offered a one-off option to join either the ORSO or the MPF scheme.

Staff in the Company's subsidiaries operating in Shanghai, the People's Republic of China ("PRC"), are members of a retirement benefits scheme (the "PRC RB Scheme") operated by the local municipal government in the PRC. The only obligation of the PRC subsidiaries is to contribute a certain percentage of their payroll to the PRC RB Scheme to fund the retirement benefits. The local municipal government in the PRC undertakes to assume the retirement benefits obligations of all existing and future retired employees of the PRC subsidiaries. Total contribution made by the PRC subsidiaries for the year amounted to \$3.7 million (2002: \$3.6 million).

(b) Equity compensation benefits

The Company has a share option scheme which was adopted on 24 November 2000, whereby the Board of Directors (the "Board") of the Company are authorised, at their discretion, to invite employees of the Group, including directors of any company in the Group, to take up options to subscribe for shares of the Company.
